DICTIONARY

OF

MUSIC AND MUSICIANS

Q

QUADRILLE (German *Contretanz*), a dance executed by an equal number of couples drawn up in a square. The name (which is derived from the Italian *squadra*) was originally not solely applied to dances, but was used to denote a small company or squadron of horsemen, from three to fifteen in number, magnificently mounted and caparisoned to take part in a tournament or carousal. The name was next given to four, six, eight, or twelve dancers, dressed alike, who danced in one or more companies in the elaborate French ballets¹ of the 18th century. The introduction of 'contredances' into the ballet, which first took place in the fifth act of Rousseau's 'Fêtes de Polymnie' (1745), and the consequent popularity of these dances, are the origin of the dance which, at first known as the 'Quadrille de Contredances,' was soon abbreviated into 'quadrille.' [The use of the Spanish equivalent, *cuadrilla*, for the party of four *banderilleros* associated with each *torero* in a bull-fight, and the familiar name of a card-game once very popular, may be mentioned.] The quadrille was settled in its present shape at the beginning of the 19th century, and it has undergone but little change, save in the simplification of its steps. It was very popular in Paris during the Consulate and the first Empire, and after the fall of Napoleon was brought to England by Lady Jersey, who in 1815 danced it for the first time at Almack's² with Lady Harriet Butler, Lady Susan Ryde, Miss Montgomery, Count St. Aldegonde, Mr. Montgomery, Mr. Montague, and Mr. Standish. The English took it up with the same eagerness which they displayed with regard to the polka in 1845, and the caricatures of the period abound with amusing illustrations of the quadrille mania. It became popular in Berlin in 1821.

The quadrille consists of five distinct parts, which bear the name of the 'contredances' to which they owe their origin. No. 1 is 'Le Pantalon,' the name of which is derived from a song which began as follows:

Le pantalon
De Madelon
N'a pas de fond,

and was adapted to the dance. The music consists of 32 bars in 6-8 time. No. 2 is 'L'Été,' the name of a very difficult and graceful 'contredanse' popular in the year 1800; it consists of 32 bars in 2-4 time. No. 3 is 'La Poule' (32 bars in 6-8 time) which dates from the year 1802. For No. 4 (32 bars in 2-4 time) two figures are danced, 'La Trénise,' named after the celebrated dancer Trenitz, and 'La Pastourelle,' perhaps a survival of the old 'Pastorale.' No. 5—'Finale'—consists of three parts repeated four times. In all these figures (except the Finale, which sometimes ends with a coda) the dance begins at the ninth bar of the music, the first eight bars being repeated at the end by way of conclusion. The music of quadrilles is scarcely ever original; operatic and popular tunes are strung together, and even the works of the great composers are sometimes made use of.³ The quadrilles of Musard are almost the only exception; they may lay claim to some recognition as graceful original musical compositions.

W. B. S.

QUAGLIATI, PAOLO, born about 1560, was a musician living in Rome, who in 1608 is indicated as holding the position of organist at the Liberian Basilica of Santa Maria Maggiore. In 1585 he edited a collection of Spiritual Canzonets for three voices, containing, besides sixteen numbers by himself, some contributions by Marenzio, Nanino, and Giovanelli. His other publications before 1600 consist of two books of Secular Canzonets *a 3*. Two Canzonets *a 4* with cembalo and lute accompaniment appear in Verovio's collection of 1591, which has been recently republished complete by Alfred Wotquenne. After 1600 he appears to have followed with interest the twofold direction in music emanating from Florence and Venice respectively, the Florentine *Stile rappresentativo* for solo voices, and the Venetian concerted style with

¹ The Ballets were divided into five acts, each act into three, six, nine, or twelve 'entrées,' and each 'entrée' was performed by one or more 'quadrilles' of dancers.

² See Captain Gronow's *Reminiscences* (1861).

³ Some readers may recollect the clever 'Bologna Quadrilles' on themes from Rossini's 'Salut, Mater,' which were published shortly after the appearance of that work. The plates of these quadrilles were destroyed on the publishers learning the source from which the author (popularly supposed to be J. W. Davison) had obtained the melodies. [Hans von Bülow wrote a set of quadrilles on airs from Berlioz's 'Benvenuto Cellini.']

basso continuo. In 1606 he composed an opera with libretto by his pupil Pietro della Valle, entitled 'Carro di fedeltà d' amore,' which was performed on a Carnival car in the streets of Rome. It has five solo voices, and was published in 1611, with the addition of several Arie a 1-3. His other works are a book of Concerted Madrigals a 4 for voices and instruments, with a separate book for Basso Continuo, some other books of Spiritual Madrigals a 1-3, and two books of Sacred Motets and Dialogues for two and three choirs in the concerted style with Basso Continuo (Rome, 1612-27). In Dirnta's 'Il Transilvano,' there appears a toccata by Quagliati for organ or clavier, which has been republished by L. Torchi in *L'Arte Musicale in Italia*, vol. iii.

QUANTZ, JOHANN JOACHIM, celebrated flute-player and composer, born, according to his autobiography in Marpur's *Beiträge zur Aufnahme der Musik*, Jan. 30, 1697, at Oberscheden, a village between Göttingen and Münden. His father, a blacksmith, urged him on his death-bed (1707) to follow the same calling, but, in his own words, 'Providence, who disposes all for the best, soon pointed out a different path for my future.' From the age of eight he had been in the habit of playing the double-bass with his elder brother at village fêtes, and judging from this that he had a talent for music, his uncle Justus Quantz, Stadtmusikus of Merseburg, offered to bring him up as a musician. He went to Merseburg in August 1708,¹ but his uncle did not long survive his father, and Quantz passed under the care of the new Stadtmusikus, Fleischhack, who had married his predecessor's daughter. For the next five and a half years he studied various instruments, Kiesewetter being his master for the pianoforte. In Dec. 1713 he was released from his apprenticeship, and soon after became assistant, first to Knoll, Stadtmusikus of Radeberg, and then to Schalle of Pirna near Dresden. Here he studied Vivaldi's violin-concertos, and made the acquaintance of Heine, a musician in Dresden, with whom he went to live in March 1716. He now had opportunities of hearing great artists, such as Pisendel, Veracini, Sylvius Weiss, Richter and Buffardin, the flute-player. In 1717 he went, during his three months' leave, to Vienna, and studied counterpoint with Zelenka, a pupil of Fux. In 1718 he entered the chapel of the King of Poland, which consisted of twelve players, and was stationed alternately in Warsaw and Dresden. His salary was 150 thalers, with free quarters in Warsaw, but finding no opportunity of distinguishing himself either on the oboe, the instrument for which he was engaged, or the violin, he took up the flute, studying it with

Buffardin. In 1723 he went with Weiss to Prague, and the two played in Fux's opera 'Costanza e Fortezza,' performed in honour of the coronation of Charles VI. Here also he heard Tartini. In 1724 Quantz accompanied Count Lagnasco to Italy, arriving in Rome on July 11, and going at once for lessons in counterpoint to Gasparini, whom he describes as a 'good-natured and honourable man.' In 1725 he went on to Naples, and there made the acquaintance of Scarlatti, Hasse, Mancini, Leo, Feo, and other musicians of a similar stamp. In May 1726 we find him in Reggio and Parma, whence he travelled by Milan, Turin, Geneva, and Lyons to Paris, arriving on August 15. In Paris—where his name was remembered² as 'Quouances'—he remained seven months, and occupied himself with contriving improvements in the flute, the most important being the addition of a second key, as described by himself in his *Versuch einer Anweisung die Flöte . . . zu spielen*, vol. iii. chap. 58 (Berlin, 1752). He was at length recalled to Dresden, but first visited London for three months. He arrived there on March 20, 1727, when Handel was at the very summit of his operatic career, with Faustina, Cuzzoni, Castrucci, Senesino, Attilio, and Tosi in his train. He returned to Dresden on July 23, 1727, and in the following March re-entered the chapel, and again devoted himself to the flute. During a visit to Berlin in 1728 the Crown Prince, afterwards Frederick the Great, was so charmed with his playing, that he determined to learn the flute, and in future Quantz went twice a year to give him instruction. In 1741 his pupil, having succeeded to the throne, made him liberal offers if he would settle in Berlin, which he did, remaining till his death on July 12, 1773. He was Kammermusikus and court-composer, with a salary of 2000 thalers, an additional payment for each composition, and 100 ducats for each flute which he supplied. His chief duties were to conduct the private concerts at the Palace, in which the king played the flute, and to compose pieces for his royal pupil. He left in MS. 300 concertos [but see the *Quellen-Lexikon*, p. 99, on this number] for one and two flutes—of which 277 are preserved in the Neue Palais at Potsdam—and 200 other pieces; flute solos, and dozens of trios and quatuors, of which 51 are to be found at Dresden. His printed works are three—'Sei Sonate' dedicated to Augustus III. of Poland, op. 1, Dresden, 1734; 'Sei duetti,' op. 2, Berlin, 1759; [six sonatas for two flutes, op. 3, of doubtful authenticity, London, Walsh; five sonatas for flutes, also op. 3, Paris, Boivin], a method for the flute—*Versuch einer Anweisung die Flöte traversiere zu spielen*—dedicated to Frederick 'Könige in Preussen,' Berlin, 1752, 4to, with twenty-four copper-

¹ Not 1707, as Mendel states.

² In Boivin's *Catalogue*.

plates. This passed through three (or four) German editions, and was also published in French and Dutch. He left also a serenata, a few songs, music to twenty-two of Gellert's hymns, 'Neue Kirchenmelodien,' etc. (Berlin, 1760), and an autobiography (in Marpurg's *Beiträge*). Three of the Melodien are given by von Winterfeld, *Evangel. Kircheng.* iii. 272. Besides the key which he added to the flute, he invented the sliding top for tuning the instrument. His playing, which was unusually correct for the imperfect instruments of the day, delighted not only Frederick, but Marpurg, a more fastidious critic. He married, not happily, in 1737; and died in easy circumstances and generally respected at Potsdam, July 12, 1773.

All details regarding him may be found in *Leben und Werken*, etc., by his grandson Albert Quantz (Berlin, 1877). F. G.

QUARENGHI, GUGLIELMO, violoncellist and composer, born at Casalmaggiore, Oct. 22, 1826, died at Milan, Feb. 4, 1882. He studied at the Milan Conservatoire, 1839-42, occupied the post of first violoncello at the Scala Theatre in 1850; became professor of his instrument at the Milan Conservatoire in 1851, and in 1879 Maestro di Cappella at the Milan Cathedral. As a composer he contributed an opera entitled 'Il di di Michel'; published in 1863 some church music and transcriptions, as well as an interesting method for the violoncello; a valuable treatise upon the origin of bow instruments precedes this *Metodo di Violoncello* (Milan, 1876), in which he compares the earliest forms with the various barbaric and semi-barbaric instruments previously in use amongst primitive nations. In addition the author gives the 'Personaggi' of Monteverde's 'Orfeo,' and the tuning of the earliest viols. — Riemann, *Lexikon*; Baker, *Biog. Dict. of Music*. E. H.-A.

QUARLES, CHARLES, Mns. B., graduated at Cambridge in 1698. He was organist of Trinity College, Cambridge, from 1688 to 1709. He was appointed organist of York Minster, June 30, 1722; and died at York early in 1727. 'A Lesson' for the harpsichord by him was printed by Goodison about 1788. W. H. H.

QUARTERLY MUSICAL MAGAZINE AND REVIEW, conducted by R. M. BACON of Norwich. [See vol. i. p. 181; vol. iii. p. 680.] G.

QUARTET (Fr. *Quatuor*; Ital. *Quartetto*). A composition for four solo instruments or voices.

I. With regard to instrumental quartets the favourite combination has naturally been always that of two violins, viola, and violoncello, the chief representatives since the days of Monteverde of soprano, alto, tenor, and bass, in the orchestra: in fact, when 'quartet' only is spoken of, the 'string quartet' is generally understood;

any other combination being more fully particularised; and it is to the string quartet we will turn our principal attention. The origin of the quartet was the invention of four-part harmony, but it was long before a composition for four instruments came to be regarded as a distinct and worthy means for the expression of musical ideas. Even the prolific J. S. Bach does not appear to have favoured this combination, though he wrote trios in plenty. With the symphony was born the string quartet as we now understand it—the symphony in miniature; and both were born of the same father, Haydn. [See FORM.]

The early quartets of Haydn seem to us sadly feeble in the present day; there is not enough flesh to cover the skeleton, and the joints are terribly awkward; but there is the unmistakable infant quartet, and certainly not more clumsy and unpromising than the human infant. In the course of his long life and incessant practice in symphonic composition, Haydn made vast progress, so that the later quartets (op. 71, etc.) begin to show, in the lower parts, some of the boldness which had before been only allowed to the 1st violin. Eighty-three quartets of Haydn are catalogued and printed, while of the ninety-three of his contemporary Boccherini, scarcely one survives.

Mozart, with his splendid genius for polyphony as well as melody, at once opened up a new world. In the set of six dedicated to Haydn we notice, besides the development in form, the development of the idea, which it has only been given to Beethoven fully to carry out—the making each part of equal interest and importance. Theoretically, in a perfect quartet, whether vocal or instrumental, there should be no 'principal part.' The six quartets just spoken of were so far in advance of their time as to be considered on all sides as 'hideous stuff.' In our time we find little that is startling in them, except, perhaps, the famous opening of No. 6, which will always sound harsh from the false relations in the second and fourth bars.

Mozart's twenty-six quartets all live, the six dedicated to Haydn and the last three composed for the King of Prussia being immortal.

Those writers whose quartets were simply the echo of Mozart's—such as Romberg, Onslow, Ries, and Pесca—made no advance in the treatment of the four instruments.

It is not our province here to speak of the

growth of the symphonic form as exhibited in the string quartet, this subject having been already discussed under FORM, but rather to notice the extraordinary development of the art of part-writing, and the manner in which the most elaborate compositions have been constructed with such apparently inadequate materials. In these points the quartets of Beethoven so far eclipse all others that we might confine our attention exclusively to them. In the very first (op. 18, No. 1) the phrase

of the first movement is delivered so impartially to each of the four players, as though to see what each can make of it, that we feel them to be on an equality never before attained to. If the 1st violin has fine running passages, those of the 2nd violin and viola are not a whit inferior. Does the 1st violin sing a celestial adagio, the violoncello is not put off with mere bass notes to mark the time. All four participate equally in the merriment of the scherzo and the dash of the finale. This much strikes one in the earlier quartets, but later we find that we are no longer listening to four voices disposed so as to sound together harmoniously, but that we are being shown the outline, the faint pencil sketch, of works for whose actual presentation the most perfect earthly orchestra would be too intolerably coarse. The posthumous quartets are hardly to be regarded as pieces written for violins, but we are rather forced to imagine that in despair of finding colours delicate and true enough the artist has preferred to leave his conceptions as charcoal sketches. This fancy is borne out when we note how large a compass the four parts are constantly made to cover, a space of nearly five octaves sometimes being dashed over, with little care for the inevitable poverty of tone produced.

There is a wide contrast between these stupendous works of genius and the polished and thoroughly legitimate workmanship of Schubert's quartets. Here we find everything done which ought to be done and nothing which ought not. They are indeed irreproachable models. One little point deserves notice here as illustrating the comparative strength of two great men: Beethoven gives frequent rests to one or two of the players, allowing the mind to fill in the lacking harmony, and thus producing a clearness, boldness, and contrast which no other composer has attained; Schubert, on the other hand, makes all four parts work their hardest to hide that thinness of sound which is the drawback of the quartet.

Mention of Spohr's quartets might almost be omitted in spite of their large number and their great beauty. Technically they are no more advanced than those of Haydn, the interest

lying too often in the top part. They also lose much through the peculiar mannerism of the composer's harmony, which so constantly occupies three of the parts in the performance of pedal notes, and portions of the chromatic scale.

Still more than Schubert does Mendelssohn seem to chafe at the insufficiency of four stringed instruments to express his ideas. Not only this, but he fails, through no fault of his own, in one point needful for successful quartet-writing. Beethoven and Schubert have shown us that the theoretically perfect string-quartet should have an almost equal amount of interest in each of the four parts; care should therefore be taken to make the merest accompaniment-figures in the middle parts of value and character. *Tremolos* and reiterated chords should be shunned, and indeed the very idea of *accompaniment* is barely admissible. The quartet, though differing from the symphony only in the absence of instrumental colouring and limitation of polyphony, is best fitted for the expression of ideas of a certain delicacy, refinement and complexity, anything like boldness being out of place, from the weakness of the body of tone produced. Now the chief characteristic of Mendelssohn's music is its broad and singing character, passage-writing is his weak point. Consequently, however good his quartets, one cannot but feel that they would sound better if scored for full orchestra. Take the opening of op. 44, No. 1, for instance: this is not quartet-writing at all; there is a melody, a bass, and the rest is mere filling-up; in the second, we have here as thorough an orchestral theme as could be devised—the ear longs for trumpets and drums in the fourth bar. The name symphony in disguise has often, and not unjustly, been applied to these works. This is curious, because Mendelssohn has shown himself capable of expressing his ideas with small means in other departments. The four-part songs for male voices, for instance, are absolutely perfect models for what such things ought to be. Schumann (op. 41) is the only writer who can be said to have followed in the wake of Beethoven with regard to using the quartet as a species of shorthand. All his three quartets have an intensity, a depth of soul, which, as with Beethoven, shrinks from plainer methods of expression.

Of the earnest band of followers in this school—Bargiel, Rheinberger, and others—all that can be said is that they *are* followers. [Brahms's three quartets, opp. 51, 67, are perfect examples of the art of spreading the interest over all the parts, and the way the return is made to the opening subject of op. 67 at the close of the variations is a touch of unmistakable genius.]

II. Quartets for strings and wind instruments are uncommon, but Mozart has one for oboe,

violin, viola, and violoncello. Next to the string quartet ranks the pianoforte quartet, which, however, is built on quite a different principle: here the composition becomes either equivalent to an accompanied trio, or to a symphony in which the piano takes the place of the 'string quartet,' and the other instruments—usually violin, viola, and violoncello—the place of wind instruments. In any case the piano does quite half the work. Mozart has written two such quartets, Beethoven only one, besides three early compositions, Mendelssohn three, Schumann and Goetz one each, while Brahms (opp. 23, 26, 60) and the modern composers have favoured this form of quartet still more.

III. Vocal quartets are so called whether accompanied by instruments or not. The four-part songs of Mendelssohn have been mentioned. For many years no oratorio was considered complete without its unaccompanied quartet, Spohr having set the fashion with 'Blest are the departed' in the 'Last Judgment.' Modern opera is learning to dispense with concerted music, Richard Wagner having set the fashion. To enumerate the fine operatic quartets from 'Don Giovanni' to 'Faust,' would be useless. [Brahms's first set of 'Liebeslieder' for piano duet and four voices *ad libitum*, was one of the compositions which began his popularity in England; in the second set, and in opp. 92, 103, and 112, he has left notable examples. Henschel's 'Serbisches Liederspiel,' op. 32; Stanford's quartets from Tennyson's 'Princess'; Walford Davies's 'Pastorals'; and Ernest Walker's songs from *England's Helicon*, may also be mentioned.]

IV. The whole body of stringed instruments in the orchestra is often incorrectly spoken of as 'the Quartet,' from the fact that until the time of Beethoven the strings seldom played in other than four-part harmony. It is now the usual custom to write the parts for violoncello and double bass on separate staves; in Germany (and in the present day in England) these instruments are grouped apart, a practice which is decidedly unwise, seeing that the double bass requires the support of the violoncello to give the tone firmness, more especially the German four-stringed instrument, the tone of which is so much lacking in body.

V. The term is also applied to the performers of a quartet, as well as to the composition itself. F. C.

VI. The word is used of a set of stringed instruments, corresponding to the old phrase 'a chest of viols.' Although, accurately speaking, quartets of musical instruments were not employed in chamber music, as we understand the term, until the era of Monteverde (1568-1643), yet the literature and art records of past centuries seem to point to the existence of 'sets' of instruments, analogous in pitch to the soprano,

alto, tenor, and bass voices, from very early times. Some ground for this assumption may be found in the following examples:—The concert of eight flutes (in four sizes) discovered on one of the tombs in the Necropolis of Gizeh, dating—according to Lepsius—from the fifth Dynasty (B.C. 2000) which are reproduced in Carl Engel's *Catalogue* of the Exhibition of Musical Instruments, South Kensington Museum, 1874. Certain Hebrew coins in the British Museum ascribed to Simon Maccabaeus (of the second century of the Christian era) depicting lyres differing in size, shape, and number of strings, and a pertinent passage, quoted from Aristides Quintilianus (about B.C. 110, in Burney's *History of Music*, vol. i. p. 513). Mention may also be made of the string trio portrayed on the splendid Greek Vase in the Munich Museum. The three figures, grouped in the manner of our modern trio performers, appear to be playing ensemble music. Two of the performers have lyres of different sizes and stringing, whilst the third, Polyhymnia, plucks a small harp.

Passing hence to the 11th century, it would appear from Dr. Ruhlmann's *Geschichte der Bogeninstrumente*, that a 'set' of crouths is to be seen in an old MS. prayer-book of that period (vide *Gebetbuch des Erzhs. Leopold d'Heil von Osterreich*. Bibl. zu Kloster Neuburg bei Wien, Codex, No. 98, Fol. 110, XI Jahrh.). Four centuries later (April 14, 1401) Charles VI. granted 'Lettres-Patentes,' to the Society of Minstrels who styled themselves 'joueurs d'Instruments tant haut que bas,' and in the following century the 'sets' of viols began to make their appearance. In Martin Agricola's *Musica Instrumentalis deutsch* (1528), woodcuts of a complete quartet of viols may be seen, as also 'Rebecs,' in four different sizes, which he designates, 'Discantus,' 'Altus,' 'Tenor,' 'Bassus.' [In the same year, in the *Cortigiano* of Bald. Castiglione, there is a reference to music played on 'quattro viole da arco.'] In 1566, Andreas Amati (see that name) made the famous set of bow instruments for the French King Charles IX. It consisted of twelve large and twelve small pattern violins, six tenors and eight basses, and in all probability these instruments were the finest examples of this maker's work. On the backs were painted the arms of France and other devices, and the motto 'Pietate et Justitia.' During the French revolution the mob took these instruments out of the chapel at Versailles (on Oct. 6 and 7, 1789), and destroyed all but two violins which were afterwards recovered by Viotti's pupil, J. B. Cartier. One of the small violins is now, or was recently, the property of Mr. George Somes. In the following century numbers of 'Chests of Viols' (two trebles, two tenors, two basses), for the performance of the elaborate compositions in parts, called 'Fantasies,' were made, and the growing adoption

of instrumental music at the Royal Courts of Europe induced Antonio Stradivari (see that name) to turn his attention to the making of 'sets' of instruments, comprising violins, tenors, and basses. The first 'set' of instruments, recorded as by this maker, is that mentioned in the Arisi MSS., a document written by Desiderio Arisi, a Cremonese priest of the order of St. Jerome and belonging to the Church of St. Sigismondo (see *Antonio Stradivari, his Life and Work*, W. E. Hill & Sons). He states that Stradivari received an order, in 1682, from the Venetian banker Michele Morigi, for a complete 'sett' of instruments, destined to be presented to James II. of England. As no trace of these instruments has as yet been found, their existence rests entirely upon the statement made in the MSS. referred to. In 1690 the same maker produced the so-called 'Tuscan Concerto,' or 'set' of instruments, for Cosmo di Medici. This probably consisted of two or three violins, a contralto (small tenor), a tenore (large tenor), and a violoncello. The tenore of this set¹ has been preserved in its original state, and may be seen, together with the violoncello, in the Musical Institute at Florence. In 1696 Stradivari made the inlaid quintet which for some years was owned by Philip IV. of Spain, and at the end of the 17th century and the beginning of the 18th, the 'set' (dated 1696-1709) destined to have been presented to Philip V. of Spain, but not sold until after Stradivari's death, when his son Paolo disposed of it (in 1775) to a priest named Padre Brambrilla for £148, and later it became the property of Don Carlos, afterwards Charles IV. of Spain. This 'set' consisted of two violins, two violas, one tenore, and a violoncello. The large tenore vanished at the dispersal of the royal collection, and the rest of the 'set' were submitted to such barbarous reparations at the hands of Dom Vincenzo Acenzo and his successor Ortega, that, especially in the case of the violoncello now in the Chapel Royal, Madrid, little of their original character remains.

In modern times 'sets' of instruments by one maker have been largely collected by ardent connoisseurs. We are told that the Dumas family, friends of Beethoven, assembled a quartet of Gio. Paolo Maggini's instruments, violin, viola, violoncello, and small bass, and that with the exception of the last, they are some of the finest specimens of this master's work. The Prince J. de Caraman Chimay owned a very interesting quartet of instruments by Stradivari's pupil (?) Ambrose de Comble of Tournay (about 1750) and also an ornamented quartet (copies of Stradivari) made by J. B. Vuillaume in 1865. [These instruments were exhibited in the Albert Hall in 1885.] Quartets of Stradivari's instruments have been collected by

the following: Count Archinto of Milan, who died in 1860. This quartet passed into the hands of J. B. Vuillaume, and the violoncello (1689) was the instrument used by Mons. Jules Delsart. Nicolo Paganini also owned a quartet by this maker. The Duc de Camposelice, who died in Paris in 1887, possessed about twenty of the great master's instruments, and M. Wilmotte of Antwerp, who died in 1893, left eight violins, two violas, and two violoncellos. M. de St. Senoch's quartet—violin, 1737; second violin, 1704; viola, 1728; violoncello, 1696—was sold after his death in 1886, at the Hôtel Dronot. At the present time Stradivari quartets are owned by Baron Knoop, Dr. R. E. Brandt, and the Herren Mendelssohn. The late Dr. Charles Oldham's quartet was bequeathed to the British Museum. The quartet of Stradivari's employed by Lady Hallé and her collaborators at the St. James's Hall Popular Concerts were dated as follows:—Lady Hallé's violin, 1709; Mr. Ries' violin, 1710; Mr. Gibson's viola, 1728; and Signor Piatti's violoncello, 1720. It would appear that the only present-day instrumentalists who play upon a complete set of Stradivari's instruments are the Joachim quartet. Dr. Joachim's violin is dated 1715, Prof. Hausmann's violoncello, 1724, Prof. Carl Halir's violin is a long-pattern Stradivarius, and the fine viola played upon by Prof. Wirth is lent to the quartet by the Herren Mendelssohn.—Agricola, *Musica Instrumentalis*; Burney, *History of Music*; Hawkins, *History of Music*; de Laborde, *Essai sur la Musique*; Hart, *The Violin*; Hill, *Antonio Stradivari*; Engel, *Catalogue, South Kensington Exhibition of Instruments*, 1874; *Catalogue of Inventions Exhibition*, 1885; von Moser, *Joseph Joachim*. E. H. A.

QUARTET ASSOCIATION, THE. A Society for the performance of chamber music, started in 1852 by Messrs. Sainton, Cooper, Hill, and Piatti, with such eminent artists as Sterndale Bennett, Mlle. Claus, Mme. Pleyel, Arabella Goddard, Pauer, Hallé, etc., at the pianoforts. They gave six concerts each season at Willis's Rooms, but ended with the third season, the time not having yet arrived for a sufficient support of chamber music by the London public. The programmes were selected with much freedom, embracing English composers—Bennett, Ellerton, Loder, Macfarren, Mellon; etc.; foreign musicians then but seldom heard—Schumann, Chernbini, Hummel, etc., and Beethoven's Posthumous Quartets. The pieces were analysed by G. A. Macfarren. G.

QUASI, as if—i.e. an approach to. 'Andante quasi allegretto' or 'Allegretto quasi vivace' means a little quicker than the one and not so quick as the other—answering to poco allegretto, or più tosto allegro. G.

QUATRE FILS AYMON, LES. An opéra-comique; words by MM. Leuven and Bruns-
wick, music by Balfe. Produced at the Opéra-

¹ For the history of the violin of this set see article MOSER.

Comique, Paris, July 15, 1844, and at the Princess's Theatre, London, as 'The Castle of Aymon, or The Four Brothers,' in three acts, Nov. 20, 1844. G.

QUAVER (Ger. *Achtelnote*, whence American 'eighth note'; Fr. *Croche*; Ital. *Croma*). A note which is half the length of a crotchet, and therefore the eighth part of a semibreve; hence the German and American names. It is written thus , its Rest being represented by .

The idea of expressing the values of notes by diversity of form has been ascribed by certain writers to De Muris (about 1340), but this is undoubtedly an error, the origin of which is traced by both Hawkins (*Hist. of Music*) and Fétis (art. 'Muris') to a work entitled *L'antica Musica ridotta alla moderna Prattica*, by Vicentino (1555), in which it is explicitly stated that De Muris invented *all* the notes, from the Large to the Semiquaver. It is, however, certain that the longer notes were in use nearly 300 years earlier, in the time of Franco of Cologne [NOTATION, vol. iii. p. 399], and it seems equally clear that the introduction of the shorter kinds is of later date than the time of De Muris. The fact appears to be that the invention of the shorter notes followed the demand created by the general progress of music, a demand which may fairly be supposed to have reached its limit in the quarter-demisemiquaver, or  of a quaver, occasionally met with in modern music.

The Quaver, originally called *Chroma* or *Fusa*, sometimes *Unea* (a hook), was probably invented some time during the 15th century, for Morley (1597) says that 'there were within these 200 years' (and therefore in 1400) 'but four' (notes) known or used of the musicians, those were the Long, Breve, Semibreve, and Minim'; and Thomas de Walsingham, in a MS. treatise written somewhat later (probably about 1440), and quoted by Hawkins, gives the same notes, and adds that 'of late a New character has been introduced, called a Crotchet, which would be of no use, would musicians remember that beyond the minim no subdivision ought to be made.' Franchinus Gafurius also, in his *Practica Musicae* (1496), quoting from Prosdocius de Beldemandia, who flourished in the early part of the 15th century, describes the division of the minim into halves and quarters, called respectively the greater and lesser semiminim, and written in two ways, white and black (Ex. 1). The white forms of these notes soon fell into disuse, and the black ones have become the crotchet and quaver of modern music.²

¹ There were really five, including the Large, which Morley calls the Double Long.

² It is worthy of notice that in the ancient manuscript by English authors known as the Waltham Holy Cross MS., a note is mentioned, called a 'simple,' which has the value of a crotchet, but is written with a hooked stem like a modern quaver. That a note half the value of a minim should at any period have been written with a hook may help to account for the modern name *crotchet*, which, being clearly derived from the French *croc*, or

The subdivision of the quaver into semiquaver and demisemiquaver followed somewhat later. Gafurius, in the work quoted above, mentions a note $\frac{1}{8}$ of a minim in length, called by various names, and written either  or , but the true semiquaver or *semichroma*, the earliest form of

which was $\frac{1}{8}$, does not appear until later, while the demisemiquaver must have been a novelty as late as 1697, at least in this country, judging from the 13th edition of Playford's *Introduction to the Skill of Musick*, in which, after describing it, the author goes on to say 'but the Printer having none of that character by him, I was obliged to omit it.'

When two or more quavers (or shorter notes) occur consecutively, they are usually grouped together by omitting the hooks and drawing a thick stroke across their stems, thus .

[This grouping, which had been in use for centuries in MS. music, was one of the great difficulties in the way of printing from music-types; it was not overcome until about 1690, when John Heptinstall brought it into use. See HEPTINSTALL, and MUSIC-PRINTING.]

In vocal music, quavers which have to be sung to separate syllables are written detached, while those which are sung to a single syllable are grouped; for example:—

The people that walk-ed in dark

ness, that

F. T.

One quaver of historical importance deserves mention, that which Handel added in pencil to the quintet in 'Jephtha' in 1758, six years after he is supposed to have lost his sight, and which in Schoelcher's words shows that by 'looking very closely at a thing he was still able to see it a little.' G.

QUEEN OF SHEBA. (i.) LA REINE DE SABA, in four acts; words by Barbier and Carré, music by Gounod. Produced at the Opéra, Feb. 28, 1862. Adapted as 'Irene' by H. B. Farnie, and produced as a concert at the Crystal Palace, August 12, 1865. The beautiful *Airs de ballet* contain some of Gounod's best music. G.

(ii.) See KÖNIGIN VON SABA.

QUEISSER, CARL TRAUGOTT, a great trombone player, was born of poor parents at Döben, near Leipzig, Jan. 11, 1800. His turn for music showed itself early, and he soon mastered all the ordinary orchestral instruments. He ultimately confined himself to the viola, and to the trombone, which he may really be said

crotchet, a hook, is somewhat inappropriate to the note in its present form, which has no hook.

to have created, since, for instance, the solo in the *Tuba mirum* of Mozart's Requiem was before his time usually played on a bassoon. In 1817 he was appointed to play the violin and trombone in the town orchestra, and by 1830 had worked his way into the other orchestras of Leipzig, including that of the Gewandhaus. He played the viola in Matthäi's well-known quartet for many years; and was one of the founders of the Leipzig 'Euterpe,' and led its orchestra for a long time; and in short was one of the most prominent musical figures in Leipzig during its very best period.

As a solo trombone-player he appeared frequently in the Gewandhaus Concerts, with concertos, concertinos, fantasias, and variations, many of them composed expressly for him by C. G. Müller, F. David, Meyer, Kummer, and others; and the reports of these appearances rarely mention him without some term of pride or endearment. 'For fulness, purity and power of tone, lightness of lip, and extraordinary facility in passages,' says his biographer, 'he surpassed all the trombone-players of Germany.'¹ There was a Leipzig story to the effect that at the first rehearsal of the Lobgesang, Queisser led off the Introduction as follows:—

to Mendelssohn's infinite amusement. *Se non è vero, è ben trovato.*

Queisser was well known throughout Germany, but appears never to have left his native country. He died at Leipzig, June 12, 1846. G.

QUICK-STEP (Fr. *Pas redoublé*; Ger. *Geschwind Marsch*) is the English name for the music of the Quick march in the army, a march in which 116 steps of 30 inches go to the minute. (See Boose's *Journal of Marches, Quicksteps, Dances*, etc.) It may be well to mention that in the Slow march there are 75 steps of 30 inches, and in the 'Double' 165 of 33 inches. [See MARCH, vol. iii. p. 50.] G.

QUILISMA. An ancient form of Nenma, representing a kind of shake. [See NOTATION, vol. iii. p. 396.] W. S. R.

QUINIBLE. See QUINTOYER.

QUINT. An organ stop which causes the fifth above a given note to sound as well as the note belonging to the key which is pressed down. From the note and its fifth there arises a differential tone an octave below the note. By this mixture an organ with 16-ft. pipes can be made to sound as if with 32-ft. pipes; that is the pitch of the lowest note, but of course it sounds with far less energy than if properly produced with a 32-ft. pipe. T. E.

QUINTA FALSA (False Fifth). The forbidden interval between Mi in the Hexachordon durum, and Fa in the Hexachordon naturale—

the Diminished Fifth of modern music. [See MI CONTRA FA.] W. S. R.

QUINTE. The name given in France, during the latter half of the 17th and part of the 18th centuries, to the now obsolete five-stringed tenor viol. Five-stringed viols were amongst the earliest in use. Praetorius (*Organographia*, 1619) says they were employed in ancient times, and Agricola (*Musica Instrumentalis*, 1532) gives the tuning of the five-stringed viola then in vogue. Although composers of vocal music during the 16th century not infrequently called their tenor part 'Quinte' or 'Quintus,' viols of that denomination remained under the title of tenor until a later period; and probably the first instance where 'Quintua' designates a musical instrument occurs in the overture to Claudio Monteverde's opera, 'Orfeo' (Venice, 1609-1613). *L'État de France*, in 1683, gives the name of 'Foesart,' who played the 'Quinte de Violon' in the Queen's band, and in 1712-13 the Paris opera orchestra included two 'Quintes' amongst the instruments. In 1773 there were four 'Quintes' amongst the musicians of the 'Grande Chapelle,' and 'Quintes' were employed in all the orchestras. Jean Jacques Rousseau (*Dictionnaire de Musique*, Paris, 1708) gives a good deal of information concerning the 'Quinte.' Under 'Viole' he says that in France the 'Quinte' and the 'Taille' (a large six-stringed tenor viol), contrary to the Italian custom, played the same part, and under 'Partie' mentions that the 'Quinte' and 'Taille' were united under the name 'Viole.' The highest and lowest notes of these instruments, according to the same writer, were—

from which it is to be inferred that the tuning was the same as that given by Agricola in 1532, i.e.

In England the two tenor viols which formed a part of the 'Chests of six Viols,' so much in vogue during the 17th and beginning of the 18th centuries, were probably identical with the 'Quinte' and 'Taille'; but the French title was never adopted in this country. The bulky size of the 'Quinte' rendered it such an awkward instrument to play upon that its dimensions gradually diminished from century to century, and when the violin came into more general use, it melted into the 'Haute Contra' (alto viol). In the second half of the 18th century it developed into a tenor violin with four strings, and adopted the C clef on the third line which

¹ *Allg. musikalische Zeitung*, July 8, 1846.

was formerly the clef of the 'Haute Contre' or alto viol. (See TENOR VIOL.)—Agricola (Martinus), *Musica Instrumentalis*; Praetorius, *Organographia*; Rousseau (J. J.), *Dictionnaire de Musique*; La Borde, *Essai sur la Musique*; Grillet (Laurent), *Ancêtres du Violon*; Hart, *The Violin*. E. H. A.

QUINTET (Fr. *Quintuor*; Ital. *Quintetto*). A composition for five instruments or voices with or without accompaniment.

I. Quintets for strings have been far less often written than quartets, owing to the greater complexity demanded in the polyphony. Boccherini, however, published 125, of which twelve only were written for two violins, two violas, and one violoncello, the others having two violoncellos and one viola. The former is the more usual choice of instruments, probably because the lower parts are apt to be too heavy sounding with two violoncellos, owing to the greater body of tone in this instrument. Schubert's noble Quintet in C (op. 163) is for two violoncellos, but the first is used constantly in its upper octave, soaring above the viola. Onslow's—thirty-four in number—are for a double bass and violoncello.

Beethoven's two Quintets, in E \flat and C, belong to his earlier periods, and have therefore none of the extraordinary features of the later quartets. Mendelssohn's Quintet in B \flat (op. 87) is so orchestral as to seem almost a symphony in disguise, but that in A (op. 18) is an exquisite specimen of what a string quintet should be.

Many other combinations of five instruments have found favour with musicians, mostly including a pianoforte. Thus there is Mozart's Quintet in E \flat for oboe, clarinet, horn, bassoon, and piano—which the composer esteemed the best thing he ever wrote,—the beautiful one for clarinet and strings, and another for the piquant combination of flute, oboe, viola, violoncello, and harmonica. Perhaps the most effective association is that of piano, violin, viola, violoncello, and double bass, as in Schubert's well-known 'Trout' Quintet (op. 114). [The splendid quintets of Schumann and Brahms for piano and strings are for the ordinary combination above referred to, as are also those of Dvořák, Dohnányi, and others. The quintet by Brahms for clarinet and strings is one of his most beautiful works.] Beethoven's quintet for piano and wind instruments (op. 16), in E \flat is a noble representative of a very small class. Hummel has also written a well-known one.

II. In vocal music none who have ever heard it can forget the admirable quintet (for two soprani, contralto, tenor, and bass) which forms the finale to Act I of Spohr's 'Azor and Zemira.' In modern opera the most striking specimen occurs in Wagner's 'Meistersinger.' Five-part harmony has a peculiarly rich effect, and deserves to be more practised than it is, especially in

oratorio chorus. It is, however, by no means easy to write naturally. F. C.

QUINTON [See VIOL, TREBLE].

QUINTOYER (Old Eng. Quinible). To sing in Fiftie—a French verb, in frequent use among extempore Organisers during the Middle Ages. [See ORGANUM, PART-WRITING.] W. S. R.

QUINTUPLE TIME. The rhythm of five beats in a bar. As a rule quintuple time has two accents, one on the first beat of the bar, and the other on either the third or fourth, the bar being thus divided into two unequal parts. On this account it can scarcely be considered a distinct species of rhythm, but rather a compound of two ordinary kinds, duple and triple, employed alternately. Although of little practical value, quintuple time produces an effect sufficiently characteristic and interesting to have induced various composers to make experiments therein, the earliest attempt of any importance being a symphony in the second act of Handel's 'Orlando' (1732), in which the hero's perturbation is represented by this peculiar time (see Burney, *History*, iv. 364). The same rhythm occurs in an air to the words 'Se la sorte mi condanna' in the opera of 'Ariadne' by Adolphi, written in 1750, and it is also met in some of the national airs of Spain, Greece, Germany, etc. Thus Reicha, in a note to No. 20 of his set of 36 fugues (each of which embodies some curious experiment in either tonality or rhythm), states that in a certain district of the Lower Rhine, named Kochersberg, the airs of most of the dances have a well-marked rhythm of five beats, and he gives as an example the following waltz:—

In the above example the second accent falls on the third beat, the rhythm being that of 2-8 followed by 3-8, and the same order is observed in a charming movement by Hiller, from the Trio, op. 64.

In Reicha's fugue above referred to, the reverse is the case, the fourth beat receiving the accent, as is shown by the composer's own time-signature, as well as by his explicit directions as to performance. The following is the subject:—

Other instances of quintuple rhythm are to be found in a Trio for strings by K. J. Bischoff, for which a prize was awarded by the Deutsche Tonhalle in 1853; in Chopin's Sonata in C minor, op. 4; in Hiller's 'Rhythmische Studien,' op. 52; in 'Viens, gentille Dame'; in Boieldieu's 'La Dame blanche'; Löwe's Ballad 'Prinz Eugen'; a number in Rubinstein's 'Tower of Babel,' etc. Another characteristic example

occurs in the 'Gypsies' Glee,' by W. Ræve (1796). This may fairly be considered an example of genuine quintuple rhythm, for instead of the usual division of the bar into two parts, such as might be expressed by alternate bars of 3-4 and 2-4, or 2-4 and 3-4, there are five distinct beats in every bar, each consisting of an accent and a non-accent. This freedom from the ordinary alternation of two and three is well expressed by the grouping of the accompaniment. [The same true quintuple time, as distinguished from a combination of triple and duple time, distinguishes the best-known example of all, the second movement of Tchaikovsky's 'Pathetic' symphony. The passage in the third act of 'Tristan und Isolde,' occurring at a most exciting moment in the drama, is apt to escape the attention of many hearers who are only conscious of the impatient effect it produces. See RHYTHM.]

F. T.

QUINTUS (the Fifth). The Fifth Part in a composition for five voices; called also Pars quinta and Quincuplum. In music of the 15th and 16th centuries, the Fifth Part always corresponded exactly in compass with one of the other four; it would, therefore, have been impossible to describe it as First or Second Cantus, Altus, Tenor, or Bassus.

W. S. R.

QUIRE. Another way of spelling CHOIR.

G.

QUODLIBET (Lat. 'What you please'), also called QUOTLIBET ('As many as you please'), and in Italian MESSANZA or MISTICHANZA ('A mixture'). This was a kind of musical joke in the 16th and early part of the 17th centuries, the fun of which consisted in the extempore juxtaposition of different melodies, whether sacred or secular, which were incongruous either in their musical character, or in the words with which they were associated; sometimes, however, the words were the same in all parts, but were sung in snatches and scraps, as in the quodlibets of Melchior Franck. (See Praetorius, *Syntagma Musicum*, tom. iii. cap. v.) There were two ways of performing this: one was to string the melodies together simply and without any attempt at connecting them by passages such as those found in modern 'fantasias'; the other, the more elaborate method, consisted in singing or playing the melodies simultaneously, the only modifications allowed being those of time. The effect of this, unless only very skilful musicians engaged in it, must have been very like what we now call a 'Dutch chorus.' This pastime was a favourite

one with the Bachs, at whose annual family gatherings the singing of quodlibets was a great feature (see Spitta, *J. S. Bach* (Engl. transl.) i. 154, iii. 172-6). Sebastian Bach himself has left us one delightful example of a written-down quodlibet, at the end of the '30 variations' in G major, for a detailed analysis of which see Spitta. The two tunes used in it are 'Ich bin so lang bei dir nicht gewest,' and 'Kraut und Rüben, Haben mich vertrieben.' One of the best modern examples, although only two themes are used, is in Reinecke's variations for two pianos on a gavotte of Gluck's, where, in the last variation, he brings in simultaneously with the gavotte the well-known minuet of Bach which occurs in the third 'English' suite. A good instance, and one in which the extempore character is retained, is the singing of the three tunes 'Polly Hopkins,' 'Buy a Broom,' and 'The Merry Swiss Boy' together, which was formerly sometimes done for a joke. A very interesting specimen of a 16th-century quodlibet by Johann Gödel, consisting of five chorale-tunes—viz. (1) 'Erhalt uns, Herr bei deinem Wort,' (2) 'Ach Gott, von Himmel,' (3) 'Vater unser im Himmelreich,' (4) 'Wir glauben all,' (5) 'Durch Adam's Fall'—is given as an appendix to Hilgenfeldt's *Life of Bach*. We quote a few bars as an example of the ingenuity with which the five melodies are brought together:—

RAAFF, ANTON, one of the most distinguished tenors of his day; born 1714 in the village of Holzem, near Bonn, and educated for the priesthood at the Jesuit College at Cologne. His fine voice so struck the Elector, Clement Augustus, that he took him to Munich, where Ferrandini brought him forward in an opera. After studying for a short time with Bernacchi at Bologna, Raaff became one of the first tenors of his time. In 1738 he sang at Florence on the betrothal of Maria Theresa, and followed up this successful début at many of the Italian theatres. In 1742 he returned to Bonn, and sang at Vienna in Jommelli's 'Didone' (1749), to Metastasio's great satisfaction. In 1752 he passed through Italy to Lisbon; in 1755 he accepted a summons to Madrid, where he remained under Farinelli's direction, enjoying every favour from the court and public. In 1759 he accompanied Farinelli to Naples. In 1770 he entered the service of the Elector, Karl Theodor, at Mannheim. In 1778 he was in Paris with Mozart, and in 1779 he followed the court to Munich, where Mozart composed the part of Idomeneo for him. He died in Munich, May 27, 1797. Mozart in his letters speaks of him as his 'best and dearest friend,' especially in one from Paris, dated June 12, 1778. He composed for him in Mannheim the air, 'Se al labbro mio non credi' (Köchel, 295). C. F. P.

RABAN, EDWARD, was an Englishman, and after having fought in the wars of the Netherlands, from the year 1600, settled at Edinburgh, at the Cowgate Port, as a printer, in 1620. One work with the Edinburgh imprint alone remains, and in the same year he removed to St. Andrews, and finally to Aberdeen in 1622. In this place he was under the patronage of the town dignitaries, and had the friendship of Bishop Forbes. It was, no doubt, these circumstances that enabled him to carry on his craft unmolested, unlike John Forbes of the same city who, at a later date, suffered fine and imprisonment for infringing the monopoly held by the King's printer in Scotland. Raban at once commenced the printing of liturgical works, including a prayer-book, dated 1625, which is stated to have the music to the Psalms. In 1629 he printed two editions of *CL. Psalmes of the princelie prophet David*, a quarto for binding with Bibles and a 16mo edition. Also, in 1633, two editions of *The Psames of David in prose and metre according to the Church of Scotland*. . . . In *Aberdene, imprinted by Edward Raban for David Melvill*, 1633, 8o. These have the music to the Psalms printed from movable type. Though probably not so well executed as the music of Andro Hart of Edinburgh, these are of great interest in the

history of Scottish music-printing. Raban gave up business in 1649, dying in 1658. F. K.

RACCOLTA GENERALE DELLE OPERE CLASSICHE MUSICALI. A collection of pieces of which the full title is as follows: 'Collection générale des ouvrages classiques de musique, ou Choix de chefs d'œuvres, en tout genre, des plus grands compositeurs de toutes les Écoles, recueillis, mis en ordre et enrichis de Notices historiques, par Alex. E. Choron, pour servir de suite aux Principes de Composition des écoles d'Italie.' A notice on the wrapper further says that the price of the work to subscribers is calculated at the rate of 5 sous per page. The numbers were not to be issued periodically, but the annual cost to subscribers was fixed at from 36 to 40 francs. The work was in folio, engraved by Gillé fils, and published by Leduc & Co., Paris, Rue de Richelieu, 78, with agents at Bordeaux, Marseilles, Leipzig, Munich, Vienna, Lyon, Turin, Milan, Rome, and Naples. It was got up with great care and taste, but seems to have ceased after about six numbers.

For ALFIERI's 'Raccolta di musica sacra' see vol. i. p. 66. G.

RACHMANINOV, SERGEÏ VASSILIEVICH, a pianist of repute, and one of the most talented of the younger Moscow school of composers; born in the Government of Novgorod, April 1 (March 20, O.S.), 1873. At nine years of age he entered the St. Petersburg Conservatoire, where he remained three years, making the pianoforte his chief study. Three years later, in 1885, he was transferred to the Conservatoire at Moscow. Here he studied the pianoforte, first with Tchaikovsky's friend, Zvierev, and afterwards with Siloti. His masters for theory and composition were Taneiev and Arensky. The musical influences of Moscow are clearly evident in the works of Rachmaninov. In 1892 he won the gold medal for composition, and on quitting the Conservatoire, in the same year, he started on a long concert-tour through the chief towns of Russia. In 1899 Rachmaninov appeared in London at one of the concerts of the Philharmonic Society, and made a good impression in the threefold capacity of composer, conductor, and pianist. In 1893 he was appointed professor of pianoforte to the Maryinsky Institute for girls, in Moscow, a post which he still holds. Several of Rachmaninov's songs and pianoforte pieces, especially the famous prelude in C# minor, have attained immense popularity. His compositions are as follows:—

A. ORCHESTRAL

'The Rock,' fantasia, op. 7; Oopsy Capriccio, op. 12; Symphooy, op. 13 (1895).

B. PIANOFORTE

Two Concertos, op. 1 and 18; two Suites, op. 5 and 17; six pieces for four hands, op. 11; five pieces for two hands, op. 3

(including the *G♯* minor prelude); seven pieces, op. 10; six Moments Musicaux, op. 18; variations on the theme of Chopin's Prelude in C minor, op. 22.

C. CHAMBER MUSIC

Elegiac trio (In memory of Tchaikovsky) for pianoforte, violin, and violoncello, op. 9 (1893); sonata for violoncello and pianoforte, op. 19; two pieces for violin and pianoforte, op. 8; two pieces for violoncello and pianoforte, op. 2.

D. VOCAL

Six choruses for female voices, op. 15; humorous chorus for mixed voices; Cantata, 'Spring,' for chorus, baritone solo, and orchestra, op. 20; six songs, op. 4; six ditto, op. 8; 12 ditto, op. 14; 'Euse' (to Beethoven's Fifth Symphony), op. 17. 'Alkeu,' opera in one act, first performed at the Imperial Opera-House, Moscow, 1892.

R. N.

RACKET, RACKETT, or RANKETT (also known as Cervelat). An obsolete instrument of small cylindrical bore, played with a double reed of the bassoon type. It is described both by Praetorius and by Merseune, and was made both of wood and ivory. The *apparent* length of the instrument was very small, as the bore doubled many times upon itself, the true length being thus disguised. In addition to the holes or ventages closed by the tips of the fingers in the usual way, the doubling of the tube allowed of the piercing of several holes which were closed by other joints of the fingers, or soft parts of the hand. According to Praetorius the rackets were made in families, the compass of a set of four extending from C to *d'*. D. J. B.

RADICATI, FELICEDA MAURIZIO DI, violinist and composer, born at Turin in 1778; died, according to the *Quellen-Lexikon*, at Vienna, April 14, 1823. His parents belonging to the poor nobility of Italy, the child's singular interest in music was encouraged the more, and he began his studies at a very early age. Pugnani taught him the violin. Profiting by the precepts of this great master, Radicati acquired many of Pugnani's finer qualities, and, on reaching manhood, toured with unqualified success in Italy, France, and England. The love of his native land, however, and the additional inducement of a post at the Court of King Victor Emanuel V., drew him back to Italy, whither he returned, accompanied by his accomplished wife Teresa BERTINOTTI. In the year 1815 the town of Bologna announced a competition for the post of leader of the town orchestra—at that time celebrated; but when it came to be known that Radicati had entered the lists, no one would contend against him; with the result that he was elected to the post on March 31, 1815, without contest. After this his talents obtained for him the appointments of director of the great orchestra of the Basilica di S. Pietro, and professor of the violin at the famous Liceo Filarmonico of Bologna. His career was calamitously cut short, in the prime of life, by a fatal carriage accident.

The authorities on the subject of Radicati's career give but few dates. According to the *Quellen-Lexikon* he was in London 1806-7, and toured in Lombardy (Fétis, *Biog. des Mus.*) in 1816. His principal biographer, Carlo

Pancaldi—a Bolognese lawyer—wrote an eulogy in his memory, but unfortunately mentions but one date, that of his election at Padua on March 31, 1815. As a violinist his qualities appear to have been those of a musician rather than those of a virtuoso. Pancaldi tells us that his style was dignified and his tone sonorous, that he counted Haydn, Beethoven, and Romberg among his friends, and that he was well educated in other respects than music. As a composer he devoted himself especially to perfecting the Quartet, which at that time—in spite of Boccherini's influence—was less thought of in Italy than in other countries. It would seem that his interest in the cause of chamber music was aroused by a German critic, who, reviewing some of Radicati's quartets performed in Vienna, remarked that 'The Italian mind is not apt to compose works of the highest character; in this matter the Germans seem to take precedence. Radicati's quartets are nothing more than melodies accompanied by harmonies in secondary parts.' This so incensed Radicati that he gave a number of concerts of Italian music in Vienna, in order that the German critic might be convinced of his error; and, on his return to Italy, not only devoted himself to the writing of many quartets and quintets, but also endeavoured to induce other Italian composers to do likewise, and thus efface the stigma cast upon Italian music by the Germans. Besides his numerous contributions to chamber music, Radicati wrote six or seven operas, among which are included his 'Ricardo Cuor di Leone,' produced at Bologna; a couple of farces, 'I due Prigionieri,' 'Il Medico per forza'; a concerto for violin, and a number of small 'Arias,' 'Cavatinas,' etc. All these were in the possession of his son in 1828. The most complete list of his compositions—published and MS.—is probably that given in the *Quellen-Lexikon*. Radicati's wife and his son Karolus, who became a lawyer, erected a monument to his memory in the Campo Santo at Bologna.—Pancaldi (Carlo), *Cenni intorno Felice Radicati*, Bologna, 1828; Eitner, *Quellen-Lexikon*; Fétis, *Biog. des Mus.*; Baker, *Biog. Dict. Mus.* E. H. A.

RADZIWIŁŁ, ANTON HEINRICH, Prince of, Royal Prussian 'Statthalter' of the Grand Duchy of Posen, born at Wilna, June 13, 1775, married in 1796 the Princess Luise, sister of that distinguished amateur Prince Louis Ferdinand of Prussia. [See vol. ii. p. 772.] Radziwiłł was known in Berlin not only as an ardent admirer of good music, but as a fine violoncello player, and 'a singer of such taste and ability as is very rarely met with amongst amateurs.'¹ Beethoven was the great object of his admiration. He played his quartets with devotion, made a long journey to Prince Galitzin's on purpose to hear the Mass in D, was invited by

¹ A.M.Z. 1831, July 27. See also 1803, June 25; 1814, Sept. 23.

JOSEPH JOACHIM RAFF

Beethoven to subscribe to the publication of that work, and indeed was one of the seven who sent in their names in answer to that appeal. To him Beethoven dedicated the Overture in C, op. 115 (known as 'Namensfeier'), which was published as 'Grosses Ouverture in C dur *gedichtet*,' etc., by Steiner of Vienna in 1825.

Radziwill was not only a player, a singer, and a passionate lover of music, he was also a composer of no mean order. Whistling's *Handbuch* (1828) names three Romances for voice and PF. (Peters), and songs with guitar and violoncello (B. & H.), and Mendel mentions duets with PF. accompaniment, a Complaint of Maria Stuart, with PF. and violoncello, and many part-songs (still in MS.) composed for Zelter's Liedertafel, of which he was an enthusiastic supporter.¹ But these were only preparations for his great work, entitled 'Compositions to Goethe's dramatic poem of Faust.' This, which was published in score and arrangement by Trautwein of Berlin in Nov. 1835, contains twenty-five numbers, occupying 589 pages. A portion was sung by the Singakademie as early as May 1, 1810; the choruses were performed in May 1816, three new scenes as late as Nov. 21, 1830, and the whole work was brought out by that institution after the death of the composer, which took place April 8, 1833. The work was repeatedly performed during several years in Berlin, Danzig, Hanover, Leipzig, Prague, and many other places, as may be seen from the index to the *A. M. Zeitung*. It made its appearance in a performance at Hyde Park College, London, on May 21, 1880, under the direction of L. Martin-Eiffe. A full analysis of it will be found in the *A. M. Zeitung* for 1836, pp. 601, 617; and there is a copy in the British Museum.

G.

RAFF, JOSEPH JOACHIM, born May 27, 1822, at Lachen on the Lake of Zurich. He received his early education at Wiesenstetten in Wurtemberg, in the home of his parents, and then at the Jesuit Lyceum of Schwyz, where he carried off the first prizes in German, Latin, and mathematics. Want of means compelled him to give up his classical studies, and become a schoolmaster, but he stuck to music, and though unable to afford a teacher, made such progress not only with the piano and the violin, but also in composition, that Mendelssohn, to whom he sent some MSS., gave him in 1843 a recommendation to Breitkopf & Härtel. This introduction seems to have led to his appearing before the public, and to the first drops of that flood of compositions of all sorts and dimensions which from 1844 he poured forth in an almost unceasing stream. Of op. 1 we have found no critical record; but op. 2 is kindly noticed by the *N. Zeitschrift* for August 5, 1844, the

reviewer finding in it 'something which points to a future for the composer.' Encouraging notices of opp. 2 to 6 inclusive are also given in the *A. M. Zeitung* for the 21st of the same month. Amidst privations which would have daunted any one of less determination he worked steadily on, and at length having fallen in with Liszt, was treated by him with the kindness which always marked his intercourse with rising or struggling talent, and was taken by him on a concert-tour. Meeting Mendelssohn for the first time at Cologne in 1846, and being afterwards invited by him to become his pupil at Leipzig, he left Liszt for that purpose. Before he could carry this project into effect, however, Mendelssohn died, and Raff remained at Cologne, occupying himself *inter alia* in writing critiques for Dehn's *Cäcilia*. Later, in 1854, he published *Die Wagnerfrage*, a pamphlet which excited considerable attention. Liszt's endeavours to secure him a patron in Vienna in the person of Mecchetti the publisher, were frustrated by Mecchetti's death while Raff was actually on the way to see him. Undismayed by these repeated obstacles he devoted himself to a severe course of study, partly at home and partly at Stuttgart, with the view to remedy the deficiencies of his early training. At Stuttgart he made the acquaintance of Bilow, who became deeply interested in him, and did him a great service by taking up his new Concertstück, for PF. and orchestra, and playing it (Jan. 1, 1848).

By degrees Raff attached himself more and more closely to the new German school, and in 1850 went to Weimar to be near Liszt, who had at that time abandoned his career as a virtuoso and was settled there. Here he remodelled an opera, 'König Alfred,' which he had composed in Stuttgart three years before, and it was produced at the Court Theatre, where it was often performed. It has also been given elsewhere. Other works followed—a collection of PF. pieces called 'Frühlingsboten' in 1852, the first string quartet in 1855, and the first grand sonata for PF. and violin (E minor) in 1857. In the meantime he had engaged himself to Doris Genast, daughter of the well-known actor and manager, and herself on the stage; and in 1856 he followed her to Wiesbaden, where he was soon in great request as a pianoforte teacher. In 1858 he composed his second violin sonata, and the incidental music for 'Bernhard von Weimar,' a drama by Wilhelm Genast, the overture to which speedily became a favourite, and was much played throughout Germany. In 1859 he married. In 1863 his first symphony, 'An das Vaterland,' obtained the prize offered by the Gesellschaft der Musikfreunde in Vienna (out of thirty-two competitors), and was followed by the 2nd (in C) and the 3rd (in F, 'Im Walde') in 1869, the 4th (in G minor) in 1871, the 5th ('Lenore') in 1872, the 6th ('Gelebt, gestrebt,

¹ Zelter's *Correspondence with Goethe* teems with notices of the Prince.

geslitten, gestritten, gestorben, umworben') in 1876, and the 7th ('Alpensinfonie') in 1877, the 8th ('Frühlingsklänge') in 1878, and the 9th ('Im Sommerzeit') in 1880. A 10th ('Zur Herbstzeit') was played at Wiesbaden; and the 11th, left unfinished at his death, was revised by Erdmannsdörfer. In 1870 his comic opera 'Dame Kobold' was produced at Weimar. Other operas for which he himself wrote the libretti have not been performed in public. Two cantatas, 'Wachet auf,' and another written for the Festival in commemoration of the battle of Leipzig, were his first works for men's voices, and are popular with choral societies. His arrangement of Bach's six violin sonatas for PF. is a work of great merit.

Detailed analyses of the first six of these Symphonies will be found in the *Monthly Musical Record* for 1875, and from these a very good idea of the composer's style may be gathered. Remembering his struggles and hard life it is only a matter for wonder that he should have striven so earnestly and so long in a path that was not his natural walk. A glance at the nearly complete list of his works at the foot of this notice will explain our meaning. The enormous mass of 'drawing-room music' tells its own tale. Raff had to live, and having by nature a remarkable gift of melody and perhaps not much artistic refinement, he wrote what would pay. But on looking at his works in the higher branch of music—his symphonies, concertos, and chamber music—one cannot but be struck by the conscientious striving towards a high ideal. In the whole of his published Symphonies the slow movements, without a single exception, are of extreme melodic beauty, although weak from a symphonic point of view; the first movements are invariably worked out with surprising technical skill, the subjects appearing frequently in double counterpoint and in every kind of canon. And however modern and common his themes may appear, they have often been built up with the greatest care, note by note, to this end; showing that he does not, as is often said, put down the first thing that comes into his mind. Observe the following treatment of the first subject in his 1st Symphony 'An das Vaterland':—

a canon in augmentation and double augmentation. Such instances as this are numerous, and the art with which these contrapuntal devices

are made to appear spontaneous is remarkable. In the Pianoforte Concerto in C minor (op. 185), in each movement *all* the subjects are in double counterpoint with one another, yet this is one of Raff's freshest and most melodious works. To return to the Symphonies: the Scherzos are, as a rule, weak, and the Finales without exception boisterous and indeed vulgar. Writing here, as ever, for an uneducated public, Raff has forgotten that for a symphony to descend from a high tone is for it to be unworthy of the name.

A remarkable set of thirty Songs (Sanges-Frühling, op. 98) deserves notice for its wealth of fine melodies, some of which have become national property ('Kein Sorg um den Weg'; 'Schön' Else,' etc.); and among his pianoforte music is a set of twenty Variations on an original theme (op. 179) which displays an astonishing fertility of resource, the theme—of five and seven quavers in the bar—being built up into canons and scherzos of great variety and elegance.

Raff's Pianoforte Concerto was very popular, and his Suite for Violin and Orchestra (op. 180) only little less so. His versatility need not be enlarged upon. In all the forms of musical composition he showed the same brilliant qualities and the same regrettable shortcomings. His gift of melody, his technical skill, his inexhaustible fertility, and above all his power of never repeating himself—all these are beyond praise. But his very fertility was a misfortune, since it rendered him careless in the choice of his subjects; writing 'pot-boilers' injured the development of a delicate feeling for what is lofty and refined; in short, the conscientious critic hesitates to allow him a place in the front rank of composers.

Even those who have least sympathy with Raff's views on art must admire the energy and spirit with which he worked his way upwards in spite of every obstacle poverty could throw in his way. He was a member of several societies, and received various orders. In 1877 he was appointed with much éclat director of the Hoch conservatorium at Frankfort, a post he held until his death, in the night of June 24-25, 1882. [Since his death his music has passed, alike in Germany and England, into an oblivion which cannot excite surprise in those who realise the inherent weaknesses of the composer; and the sudden change on the part of the public, from a widespread admiration to almost complete neglect, is of itself a severe criticism on his work.]

The first of his large works performed in this country was probably the Lenore Symphony at the Crystal Palace, Nov. 14, 1874. [The *Musical World* of August 1890, p. 629, contains a translation of Raff's letters explaining the meaning of the work.] This was followed by the 'Im Walde,' and the PF. Concerto in C minor (Jaell), at the Philharmonic; the Sym-

phonies in G minor, 'Im Walde,' 'Frühlingsklänge' and 'Im Sommerzeit,' with the Concertos for violoncello and violin, and the Suite for PF. and orchestra, at the Crystal Palace. His Quintet (op. 107), two Trios (opp. 102, 112), Sonata (op. 128), and other pieces, were played at the Monday Popular Concerts. F. G.

*Catalogue of Raff's Works.*¹

- Op.
1. Serenade. PF. solo. Andre.
2. Trois pièces caractéristiques. PF. solo. B. & H.²
3. Scherzo (G minor). PF. solo. B. & H.
4. Morceau de Salon. . . sur 'Marie de Rudenz.' PF. solo. B. & H.
5. 4 Galops. PF. solo. B. & H.
6. Morceau inst. Fantaisie et Vars. PF. solo. B. & H.
7. Rondeau sur 'Io son ricco.' PF. solo. B. & H.
8. 12 Romances en forme d'études; en 2 Cahiers. PF. solo. B. & H.
9. Improvisito brillant. PF. solo. B. & H.
10. Hommage au Néoromantisme. Grand Caprice. PF. solo. B. & H.
11. Air suisse, transcrit. PF. solo. B. & H.
12. Morceau de Salon. Fant. gracieuse. PF. solo. B. & H.
13. Valse. Rondino sur 'Les Huguenots.' PF. duet. B. & H.
14. Sonate & Fugue (E♭ minor). PF. solo. B. & H.
15. 6 Poèmes. PF. solo. Schott.
16. Improvisito for PF. Unpublished.
17. Album Lyrique. PF. solo. Schuberth (4 books containing 9 pieces).
18. Paraphrases (on Liszt's songs) PF. solo. Eck.

first compositions, we may infer that he was born about 1735 or 1740. He died in London at his own house, 74 Great Portland Street, January 14, 1813. During his residence in Amsterdam he established periodical concerts, and produced his symphony entitled 'The Adventures of Telemachus.' From Amsterdam he went to Paris, where his opera, 'La Muette,' was performed, and about 1790-91 he came to London, where he received sufficient encourage-ment to induce him to make it his permanent home. His compositions became very popular in England, particularly a symphony entitled 'The Battle.' On June 1, 1791, he gave a benefit concert at the Hanover Square Rooms, at which he figured both as violinist and com-poser; he was assisted by Signor Pacchierotti, Madame Mara, Lord Mornington, and Monsieur Dahmer (vide *Morning Chronicle*, June 1, 1791).

The following year he gave a series of subscrip-tion concerts at Willis's Rooms, and at these he both played solos and led the orchestra. Emanuele Barbella is said to have taught Raimondi the violin, but whether this be fact or no, we may infer from Dr. Burney's remark (*History of Music*, vol. iii.), 'The sweet tone and polished style of a Raimondi,' that this artist's technique was of the then greatly ad-mired Tartini school. Raimondi's published compositions include two symphonies—besides the 'Telemachus' above mentioned, a number of quartets for two violins, viola, and violon-cello, two sets of six trios for two violins and violoncello, and some sonatas for two violins, violin and violoncello, and violin and viola.—Dr. Burney, *History of Music*; Park (W. T.), *Musical Memoirs*; Fétis, *Biog. des Mus.*; Eitner, *Quellen-Lexikon*; *The Gentleman's Magazine*, Jan. 1813; *The Times*, May 14, 1800. E. H.-A.

RAIMONDI, PIETRO, was born at Rome of poor parents Dec. 20, 1786. At an early age he passed six years in the Conservatorio of the Pietà de' Turchini at Naples, and after many wanderings, mostly on foot—from Naples to Rome, from Rome to Florence, from Florence to Genoa—and many years, he at length found an opportunity of coming before the public with an opera entitled 'Le Bizzarrie d' Amore,' which was performed at Genoa in 1807. After three years there, each producing its opera, he passed a twelvemonth at Florence, and brought out two more. The next twenty-five years were spent between Rome, Milan, Naples, and Sicily, and each year had its full complement of operas and ballets. In 1824 he became director of the royal theatres at Naples, a position which he retained till 1832. In that year the brilliant success of his opera buffa, 'Il Ventaglio' (Naples, 1831), procured him the post of Professor of Composition in the Conservatorio di Palermo. Here he was much esteemed, and trained several promising pupils. In December 1852, he was called upon to succeed Basili as Maestro di

RAG TIME. A modern term, of American origin, signifying, in the first instance, broken rhythm in melody, especially a sort of continuous syncopation. 'Rag time tunes' is a name given in the States to those airs which are usually associated with the so-called 'coon' songs or lyrics, which are supposed to depict negro life in modern America. F. K.

RAIF, OSKAR (born July 31, 1847, at Zwolle, in Holland, died July 29, 1899, in Berlin), was a pupil of Tausig, and occupied a post as pianoforte teacher in the Royal Hoch-schule at Berlin, with the title of Königlicher Pro-fessor, from 1875 till the time he died. H. V. H.

RAIMONDI, IGNAZIO, Neapolitan violinist and composer. The date of his birth is unknown, but, judging by the fact that he went to Amsterdam in 1760, and there produced his

Cappella at St. Peter's; a post for which, if knowledge, experience, and ceaseless labour of production in all departments of his art could qualify him, he was amply fitted. Shortly before this, in 1848, he had after four years of toil completed three oratorios, 'Potiphar,' 'Pharaoh,' and 'Jacob,' which were not only designed to be performed in the usual manner, but to be played all three in combination as one work, under the name of 'Joseph.' On August 7, 1852, the new Maestro brought out this stupendous work at the Teatro Argentina. The success of the three single oratorios was moderate, but when they were united on the following day—the three orchestras and the three troupes forming an *ensemble* of nearly 400 musicians—the excitement and applause of the spectators knew no bounds, and so great was his emotion that Raimondi fainted away. He did not long survive this triumph, but died at Rome, Oct. 30, 1853.

The list of his works is astonishing, and embraces 62 operas; 21 grand ballets, composed for San Carlo between 1812 and 1828; 8 oratorios; 4 masses with full orchestra; 2 ditto with 2 choirs a cappella; 2 requiems with full orchestra; 1 ditto for 8 and 16 voices; a Credo for 16 voices; the whole Book of Psalms, for 4, 5, 6, 7, and 8 voices; many Te Deums, Stabats, Misereres, Tantum ergos, psalms, and litanies; two books of 90 *partimenti*, each on a separate bass, with three different accompaniments; a collection of figured basses with fugued accompaniments as a school of accompaniment; 4 fugues for 4 voices, each independent but capable of being united and sung together as a quadruple fugue in 16 parts; 6 fugues for 4 voices capable of combination into 1 fugue for 24 voices; a fugue for 16 choirs; 16 fugues for 4 voices; 24 fugues for 4, 5, 6, 7, and 8 voices, of which 4 and 5 separate fugues will combine into one. A fugue in 64 parts, for 16 four-part choirs, is said to exist. Besides the above feat with the three oratorios he composed an opera seria and an opera buffa which went equally well separately and in combination. Such stupendous labours are, as Fétis remarked, enough to give the reader the headache: what must they have done to the persevering artist who accomplished them? But they also give one the heartache at the thought of their utter futility. Raimondi's compositions, with all their ingenuity, belong to a past age, and we may safely say that they will never be revived. G.

RAINFORTH, ELIZABETH, born Nov. 23, 1814, studied singing under George Perry and T. Cooke, and acting under Mrs. Davison, the eminent comedian. After having gained experience at minor concerts, she appeared upon the stage at the St. James's Theatre, Oct. 27, 1836, as Mandane, in Arne's 'Artaxerxes,' with complete success. She performed there for the remainder of the season, and then removed to

the English Opera-House. Subsequently to her public appearance she took lessons from Crivelli. In 1837 she sang in oratorio at the Sacred Harmonic Society, and continued to do so for several years. She made her first appearance at the Philharmonic, March 18, 1839. In 1840 she sang at the Antient Concerts, and in 1843 at the Birmingham Festival. After performing at Covent Garden from 1838 to 1843 she transferred her services to Drury Lane, where she made a great hit by her performance of Arline, in Balfe's 'Bohemian Girl,' on its production, Nov. 27, 1843. In the previous year she had a most successful season in Dublin, and repeated her visits to Ireland in 1844 and 1849. She was engaged as prima donna at the Worcester Festival of 1845. She continued to perform in the metropolis until about 1852, when she removed to Edinburgh, where she remained until about 1856. She then retired, and in 1858 went to live at Old Windsor, and taught music in the neighbourhood until her complete retirement in March 1871, when she removed to her father's at Bristol. Her voice was a high soprano, even and sweet in quality, but deficient in power, and she possessed great judgment and much dramatic feeling. Although her limited power prevented her from becoming a great singer, her attainments were such as enabled her to fill the first place with credit to herself, and satisfaction to her auditors. She died at Redland, Bristol, Sept. 22, 1877. W. H. H.

RALLENTANDO, RITARDANDO, RITENUTE, RITENUTO—'Becoming slow again,' 'Slackening,' 'Holding back,' 'Held back.' The first two of these words are used quite indifferently to express a gradual diminution of the rate of speed in a composition, and although the last is commonly used in exactly the same way, it seems originally and in a strict sense to have meant a uniform rate of slower time, so that the whole passage marked *ritenuto* would be taken at the same time, while each bar and each phrase in a passage marked *rallentando* would be a little slower than the one before it. That there exists a difference in their uses is conclusively proved by a passage in the Quartet op. 131 of Beethoven, where in the 7th movement (*allegro*) a phrase of three recurring minims, which is repeated in all five times, has the direction 'Espressivo, poco ritenuto' for its first three appearances, which are separated by two bars *a tempo*, and for the last two times has *ritardando*, which at length leads into the real *a tempo*, of which the former separating fragments were but a presage. This is one of the very rare instances of the use of the word *ritenuto* by Beethoven. The conclusion from it is confirmed by a passage in Chopin's Rondo, op. 16, consisting of the four bars which immediately precede the entry of the second subject. Here the first two bars consist of a fragment of a preceding figure which is repeated,

so that both these bars are exactly the same; the last two bars, however, have a little chromatic cadence leading into the second subject. The direction over the first two bars is 'poco ritenuto,' and over the last two 'rallentando,' by which we may be quite sure that the composer intended the repeated fragment to be played at the same speed in each bar, and the chromatic cadence to be slackened gradually.

Ritenente is used by Beethoven in the PF. Sonata, op. 110, about the middle of the first movement, and again in the Sonata, op. 111, in the first movement, in the seventh and fifteenth bars from the beginning of the *Allegro con brio*. It would seem that the same effect is intended as if 'ritenuto' were employed; in each case, the words 'meno mosso' might have been used. Beethoven prefers *Ritardando* to *Rallentando*, which latter is common only in his earlier works. M.

RAMANN, LINA, musical writer and educationist, was born at Mainsteckheim, near Kitzingen, in Bavaria, June 24, 1833. Her turn for music and her determination to succeed were evident from a very early age. It was not, however, till her seventeenth year that she had any instruction in music. At that time her parents removed to Leipzig, and from 1850 to 1853 she there enjoyed the advantage of pianoforte lessons from the wife of Dr. F. Brendel, herself formerly a scholar of Field's. From this period she adopted the career of a teacher of music, and studied assiduously, though without help, for that end. After a period of activity in America, she opened (in 1858) an institute in Glückstadt (Holstein) for the special training of music-mistresses, and maintained it till 1865, in which year she founded a more important establishment, the Music School at Nuremberg, in conjunction with Frau Ida Volkmann of Tilsit, and assisted by a staff of superior teachers, under Fräulein Ramann's own superintendence. The school was transferred to Ang. Göllicherich in 1890, when Fräulein Ramann moved to Munich. With a view to the special object of her life she has published two works—*Die Musik als Gegenstand der Erziehung* (Leipzig: Merseburger, 1868), and *Allgemeine Erzieh- und Unterrichts-lehre der Jugend* (Leipzig: H. Schmidt, 1869; 2nd ed. 1873), which were both received with favour by the German press. From 1860 she was musical correspondent of the *Hamburg Jahresszeiten*. A volume of her essays contributed to that paper has been collected and published, under the title of *Aus der Gegenwart* (Nuremberg: Schmid, 1868). In the early part of 1880 she published a study of Liszt's 'Christus' (Leipzig, Kahnt), and later in the year the first volume of a *Life of Liszt*, completed in two volumes in 1894 (Leipzig, Breitkopf). The first portion was translated by Mrs. S. H. Eddy, Chicago, and by Miss E. Cowdery, and published in two vols.

in 1882. This is an important work. It suffers somewhat from over-enthusiasm, but it is done with great care, minuteness, and intelligence, and obviously profited largely by direct information from Liszt himself. She also edited Liszt's writings (1880-83, in six volumes). Her cousin,

BRUNO RAMANN, was born April 17, 1832, at Erfurt, and was brought up to commerce, but his desire and talent for music were so strong, that in 1857 or 1858 he succeeded in getting rid of his business and put himself under Dr. F. Brendel and Riedel, for regular instruction. He then for five years studied under Hauptmann at Leipzig, and was a teacher and composer at Dresden from 1867 until his death, March 13, 1897. His works are numerous, but they consist almost entirely of songs for one or more voices, and of small and more or less sentimental pieces for the pianoforte. He also wrote poetry, and some dramatic pieces. G.

RAMEAU, JEAN PHILIPPE, eminent composer, and writer on the theory of music, born at Dijon, Oct. 23, 1683,¹ in the house now No. 5 Rue St. Michel. His father,² Jean, was a musician, and organist of Dijon cathedral, in easy circumstances. He intended Jean Philippe, the eldest of his three sons, to be a magistrate, but his strong vocation for music and obstinacy of character frustrated these views. According to his biographers he played the harpsichord at seven, and read at sight any piece of music put before him: music indeed absorbed him to such an extent when at the Jesuit College that he neglected his classical studies, and was altogether so refractory that his parents were requested to remove him. Henceforth he never opened a book, unless it were a musical treatise. He quickly mastered the harpsichord, and studied the organ and violin with success, but there was no master in Dijon capable of teaching him to write music, and he was left to discover for himself the laws of harmony and composition.

At the age of seventeen he fell in love with a young widow in the neighbourhood, who indirectly did him good service, since the shame which he felt at the bad spelling of his letters drove him to write correctly. To break off this acquaintance his father sent him, in 1701, to Italy, where, however, he did not remain long, a mistake which, in after life, he regretted. He liked Milan, and indeed the attractions of so great a centre of music must have been great; but for some unknown reason he soon left with a theatrical manager whom he accompanied as first violin to Marseilles, Lyons, Nîmes, Montpellier, and other places in the south of France. How long the tour lasted it is impossible to ascertain, as no letters belonging to this period are to be found. From his 'Premier Livre de

¹ [The date of birth is taken from the composer's monument at Dijon: the first edition of this Dictionary gives the more usual date, Sept. 25, 1683.]

² His mother's name was Claudine Demartinecourt.

pièces de clavecin' (Paris, 1706) we learn that he was then living in Paris, at a wig-maker's in the Vieille Rue du Temple, as Haydn did at Keller's, though without the disastrous results which followed that connection. Meantime he was organist of the Jesuit convent in the Rue St. Jacques, and of the chapel of the Pères de la Merci. No particulars, however, of the length of his stay in Paris are known, nor how he occupied the interval between this first visit and his return about 1717. In that year a competition took place for the post of organist of the church of St. Paul, and Rameau was among the candidates. Marchand, then at the head of the organists in Paris, was naturally one of the examiners; and either from fear of being outshone by one whom he had formerly patronised, or for some other reason, he used his whole influence in favour of Daquin, who obtained the post. Mortified at the unjust preference thus shown to a man in all points his inferior, Rameau again left Paris for Lille, and became for a short time organist of St. Étienne. Thence he went to Clermont in Auvergne, where his brother Claude¹ resigned the post of organist of the cathedral in his favour. In this secluded mountain town, with a harsh climate predisposing to indoor life, he had plenty of time for thought and study. The defects of his education drove him to find out everything for himself. From the works of Descartes, Mersenne, Zarlino, and Kircher he gained some general knowledge of the science of sound, and taking the equal division of the monochord as the starting-point of his system of harmony, soon conceived the possibility of placing the theory of music on a sound basis. Henceforth he devoted all his energies to drawing up his *Treatise on Harmony Reduced to its Natural Principles*, and as soon as that important work was finished he determined to go to Paris and publish it. His engagement with the chapter of Clermont had, however, several years to run, and there was great opposition to his leaving, owing to the popularity of his improvisations on the organ, in which his theoretical studies, far from hampering his ideas, seemed to give them greater freshness and fertility.

Once free he started immediately for Paris, and brought out his *Traité de l'Harmonie* (Ballard, 1722, 4to, 432 pp.).² The work did not at first attract much attention among French musicians, and yet, as Fétis observes, it laid the foundation for a philosophical science of harmony. Rameau's style is prolix and obscure, often calculated rather to repel than attract the

reader, and the very boldness and novelty of his theories excited surprise and provoked criticism. His discovery of the law of inversion in chords was a stroke of genius, and led to very important results, although in founding his system of harmony on the sounds of the common chord, with the addition of thirds above or thirds below, he put both himself and others on a wrong track. In the application of his principle to all the chords he found himself compelled to give up all idea of tonality, since, on the principles of tonality he could not make the thirds for the discords fall on the notes that his system required. Fétis justly accuses him of having abandoned the tonal successions and resolutions prescribed in the old treatises on harmony, accompaniment, and composition, and the rules for connecting the chords based on the ear, for a fixed order of generation, attractive from its apparent regularity, but with the serious inconvenience of leaving each chord disconnected from the rest.

Having rejected the received rules for the succession and resolution of chords which were contrary to his system, Rameau perceived the necessity of formulating new ones, and drew up a method for composing a fundamental bass for every species of music. The principles he laid down for forming a bass different from the real bass of the music, and for verifying the right use of the chords, are arbitrary, insufficient in a large number of cases, and, as regards many of the successions, contrary to the judgment of the ear. Finally, he did not perceive that by using the chord of the 6-5-3 both as a fundamental chord and an inversion he destroyed his whole system, as in the former case it is impossible to derive it from the third above or below.³ After more study, however, particularly on the subject of harmonics, Rameau gave up many of his earlier notions, and corrected some of his most essential mistakes. The development and modification of his ideas may be seen by consulting his works, of which the following is a list:—*Nouveau système de musique théorique . . . pour servir d'Introduction au traité d'Harmonie* (1726, 4to); *Génération harmonique*, etc. (1737, 8vo); *Démonstration du principe de l'harmonie* (1750, 8vo); *Nouvelles réflexions sur la démonstration du principe de l'harmonie* (1752, 8vo); *Extrait d'une réponse de M. Rameau à M. Euler sur l'identité des octaves*, etc. (1753, 8vo)—all published in Paris. To these specific works, all dealing with the science of harmony, should be added the *Dissertation sur les différentes méthodes d'accompagnement pour le clavecin ou pour l'orgue* (Paris, Boivin, 1732, 4to), and some articles which appeared in the *Mercur de France*, and in the *Mémoires de Trévoux*.

³ Fétis has explained, detailed, and refuted Rameau's system in his *Esquisse de l'Histoire de l'Harmonie*, which has been used by the writer, and to which he refers his readers.

¹ Claude Rameau, a man of indomitable will and capricious temper, and a clever organist, lived successively at Dijon, Lyons, Marseilles, Clermont, Orléans, Strassburg, and Autun. His son Jean François, a gifted musician, but a dissipated man, is admirably portrayed by Diderot in his *Vie de Rameau*. He published in 1768 a poem in five cantos called *Le Ramide*, followed in the same year by *La nouvelle Ramide*, a parody by his schoolfellow Jacques Cazotte. He is mentioned by Mercier in his *Tableau de Paris*.

² The third Part of this was translated into English fifteen years later with the title *A Treatise of Music containing the Principles of Composition*. London, no date, 8vo, 160 pp.

The mere titles of these works are a proof of the research and invention which Rameau brought to bear on the theory of music; but what was most remarkable in his case is that he succeeded in lines which are generally opposed to each other, and throughout life occupied the first rank not only as a theorist, but as a player and composer. Just when his *Traité de l'Harmonie* was beginning to attract attention he arranged to make music for the little pieces which his fellow-countryman, Alexis Piron, was writing for the Théâtre de la Foire, and accordingly, on Feb. 3, 1723, they produced 'L'Endriague,' in three acts, with dances, divertissements, and grand airs, as stated in the title. In Jan. 1724 he obtained the privilege of publishing his cantatas, and various instrumental compositions, amongst others his 'Pièces de clavecin, avec une Méthode pour la mécanique des doigts,' etc., republished as 'Pièces de Clavecin, avec une table pour les agréments'¹ (Paris, 1731 and 1736, oblong folio).

As the favourite music-master among ladies of rank, and organist of the church of Ste. Croix de la Bretonnerie, Rameau's position and prospects now warranted his taking a wife, and on Feb. 25, 1726, he was united to Marie Louise Mangot, a good musician, with a pretty voice. The disparity of their ages was considerable, the bride being only eighteen, but her loving and gentle disposition made the marriage a very happy one.

A few days later, on Feb. 29, Rameau produced at the Théâtre de la Foire, a one-act piece called 'L'Enrôlement d'Arlequin,' followed in the autumn by 'Le faux Prodigue,' two acts, both written by Piron. Such small comic pieces as these were obviously composed, by a man of his age and attainments (he was now forty-two), solely with the view of gaining access to a stage of higher rank, but there was no hope of admission to the theatre of the Académie without a good libretto, and this it was as difficult for a beginner to obtain then as it is now. There is a remarkable letter, still extant, from Rameau to Houdar de Lamotte, dated Oct. 1727, asking him for a lyric tragedy, and assuring him that he was no novice, but one who had mastered the 'art of concealing his art.' The blind poet refused his request, but aid came from another quarter. La Popelinière, the *fermier général*, musician, poet, and artist, whose houses in Paris and at Passy were frequented by the most celebrated artists French and foreign, had chosen Rameau as his clavecinist and conductor of the music at his fêtes, and before long placed at his disposal the organ in his chapel, his orchestra, and his theatre. He did more, for through his influence Rameau obtained from Voltaire the lyric tragedy of 'Samson,' which he promptly

set to music, though the performance was prohibited on the eve of its representation at the Académie—an exceptional stroke of ill-fortune. [On the history of this work, see Hugues Imbert's *Symphonie* (1891), and for a résumé of the facts, see *Musical Times*, 1898, p. 379 ff.] At last the Abbé Pellegrin agreed to furnish him with an opera in five acts, 'Hippolyte et Aricie,' founded on Racine's 'Phèdre.' He compelled Rameau to sign a bill for 500 livres as security in case the opera failed, but showed more sagacity and more heart than might have been expected from one

Qui dinait de l'autel et soupait du théâtre,
Le matiu catholique et le soir idolâtre,

for he was so delighted with the music on its first performance at La Popelinière's, that he tore up the bill at the end of the first act. The world in general was less enthusiastic, and after having overcome the ill-will or stupidity of the performers, Rameau had to encounter the astonishment of the crowd, the prejudices of routine, and the jealousy of his brother artists. Campra alone recognised his genius, and it is to his honour that when questioned by the Prince de Conti on the subject, he replied, 'There is stuff enough in Hippolyte et Aricie for ten operas; this man will eclipse us all.'

The opera was produced at the Académie on Oct. 1, 1733. Rameau was then turned fifty years of age, and the outcry with which his work was greeted suggested to him that he had possibly mistaken his career; for a time he contemplated retiring from the theatre, but was reassured by seeing his hearers gradually accustoming themselves to the novelties which at first shocked them. The success of 'Les Indes galantes' (August 23, 1735), of 'Castor et Pollux,' his masterpiece (Oct. 24, 1737), and of 'Les Fêtes d'Hébé' (May 21, 1739), however, neither disarmed his critics, nor prevented Rousseau from making himself the mouthpiece of those who cried up Lully at the expense of the new composer. But Rameau was too well aware of the cost of success to be hurt by epigrams, especially when he found that he could count both on the applause of the multitude, and the genuine appreciation of the more enlightened.

His industry was immense, as the following list of his operas and ballets produced at the Académie in twenty years will show:—

Dardanus, five acts and prologue (Oct. 19, 1739).	Platée, three acts and prologue (Feb. 4, 1749).
Les Fêtes de Polymnie, three acts and prologue (Oct. 12, 1745).	Nais, three acts and prologue (April 22, 1749).
Le Temple de la Oïroie, Fête, in three acts and prologue (Nov. 27, 1745).	Zerastre, five acts (Dec. 5, 1749).
Zaïs, four acts and prologue (Feb. 29, 1748).	La Guirlande, ou les Fleurs enchantées, one act (Sept. 21, 1751).
Pygmalion, one act (Aug. 27, 1748).	Acanthe et Céphise, three acts (Nov. 18, 1751).
Les Fêtes de l'Hymen et de l'Amour, three acts and prologue (March 15, 1747).	Les Surprises de l'Amour, three acts (July 12, 1757).
	Les Paladins, three acts (Feb. 12, 1760).

Besides these, Rameau found time to write divertissements for 'Les Courses de Tempé,' a

¹ Both Fétie and Pongin have fallen into the mistake of considering this a separate work.

Pastoral (Théâtre Français, August 1734), and 'La Rose' (Théâtre de la Foire, March 1744), both by Piron. From 1740 to 1745 the director of the Opéra gave him no employment, and in this interval he published his 'Nouvelles Suites de Pièces de clavecin' and his 'Pièces de clavecin en concert avec un violon ou une flûte' (1741), remarkable compositions which have been reprinted by Mme. Farrenc ('Le Trésor des Pianistes') and M. Poisot. He also accepted the post of conductor of the Opéra-Comique, of which Monnet¹ was manager, probably in the hope of attracting public attention, and forcing the management of the Académie to alter their treatment of him. Finally he composed for the Court 'Lysis et Délie,' 'Daphnis et Eglé,' 'Les Sybarites' (Oct. and Nov. 1753); 'La Naissance d'Osiris,' and 'Anacréon' (Oct. 1754), all given at Fontainebleau. Some years previously, on the occasion of the marriage of the Dauphin with the Infanta, he had composed 'La Princesse de Navarre' to a libretto of Voltaire's (three acts and prologue, performed with great splendour at Versailles, Feb. 23, 1745). This was the most successful of all his *opéras de circonstance*, and the authors adapted from it 'Les Fêtes de Ramire,' a one-act opera-ballet, also performed at Versailles (Dec. 22, 1745).

In estimating Rameau's merits we cannot in justice compare him with the great Italian and German masters of the day, whose names and works were then equally unknown in France; we must measure him with contemporary French composers for the stage. These writers had no idea of art beyond attempting a servile copy of Lully, with overtures, recitatives, vocal pieces, and ballet airs, all cast in one stereotyped form. Rameau made use of such a variety of means as not only attracted the attention of his hearers, but retained it. For the placid and monotonous harmonies of the day, the trite modulation, insignificant accompaniments, and stereotyped ritornelles, he substituted new forms, varied and piquant rhythms, ingenious harmonies, bold modulations, and a richer and more effective orchestration. He even ventured on enharmonic changes, and instead of the time-honoured accompaniments with the strings in five parts, and flutes and oboes in two, and with *tutti*s in which the wind simply doubled the strings, he gave each instrument a distinct part of its own, and thus imparted life and colour to the whole. Without interrupting the other instruments, he introduced interesting and unexpected passages on the flutes, oboes, and bassoons, and thus opened a path which has been followed up with ever-increasing success. He also gave importance to the orchestral pieces, introducing his operas with a well-constructed overture, instead of the meagre introduction of the period, in which the same phrases were repeated *ad*

nauseam. Nor did he neglect the chorus; he developed it, added greatly to its musical interest, and introduced the syllabic style with considerable effect. Lastly, his ballet-music was so new in its rhythms, and so fresh and pleasing in melody, that it was at once adopted and copied in the theatres of Italy and Germany.

We have said enough to prove that Rameau was a composer of real invention and originality. His declamation was not always so just as that of Lully; his airs have not the same grace, and are occasionally marred by eccentricity and harshness, and disfigured by roulades in doubtful taste; but when inspired by his subject Rameau found appropriate expression for all sentiments, whether simple or pathetic, passionate, dramatic, or heroic. His best operas contain beauties which defy the caprices of fashion, and will command the respect of true artists for all time.

But if his music was so good, how is it that it never attained the same popularity as that of Lully? In the first place, he took the wrong line on a most important point; and in the second, he was less favoured by circumstances than his predecessor. It was his doctrine, that for a musician of genius all subjects are equally good, and hence he contented himself with uninteresting fables written in wretched style, instead of taking pains, as Lully did, to secure pieces constructed with skill and well versified. He used to say that he could set the *Gazette de Hollande* to music. Thus he damaged his own fame, for a French audience will not listen even to good music unless it is founded on an interesting drama.

Much as Rameau would have gained by the co-operation of another Quinault, instead of having to employ Cahusac, there was another reason for the greater popularity of Lully. Under Louis XIV. the king's patronage was quite sufficient to ensure the success of an artist; but after the Regency, under Louis XV., other authorities asserted themselves, especially the 'philosophes.' Rameau had first to encounter the vehement opposition of the Lullists; this he had succeeded in overcoming, when a company of Italian singers arrived in Paris, and at once obtained the attention of the public, and the support of a powerful party. The partisans of French music rallied round Rameau, and the two factions carried on what is known as the 'Guerre des Bouffons,' but when the struggle was over, Rameau perceived that his victory was only an ephemeral one, and that his works would not maintain their position in the *répertoire* of the Académie beyond a few years.

With a frankness very touching in a man of his gifts, he said one evening to the Abbé Arnand, who had lately arrived in Paris, 'If I were twenty years younger I would go to Italy, and take Pergolesi for my model, abandon something of my harmony, and devote myself

¹ See Monnet's *Supplément au Roman comique*, p. 51. This fact seems to have escaped all Rameau's biographers.

to attaining truth of declamation, which should be the sole guide of musicians. But after sixty one cannot change; experience points plainly enough the best course, but the mind refuses to obey.' No critic could have stated the truth more plainly. Not having heard Italian music in his youth, Rameau never attained to the skill in writing for the voice that he might have done; and he is in consequence only the first French musician of his time, instead of taking his rank among the great composers of European fame. But for this, he might have effected that revolution in dramatic music which Gluck accomplished some years later.

But even as it was, his life's work is one of which any man might have been proud; and in old age he enjoyed privileges accorded only to talent of the first rank. The directors of the Opéra decreed him a pension; his appearance in his box was the signal for a general burst of applause, and at the last performance of 'Dardanus' (Nov. 9, 1760) he received a perfect ovation from the audience. At Dijon the Académie elected him a member in 1761, and the authorities exempted himself and his family for ever from the municipal taxes. The king had named him composer of his chamber music in 1745; his patent of nobility was registered, and he was on the point of receiving the order of St. Michel, when, already suffering from the infirmities of age, he took typhoid fever, and died Sept. 12, 1764. All France mourned for him; Paris gave him a magnificent funeral, and in many other towns funeral services were held in his honour. Such marks of esteem are accorded only to the monarchs of art.

Having spoken of Rameau as a theorist and composer, we will now say a word about him as a man. If we are to believe Grimm and Diderot, he was hard, churlish, and cruel, avaricious to a degree, and the most ferocious of egotists. The evidence of these writers is, however, suspicious; both disliked French music, and Diderot, as the friend and *collaborateur* of d'Alembert, would naturally be opposed to the man who had had the audacity to declare war against the Encyclopedists.¹ It is right to say that, though he drew a vigorous and scathing portrait of the composer, he did not publish it.² As to the charge of avarice, Rameau may have been fond of money, but he supported his sister Catherine³ during an illness of many years, and assisted more than one of his brother artists—

such as Dauvergne, and the organist Balbâtre. He was a vehement controversialist, and those whom he had offended would naturally say hard things of him. Tall, and thin almost to emaciation, his sharply marked features indicated great strength of character, while his eyes burned with the fire of genius. There was a decided resemblance between him and Voltaire, and painters have often placed their likenesses side by side. Amongst the best portraits of Rameau may be specified those of Benoist (after Restout), Caffieri, Masquelier, and Carmontelle (full length). In the fine oil-painting by Chardin in the Museum of Dijon, he is represented seated, with his fingers on the strings of his violin, the instrument he generally used in composing. The bust which stood in the *foyer* of the Opéra was destroyed when the theatre was burnt down in 1781; that in the library of the Conservatoire is by Destreez (1865). A bronze statue by Guillaume was erected at Dijon in 1880. The fine medal of him given to the winners of the *grand prix de Rome* was engraved by Gatteaux.

There are many biographies of Rameau; the most valuable are, among the older, Chabanon's *Eloge* (1764); Maret's *Eloge historique* (1766); and the very curious details contained in De Croix's *L'Ami des Arts* (1776); among the more modern, the notices of Adolphe Adam, Fétis, Poissot (1864), Nisard (1867), and Pougin (1876).

Rameau had one son and two daughters, none of them musicians. He left in MS. four cantatas, three motets with chorus, and fragments of an opera 'Roland,' all which are now in the Bibliothèque Nationale. None of his organ pieces have survived; and some cantatas, mentioned by the earlier biographers, besides two lyric tragedies 'Abaris' and 'Linus,' and a comic opera, 'Le Procureur dupé,' are lost; but they would have added nothing to his fame.

Some of his harpsichord pieces have been published in the 'Trésor des Pianistes'; in the 'Alte Klaviernmusik' of Pauer (Ser. 2, pt. 5) and of Roitzsch; also in Pauer's 'Alte Meister,' and in the 'Perles Musicales' (51, 52). A new edition, with a preface by Saint-Saëns, appeared in Paris in 1905.

G. C.

RAMONDON, LEWIS, presumably a Frenchman, and at first a singer in the pre-Handelian Italian operas. He appeared in 'Arsinoë,' 1705; in 'Camilla,' 1706; and 'Pyrrhus and Demetrius,' 1709. He sometimes took Leve-ridge's parts in these operas, but about 1711 he ceased to be a public singer, and turned his talents to composition. He brought out the series called 'The Lady's Entertainment' in 1709, 1710, 1711, and 1738. He arranged for the harpsichord the song-tunes in 'Camilla,' using, perhaps for the first time in music-notation for this instrument, a five instead of a six-line stave, and giving as the reason—'that the

¹ Rameau was asked to correct the articles on music for the *Encyclopédie*, but the MSS. were not submitted to him. He published in consequence: *Erreurs sur la musique dans l'Encyclopédie* (1755); *Suite des Erreurs*, etc. (1756); *Réponse de M. Rameau à M. les éditeurs de l'Encyclopédie sur leur Avertissement* (1757); *Lettre de M. d'Alémbert à M. Rameau, concernant le corps sonore, avec la réponse de M. Rameau* (undated, but apparently 1759)—all printed in Paris.

² We refer to Diderot's violent satire on the morals and philosophic tendencies of the 18th century, entitled *Le Neveu de Rameau*. It is a curious fact that this brilliantly written dialogue was only known in France through a re-translation of Goethe's German version. The first French edition, by Sanr, appeared in Paris only in 1821.

³ A good player on the harpsichord; she lived in Dijon, and died there, 1762.

lessons being placed on five lines renders them proper for a violin and a base.' His vocal compositions were in high favour, and half a dozen or so may be seen in Walsh's 'Merry Musician, or a Cure for the Spleen,' vol. i., 1716; others are on the single song sheet of the period. A tune of his, 'All you that must take a leap in the dark,' attained some degree of popularity by being sung by Macheath in the 'Beggars Opera.' It is probable that he died about 1720, as his name does not appear to occur on any fresh work after that date; but biographical details regarding him are lacking.

F. K.

RAMSEY, ROBERT, was organist of Trinity College, Cambridge, from 1628 to 1644 inclusive, and 'Magister Choristarum' from 1637 to 1644 inclusive; but whether before or after those dates is not certain in either case. He took the degree of Mus.B. at Cambridge in 1616, and was required to compose a 'Canticum' to be performed at St. Mary's Church. A Morning and Evening Service in F by him is contained in the Tudway Collection (Harl. MS. 7340) and in the Ely Library, where, and at Peterhouse College, Cambridge, there are also two anthems of his. Add. MS. 11,608 in the British Museum contains a setting by him of the dialogue between Saul, the witch, and Samuel—'In guiltie night,' which was afterwards set by Purcell. Tudway miscalls him John. A madrigal by him is in the British Museum, and a 'commencement song' a 8 was sold at Warren's sale in 1881.

G.

RANDALL, JOHN, Mus.D., born 1715, was a chorister of the Chapel Royal under Bernard Gates. He was one of the boys who shared in the representation of Handel's 'Esther' at Gates's house, Feb. 23, 1732, he himself taking the part of Esther. He graduated as Mus.B. at Cambridge in 1744, his exercise being an anthem. In 1743 he was appointed organist of King's College, and on the death of Dr. Greene in 1755 was elected Professor of Music at Cambridge. In 1756 he proceeded Mus.D. He composed the music for Gray's Ode for the Installation of the Duke of Grafton as Chancellor of the University in 1768, and some church music. He was organist of Trinity College in 1777. He died at Cambridge, March 18, 1799. His name is preserved in England by his two Double Chants.

W. H. H.

RANDALL, P., a London music-seller and publisher, who had a shop at the sign of 'Ye Viol and Lute,' at Paul's Grave, without Temple Bar, in 1707, and for some years later. He may have been related, by marriage, to John Walsh, senior, the great music-publisher of this period. Before 1710 he was a partner with Walsh, and had abandoned his own place of business for Walsh's address in Katherine Street, Strand. His name, in conjunction with Walsh's, appears on many imprints of Walsh's

publications. Later issues of these publications have Randall's name erased, and before 1720 his name entirely disappears from them.

RANDALL, WILLIAM, is presumed to be a son of the preceding P. Randall. At the death of John Walsh, junior, Jan. 15, 1766, William Randall succeeded to the extensive business in Catherine Street, and shortly afterwards was for a couple of years or less in partnership with a person named Abell. Randall & Abell issued in large folio in 1768 what is practically the first complete edition of the 'Messiah,' as well as some minor issues. Randall was in business alone in 1771, and besides reprinting the Walsh publications, he published many interesting works. One of these was a reissue in 1771 of Morley's *Plaine and Easie Introduction*. Collections of Vauxhall or other songs came forth, country dances, and the like. William Randall died about 1780, and his widow, Elizabeth, carried on the business until it was taken over, about 1783, by Messrs. Wright & Wilkinson, who made a great business almost solely by reprinting Handel's works from the original plates.

F. K.

RANDEGGER, ALBERTO, composer, conductor, and singing-master, was born at Trieste, April 13, 1832. He began the study of music at the age of thirteen, under Lafont for the PF., and L. Ricci for composition, soon began to write, and by the year 1852 was known as the composer of several masses and smaller pieces of Church music, and of two ballets—'La Fidanzata di Castellamare' and 'La Sposa d' Appenzello,' both produced at the Teatro grande of his native town. In the latter year he joined three other of Ricci's pupils in the composition of a buffo opera to a libretto by Gaetano Rossi, entitled 'Il Lazzarone,' which had much success, first at the Teatro Mauroner at Trieste, and then elsewhere. In the next two years he was occupied as musical director of theatres at Fiume, Zara, Sinigaglia, Brescia, and Venice. In the winter of 1854 he brought out a tragic opera in four acts, called 'Bianca Capello,' at the chief theatre of Brescia. At this time he was induced to come to London. He gradually took a high position there, and has become widely known as a teacher of singing, conductor, and composer, and an enthusiastic lover of good music of whatever school or country. He has resided in England ever since, and is one of the most prominent musical figures in the metropolis. In 1864 he produced at the Theatre Royal, Leeds, 'The Rival Beauties,' a comic operetta in two acts, which has had much success in London and many other places. In 1868 he became Professor of Singing at the Royal Academy of Music, and has since been made an honorary member and director of that institution and a member of the Committee of Management. He is a Professor of Singing at the Royal College of Music, and is on the Board

of Professors. In the autumn of 1857 he conducted a series of Italian operas at St. James's Theatre, and in 1879-85 the Carl Rosa Company. [He conducted grand opera under Harris's management at Drury Lane and Covent Garden in 1887-98. He conducted the Queen's Hall Choral Society in 1895-97, but his most important position of this kind was the conductorship of the Norwich Festival, which he held with great success from 1881 to 1905 inclusive.]

Mr. Randegger's published works are numerous and important. They comprise a dramatic cantata (words by Mme. Rudersdorff), entitled 'Fridolin,' composed for the Birmingham Festival, and produced there with great success, August 28, 1873; two soprano scenes—'Medea,' sung by Mme. Rudersdorff at the Gewandhaus, Leipzig, in 1869, and 'Saffo,' sung by Mme. Lemmens at the British Orchestral Society, March 31, 1875; the 150th Psalm, for soprano solo, chorus, orchestra, and organ, for the Boston Festival, 1872; Funeral Anthem for the death of the Prince Consort, twice performed in London; a scena, 'The Prayer of Nature,' sung by Edward Lloyd at a Philharmonic concert in 1887; and a large number of songs and concerted vocal music for voice and orchestra or PF. He is also the author of the *Primer of Singing* in Novello's series. As a teacher of singing, Mr. Randegger has a large number of pupils now before the English public as popular singers. (See the *Musical Times* for 1899, p. 653 ff.) G.

RANDHARTINGER, BENEDICT, an Austrian musician, memorable for his connection with Schubert. He was born at Ruprechtshofen, in Lower Austria, July 27, 1802; at ten years old came to the Convict school at Vienna, and was then a pupil of Salieri's. He afterwards studied for the law, and for ten years was Secretary to Count Széchenyi, an official about the Court. But he forsook this line of life for music; in 1832 entered the Court Chapel as a tenor singer; in 1844 became Vice-Court-Capellmeister, and in 1862, after Assmayer's death, entered on the full enjoyment of that dignity. His compositions are more than 600 in number, comprising an opera, 'König Enzo'; 20 masses; 60 motets; symphonies; quartets, etc.; 400 songs, 76 4-part songs, etc. Of all these, 124, chiefly songs, are published; also a vol. of Greek national songs, and a vol. of Greek liturgies. His acquaintance with Schubert probably began at the Convict, and at Salieri's; though as he was Schubert's junior by five years, they can have been there together only for a short time; but there are many slight traces of the existence of a close friendship between them. He was present, for example, at the first trial of the D minor String Quartet (Jan. 29, 1826), and he was one of the very few friends who visited Schubert in the terrible loneliness of his last illness. But for Randhartinger it is almost

certain that Schubert's 'Schöne Müllerin' would never have existed. He was called out of his room while Schubert was paying him a visit, and on his return found that his friend had disappeared with a volume of W. Müller's poems which he had accidentally looked into while waiting, and had been so much interested in as to carry off. On his going the next day to reclaim the book, Schubert presented him with some of the now well-known songs, which he had composed during the night. This was in 1823. It is surely enough to entitle Randhartinger to a perpetual memory.

He had a brother JOSEF, of whom nothing is known beyond this—that he was probably one of the immediate *entourage* of Beethoven's coffin at the funeral. He, Lachner, and Schubert are said to have gone together as torch-bearers (Kreissle von Hellborn's *Schubert*, p. 266). G.

RANGLES, ELIZABETH, an extraordinary infant musical prodigy and performer on the pianoforte. She was born at Wrexham, August 1, 1800, and played in public before she was fully two years of age. Her father, a blind harper and organist of Wrexham, of some degree of local fame (1760-1820), placed her under John Parry the harper, and afterwards took her on tour to London, where she attracted much attention, and was made a pet of by the Royal family. A second visit to London was undertaken in 1808, and a concert for her benefit given in the Hanover Square rooms. At this Madame Catalani and other singers and instrumentalists gave their gratuitous services, Sir George Smart conducting. She settled in Liverpool as a music teacher about 1818, and died there in 1829. F. K.

RANELAGH HOUSE AND GARDENS were situated on the bank of the Thames, eastward of Chelsea Hospital. They were erected and laid out about 1690 by Richard Jones, Viscount (afterwards Earl of) Ranelagh, who resided there until his death in 1712. In 1733 the property was sold in lots, and eventually the house and part of the gardens came into the hands of a number of persons who converted them into a place of public entertainment. In 1741 they commenced the erection of a spacious Rotunda (185 feet external, and 150 feet internal diameter), with four entrances through porticos. Surrounding it was an arcade, and over that a covered gallery, above which were the windows, sixty in number. In the centre of the interior and supporting the roof was a square erection containing the orchestra, as well as fireplaces of peculiar construction for warming the building in winter. Forty-seven boxes, each to contain eight persons, were placed round the building, and in these the company partook of tea and coffee. In the garden was a Chinese building, and a canal upon which the visitors were

rowed about in boats. Ranelagh was opened with a public breakfast, April 5, 1742. The admission was 2s. including breakfast. On May 24 following it was opened for evening concerts; Beard was the principal singer, Festing the leader, and the choruses were chiefly from oratorios. Twice a week *ridottos* were given, the tickets for which were £1:1s. each, including supper. Masquerades were shortly afterwards introduced, and the place soon became the favourite resort of the world of fashion. Ranelagh was afterwards opened about the end of February for breakfasts, and on Easter Monday for the evening entertainments. On April 10, 1746, a new organ by Byfield was opened at a public morning rehearsal of the music for the season, and Parry, the celebrated Welsh harper, appeared. In 1749, in honour of the Peace of Aix-la-Chapelle, an entertainment called 'A Jubilee Masquerade in the Venetian manner,' was given, of which Horace Walpole, in a letter to Sir Horace Mann, dated May 3, 1749, gives a lively description.

This proved so attractive that it was repeated several times in that and succeeding years, until the suppression of such entertainments in 1755. In 1751 morning concerts were given twice a week, Signora Frasi and Beard being the singers. At that date it had lost none of its charm. 'You cannot conceive,' says Mrs. Ellison, in Fielding's *Amelia*, 'what a sweet elegant delicious place it is. Paradise itself can hardly be equal to it.' In 1754 an entertainment of singing, recitation, etc. was given under the name of 'Comus's Court,' which was very successful. In 1755 a pastoral, the words from Shakespeare, the music by Arne, was produced; Beard and Miss Young were the singers; Handel's 'L'Allegro ed Il Penseroso' was introduced on Beard's benefit night, and Stanley was the organist. In 1759 Bonnell Thornton's burlesque Ode on St. Cecilia's Day was performed with great success. In 1762 Tenducci was the principal male singer. In 1764 a new orchestra was erected in one of the porticos of the Rotunda, the original one being found inconvenient from its height. On June 29, 1764, Mozart, then eight years old, performed on the harpsichord and organ several pieces of his own composition for the benefit of a charity. In 1770 Burney was the organist. Fireworks were occasionally exhibited, when the price of admission was raised to 5s. In 1777 the fashionable world played one of its strange, unreasoning freaks at Ranelagh. Walpole wrote on June 18:—'It is the fashion now to go to Ranelagh two hours after it is over. You may not believe this, but it is literal. The music ends at ten, the company go at twelve.' This practice caused the concert to be commenced at a later hour than before. In 1790 a representation of Mount Etna in eruption, with the

Cyclops at work in the centre of the mountain, and the lava pouring down its side, was exhibited. The mountain was 80 feet high. In 1793 the Chevalier d'Éon fenced in public with a French professor, and about the same time regattas on the Thames in connection with the place were established. In 1802 the Installation Ball of the Knights of the Bath was given at Ranelagh, and also a magnificent entertainment by the Spanish Ambassador. These were the last occurrences of any importance; the fortunes of the place had long been languishing, and it opened for the last time July 8, 1803. On Sept. 30, 1805, the proprietors gave directions for taking down the house and rotunda; the furniture was soon after sold by auction, and the buildings removed. The organ was placed in Tetbury Church, Gloucestershire. No traces of Ranelagh remain; the site now forms part of Chelsea Hospital garden. W. H. H.

RANK. A rank of organ-pipes is one complete series or set, of the same quality of tone and kind of construction from the largest to the smallest, controlled by one draw-stop, acting on one slider. If the combined movement of draw-stop and slider admits air to two or more such series of pipes, an organ-stop is said to be of two or more ranks, as the case may be. Occasionally the twelfth and fifteenth, or fifteenth and twenty-second, are thus united, forming a stop of two ranks; but, as a rule, only those stops whose tones are reinforcements of some of the higher upper-partials of the ground-tone are made to consist of several ranks, such as the Sesquialtera, Mixture, Furniture, etc. These stops have usually from three to five ranks each, reinforcing (according to their special disposition) the ground-tone by the addition of its 17th, 19th, 22nd, 24th, 26th, 29th,—that is, of its 3rd, 5th, and 8th in the third and fourth octave above. [See SESQUIALTERA and MIXTURE.] J. S.

RANSFORD, EDWIN, baritone vocalist, songwriter, and composer, born March 13, 1805, at Bourton-on-the-Water, Gloucestershire, died in London, July 11, 1876. He first appeared on the stage as an 'extra' in the opera-chorus at the King's Theatre, Haymarket, and was afterwards engaged in that of Covent Garden Theatre. During Charles Kemble's management of that theatre he made his first appearance as Don Caesar in 'The Castle of Andalusia,' on May 27, 1829, and was engaged soon afterwards by Arnold for the English Opera-House (now the Lyceum). In the autumn of 1829, and in 1830, he was at Covent Garden. In 1831 he played leading characters under Elliston at the Surrey Theatre, and became a general favourite. In 1832 he was with Joe Grimaldi at Sadler's Wells, playing Tom Truck, in Campbell's nautical drama 'The Battle of Trafalgar,' in which he made a great

hit with Neukomm's song, 'The Sea.' At this theatre he sustained the part of Captain Cannonade in Barnett's opera 'The Pet of the Petticoats.' He afterwards fulfilled important engagements at Drury Lane, the Lyceum, and Covent Garden. At Covent Garden he played the Doge of Venice in 'Othello,' March 25, 1833, when Edmund Kean last appeared on the stage, and Sir Harry in 'The School for Scandal' on Charles Kemble's last appearance as Charles Surface. His final theatrical engagement was with Macready at Covent Garden in 1837-38. He wrote the words of many songs, his best being perhaps 'In the days when we went gipsying.' In later years his entertainments, 'Gipsy Life,' 'Tales of the Sea,' and 'Songs of Dibdin,' etc., became deservedly popular. As a genial *bon camarade* he was universally liked. [He was also a music-seller and publisher, and during the forties and fifties issued a great number of the popular songs of the day. His shop was in Charles Street, Soho, but in 1850 he moved to 461 Oxford Street. In 1869 he went into partnership with his son, William Edwin, at 2 Princes Street, Cavendish Square. The son, who continued the business after his father's death, was a tenor vocalist of ability. He died Sept. 21, 1890. F. K.] W. H.

RANTZAU, I. Opera in four acts, text by G. Targioni-Tazzetti and G. Menasci, music by Mascagni. Produced at the Pergola, Florence, Nov. 10, 1892, and at Covent Garden, July 7, 1893.

RANZ DES VACHES (*Kuhreihen*, *Kuhreigen*; Appenzell patois *Chüereihen*), a strain of an irregular description, which in some parts of Switzerland is sung or blown on the Alpine horn in June, to call the cattle from the valleys to the higher pastures. Several derivations have been suggested for the words *ranz* and *reihen* or *reigen*. *Ranz* has been translated by the English 'rant,' and the French 'rondeau,' and has been derived from the Celtic root 'renk' or 'rank,' which may also be the derivation of *reihen*, in which case both words would mean the 'procession or march of the cows.' Stalder (*Schweizerisches Idiotikon*) thinks that *reihen* means 'to reach,' or 'fetch,' while other authorities say that the word is the same as *reigen* (a dance accompanied by singing), and derive *ranz* from the Swiss patois 'ranner,' to rejoice.

The Ranz des Vaches are very numerous, and differ both in music and words in the different cantons. They are extremely irregular in character, full of long cadences and abrupt changes of tempo. It is a curious fact that they are seldom strictly in tune, more particularly when played on the Alpine horn, an instrument in which, like the BAGPIPE, the note represented by F is really an extra note between F and F♯. This note is very characteristic of the Ranz des Vaches; passages like the following being repeated and varied almost *ad infinitum*.

The most celebrated Ranz des Vaches is that of Appenzell, a copy of which is said to have been sent to our Queen Anne, with whom it was a great favourite. The first work in which it was printed is Georg Rhaw's *Bicinia* (Wittenberg, 1545). It is also to be found in a dissertation on Nostalgia in Zwinger's *Fasciculus Dissertationum Medicarum* (Basle, 1710). Rousseau printed a version in his *Dictionnaire de Musique*, which Laborde arranged for four voices in his *Essai sur la Musique*. It was used by Grétry in his Overture to 'Guillaume Tell,' and by Adam in his *Méthod de Piano du Conservatoire*.¹ It has been also arranged by Webbe, Weigl, Rossini ('Guillaume Tell'), and Meyerbeer. W. B. S.

RAPPOLDI, EDUARD, born at Vienna, Feb. 21, 1831. He was placed by his father at an early age under Doleschall, and made his first appearance in his seventh year as violinist, pianist, and composer. His talent for the pianoforte was so great as to induce the Countess Banffy to put him under Mittag, Thalberg's teacher. But the violin was the instrument of his choice, and he succeeded in studying it under Jansa, who induced him to go to London in 1850. Here he made no recorded appearance. On his return to Vienna he was so far provided for by the liberality of the same lady, that he became a pupil of the Conservatorium under Hellmesberger from 1851 to 1854. He then put himself under Böhm, and shortly began to travel, and to be spoken of as a promising player. The first real step in his career was conducting a concert of Joachim's at Rotterdam in 1866, where he had been concertmeister since 1861. At the end of that year he went to Lübeck as capellmeister, in 1867 to Stettin in the same capacity, and in 1869 to the Landestheater at Prague. During this time he was working hard at the violin, and also studying composition with Sechter and Hiller. From 1871 to 1877 he was a colleague of Joachim's at the Hochschule at Berlin—where he proved himself a first-rate teacher—and a member of his quartet party. In 1876 he was made Royal

¹ There is a curious analogy between the above and the following strain, which is sung with infinite variations in the agricultural districts near London to frighten away the birds from the seed. In both passages the F is more nearly F♯.

² Other examples and descriptions will be found in the following works:—Cappeller's *Pilati Montis Historia* (1707); Stolberg's *Reise in Deutschland, der Schweiz, etc.* (1794); Boel's *Schilderung der Gebirgswelt der Schweiz* (1798); Signund von Wagner's *Acht Schweizer Kuhreihen* (1806); the article on Viotti in the *Décade philosophique* (An 6); Castelnau's *Considérations sur la Nostalgie* (1806); Edward Jones's *Musical Curiosities* (1811); *Recueil de Ranz des Vaches et de Chansons Nationales Suisses*, third edition, Berne, 1818, also Tarenne's *Sammlung von Schweizer Kuhreihen und Volksliedern* (1818); Huber's *Recueil de Ranz des Vaches* (1830); and Tobler's *Appenzellischer Sprachschatz* (1837).

JEAN PHILIPPE RAMEAU

Professor, and soon after received a call to a court concertmeistership at Dresden. This, however, his love for Joachim and for Berlin, where he had advanced sufficiently to lead the Quartets alternately with his chief, induced him for a long time to hesitate to accept, notwithstanding the very high terms offered. At length, however, he did accept it, and became (in 1877) joint concertmeister with Lauterbach at the Dresden opera, and chief teacher in the Conservatorium. He retired in 1898, after which time he only taught a few favoured pupils; he died in Dresden, May 16, 1903. Though a virtuoso of the first rank he followed in the footsteps of Joachim by sacrificing display to the finer interpretation of the music, and succeeded in infusing a new spirit into chamber-music at Dresden. He composed symphonies, quartets, sonatas, and songs, some of which have been printed. They are distinguished for earnestness, and for great beauty of form, and a quartet was performed in Dresden in the winter of 1878 which aroused quite an unusual sensation. In 1874 Rappoldi married a lady nearly as distinguished as himself, LAURA KAHER, who was born in Vienna, Jan. 14, 1853, and whose acquaintance he made many years before at Prague. Her talent, like his, showed itself very early. On the nomination of the Empress Elisabeth she became a pupil of the Conservatorium at Vienna, under Dachs and Dessoff, from 1866 to 1869. After taking the first prize, she made a *tournee* to the principal towns of Germany, ending at Weimar. There she studied under Liszt, and matured that beauty of touch, precision, fire, and intelligence, which have raised her to the first rank of pianists in Germany, and which induced Herr von Bülow—no lenient critic—to praise her playing of Beethoven's op. 106 in the highest terms. She was the worthy colleague of her husband in the best concerts of Dresden. G.

RASELIUS, ANDREAS, was born at Hahn-bach near Amberg in the Upper Palatinate some time between 1562 and 1564. He was the son of a Lutheran preacher, who had studied at Wittenberg under Melancthon, and whose original name, Rasel, Melancthon latinised into Raselius. From 1581 to 1584 Andreas attended the then Lutheran University of Heidelberg, taking his degree as Magister Artium in the latter year. In the same year he was appointed cantor and teacher at the Gymnasium of Ratisbon, then conducted under Lutheran auspices. In his capacity as cantor he published in 1589 a Musical Instruction book with the title *Hexachordum seu Quaestiones Musicae Practicae sex capitibus comprehensae*, which was still in use at Ratisbon in 1664. In 1599 appeared his 'Regenspurgischer Kirchen-Contra-punkt,' which contains simple settings a 5 of 51 of the older Lutheran Psalm-tunes and chorales. The full title describes them as set

so that the congregation may easily sing the chorale-tune while the trained choir provide the harmonies. The chorale-tune is in the upper part, but the harmonies are not always mere note-for-note counterpoint as in a modern hymn-tune. A few specimens of these settings are given in Schöberlein's *Schatz*. Other published works of Raselius are 'Teutsche Sprüche aus den Sonntäglichen Evangelia . . .,' 53 German Motets a 5 (Nuremberg, 1594), and 'Neue Teutsche Sprüche auf die . . . Fest und Aposteltage . . .,' 22 Motets a 5-9, described as composed on the 12 Modes of the Dodecachordon (Nuremberg, 1595). Besides these published works there remain in MS. several collections of Latin and German motets and magnificats by Raselius. He is also known as the author of a historical work, a chronicle of Ratisbon, originally written both in Latin and German, of which only the German edition survives. Raselius remained at Ratisbon till 1600, when he received a pressing invitation from the Elector Palatine Frederick IV. to return to Heidelberg as Hofcapellmeister. This higher post of honour he was not permitted to retain long, as death carried him off on Jan. 6, 1602. A monograph on Raselius by J. Auer of Amberg appeared as a Beilage to Eitner's *Monatshefte* of 1892. J. R. M.

RASOUMOWSKY,¹ ANDREAS KYRILLO-VITSCH, a Russian nobleman to whom Beethoven dedicated three of his greatest works, and whose name will always survive in connection with the 'Rasoumowsky Quartets' (op. 59). He was the son of Kyrill Rasum, a peasant of Lemeschi, a village in the Ukraine, who, with his elder brother, was made a Count (Graf) by the Empress Elisabeth of Russia. Andreas was born Oct. 22, 1752, served in the English and Russian navies, rose to the rank of admiral, and was Russian ambassador at Venice, Naples, Copenhagen, Stockholm, and Vienna. In England his name must have been familiar, or Foote would hardly have introduced it as he has in 'The Liar' (1762). At Vienna he married, in 1788, Elisabeth Countess of Thun, one of the 'three Graces,' elder sister of the Princess Carl Lichnowsky [see vol. ii. p. 723a]; and on March 25, 1792, had his audience from the Emperor of Austria as Russian ambassador, a post which he held with short intervals for more than twenty years. He was a thorough musician, an excellent player of Haydn's quartets, in which he took second violin, not improbably studying them under Haydn himself. That, with his connection with Lichnowsky, he must have known Beethoven is obvious; but no direct trace of the acquaintance is found until May 26, 1806 (six weeks after the withdrawal of 'Fidelio'), which Beethoven—in his usual polyglot—has marked on the first page of the

¹ Rasumoffsky and Rasoumoffsky are forms used by Beethoven in various dedications.

Quartet in F of op. 59, as the date on which he began it—'Quartetto angefangen am 26ten May 1806.'

In 1808 the Count formed his famous quartet party—Schuppanzigh, first violin; Weiss, viola; Lincke, violoncello; and he himself second violin—which for many years met in the evenings, and performed, among other compositions, Beethoven's pieces, 'hot from the fire,' under his own immediate instructions.

In April 1809 appeared the C minor and Pastoral Symphonies (Nos. 5 and 6), with a dedication (on the Parts) to Prince Lobkowitz and 'son excellence Monsieur le Comte de Rasoumoffsky' (Breitkopf & Härtel). These dedications doubtless imply that Beethoven was largely the recipient of the Count's bounty, but there is no direct evidence of it, and there is a strange absence of reference to the Count in Beethoven's letters. His name is mentioned only once—July 24, 1813—and there is a distant allusion in a letter of a much later date (Nohl, *Briefe* B. 1865, No. 354). In the autumn of 1814 came the Vienna Congress (Nov. 1, 1814—June 9, 1815), and as the Empress of Russia was in Vienna at the time, the Ambassador's Palace was naturally the scene of special festivities. It was not, however, there that Beethoven was presented to the Empress, but at the Archduke Rodolph's.¹ The Count's hospitalities were immense, and, vast as was his palace, a separate wooden annexe had to be constructed capable of dining 700 persons.

On June 3, 1815, six days before the signature of the final Act of the Congress, the Count was made Prince (Fürst), and on the 31st of the following December the dining-hall just mentioned was burnt down. The Emperor of Russia gave 400,000 silver roubles (£40,000) towards the rebuilding, but the misfortune appears to have been too much for the Prince; he soon after sold the property, pensioned his quartet, and disappears from musical history. The quartet kept together for many years after this date, Sina playing second violin. Beethoven mentions them *à propos* of the Galitzin Quartets in the letter to his nephew already referred to, about 1825.

A. W. T.

The three quartets to which Rasoumowsky's name is attached form op. 59, and are in F, E minor, and C respectively. The first of the three, as already mentioned, was begun May 26, 1806, and the whole three were finished and had evidently been played before Feb. 27, 1807, the date of a letter in the *Allg. mus. Zeitung* describing their characteristics.² They were published in January 1808 (Vienna Bureau des Arts; Pesth, Schreyvogel), and the dedication (on the Parts) begins 'Trois Quatuors

très humblement dédiées à son Excellence Monsieur le Comte,' etc. Beethoven himself mentions them in a letter to Count Brunswick, which he has dated May 11, 1806, but which Thayer (iii. 11) sees reason to date 1807.

The Quartet in F is the one which Bernard Romberg is said to have thrown on the ground and trampled upon as unplayable.—The slow movement is entitled in the Sketchbook 'Einen Trauerweiden oder Akazienbaum aufs Grab meines Bruders'—'A weeping willow or acacia tree over the grave of my brother.' But which brother? August died in 1783, twenty-three years before, Carl not till ten years after, and Johann not till 1848. Carl's marriage-contract had, however, been signed only on May 25, 1806. Is it possible that this inscription is a Beethovenish joke on the occasion? If so, he began in fun and ended in earnest. The finale has a Russian theme in D minor for its principal subject, and the second of the three has a Russian theme in E major as the Trio of its third movement.

G.

[The tunes are given in Köhler's 'Album Russe' as Nos. 188 and 175 respectively; and are also in 'Chants Nationaux Russes,' Nos. 13 and 45.]

RATAPLAN, like Rub-a-dub, is an imitative word for the sound of the drum, as Tan-ta-ra is for that of the trumpet, and Tootle-tootle for the flute.³ It is hardly necessary to mention its introduction by Donizetti in the 'Fille du Régiment,' or by Meyerbeer in the 'Huguenots'; and every Londoner is familiar with it in Sergeant Bouncer's part in Sullivan's 'Cox and Box.' 'Rataplan, der kleine Tambour' is the title of a Singspiel by Pillwitz, which was produced at Bremen in 1831, and had a considerable run both in North and South Germany between that year and 1836.

G.

RAUZZINI, VENANZIO, born 1747, in Rome, where he made his début in 1765, captivating his audience by his fine voice, clever acting, and prepossessing appearance. In 1766 or 1767 he was at Munich, where Burney heard him in 1772, and where four of his operas were performed. He sang at various places during this period. In London he made his first appearance in 1774, in Corri's 'Alessandro nell' Indie.' [His appearance in a pasticcio of 'Armida' in the same year has resulted in the attribution to him of an opera of that name dated 1778, and the error has been copied into most dictionaries from the first edition of this work.] He also distinguished himself as an excellent teacher of singing, Miss Storace, Braham, Miss Poole (afterwards Mrs. Dickone), and Incedon, being among his pupils. In 1778 and 1779 he gave subscription concerts with the violinist Lamotte, when they were assisted by such eminent artists as Miss Harrop, Signor Rovedino,

¹ Schindler, i. 233 (quoted by Thayer, iii. 321).

² They are again alluded to in the number for May 5 as more and more successful, and possibly to be soon published; and then, with astonishing rapidity, follows 'Beethoven's newest compositions, too, are anticipated with great pleasure!'

³ Other forms are Patapaplan, Palelalelan, Bumberumbum. See the *Dictionnaire Encyclopédique* of Sachs & Villatte.

Fischer, Cervetto, Stamitz, Decamp, and Clementi. He also gave brilliant concerts in the new Assembly Rooms (built 1771) at Bath, where he took up his abode on leaving London. Here he invited Haydn and Dr. Burney to visit him, and the three spent several pleasant days together in 1794. On this occasion Haydn wrote a four-part canon (or more strictly a round) to an epitaph on a favourite dog buried in Rauzzini's garden, 'Turk was a faithful dog and not a man.' (See TURK.) Rauzzini's operas performed in London were 'Pirame e Tisbe' (March 16, 1775, and afterwards in Vienna), 'Le Ali d'Amore' (Feb. 27, 1776); 'Creusa in Delfo' (1783); 'La Regina di Golconda' (1784); and 'La Vestale' (1787). 'L'Eroe Cinese,' originally given at Munich in 1771, was performed in London in 1782. (These dates are from the *Public Advertiser*.) He composed string-quartets, sonatas for PF., Italian arias and duets, and English songs; also a Requiem produced at the little Haymarket Theatre in 1801, by Dr. Arnold and Salomon. He died, universally regretted, at Bath, April 8, 1810. His brother

MATTEO, born in Rome 1754, made his first appearance at Munich in 1772, followed his brother to England, and settled in Dublin, where he produced an opera, 'Il Rè pastore,' in 1784. He had written 'Le finte Gemelli' for Munich in 1772, and 'L'opera nuova' for Venice in 1781. He employed himself in teaching singing, and died in 1791. C. F. P.

RAVENSCROFT, JOHN, one of the Tower Hamlets waits, and violinist at Goodman's Fields Theatre, was noted for his skill in the composition of hornpipes, a collection of which he published. Two of them are printed in Hawkins's *History*, and another in vol. iii. of 'The Dancing Master.' A set of sonatas for two violins and violone or arch-lute, were printed at Rome in 1695. He died about 1745. W. H. H.

RAVENSCROFT, THOMAS, Mus.B., born about 1582, was a chorister of St. Paul's under Edward Pearce, and graduated at Cambridge in 1607. In 1609 he edited and published 'Pam-melia. Musickes Miscellanie: or Mixed Varietie of pleasant Roundelays and delightful Catches, of 3, 4, 5, 6, 7, 8, 9, 10 Parts in one'—the earliest collection of rounds, catches, and canons printed in this country. A second impression appeared in 1618. Later in 1609 he put forth 'Deutero-melia; or the Second Part of Musick's Melodie, or melodius Musicke of Pleasant Roundelaies; K. H. mirth, or Freeman's Songs and such delightfull Catches'; containing the catch, 'Hold thy peace, thou knave,' sung in Shakespeare's 'Twelfth Night.' In 1611 he published 'Melismata. Musicall Phansies, fitting the Court, Citie, and Countrey Humours, to 3, 4 and 5 Voyces.' In 1614 he published 'A Briefe Discourse of the true (but neglected) use of Charactering the Degrees by their Perfection,

Imperfection, and Diminution in Mensurable Musicke against the Common Practise and Custome of these Times; Examples whereof are exprest in the Harmony of 4 Voyces Concerning the Pleasure of 5 vsuall Recreations. 1. Hunting. 2. Hawking. 3. Dancing. 4. Drinking. 5. Enamouring'—a vain attempt to resuscitate an obsolete practice. The musical examples were composed by Edward Pearce, John Bennet, and Ravenscroft himself. [Much of the material is found in a MS. in the Brit. Mus. Add. MS. 19,758 (*Dict. of Nat. Biog.*). In 1618-22 he was music-master at Christ's Hospital (*Mus. Times*, 1905, p. 580.)] In 1621 he published the work by which he is best known, 'The Whole Booke of Psalmes: With the Hymnes Evangelicall and Spirituall. Composed into four parts by Sundry Authors with severall Tunes as have been and are usually sung in England, Scotland, Wales, Germany, Italy, France, and the Netherlands.' Another edition was published in 1633. Four anthems or motets by Ravenscroft are among the MSS. in the library of Christ Church, Oxford. [For other music by him see the *Quellen-Lexikon*.] The date of his death is not known. It is said by some to have been about 1630, and by others about 1635. W. H. H.

RAVINA, JEAN HENRI, a pianoforte composer, was born May 20, 1818, at Bordeaux, where his mother was a prominent musician. At the instance of Rode and Zimmermann the lad was admitted to the Conservatoire of Paris in 1831. His progress was rapid—second prize for PF. in 1832; first prize for the same in 1834; first for harmony and accompaniment in 1835, a joint professorship of PF. Nov. 1835. In Feb. 1837 he left the Conservatoire and embarked on the world as a virtuoso and teacher. He resided exclusively at Paris, with the exception of a journey to Russia in 1853, and Spain in 1871. He received the Legion of Honour in 1861. His compositions are almost all salon pieces, many of them very popular in their time, graceful and effective, but with no permanent qualities. He also published a 4-hand arrangement of Beethoven's nine symphonies. Ravina died in Paris, Sept. 30, 1906.—The above sketch is indebted to M. Pougin's supplement to Fétis. G.

RAWLINGS, or RAWLINS, THOMAS, born about 1703, was a pupil of Dr. Pepusch, and a member of Handel's orchestra at both opera and oratorio performances. On March 14, 1753, he was appointed organist of Chelsea Hospital. He died in 1767. His son, ROBERT, born in 1742, was a pupil of his father, and afterwards of Barsanti. At seventeen he was appointed musical page to the Duke of York, with whom he travelled on the continent until his death in 1767, when he returned to England and became a violinist in the King's band and Queen's private band. He died in 1814, leaving

a son, THOMAS A., born in 1775, who studied music under his father and Dittenhofer. He composed some instrumental music performed at the Professional Concerts, became a violinist at the Opera and the best concerts, and a teacher of the pianoforte, violin, and thorough-bass. He composed and arranged many pieces for the pianoforte, and some songs, and died about the middle of the 19th century. W. H. H.

RAYMOND AND AGNES. A 'grand romantic English Opera in three acts'; words by E. Fitzball, music by E. J. Loder. Produced at Manchester in 1855, and at St. James's Theatre, London, June 11, 1859. G.

RE. The second note of the natural scale in solmisation and in the nomenclature of France and Italy, as Ut (or Do) is the first, Mi the third, and Fa the fourth—

*Ut queant laxis resonare fibris
Mira gestorum, famuli tuorum.*

By the Germans and English it is called D. G.

RE PASTORE, IL. A dramatic cantata to Metastasio's words (with compressions), composed by Mozart at Salzburg in 1775, in honour of the Archduke Maximilian. First performed April 23, 1775. It contains an overture and fourteen numbers. The autograph is in the Royal Library at Berlin, and the work is published in Breitkopf's complete edition as Series V. No. 10. Aminta's air, 'L'amerò,' with violin obbligato, is the number by which the work is most widely known. G.

REA, WILLIAM, born in London, March 25, 1827; when about ten years old learnt the pianoforte and organ from Josiah Pittman, for whom he acted as deputy for several years. In about 1843 he was appointed organist to Christchurch, Watney Street, St. George's-in-the-East, and at the same time studied the pianoforte, composition, and instrumentation under Sterndale Bennett, appearing as a pianist at the concerts of the Society of British Musicians in 1845. On leaving Christchurch he was appointed organist to St. Andrew Undershaft. In 1849 he went to Leipzig, where his masters were Moscheles and Richter; he subsequently studied under Dreychock at Prague. On his return to England, Mr. Rea gave chamber concerts at the Beethoven Rooms, and became (1853) organist to the Harmonic Union. In 1856 he founded the London Polyhymnion Choir, to the training of which he devoted much time, and with excellent results; at the same time he conducted an amateur orchestral society. In 1858 he was appointed organist at St. Michael's, Stockwell, and in 1860 was chosen by competition organist to the corporation of Newcastle-on-Tyne, where he also successively filled the same post at three churches in succession, and at the Elswick Road Chapel. At Newcastle Mr. Rea worked hard to diffuse a taste for good music, though he met with less encouragement

than his labours and enthusiasm deserved. Besides weekly organ and pianoforte recitals, he formed a choir of eighty voices, which in 1862 was amalgamated with the existing Sacred Harmonic Society of Newcastle. In 1867 he began a series of excellent orchestral concerts which were carried on every season for nine years, when he was compelled to discontinue them, owing to the pecuniary loss which they entailed. In 1876 he gave two performances of 'Antigone' at the Theatre Royal, and devoted much of his time to training his choir (200 voices), the Newcastle Amateur Vocal Society, and other Societies on the Tyne and in Sunderland, besides giving concerts at which the best artists performed. His published works comprise four songs, three organ pieces, and some anthems. At the close of 1880 he was appointed organist of St. Hilda's, S. Shields, in 1888 he resigned the corporation appointment. [He was an honorary Fellow of the Royal College of Organists, and in 1886 received the honorary degree of Mus.D. from the University of Durham. He composed a 'Jubilee Ode' for the Newcastle Exhibition of 1887, and he died at Newcastle, March 8, 1903. An account of his life and works is in *Musical Times*, April 1903. His wife, Emma Mary (*née* Woolhouse), was an accomplished musician, actively connected with the musical life of Newcastle. She died May 6, 1893. F. K.] W. B. S.

READE, CHARLES, English dramatist and novelist—born June 8, 1814, died April 11, 1884—claims a notice in his capacity of expert connoisseur, and one of the earliest collectors of old violins. He devoted much time to the study of violin construction, and—as his sons put it—acquired 'as keen a scent for the habitat of a rare violin, as the truffle dog for fungus beneath the roots of the trees.' He gathered much of this accurate knowledge from one Henri, a player and a maker to boot, resident in Soho, with whom he engaged in experiments in varnish, and in the business of importing fiddles from abroad for the English dealers. Frequent visits to Paris, in the latter connection, resulted sometimes in profit, and at other times in financial catastrophe; but they succeeded in bringing to England some of the finest specimens of Cremona instruments that are known to-day. They were in Paris, buying a stock of thirty fiddles, when the Revolution of 1848 broke out, and Henri threw aside fiddle-dealing and joined the revolutionists. He was shot before his friend's eyes at the first barricade, and Charles Reade escaped with difficulty, leaving the fiddles behind. These were found stored away in a cellar after the Revolution, and eventually reached Reade, who records that he sold one of them for more than he paid for the whole lot. At the time of the Special Loan Exhibition of Musical Instruments held at the South Kensington Museum in 1872, Reade wrote a

series of letters upon Cremona fiddles in the *Pall Mall Gazette*, in which he propounded the theory that the 'Lost Cremona Varnish' was a spirit varnish laid over an oil varnish. Coming as it did from so noted a connoisseur, there were many who accepted the theory as the solution of the question. These letters were privately reprinted by G. H. M. Muntz, under the title *A Lost Art Revived: Cremona Violins and Varnish* (Gloucester, 1873), and again in the volume entitled *Readiana* (Chatto & Windus, 1882). In later life Charles Reade abandoned fiddles and fiddle-trading, but we find traces of his infatuation in his writings. The adventurous career of John Frederick Lott, the violin-maker, is told by him, somewhat romantically, in his novel *Jack of all Trades*; whilst interesting matter concerning the violin comes into *Christie Johnstone*, and his collection of tales entitled *Cream*.—Reade (Charles L., and Rev. Compton), *Charles Reade*; Coleman (John), *Charles Reade*; Sutherland-Edwards, *Personal Recollections*; Hart (G.), *The Violin*; *Dict. of Nat. Biog.* E. H. A.

READING, JOHN. There were three musicians of these names, all organists. The first was appointed Junior Vicar Choral of Lincoln Cathedral, Oct. 10, 1667, Poor Vicar, Nov. 28, 1667, and Master of the Choristers, June 7, 1670. He succeeded Randolph Jewett as organist of Winchester Cathedral in 1675, and retained the office until 1681, when he was appointed organist of Winchester College. He died in 1692. He was the composer of the Latin Graces sung before and after meat at the annual College election times, and the well-known Winchester School song, 'Dulce Domum'; all printed in Dr. Philip Hayes's 'Harmonia Wiccamica.' The second was organist of Chichester Cathedral from 1674 to 1720. Several songs included in collections published between 1681 and 1688 are probably by one or other of these two Readings. The third, born 1677, was a chorister of the Chapel Royal under Dr. Blow. In 1696-98 he was organist of Dulwich College [information from Dr. W. H. Cummings]. He was appointed Junior Vicar and Poor Clerk of Lincoln Cathedral, Nov. 21, 1702, Master of the Choristers, Oct. 5, 1703, and Instructor of the choristers in vocal music, Sept. 28, 1704. He appears to have resigned these posts in 1707, and to have returned to London, where he became organist of St. John, Hackney (in 1708), St. Dunstan in the West, St. Mary Woolchurchhaw, Lombard Street, and St. Mary Woolnoth. He published 'A Book of New Songs (after the Italian manner) with Symphonies and a Thorough Bass fitted to the Harpsichord, etc.,' and (about 1709) 'A Book of New Anthems.' One of the Readings was also the reputed composer of the tune to 'Adeste fideles.' He died Sept. 2, 1764.

There was another person named Reading,

who was a singer at Drury Lane in the latter part of the 17th century. In June 1695 he and Pate, another singer at the theatre, were removed from their places and fined 20 marks each for being engaged in a riot at the Dog Tavern, Drury Lane, but were soon after reinstated.

A Rev. John Reading, D.D., Prebendary of Canterbury Cathedral, preached there a sermon in defence of church music, and published it in 1663. W. H. H.

REAL FUGUE. See FUGUE.

REAY, SAMUEL, born at Hexham, March 17, 1822, was noted for his fine voice and careful singing as a chorister at Durham Cathedral; and under Henslaw the organist, and Penson the precentor there, became acquainted with much music outside the regular Cathedral services. After leaving the choir he had organ lessons from Mr. Stimpson of Birmingham, and then became successively organist at St. Andrew's, Newcastle (1845); St. Peter's, Tiverton (1847); St. John's Parish Church, Hampstead (1854); St. Saviour's, Warwick Road (1856); St. Stephen's, Paddington; Radley College (1859, succeeding Dr. E. G. Monk); Bury, Lancashire (1861); and in 1864 was appointed 'Song-schoolmaster and organist' of the parish Church Newark, retiring from the latter post in 1901, but retaining that of Song schoolmaster on the Magnus foundation until his death, which took place at Newark, July 22, 1905. In 1871 Reay graduated at Oxford as Mus. B. In 1879 he distinguished himself by producing at the Bow and Bromley Institute, London, two comic cantatas of J. S. Bach's ('Caffee-cantate' and 'Bauern-cantate'), which were performed there—certainly for the first time in England—on Oct. 27, under his direction, to English words of his own adaptation. Mr. Reay was noted as a fine accompanist and extempore player on the organ. He published a Morning and Evening Service in F, several anthems, and two madrigals (all Novello); but is best known as a writer of part-songs, some of which ('The clouds that wrap,' 'The dawn of day,' written for the Tiverton Vocal Society) are deservedly popular. G.

REBEC (Ital. *Ribeca*, *Ribeba*; Span. *Rabé*, *Rabel*). The French name (said to be of Arabic origin) of that primitive stringed instrument which was in use throughout western Europe in the Middle Ages, and was the parent of the viol and violin, and is identical with the German 'geige' and the English 'fiddle'; in outline something like the mandoline, of which it was probably the parent. It was shaped like the half of a pear, and was everywhere solid except at the two extremities, the upper of which was formed into a peg-box identical with that still in use, and surmounted by a carved human head. The lower half was considerably cut down in level, thus leaving the upper solid part of the instrument to form a natural finger-board. The portion thus cut down was scooped out,

and over the cavity thus formed was glued a short pine belly, pierced with two trefoil-shaped sound-holes, and fitted with a bridge and sound-

post. The player either rested the curved end of the instrument lightly against the breast, or else held it like the violin, between the chin and the collar-bone, and bowed it like the violin. It had three stout gut strings, tuned like the lower strings of the violin (A, D, G). Its tone was loud and harsh, emulating the female voice, according to a French poem of the 13th century.

Quidam rebecam arcuabant,
Muliebrem vocem confingentes.¹

An old Spanish poem speaks of 'el rabé gritador,'² or the 'equalling rebec.' This powerful tone made it useful in the mediæval orchestra; and Henry the Eighth employed the rebec in his state band. It was chiefly used, however, to accompany dancing; and Shakespeare's musicians in *Romeo and Juliet*, Hugh Rebeck, Simon Catling (Catgut), and James Soundpost, were undoubtedly rebec-players. After the invention of instruments of the viol and violin type it was banished to the streets of towns and to rustic festivities, whence the epithet 'jocund' applied to it in Milton's *L'Allegro*. It was usually accompanied by the drum or tambourine. It was in vulgar use in France in the 18th century, as is proved by an ordinance issued by Guignon in his official capacity as 'Roi des Violons' in 1742, in which street-fiddlers are prohibited from using anything else; 'Il leur sera permis d'y jouer d'une espèce d'instrument à trois cordes seulement, et connu sous le nom de rebec, sans qu'ils puissent se servir d'un violon à quatre cordes sous quelque prétexte que ce soit.' A similar order is extant, dated 1628, in which it is forbidden to play the treble or bass violin 'dans les cabarets et les mauvais lieux,' but only the rebec. The rebec was extinct in England earlier than in France. It is now totally

disused, and no specimen was known until, at the exhibition of Musical Instruments at Milan in 1881, six genuine specimens were shown. Representations of it in sculpture, painting, manuscripts, etc., are abundant. The illustration is from an Italian painting of the 13th century engraved in Vidal's *Instruments à Archet*. [The custom of playing songs in unison with the voice, which came into vogue in the 15th century, resulted in the classification of rebecs into definite 'sets' answering in pitch to the Treble, Alto, Tenor, and Bass voices. Martin Agricola, in his *Musica Instrumentalis*, 1528, gives woodcuts of a 'set' of rebecs which he calls Discant, Altus, Tenor, and Bassus. E. H. A.] E. J. P.

REBEL, JEAN FÉRY, born in Paris about 1661, [the son of JEAN, a singer in the service of the French court, from 1661 to his death in 1692.] After a precocious childhood he entered the Opéra as a violinist. In 1703 he produced 'Ulysse,' opera in five acts with prologue, containing a *pas seul* for François Prévôt to an air called 'Le Caprice,' for violin solo. The opera failed, but the Caprice remained for years the test-piece of the *ballerine* at the Opéra. After this success, Rebel composed violin solos for various other ballets, such as 'La Bontade,' 'Les Caractères de la Danse' (1715), 'Terpsichore' (1720), 'La Fantaisie' (1727), 'Les Plaisirs Champêtres,' and 'Les Éléments.' Several of these were engraved, as were his sonatas for the violin. In 1713 he was accompanist at the Opéra, and in 1717 was one of the '24 violons,' and by 1720 'compositeur de la chambre' to the King. [This latter office he resigned in 1727, in favour of his son François, and later passed on to him the duties of conductor of the Opéra, which he had fulfilled for many years.] He died in Paris, 1746 or 1747, and was buried on Jan. 3, 1747. [His sister, ANNE-RENÉE, born 1662, became one of the best singers of the court, and from the age of eleven years, appeared in the ballet, etc. She was married in 1684 to Michel Richard de LALANDE (see vol. ii. p. 623), and she died in 1722.]

Jean-Féry's son FRANÇOIS, born in Paris, June 19, 1701, at thirteen played the violin in the Opéra orchestra. It seems to have been at Prague, during the festivities at the coronation of Charles VI. in 1723, that he became intimate with François Francoeur; the two composed conjointly, and produced at the Académie, the following operas:—'Pyrame et Thisbé' (1726); 'Tarsis et Zélie' (1728); 'Scanderbeg' (1735); 'Ballet de la Paix' (1738); 'Les Angustales' and 'Le Retour du Roi' (1744); 'Zélindor,' 'Le Trophée' (in honour of Fontenoy, 1745); 'Ismène' (1750); 'Les Génies tutélaires' (1751); and 'Le Prince de Noisy' (1760); most of which were composed for court fêtes or public rejoicings. [Rebel

seems to have been the sole author of a 'Pastorale héroïque' (1730).]

From 1733 to 1744 Rebel and Francœur were joint leaders of the Académie orchestra, and in 1753 were appointed managers. They soon, however, retired in disgust at the petty vexations they were called upon to endure. Louis XV. made them surintendants of his music, with the Order of St. Michel. In March 1757 these inseparable friends obtained the privilege of the Opéra, and directed it for ten years on their own account, with great administrative ability.

Rebel died in Paris, Nov. 7, 1775. He composed some cantatas, a *Te Deum*, and a *De Profundis*, performed at the Concerts Spirituels, but all his music is now forgotten, excepting a lively air in the first finale of 'Pyrame et Thisbé' which was adapted to a much-admired *pas seul* of Mlle. de Camargo, thence became a popular contredanse—the first instance of such adaptation—and in this form is preserved in the 'Clé du Caveau,' under the title of 'La Camargo.' [A very interesting account of the family, with detailed notices of the music of G. F. Rebel, appeared in the *Sammelbände* of the *Int. Mus. Ges.* vol. vii. p. 253, by M. L. de la Laurencie.] G. C.

REBER, NAPOLEON-HENRI, born at Mühlhausen, Oct. 21, 1807; at twenty entered the Paris Conservatoire, studying counterpoint and fugue under Senriot and Jeleusperger, and composition under Lesueur. Circumstances led him to compose chamber-music, after the success of which he attempted opera. His music to the second act of the charming ballet 'Le Diable amoureux' (Sept. 23, 1840) excited considerable attention, and was followed at the Opéra-Comique by 'La Nuit de Noël,' three acts (Feb. 9, 1848), 'Le Père Gaillard,' three acts (Sept. 7, 1852), 'Les Papillotes de M. Benoît,' one act (Dec. 28, 1853), and 'Les Dames Capitaines,' three acts (June 3, 1857). In these works he strove to counteract the tendency towards noise and bombast then so prevalent both in French and Italian opera, and to show how much may be made out of the simple natural materials of the old French opéra-comique by the judicious use of modern orchestration.

In 1851 he was appointed Professor of harmony at the Conservatoire, and in 1853 the well-merited success of 'Le Père Gaillard' procured his election to the Institut as Onslow's successor. Soon after this he renounced the theatre, and returned to chamber-music. He also began to write on music, and his *Traité d'Harmonie* (1862) went through many editions, and is without comparison the best work of its kind in France. The outline is simple and methodical, the classification of the chords easy to follow and well connected, the explanations luminously clear, the exercises practical and well calculated to develop musical taste—in a

word, everything combines to make it one of the safest and most valuable of instruction-books. The second part especially, dealing with 'accidental' notes—or, notes foreign to the constitution of chords—contains novel views, and observations throwing light upon points and rules of harmony which before were obscure and confused.

In 1862 M. Reber succeeded Halévy as Professor of composition at the Conservatoire; since 1871 he was also Inspector of the *succursales* or branches of the Conservatoire. He died in Paris, after a short illness, Nov. 24, 1880, and was succeeded as Professor by M. Saint-Saëns.

His compositions comprise four symphonies, a quintet and three quartets for strings, one PF. ditto, seven trios, duets for PF. and violin, and PF. pieces for two and four hands. Portions of his ballet 'Le Diable amoureux' have been published for orchestra, and are performed at concerts. In 1875 he produced a cantata called 'Roland,' but 'Le Ménétrier à la cour,' opéra-comique, and 'Naïm,' grand opera in five acts, have never been performed, though the overtures are engraved. His best vocal works are his melodies for a single voice, but he has composed choruses for three and four men's voices, and some sacred pieces. G. C.

RECITA (Ital.), 'performance.'

RECITAL, a term which has come into use in England to signify a performance of solo music by one performer. It was probably first used by Liszt at his performance at the Hanover Square Rooms, June 9, 1840, though as applying to the separate pieces and not to the whole performance. The advertisement of the concert says that 'M. Liszt will give Recitals on the Pianoforte of the following pieces.' The name was afterwards adopted by Hallé and others, and is in the present day often applied to concerts when two or more soloists take part.

The term Opera Recital is used for a concert in which the music of an opera is sung without costume or action. G.

RECITATIVE (Ital. *Recitativo*; Germ. *Recitativ*; Fr. *Récitatif*; from the Latin *Recitare*). A species of declamatory music, extensively used in those portions of an Opera, an Oratorio, or a Cantata, in which the action of the drama is too rapid, or the sentiment of the poetry too changeful, to adapt itself to the studied rhythm of a regularly constructed Aria.

The invention of Recitative marks a crisis in the history of music, scarcely less important than that to which we owe the discovery of harmony. Whether the strange conception in which it originated was first clothed in tangible form by Jacopo Peri, Giulio Caccini, or Emilio del Cavalieri, is a question which has never been decided.

Thus first launched upon the world, for the purpose of giving a new impetus to the progress

of art, this particular style of composition has undergone less change, during the last 300 years, than any other. What simple or unaccompanied Recitative (*Recitativo secco*) is to-day, it was, in all essential particulars, in the time of 'Euridice.' Then, as now, it was supported by the lightest possible accompaniment, originally a figured-bass. Then, as now, its periods were moulded with reference to nothing more than the plain rhetorical delivery of the words to which they were set; melodious or rhythmic phrases being everywhere carefully avoided, as not only unnecessary, but absolutely detrimental to the desired effect—so detrimental that the difficulty of adapting good recitative to poetry written in short rhymed verses is almost insuperable, the jingle of the metre tending to crystallise itself in regular form with a persistency which is rarely overcome except by the greatest masters. Hence it is, that the best poetry for recitative is blank verse; and hence it is, that the same intervals, progressions, and cadences have been used over and over again by composers who, in other matters, have scarcely a trait in common. We shall best illustrate this by selecting a few examples from the inexhaustible store used by some of the greatest writers of the 17th, 18th, and 19th centuries; premising that, in phrases ending with two or more reiterated notes, it has been long the custom to sing the first as an appoggiatura, a note higher than the rest. We have shown this in three cases, but the rule applies to many others.

 er scheine hier zur Stell'.

The universal acceptance of these, and similar figures, by composers of all ages, from Peri down to Wagner, sufficiently proves their fitness for

the purpose for which they were originally designed. But the staunch conservatism of *Recitativo secco* goes even farther than this. Its accompaniment has never changed. The latest composers who have employed it have trusted for its support to the simple *Basso continuo*, which neither Peri, nor Carissimi, nor Handel, nor Mozart cared to reinforce by the introduction of a fuller accompaniment. The chief modification of the original idea which has found favour in modern times was when the harpsichord and the pianoforte were banished from the opera orchestra, and the accompaniment of *Recitativo secco* was confided to the principal violoncello and double bass; the former filling in the harmonies in light arpeggios, while the latter confined itself to the simple notes of the *Basso continuo*. In this way the Recitatives were performed at Her Majesty's Theatre for more than half a century by Lindley and Dragonetti, who always played at the same desk, and accompanied with a perfection attained by no other artists in the world, though Charles Jane Ashley was considered only second to Lindley in expression and judgment. The general style of their accompaniment was exceedingly simple, consisting only of plain chords, played *arpeggiando*; but occasionally the two old friends would launch out into passages as elaborate as those shown in the following example; Dragonetti playing the large notes, and Lindley the small ones.

governed by no law whatever beyond that of euphony. Its harmonies exhibit more variety now than they did two centuries ago; but they are none the less free to wander wherever they please, passing through one key after another, until they land the hearer somewhere in the immediate neighbourhood of the key chosen for the next regularly constructed movement. Hence it is that recitatives of this kind are usually written without the introduction of sharps or flats at the signature; since it is manifestly more convenient to employ any number of accidentals that may be needed, than to place three or four sharps at the beginning of a piece which is perfectly at liberty to end in seven flats.

But notwithstanding the unchangeable character of *Recitativo secco*, declamatory music has not been relieved from the condition which imposes progress upon every really living branch of art. As the resources of the orchestra increased, it became evident that they might be no less profitably employed in the accompaniment of highly impassioned recitative than in that of the aria or chorus; and thus arose a new style of rhetorical composition, called accompanied recitative (*Recitativo stromentato*), in which the vocal phrases, themselves unchanged, received a vast accession of power, by means of elaborate orchestral symphonies interpolated between them, or even by instrumental passages designed expressly for their support. [The

Musical score for Don Giovanni, Leporello, and Don Giovanni. The score shows three staves with vocal lines and lyrics. The lyrics are: "Per la mano essa al-lo-ra me prende An-co-ra meglio M'acca - rea-za, mi abbraccia etc." The notation includes various musical symbols such as notes, rests, and bar lines.

In no country has this peculiar style been so successfully cultivated as in England, where the traditions of its best period are scarcely yet forgotten. [On an interesting MS. of Mendelssohn's, showing the kind of treatment he preferred while following the English practice, see *Musical Times*, 1902, p. 727.] A return was made to the old method by the employment of the piano, first by Mr. Otto Goldschmidt at a performance of Handel's 'L'Allegro' in 1863, and more recently by Sir John Stainer, at St. Paul's, in various oratorios.

Again, this simple kind of recitative is as free now as it was in the first year of the 17th century, from the trammels imposed by the laws of modulation. It is the only kind of music which need not begin and end on the same key. As a matter of fact it usually begins upon some chord not far removed from the tonic harmony of the aria or concerted piece which preceded it; and ends in or near the key of that which is to follow; but its intermediate course is

first example of it seems to be in Landi's 'San Alessio' (1634)], and its advantages in telling situations were so obvious that it was immediately adopted by other composers, and at once recognised as a legitimate form of art—not, indeed, as a substitute for simple recitative, which has always been retained for the ordinary business of the stage, but as a means of producing powerful effects, in scenes, or portions of scenes, in which the introduction of the measured aria would be out of place.

It will be readily understood that the stability of simple recitative was not communicable to the newer style. The steadily increasing weight of the orchestra, accompanied by a correspondent increase of attention to orchestral effects, exercised an irresistible influence over it. Moreover, time has proved it to be no less sensitive to changes of school and style than the aria itself; whence it frequently happens that a composer may be as easily recognised by his accompanied recitatives as by his regularly

constructed movements. Scarlatti's accompaniments exhibit a freedom of thought immeasurably in advance of the age in which he lived. Sebastian Bach's recitatives, though priceless as music, are more remarkable for the beauty of their harmonies than for that spontaneity of expression which is rarely attained by composers unfamiliar with the traditions of the stage. Handel's, on the contrary, though generally based upon the simplest possible harmonic foundation, exhibit a rhetorical perfection of which the most accomplished orator might well feel proud; and we cannot doubt that it is to this high quality, combined with a never-failing truthfulness of feeling, that so many of them owe their deathless reputation—to the unfair exclusion of many others, of equal worth, which still lie hidden among the unclaimed treasures of his long-forgotten operas. Scarcely less successful, in his own peculiar style, was Haydn, whose 'Creation' and 'Seasons' owe half their charm to their pictorial recitatives. Mozart was so uniformly great, in his declamatory passages, that it is almost impossible to decide upon their comparative merits; though he has certainly never exceeded the perfection of 'Die Weislehre dieser Knaben,' or 'Non tener.' Beethoven attained his highest flights in 'Abscheulicher! wo eilst du hin?' and 'Ah, perfido!'; Spohr, in 'Faust,' and 'Die letzten Dinge'; Weber, in 'Der Freischütz.' The works of Cimarosa, Rossini, and Cherubini abound in examples of accompanied recitative, which rival their airs in beauty; and it would be difficult to point out any really great composer who has failed to appreciate the value of the happy invention.

Yet even this invention failed either to meet the needs of the dramatic composer or to exhaust his ingenuity. It was reserved for Gluck to strike out yet another form of recitative, destined to furnish a more powerful engine for the production of a certain class of effects than any that had preceded it. He it was who first conceived the idea of rendering the orchestra and the singer to all outward appearance entirely independent of each other; of filling the scene, so to speak, with a finished orchestral groundwork, complete in itself, and needing no vocal melody to enhance its interest, while the singer declaimed his part in tones which, however artfully combined with the instrumental harmony, appeared to have no connection with it whatever; the resulting effect resembling that which would be produced, if, during the interpretation of a symphony, some accomplished singer were to soliloquise aloud in broken sentences, in such wise as neither to take an ostensible share in the performance nor to disturb it by the introduction of irrelevant discord. An early instance of this may be found in 'Orfeo.' After the disappearance of Euridice, the orchestra plays an excited crescendo, quite complete in itself, during the

course of which Orfeo distractedly calls his lost bride by name, in tones which harmonise with the symphony, yet have not the least appearance of belonging to it. In 'Iphigénie en Tauride,' and all the later operas, the same device is constantly adopted; and modern composers have also used it freely—notably Spohr, who opens his 'Faust' with a scene, in which a band behind the stage plays the most delightful of minuets, while Faust and Mephistopheles sing an ordinary recitative, accompanied by the usual chords played by the regular orchestra in front.

By a process of natural, if not inevitable development, this new style led to another, in which the recitative, though still distinct from the accompaniment, assumed a more measured tone, less melodious than that of the air, yet more so, by far, than that used for ordinary declamation. Gluck has used this peculiar kind of *Mezzo Recitativo* with indescribable power, in the prison scene, in 'Iphigénie en Tauride.' Spohr employs it freely, almost to the exclusion of symmetrical melody, in 'Die letzten Dinge.' Wagner makes it his *cheval de bataille*, introducing it everywhere, and using it as an ever-ready medium for the production of some of his most powerful dramatic effects. His theories on this subject have already been discussed so fully that it is unnecessary to revert to them here. Suffice it to say that his *Melos*, though generally possessing all the more prominent characteristics of pure recitative, sometimes approaches so nearly to the rhythmic symmetry of the song, that—as in the case of 'Nun sei bedankt, mein lieber Schwan!'—it is difficult to say, positively, to which class it belongs. We may, therefore, fairly accept this as the last link in the chain which fills up the long gap between simple 'Recitativo secco' and the finished aria. [The free declamation, built on the natural inflexions of the speaking voice, which is employed for the vocal part of Debussy's 'Pelléas et Mélisande,' though not styled 'recitative,' has much in common with it.]

W. S. R.

RECITING-NOTE (Lat. *Repercussio*, *Nota dominans*). A name sometimes given to that important note, in a Gregorian Tone, on which the greater portion of every verse of a psalm or Canticle is continuously recited; and it is commonly used of the corresponding note in Anglican chant.

As this particular note invariably corresponds with the Dominant of the Mode in which the Psalm-Tone is written, the terms, Dominant, and Reciting-Note, are frequently treated as interchangeable. [See MODES and PSALMODY.]

The Reciting-Note makes its appearance twice in the course of every tone; first, as the initial member of the Intonation, and afterwards as that of the Ending; the only exception to the general rule is to be found in the

Tonus Peregrinus (or Irregularis), in which the true Dominant of the Ninth Mode (E) is used for the first Reciting-Note, and D for the second.

The Reciting-Notes of Tones III, V, VII, VIII, and IX, are so high that they cannot be sung, at their true pitch, without severely straining the voice; in practice, therefore, these tones are almost always transposed. An attempt has been sometimes made so to arrange their respective pitches as to let one note—generally A—serve for all. This plan may, perhaps, be found practically convenient; but it shows very little concern for the expression of the words, which cannot but suffer, if the jubilant phrases of one Psalm are to be recited on exactly the same note as the almost despairing accents of another.

W. S. R.

RECORDER. A name given in England to a kind of flute, now discarded, but once very popular in Western Europe. The verb 'to record' was formerly in common use in the sense of to warble or sing as a bird, e.g., 'Hark! hark! oh, sweet, sweet! How the birds record too' (Beaumont and Fletcher). A recorder, then, is a warbler, than which a more appropriate appellation for the instrument, looking to its sweetness and facility for trilling, it would be hard to find. When the word sprang up is uncertain. There is reason for believing that it was in use in the 14th century; it is indisputable that in the 15th it was known from Cornwall to Scotland; for in a miracle-play in the Cornish language, the manuscript of which is of that date, we have 'recordys ha symphony' (recorders and symphony), and in the Scottish work entitled the *Buke of the Howlate maid be Holland* (c. 1450), 'The rote, and the recordour, the ribup, the rist.'

The recorder belonged to the fipple flute family (see FIPPLE FLUTE), of which the flageolet is a familiar example. It was distinguished from the other members of the family by the number and position of its finger-holes. Their number was eight. The highest, which was closed with one of the thumbs, was pierced at the back, the lowest, played with a little finger, at the side, of the tube. The remaining six were placed in the front of the instrument. In early recorders, which were made in one piece, the lowest hole was duplicated for the accommodation of left-handed players; there were thus two holes for the little finger, but one of them was kept stopped with wax. The duplication of the hole explains a paradox. Although the recorder was an eight-holed instrument, it was called in France (in addition to *la flûte douce* and *la flûte d'Angleterre*) *la flûte à neuf trous*, or the nine-holed flute. The largest contrabass recorders were pierced with three holes below the eight. They were covered with keys, the two lowest of which were closed in some instruments by the otherwise unemployed thumb, in others by the feet, of the

player. An existing contrabass measures 8 feet 8 inches; its lowest note is D below the bass stave.

Instruments of different families were formerly kept apart, each family forming a consort, or band, of its own. The basis of the consort was the quartet—the discant, the alto, the tenor, and the bass. But the consort was not confined to the quartet; thus Virdung, referring to recorders, writes: 'Generally, one makes four flutes in one case, or six; this is called a set, two discant, two tenor, and two bass.' The circumstance that each set was kept in a separate case, enables us to say how many recorders were played together. In the time of Henry VIII. the number rose to seven, eight, and nine, as the inventory of that monarch's recorders shows. When Praetorius wrote twenty-one were required to form a full flute consort. Dr. Burney saw a set at Antwerp comprising no less than thirty or forty, the case for which, when filled, was so heavy that eight men were required to raise it from the ground. By the middle of the 18th century the number had dwindled in France to five, and in a very late set, now in the Grosvenor Museum at Chester, it is reduced

Discant. Alto. Tenor. Bass.
THE CHESTER FLUTES.

to four. The date of this set is unknown, but they are marked with the name of Bressan, a maker of whose flutes Sir John Hawkins speaks in a way which shows that they were in common use in his time (1719-89); in 1724 Mr. Bressan, by whom presumably the Chester set was made, was carrying on business at the Green Door in Somerset House Yard, in the Strand.

The tone of the recorder was remarkable for two characteristics, solemnity and sweetness.

Bacon twice alludes to its solemnity; Milton speaks of its 'solemn touches,' and under the name of 'the solemn pipe,' mentions it as one of the instruments played on a great occasion in Heaven. Its sweetness was ineffable. Referring to the effect of recorders used at a theatre to represent a choir of angels, Pepys writes: 'But that which did please me beyond anything in the whole world was the wind-musique when the angel comes down, which is so sweet that it ravished me, and indeed, in a word, did wrap up my soul so that it made me really sick, just as I have formerly been when in love with my wife; that neither then, nor all the evening going home, and at home, I was able to think of anything, but remained all night transported, so as I could not believe that ever any musick hath that real command over the soul of a man as this did upon me: and makes me resolve to practice wind-musique, and to make my wife do the like.' Some weeks afterwards he buys a recorder, 'which,' he says, 'I do intend to learn to play on, the sound of it being of all sounds in the world, most pleasing to me.'

The 'command' which recorders had 'over the soul of a man,' and their

—power to mitigate and 'swage

With solemn touches troubled thoughts, and chase
Anguish, and doubt, and fear, and sorrow, and pain
From mortal or immortal minds—

may serve to explain why Hamlet, in the frenzied state to which he had been wrought by the spectacle of the murder of his father played before his guilty uncle, should bethink him of the calming influence of a consort of these instruments. 'Come,' he cries, 'some music; come, the recorders.' If Shakespeare's design were carried out, instead of the two musicians we generally see furnished with little pipes not unlike penny whistles, there would come upon the stage in the recorder scene at least four recorder players carrying instruments varying in length from nearly two to nearly four feet. It is needless to say that even the discant is far too stout to be snapped like a twig, so that the act of violence sometimes seen, the breaking to pieces of the recorder borrowed of the player, would be as impracticable as it is foreign to the true spirit of the scene, and out of keeping with the nature of the gentle Hamlet.

With the advance of the orchestra the consorts of wind instruments broke up and disappeared, only such members of each family being retained as were most suitable for the new combination. The member of the recorder family which survived had a compass of two octaves, from *f*' to *f*''', fingerings up to *a*''' being sometimes given. About the end of the 17th century the instrument ceased to be called the recorder, retaining only the appellation of flute, and descending after a time to that of the Common flute. In France it came to be styled

the *flûte à bec*. The change of name led to a strange chapter in the history of music—a chapter which should be a warning to those who attempt to reconstruct extinct instruments out of preconceived ideas of what they might, or must, have been. For more than a hundred years the recorder was enshrouded in mystery. It was asked, What was a recorder? Sir John Hawkins put forward the notion that it was a flageolet, and persuaded himself that Lord Bacon had spoken of the recorder as having six holes, the number of those of the flageolet. Burney, writing thirteen years after Sir John, stated authoritatively that a recorder was a flageolet, thereby revealing the secret that he had availed himself of his rival's labours without acknowledging his obligation. Next came Mr. William Chappell, who brought himself to the belief that he had discovered in a book of instructions for the recorder the statement that the instrument was pierced with a hole called the recorder. He fancied that the recorder took its name from the hole, and drawing further on his imagination, supposed the hole to be covered with a piece of thin skin. Finally, Carl Engel acquired a Common flute (it is now in the South Kensington Museum) in which there was a hole covered with membrane. He pronounced this flute to be a recorder of the 17th century, and explained that the hole thus covered was intended to make the sound reedy and tender; whereas an examination of the instrument would have shown him that his recorder of the 17th century was made in New Bond Street between 1800 and 1812, and that the hole covered with membrane was so placed that it was impossible for it to affect the tone.

The claim of the recorder to be considered the head of instruments of the flute kind was destined to be called in question. Its supremacy was challenged by the transverse flute, an instrument called by the French the German flute, to distinguish it from the recorder, which they termed the English flute. In lip flutes, to which family the German flute belongs, the channel from which the jet of air issues (see FLUTE) is formed by the lips. The control exercised by the lips over the shape of the jet and the size of the opening of the mouth-hole of the flute enables the player to influence the intonation and the quality of the tone, advantages (not to mention greater power) more than sufficient to compensate for inferiority in sweetness and dignity. In Handel's orchestra the German and the Common flute existed side by side, a circumstance which enabled Handel to express niceties of flute *timbre* to which we are strangers. Thus in 'Judas Maccabæus' he was able to avail himself of the martial strains of two German flutes for 'See the Conquering Hero comes,' but to assign the cajolery of 'Wise men flattering may deceive you' to the cooing blandishments of two Common flutes. We can

always tell which flute he intends to be used, for he terms the Common flute *Flauto*; the German flute *Traversa*, *Traverso*, *Traversière*, *Traversiera*; sometimes, but rarely, *Flauto Traverso*. Scarcely ever does he leave open which flute is to be employed; there is, however, in 'Parnasso in Festa,' a passage marked *Flauto ou Trav. I.*, *Flauto ou Trav. II.* Handel's orchestra is known to have contained four hautboys and four bassoons; his flutes, as will be shown, were still more numerous. He once uses *una traversa bassa*. When he wrote *traversieri tutti*, he no doubt expected not short of four treble transverse flutes to respond. It seems certain that he had at his command as many Common flutes; for the fourth scene of the first act of 'Giustino' opens with a passage in which not less than four *Flauti* and a *Basso de' Flauti* play together. We are not bound to suppose that Handel had in his pay ten musicians who devoted themselves exclusively to the flute; performers on other instruments, especially the hautboy, were expected to take the flute when required.

Handel could call for not only five but six fipple flutes, his *ottavino* being a *flauto piccolo*, or octave Common flute, not a transverse instrument. This does not seem to be even suspected, yet the evidence is quite conclusive. Here one proof must suffice. The accompaniment to 'Angelletti che cantate' (the air in 'Rinaldo,' on the singing of which birds were let loose) is marked in the conducting score *flauto piccolo*, but in the autograph copy in Buckingham Palace Handel has written 'Flageolet.' Now Handel would never have called a transverse piccolo a flageolet. The usual description of this accompaniment, that it is scored for two flutes and a piccolo, gives to the modern reader a false impression, neither the flutes nor the piccolo being the instruments we now call by those names. It is a trio for three fipple flutes, a *flauto piccolo* and two *flauti*; the *flauto piccolo* playing a brilliant solo which the *flauti* support. The accompaniment has been pronounced by a musician to be the 'loveliest imaginable'; the scoffing Addison writes of it, 'The musick proceeded from a concert of flagelets and bird-calls which were planted behind the scenes.' Handel uses the *flauto piccolo* in a Tamburino in 'Alcina,' and in two movements of the Water Music. In the latter two piccolos which play in unison are employed. They are not in the same key as the orchestral piccolo, but, like it, they were fipple flutes. Thrice the *flauto piccolo* furnishes a florid accompaniment to the soprano voice; in 'Angelletti che cantate,' just mentioned, in a song in 'Riccardo,' and in 'Hush, ye pretty warbling choir,' in 'Acis and Galatea.' The *obbligato* in the last-named work to the bass solo, 'O ruddier than the cherry,' is marked in the score *flauto*, but seems to have been always assigned to the *flauto piccolo*. As late as

the third decade of the 19th century, long after that instrument had been banished from the orchestra, the second hautboy player used to play the part on a so-called flageolet at the Antient Concerts. As the society was established in 1776, only seventeen years after Handel's death, it is reasonable to suppose that the practice was handed down from the time of the great composer.

When the orchestra was remodelled by Haydn only the transverse flute was retained, the Common flute being altogether rejected. The German flute having thus captured its rival's place, proceeded to usurp its title of *Flauto*, and to drop its old name, *Traversa*. Its superiority for orchestral purposes was already so marked as to cause Haydn's choice to fall upon it; but during Haydn's career as a composer it received an improvement which gave the *coup de grâce* to the old favourite. The improvement consisted in boring new holes in the tube and covering them with keys kept closed by springs. To make clear the importance of this step it is necessary to explain that in the one-keyed flute, which was then in use, there were no holes for four of the notes of the chromatic octave. When the player was in want of either of them, he muffled, and to some extent flattened, the note above the accidental needed by closing one or more holes below the hole from which the note to be flattened issued. Although the spurious notes thus obtained were so impure, feeble, and out of tune as to make the flute and those who played it bywords amongst musicians, the one-keyed flute held its ground for a period of not far short of a century. Remonstrances on the subject of its imperfections were put to silence by the *dictum* that the flute, like the violin, was perfect; the player, it was asserted, not the instrument, was at fault. At length a stand was made against authority. The rebellion broke out in England, where two professional players named Tacet and Florio had the courage to adopt a flute with no less than six keys. Their example was quickly followed. Between 1770 and 1780 the six-keyed flute came into use in this country, and by degrees, in spite of opposition, the keys were introduced abroad.

The advantages conferred on the transverse flute by the completion of the chromatic octave were so immense that it is inconceivable that the makers of the time should not have thought of applying the system to the Common flute. Why the idea was not carried out is unknown, but it may be conjectured that mechanical difficulties stood in the way. Of the ten digits with which the hands of man are furnished but nine are available for execution, the tenth being required for holding the flute. As the Common flute was pierced with eight holes, only one finger was free when they were all closed. Possibly, then, the makers may have

been unable to contrive a method of acting on the five keys required for the chromatic octave, being baffled by the want of fingers for the purpose; but whatever was the cause, closed keys did not find their way to the Common flute, and so the instrument after a time fell completely into disuse. (See *Proceedings of the Musical Association*, 1897-98, pp. 145-224; 1900-1, pp. 110-120; and 1901-2, pp. 105-137.) The above is epitomised from the writer's *Lectures on the Recorder*, to be published shortly. c. w.

RECTE ET RETRO, PER (*Imitatio cancrizans, Imitatio per Motum retrogradum, Imitatio recurrens*; Ital. *Imitazione al Rovescio, o alla Rivversa*; Eng. *Retrograde Imitation*). A peculiar kind of Imitation, so constructed that the melody may be sung backwards as well as forwards; as shown in the following two-part canon, which must be sung, by the first voice, from left to right, and by the second, from right to left, both beginning together, but at opposite ends of the music.

The earliest known instances of Retrograde Imitation are to be found among the works of the Flemish composers of the 15th century, who delighted in exercising their ingenuity, not only upon the device itself, but also upon the Inscriptions prefixed to the canons in which it was employed. The Netherlands were not, however, the only musicians who indulged successfully in this learned species of recreation. Probably the most astonishing example of it on record is the motet,¹ 'Diliges Dominum,' written by William Byrd for four voices—Treble, Alto, Tenor, and Bass—and transmuted into an eight-part composition, by adding a second Treble, Alto, Tenor, and Bass, formed by singing the four first parts backwards. It is scarcely possible to study this complication attentively, without feeling one's brain turn giddy; yet, strange to say, the effect produced is less curious than beautiful.

There is little doubt that the idea of singing music from right to left was first suggested by those strange Oracular Verses² which may be read either backwards or forwards, without injury to words or metre; such as the well-known Pentameter—

Roma tibi subito motibus ibit amor.

¹ Reprinted by Hawkins, *History*, ch. 96.

² Versus recurrentes, said to have been first invented by the Greek Poet, Sotades, during the reign of Ptolemy Philadelphus. The examples we have quoted are, however, of much later date; the oldest of them being certainly not earlier than the 7th century.

or the cry of the Evil Spirits—

In girum imus noctu ecce ut consumimur igni.

The canons were frequently constructed in exact accordance with the method observed in these curious lines; and innumerable quaint conceits were invented, for the purpose of giving the singers some intimation of the manner in which they were to be read. 'Canit more Hebraeorum' was a very common motto. 'Misericordia et veritas obviaverunt sibi' indicated that the singers were to begin at opposite ends, and meet in the middle. In the second 'Agnus Dei' of his 'Missa Graecorum,' Hobrecht wrote, 'Aries vertatur in Pisces'—Aries being the first sign of the Zodiac, and Pisces the last. In another part of the same Mass he has given a far more mysterious direction—

Tu tenor cancriza et per antifrasin canta,
Cum furcis in capite antifrasizando repete.

This introduces us to a new complication; the secret of the motto being, that the tenor is not only to sing backwards, but to invert the intervals ('per antifrasin canta'), until he reaches the 'Horns'—that is to say, the two cusps of the semicircular Time-Signature—after which he is to sing from left to right, though still continuing to invert the intervals. This new device, in which the intervals themselves are reversed, as well as the sequence of the notes, is called 'Retrograde Inverse Imitation' (Lat. *Imitatio cancrizans motu contrario*; Ital. *Imitazione al contrario riverso*). It might have been thought that this would have contented even Flemish ingenuity. But it did not. The part-books had not yet been turned upside down! In the subjoined example we have endeavoured to show, in an humble way, the manner in which this most desirable feat may also be accomplished. The two singers, standing face to face, hold the book between them; one looking at it from the ordinary point of view, the other, upside down, and both reading from left to right—that is to say, beginning at opposite ends. The result, if not strikingly beautiful, is, at least, not inconsistent with the laws of counterpoint. (For other examples see INSCRIPTION.)

Retrograde Imitation has survived, even to our own day; and in more than one very popular form. In the year 1791 Haydn wrote for his Doctor's degree, at the University of Oxford, a 'Canon cancrizans, a tre' ('Thy Voice, O Harmony'), which will be found in vol. ii. p. 357, and he has also used the same device in the minuet of one of his symphonies. Some other modern composers have tried it, with less happy effect. But perhaps it has never yet appeared in a more popular form than

that of the well-known Double Chant by Dr. Crotch.

It would be difficult to point to two schools more bitterly opposed to each other than those of the early Netherlands, and the English Cathedral writers of the 19th century. Yet here we see an artifice, invented by the former, and used by one of the latter, so completely *con amore*, that, backed by the harmonies peculiar to the modern 'free style,' it has attained a position quite unassailable, and will probably last as long as the Anglican Chant itself shall continue in use. [Sir John Stainer wrote a hymn-tune 'Per Recte et Retro' in 1898 for the Church Hymnary (No. 381); it is also No. 81 of Novello's edition of the composer's hymns. It reads backwards in all the parts.] With these things before us, we shall do well to pause, before we consign even the most glaring pedantries of our forefathers to oblivion. W. S. R.

REDEKER, LOUISE DORÉTE AUGUSTE, a contralto singer, who made her first appearance in London at the Philharmonic Concert of June 19, 1876, and remained a great favourite until she retired from public life on her marriage with Dr. (now Sir) Felix Semon, Oct. 19, 1879. She was born at Duingen, Hanover, Jan. 19, 1853, and from 1870 to 1873 studied in the Conservatorium at Leipzig, chiefly under Konewka. She sang first in public at Bremen in 1873. In 1874 she made the first of several appearances at the Gewandhaus, and was much in request for concerts and oratorios in Germany and other countries during 1874 and 1875. In England she sang at all the principal concerts, and at the same time maintained her connection with the Continent, where she was always well received. Her voice is rich and sympathetic; she sings without effort and with great taste. G.

REDEMPTION, THE. A Sacred Trilogv, written and composed by Charles Gounod. First performed at the Birmingham Festival, August 30, 1882, under the composer's direction. M.

REDFORD, JOHN, was organist and almoner, and master of the Chorists of St. Paul's Cathedral in the latter part of the reign of Henry VIII. (1491-1547). Tusser, the author of the *Hundred good Points of Husbandrie*, was one of his pupils. An anthem, 'Rejoice in the Lord alway,' printed in the appendix to Hawkins's *History* and in the Motett Society's first volume, is remarkable for its melody and expression. Some anthems and organ pieces by him are in the MS. volume collected by Thomas Mulliner, master of St. Paul's School, afterwards in the libraries of John Stafford Smith and Dr. Rimbault, and now in the

British Museum. A motet, some fancies, and a voluntary by him are in MS. at Christ Church, Oxford. [See also the *Monatshefte* for 1902, for list of other works by him.] His name is included by Morley in the list of those whose works he consulted for his 'Introduction.' W. H. H.

REDHEAD, RICHARD, born March 1, 1820, at Harrow, was a chorister at Magdalen College, Oxford, 1829-36, having received his musical education there from Walter Vicary, the organist. He was organist at Old Margaret Chapel (now All Saints' Church), Margaret Street, in 1839-1864, and from the latter date at St. Mary Magdalene, Paddington, a post he held till his death at Hellingly, Sussex, April 27, 1901. His works are almost exclusively written or compiled for use in the Church of England service, viz. 'Church Music,' etc., 1840, 'Laudes Diurnae, the Psalter and Canticles in the Morning and Evening Service,' 1843, Music for the Office of the Holy Communion, 1853; 'O my people,' anthem for Good Friday; 'Church Melodies, a collection of short pieces and Six Sacred Songs,' 1858; 'The Celebrant's Office Book,' 1863; 'Ancient Hymn Melodies, Book of Common Prayer with Ritual music, Canticles at Matins and Evensong, pointed as they are to be sung in churches and adapted to the Ancient Psalm Chants, and Parish Tune Book and Appendix,' 1865; 'The Universal Organist, a Collection of Short Classical and Modern Pieces,' 1866-81; 'Litany with latter part of Communion Service, Music to the Divine Liturgy during the Gradual, Offertorium and Communion, arranged for use throughout the year,' 1874; Festival Hymns for All Saints and St. Mary Magdalene Days, Hymns for Holy Seasons, Anthems, etc. A. C.

REDOUTE. Public assemblies at which the guests appeared with or without masks at pleasure. The word is French, and is explained by Voltaire and Littré as being derived from the Italian *ridotto*—perhaps with some analogy to the word 'resort.' They soon made their way to Germany and England. They are frequently mentioned by Horace Walpole under the name 'Ridotto,' and were one of the attractions at Vauxhall and Ranelagh in the middle of the 18th century. In Germany and France the French version of the name was adopted. The building used for the purpose in Vienna, erected in 1748, and rebuilt in stone in 1754, forms part of the Burg or Imperial Palace, the side of the oblong facing the Josephs-Platz. There was a *grosse* and a *kleine* Redoutensaal. In the latter Beethoven played a concerto of his own at a concert of Haydn's, Dec. 18, 1795. The rooms were used for concerts till about 1870. The masked balls were held there during the Carnival, from Twelfth Night to Shrove Tuesday, and occasionally in the weeks preceding Advent; some being public, i.e. open to all on payment of an entrance fee,

and others private. Special nights were reserved for the court and the nobility. The 'Redoutentänze'—Minuets, Allemandes, Contredances, Schottisches, Anglaises, and Ländler—were composed for full orchestra, and published (mostly by Artaria) for pianoforte. Mozart,¹ Haydn, Beethoven,² Hummel, Woelfl, Gyrowetz, and others, have left dances written for this purpose.

C. F. P.

REDOWA, a Bohemian dance which was introduced into Paris in 1846 or 1847, and quickly attained for a short time great popularity, both there and in London, although it is now never danced. In Bohemia there are two variations of the dance, the Rejdovák, in 3-4 or 3-8 time, which is more like a waltz, and the Rejdovacka, in 2-4 time, which is something like a polka. The ordinary Redowa is written in 3-4 time (M.M. ♩=160). The dance is something like a Mazurka, with the rhythm less strongly marked. The following example is part of a Rejdovák which is given in Köhler's 'Volkstänze aller Nationen'—

W. B. S.

REED (Fr. *Anche*; Ital. *Ancia*; Germ. *Blatt*, *Rohr*). The speaking part of many instruments, both ancient and modern; the name being derived from the material of which it has been immemorially constructed. The plant used for it is a tall grass or reed, the *Arundo Donax* or *Sativa*, growing in the South of Europe. The substance in its rough state is commonly called 'cane,' though differing from real cane in many respects. The chief supply is now obtained from Fréjus on the Mediterranean coast. Many other materials, such as lance-wood, ivory, silver, and 'ebonite,' or hardened india-rubber, have been experimentally substituted for the material first named; but hitherto without success. Organ reeds were formerly made of hard wood, more recently of brass, German silver, and steel. The name Reed is, however, applied by organ-builders to the metal tube or channel against which the vibrating tongue beats, rather than to the vibrator itself.

Reeds are divided into the Free and the Beating; the latter again into the Single and the Double forms. The Free reed is used in

the harmonium and concertina, its union with Beating reeds in the organ not having proved successful. [See FREE REED, vol. ii. p. 106.] The vibrator, as its name implies, passes freely through the long slotted brass plate to which it is adapted; the first impulse of the wind tending to push it within the slot and thus close the aperture. In 'percussion' harmoniums the vibrator is set suddenly in motion by a blow from a hammer connected with the keyboard. [See HARMONIUM, vol. ii. p. 303.] [The Beating reed in its single form is that of the organ and the clarinet. In this the edges of the vibrator overlap the slot leading into the resonating pipe or tube, and so close it periodically during vibration. The reed, which is a thin blade or lamina, has roughly the form of a long parallelogram, and it is firmly secured for a portion of its length to the bed or table of the tube or mouthpiece in which the slot is cut. In the organ reed the necessary opening for the entrance of the wind at the free end is obtained by giving a slight curvature to the blade or reed; the pressure of the wind tends to close this opening, and vibration is thus set up. In the clarinet the same result is obtained by giving a slight curvature to the bed of the mouthpiece towards its tip, the under side of the reed itself being left perfectly flat (see CLARINET).]

The Double reed, as used in the oboe and the bassoon, is constructed of two segments united in a tubular form at one end, and splayed out and flattened at the other so as to leave a slight opening in shape like the section of a double-convex lens. The bassoon reed is placed directly upon the 'crook' of the instrument, but the oboe reed is built up upon a small tube or 'staple.' The exact appearance of both single and double reeds will be gathered better from the drawings than from a more detailed description.

Single Reed :—1. Clarinet reed, as held to the mouthpiece by a metal fixture. Double Reeds :—2. Bassoon reed. 3. Bassoon reed, foreshortened to show the opening between the two blades. 4. Oboe reed.

The single reed is used also on the saxophone, and the double reed for the chaunter of the Highland bagpipe, but the drones of the bag-

¹ See Köhler's Catalogue, No. 598, etc.

² See Nottebohm's Thematic Catalogue, Section II. pages 135-37.

pipe are sounded by single reeds of a most rudimentary character. It is possible to replace the double reed of the oboe and bassoon by a single reed of the clarinet type fitted to a small mouthpiece. The old *dolcino* or *alto-fagotto* was so played in the band of the Coldstream Guards by the late Mr. Henry Lazarus when a boy. The idea has been revived of late years as a novelty, but neither the oboe nor the bassoon is capable of improvement in this way, although the saxophone, also a conical tube, is well adapted to the single reed, being an instrument of wider calibre.] W. H. S.; with additions by D. J. B.

REED, THOMAS GERMAN, born at Bristol, June 27, 1817. His father was a musician, and the son first appeared, at the age of ten, at the Bath Concerts as a PF. player with John Loder and Lindley, and also sang at the Concerts and at the Bath Theatre. Shortly after, he appeared at the Haymarket Theatre, London, where his father was conductor, as PF. player, singer, and actor of juvenile parts. In 1832 the family moved to London, and the father became leader of the band at the Garrick Theatre. His son was his deputy, and also organist to the Catholic Chapel, Sloane Street. German Reed now entered eagerly into the musical life of London, was an early member of the Society of British Musicians, studied hard at harmony, counterpoint, and PF. playing, composed much, gave many lessons, and took part in all the good music he met with. His work at the theatre consisted in great measure of scoring and adapting, and getting up new operas, such as 'Fra Diavolo' in 1837. In 1838 he became Musical Director of the Haymarket Theatre, a post which he retained till 1851. In 1838 he also succeeded Mr. Tom Cooke as Chapel-master at the Royal Bavarian Chapel, where the music to the Mass was for long noted both for quality and execution. Beethoven's Mass in C was produced there for the first time in England, and the principal Italian singers habitually took part in the Sunday services. At the Haymarket, for the Shakespearean performances of Macready, the Keans, the Cushmanes, etc., he made many excellent innovations, by introducing, as overtures and entr'actes, good pieces, original or scored by himself, instead of the rubbish usually played at that date. During the temporary closing of the theatre, Reed did the work of producing Pacini's opera of 'Sappho' at Drury Lane (April 1, 1843—Clara Novello, Sims Reeves, etc.). In 1844 he married Miss Priscilla Horton, and for the next few years pursued the same busy, useful, miscellaneous life as before, directing the production of English opera at the Surrey, managing Sadler's Wells during a season of English opera, with his wife, Miss Louisa Pyne, Harrison, etc., con-

ducting the music at the Olympic under Mr. Wigan's management, and making prolonged provincial tours.

In 1855 he started a new class of performance which, under the name of 'Mr. and Mrs. German Reed's Entertainment,' made his name widely and favourably known in England. Its object was to provide good dramatic amusement for a large class of society who, on various grounds, objected to the theatres. It was opened at St. Martin's Hall, April 2, 1855, as 'Miss P. Horton's Illustrative Gatherings,' with two pieces called 'Holly Lodge' and 'The Enraged Musician' (after Hogarth), written by W. Brough, and presented by Mrs. Reed, with the aid of her husband only, as accompanist and occasional actor. In Feb. 1856 they removed to the Gallery of Illustration, Regent Street, and there produced 'A Month from Home,' and 'My Unfinished Opera' (April 27, 1857); 'The Home Circuit' and 'Seaside Studies' (June 20, 1859)—all by W. Brough; 'After the Ball,' by Edmund Yates; 'Our Card Basket,' by Shirley Brooks; 'An Illustration on Discord' ('The Rival Composers'), by Brough (April 3, 1861); and 'The Family Legend,' by Tom Taylor (March 31, 1862). They then engaged Mr. John Parry, and produced the following series of pieces specially written for this company of three, and including some of Mr. Parry's most popular and admirable songs in the characters of Paterfamilias at the Pantomime, Mrs. Roseleaf, etc. etc. :—

'The Charming Cottage.' April 6, 1863.
'The Pyramid.' Shirley Brooks. Feb. 7, 1864.
'The Bard and his Birthday.' W. Brough. April 20, 1864.
'The Peculiar Family.' Do. March 15, 1865.
'The Yachting Cruise.' F. C. Burnand. April 2, 1866.

'A Dream in Venice.' T. W. Robertson. March 18, 1867.
'Our Quiet Chateau.' R. Reece. Dec. 26, 1867.
'Inquire within.' F. C. Burnand. July 22, 1868.
'Last of the Paladins.' R. Reece. Dec. 23, 1868.

At this period the company was further increased by the addition of Miss Fanny Holland and Mr. Arthur Cecil, and soon after by Mr. Corney Grain and Mr. Alfred Reed. The following was the repertory during this last period :—

'Lischen and Fritschen.' Offenbach. Feb. 8, 1869.
'No Cards.' W. S. Gilbert, and 'Cox and Box.' Burnand and Sullivan. March 29, 1869. (A. Cecil's first appearance.)
'Ages Ago.' W. S. Gilbert and F. Clay. Nov. 23, 1869.
'Beggars my Neighbour.' F. C. Burnand. March 28, 1870.
'Our Island Home.' W. S. Gilbert. June 20, 1870.
'The Bold Recruit.' F. Clay. July 19, 1870.
'A Sensation Novel.' Do. Jan. 30, 1871.

'Near Relations.' Arthur Sketchley. August 14, 1871.
'King Christmas.' Planché. Dec. 26, 1871.
'Charity begins at Home.' B. Rowe and Cellier. Feb. 7, 1872.
'My Aunt's Secret.' Burnand and Molloy. March 3, 1872.
'Happy Arcadia.' W. S. Gilbert and F. Clay. Oct. 28, 1872.
'Very Catching.' Burnand and Molloy. Nov. 18, 1872.
'Mildred's Well.' Burnand and German Reed. May 5, 1873.

During this period a diversion was made by the introduction of 'Opere di Camera,' for four characters. These comprised :—

'Jessy Lea.' Oxenford and Macfarren.
'Too Many Cooks.' Offenbach.
'The Sleeping Beauty.' Balfe.
'The Soldier's Legacy.' Oxenford and Macfarren.

'Widows bewitched.' Virginia Gabriel.
'A Pair Exchange.' 'A Happy Result'; 'Ching Chow Hi.' All three by Offenbach.

While the entertainment still remained at the Gallery of Illustration, Reed became lessee of St. George's Hall for the production of Comic Opera. He engaged an orchestra of forty and a strong chorus, and 'The Contrabandista' (Burnand and Sullivan), 'L'Ambassadrice' (Auber), and the 'Beggars' Opera' were produced, but without the necessary success. Mr. Reed then gave his sole attention to the Gallery of Illustration, in which he was uniformly successful, owing to the fact that he carried out his entertainments, not only with perfect respectability, but always with great talent, much tact and judgment, and constant variety.

When the lease of the Gallery of Illustration expired, the entertainment was transferred to St. George's Hall, and there the following entertainments were produced:—

'He's Coming.' F. C. Burnand and German Reed.
'Too Many by One.' F. C. Burnand and F. Cowan.
'The Three Tenants'; 'Ancient Britons.' Gilbert A'Beckett and German Reed.
'A Tale of Old China.' F. C. Burnand and Molloy.
'Eyes and no Eyes.' W. S. Gilbert and German Reed.
'A Spanish Bond'; 'An Indian Puzzle'; 'The Wicked Duke.'

Gilbert A'Beckett and German Reed.
'Matched and Match.' F. C. Burnand and German Reed.
'A Puff of Smoke.' C. J. Rowe and Mme. Goetz.
'Our Dolls' House.' C. J. Rowe and Correda Dick.
'A Night's Surprise.' West Cromer and German Reed.
'Foster Brothers.' F. C. Burnand and King Hall.
'Happy Bungalow.' A. Law.

The following were produced under the management of Mr. Corney Grain and Mr. Alfred Reed:—

'No. 204.' F. C. Burnand and German Reed.
'Ooze in a Century.' G. A'Beckett and Vivian Bligh.
'Our New Dolls' House.' W. W. Yardley and Cotford Dick.
'Answer Paid.' F. C. Burnand and W. Austin.
'Doubleday's Will.' Burnand and King Hall.
'Artful Automaton.' Arthur Law and King Hall.
'A Tremendous Mystery.' F. C. Burnand and King Hall.
'Enchantment.' A. Law and German Reed.
'Orimstone Grange.' G. A'Beckett and King Hall.
'£100 Reward.' A. Law and Corney Grain.
'Back from India.' Pottinger Stevens and Cotford Dick.
'The Pirate's Home.' G. A'Beckett and Vivian Bligh.
'A Christmas Stocking.' G. A'Beckett and King Hall.
'Castle Botherem.' A. Law and Hamilton Clarke.
'The Three Hats.' A. A'Beckett and Edouard Mariots.
'A Flying Visit.' A. Law and Corney Grain.
'The Turquoise Ring.' G. W. Godfrey and Lionel Benson.
'A Merry Christmas.' A. Law and King Hall.
'Sandford and Merton.' Burnand and A. S. Gatty.
'All at Sea.' A. Law and Corney Grain.
'Many Happy Returns.' G. A'Beckett and Lionel Benson.
'A Bright Idea.' A. Law and Arthur Cecil.
'Cherry Tree Farm.' A. Law and Hamilton Clarke.
'The Head of the Poll.' A. Law and Arthur Cecil.
'Nobody's Fault.' A. Law and Hamilton Clarke.
'A Strange Host.' A. Law and King Hall.
'That Dreadful Boy.' G. A'Beckett and Corney Grain.
'A Mountain Hellfire.' G. A'Beckett and Lionel Benson.
'Treasure Trove.' A. Law and A. J. Caldicott.

'A Water Cure.' A. Law, Arnold Felix, and George Gear.
'A Moss Ross Reek.' A. Law and A. J. Caldicott.
'A Double Event.' A. Law, Alfred Reed, and Corney Grain.
'Fairly Puzzled.' Oliver Brand and Hamilton Clarke.
'A Terrible Fright.' A. Law and Corney Grain.
'Old Knockers.' A. Law and A. J. Caldicott.
'A Peculiar Case.' A. Law and G. Grossmith.
'Hobbies.' Stephens, Yardley, and G. G. Gatty.
'A Pretty Bequest.' M. Watson and Hamilton Clarke.
'A Night in Wales.' H. Gardner and Corney Grain.
'To Cupid's Court.' M. Watson and A. J. Caldicott.
'A United Pair.' Comyns Carr and A. J. Caldicott.
'The Friar.' Do.
'The Naturalist.' Comyns Carr and King Hall.
'Tally-Ho!' M. Watson and A. J. Caldicott.
'Wanted an Heir.' Do.
'The Borsini's.' Somers. W. Browne and A. J. Caldicott.
'Britanny Folk.' Walter Frith and A. J. Caldicott.
'Tuppins and Co.' Malcolm Watson and Edward Solomon.
'The Vagabond.' Walter Frith and King Hall.
'Carival Time.' M. Watson and Corney Grain.
'Poessecoo.' Walter Browne and A. J. Caldicott.
'Kilgerumper.' M. Watson and E. Solomon.
'The Old Bureau.' H. M. Paull and A. J. Caldicott.
'The Barley Mow.' Walter Frith and G. Grain.
'Dae'ia Delight.' Archie Armstrong and J. W. Elliott.
'An Odd Pair.' M. Watson and A. J. Caldicott.
'Feggy's Plot.' Somerville Glynne and Walter Slaughter.
'A Big Bandit.' M. Watson and W. Slaughter.
'Melodramania.' Do.

A. C.

The accompaniments to these pieces were played on a pianoforte and harmonium. For many years the 'Musical Sketches' of Mr. Corney Grain were a principal attraction of the entertainment. German Reed died at Upper East Sheen, Surrey, March 21, 1888, and in 1895 the entertainments came to an end, with the deaths of Alfred German Reed, March 10, and Corney Grain, March 16. An attempt was made to revive the enterprise, but without effect.

Mrs. GERMAN REED, *née* PRISCILLA HORTON, was born at Birmingham, Jan. 1, 1818. From a very early age she showed unmistakable qualifications for a theatrical career, in a fine strong voice, great musical ability, and extraordinary power of mimicry. She made her first appearance at the age of ten, at the Surrey Theatre, under Elliston's management, as the Gipsy Girl in 'Guy Mannering.' After this she was constantly engaged at the principal metropolitan theatres in a very wide range of parts. Her rare combination of great ability as a singer, with conspicuous gifts as an actress, and most attractive appearance, led to a very satisfactory step in her career. On August 16, 1837, she signed an agreement with Macready for his famous performances at Covent Garden and Drury Lane, in which she acted Ariel, Ophelia, the Fool in 'Lear,' the Attendant Spirit in 'Comus,' Philidel in 'King Arthur,' and Acis in 'Acis and Galatea.' After the conclusion of this memorable engagement, Miss Horton became the leading spirit in Planche's graceful burlesques at the Haymarket Theatre. On Jan. 20, 1844, she married Mr. German Reed, and the rest of her career has been related under his name. She died at Bexley Heath, March 18, 1895, a few days after her son and Corney Grain.

G.

REED-STOP. When the pipes of an organ, controlled by a draw-stop, produce their tone by means of a vibrating tongue striking the face of a reed, the stop is called a Reed-stop; when the pipes contain no such reeds, but their tone is produced merely by the impinging of air against a sharp edge, the stop is called a Flue-stop. Any single pipe of the former kind is called a Reed-pipe, any single pipe of the latter kind, a Flue-pipe. Pipes containing Free reeds are seldom used in English organs, but are occasionally found in foreign instruments under the name of Physsharmonika, etc. [See HARMONIUM, REED.] The reed-stops consisting of 'striking-reeds' are voiced in various ways to imitate the sounds of the Oboe, Cor Anglais, Clarinet, Bassoon, Horn, Cornopean, Trumpet, etc., all of which are of 8-ft. pitch (that is, in unison with the diapason). The Clarion 4-ft. is an octave reed-stop. The Double Trumpet 16-ft. is a reed-stop one octave lower in pitch than the diapason; it is also called a Contraposaune, or sometimes a Trombone. Reed-stops

¹ See Macready's *Reminiscences*, by Sir F. Pollock, ii. 97.

of the trumpet class are often placed on a very high pressure of wind under such names as Tuba mirabilis, Tromba major, etc.; such high-pressure reed-stops are generally found on the Solo-manual; the reed-stops of the Great organ being of moderate loudness; those on the Choir organ altogether of a softer character. A very much larger proportion of reed-stops is usually assigned to the Swell organ than to any other manual, owing to the brilliant *crescendo* which they produce as the shutters of the swell-box open. Reed-stops are said to be 'harmonic' when the tubes of the pipes are twice their normal length and perforated half-way with a small hole. Their tone is remarkably pure and brilliant. The best modern organ-builders have made great improvements in the voicing of reed-stops, which are now produced in almost infinite variety both as to quality and strength of tone.

J. S.

REEL (Anglo-Saxon *hreol*, connected with the Suio-Gothic *rulla*, 'to whirl'). An ancient dance, the origin of which is enveloped in much obscurity. The fact of its resemblance to the Norwegian *Halling*, as well as its popularity in Scotland, and its occurrence in Denmark, the north of England, and Ireland, has led most writers to attribute to it a Scandinavian origin, although its rapid movements and lively character are opposed to the oldest Scandinavian dance-rhythms. The probability is that the reel is of Keltic origin, perhaps indigenous to Britain, and from there introduced into Scandinavia. In Scotland the reel is usually danced by two couples; in England—where it is now almost only found in connection with the Sword Dance, as performed in the North Riding of Yorkshire—it is danced by three couples. The figures of the reel differ slightly according to the locality; their chief feature is their circular character, the dancers standing face to face and describing a series of figures of eight. The music consists of 8-bar phrases, generally in common time, but occasionally in 6-4. The Irish reel is played much faster than the Scotch; in Yorkshire an ordinary hornpipe-tune is used. The following example, 'Lady Nelson's Reel,' is from a MS. collection of dances in the possession of the present writer:—

[In *News from Scotland* (1591) it is stated

that 'Giles Duncan did go before them playing a *reill* or dance upon a small trump.' The Irish reel, which is apparently alluded to here, is in 2-4, or common time, and is always danced singly: the first eight bars, danced in steps, are followed by a round for the next eight bars, when the original steps are resumed, but reversed. W.H.C.F.]

An example of the Danish reel will be found in Engel's 'National Music' (London, 1866).

One of the most characteristic Scotch reels is the Reel of Tulloch (Thulichan):—

Others, equally good, are 'Colonel M'Bean's Reel,' 'Ye're welcome, Charlie Stuart,' 'The Cameronian Rant,' 'Johnnie's friends are ne'er pleased,' and 'Flora Macdonald.'

For the slow Reel see STRATHSPEY. W. B. S.

REEVE, WILLIAM, born 1757; after quitting school, was placed with a law stationer in Chancery Lane, where his fellow-writer was Joseph Munden, afterwards the celebrated comedian. Determined, however, upon making music his profession, he became a pupil of Richardson, organist of St. James's, Westminster. In 1781 he was appointed organist of Totnes, Devonshire, where he remained till about 1783, when he was engaged as composer at Astley's. He was next for some time an actor at the regular theatres. In 1791, being then a chorus singer at Covent Garden, he was applied to to complete the composition of the music for the ballet-pantomime of 'Oscar and Malvina,' left unfinished by Shield, who, upon some differences with the manager, had resigned his appointment. Reeve thereupon produced an overture and some vocal music, which were much admired, and led to his being appointed composer to the theatre. In 1792 he was elected organist of St. Martin, Ludgate. In 1802 he became part proprietor of Sadler's Wells Theatre. His principal dramatic compositions were 'Oscar and Malvina,' and 'Tippoo Saib,' 1791; 'Orpheus and Eurydice,' partly adapted from Gluck, 1792; 'The Apparition,' 'British Fortitude,' 'Hercules and Omphale,' and 'The Purse,' 1794; 'Merry Sherwood' (containing Reeve's best-known song, 'I am a Friar of orders grey'), 1795; 'Harlequin and Oberon,' 1796; 'Bantry Bay,' 'The Round Tower,' and 'Harlequin Quixote,' 1797; 'Joan of Arc,' and 'Ramah Droog' (with Mazzinghi), 1798; 'The Turnpike Gate' (with Mazzinghi), 'The Embarkation,' and 'Thomas and Susan,' 1799; 'Paul and Virginia' (with Mazzinghi), and 'Jamie and Anna,' 1800; 'Harlequin's Almanack,' 'The Blind Girl' (with Mazzinghi), 1801; 'The Cabinet' (with Braham, Davy, and Moorehead), and 'Family Quarrels' (with Braham and Moorehead), 1802; 'The Caravan,'

1803; 'The Dash,' and 'Thirty Thousand' (with Davy and Braham), 1804; 'Out of Place' (with Braham), and 'The Corsair,' 1805; 'The White Plume,' 'Rokeby Castle,' and 'An Bratach,' 1806; 'Kais' (with Braham), 1808; 'Tricks upon Travellers' (part), 1810; and 'The Outside Passenger' (with Whitaker and D. Corri), 1811. He wrote music for some pantomimes at Sadler's Wells; amongst them 'Bang up,' by C. Dibdin, jun., containing the favourite Clown's song, 'Tippitywitcheet,' for Grimaldi. He was also author of *The Juvenile Preceptor*, or *Entertaining Instructor*, etc. He died June 22, 1815.

W. H. H.

REEVES, JOHN SIMS, son of a musician in the Royal Artillery, was born at Woolwich, Sept. 26,¹ 1818 (*Memoirs of the Royal Artillery Band*, by H. G. Farmer (1904), p. 74 ff.). He received his early musical instruction from his father, and at fourteen obtained the post of organist at North Cray Church, Kent. Upon gaining his mature voice he determined on becoming a singer, and [after a year spent in studying for the medical profession] in 1839 made his first appearance at the Newcastle-upon-Tyne Theatre, as the Gipsy Boy in 'Guy Mannering,' and subsequently performed Dandini in 'La Cenerentola,' and other baritone parts. The true quality of his voice, however, having asserted itself, he placed himself under J. W. Hobbs and T. Cooke, and in the seasons of 1841-42 and 1842-43 was a member of Macready's company at Drury Lane, as one of the second tenors, performing such parts as the First Warrior in Purcell's 'King Arthur,' Ottocar in 'Der Freischütz,' and the like. He then went, to prosecute his studies, first to Paris under Bordogni, and subsequently to Milan under Mazzucato; he appeared at the Scala as Edgardo in Donizetti's 'Lucia di Lammermoor' with marked success. Returning to England he [appeared at various concerts, and] was engaged by Jullien for Drury Lane, where he made his first appearance on Monday, Dec. 6, 1847, as Edgar in 'The Bride of Lammermoor,' and at once took position as an actor and singer of the first rank. 'His voice had become a pure high tenor of delicious quality, the tones vibrating and equal throughout, very skilfully managed, and displaying remarkably good taste. His deportment as an actor was natural and easy, his action manly and to the purpose, and exhibiting both passion and power, without the least exaggeration.' A fortnight later he performed his first original part, Lyonnell in Balfe's 'Maid of Honour.' [Berlioz, who conducted the performance, engaged him for the performance of two parts of *La Damnation de Faust* at Drury Lane, Feb. 7, 1848.] In 1848 he was engaged at Her Majesty's Theatre, and came out as Carlo in

Donizetti's 'Linda di Chamounix,' appearing also as Florestan in 'Fidelio.' [His operatic career was more or less overshadowed by the great place he made for himself in oratorio; he sang the part of Faust when Gounod's opera was given for the first time in English, at Her Majesty's Theatre, and for a few performances he sang Braham's old part of Sir Huon in 'Obcron.' Captain Macheath, in 'The Beggar's Opera,' was one of the last operatic parts in which he appeared.] In the autumn of 1848 he was engaged at the Norwich Musical Festival, where he showed his ability as an oratorio singer by an extraordinarily fine delivery of 'The enemy said' in 'Israel in Egypt.' On Nov. 24 following he made his first appearance at the Sacred Harmonic Society in Handel's 'Messiah.' The rapid strides which he was then making towards perfection in oratorio were shown—to take a few instances only—by his performances in 'Judas Maccabæus' and 'Samson,' 'Elijah,' 'St. Paul,' and 'Lobgesang,' and 'Eli' and 'Naaman' (both composed expressly for him). [He sang in Bach's 'St. Matthew Passion,' under Sterndale Bennett, when the work was given for the first time in England in 1854.] But his greatest triumph was achieved at the Handel Festival at the Crystal Palace in 1857, when, after singing in 'Messiah' and 'Judas Maccabæus' with increased reputation, he gave 'The enemy said' in 'Israel in Egypt' with such remarkable power, fire, and volume of voice, breadth of style, and evenness of vocalisation, as completely electrified his hearers. He repeated this wonderful performance at several succeeding festivals, and in the Handelian repertory nothing was more striking than his delivery of 'Total Eclipse' from 'Samson.' [He was the first representative of various tenor parts in oratorios and cantatas that are for the most part forgotten in the present day, such as Benedict's 'St. Peter,' Bennett's 'May Queen,' Sullivan's 'Prodigal Son' and 'Light of the World.' His singing of 'Tom Bowling' and 'Come into the garden, Maud' remained unapproachable until the end of his life. It was unfortunate that he was compelled by adverse circumstances to go on singing after his voice had begun to decay. His farewell concert took place at the Albert Hall on May 11, 1891, but he sang afterwards at Covent Garden, and at music halls. Some critics, who only heard him in his last days, were inclined to question whether he had ever been great, but their doubts were without foundation. In the quarter of a century during which his voice was at its best, he sang on the orchestra with Jenny Lind, Clara Novello, Tietjens, Adelina Patti, and Christine Nilsson, and held his own with them all. Assuredly none but a great artist could have done that. Even in his vocal decay there was nothing harsh or ugly. He never sang off the key, and even when he was

¹ Or possibly Oct 21 (he entered his name in a 'birthday book' as born on that day).

nearly seventy his legato singing was a model of steadiness and breath management. The expression 'voice colouring' was not much used in Sims Reeves's day, but of the art implied in the words he was a past master. No one could with greater certainty find the exact tone to fit the most varied emotions. It was a comprehensive talent indeed that could range at will from the levity of Captain Macheath's songs to the poignant pathos of Handel's 'Deeper and deeper still,' the emotional warmth of Beethoven's 'Adelaide,' or the cycle 'An die ferne Geliebte.' He died at Worthing, Oct. 25, 1900.] Sims Reeves married, Nov. 2, 1850, Miss EMMA LUCOMBE, soprano singer, who had been a pupil of Mrs. Blane Hunt, and appeared at the Sacred Harmonic Society's concert of June 19, 1839, and sang there and at other concerts until 1845, when she went to Italy. She returned in 1848, and appeared in opera as well as at concerts. She retired from public life and occupied herself as a teacher of singing, for which she had a deservedly high reputation. [She died at Upper Norwood, June 10, 1895; and in the same year her husband married his pupil, Miss Maud Rene, with whom he went on a successful concert tour in South Africa in 1896.] His son HERBERT, after a careful education under his father and at Milan, made his successful début at one of Mr. Ganz's concerts (June 12, 1880), and met with considerable favour from the public. W. H. H.; additions from the *Dict. of Nat. Biog.*, S. H. Pardon, Esq., etc.

REFORMATION SYMPHONY, THE. Mendelssohn's own name for his Symphony in D minor, written with a view to performance at the Tercentenary Festival of the Augsburg Protestant Confession, which was intended to be celebrated throughout Germany on June 25, 1830. The first mention of it appears to be in a letter of his own from North Wales, Sept. 2, 1829. On May 25, 1830, he writes from Weimar that it is finished, and when copied will be sent to Leipzig. It was not, however, then performed; the political troubles of that year prevented any festive demonstrations. In January and March, 1832, it was in rehearsal in Paris, but it did not come to actual performance till November 1832, when it was played under his own direction at Berlin. It was not repeated during his life, but was revived at the Crystal Palace, Nov. 30, 1867. It was afterwards played at the Gewandhaus, Leipzig, Oct. 29, 1868, and was published in score and parts by Novello & Co., and by Simrock as 'Symphony No. 5'—op. 107, No. 36 of the posthumous works. The first Allegro is said to represent the conflict between the old and new religions, and the Finale is founded on Luther's Hymn, 'Ein feste Burg ist unser Gott.' One of the most prominent themes of the work is the beautiful ascending phrase

known as the 'Dresden Amen,' which has been used with marvellous effect in Wagner's 'Parsifal.'

REFRAIN (Fr. *Refrain*; Germ. *Reimkehr*). This word is used in music to denote what in poetry is called a 'burden,' i.e. a short sentence or phrase which recurs in every verse or stanza. It was probably first employed in music in order to give roundness and unity to the melody, and was then transferred to the poetry which was written especially for music. Such collections as the 'Échos du temps passé' give an abundance of examples in French music, where songs with refrains are most frequently to be found. 'Lil-liburlero' may be cited as one English instance out of many. [See vol. ii. p. 731.] Schubert's four Refrain-Lieder were published as op. 95.

REGAL (Fr. *Régale*; It. *Régale* or *Ninfale*). [The word may be derived from 'regulus,' the idea of gradation being inherent in a keyboard. The wooden harmonicon, when played with a keyboard, was at one time called 'régale en bois.' This name describes a variety of organ, which is especially interesting as being in some ways the prototype of the modern harmonium. It consists of a single row of 'beating' reeds, the pipes of which are in some instances so small as hardly to cover the reeds. A fine specimen is in the possession of the Brussels Conservatoire, and was lent to the Inventions Exhibition in 1885. The name 'bible regal' is the title of another variety, the peculiarity of which consists in its being arranged to fold in two, on a similar principle to that on which leather backgammon boards are made. The bellows are covered with leather, so that when the instrument is folded it presents the appearance of a large book. Praetorius in his *Synagoga*, vol. iii. pl. iv., gives a view of one, which in its extended condition, bellows and all, appears to be about 3 ft. 6 in. by 3 ft. He ascribes (ii. p. 73) the invention to a nameless monk; others give it to Voll, an organ-builder at Nuremberg in 1575. The specimen preserved in the Musée of the Conservatoire at Paris is said to date from the end of the 16th century, and has a compass of four octaves. The instrument has been long since extinct, but the name 'regal' is still applied in Germany to certain reed-stops. [The word is used by Fétis, Rimbaud, and Engel to denote the portable organ of the 12th and 13th centuries. Mr. Hopkins possessed a remarkably fine specimen, believed to be unique as far as Great Britain is concerned. It is smaller than the Brussels one, being 2 ft. 5 in. wide, and (with the bellows) 3 ft. 8 in. long. The compass is from E to c". The sharps are of boxwood stained black, the naturals of bird's-eye maple. The keys are not balanced, but hinged. The instrument is of oak, and is dated 1629, with no maker's name.]

In the inventory of Henry VIII.'s musical

instruments [Harleian MS., 1419, A fol. 200], we find thirteen pairs of single regalls (the 'pair' meant only one instrument) and five pairs of double regalls (that is with two pipes to each note). The name continued in use at the English Court down to 1773, the date of the death of Bernard Gates, who was 'tuner of the Regals in the King's household.' For further particulars the reader is referred to Mr. A. J. Hipkins's *Musical Instruments* (A. & C. Black, 1887), where instruments are figured; also to the same writer's *History of the Pianoforte*, 1898. G.; with additions from MS. notes left by Mr. Hipkins.

REGAN, ANNA, soprano singer. [See SCHLIMON.]

REGER, MAX, was born March 19, 1873, at Brand, a village near Kenneth in Bavaria, and left his native place when but a year old for Weiden, whither his father, who was a teacher, was transferred in 1874. There he received his first musical training through his father and the organist, whose name was Lindner. In 1890 he went to study with Riemann at Sondershausen, whom he followed to Wiesbaden on the latter's appointment to the Conservatorium, and became himself a teacher there in 1895, till in 1896 he was called to the service of his country. After recovering from a severe illness he returned to his own home in 1898, removed again in 1901, this time to Munich, where he married.

Of all the composers of the modern German school of chamber and church music Herr Reger occupies a place that is probably the most prominent of any, and the fact that his publishers attest to an enormous sale of his works in Berlin and other musical centres must contribute to that belief. It cannot be denied that he is a composer gifted, as a celebrated German critic remarks, with strong individuality, and that he handles with the utmost facility the art of counterpoint; but to a large number of persons at the present day his resources of harmony and his indulgences in rhythm and in form will appear so infinite as to fog even a most attentive and experienced listener with their complexity. Truly, however, his compositions contain remarkable and original effects. In his songs, to quote the aforesaid critic, 'hat er sich vielfach von einer Strömung fortzerrissen lassen, welche das Grundwesen des Liedes zerstört.' To which he adds that Herr Reger's powers of invention are so rich that only the employment of a conscious limitation of his artistic means instead of an intentional eclipse of his forerunners is to be desired of him, and he would then be the master to continue the direct line of the great German composers. For a man of thirty-four years of age the number of his compositions is enormous, as will be seen from the catalogue below, which, it will be noticed, contains only one number for orchestra (op. 90).

- Op. 1. Sonata for violin and piano, in D minor.
2. Trio for piano, violin and viola.
3. Sonata for violin and piano, in D.
4. Six Songs.
5. Sonata for violoncello and piano, in F minor.
6. { Two Sacred Songs with organ.
Songs for 4 voices with piano.
7. Three Organ pieces.
8. Five Songs.
9. 'Walzer Kapriolen' (piano pieces for 4 hands).
10. 'Deutsche Tänze' (piano pieces for 4 hands).
11. Waltzes for FF. solo.
12. Five Songs.
13. 'Lose Blätter' FF. solo.
14. Duets for soprano and alto, with piano.
15. Ten Songs.
16. Suite in E minor, for organ.
17. 'Aus der Jugendzeit,' twenty pieces for FF. solo.
18. Improvisation, FF. solo.
19. Two Sacred Songs, with organ.
20. Five Humoresken for FF. solo.
21. Hymn 'An der Ueßung' (male chorus, with orchestra).
22. Six Waltzes, for piano (4 hands).
23. Four Songs.
24. Six Pieces for FF. solo.
25. Aquarellen for FF. solo.
26. Seven Fantasiestücke for FF. solo.
27. Fantasia for organ on 'Elt' feste Burg.'
28. Sonata for piano and violoncello, in G minor.
29. Fantasia and Fugue, C minor, for organ.
30. Fantasia for organ on 'Freu' dich sehr, o meine Seele.'
31. Six Songs.
32. Seven Characteristic Pieces for FF. solo.
33. Sonata for Organ, F# minor.
34. 'Pieces Pittoresques' for piano (4 hands).
35. Six Songs.
36. Bunte Blätter, nine small pieces for FF. solo.
37. Five Songs.
38. { Two volumes of Folk-songs for male chorus (a 5-9).
Two volumes of Folk-songs for mixed chorus (a 6-8).
Sacred German Folk-songs (a 7-12).
Seven Choruses for male voices.
39. Three Six-part Choruses for mixed voices.
40. { I. Fantasia on 'Wie schön leuchtet uns der Morgenstern.'
II. Suite on 'Strat' mich nicht in deinem Zorn' (both for organ).
41. Suite in A for violin and piano.
42. Four Sonatas for violin, in D minor, A, B minor, and G minor.
43. Eight Songs.
44. Piano Solos.
45. Six Intermezzi for piano.
46. Phantasia and Fugue on BACH for organ.
47. Six Trio for organ.
48. Seven Songs.
49. { Four Sonatas for violin alone (one in the style of Bach).
Two Sonatas for clarinet and piano.
50. Two Romances for violin in G and D.
51. Twelve Songs.
52. Organ Fantasia on 'Alle Menschen müssen sterben.'
53. { Ditto. 'Wachet auf, ruft uns die Stimme.'
Ditto. 'Halleluja, Gott zu loben.'
54. 'Bühnenszenen' for piano.
55. Three String Quartets in G, A, and D minor.
56. Fifteen Songs.
57. Five easy Preludes and Fugues for organ.
58. { Variations on 'Heil unserm König, Heil.'
Symphonic Fantasia and Fugue.
59. Six Burlesken for FF. (4 hands).
60. Twelve Pieces for organ.
61. { 'Falmontegnorguen' (5 voices & cappella).
{ Der evangelische Kirchenchor (for 4 voices), forty Easy Com-
positions for church performance.
62. Sixteen Songs.
63. Twelve Monologues for the organ.
64. String quintet in G Minor (two violins, two violas, and violoncello).
65. Twelve Pieces for organ.
66. Twelve Songs.
67. Fifty-three Easy 'Choral Vorspiele.
68. Six Songs.
69. Ten Organ Pieces.
70. Seventeen Songs.
71. 'Gessang der Verkörten' (for 5-voiced choir and grand orchestra).
72. Sonata for piano and violin.
73. Variations and Fugue on an original theme for organ.
74. String quartet in D minor.
75. Eighteen Songs.
76. Fifteen 'Schlichte Weisen' for piano and voice.
77. { (a) Serenade in D for flute, violin, and viola.
(b) Trio in A minor for violin, viola, and violoncello.
78. Sonata for violoncello and FF. in F.
79. Fourteen volumes of Pieces for piano, for organ, for piano and violin, for piano and violoncello, and songs.
80. Five Easy Preludes and Fugues, Bach's Two-part Inventions arranged as organ trios (with K. Straube), and twelve pieces for organ.
81. Variations and Fugue on a theme of J. S. Bach, for FF. solo.
82. Twelve small pieces for FF. solo. 'Aus meinem Tagebuche.'
83. Eight Songs for male chorus.
84. Sonatas for FF. and violin in F# minor.
85. Four Preludes for the organ.
86. Variations and Fugue on a theme by Beethoven for two FFs. (4 hands).
87. Two Compositions for violin and FF.
88. Four Songs.
89. Two Sonatas (E minor and D) for FF. solo.
90. Stufenletta for orchestra.

Without opus numbers are:—

Two Books of Canons (1896) for FF.

FF. Transcriptions of Bach, Kuhlau, etc., for FF. solo and duets.

Four 'Heitere Lieder.'

Four Sacred Songs.

Four FF. Studies for the left hand alone.

Five FF. Studies (arrangements of Chopin's works).

'Wiegeliend.'

Piano Transcriptions of songs by Hugo Wolf and Richard Strauss.

Der Evangelische Kirchenchor, consisting of—

Book I. Forty easy sacred songs (S.A.T.B.) for all festivals, in four series.

Book II. Cantata 'O wie selig' for mixed choir and congregation, with accompaniment of strings and organ.

Book III. Cantata for Good Friday, 'O Haupt voll Blut und Wunden,' for alto and tenor (or sopr.) solos, mixed choir, viola solo, oboe solo, and organ.

For male chorus:—

Nina volkslieder.

Five volkslieder.

Twelve madrigals.

For mixed choir:—

Eight volkslieder.

Six volkslieder.

Twelve German sacred songs (in three books).

'Kommt, heiliger Geist.'

'Es bel ein Thau,' for 6-part choir.

'Von Himmel hoch,' for 4-part chorus, two solo violins, choir, and congregation, with organ or harmonium.

For Organ:—Schule des Triospiels (arrangements of Bach's 2-part inventions, with K. Straube).

Romanze, also for harmonium.

Songs with organ or piano.

Arrangements of fifteen of Bach's clavier works for organ.

Arrangements of songs for harmonium.

FF. and violin:—Petite Caprice, Romanze (G major), and

Wiegeliend.

For FF. and violoncello:—Caprice.

For voice and FF.—Sixteen songs.

FF. solo:—Perpetuum mobile, Elegie, Humoreske, Romanze,

Moment musical, Scherzino, Albumblatt, Frühlinglied,

Melodie, two Humoresken, Nachstück.

Canons in all major and minor keys, Book I, in two parts,

Book II, in three parts.

Four special studies for left hand alone:—Scherzo, Humoreske,

Romanze, and Prelude and Fugue.

Regiments-Marsch der ehemaligen Hannoverschen Armee

(arrangement).

A new set of orchestral variations is announced for performance in the winter of 1907-8.

Literary work:—*Beiträge zur Modulationslehre* (Contribution to the Rules of Modulation).

H. V. H.

REGGIO, PIETRO, born at Genoa in the first quarter of the 17th century, was private musician (lutenist and singer) to Queen Christina of Sweden after her abdication. After her final departure from Rome, Reggio came to England and settled at Oxford, where, in 1677, he published *A Treatise to sing well any Song whatsoever*. In 1680 he issued a book of songs dedicated to the king, and containing the earliest setting of 'Arise, ye subterranean winds,' from Shadwell's 'Tempest,' afterwards set by Purcell. (See *Sammelbände der Int. Mus. Ges.* v. 553.) Seven Italian songs are in the British Museum in MS., two duets in the Fitzwilliam Museum at Cambridge, and a three-part motet in the Christ Church Library, Oxford. Reggio died in London, July 23, 1685 (Hawkins), and was buried in St. Giles's in the Fields. M.

REGIS, JEAN, a Flemish musician of the latter part of the 15th century, usually reckoned along with Busnois, Caron, Obrecht, and Okeghem as belonging to the transitional school of composers between Dufay and Binchois on the one hand, and Josquin Després on the other. Tinctoris mentions him with special distinction. He was for a time master of the choir-boys in Antwerp Cathedral, and is also supposed to have been in personal relation with Dufay. Though he does not appear, like Dufay, to have ever been a member of the Papal Choir, two of his masses were copied into the great choir-books of the

Sistine Chapel, which are so far interesting as showing the curious custom of the time in combining different liturgical texts. Thus, in one of them, while the two upper voices sing the usual words of the mass the tenor sings the 'Ecce ancilla Domini,' and the Bass 'Ne timeas Maria,' which would seem to show that this mass was specially composed for the festival of the Annunciation. In the other, the Alto and Tenor sing 'Dum sacrum mysterium cerneret Joannes,' which would imply the work to be intended for the festival of St. John the Evangelist. Regis is also the author of a mass 'L'homme arme,' in the Archives of Cambrai, and of a few other pieces in the collections of Petrucci. The setting of a popular song 'S'il vous plaisait' a 4, transcribed by Kieseewetter in his *Schicksale und Beschaffenheit des weltlichen Gesanges*, serves to show the skill of Regis as a contrapuntal harmonist of the time in a very favourable light.

J. R. M.

REGISTER, of an organ. Literally, a set of pipes as recorded or described by the name written on the draw-stop; hence, in general, an organ-stop. The word 'register' is, however, not quite synonymous with 'stop,' for we do not say 'pull out, or put in, a register,' but, 'a stop,' although we can say indifferently 'a large number of registers' or 'of stops.' The word is also used as a verb; for example, the expression 'skill in registering' or 'registration' means skill in selecting various combinations of stops for use. The word 'stop' is, however, never used as a verb in this sense. J. S.

REGISTER is now employed to denote a portion of the scale. The 'soprano register,' the 'tenor register,' denote that part of the scale which forms the usual compass of those voices; the 'head register' means the notes which are sung with the head voice; the 'chest register' those which are sung from the chest; the 'upper register' is the higher portion of the compass of an instrument or voice, and so on. How it came to have this meaning, the writer has not been able to discover. G.

REGISTRATION (or REGISTERING) is the art of selecting and combining the stops or 'registers' of the organ so as to produce the best effect. See ORGAN-PLAYING, vol. iii. pp. 562-64.

REGNART, surname of a family of Flemish musicians who flourished towards the end of the 16th century. There were five brothers, one of whom, Augustin (not August, as given by Eitner, which would correspond to Augustus in Latin but not to Augustinus) was a canon of the Church of St. Peter's, Lille (not Douai, as Eitner suggests in the *Quellen-Lexikon*, forgetting the words of the dedication partly quoted by himself in his *Bibliographie*, p. 216),¹ and in 1590 edited and published at Douai a

¹ See also Goovaert's *Bibliographie*, p. 268; but he contradicts himself by elsewhere (p. 52) describing Augustin Regnart as Canon of St. Peter's, Louvain.

Collection of thirty-nine Motets, *a* 4-6, composed by his four brothers Francis, Jacob, Paschasius, and Charles Regnart. The work appropriately bears on its title-page the motto, 'Ecce quam bonum et quam jucundum fratres habitare in unum,' Psal. 132. The full title is 'Novae Cantiones Sacrae, 4, 5, et 6 vocum tum instrumetorum cuivis generi tum vivae voci aptissimae, authoribus Francisco, Jacobo, Paschasio, Carolo Regnart, fratribus germanis' (another incidental mistake of Eitner is that of taking the word 'germanis' as indicative of nationality, and explaining it on the ground that Flanders was then part of Germany, while all that the word really implies is that the brothers were full brothers). Of the four brothers only two attained any real position or eminence as composers, Francis and Jacob. The other two are only represented by three motets a piece in this Collection, and of their careers nothing is known with any certainty. Of Francis, Augustin tells us that he had pursued his studies at the University of Douai and the Cathedral of Tournai. Besides the twenty-four motets in the Collection above mentioned, Francis Regnart is chiefly known by a book of fifty Chansons *a* 4-5, 'Poésies de Ronsard et autres,' originally published at Douai by Jean Bogaerd in 1575, and afterwards at Paris by Le Roy and Ballard in 1579. These Chansons have now been republished in modern score by H. Expert in his collection 'Les Maitres Musiciens de la renaissance Française.' Fétis mentions a book of Missae tres *a* 4-5, by Francis Regnart, published by Plantin in 1582, but there is no trace of such a publication in Goovaert's *Bibliographie*, and Eitner knows nothing of it.

Of the life and works of Jacob Regnart we have fuller information. He was early received as an Alumnus of the Imperial Chapel at Vienna and Prague. In 1564 he is designated as tenor singer in the chapel; and as a member of the chapel accompanied the Emperor to the Augsburg Diet of 1566. In 1573 he is mentioned as musical preceptor to the boys of the choir, and before 1579 became the vice-capellmeister. In 1580 he was offered by the Elector of Saxony the post of capellmeister at Dresden vacant by the death of Scandelli, but declined. In 1582, however, he left the imperial service to enter that of the Archduke Ferdinand at Innsbruck, where he remained as capellmeister till 1595. He then returned to Prague, where he died in 1600. Shortly before his death, in the dedication of a book of Masses to the Emperor, Rudolf II., which, however, was not published till afterwards, he recommended to the care of the Emperor his wife and six children. The widow, a daughter of Hans Vischer, the famous bass singer in the Electoral Chapel at Munich under Orlando Lassus, returned to Munich, where she occupied

herself in preparing for publication in 1602-3 three volumes of her husband's Masses, containing altogether 29 *a* 5, 6, 8, and 10, also a book of Sacrae Cantiones, *a* 4-12, 35 Noa. The other sacred works of Regnart which appeared during his lifetime were a book of Sacrae Cantiones, *a* 5-6, 1575, and one *a* 4, 1577; also one entitled *Mariale*, 1588, Marian Motets composed by way of thanksgiving for recovery from severe illness. He was, however, even more widely known by his secular works, which consist of (1) two books of Canzone Italiane, *a* 5 (1574-81), (2) two books entitled *Threni Amorum*, German secular songs, *a* 5 (1595), and (3) several collections, *a* 3, 4, 5, entitled 'Kurtzweilige teutsche Lieder nach Art der Neapolitanen oder welschen Villanellen' (1576-91). Of the latter, the collection of 67 *a* 3 was republished by Eitner in modern score in 1895. They are written in the simple melodious Italian canzonet style, without any artificiality of counterpoint. In some introductory lines of verse the composer apologises for his frequent intentional employment of consecutive fifths in the harmony as being in accordance with the simple popular character he wished to give these songs. The melody of one of them, 'Venus du und dein Kind,' has become, with a slight alteration in the first line, the chorale tune well-known later, 'Auf meinen lieben Gott.' Two of Regnart's other songs, *a* 5, which have something more of imitative counterpoint, have been reprinted in Commer's selection of 'Geistliche und weltliche Lieder aus der xvi-xvii Jahrh.' None of his Latin motets have been reprinted, with the exception of one which found admission into the *Evangelical Gotha Cantional* of 1655, whence it has been reproduced in Schöberlein's *Schatz*. His Masses, several of them based on the themes of German popular songs, must have been popular in their day, judging from the MS. copies of them enumerated in Eitner as surviving in various church archives. A Passion according to St. Matthew, *a* 8, by Regnart survives only in MS., of which some account is given in Kade, *Die aeltere Passionskompositionen*, pp. 60-62.

J. R. M.

REGONDI, GIULIO, of doubtful parentage, born at Geneva in 1822. His reputed father was a teacher in the Gymnasium of Milan. The child appears to have been an infant phenomenon on the guitar, and to have been sacrificed by his father, who took him to every court of Europe, excepting Madrid, before he was nine years old. They arrived in England in June 1831; and Giulio seems never to have left the United Kingdom again except for two concert tours in Germany, one with Lidel, the violoncellist, in 1841, the other with Mme. Dulcken in 1846. On the former of these tours he played both the guitar and the melophone (whatever that may have been), and evoked enthusiastic

praises from the correspondents of the *A. M. Zeitung* in Prague and Vienna for his extraordinary execution on both instruments, the very artistic and individual character of his performance, and the sweetness of his *cantabile*. The concertina was patented by Sir Charles Wheatstone in 1829 [see CONCERTINA], but did not come into use till Regondi took it up. He wrote two concertos for it, and a very large number of arrangements and original compositions. He also taught it largely, and at one time his name was to be seen in almost all concert programmes. He was a great friend of Molique's, who wrote for him a Concerto for the Concertina (in G) which he played with great success at the concert of the Musical Society of London, April 20, 1864. When he went abroad for his second tour, his performance and the effect which he got out of so unpromising and inartistic an instrument astonished the German critics. (See the *A. M. Zeitung* for 1846, p. 853.) Regondi appears to have been badly treated by his father, and to have had wretched health, which carried him off on May 6, 1872. G.

REHEARSAL (Fr. *Répétition*, Ger. *Probe*). In the case of concerts, a trial performance preliminary to the public one, at which each piece included in the programme is played through at least once, if in MS. to detect the errors inevitable in the parts, and in any case to study the work and discover how best to bring out the intentions of the composer, and to ensure a perfect *ensemble* on the part of the performers. In England, owing to many reasons, but principally to the over-occupation of the players, sufficient rehearsals are seldom given to orchestral works. The old rule of the Philharmonic Society (now happily altered) was to have one rehearsal on Saturday morning for the performance on Monday evening, and the Saturday Popular Concerts were originally, in like manner, rehearsals for the Monday evening concerts. No new works can be efficiently performed with less than two rehearsals; and in the case of large, intricate, and vocal works, many more are requisite. We have it on record that Beethoven's E♭ Quartet, op. 127, was rehearsed seventeen times before its first performance; the players therefore must have arrived at that state of familiarity and certainty which a solo player attains with a concerto or sonata.

In the case of Operas, every practice of either chorus, principals, or orchestra, separately or together, is termed a rehearsal. These will sometimes continue every day for six weeks or two months, as the whole of the voice-music, dialogue, and action has to be learnt by heart. Whilst the chorus is learning the music in one part of the theatre, the principals are probably at work with the composer at a piano in the green-room, and the ballet is being rehearsed on the stage. It is only when the music and dialogue are known by heart that the rehearsals on the stage with

action and business begin. The orchestra is never used until the last two or three rehearsals, and these are termed Full Band Rehearsals (Germ. *General-probe*). Last of all, before the public production of the work, comes the Full Dress Rehearsal, exactly as it will appear in performance. G.

REICHA, ANTON JOSEPH, born at Prague, Feb. 27, 1770, lost his father before he was a year old; his mother not providing properly for his education, he left home, and took refuge with his grandfather at Glatow, in Bohemia. The means of instruction in this small town being too limited, he went on to his uncle Joseph Reicha (born in Prague, 1746, died at Bonn, 1795), a violoncellist, conductor, and composer, who lived at Wallerstein in Bavaria. His wife, a native of Lorraine, speaking nothing but French, had no children, so they adopted the nephew, who thus learned to speak French and German besides his native Bohemian. He now began to study the violin, pianoforte, and flute in earnest. On his uncle's appointment, in 1788, as musical director to the Elector of Cologne, he followed him to Bonn, and entered the band of Maximilian of Austria as second flute. The daily intercourse with good music roused the desire to compose, and to become something more than an ordinary musician, but his uncle refused to teach him harmony. He managed, however, to study the works of Kirnberger and Marpurg in secret, gained much practical knowledge by hearing the works of Handel, Mozart, and Haydn, and must have learned much from his constant intercourse with Beethoven, who played the viola in the same band with himself and was much attached to him. At length his perseverance and his success in composition conquered his uncle's dislike. He composed without restraint, and his symphonies and other works were played by his uncle's orchestra.¹

On the dispersion of the Elector's Court in 1794, Reicha went to Hamburg, where he remained till 1799. There the subject of instruction in composition began to occupy him, and there he composed his first operas, 'Godefroid de Montfort,' and 'Oubaldi, ou les Français en Egypte' (two acts). Though not performed, some numbers of the latter were well received, and on the advice of a French émigré, he started for Paris towards the close of 1799, in the hope of producing it at the Théâtre Feydeau. In this he failed, but two of his symphonies, an overture, and some 'Scènes Italiennes,' were played at concerts. After the successive closing of the Théâtre Feydeau and the Salle Favart, he went to Vienna, and passed six years (1802-8), in renewed intimacy with Beethoven, and making friends with Haydn, Albrechtsberger, Salieri, and others. The patronage of the Empress Maria

¹ See an interesting notice by Kastner, quoted by Thayer, *Beethoven*, I. 188.

Theresa was of great service to him, and at her request he composed an Italian opera, 'Argina, regina di Granata.' During this happy period of his life he published symphonies, oratorios, a requiem, six string quintets, and many solos for PF. and other instruments. He himself attached great importance to his '36 Fugues pour le piano,' dedicated to Haydn, but they are not the innovations which he believed them to be; in placing the answers on any and every note of the scale he merely reverted to the Ricercari of the 17th century, and the only effect of this abandonment of the classic laws of Real fugue was to banish tonality.

The prospect of another war induced Reicha to leave Vienna, and he settled finally in Paris in 1808. He now realised the dream of his youth, producing first 'Cagliostro' (Nov. 27, 1810), an opéra-comique composed with Dourlen; and at the Académie, 'Natalie' (three acts, July 30, 1816), and 'Sapho' (Dec. 16, 1822). Each of these works contains music worthy of respect, but they had not sufficient dramatic effect to take with the public.

Reicha's reputation rests on his chamber-music, and on his theoretical works. Of the former the following deserve mention: a diecetto for five strings and five wind instruments; an octet for four strings and four wind instruments; twenty-four quintets for flute, oboe, clarinet, horn and bassoon; six quintets and twenty quartets for strings; one quintet for clarinet and strings; one quartet for PF., flute, violoncello, and bassoon; one do. for four flutes; six do. for flute, violin, tenor, and violoncello; six string trios; one trio for three violoncellos; twenty-four do. for three horns; six duets for two violins; twenty-two do. for two flutes; twelve sonatas for PF. and violin, and a number of sonatas and pieces for PF. solo. He also composed symphonies and overtures. These works are more remarkable for novelty of combination and striking harmonies, than for abundance and charm of ideas. Reicha's faculty for solving musical problems brought him into notice among musicians when he first settled in Paris, and in 1818 he was offered the professorship of counterpoint and fugue at the Conservatoire. Among his pupils there were Boilly, Jeleusperger, Bienaimé, Millaut, Lefebvre, Elwart, Pollet, Lecarpentier, Dancla, and others.

His didactic works, all published in Paris, are: *Traité de Mélodie*, etc. (4to, 1814); *Cours de composition musicale*, etc. (1816); *Traité de haute composition musicale* (first part 1824, second 1826), a sequel to the other two; and *Art du compositeur dramatique*, etc. (4to, 1833).

Fétis has criticised his theories severely, and though highly successful in their day, they are now abandoned, but nothing can surpass the clearness and method of his analysis, and those who use his works will always find much to

be grateful for. Czerny published a German translation of the *Traité de haute composition* (Vienna, 1834, four vols. folio), and in his *Art d'improviser* obviously made use of Reicha's *Art de varier*—fifty-seven variations on an original theme.

Reicha married a Parisian, was naturalised in 1829, and received the Legion of Honour in 1831. He presented himself several times for election to the Institut before his nomination as Boieldieu's successor in 1835. He only enjoyed his honours a short time, being carried off by inflammation of the lungs, May 28, 1836. His death was deplored by the many friends whom his trustworthy and honourable character had attached to him. A life-like portrait, somewhat spoiled by excessive laudation, is contained in the *Notice sur Reicha* (Paris, 1837, 8vo), by his pupil Delaire. G. C.

REICHARDT, ALEXANDER, a tenor singer; was born at Pács, Hungary, April 17, 1825. He received his early instruction in music from an uncle, and made his first appearance at the age of eighteen at the Lemberg theatre as Rodrigo in Rossini's 'Otello.' His success there led him to Vienna, where he was engaged at the Court Opera, and completed his education under Gentiluomo, Catalani, etc. At this time he was much renowned for his singing of the Lieder of Beethoven and Schubert, and was in request at all the soirées; Prince Esterhazy made him his Kammersänger. In 1846 he made a *tournee* through Berlin, Hanover, etc., to Paris, returning to Vienna. In 1851 he made his first appearance in England, singing at the Musical Union, May 6, and at the Philharmonic, May 12, at many other concerts, and before Queen Victoria. In the following season he returned and sang in Berlioz's 'Romeo and Juliet,' at the new Philharmonic Concert of April 14, also in the Choral Symphony, Berlioz's 'Faust,' and the 'Walpurgisnight,' and enjoyed a very great popularity. From this time until 1857 he passed each season in England, singing at concerts, and at the Royal Opera, Drury Lane, and Her Majesty's Theatre, where he filled the parts of the Count in 'The Barber of Seville,' Raoul in 'The Huguenots,' Belmont in the 'Seraglio,' Don Ottavio in 'Don Juan,' and Florestan in 'Fidelio.' The last was a very successful impersonation, and in this part he was said 'to have laid the foundation of the popularity which he has so honourably earned and maintained in London.' He also appeared with much success in oratorio. In 1857 he gave his first concert in Paris, in the Salle Erard, and the following sentence from Berlioz's report of the performance will give an idea of his style and voice. 'M. Reichardt is a tenor of the first water—sweet, tender, sympathetic and charming. Almost all his pieces were re-demanded, and he sang them again without a sign of fatigue.' In 1860 he settled in Boulogne,

which he seldom manifests even towards the greatest masters. He never rested until he had arranged for the performance of Reichardt's Morning Hymn, after Milton, at the Düsseldorf Festival of 1835; and his enthusiasm for the composer, and his wrath at those who criticised him, are delightful to read.¹ Years afterwards, when his mind had lost the ardour of youth, and much experience had sobered him, he still retained his fondness for this composer, and few things are more charming than the genial appreciation with which he tells Reichardt's daughter of the effect which her father's songs had had, even when placed in such a dangerous position as between works of Haydn and Mozart, at the Historical Concert at the Gewandhaus in Feb. 1847. It is the simplicity, the naïveté, the national feeling of this true German music that he praises, and the applause with which it was received shows that he was not alone in his appreciation. Amongst Reichardt's numerous works are eight operas; eight Singspiele, including four to Goethe's poems, 'Jery und Bätely,' (1789), 'Erwin und Elmire,' 'Claudine von Villabella,' and 'Lilla'; five large vocal works, including Milton's 'Morning Hymn,' translated by Herder, his most important work, in 1835; a large number of songs, many of which have passed through several editions, and been published in various collections.

Reichardt's writings show critical acumen, observation, and judgment. Besides the letters previously mentioned, he published—*Das Kunst-magazin*, eight numbers in two vols. (Berlin, 1782 and 1791); *Studien für Tonkünstler und Musikfreunde*, a critical and historical periodical with thirty-nine examples (1792); *Vertraute Briefe aus Paris*, three parts (1804); *Vertraute Briefe auf einer Reise nach Wien*, etc. (1810); fragments of autobiography in various newspapers; and innumerable articles, critiques, etc. The *Briefe* are specially interesting from the copious details they give, not only on the music, but on the politics, literature, and society of the various places he visited. A biography, *J. F. Reichardt, sein Leben und seine musikalische Thätigkeit*, by Herr Schletterer, Capellmeister of the cathedral of Augsburg, is unfinished, two volumes only having been published at Augsburg in 1865. [For list of compositions and writings, see the *Quellen-Lexikon*.] A. M.

REICHER-KINDERMANN, HEDWIG, the daughter of the celebrated baritone, Kindermann (q.v.), was born, July 15, 1853, at Munich. She was taught the piano first by her mother, and at the School of Music, but abandoned the same in favour of singing, on the advice of Franz Wüllner. She received her vocal instruction from her father, and made her début at the Munich Opera as one of the boys in the 'Meistersinger,' and next played small parts in the opera, drama, and ballet, besides singing in

the chorus, in order to gain experience. She sang the alto part in Franz Lachner's Requiem at Leipzig in 1871 with such success that she became engaged at Carlsruhe. She played 'as guest' at Berlin as Pamina, June 5, and Agathe, June 9, 1874; she then returned to Munich, and sang Daniel in Handel's 'Belshazzar,' April 14, 1875. Soon after she married Emanuel Reicher, an actor at the Gärtnerplatz theatre, and for a time sang there in opéra bouffe, but returned to opera and played Grimgerde in the 1st Cycle, and Erda in the 2nd Cycle, at Bayreuth in 1876. She next played at Hamburg, Vienna (where she appeared as Leah on the production of Rubinstein's 'Macabees'), and again at Munich. Having received instruction for the purpose from Faure and Jules Cohen at Paris, she sang in French at Monte Carlo in 1880 with such success that she received an offer to sing at La Scala, Milan, but declined it in favour of an engagement under Neumann at Leipzig, where she made her début as Fidelio, May 12, 1880. She became a great favourite, and remained there until 1882. She played in Neumann's company in the Trilogy at Berlin and other German towns, in London, and lastly at Trieste, where she died June 2, 1883. [See Neumann's *Erinnerungen*, etc., 1907.]

She made a great impression at Her Majesty's Theatre as Fricka on the production of 'Rheingold,' May 5, and of 'Walküre,' May 6, 1882, and still more as Brünnhilde in the 2nd Cycle; 'not only was her magnificent voice equal to all the demands upon it, but her presentation of the character was full of force and of pathos. While no less touching than Frau Vogl in the truthfulness of her expression, she was more heroic and dignified; the supernatural element was brought into stronger relief . . . in the grand awakening scene her manner was perhaps too coldly dignified and wanting in the impulsiveness which characterises the heroine when she has finally abandoned her supernatural attributes and become a true woman.'² A. C.

REICHMANN, THEODOR, was born at Rosstock, March 15, 1849, was taught to sing at first by Mantius, and subsequently by Lamperti in Milan; he made his début as a baritone at Magdeburg in 1869, and sang at Berlin, Rotterdam, Strasburg (1872), Hamburg (1873), Munich (1875), and was a member of the Court Opera at Vienna in 1882-89. In 1882 he sang the part of Amfortas at Bayreuth for the first time, and was identified with it for some ten years, after which differences with the authorities resulted in his non-appearance there until 1902. In the seasons between 1889 and 1891 he sang in New York, and in the latter year returned to Vienna, becoming once more a member of the Opera Company in 1893. In that year he sang the part of Creon in 'Medea' at an operatic festival at Gotha.

¹ Letters, Dec. 28, 1833; Ap^l 3, 1835.

² *Athenaeum*, May 20, 1882.

in 1865, when a large number of students, who thought that they had a right of entry, broke into the concert-hall.

Such was the state of things on Professor Oakeley's appointment in 1865. Finding it impossible, after twenty years, to return to the original system of Thomson and Bishop, he made a compromise, by giving free admissions to the Professors, the University Court, the students in their fourth year at college, and a few leading musicians in the city, and admitting the rest of the audience by payment. From this date a new era dawned on the Reid Concerts; the university and the city were satisfied, and the standard of performance at once rose.

In 1867 the engagement of Manns and of a few of the Crystal Palace orchestra produced very good results.

In 1869 Hallé and his band were engaged, and the demand for tickets soon became so great that the Professor organised two supplementary performances on the same scale as the 'Reid,' and thus, from concerts which on some occasions seem to have been a mere performance of ballads and operatic music by a starring party, the Reid Concert grew into the 'Edinburgh Orchestral,' or 'Reid Festival,' which in turn was converted into the series of historical concerts described in vol. iii. p. 816. The Scottish Universities Commission abolished the 'Reid Concert' itself, about 1893. G.

REIMANN, IGNAZ (born Dec. 27, 1820, at Alhendorf in the district of Glatz, died June 17, 1885), became principal teacher and choir-master at Rengersdorf in Silesia, having been a pupil of the Breslau Seminary. He was an excessively diligent and fluent composer of church music, and wrote no fewer than 74 masses, of which only 18 were published, 24 Requiems (4 published), 4 Te Deums (3 published), 37 Litanies, 4 Oratorios, 83 Offertories (48 published), 50 Gradualien (40 published), besides many burial-songs, wedding cantatas, Salves, Aves, etc., and 9 overtures, and other instrumental works.

HEINRICH (son of the above) was born March 14, 1850, at Rengersdorf, and received musical instruction from his father. He passed the Gymnasium at Glatz, and studied philology at Breslau from 1870 to 1874, graduated the following year, and taught at the gymnasia of Strehlen, Wohlau, Berlin, Ratibor, and Glatz, for a year in each place successively, till in 1885 he became director of that at Gleiwitz, in Upper Silesia. There he quarrelled with the authorities, threw up his post, embraced the Protestant faith, and thenceforth devoted himself entirely to music. As a schoolboy (Gymnasiast) he had already conducted an orchestral and choral society, and had composed church and chamber music, and as a student had led the academical singing-club (Gesangverein), 'Leopoldina,' studying incidentally with Moritz

Brosig; had founded and directed a musical society at Ratibor, which performed oratorios, etc., under him, and had become known during 1879 and 1880 as musical reporter to the *Schlesischer Zeitung*, and by other literary works (*Nomos*, 1882; *Prosodies*, 1885-86). After he definitely took to music, he published some vocal and organ compositions (sonatas, studies, etc.), and a biography of Schumann, which was published by Peters in 1887, and in that year he moved to Berlin to act as musical critic for the *Allgemeine Musikalische Zeitung*. For a time he was occupied at the Royal Library, besides being teacher of organ-playing and theory at the Scharwenka-Klindworth Conservatorium till 1894, and organist of the Philharmonic till 1895, in which year the Kaiser appointed him to the great church in the Augusta-Victoriaplatz, erected to the memory of the Emperor William I., where he enjoyed a great reputation as an organ virtuoso, and directed some of the most magnificent and impressive performances of oratorios, masses, and church music generally, given in any church in Germany. In 1897 he received the title of Professor, and in 1898 founded a Bach Society. He died at Charlottenburg, May 24, 1906.

His compositions include duets for female voices; love scenes in waltz form for four voices; a chorus for four male voices; an album of children's songs for solo voice; toccata for organ in E minor (op. 23); piano duets; two wedding songs for bass voice; arrangements of twenty-five German songs, 'Das deutsche Lied,' of the 14th to the 19th centuries, also for bass voice; a prelude and triple fugue in D minor for the organ; and ciaccona for organ in F minor. His writings are numerous, and include a contribution on the theory and history of Byzantine music (1889); two volumes of musical retrospects, *Wagneriana-Lisztiana*; an opening volume to his own collection of lives of celebrated musicians, being the biography of Schumann already mentioned, to which he added those of Bülow and J. S. Bach. H. V. H.

REIMANN, MATTHIEU (Matthias Reymanus), (born 1544 at Löwenberg, died Oct. 21, 1597, at Prague), was a Doctor of Law and Imperial Councillor under Rudolf II., and wrote two works for the lute; the one entitled 'Noctes musicae' appeared in 1598, and the other, 'Cithara sacra psalmodiae Davidis ad usum testudinis,' in 1603. H. V. H.

REINACH, SALOMAN (THÉODORE), born June 3, 1860, at St. Germain-en-Laye, was at first educated at the École Normal in that place. His bent was always for languages, and especially for Archæology. His occupation of the post of Conservator (curator) of the Museum of Antiquities at St. Germain—which was both the reward of, and the ever-fresh incentive to, his taste for original research—afforded

CARL HEINRICH CARSTEN REINECKE

1872 he made extensive tours; in England he played at the Musical Union, Crystal Palace, and Philharmonic, on the 6th, 17th, and 19th of April, 1869, respectively, and met with great success both as a virtuoso and a composer. He reappeared in this country in 1872, and was equally well received. [In 1895 he resigned the post of conductor of the Gewandhaus concerts, but kept his position in the Conservatorium, being appointed in 1897 director of musical studies until 1902, when he retired altogether.]

Reinecke's industry in composition is great, his best works, as might be expected, being those for piano; his three PF. sonatas indeed are excellent compositions, carrying out Mendelssohn's technique without indulging the eccentricities of modern virtuosos; his pieces for two PFs. are also good; his PF. Concerto in F# minor, a well-established favourite both with musicians and the public, was followed by two others in E minor and C respectively. Besides other instrumental music—a wind octet, quintets, four string quartets, seven trios, concertos for violin and violoncello, etc.—he has composed an opera in five acts, 'König Manfred,' and two in one act each, 'Der vierjährige Posten' (after Körner) and 'Ein Abentsüger Händel's'; 'Auf hohen Befehl' (1886), and 'Der Gouverneur von Tours' (1891); incidental music to Schiller's 'Tell'; an oratorio, 'Belsazar'; cantatas for men's voices 'Hakon Jarl' and 'Die Flucht nach Aegypten'; overtures, 'Dame Kobold,' 'Aladdin,' 'Friedensfeier,' an overture, 'Zenobia,' and a funeral march for the Emperor Frederick (op. 200); two masses, and three symphonies, (op. 79 in A, op. 134 in C minor, and op. 227 in G minor); and a large number of songs and of pianoforte pieces in all styles, including valuable studies and educational works. Of his settings of fairy tales as cantatas for female voices, 'Schneewittchen,' 'Dornröschen,' 'Aachenbrödel,' and several others are very popular. His style is refined, his mastery over counterpoint and form is absolute, and he writes with peculiar clearness and correctness. He has also done much editing for Breitkopf's house. His position at Leipzig speaks for his ability as a conductor; as a pianist (especially in Mozart) he kept up a high position for many years; as an accompanist he is first-rate; and as an arranger for the pianoforte he is recognised as one of the first of the day. Various contributions to musical literature will be found enumerated in Riemann's *Lexikon*. [See also E. Segnitz, *Carl Reinecke*.] F. G.

REINER, JACOB, born about 1559 or 1560 at Altdorf in Würtemberg, was brought up at the Benedictine Monastery of Weingarten, where he also received his first musical training. We have it on his own authority that he was afterwards a pupil of Orlando Lassus at Munich, where also his first publication, a volume of

Motets a 5-6, appeared in 1579. Incidentally it may be mentioned that in 1589 Lassus dedicated a book of six masses, the eighth volume of the *Patrocinium Musices*, to the Abbot of Weingarten. Reiner himself returned to Weingarten, and from at least 1586 to his death on August 12, 1606, was engaged as lay singer and choir-master to the monastery. His publications are fairly numerous, and consist of several volumes of motets, masses, and magnificats, which need not here be specified in detail, especially since part-books are frequently missing, also two volumes of German songs a 3-5. Three settings a 5 of the Passion exist in MS., of a similar character to those by Lassus. The first volume of Reiner's Motets was reproduced in lithograph score by Ottomar Dresel in 1872, and one of the numbers also appears in the supplement to Proske's 'Musica Divina,' edited by F. X. Haberl in 1876. J. R. M.

REINHOLD, HUGO, born March 3, 1854, in Vienna, was a choir-boy of the Hofkapelle of his native city and a pupil of the Conservatorium der Musikfreunde till 1874, where he worked with Bruckner, Dessoff, and Epstein under the endowment of the Duke of Saxe-Coburg and Gotha, and obtained a silver medal. He has presented various compositions, numbering up to op. 59, to the public, including piano music and songs, a string quartet (op. 18 in A major), a suite in five movements for piano and strings, and a Prelude, Minuet, and Fugue for stringed orchestra. The two latter were performed at the Vienna Philharmonic Concerts of Dec. 9, 1877, and Nov. 17, 1878, respectively, and were praised by the Vienna critic of the *Monthly Musical Record* for their delicate character and absence of undue pretension. The quartet was executed by Hellmesberger. H. V. H.

REINHOLD, THEODOR CHRISTLIEB, born in 1682, died in 1755, was the teacher of Johann Adolf Hiller (Hüller), the composer of numerous motets, and cantor of the Kreuzkirche at Dresden from 1720 till his death. H. V. H.

REINHOLD, THOMAS, born at Dresden about 1690, was the reputed nephew, or, as some said, son, of the Archbishop of that city. He had an early passion for music, and having met Handel at the Archbishop's residence conceived so strong a liking for him that after a time he quitted his abode and sought out the great composer in London, where he appeared in various works of Handel's, after making his first appearance in July 1731 at the Haymarket Theatre as a singer in 'The Grub Street Opera.' He died in Chapel Street, Soho, in 1751.

His son, CHARLES FREDERICK, born in 1737, received his musical education first in St. Paul's and afterwards in the Chapel Royal. On Feb. 3, 1755, he made his first appearance on the stage at Drury Lane as Oberon in J. C. Smith's opera, 'The Fairies,' being announced as 'Master Reinhold.' He afterwards became organist of

St. George the Martyr, Bloomsbury. In 1759 he appeared as a bass singer at Marylebone Gardens, where he continued to sing for many seasons. He afterwards performed in English operas, and sang in oratorios, and at provincial festivals, etc. He was especially famed for his singing of Handel's song, 'O ruddier than the cherry.' He was one of the principal bass singers at the Commemoration of Handel in 1784. He retired in 1797, and died in Somers Town, Sept. 29, 1815. See *Musical Times*, 1877, p. 273.

W. H. H.

REINKEN, JOHANN ADAM, or JAN ADAMS REINKEN, eminent organist, born at Wilshausen in Lower Alsace, April 27, 1623, a pupil of Heinrich Scheidemann, became in 1654 organist of the church of St. Catherine at Hamburg, and retained the post till his death, Nov. 24, 1722, at the age of ninety-nine. He was a person of some consideration at Hamburg, both on account of his fine playing, and of his beneficial influence on music in general, and the Hamburg opera in particular, but his vanity and jealousy of his brother artists are severely commented on by his contemporaries. So great and so widespread was his reputation that Sebastian Bach frequently walked to Hamburg from Lüneburg (1700 to 1703), and Cöthen (1720), to hear him play. Reinken may be considered the best representative of the North-German school of organists of the 17th century, whose strong points were, not the classic placidity of the South-German school, but great dexterity of foot and finger, and ingenious combinations of the stops. His compositions are loaded with passages for display, and are defective in form, both in individual melodies and general construction. His works are very scarce; 'Hortus Musicus,' for two violins, viol da gamba and bass (Hamburg, 1704) is reprinted as No. XIII. of the publications of the Maatschappij tot bevordering der Toonkunst (Amsterdam, 1887). No. XIV. of the same publication consists of Reinken's 'Partite Diverse' (variations), but even in MS. only very few pieces are known—two on Chorales, one Toccata, and two sets of Variations (for Clavier).¹ Of the first of these, one—on the chorale 'An Wasserflüssen Babylons'—is specially interesting, because it was by an extempore performance on that chorale at Hamburg in 1722 that Bach extorted from the venerable Reinken the words, 'I thought that this art was dead, but I see that it still lives in you.' Two organ fugues, a toccata in G, Variations on chorales and on a 'ballet,' etc. are in MSS. at Dresden, Leipzig, and Darmstadt. (See the *Tijdschrift* of the Vereeniging voor N.-Nederlands Muziekgeschiedenis, vi. pp. 151-8, the *Quellen-Lexikon*, etc.) A. M.

REINTHALER, KARL MARTIN, conductor of the Private Concerts at Bremen, born Oct. 13, 1822, at Erfurt, was early trained in music

by G. A. Ritter, then studied theology in Berlin, but after passing his examination, devoted himself entirely to music, and studied with A. B. Marx. His first attempts at composition, some psalms sung by the Cathedral choir, attracted the attention of King Frederick William IV., and procured him a travelling grant. He visited Paris, Milan, Rome, and Naples, taking lessons in singing from Gheraldi and Bordogni. On his return in 1853 he obtained a post in the Conservatorium of Cologne, and in 1858 became organist in the Cathedral of Bremen, and conductor of the Singakademie. He had already composed an oratorio, 'Jephtha' (performed in London by Hullah, April 16, 1856, and published with English text by Novellos), and in 1875 his opera 'Edda' was played with success at Bremen, Hanover, and elsewhere. His 'Bismarck-hymn' obtained the prize at Dortmund, and he composed a symphony, and a large number of part-songs. [He was a member of the Berlin Academy from 1882, and had the title of Royal Professor in 1888. His cantata 'In der Wüste' had a great success, and his opera 'Käthchen von Heilbronn' received a prize at Frankfurt. He retired from the Singakademie in 1890, and died at Bremen, Feb. 13, 1896.]

F. G.

REISSIGER, KARL GOTTLIEB, son of Christian Gottlieb Reissiger, who published three symphonies for full orchestra in 1790. Born Jan. 31, 1798, at Belzig near Wittenberg, where his father was Cantor, he became in 1811 a pupil of Schicht at the Thomaschule, Leipzig. In 1818 he removed to the University with the intention of studying theology, but some motets composed in 1815 and 1816 had already attracted attention, and the success of his fine baritone voice made him determine to devote himself to music. In 1821, he went to Vienna and studied opera thoroughly. Here also he composed 'Das Rockenweibchen.' In 1822 he sang an aria of Handel's, and played a PF. concerto of his own composition at a concert in the Kärnthnerthor theatre. Soon after he went to Munich, where he studied with Peter Winter, and composed an opera, 'Dido,' which was performed several times at Dresden under Weber's conductorship. At the joint expense of the Prussian government and of his patron von Altenstein, a musician, he undertook a tour in 1824 through Holland, France, and Italy, in order to report on the condition of music in those countries. On his return he was commissioned to draw up a scheme for a Prussian national Conservatorium, but at the same time was offered posts at the Hague and at Dresden. The latter he accepted, replacing Marschner at the opera, where he laboured hard, producing both German and Italian operas. In 1827 he succeeded C. M. von Weber as conductor of the German Opera

¹ Spitta's *Bach*, Engl. transl. i. 197-9.

at Dresden. Among his operas, 'Ahnschatz' (1824), 'Libella,' 'Turandot,' 'Adels de Foix,' and 'Der Schiffbruch von Medusa,' had great success in their day, but the term 'Capellmeistermusik' eminently describes them, and they have almost entirely disappeared. The overture to the 'Felsenmühle,' a spirited and not uninteresting piece, was occasionally played. Masses and church music [an oratorio, 'David'], a few Lieder, numerous chamber compositions, particularly some graceful and easy trios for PF. violin and violoncello, made his name very popular for a period. He is generally supposed to have been the composer of the piece known as 'Weber's Last Waltz.' Reissiger died Nov. 7, 1859, and was succeeded at Dresden by Julius Rietz. R. G.

REISSMANN, AUGUST, musician and writer on music, born Nov. 14, 1825, at Frankenstein, Silesia, was grounded in music by Jung, the Cantor of his native town. In 1843 he removed to Breslau, and there had instruction from Mosewius, Baumgart, Ernst Richter, Lüstner, and Kahl, in various branches, including pianoforte, organ, violin, and violoncello. He at first proposed to become a composer, but a residence in 1850-52 at Weimar, where he came in contact with the new school of music, changed his plans and drove him to literature. His first book was *Von Bach bis Wagner* (Berlin, 1861); rapidly followed by a historical work on the German song, *Das deutsche Lied*, etc. (1861), rewritten as *Geschichte des Deutschen Liedes* (1874). This again was succeeded by his General History of Music—*Allg. Geschichte der Musik* (3 vols. 1864, Leipzig), with a great number of interesting examples; *Allg. Musiklehre* (1864); and *Lehrbuch der musik. Kompositionen* (3 vols. Berlin, 1866-71). His later works were of a biographical nature, attempts to show the gradual development of the life and genius of the chief musicians—Schumann (1865), Mendelssohn (1867), Schubert (1873), Haydn (1879), Bach (1881), Handel (1882), Gluck (1882), Weber (1883). In 1877 he published a volume of lectures on the history of music, delivered in the Conservatorium of Berlin, where he resided from 1863. His chief employment from 1871 was the completion of the *Musik Conversationslexikon*, in which he succeeded Mendel as editor, after the death of the latter. The 11th volume, completing the work, appeared in 1879, and it will long remain as the most comprehensive lexicon of music. Dr. Reissmann unfortunately thought it necessary to oppose the establishment of the Hochschule in 1875, and to enforce his opposition by a bitter pamphlet, which, however, has long since been forgotten. Many treatises on musical education were written in the later part of his life. As a practical musician Dr. Reissmann was almost as industrious as he was in literature. The operas, 'Gudrun' (Leipzig, 1871), 'Die Bür-

germeisterin von Schorndorf' (Leipzig, 1880), and 'Das Gralspiel' (Düsseldorf, 1895), a ballet, 'Der Blumen Rache' (1887), a work for singing and speaking soloists, with choir and piano, 'König Drosselbart' (1886), dramatic scenes, an oratorio, 'Wittekind' (1888), a concerto and a suite for solo violin and orchestra; two sonatas for pianoforte and violin; and a great quantity of miscellaneous pieces for piano solo and for the voice are mentioned. In 1881 he edited an Illustrated History of German music. [He died in Berlin, Dec. 1, 1903.] G.

RELATION is a general term implying connection between two or more objects of consideration, through points of similarity and contrast. In other words, it is the position which such objects appear to occupy when considered with reference to one another. It is defined by its context.

The relations of individual notes to one another may be described in various ways. For instance, they may be connected by belonging to or being prominent members of the diatonic series of any one key, and contrasted in various degrees by the relative positions they occupy in that series. A further simple relation is established by mere proximity, such as may be observed in the relations of grace-notes, appoggiaturas, turns, and shakes to the essential notes which they adorn; and this is carried so far that notes alien to the harmony and even to the key are freely introduced, and are perfectly intelligible when in close connection with characteristic diatonic notes. The relations of disjunct notes may be found, among other ways, by their belonging to a chord which is easily called to mind; whence the successive sounding of the constituents of familiar combinations is easily realised as melody; while melody which is founded upon less obvious relations is not so readily appreciated.

The relations of chords may be either direct or indirect. Thus they may have several notes in common, as in Ex. 1, or only one, as in Ex. 2,

to make simple direct connection, while the diversity of their derivations, or their respective degrees of consonance and dissonance, afford an immediate sense of contrast. Or they may be indirectly connected through an implied chord or note upon which they might both converge; as the common chord of D to that of C through G, to which D is Dominant, while G in its turn is Dominant to C (Ex. 3). The relation thus established is sufficiently clear to allow the major chord of the supertonic and its minor seventh and major and minor ninth to be systematically affiliated in the key, though its

third and minor ninth are not in the diatonic series.

A further illustration of the relations of chords is afforded by those of the Dominant and Tonic. They are connected by their roots being a fifth apart, which is the simplest interval, except the octave, in music; but their other components are entirely distinct, as is the compound tone of the roots, since none of their lower and more characteristic harmonies are coincident. They thus represent the strongest contrast in the diatonic series of a key, and when taken together define the tonality more clearly than any other pair of chords in its range.

The relations of keys are traced in a similar manner; as, for instance, by the tonic and perfect fifth of one being in the diatonic series of another, or by the number of notes which are common to both. The relations of the keys of the minor third and minor sixth to the major mode (as of E_b and A_b with reference to C) are rendered intelligible through the minor mode; but the converse does not hold good, for the relations of keys of the major mediant or submediant to the minor mode (as of E minor and A minor with reference to C minor) are decidedly remote, and direct transition to them is not easy to follow. In fact the modulatory tendency of the minor mode is towards the connections of its relative major rather than to those of its actual major, while the outlook of the major mode is free on both sides. The relation of the key of the Dominant to an original Tonic is explicable on much the same grounds as that of the chords of those notes. The Dominant key is generally held to be a very satisfactory complementary or contrast in the construction of a piece of music of any sort, but it is not of universal cogency. For instance, at the very outset of any movement it is almost inevitable that the Dominant harmony should early and emphatically present itself; hence when a fresh section is reached it is sometimes desirable to find another contrast to avoid tautology. With some such purpose the keys of the mediant or submediant have at times been chosen, both of which afford interesting phases of contrast and connection; the connection being mainly the characteristic major third of the original tonic, and the contrast being emphasised by the sharpening of the Dominant in the first case, and of the Tonic in the second. The key of the subdominant is avoided in such cases because the contrast afforded by it is not sufficiently strong to have force in the total impression of the movement.

The relations of the parts of any artistic work are in a similar manner those of contrast within limits of proportion and tonality. For instance, those of the first and second section in what is called 'first movement' or 'sonata' form are based on the contrast of complementary

tonalities as part of the musical structure, on the one hand; and on contrast of character and style in the idea on the other; which between them establish the balance of proportion. The relation of the second main division—the 'working-out' section—to the first part of the movement is that of greater complexity and freedom in contrast to regularity and definiteness of musical structure, and fanciful discussion of characteristic portions of the main subjects in contrast to formal exposition of complete ideas; and the final section completes the cycle by returning to regularity in the recapitulation.

The relations of the various movements of a large work to one another are of similar nature. The earliest masters who wrote Suites and Sonate da Camera or da Chiesa had but a rudimentary and undeveloped sense of the relative contrasts of keys; consequently they contented themselves with connecting the movements by putting them all in the same key, and obtained their contrasts by alternating quick and slow movements or dances, and by varying the degrees of their seriousness or liveliness: but the main outlines of the distribution of contrasts are in these respects curiously similar to the order adopted in the average modern Sonata or Symphony. Thus they placed an allegro of a serious or solid character at or near the beginning of the work, as typified by the Allemande; the slow or solemn movement came in the middle, as typified by the Sarabande; and the conclusion was a light and gay quick movement, as typified by the Gigue. And further, the manner in which a Courante usually followed the Allemande, and a Gavotte or Bourrée or Passepied, or some such dance, preceded the final Gigue, has its counterpart in the Minuet or Scherzo of a modern work, which occupies an analogous position with respect either to the slow or last movement. In modern works the force of additional contrast is obtained by putting central movements in different but allied keys to that of the first and last movements; the slow movement most frequently being in the key of the Subdominant. At the same time additional bonds of connection are sometimes obtained, both by making the movements pass without complete break from one to another, and in some cases (illustrated by Beethoven and Schumann especially) by using the same characteristic features or figures in different movements.

The more subtle relations of proportion, both in the matter of the actual length of the various movements and their several sections, and in the breadth of their style; in the congruity of their forms of expression and of the quality of the emotions they appeal to; in the distribution of the qualities of tone, and even of the groups of harmony and rhythm, are all of equal importance, though less easy either to appreciate or to effect, as they demand higher degrees of artistic power and perception; and the proper

adjustment of such relations is as vital to operas, oratorios, cantatas, and all other forms of vocal music, as to the purely instrumental forms.

The same order of relations appears in all parts of the art; for instance, the alternation of discord and concord is the same relation, implying contrast and connection, analogous to the relation between suspense or expectation and its relief; and, to speak generally, the art of the composer is in a sense the discovery and exposition of intelligible relations in the multifarious material at his command, and a complete explanation of the word would amount to a complete theory of music. C. H. H. P.

RELATIVE is the word used to express the connection between a major and a minor key which have the same signature; A minor is the 'relative' minor of C, C the 'relative' major of A minor. In other words, the relative minor of any key is that which has its keynote on the submediant of the major key. The term is used to distinguish this minor key from the other, which is perhaps as closely allied to the major, that which has the same keynote as the major, and is consequently called the 'tonic' minor. The 'tonic' minor of C is C minor, the 'tonic' major of C minor is C; in this case, the key-signature is of course changed. M.

RELLSTAB, JOHANN KARL FRIEDRICH, was born in Berlin, Feb. 27, 1759. His father, a printer, wished him to succeed to the business, but from boyhood his whole thoughts were devoted to music. He was on the point of starting for Hamburg to complete, with Emanuel Bach, his musical studies begun with Agrioola and Fasch, when the death of his father forced him to take up the business. He added a music-printing and publishing branch; was the first to establish a musical lending library (1783); founded a Concert-Society, on the model of Hiller's at Leipzig, and called it 'Concerts for connoisseurs and amateurs,' an unusually distinctive title for those days. The first concert took place April 16, 1787, at the Englisches Haus, and in course of time the following works were performed; Salieri's 'Arnida,' Schulz's 'Athalia,' Naumann's 'Cora,' Hasse's 'Conversione di San Agostino,' Bach's 'Magnificat,' and Gluck's 'Alceste,' which was thus first introduced to Berlin. The Society at last merged in the Singakademie. He wrote musical critiques for the Berlin paper, signed with his initials; and had concerts every other Sunday during the winter at his own house, at which such works as Haydn's 'Seasons' were performed; but these meetings were stopped by the entry of the French in 1806, when he frequently had twenty men and a dozen horses quartered on him; lost not only his music but all his capital, and had to close his printing-press. In time, he resumed his concerts; in

1809 gave lectures on harmony; in 1811 travelled to Italy. Not long after his return he was struck with apoplexy while walking at Charlottenburg, August 19, 1813, and was found dead on the road some hours afterwards. As a composer he left three cantatas, a 'Passion,' a Te Deum, and a Mass. Also an opera; songs too numerous to specify; vocal scores of Graun's 'Tod Jesu,' and Gluck's 'Iphigénie'; and a German libretto of Gluck's 'Orphée' apparently from his own pen. Of instrumental music he published—marches for PF., symphonies and overtures; a series of pieces with characteristic titles, 'Obstinacy,' 'Sensibility,' etc.; twenty-four short pieces for PF., violin and bass, etc. Also *Versuch über die Vereinigung der mus. und oratorischen Deklamation* (1785); *Ueber die Bemerkungen einer Reisenden . . .* (1789) (see REICHARDT); and *Anleitung für Clavierspieler* (1790). These works, for the most part bibliographical curiosities, are very instructive.

Relstab had three daughters, of whom CAROLINE, born April 18, 1794, died Feb. 17, 1813, was a singer, distinguished for her extraordinary compass. His son,

HEINRICH FRIEDRICH LUDWIG, born April 13, 1799, in Berlin, though delicate in health, and destined for practical music, was compelled by the times to join the army, where he became ensign and lieutenant. In 1816, after the peace, he took lessons on the piano from Ludwig Berger, and in 1819 and 1820 studied theory with Bernhard Klein. At the same time he taught mathematics and history in the Brigadeschule till 1821, when he retired from the army to devote himself to literature, ultimately settling in Berlin (1823). He also composed much part-music for the 'jüngere Liedertafel,' which he founded in conjunction with G. Reichardt in 1819, wrote a libretto, 'Dido,' for B. Klein, and contributed to Marx's *Musikzeitung*. A pamphlet on Madame Sontag (*Henriette, oder die schöne Sängerin*) procured him three months' imprisonment in 1826, on account of its satirical allusions to a well-known diplomatist. In 1826 he joined the staff of the *Vossische Zeitung*, and in a short time completely led the public opinion on music in Berlin. His first article was a report on a performance of 'Euryanthe,' Oct. 31, 1826. Two years later he wrote a cantata for Humboldt's congress of physicists, which Mendelssohn set to music.

Relstab was a warm supporter of classical music, and strongly condemned all undue attempts at effect. He quarrelled with Spontini over his 'Agnes von Hohenstauffen' (Berlin *Musikalische Zeitung* for 1827, Nos. 23, 24, 26, and 29), and the controversy was maintained with much bitterness until Spontini left Berlin, when Relstab, in his pamphlet *Ueber mein Verhältniss als Kritiker zu Herrn Spontini*, (1827) acknowledged that he had gone too far.

Reilstab's novels and essays are to be found for the most part in his *Gesammelte Schriften*, 24 vols. (Leipzig, Brockhaus). A musical periodical, *Iris im Gebiet der Tonkunst*, founded by him in 1830, survived till 1842. His recollections of Berger, Schroeder-Devrient, Mendelssohn, Klein, Dehn, and Beethoven (whom he visited in March 1825) will be found in *Aus meinem Leben* (2 vols, Berlin, 1861). He was thoroughly eclectic in his taste for music, and, though not an unconditional supporter, was no opponent of the modern school of Liszt and Wagner. He died during the night of Nov. 27, 1860. F. G.

REMBT, JOHANN ERNST, was born in 1749 or 1750 at Suhl, in the Thüringer-Wald, where in 1773 he was also appointed organist, and remained till his death on Feb. 26, 1810. He was distinguished as a performer, and, devoting himself to the study of the works of Sebastian Bach, he worthily upheld the more solid traditions of the Bach school of organ-playing against the prevailing shallowness of his time. Messrs. Breitkopf & Härtel still retain in their catalogue some of his works originally published by them, such as his six Fugued Chorale-preludes, six Organ Trios, and various Chorale-preludes in Trio-form. Various Fughettas for the Organ also appear in Volkmar's 'Orgel-Album.' J. R. M.

REMÉNYI, EDUARD (real name HOFFMANN), a famous violinist, was born in 1830 at Heves (according to another account at Miskolc) in Hungary, and received his musical education at the Vienna Conservatorium during the years 1842-45, where his master on the violin was Joseph Böhm, the famous teacher of Joachim. In 1848 he took an active part in the insurrection, and became adjutant to the famous general Görgey, under whom he took part in the campaign against Austria. After the revolution had been crushed he had to fly the country, and went to America, where he resumed his career as a virtuoso. [The details of his German tour in 1852-53, which indirectly had so great an influence on the career of Brahms, may be read in Florence May's *Life of Brahms*, vol. i. pp. 92-104.] In 1853 he went to Liszt in Weimar, who at once recognised his genius and became his artistic guide and friend. In the following year he came to London and was appointed solo violinist to Queen Victoria. In 1855 he was in America, and in 1860 he obtained his amnesty and returned to Hungary, where some time afterwards he received from the Emperor of Austria a similar distinction to that granted him in England. After his return home he seems to have retired for a time from public life, living chiefly on an estate he owned in Hungary. In 1865 he appeared for the first time in Paris, where he created a perfect furore. Repeated tours in Germany, Holland, and Belgium further spread his fame. In 1875 he settled temporarily in

Paris, and in the summer of 1877 came to London, where also he produced a sensational effect in private circles. The season being far advanced he appeared in public only once, at Mapleson's benefit concert at the Crystal Palace, where he played a fantasia on themes from the 'Huguenots.' In the autumn of 1878 he again visited London, and played at the Promenade Concerts. He was on his way to America, where he gave concerts and took up his residence. In 1887 he undertook a tour of the world, in the course of which he appeared in private in London in 1891 and 1893. As an artist he combined perfect mastery over the technical difficulties of his instrument with a strongly pronounced individuality. His soul was in his playing, and his impulse carried him away as he warmed to his task, the impression produced on the audience being accordingly in an ascending scale. Another important feature in Reményi's playing was the national element. He strongly maintained against Liszt the genuineness of Hungarian music, and showed himself thoroughly imbued with that spirit by writing several 'Hungarian melodies,' which have been mistaken for popular tunes and adopted as such by other composers. The same half-Eastern spirit was observable in the strong rhythmical accentuation of Reményi's style, so rarely attained by artists of Teutonic origin. Reményi's compositions are of no importance, being mostly confined to arrangements for his instrument, and other pieces written for his own immediate use. [His name is known to music-lovers in the present day by the circumstance that Brahms went on a tour with him as his accompanist, and was 'discovered' by Joachim in this capacity. Reményi died during a concert at which he was playing at San Francisco, May 15, 1898.] E. H.-A.

REMOTE is a term used in speaking of modulation from one key to another, or in regard to the succession of keys in a work in several movements. A remote key has little in common with the key which may be called the starting-point. Thus a key with many sharps or flats in the signature will probably be very 'remote' from the key of C. In the early days of the harmonic period, the nearest keys to a major key were considered to be its dominant, subdominant, relative and tonic minors; and the nearest to a minor key were its relative and tonic majors, the dominant major, and the subdominant minor. As the art progressed, it was gradually admitted that keys which stood to each other in the relation of a third, whether major or minor, were not to be considered remote from each other. Beethoven, in the piano sonata in C, op. 2, No. 3, puts his slow movement into the key of E major; in op. 106, in B flat, the slow movement is in F sharp minor; and Schubert, in his sonata in the same key, employs C sharp minor for his slow move-

ment; the connection, in this last instance, is attained by a kind of unconscious mental process, involving a silent modulation through the key of the tonic minor, B flat minor, and its relative major, C sharp major. This is an unusual succession of keys, even with Schubert; but other examples, quite as strange, are in Beethoven's 'posthumous' quartets, and elsewhere. Of the eleven semitones apart from the keynote, six were now accepted as within the scope of modulation without a long and complex process; two others, the whole tone above and below the keynote, involve a double modulation, the tone above being the dominant of the dominant, and the tone below being the subdominant of the subdominant. There remain, therefore, three keys which are very remote, the semitone above and below the keynote, and the augmented fourth of the key. Even these are nowadays brought within fairly easy distance, by the fact that for the semitone above, it is only necessary to regard the keynote as the leading-note of the new key; and for the semitone below, a 'Phrygian cadence' (such as is figured in the last two examples in vol. i. p. 436, column *a*) may be imagined. The semitone above the keynote is used for the slow movement of Brahms's sonata for violoncello and piano, op. 99, in F, where F sharp major is the key chosen for the slow movement. As transition to the augmented fourth of the key involves several steps of modulation, this may be considered the most remote part of the octave. (It is not quite obvious why minor keys should almost always be remote from other minor keys, but they certainly are, from almost all excepting the key of their subdominant minor. See RELATION.) In relation to any given major keynote, we may recognise four degrees of proximity, besides its relative and tonic minors. In relation to the key of C, the notes F and G stand nearest of all; next come E flat, E, A flat and A, as standing in the relation of thirds, major or minor; next, as requiring a double modulation, D and B flat; and farthest of all, C sharp, B, and F sharp, the last being the extreme of remoteness. Before equal temperament was a part of practical music, the inherent error in the scale was confined by tuners to the 'remote' keys, that term being used simply of the keys which had many sharps or flats, leaving the key of C perfectly in tune, and F and G almost perfect. M.

RÉMY, W. A., the name by which an eminent musician and teacher in Prague preferred to be known. His real name was Wilhelm Mayer, and he was the son of a lawyer in Prague, where he was born, June 10, 1831. A pupil of C. F. Pietsch, he appeared at the age of seventeen years as the composer of an overture to Sue's 'Fanatiker in den Cevennen'; but in obedience to the parental desires, he studied law, took the degree of Dr. Jur. in 1856, and did not take up music as his profession until 1862, when he

became conductor of the Steiermärkische Musikverein, and earned experience as an orchestral director. He kept the post till 1870, composing many orchestral works during the period, among them an overture to 'Sardanapalus,' and a symphonic poem, 'Helena,' as well as his first symphony in F. The three works made their way as far as Leipzig, where they were received with great success. From the date of his resignation he lived as an unofficial teacher, and devoted himself to composition, until his death at Prague, Jan. 22, 1898. His works include two more symphonies (in F and E flat), a 'Phantasiestück' for orchestra, given at the Vienna Philharmonic concerts under Dessoff; a 'Slawische Liederspiel' for solos and chorus, with accompaniment of two pianos, another work of the same kind, 'Oestliche Rosen,' a concert-opera, 'Waldfräulein,' and many songs, etc. Among his most eminent pupils may be mentioned Busoni, Kienzl, Heuberger, von Reznicek, and Felix Weingartner. (*Neue Musik-Zeitung*, 1890, p. 261.) M.

RENAUD, MAURICE ARNOLD, born 1862, at Bordeaux, studied singing at the Conservatoire, Paris, and subsequently at that of Brussels. From 1883 to 1890 he sang at the Monnaie, Brussels, in a variety of parts, making a great impression; on Jan. 7, 1884, as the High Priest in Reyer's 'Sigurd,' and on Feb. 10, 1890, as Hamlet in Reyer's 'Salammbô,' on production of these operas; he also sang baritone or bass parts in 'Manon,' 'Lakmé,' etc., and as Kothner in 'Meistersinger.' On Oct. 12, 1890, he made his début at the Opéra-Comique, Paris, as Karnac in 'Le Roi d'Ys,' and sang on Dec. 3 as the hero of Diaz's new opera 'Benvenuto.' On July 17, 1891, he made a very successful début at the Opéra as Nelusko, and remained there until 1902. On Feb. 29, 1892, he sang the modest part of Leuthold, in 'Tell,' at the Rossini centenary; he added to his repertory the parts of Telramund, Wolfram, Iago, Beckmesser, Hilperic in Guiraud's 'Frédégonde,' completed by Saint-Saëns, the Shepherd in Bruneau's 'Messidor,' and, on Nov. 15, 1899, Chorèbe in Berlioz's 'Prise de Troie.' On leave of absence, on June 23, 1897, he made his début at Covent Garden as Wolfram and De Nevers in selections from 'Tannhäuser' and 'Huguenots,' at the State performance in honour of the Diamond Jubilee of Queen Victoria; and in the same season he sang the above parts, Don Juan, and Juan in D'Erlanger's 'Inez Mendo.' He fully confirmed his Parisian reputation by his fine voice and presence, and excellent singing and acting. From 1898 to 1905 he has re-appeared here frequently at the above theatre, singing the part of Henry VIII. in Saint-Saëns's opera, July 19, 1898, that of Hares in De Lara's 'Messaline,' July 13, 1899; and appearing as Hamlet, Rigoletto, Valentine, Escamillo, etc. In 1903 M. Renand

sang at the Gaité, in Paris, as Herod in Massenet's 'Hérodiade,' and both there, and at the Opéra-Comique in 1904 as Don Juan, and the Flying Dutchman, always with great success. He sang at Monte Carlo in 1907 in Bruneau's 'Nais Micoulin.' A. C.

RENCONTRE IMPRÉVUE. See PILGRIME VON MEKKA.

RENDANO, ALFONSO, born April 5, 1853, at Carolei, near Cosenza, studied first at the Conservatorio at Naples, then with Thalberg, and lastly at the Leipzig Conservatorium. He played at the Gewandhaus with marked success on Feb. 8, 1872. He then visited Paris and London, performed at the Musical Union (April 30, 1872), the Philharmonic (March 9, 1873), the Crystal Palace, and other concerts, and much in society; and after a lengthened stay returned to Italy. He was a graceful and refined player, with a delicate touch, and a great command over the mechanism of the piano. His playing of Bach was especially good. He published some piano pieces of no importance. G.

REPEAT, REPETIZIONE, REPLICA (Ger. *Wiederholung*; Fr. *Répétition*, which also means 'rehearsal'). In the so-called sonata form, there are certain sections which are repeated, and are either written out in full twice over, or are written only once, with the sign  at the

end, which shows that the music is to be repeated either from the beginning or from the previous occurrence of the sign. The sections which, according to the strict rule, are repeated, are—the first section of the first movement, both sections of the minuet or scherzo at their first appearance, and both sections of the trio, after which the minuet or scherzo is gone once straight through without repeats. The latter half of the first movement, and the first, or even both, of the sections in the last movement, may be repeated; see for instance Beethoven's Sonatas, op. 2, No. 2; op. 10, No. 2; op. 78; Schubert's Symphony No. 9. Also, where there is an air and variations, both sections of the air and of all the variations, should, strictly speaking, be repeated. This undoubtedly arose from the facility with which on a good harpsichord the player could vary the qualities of tone, by using different stops; and there was a tradition that, on that instrument, a change of 'register' should be made at every repetition. Although it is a regular custom not to play the minuet or scherzo, after the trio, with repeats, Beethoven thinks fit to draw attention to the fact that it is to be played straight through, by putting after the trio the words 'Da Capo senza repetizione,' or 'senza replica,' in one or two instances, as in op. 10, No. 3, where, moreover, the trio is not divided into two sections, and is not repeated; in op. 27, No. 2, where the Allegretto is marked 'La prima parte senza repetizione' (the first part without repeat). In his Fourth and Seventh Symphonies he has

given the trio twice over each time with full repeats. M.

RÉPÉTITION. (Fr.) REHEARSAL.

REPETITION (PIANOFORTE). The rapid reiteration of a note is called repetition; a special touch of the player facilitated by mechanical contrivances in the pianoforte action; the earliest and most important of these having been the invention of SEBASTIAN ERARD. [See the diagram and description of Erard's action under PIANOFORTE, vol. iii. p. 730.] By such a contrivance the hammer, after the delivery of a blow, remains poised, or slightly rises again, so as to allow the hopper to fall back and be ready to give a second impulse to the hammer before the key has nearly recovered its position of rest. The particular advantages of repetition to grand pianos have been widely acknowledged by pianoforte makers, and much ingenuity has been spent in inventing or perfecting repetition actions for them; in upright pianos, however, the principle has been rarely employed, although its influence has been felt and shown by care in the position of the 'check' in all check action instruments. The French have named the mechanical power to repeat a note rapidly, 'double échappement'; the drawbacks to double escapement—which the repetition really is—are found in increased complexity of mechanism and liability to derangement. These may be overrated, but there always remains the drawback of loss of tone in repeated notes; the repetition blow being given from a small depth of touch compared with the normal depth, is not so elastic and cannot be delivered with so full a *forte*, or with a *piano* or *pianissimo* of equally telling vibration. Hence, in spite of the great vogue given to repetition effects by Herz and Thalberg, other eminent players have disregarded them, or have even been opposed to repetition touches, as Chopin and von Bülow were; see p. 7, § 10 of the latter's commentary on selected studies by Chopin (Aibl, Munich, 1880), where he designates double escapement as a 'deplorable innovation.'

A fine example of the best use of repetition is in Thalberg's A minor Study, op. 45—

where the player, using the first two fingers and thumb in rapid succession on each note, produces by these triplets almost the effect of a sustained melody with a tremolo. Repetition is an old device with stringed instruments, having been, according to Bunting, a practice with the Irish harpers, as we know it was with the common dulcimer, the Italian mandoline, and the Spanish bandurria.

A remarkable instance may be quoted of the

effective use of repetition in the Fugato (piano solo) from Liszt's 'Todtentanz' (Danse Macabre).

Vivace.

But there need be no difficulty in playing this on a well-regulated and checked single escapement. With a double escapement the nicety of checking is not so much required. A. J. H.

REPORTS (the word seems not to be used in the singular), an old English and Scottish term for points of imitation. From the eight examples in the Scottish Psalter of 1635 (reprinted in the Rev. Neil Livingston's edition, 1864) it would seem that the term was used in a more general sense, of a setting of certain tunes in which the parts moved in a kind of free polyphony, not in strictly imitative style. In Purcell's revision of the treatise which appears in the third part of Playford's *Introduction to the Skill of Musick* (twelfth edition, 1694), the term is mentioned but not explained, further than as being synonymous with 'imitation': 'The second is *Imitation* or *Reports*, which needs no Example.' (See *Sammelbände der Int. Mus. Ges.* vi. p. 562.) M.

REPRISE, repetition; a term which is occasionally applied to any repetition in music, but is most conveniently confined to the recurrence of the first subject of a movement after the conclusion of the working out or *Durchführung*. [In Couperin, Rameau, and other French composers, the term is used of a short refrain at the end of a movement, which was probably intended to be played over more than twice, as sometimes it contains the ordinary marks of repetition within the passage covered by the word.] G.

REQUIEM (Lat. *Missa pro Defunctis*; Ital. *Messa per i Defunti*; Fr. *Messe des Morts*; Germ. *Todtenmesse*). A solemn Mass, sung annually, in Commemoration of the Faithful Departed, on All Souls' Day (Nov. 2); and, with a less general intention, at funeral services, on the anniversaries of the decease of particular persons, and on such other occasions as may be dictated by feelings of public respect or individual piety.

The Requiem takes its name¹ from the first word of the Introit—'Requiem aeternam dona eis, Domine.' When set to music, it naturally arranges itself in nine principal sections: (1) The Introit—'Requiem aeternam'; (2) the 'Kyrie'; (3) the Gradual, and Tract—'Requiem aeternam,' and 'Absolve, Domine'; (4) The Sequence or Prose—'Dies irae'; (5) The Offertorium—'Domine Jesu Christi'; (6) the Sanc-

tus'; (7) the 'Benedictus'; (8) the 'Agnus Dei'; and (9) the Communio—'Lux aeterna.' To these are sometimes added (10) the Responsorium, 'Libera me,' which, though not an integral portion of the Mass, immediately follows it, on all solemn occasions; and (11) the Lectio—'Taedet animam meam,' of which we possess at least one example of great historical interest.

The Plain-song Melodies adapted to the nine divisions of the mass will be found in the Gradual, together with that proper for the Responsorium. The Lectio, which really belongs to a different Service, has no proper Melody, but is sung to the ordinary 'Tonus Lectionis.' [See INFLEXION.] The entire series of Melodies is of rare beauty, and produces so solemn an effect, when sung in unison by a large body of grave equal voices, that most of the great polyphonic composers have employed its phrases more freely than usual, in their Requiem Masses, either as Canti fermi, or in the form of unisonous passages interposed between the harmonised portions of the work. Compositions of this kind are not very numerous; but most of the examples we possess must be classed among the most perfect productions of their respective authors.

Palestrina's 'Missa pro Defunctis,' for five voices, first printed at Rome in 1591, in the form of a supplement to the Third Edition of his 'First Book of Masses,' was reproduced in 1841 by Alfieri, in the first volume of his 'Raccolta di Musica Sacra'; again, by Lafage² in a valuable 8vo volume, entitled 'Cinq Messes de Palestrina'; and by the Prince de la Moskowa in the 9th volume of his collection [see vol. iii. p. 271], and has since been included by Messrs. Breitkopf & Härtel, of Leipzig, in their complete edition. This beautiful work is, unhappily, very incomplete, consisting only of the 'Kyrie,' the 'Offertorium,' the 'Sanctus,' the 'Benedictus,' and the 'Agnus Dei.' We must not, however, suppose that the composer left his work unfinished. It was clearly his intention that the remaining movements should be sung, in accordance with a custom still common at Roman funerals, in unisonous plain-song; and, as a fitting conclusion to the whole, he has left us two settings of the 'Libera me,' in both of which the Gregorian melody is treated with an indescribable intensity of pathos.³ One of these is preserved in MS. among the archives of the Pontifical Chapel, and the other, among those of the Lateran Basilica. After a careful comparison of the two, Baini arrived at the conclusion that that belonging to the Sistine Chapel must have been composed very nearly at the same time as, and probably as an adjunct to, the five printed movements, which are also founded, more or less closely, upon the original Canti fermi, and so constructed as to bring their

¹ That is to say, its name as a special Mass. The Music of the ordinary Polyphonic Mass always bears the name of the Canto fermo on which it is founded.

² Paris, Launer et Cie; London, Schott & Co.

³ See Alfieri, *Raccolta di Musica Sacra*, tom. vii.

characteristic beauties into the highest possible relief—in no case, perhaps, with more touching effect than in the opening 'Kyrie,' the first few bars of which will be found at vol. ii. p. 613.

Next in importance to Palestrina's Requiem is a very grand one, for six voices, composed by Vittoria for the funeral of the Empress Maria, widow of Maximilian II. This fine work—undoubtedly the greatest triumph of Vittoria's genius—comprises all the chief divisions of the Mass, except the Sequence, together with the Responsorium and Lectio, and brings the plain-song subjects into prominent relief throughout. It was first published at Madrid in 1605—the year of its production. In 1869 the Lectio was reprinted at Ratisbon, by Joseph Schrems, in continuation of Proske's 'Musica Divina.' A later issue of the same valuable collection contains the Mass and Responsorium. The original volume contains one more movement—'Vere est in luctum'—which has never been reproduced in modern notation; but, as this has now no place in the Roman Funeral Service, its omission is not so much to be regretted.

Some other very fine Masses for the Dead, by Francesco Anerio, Orazio Vecchi, and Giov. Matt. Asola, are included in the same collection, together with a somewhat pretentious work by Pitoni, which scarcely deserves the enthusiastic eulogium bestowed upon it by Dr. Proske. A far finer composition, of nearly similar date, is Colonna's massive Requiem for eight voices, first printed at Bologna in 1684—a copy of which is preserved in the Library of the Royal College of Music.

Several modern Requiem Masses have become very celebrated.

(1.) The history of Mozart's last work is surrounded by mysteries which render it scarcely less interesting to the general reader than the music itself is to the student. (See vol. iii. p. 308 ff.)

(2.) For Gossec's 'Messe des Morts' see vol. ii. p. 203.

(3.) Next in importance to Mozart's immortal work are the two great Requiem Masses of Cherubini. The first of these, in C minor, was written for the Anniversary of the death of King Louis XVI. (Jan. 21, 1793), and first sung on that occasion at the Abbey Church of Saint-Denis in 1817; after which it was not again heard until Feb. 14, 1820, when it was repeated in the same church at the funeral of the Duc de Berri. Berlioz regarded this as Cherubini's greatest work. It is undoubtedly full of beauties. Its general tone is one of extreme mournfulness, pervaded throughout by deep religious feeling. Except in the 'Dies iræ' and 'Sanctus' this style is never exchanged for a more excited one; and, even then, the treatment can scarcely be called dramatic. The deep pathos of the little movement, inter-

posed after the last 'Osanna,' to fulfil the usual office of the 'Benedictus'—which is here incorporated with the 'Sanctus'—exhibits the composer's power of appealing to the feelings in its most affecting light.

The second Requiem, in D minor, for three male voices is in many respects a greater work than the first; though the dramatic element pervades it so freely that its character as a religious service is sometimes entirely lost. It was completed on Sept. 24, 1836, a few days after the composer had entered his seventy-seventh year; and, with the exception of the sixth quartet and the quintet in E minor, was his last important work. The 'Dies iræ' was first sung at the concert of the Conservatoire, March 19, 1837, and repeated on the 24th of the same month. On March 25, 1838, the work was sung throughout. In the January of that year Mendelssohn had already recommended it to the notice of the committee of the Lower Rhine Festival; and in 1872 and 1873 it was sung as a funeral service in the Roman Catholic Chapel, in Farm Street, London. It is doubtful whether Cherubini's genius ever shone to greater advantage than in this gigantic work. Every movement is full of interest; and the 'whirlwind of sound' which ushers in the 'Dies iræ' produces an effect which, once heard, can never be forgotten. W. S. R.

[Schumann's Requiem, op. 148, is of comparatively small importance; more beautiful compositions of his with the same title are the 'Requiem for Mignon,' and a song included in op. 90. These two have, of course, nothing to do with the words of the Mass which are here under discussion; nor has the famous 'German Requiem' of Brahms, which has been noticed in its own place (see vol. i. p. 384). Verdi's Requiem, written in memory of Manzoni, startled the purists when it was produced in 1874, but it gradually won the enthusiastic approval even of the most ardent classicists, for it is a masterpiece in its way. Among later Requiem Masses may be mentioned Stanford's work in memory of Lord Leighton, given at the Birmingham Festival of 1897; Henschel's expressive Requiem, written in memory of his wife, in 1902; and Sgambati's in memory of King Humbert, published 1906.]

RESIN. See COLOPHANE, and ROSIN.

RESINARIUS, BALTHASAR, is possibly, but not certainly, identical with Balthasar Harzer or Hartzer. He was born at Jessen early in the 16th century, took clerical orders and became Bishop of Leips in Bohemia about 1543. He had been a chorister in the service of the Emperor Maximilian I. He is said to have been a pupil of Isaac, and he published at Wittenberg in 1543 'Responsorium numero octoginta de tempore et festis . . . libri duo.'

RESOLUTION is the process of relieving dissonance by succeeding consonance. All dis-

sonance is irritant, and cannot be indefinitely dwelt upon by the mind, but while it is heard the return to consonance is awaited. To conduct this return to consonance in such a manner that the connection between the chords may be intelligible to the hearer is the problem of resolution.

The history of the development of harmonic music shows that the separate idea of resolution in the abstract need not have been present to the earliest composers who introduced discords into their works. They discovered circumstances in which the flow of the parts, moving in consonance with one another, might be diversified by retarding one part while the others moved on a step, and then waited for that which was left behind to catch them up. This process did not invariably produce dissonance, but it did conduce to variety in the independent motion of the parts. The result, in the end, was to establish the class of discords we call suspensions, and their resolutions were inevitably implied by the very principle on which the device is founded. Thus when Josquin diversified a simple succession of chords in what we call their first position, as follows—

Ex. 1.

it seems sufficiently certain that no such idea as resolving a discord was present to his mind. The motion of D to C and of C to B was predetermined, and their being retarded was mainly a happy way of obtaining variety in the flow of the parts, though it must not be ignored that the early masters had a full appreciation of the actual function and effect of the few discords they did employ.

Some time later the device of overlapping the succeeding motions of the parts was discovered, by allowing some or all of those which had gone on in front to move again while the part which had been left behind passed to its destination; as by substituting (b) for (a) in Ex. 2.

Ex. 2.

This complicated matters, and gave scope for fresh progressions and combinations, but it did not necessarily affect the question of resolution, pure and simple, because the destination of this part causing the dissonance was still predetermined. However, the gradually increasing frequency of the use of discords must have habituated hearers to their effect and to the consideration of the characteristics of different groups, and so

by degrees to their classification. The first marked step in this direction was the use of the Dominant seventh without preparation, which showed at least a thorough appreciation of the fact that some discords might have a more independent individuality than others. This appears at first merely in the occasional discarding of the formality of delaying the note out of a preceding chord in order to introduce the dissonance; but it led also towards the consideration of resolution in the abstract, and ultimately to greater latitude in the process of returning to consonance. Both their instinct and the particular manner in which the aspects of discords presented themselves at first led the earlier composers to pass from a discordant note to the nearest available note in the scale, wherever the nature of the retardation did not obviously imply the contrary; and this came by degrees to be accepted as a tolerably general rule. Thus the Dominant seventh is generally found to resolve on the semitone below; and this, combined with the fact that the leading note was already in the chord with the seventh, guided them to the relation of Dominant and Tonic chords; although they early realised the possibility of resolving on other harmony than that of the Tonic, on special occasions, without violating the supposed law of moving the seventh down a semitone or tone, according to the mode, and raising the leading note to what would have been the Tonic on ordinary occasions. However, the ordinary succession became by degrees so familiar that the Tonic chord grew to be regarded as a sort of resolution in a lump of the mass of any of the discords which were built on the top of a Dominant major concord, as the seventh and major or minor ninth, such as are now often called Fundamental discords. Thus we find the following passage in a Haydn Sonata in D—

Ex. 3.

in which the Dominant seventh is not resolved by its passing to a near degree of the scale, but by the mass of the harmony of the Tonic following the mass of the harmony of the Dominant. Ex. 4 is an example of a similar use by him of a Dominant major ninth.

Ex. 4.

A more common way of dealing with the resolution of such chords was to make the part

having the discordant note pass to another position in the same harmony before changing, and allowing another part to supply the contiguous note; as in Ex. 5 from one of Mozart's *Fantasias* in C minor.

Some theorists hold that the passage of the ninth to the third—as D \flat to E in Ex. 5a (where the root C does not appear)—is sufficient to constitute resolution. That such a form of resolution is very common is obvious from theorists having noticed it, but it ought to be understood that the mere change of position of the notes of a discord is not sufficient to constitute resolution unless a real change of harmony is implied by the elimination of the discordant note; or unless the change of position leads to fresh harmony, and thereby satisfies the conditions of intelligible connection with the discord.

A much more unusual and remarkable resolution is such as appears at the end of the first movement of Beethoven's F minor Quartet as follows—

where the chord of the Dominant seventh contracts into the mere single note which it represents, and that proceeds to the note only of the Tonic; so that no actual harmony is heard in the movement after the seventh has been sounded. An example of treatment of an inversion of the major ninth of the Dominant, which is as unusual, is the following from Beethoven's last Quartet, in F, op. 135:—

There remain to be noted a few typical devices by which resolutions are either varied or elab-

orated. One which was more common in early stages of harmonic music than at the present day was the use of representative progressions, which were, in fact, the outline of chords which would have supplied the complete succession of parts if they had been filled in. The following is a remarkable example from the *Sarabande* of J. S. Bach's *Partita* in B \flat :—

which might be interpreted as follows:—

Another device which came early into use, and was in great favour with Bach and his sons and their contemporaries, and is yet an ever-fruitle source of variety, is that of interpolating notes in the part which has what is called the discordant note, between its sounding and its final resolution, and either passing direct to the note which relieves the dissonance from the digression, or touching the dissonant note slightly again at the end of it. The simplest form of this device was the leap from a suspended note to another note belonging to the same harmony, and then back to the note which supplies the resolution, as in Ex. 10; and this form was extremely common in quite the early times of polyphonic music.

But much more elaborate forms of a similar nature were made use of later. An example from J. S. Bach will be found in vol. i. p. 314b of this Dictionary; the following example, from a *Fantasia* by Emanuel Bach, illustrates the same point somewhat remarkably, and serves also as an instance of enharmonic resolution:—

The minor seventh on C in this case is ultimately resolved as if it had been an augmented sixth composed of the same identical notes according to our system of temperament, but derived from a different source and having consequently a different context. This manner of using the same group of notes in different senses is one of the most familiar devices in modern music for varying the course of resolutions and obtaining fresh aspects of harmonic combinations. [For further examples see MODULATION, CHANGE, ENHARMONIC.]

An inference which follows from the use of some forms of Enharmonic resolution is that the discordant note need not inevitably move to resolution, but may be brought into consonant relations by the motion of other parts, which relieve it of its characteristic dissonant effect; this is illustrated most familiarly by the freedom which is recognised in the resolution of the chord of the sixth, fifth, and third on the subdominant, called sometimes the added sixth, sometimes an inversion of the supertonic seventh, and sometimes an inversion of the eleventh of the Dominant, or even a double-rooted chord derived from Tonic and Dominant together.

It is necessary to note shortly the use of vicarious resolutions—that is, of resolutions in which one part supplies the discordant note and another the note to which under ordinary circumstances it ought to pass. This has been alluded to above as common in respect of the so-called fundamental discords, but there are instances of its occurring with less independent combinations. The Gigue of Bach's Partita in E minor is full of remarkable experiments in resolution; the following is an example which illustrates especially the point under consideration:—

The inference to be drawn from the above examples is that the possible resolutions of discords, especially of those which have an individual status, are varied, but that it takes time to discover them, as there can hardly be a severer test of a true musical instinct in relation to harmony than to make sure of such a matter. As a rule, the old easily recognisable resolutions, by motion of a single degree, or at least by interchange of parts of the chord in supplying the subsequent consonant harmony, must preponderate, and the more peculiar resolutions will be reserved for occasions when greater force and intensity are required. But as the paradoxes of one generation are often the truisms of the next, so treatment of discords such as is utterly

incredible to people who do not believe in what they are not accustomed to, is felt to be obvious to all when it becomes familiar; and hence the peculiarities which are reserved for special occasions at first must often in their turn yield the palm of special interest to more complex instinctive generalisations. Such is the history of the development of musical resources in the past, and such it must be in the future. The laws of art require to be based upon the broadest and most universal generalisations; and in the detail under consideration it appears at present that the ultimate test is thorough intelligibility in the melodic progressions of the parts which constitute the chords, or in a few cases the response of the harmony representing one root to that representing another, between which, as in Examples 3 and 4, there is a recognised connection sufficient for the mind to follow without the express connection of the flow of the parts. Attempts to catalogue the various discords and their various resolutions must be futile as long as the injunction is added that such formulas only are admissible, for this is to insist upon the repetition of what has been said before; but they are of value when they are considered with sufficient generality to help us to arrive at the ultimate principles which underlie the largest circle of their multifarious varieties. The imagination can live and move freely within the bounds of comprehensive laws, but it is only choked by the accumulation of precedents.

C. H. H. P.

RESPOND (Lat. *Responsorium*) a form of ecclesiastical chant which grew out of the elaboration of the primitive RESPONSORIAL PSALMODY. Some of the Responses have been frequently treated in the Polyphonic Style, with very great effect, not only by the Great Masters of the 16th century, but even as late as the time of Colonna, whose Responsoria of the Office for the Dead, for eight voices, are written with intense appreciation of the solemn import of the text.

A large collection of very fine examples, including an exquisitely beautiful set for Holy Week, by Vittoria, will be found in vol. iv. of Proske's 'Musica Divina.' w. s. r.

RESPONSE, in English church music, is, in its widest sense, any musical sentence sung by the choir at the close of something read or chanted by the minister. The term thus includes the 'Amen' after prayers, the 'Kyrie' after each commandment in the Communion Service, the 'Doxology' to the Gospel, and every reply to a Versicle, or to a Petition, or Suffrage. In its more limited sense the first three of the above divisions would be excluded from the term, and the last-named would fall naturally into the following important groups: (1) those which immediately precede the Psalms, called also the Preces; (2) those following the Apostles' Creed and the Lord's Prayer; (3) those

following the Lord's Prayer in the Litany; (4) and the Responses of the first portion of the Litany, which, however, are of a special musical form which will be fully explained hereafter. Versicles and Responses are either an ancient formula of prayer or praise, as, 'Lord, have mercy upon us,' etc., 'Glory be to the Father,' etc., or a quotation from Holy Scripture, as,

℣ O Lord, open Thou our lips.

℞ And our mouth shall shew forth Thy praise.

which is verse 15 of Psalm li.; or a quotation from a church hymn, as,

℣ O Lord, save Thy people.

℞ And bless Thine inheritance.

which is from the *Te Deum*; or an adaptation of a prayer to the special purpose, as,

℣ Favourably with mercy hear our prayers.

℞ O Son of David, have mercy upon us.

The musical treatment of such Versicles and Responses offers a wide and interesting field of study. There can be little doubt that all the inflections or cadences to which they are set have been the gradual development of an original monotonal treatment, which in time was found to be uninteresting and tedious (whence our term of contempt 'monotonous'), or was designedly varied for use on special occasions and during holy seasons. [See INFLEXION.]

The word 'Alleluia' is found as a Response in the Prayer-Book of 1549, for use between Easter and Trinity, immediately before the Psalms; during the remainder of the year the translation of the word was used. Here is Marbeck's music for it (1550)—

Prayse ye the Lorde.

When this was in later editions converted into a Versicle and Response, as in our present Prayer-Book, the music was, according to some uses, divided between the Versicle and Response, thus—

℣ Praise ye the Lord. ℞ The Lord's name be praised.

But as a matter of fact these 'Preces' in our Prayer-Book which precede the daily Psalms have never been strictly bound by the laws of 'ecclesiastical chant,' hence, not only are great varieties of plain-song settings to be met with, gathered from Roman and other uses, but also actual settings in service-form (that is, like a motet), containing contrapuntal devices in four or more parts. Nearly all the best cathedral libraries contain old examples of this elaborate treatment of the Preces, and several have been printed by Dr. Jebb in his 'Choral Responses.'

As then the Preces are somewhat exceptional, we will pass to the more regular Versicles and Responses, such as those after the Apostles'

Creed and the Lord's Prayer. And here we at once meet the final 'fall of a minor third,' which is an ancient form of inflection known as the *Accentus*

Medialis—

This is one of the most characteristic progressions in plain-song versicles, responses, confessions, etc. It must have already struck the reader that this is nothing more or less than the 'note' of the cuckoo. This fact was probably in Shakespeare's mind when he wrote,

The finch, the sparrow, and the lark,
The plain-song cuckoo gray.

This medial accent is only used in Versicles and Responses when the last word is a polysyllable; thus—

Medial Accent.

℞ And grant us Thy salvation.

When the last word is a monosyllable or is accented on its last syllable,

Moderate Accent.

there is an additional note, thus—

℞ As we do put our trust in Thee.

This may be said to be the only law of the *Accentus Ecclesiasticus* which the tradition of our Reformed Church enforces. It is strictly observed in most of our cathedrals, and considering its remarkable simplicity, should never be broken. The word 'prayers' was formerly pronounced as a dissyllable; it therefore took the medial accent thus—

Favourably . . . our prayers.

but as a monosyllable it should of course be treated thus—

Favourably . . . our prayers.

In comparing our Versicles and Responses with the Latin from which they were translated, it is important to bear this rule as to the 'final word' in mind. Because the Latin and English of the same Versicle or Response will frequently take different 'accents' in the two languages. For example, the following Versicle takes in the Latin the *medial accent*; but in the translation will require the *moderate accent*.

Latin form.

Ab inimicis nostris defende nos Chris-te.

English form.

From our enemies defend us, O Christ.

It has been just stated that the early part of the Litany does not come under the above laws of 'accent.' The principal melodic progression is, however, closely allied to the above, it having merely an additional note, thus—

This is the old and common Response—

and to this are adapted the Responses, 'Spare us, good Lord'; 'Good Lord, deliver us'; 'We beseech Thee to hear us, good Lord'; 'Grant us Thy peace'; 'Have mercy upon us'; 'O Christ, hear us' (the first note being omitted as redundant); and 'Lord, have mercy upon us; Christ, have mercy upon us.' At this point, the entry of the Lord's Prayer brings in the old law of medial and moderate accents; the above simple melody, therefore, is the true Response for the whole of the first (and principal) portion of the Litany. It is necessary, however, to return now to the preliminary sentences of the Litany, or the 'Invocations,' as they have been called. Here we find each divided by a colon, and, in consequence, the simple melody last given is lengthened by one note, thus—

This is used without variation for all the Invocations. The asterisk shows the added note, which is set to the syllable immediately preceding the colon. It happens that each of the sentences of Invocation contains in our English version a monosyllable before the colon; but it is not the case in the Latin, therefore both Versicle and Response differ from our use, thus—

Latin.

Pater de coelis De - us.

In the petitions of the Litany, the note marked with an asterisk is approached by another addition, for instead of

The whole sentence of music therefore stands thus—

We have now shortly traced the gradual growth of the plain-song of the whole of our Litany, and it is impossible not to admire the simplicity and beauty of its construction.

But the early English church-musicians frequently composed original musical settings of the whole Litany, a considerable number of which were printed by Dr. Jebb; nearly all, however, are now obsolete except that by Thomas Wanless (organist of York Minster at the close of the 17th century), which is occa-

sionally to be heard in our northern cathedrals. The plain-song was not always entirely ignored by church-musicians, but it was sometimes included in the tenor part in such a mutilated state as to be hardly recognisable. It is generally admitted that the form in which Tallis's responses have come down to us is very impure, if not incorrect. To such an extent is this the case that in an edition of the 'people's part' of Tallis, published not many years since, the editor (a cathedral organist) fairly gave up the task of finding the plain-song of the response, 'We beseech Thee to hear us, good Lord,' and ordered the people to sing the tuneful super-structure—

It certainly does appear impossible to combine this with

But it appears that this ancient form existed—

Chris-te ex - au - di nos.

This, if used by Tallis, will combine with his harmonies; thus—

Having now described the Preces, Versicles and Responses, and Litany, it only remains to say a few words on (1) *Amens*, (2) *Doxology* to Gospel, (3) *Responses* to the Commandments, all of which we have mentioned as being responses of a less important kind.

(1) Since the Reformation two forms of *Amen* have been chiefly used in our church, the monotone, and the approach by a semitone, generally harmonised thus—

The former of these '*Amens*' in early times was used when the choir *responded* to the priest; the latter, when both priest and choir sang together (as after the Confession, Lord's Prayer, Creed, etc.). Tallis, however, *always* uses the monotonic form, varying the harmonies thrice. In more modern uses, however, the ancient system has been actually reversed, and (as at St. Paul's Cathedral) the former is only used

when priest and choir join ; the latter when the choir responds. In many cathedrals no guiding principle is adopted ; this is undesirable.

(2) The Doxology to the Gospel is always monotone, the monotone being in the Tenor, thus—

There are, however, almost innumerable original settings of these words used throughout the country.

(3) The Responses to the Commandments are an expansion of the ancient—

Kyrie eleison,
Christe eleison,
Kyrie eleison,

made to serve as *ten* responses instead of being used as one responsive prayer. The ancient form actually appears in Marbeck (1550), and the so-called Marbeck's 'Kyrie' now used is an editorial manipulation. Being thrown on their own resources for the music to these ten responses, our composers of the reformed church always composed original settings, sometimes containing complete contrapuntal devices. At one period of vicious taste *arrangements* of various sentences of music, sacred or secular, were pressed into the service. The 'Jommelli Kyrie' is a good—or rather, a bad—example. It is said to have been adapted by Attwood from a chaconne by Jommelli, which had already been much used on the stage as a soft and slow accompaniment of weird and ghostly scenes. The adaptation of 'Open the heavens' from 'Elijah' is still very popular, and may be considered a favourable specimen of an unfavourable class. [Both these have happily passed out of general use at present, 1907.]

The re-introduction of choral celebrations of Holy Communion has necessitated the use of various inflexions, versicles, and responses, of which the music or method of chanting has, almost without exception, been obtained from pre-Reformation sources. J. S.

RESPONSORIAL PSALMODY is the earliest form in which psalms have been sung in the Christian Church. It is a development from inflected monotone (see INFLEXION). In the earliest Christian days the recitation of the psalms was carried out by a single soloist, who monotoned the greater part of the psalm, but inserted various cadences or inflexions at certain points of distinction in the verse. This was very probably but the carrying on of what had long been current in the Synagogue. (See PLAIN-SONG, SYNAGOGUE MUSIC.) It was very advisable not to leave the whole of the performance of the psalm to the soloist ; and it became customary for the congregation to interject some small response

at the close of each verse. Such a response was known among the Greeks as an acrostic (*ἀκροστιχίον* or *ἀκροτελεύτιον*), and the technical word in Latin for this performance by the congregation was *Respondere* ; hence this form of psalmody was called 'Responsorial Psalmody.' The refrain was originally very brief,—an Amen or an Alleluia, a short text like the 'For his mercy endureth for ever' of Psalm cxxxvi. or some pregnant sentence drawn from the Psalm which was being sung. In the earliest days the soloist's text was very little removed from monotone, but already by the time of St. Augustine it had become more elaborate, and the ancient simplicity was looked upon as an archaism. The result was a performance somewhat resembling the familiar Litany. The psalmody remained such a short time in this comparatively simple stage that very few actual monuments of it have survived. The Responsorial Psalmody that exists is of the elaborate sort. Partly as a result of the growing artistic feeling, partly also in consequence of the existence of trained singers in the great Song School at Rome, the music, alike of the soloist who sang the verses of the psalm and of the choir who responded, was elaborated to a very high pitch. Then, since it was impossible to sing the whole psalm to a highly ornate chant habitually, certain verses were selected from the psalm for this elaborate treatment ; and there grew up, therefore, the musical form called the Respond, which consisted in its simplest shape of a choral melody (called the Respond proper), alternating with one or more Verses sung by the soloist. This form is found both in the music of the Mass and in that of Divine Service, and mainly as an interlude between the reading of lessons. In the former it is called for distinction's sake *Responsorium Graduale* or the Gradual. In the latter case it is simply called *Responsorium* ; for the lesser Offices, which were sung without musical elaboration, there came to be a few simple forms of Responsorial music, modelled on the elaborate responds of Mattins but differing from them in being simpler in texture. This brief form was then called *Responsorium breve* as distinct from the *Responsorium prolixum*.

The highest development of elaboration was reached in the Gradual ; but even there, in spite of all the embroidery, the primitive monotone around which everything else centres is still traceable ; and careful analysis will show that with all its elaboration the chant is still an inflected monotone. This statement can most easily be proved by the study of a single group of Graduals which are ordinarily ascribed to the second mode, and are decorated with similar melodic themes.

The music falls into eight divisions, each of which consists of (a) an intonation, (b) the recitation in inflected monotone, (c) the cadence or

pneuma or *melisma*. There are in all fifteen different texts set to this scheme of music; the *Iustus ut palma* is given here as being the best representative of the group; but in two of the divisions another text is given as well, in order to reveal the structure the more clearly.

Gloria patri as well, in the early shape in which it consisted of one phrase, not two. Further, it became customary in France to repeat after the Verse not the whole of the respond but only a part of it; and this custom spread till it was universal.

I.  R. Jue - tus ut pal - ma flor e bit

II.  Sicut ce - drus Li - ba ni

III.  Mul - tipli ca bi - tar

IV.  In do - ... dans de tha - ... mo su - o la - mo Do - mi - ni

V.  Ad an - nuo - ti - an - dum ma - na - ne - ti

VI.  Mi - se - ri - cor - di - am tu - am

VII.  Et ve - ri - ta - tem tu - am (Cp. III.)

VIII.  Per ... noc tem (Cp. IV.)

The same plan holds good with the responds of the Office which are found for the most part in the service of Mattins. It is visible more plainly in the verses of the responds than in the responds themselves. Those of the Office use a set of invariable psalm-melodies, one belonging to each mode; in these the monotone is very clear, and yet there is much elaboration in the cadences, and the forms are so plastic that they can by certain well-defined rules be readily adapted to the various texts of the verses. (See PSALMODY.) The Graduals in the mass do not utilise these common forms for their Verses; each Verse is peculiar to the Gradual; but even so there is much similarity observable amongst them both in general structure and in detail. In exceptional cases even the responds of the Office have their Verses set to a special melody and not to the common one.

As regards liturgical (as distinct from musical) structure the respond of the Office is like the gradual-respond of the Mass, but not identical. In neither case is it common now to find more than one Verse, but the respond in the Office is often accompanied by the

The following respond, then, which belongs to Mattins of the First Sunday in Advent and stands at the head of the series, may be taken as representing this form of composition in an unusually full shape.

Three boys sing the Respond—

As-pli-ens a loa-ge ec-ce vi-de -

o de i po-tea-tam ve-ni-ea

tem, et ne-bu lam to-tam ter-ra-m te

gen tem. * I te ob vi ata

e - - - i, et di-ci-to; † Nun-ci-a

A boy sings the first Verse to the psalm melody of the Seventh mode (see PSALMODY)—

Quique terrigenae et filii hominum, simul in unum dives et pauper (Ps. xlix. 2).

The choir repeats the Respond from *Ite* onwards.

A second boy sings a second Verse as before—

Qui regis Israel intende, qui deducis velut ovem Joseph (Ps. lxxx. 1).

The choir repeats the Respond from *Nuncia*.

A third boy sings a third Verse—

Excita domine potentiam tuam, et veni ut salvos facias nos.

The RY is repeated from *Qui regnaturus*. The three boys sing the *Gloria patri* (down to *Sancto* only) to the same psalm melody, and the choir repeats the closing section of the Respond—*In populo Israel*. W. H. F.

RESPONSORIUM. See RESPOND, and RESPONSORIAL PSALMODY.

REST (Fr. *Silence, Pause*; Ger. *Pause*; Ital. *Parusa*). The sign of silence in music, the duration of the silence depending upon the form of the character employed to denote it. The employment of the rest dates from the invention of 'measured music,' that is, music composed of notes of definite and proportionate values. [See *MUSICA MENSURATA*; *NOTATION*.] In earlier times the *cantus* was sung without pauses, or with only such slight breaks as were necessary for the due separation of the sentences of the text, but so soon as the relative duration of the notes was established, the employment of rests of like proportionate values became a necessity. Franchinus Gafurius, in his *Practica Musicae* (1496), says that the Rest 'was invented to give a necessary relief to the voice, and a sweetness to the melody; for as a preacher of the divine word, or an orator in his discourse, finds it necessary oftentimes to relieve his auditors by the recital of some pleasantries, thereby to make them more favourable and attentive, so a singer, intermixing certain pauses with his notes, engages the attention of his hearers to the remaining parts of his song.'

(Hawkins, *Hist. of Music*, chap. 63.) Accordingly we find rests corresponding in value to each of the notes then in use, as shown in the following table.

Susprium. Semisusprium. Pausa Fusa. Pausa Semifusa.

Of these rests, two, the *semipausa* and *susprium*, have remained in use until the present day, and appear, slightly increased in size but of unchanged value, as the semibreve and minim rests. Two of the longer rests are also occasionally used in modern music, the *pausa*, or breve rest, to express a silence of two bars' duration, and the *longa imperfecta* a silence of four. These rests are called in French *bâtons*, and are spoken of as 'bâton à deux mesures,' 'à quatre mesures.'

The rests employed in modern music, with their names and values in corresponding notes, are shown in the table below.

By a license the semibreve rest is used to express a silence of a full bar in any rhythm (hence the German name *Taktpause*); its value is therefore not invariable, as is the case with all the other rests, for it may be shorter than its corresponding note, as when used to express a bar of 2-4 or 6-8 time, or longer, as when it occurs in 3-2 time. To express a rest of longer duration than one bar, either the *bâtons* of two or four bars are employed (Ex. a), or, more commonly, a thick horizontal line is drawn in the stave, and the number of bars which have to be counted in silence is written above it (Ex. b).

Like the notes, the value of a rest can be increased by the addition of a dot, and to the same extent, thus \cdot is equal to \cdot , \cdot to \cdot , and so on.

In the earlier forms of the ancient 'measured music' rests were used as a part of the time-signature, and placed immediately after the clef. In this position they did not denote silence, but merely indicated the description of Mood to be counted. [See *NOTATION, MOOD, TIME, SIGNATURE*.]

RESULTANT TONES (Fr. *Sons résultants*; Ger. *Combinationstöne*) are produced when any two loud and sustained musical sounds are heard at the same time. There are two kinds of resultant tones, the Differential and the Summational. The 'Differential tone' is so called because its number of vibrations is equal to the difference between those of the generating sounds. The 'Summational tone' is so called because its number of vibrations is equal to the sum of those of the generating sounds. The following diagram shows the pitches of the differential tones of the principal consonant intervals when in perfect tune.

Generators.

If the interval be wider than an octave, as in the last two examples, the differential is intermediate between the sounds which produce it. These tones can be easily heard on the ordinary harmonium, and also on the organ. They are not so distinct on the piano, because the sounds of this instrument are not sustained. By practice, however, the resultant tones can be distinguished on the piano also.

Dissonant as well as consonant intervals produce resultant tones. Taking the minor Seventh in its three possible forms the differentials are as follows:—

The first form of minor Seventh is obtained by tuning two Fifths upwards (C-G-D) and then a major Third downwards (D-Bb); its differential tone is Ab , an exact major Third below C. The second form is got by two exact Fourths upwards (C-F-Bb): the differential is then Ab , which is flatter than the previous Ab by the interval 35 : 36. The third form is the so-called Harmonic Seventh on C, whose differential is G, an exact Fourth below C. The marks v , f , here used to distinguish notes which are confused in the ordinary notation, will be found fully explained under TEMPERAMENT. We may briefly remark that the acute sign f refers to notes in an ascending series of Fifths, the grave sign v to those in a descending series of Fifths.

Hitherto we have spoken only of the differential tones which are produced by the fundamentals or prime partial tones of musical sounds. [See PARTIAL TONES.] But a differential may also arise from the combination of any upper partial of one sound with any partial of the

other sound; or from the combination of a differential with a partial, or with another differential. Thus the major Third C-E may have the following differential tones:—

All these tones are heard simultaneously; but for convenience the differentials of the first, second, third, and fourth orders are written in notes of different length. We see, then, that the number of possible resultant tones is very great; but only those which arise from the primes of musical sounds are sufficiently strong to be of practical importance.

In enabling the ear to distinguish between consonant and dissonant intervals, the differential tones are only less important than the upper partials. Thus if the chord G-E-C be accurately tuned as 3 : 5 : 8, the differential of G-C coincides with E, and that of E-C with G. But if the intervals be tempered the differentials are thrown out of tune, and give rise to beats. These beats are very loud and harsh on the ordinary harmonium, tuned in equal temperament. Again, in the close triad C-E-G the differentials of C-E and of E-G coincide and give no beats if the intervals be in perfect tune. On a tempered instrument the result is very different. If we take C to have 264 vibrations, the tempered E has about $332\frac{1}{2}$, and the tempered G about $395\frac{1}{2}$ vibrations. The differential of C-E is then $68\frac{1}{2}$, and that of E-G 63. These two tones beat $5\frac{1}{2}$ times each second, and thus render the chord to some extent dissonant.

In the minor triad, even when in just intonation, several of the resultant tones do not fit in with the notes of the chord, although they may

be too far apart to beat. In the major triad, on the contrary, the resultant tones form octaves with the notes of the chord. To this difference Helmholtz attributes the less perfect consonance of the minor triad, and its obscured though not inharmonious effect.

The origin of the differential tones has been the subject of much discussion. Thomas Young held that when beats became too rapid to be distinguished by the ear, they passed into the resultant tone. This view prevailed until the publication in 1856 of Helmholtz's investigations, in which many objections to Young's theory were brought forward. To explain what these objections are, it would be necessary

to treat at some length of the nature of beats, and the reader is therefore referred to the article BEATS, for this side of the question. The later mathematical theory given by Helmholtz is too abstruse to admit of popular exposition.

It was also part of Young's theory that the differential tone was produced in the ear alone, and not in the external air. But Helmholtz found that stretched membranes and resonators responded very clearly to differentials produced by the siren or the harmonium. This he considers to prove the existence of vibrations in the external air corresponding to the differential tones. But when the two generating tones were produced by separate instruments, the differential, though powerfully audible, hardly set the resonator in vibration at all. Hence Helmholtz concludes that the differential tone is for the most part generated in the ear itself. He further points out that certain features in the construction of the ear easily permit the action of the law which he has stated. The unsymmetrical form of the drum-skin of the ear, and the loose attachment of the ossicles are, he thinks, peculiarly favourable to the production of resultant tones. [A practical use of resultant tones is shown in the article ORGAN, vol. iii. p. 552a.]

As a consequence of his theory, Helmholtz deduced a different series of resultant tones, which he calls *summational* tones, because their number of vibrations is the *sum* of those of the generators. The existence of the summational tones which Helmholtz believed he verified experimentally, has recently been called in question by Dr. Preyer. He points out that in some intervals, as, for instance, 1:2, 1:3, 1:5, there will be a partial tone present of the same pitch as the presumed summational tone, and these cases therefore prove nothing. Again, if we take 2:3, the note 5 is not necessarily a summational tone, but may be the differential of 4 and 9, which are the 2nd partial of 2 and the 3rd of 3 respectively. Dr. Preyer was unable to find any trace of the summational tones when care had been taken to exclude the upper partials. But to do this he could only use sounds of tuning-forks gently bowed, which were far too weak to produce any resultant tones in the air. The question, however, is one of theoretic interest merely.

Not only the origin, but also the discovery of differential tones has been disputed. The earliest publication of the discovery was made by a German organist named Sorge in 1745. Then came Romieu, a French savant, in 1751. Lastly, the great Italian violinist, Tartini, made the phenomenon the basis of his treatise on Harmony in 1754. But Tartini explicitly claims priority in these words:—'In the year 1714, when about twenty-two years of age, he discovered this phenomenon by chance on the violin at Ancona, where many witnesses who

remember the fact are still living. He communicated it at once, without reserve, to professors of the violin. He made it the fundamental rule of perfect tuning for the pupils in his school at Padua, which was commenced in 1728 and which still exists; and thus the phenomenon became known throughout Europe.'¹

Tartini in some cases mistook the pitch of the differential tone; but there does not appear to be any reason for taking from him the credit of the discovery which has so long been associated with his name.

J. L.

RESZKE, DE, EDOUARD, born at Warsaw, Dec. 23, 1855, was taught singing by his brother Jean, Ciafci, Steller, and Coletti, and made his début April 22, 1876, as the King in 'Aida,' on its production at the Italiens, Paris. He sang there with success for two seasons, and afterwards went to Italy, where, in 1880, at Turin, he made a success in two new parts—the King in Catalan's 'Elda,' Jan. 31, and Charles V. in Marchetti's 'Don Giovanni d'Austria,' March 11, and appeared at Milan on the production of Ponchielli's 'Figliuol Prodigio,' Dec. 26. From 1880 to 1884, he was engaged with the Royal Italian Opera, until its collapse. He made his début on April 13, 1880, as Indra ('Roi de Lahore'), but his success as a foremost lyrio artist was established by his admirable performances of St. Bris, the Count in 'Sonnambula,' Basilio, and later as Walter ('Tell'), Peter the Great, Prince Gudal ('Demonio'), June 21, 1881; Sénon (Lenepveu's 'Velleda'), July 4, 1882; Almaviva; Mephistopheles; Alvisé, on production of 'La Gioconda,' May 31, 1883; Hagen, on production of Reyer's 'Sigurd,' July 15, 1884, etc. In 1883-84 he reappeared in Paris at the Italian Opera (Théâtre des Nations), with great success, in 'Simone Boccanegra'; in Massenet's 'Herodiade,' on its production in Paris; in Dubois' 'Aben Hamet,' Dec. 16, 1884, and in other operas. He was engaged at the French Opéra, where he first appeared April 13, 1885, as Mephistopheles, a part he sang subsequently in the 500th performance of 'Faust.' He appeared as Leporello in the centenary performance of 'Don Juan,' Nov. 4, 1887, and has sung in 'Le Cid' and 'Patria.' He played at the Italian Opera at Drury Lane in 1887 the part of Ramfis in 'Aida,' and sang during the season as Basilio, St. Bris, Mephistopheles, and Henry the Fowler ('Lohengrin'). From 1888 to 1900 he sang every season (except 1899), and added to his repertory the parts of Almaviva, Marcel, the Mefistofele of Boito, and the Wagnerian parts of Hans Sachs, King Mark, Hunding, and Hagen. From 1890, for many seasons, he sang in America with his brother, with the greatest success. He sang at the Mozart (concert) Festival at the Nouveau Théâtre in Paris in the spring of 1906, under the direction of M. Reynaldo Hahn. In Feb. 1907 he advertised

¹ *De Principiis dell' Armonia*, Padova, 1787, p. 36.

his intention of opening a school of singing in London, and appeared there on June 13.

His brother, JEAN (more correctly JAN MĘCZYSŁAW) born at Warsaw, Jan. 14, 1850,¹ was the eldest son of the controller of the government railways, was taught singing by his mother, a distinguished amateur, and at the age of twelve sang solos in the Cathedral there. He was taught later by Ciaffei, Cotogni, and Sbriglia. Under the name 'De Reschi' he made his début at Venice as Alfonso ('Favorita') in Jan. 1874, according to an eye-witness with success.² He made his début at Drury Lane on April 11 of the same year, and in the same part, and played there two seasons as Don Giovanni, Almaviva, De Nevers, and Valentine. A contemporary³ spoke of him as one of whom the highest expectations might be entertained, having a voice of delicious quality; he phrased artistically and possessed sensibility, but lacked experience such as would enable him to turn his vocal gifts to greater account and to become an effective actor. It is interesting to find that the quality of the organ was even then considered to be more of the robust tenor timbre than a baritone. Under his own name he made his début at the Italiens as Fra Melitone ('Forza del Destino'), Oct. 31, 1876, with some success, and as Severo (Donizetti's 'Polliuto') Dec. 5, Figaro ('Barbieri') Dec. 19. He made his tenor début as 'Robert' at Madrid in 1879 with great success, and was engaged at the Théâtre des Nations in 1884. He played there the part of St. John the Baptist on the production of 'Hérodiade' so much to the satisfaction of Massenet, that he procured him an engagement at the Académie to create the title-part of 'Le Cid,' in which he made his début on its production, Nov. 30, 1885. He was engaged there for four years, and sang the usual tenor parts, notably Don Ottavio ('Don Juan' centenary) and Romeo (in 1888, on the production of Gounod's opera at the Grand Opéra). On June 13, 1887, he reappeared at Drury Lane as Radames, and sang as Lohengrin, Faust, and Raoul. He worthily fulfilled his early promise by the marked improvement both in his singing and acting, and by his ease and gentlemanly bearing, the improvements being almost entirely due to his own hard work and exertions. On June 4, 1888, as Vasco de Gama, he made his first appearance at Covent Garden, and from that season dates the revival of opera as a fashionable amusement in London. Till 1900 inclusive, he sang nearly every year here, his parts including John of Leyden, the Duke in 'Un Ballo,' Don José, Phoebus in Goring Thomas's 'Esmeralda,' Lancelot in Bemberg's 'Elaine,' Werther (in Massenet's opera). In the great parts of Wagner, such as Walther, Tristan, and Siegfried, he was unrivalled, throwing new light upon the music by his wonderful power of interpreting the

dramatic side, without losing sight of vocal purity. He sang for several seasons in America with his brother, and at Warsaw and St. Petersburg. On Dec. 11, 1890, he assisted gratuitously in the performance of 'Carmen' at the Opéra-Comique in Paris, where Mme. Galli-Marié reappeared in her original part, and Melba and Lassalle were in the cast. He reappeared at intervals at the Paris Opéra, singing in 'Siegfried' and 'Pagliacci' on the Paris production of those operas. He was announced in Reyer's 'Sigurd' in 1904, but was unable to appear through illness. He is living in Paris, and devotes himself to teaching.

Their sister, JOSEPHINE, educated at the Conservatorium of St. Petersburg, attracted the notice of M. Halanzier at Venice, and was engaged by him at the Académie, where she made her début as Ophelia, June 21, 1875. She sang there with success for some time, where she was the original Sita ('Roi de Lahore'), April 27, 1877. Later she was very successful at Madrid, Lisbon, etc.; sang at Covent Garden as Aida, April 18, 1881, and again in Paris at the Th. des Nations as Salome ('Hérodiade'), March 13, 1884. She retired from public on her marriage with M. Leopold de Kronenburg of Warsaw; she died there Feb. 22, 1891.

A. C.

RETARDATION is a word used by some theorists to distinguish a small group of discords which are similar in nature to suspensions, but resolve upwards, as in Ex. 1.

The ground for making this sub-class is that it appears inaccurate to describe as suspensions notes which are delayed or retarded in ascending. A comparison of Ex. 2, which would be distinguished as a suspension, with Ex. 1, will show the identity of principle which underlies the two discords; while the fact of their ascending or descending is clearly not an attribute but an accident. So in this case there is no other ostensible reason for breaking up a well-defined class but the fact that the common designation in use is supposed, perhaps erroneously, to be insufficient to denote all that ought to come under it. On the other hand it requires to be noted that as all discords of this class are discords of retardation, and as those which rise are very much less common than those which descend in resolution, the name which might describe the whole class is reserved for the smallest and least conspicuous group in that class.

C. H. H. P.

REUTTER, GEORG, born 1656 at Vienna, became in 1686 organist of St. Stephen's, and in 1700 Hof- and Kammer-organist. He also played the theorbo in the Hofcapelle from

¹ See *Truth*, July 15, 1897.

² Letter of Mr. Michael Williams in *Musical World*, Jan. 31, 1874.

³ *Athenaeum*, April 18, and July 25, 1874.

1697 to 1703. In 1712, he succeeded Fux as Capellmeister to the Gnadenbild in St. Stephen's, and in 1715 became Capellmeister of the cathedral itself. He died August 29, 1738. His church music (see list in the *Quellen-Lexikon*), was sound, without being remarkable. On Jan. 8, 1695, he was knighted in Rome by Count Francesco Sforza, on whose family Pope Paul III. had bestowed the privilege of conferring that honour in 1539. His son,

GEORG KARL (generally known by his first name only), according to the cathedral register, was born in Vienna, April 6, 1708, became Court-composer in 1731, and succeeded his father in 1738 as Capellmeister of the cathedral. In 1746 he was appointed second Court-capellmeister, his duty being to conduct the music of the Emperor's church, chamber, and dinner-table. On Predieri's retirement in 1751 Reutter exercised the functions of chief Court-capellmeister, but did not receive the title till the death of the former in 1769. As an economical measure he was allowed the sum of 20,000 gulden (£2000) to maintain the court-cappelle (the whole body of musicians, vocal and instrumental), and he enjoys the melancholy distinction of having reduced the establishment to the lowest possible ebb. Reutter composed for the court numerous operas, cantatas *d'occasion*, and Italian oratorios for Lent; also a requiem, and smaller dramatic and sacred works. His grand masses are showy, with rapid and noisy instrumentation, so much so that 'rushing (rauschende) violins à la Reutter' became a proverb. Burney heard one of them during his visit to Vienna in 1772, and says 'it was dull, dry stuff; great noise and little meaning characterised the whole performance' (*Present State of Music in Germany*, i. 361). In 1731 Reutter married Therese Holzhauser, a court singer of merit, who died in 1782. His own death took place March 12, 1772. He was much favoured at court owing to his great tact; and Maria Theresa ennobled him in 1740 as 'Edler von Reutter.' His name is inseparably associated with that of Haydn, whom he heard sing as a boy in the little town of Hainburg, and engaged for the choir of St. Stephen's, where he sang from 1740 to 1748. His treatment of the poor chorister, and his heartless behaviour when the boy's fine voice had broken, are mentioned under HAYDN, vol. ii. pp. 349-350. See Stollbrock's biography in the *Vierteljahrsschrift*, 8, p. 165 ff., also the *Quellen-Lexikon*, where a list of his compositions will be found. C. F. P.

RÊVE, LE. Lyric drama in four acts, text by Louis Gallet after Zola, music by Alfred Bruneau. Produced at the Opéra-Comique, Paris, June 18, 1891, and at Covent Garden, Oct. 29, 1891.

REVEILLÉ. See MILITARY SOUNDS AND SIGNALS, vol. iii. pp. 204-209.

REVERSE. See RECTE ET RETRO, ROVESCIO.

REVUE ET GAZETTE MUSICALE, the oldest and most complete of French musical periodicals. This branch of literature has taken root in France with great difficulty. So far back as Jan. 1770, M. de Breuille and other amateurs founded the *Journal de Musique* (monthly, 8vo), which after a troubled existence of three years was dropped till 1777, and then resumed for one year more. In 1810 Fayolle started *Les Tablettes de Polymnie* (8vo), but it did not survive beyond 1811. Undeterred by these failures, Fétis brought out the first number of the *Revue musicale* in January 1827. It appeared four times a month, each number containing twenty-four pages 8vo, till Feb. 5, 1831, when it was published weekly, in small 4to, double columns. *La Gazette musicale de Paris*, started Jan. 5, 1834, was similar in size to Fétis's *Revue* and also weekly, but issued on Sunday instead of Saturday. The two were united on Nov. 1, 1835, since which date the *Revue et Gazette musicale* twice enlarged its form, in 1841 and in 1845, at which date it became what it was till its last number, Dec. 31, 1880.

The property of the publishers Schlesinger & Brandus, this periodical was always noted for the reputation and ability of its editors. Amongst its regular contributors have been: Berlioz, P. Bernard, M. Bourges, Chouquet, Comettant, Danjou, Ernest David, F. J. Fétis, O. Fouque, Heller, A. Jullien, Kastner, Lacome, A. de La Fage, Liszt, d'Ortignes, Pougin, Monnaie ('Paul Smith'), Richard Wagner, and Johannes Weber. A careful reader of the forty-seven volumes will easily recognise the sentiments of the various editors through whose hands it passed; among those deserving special mention are Fétis, Édouard Monnaie, and M. Charles Bannelier, who conducted it from 1872 with equal learning and taste. The indexes given with each volume are a great boon, and constitute one of its advantages over other French periodicals of the same kind. G. C.

REY, JEAN BAPTISTE (1), born at Lauzerte (Tarn et Garonne), France, Dec. 18, 1724. His musical studies began at an early age at Toulouse, where he became a chorister at the Abbey of Saint Sernin. There he remained until the age of seventeen, when he competed for and obtained the position of Maître de Chapelle at the Cathedral of Auch. Three years later, in 1739, a dispute with the authorities caused him to resign this position and return to Toulouse, where he became *chef d'orchestre* at the opera. Until the age of forty he filled similar posts at Montpellier, Marseilles, Bordeaux, and Nantes. It was at the last-named town that a summons to Paris to assist in the production of Gluck's 'Alceste' reached him in 1776. Three years later Louis XVI. appointed him *Maître de la Musique de Chambre*, with a salary of 2000 frs. In the

same year the King decorated him with the Order of Saint Michel, and appointed him *Surintendant de la Chapelle*. According to Fétis and Brenet, Rey conducted the orchestra of the Concert Spirituel between 1782 and 1786, and some of his compositions were performed there. After the French Revolution, he was elected a member of the Committee of Administration for the Affairs of the Opera, and the decree which established the Conservatoire of Music in 1795, named him one of the professors of harmony. It was there that F. J. Fétis became a pupil of Rey, and was instructed by him according to the complicated principles of Rameau. So staunch was his adherence to bygone traditions that he became involved in the turbulent discussions which were roused by Catel's innovations. Finally his championship of his friend Lesueur brought about his dismissal from the Conservatoire in 1802. Napoleon soothed his wounded feelings by nominating him his *Maître de Chapelle* two years later. He held this appointment for five years, but the death of his daughter, who was a talented pianist, plunged him into an abandonment of grief, which caused his death, July 15, 1810. As a conductor, Rey was closely associated with all the great composers of his day and assisted in the productions of the masterpieces of Piccini, Gluck, Paisiello, Grétry, Lemoine, and Méhul. Sacchini, on his death-bed, entrusted the completion of his opera 'Armire et Evelina' to his friend Rey. This commission was conscientiously executed by him, and the opera was produced April 29, 1788. He is also said to have written all the ballet music in the same composer's opera 'Oedipe à Colone,' and in Salieri's 'Tarare.'

His original compositions comprise some MS. motets with orchestra, several of which were performed in the *Chapelle du Roi*, and some solfège studies which are included in the third part of the 'Solfèges du Conservatoire de Paris.' His two-act opera 'Diana and Endymion' was produced in Paris in 1791, and the opera in one act, entitled 'Apollon et Coronis,' was performed at the Académie Royale de Musique, in 1781. This last was written in conjunction with his brother,

REY, LOUIS CHARLES JOSEPH, who was born at Lauzerte, Oct. 26, 1738, and died May 12, 1811. Also a chorister at the Abbey of St. Sernin, Toulouse, he became a violoncellist in the theatre orchestra at Montpellier, and came to Paris in 1755 to profit by Berteau's teaching. Two years later he occupied the post of violoncellist at the principal theatre in Bordeaux, an appointment which he held for nine years. At the end of the year 1766, he became a member of the Paris opera orchestra, and in 1772 was admitted into the orchestra of the Chapelle du Roi. After forty years' service Rey retired from the orchestra with a

pension in 1806. Fétis says that he cut his throat in delirium caused by a nervous fever. He wrote some trios for two violins and violoncello; some duos for violin and violoncello, etc., and a brochure entitled: *Mémoire justificatif des Artistes de l'Académie Royale de Musique, ou réponse à la lettre qui leur a été adressée le 4 Sept. 1789*. This last was a reply to Papillon de Laferté's complaints of the behaviour of the members of the opera orchestra.—Brenet, M., *Les Concerts en France*; Saint Laurent, *Dictionnaire Encyclopédique; Nouvelle Graphie Générale*, Paris, 1843; Fétis, *Biog. des Mus. Journal de Paris*, July 19, 1810. E. H.A.

REY, JEAN BAPTISTE, (II), born at Tarascon about 1760, is said to have taught himself the harpsichord, violin, and violoncello; occupied the post of *Maître de Musique* at the cathedrals of Verviers and Uzes, and went to Paris in 1785, establishing himself there as a professor of music. A year later he was admitted into the opera orchestra, and held an appointment as violoncellist until his death, at Paris in 1822. A potpourri (op. 1) of his for pianoforte was published by Leduc, in Paris, and Nadermann of Paris brought out his *Cours élémentaire de Musique et de Piano*. In 1807 the same firm published his *Exposition élémentaire de l'harmonie; théorie générale des accords d'après les différents genres de Musique*. Copies of this last work are in the Bibliothèque at Brussels, in the British Museum, London, and also in Glasgow. The *Quellen-Lexikon* mentions twelve sonatas for violoncello, op. 4.—J. B. Wekerlin, *Bibl. du Conservatoire Nat. de Paris*; Fétis, *Biog. des Mus.* E. H.A.

REYER, ERNEST, whose real name is Key, was born at Marseilles, Dec. 1, 1823. As a child he learned solfège at the free school of music founded by Barsotti (born in Florence, 1786; died at Marseilles, 1868), and became a good reader, though he did not carry his musical education far. At sixteen he went to Algiers as a government official, but continued his pianoforte practice, and began to compose without having properly learned harmony and counterpoint. He was soon able to write romances which became popular, and composed a mass which was solemnly performed before the Duc and Duchesse d'Aumale. The Revolution of 1848 deprived him of the support of the Governor-General, and he returned to Paris, and placed himself in the hands of his aunt Mme. Louise Farrenc, who completed his musical education, and before long he found an opportunity of coming before the public. From his friend Théophile Gautier he procured the libretto of 'Le Selam,' an oriental 'Symphony' in four parts, on the model of David's 'Le Désert.' It was produced with success, April 5, 1850; and then Méry furnished him with 'Maître Wolfram,' a one-act opera, which was also successful, at the Théâtre Lyrique, May 20,

ERNEST REYER

1854. (Revived at the Opéra-Comique, 1873.) His next work was 'Saccountala' (July 20, 1858), one of the charming ballets of Théophile Gautier; and 'Victoire,' a cantata, was given at the Opéra, June 27, 1859; but his full strength was first put forth in 'La Statue,' a three-act opera produced at the Théâtre Lyrique, April 11, 1861, and containing music which is both melodious and full of colour. (It was revived in 1878 at the Opéra-Comique, and in 1903 at the Grand Opéra.) 'Erostrate' (two acts) was performed at Baden in 1862, and reproduced at the Académie, Oct. 16, 1871, for two nights only. Among his earlier works may be mentioned a 'Recueil de 10 Mélodies' for voice and PF.; songs for a single voice; and some pieces of sacred music. G. C.

After numerous attempts on Reyer's part to secure an un mutilated performance of 'Sigurd' at the Paris Opéra, he produced it at the Théâtre de la Monnaie, Brussels, Jan. 7, 1884, with great and lasting success. On July 15 of the same year it was produced at Covent Garden. The first performance of the work in France was at Lyons, on Jan. 15, 1885, when it was received with marked success. On June 12, 1885, 'Sigurd' was performed at the Grand Opéra in Paris, but at the general rehearsal the directors thought fit to make curtailments in the score, and the composer retired, protesting against the proceeding, and yet unwilling to withdraw a work on which so much trouble and expense had been bestowed, on the eve of its production. He threatened never to set foot in the opera-house until his score should have been restored to its original integrity, and he kept his word. The public, less exacting than the composer, received the opera, which in many passages must have considerably surprised them, with increasing sympathy, and its success was all the more remarkable as it was entirely unassisted either by the composer, who appeared to take no interest in its fate, or by the directors, who would not have been sorry had it failed. It has definitely taken a high place in the repertory. The qualities which are most prominent in 'Sigurd' are the individual charm of its musical ideas, the exact agreement between the words and the music, vain repetitions and conventional formulas being generally absent; and lastly, the richness and colouring of the instrumentation, the style of which was greatly influenced by Reyer's favourite masters, Weber and Berlioz, and in places by Wagner. No charge of plagiarism from the last-named composer is intended to be suggested, nor could such a charge be substantiated. It is true that the subjects of 'Sigurd' and the 'Ring des Nibelungen' are identical, but this is a mere coincidence. The plot of the libretto, which was written by Du Locle and A. Blan, is taken from the Nibelungen Nôt, the source that

inspired Wagner, who, however, went further back and took his subject direct from the Eddas, moulding it after his own conception. In 1868 the libretto of Wagner's trilogy had been published for fifteen years, but it was completely unknown in France, and when the trilogy was produced in 1876, Reyer's score was nearly finished and ready for production. Reyer was decorated with the Légion d'Honneur in August 1862, and was raised to the rank of an officer in Jan. 1886. In 1890 his grand opera on Flaubert's 'Salammbô,' was produced in Brussels, and was given at the Grand Opéra in Paris, on May 16, 1892, with great success. It has been frequently revived.

Besides being reckoned among the most poetical of French musicians, M. Reyer is an accomplished *feuilletoniste*. After writing successively for the *Presse*, the *Revue de Paris*, and the *Courrier de Paris*, he became editor of the musical portion of the *Journal des Débats*, having succeeded d'Ortigue, who followed Berlioz. He has collected his most important articles and published them under the title of *Notes de Musique* (Paris: Charpentier, 1875). In both literature and composition he is the disciple and admirer of Berlioz, in whose collected essays, published as *Les Musiciens*, there is an interesting article on 'La Statue' on p. 333. It is curious that M. Reyer, having succeeded F. David at the Institut (1876), who himself succeeded Berlioz in 1869, should thus occupy the positions, both in music and literature, of the master whose legitimate successor he may well claim to be. A. J.

REZNICEK, EMIL NICHOLAUS VON, born on May 4, 1861, at Vienna, was at first, like so many other musicians, destined for a legal career, and for that purpose was entered as a law student; but, rebelling against the irksomeness of that kind of employment, he became a student at the Leipzig Conservatorium. Being drawn towards the dramatic side of music, he presently undertook the duties of theatre conductor at Graz, Zürich, Stettin, Berlin, and at other places; and then, branching out in a different direction, obtained an appointment as military conductor in Prague. [For a short time he was Court Capellmeister at Weimar, and in 1896-99 held a similar post at Mannheim. In 1902 he moved to Berlin, where he founded the 'Orchester-Kammer-Konzerte' for works requiring a small orchestra. He also directs the monthly concert of the Warsaw Philharmonic Society, and makes frequent journeys to Russia, where he is as highly appreciated as he is in Berlin. He became teacher of composition at the Klindworth-Scharwenka Conservatorium in 1906. He conducted two concerts in London in Nov. 1907.] All his operas are of distinctly Czechish character; although the libretti, as will be seen below, are founded on stories derived from various

nations. The operas, with one exception, were all produced in Prague, where they met with great success. Their titles and dates of production are as follow: 'Die Jungfrau von Orleans,' 1887; 'Satanella,' 1888; 'Emmerich Fortunat,' 1889; 'Donna Diana,' 1894; 'Till Eulenspiegel,' 1901. Of these the most celebrated is 'Donna Diana,' a comic opera, of which the scene is laid in the castle of Don Diego at Barcelona, at the period of the independence of Catalonia; the libretto is by Moreto. 'Till Eulenspiegel' is a 'folk-opera,' dealing with the jokes of the well-known German comical character; it was produced at Carlsruhe, on the date given above, and repeated at Berlin in 1903.

[His compositions include a Requiem for Schmeiykal, for chorus, orchestra, and organ; a Mass in F for the Jubilee of the Emperor Francis Joseph II. (1898); 'Ruhm und Ewigkeit,' a poem of Fr. Nietzsche set for tenor voice and orchestra; a Comedy Overture, a Symphonic Suite in E minor, and another in D major; some songs and piano pieces; a String Quartet in C minor; an Idyllic Overture (Berlin; Nikisch, 1903); a Tragic Symphony in D minor (Berlin; Weingartner, 1904); Three Volkslieder for voice and small orchestra (Kammer-Orchester-Konzerte, 1905); Ironie Symphony, B major (do.); a String Quartet in C♯ minor (Berlin; Dessau Quartet, 1906); Nachtstück for violin, with accompaniment for harp, four horns, and string quartet; a Serenade for strings, and an Introduction and Valse-Caprice for violin and orchestra (Kammer-Orchester-Konzerte, 1906); Fugue in C♯ minor, originally for strings, and subsequently for full orchestra.]

D. H.; additions by H. V. H.

RHAMES, a family of Dublin music-publishers. Benjamin Rhames was established, about the year 1765, at 16 Upper Blind Quay, at the sign of the Sun. Dr. W. H. Grattan Flood informs the writer that the father, Aaron Rhames, was issuing sheet-music in Dublin, circa 1729 to 1732. Benjamin Rhames was in an extensive way of trade, and published great quantities of single sheet songs, mainly of contemporary English music. He was succeeded by his widow, Elizabeth, about 1773 or 1775. In the year 1776 the name Upper Blind Quay was altered into Exchange Street, and the later imprints of Elizabeth Rhames bear the new address with the same number, 16. She remained in business until about the year 1790, when Francis Rhames, her son, took over the concern and greatly increased the output of music sheets. In or near the year 1811 Paul Alday bought the business and remained at the same address until 1823 or 1824, removing then to 10 Dame Street. Elizabeth Rhames and her son published, among other Irish works, pieces by Sir John Stevenson, the copyright of which, after being held by Alday, was transferred to James Power of London. F. X.

RHAPSODY. The Greek Rhapsodist (ῥαψωδός) was a professional reciter or chanter of epic poetry. ῥαψωδία is the Greek title of each book of the Homeric poems, the first book of the *Iliad* being ῥαψωδία Α, and so forth. The Rhapsody was the song of the *Rhapsode*; a sequel of Rhapsodies when sung in succession or written down so as to form a series, constituted an epic poem, and when a long poem was chanted in sections at different times and by different singers it was said to be *rhapsodised*.

The usual derivation of ῥαψωδία is ῥάπτω = I sew, and ᾠδή = song, ode.

Musicians might speak, in Hamlet's phrase, of a 'rhapsody of words,' or of tunes—that is to say, of a string of melodies arranged with a view to effective performance in public, but without regular dependence of one part upon another. Such a description would seem to apply pretty closely to Liszt's fifteen Rhapsodies Hongroises, and to his 'Reminiscences d'Espagne' (a fantasia on two Spanish tunes, 'Les Folies d'Espagne' and 'La Jota Aragonesa,' 1844-45) which, in 1863, herepublished as a 'Rhapsodie Espagnole.' The history of the latter piece is similar to that of the Hungarian rhapsodies—portions of which were originally published under the title of 'Mélodies Hongroises—Ungarische National-melodien'—short transcriptions of Hungarian tunes as they are played by the wandering bands of Gipsies, the national musicians of Hungary. The prototype of these 'melodies' in all probability was Schubert's 'Divertissement à la Hongroise,' in G minor, op. 54—a piece Liszt was always fond of, and of which he produced several versions—as of the whole for pianoforte solo, and of the march in C minor for orchestra.¹ Liszt's ten sets of 'Mélodies Hongroises' date from 1839 to 1847; the fifteen so-called Rhapsodies Hongroises from 1853 to 1854.

In 1859 Liszt published a book in French *Des Bohémiens et de leur Musique en Hongrie*—a late and overgrown preface, as he confesses, to the Rhapsodies. In this brilliant, though at intervals somewhat meretricious work,² an effort is made to claim for the set of Rhapsodies the dignity of an Hungarian Epic *sui generis*. Be this as it may, the term 'Rhapsodie' remains as one of Liszt's many happy hits in the way of musical nomenclature.

Brahms has adopted the term 'Rhapsodie' both in Liszt's sense and in that of the Greek Rhapsodists; and, as usual with him, he has added weight to its significance. His original 'Rhapsodien,' op. 79, for pianoforte solo—in B minor and G minor—are abrupt, impassioned aphoristic pieces of simple and obvious structure, yet solidly put together. The 'Rhapsodie' in C, op. 53, for contralto, male chorus, and orchestra, justifies its title, in the Greek sense, inasmuch as it is a setting—a recitation, a rhapsody—of a portion of Goethe's poem 'Harzreise im Winter'; it, also, is a compact and carefully balanced piece. The last pianoforte piece, in op. 119, is a noble Rhapsody, in which there is perhaps rather more of the quality that is usually called 'rhapsodical' than is to be found in Brahms's other rhapsodies.

Among later rhapsodies may be named MacKenzie's Scottish Rhapsodies, Stanford's Irish Rhapsodies, German's Welsh Rhapsody, and 'Rhapsody on March Themes.'

¹ He played his version of the march in London, April 1886.

² Like Liszt's *Chopin*, this book is on good authority reported to be the joint production of himself and certain female friends.

The last movement of Parry's 'Suite Moderne in A minor for orchestra,' entitled 'Rhapsodie,' consists of a systematised series of melodies on the plan familiar in the Rondo. E. D.

RHAW, or RHAU, GEORG, born about 1488 at Eislefeld in Franconia, was Cantor at the Thomasschule at Leipzig till 1520, after which he settled at Eislehen as a schoolmaster, and subsequently at Wittenberg, where he became a printer, issuing books both in ordinary typography (including many first editions of Luther's writings) and in musical notes, including his own works, *Enchiridion musices ex variis musicorum libri*, etc., 1518 (often reprinted), *Enchiridion musicae mensuralis*, 1520, etc. He also brought out many collections of musical works (see the *Quellen-Lexikon*); Winterfeld ascribes some chorales to him. He died at Wittenberg, August 6, 1548.

RHEINBERGER, JOSEF GABRIEL, was born March 17, 1839, at Vaduz (Liechtenstein). At an early age he showed extraordinary musical aptitude, and when five years old had attained to considerable local reputation. His father, who was financial agent to Prince Liechtenstein, though unmusical himself, was quick to recognise and encourage the uncommon talent of his son. He accordingly placed him in charge of Sebastian Pöhly, a superannuated schoolmaster in Schlanders, who gratuitously gave him lessons in musical theory, pianoforte, and organ. The organ pedals not being within reach, Pöhly arranged a second pedal board for the convenience of his pupil. In 1846, when only seven years of age, Rheinberger was appointed organist at Vaduz Parish Church, and during the following year his first composition—a three-part mass with organ accompaniment—was publicly performed. Shortly after this event the Bishop of Chur invited Rheinberger senior to bring his son to the cathedral in order that his musical ability might be tested. A 'Salve Regina' for four male voices and organ was placed before the young musician, which he was requested to play whilst the bishop and clergy sang. The performance, however, was brought to an unexpected conclusion by young Rheinberger, who abruptly ceased his accompaniment and exclaimed, 'But, Herr Bishop, you continually sing out of tune!' ('Aber, Herr Bischof, Sie singen ja immer falsch!')

Even at this early stage of his career Rheinberger had very decided opinions upon any music which came under his notice. Disapproving of certain masses composed by one Franz Bühler, an Augsburg musician, the young organist one day during service stuffed them all into a stove. The volume of smoke arising in consequence alarmed the assembled congregation, and the culprit had probably his youth to thank that this *auto da fê* had no unpleasant result.

In November 1848 Rheinberger heard a string quartet for the first time when a few dilettanti came over to Vaduz for the day from the neighbouring town of Feldkirch. The boy was allowed to turn the leaves for the leader, a revenue official named Schrammel. When the tuning began Josef promptly remarked, 'Your A string sounds a semitone higher than my piano at home.' As the boy's statement turned out to be perfectly accurate, the interest of Schrammel was aroused. Realising the possibilities of a musical career for the talented child, the violinist approached Rheinberger's father, who was finally induced to allow his son to reside in Feldkirch under Schrammel's protection, and receive musical instruction from the choir director there, Philipp Schmutzer. A special condition attached to the permission was that the organist's duties at Vaduz should not be abandoned; so for two years the boy walked the ten miles between Vaduz and Feldkirch every Saturday and Monday. In Feldkirch Rheinberger made rapid progress in his musical studies. It was here that he acquired, though under somewhat strict conditions, his intimate knowledge of the music of the great masters. He was allowed to study only one piece at a time, and this he had to play from memory before exchanging for another. Such strict discipline, however, had a beneficial influence. It laid that foundation of thoroughness which was so distinguishing a characteristic in later life.

In 1850 Rheinberger left Feldkirch, and after a year of careful preparation entered the Munich Conservatorium (founded in 1846 by Franz Hauser by command of King Ludwig I.). Here he remained from 1851 to 1854, studying the piano with Julius Emil Leonhard, the organ with Joh. Georg Herzog, and counterpoint with Jul. Jos. Maier, the learned curator of the musical department of the Munich Library. On leaving the Conservatorium Rheinberger obtained the highest honours granted by that institution, and he particularly impressed the ministerial examiner, Professor von Schafhäütl, by an extempore performance on the organ of a complete four-part fugue. To show his appreciation of the youth's talent, Schafhäütl presented him with a copy of Onlibicheff's biography of Mozart, and ever afterwards remained his true friend and adviser.

Rheinberger then became a private pupil of Franz Lachner, and remained in Munich supplementing his small income by giving lessons. A series of 124 youthful compositions bears eloquent testimony to his untiring energy and enthusiasm at this time. On Leonhard's resignation in 1859 Rheinberger was appointed to succeed him as professor of pianoforte at the Conservatorium, and after holding this position about a year he was given the more important office of professor of composition. When the

Munich Conservatorium was dissolved Rheinberger was appointed 'Repetitor' at the Court Theatre, where he at once favourably impressed his colleagues by playing and transposing *a prima vista* Wagner's 'Flying Dutchman.' The environment of the theatre, however, proved uncongenial. He therefore retired from active service in 1867, retaining, however, his interest in the stage.

Much of Rheinberger's earliest success as a composer was due to his Wallenstein and Florentine Symphonies. He at one time thought of setting the complete Wallenstein trilogy to music. The project, however, was discarded in favour of a Symphony, which was published and first performed in Munich in 1866. The Florentine Symphony was commissioned by the Società Orchestrale di Florence. In 1868 Rheinberger revised his opera, 'Die sieben Raben,' and composed the music to Raimund's 'Die unheilbringende Krone.' Both works were successfully produced in Munich the following year. From 1860 to 1866 Rheinberger was organist of the Court Church of St. Michael. He had been since 1854 accompanist to the Munich Choral Society, and in 1864 he became director. When the present (1907) 'Königliche Akademie der Tonkunst' was founded in 1867 by Hans von Bülow, he accepted the position of composition and organ professor and inspector of instrumental and theory classes, a post which he held with ever-increasing fame until the year of his death. The title of Royal Professor was conferred upon him soon after his installation in the Conservatorium, and in the same year he married Frau von Hoffnaass, née Fraulein Jägerhüber (born October 1822, died December 31, 1892), a gifted authoress and singer, who wrote the words of many of her husband's most successful choral works. In 1877 he was offered the directorship of the newly-founded Hoch Conservatorium at Frankfurt-on-Main, but being unwilling to forsake the congenial artistic surroundings of Munich, he declined the invitation. King Ludwig II., to mark his approval and appreciation, conferred upon him the order of knighthood of St. Michael. In the same year Rheinberger resigned his position as musical director of the Munich Choral Society and succeeded Franz Willner as director of the Court Church music (Königliche Hofcapellmeister). This appointment stimulated Rheinberger to compose many ecclesiastical works, one of which—a mass in eight parts, dedicated to Pope Leo XIII.—obtained for him the order of knighthood of Gregory the Great. In 1899, on his sixtieth birthday, Rheinberger was created Doctor *honoris causa* of the University of Munich—*modorum musicorum inventorem fecundissimum artis ad leges severiores adstrictae praeceptorem subtilissimum preisend.* He died in Munich, Nov. 25, 1901.

It is comparatively seldom that a highly distinguished composer attains great success as a teacher. Rheinberger, however, was accounted one of the foremost musical theorists and teachers of his day. Students came to his composition classes at the Munich Conservatorium not only from his own country but from many European countries, as well as from America. Three years were required to complete the full course of theoretical instruction in these classes. In the first year students were taught free harmonisation of chorales, including *canto fermo* in alto, tenor, and bass—the same for strings with free florid counterpoint. Second and third year: form, double counterpoint, fugue, vocal and instrumental in two to six parts, instrumentation, scoring of movements from Mozart's and Beethoven's sonatas and quartets, etc.

As an organ teacher Rheinberger's activity in his later years was somewhat restricted. His organ class consisted of four advanced students, generally chosen because of marked ability. The organ works of Bach and Mendelssohn, and Rheinberger's own organ sonatas, received the greatest amount of attention. He insisted upon a clear and noble delivery, his remarks upon the interpretation of his own works being especially valuable.

Rheinberger's compositions embrace almost every branch of musical art. All his works show marked individuality, together with an absolute mastery of musical technique. It is, however, as a choral writer and composer for the organ that he is especially distinguished. His twelve masses, Stabat Mater, De Profundis, and many other examples of church music are marked by earnestness and deep religious feeling. In 'Christophorus' (Legend for soli, chorus, and orchestra, op. 120) Rheinberger combines religious and secular sentiment in a masterly and convincing manner. The Christmas cantata, 'Stern von Bethlehem' (for soli, chorus, and orchestra, op. 164), is also remarkable for its sustained beauty and loftiness of conception. Amongst his finest secular vocal compositions are the 'Seebilder,' 'Das Thal des Espingo,' 'Am Walchensee,' 'Wittekind,' 'Montfort,' 'Toggenburg,' 'Die Rosen von Hildesheim.'

Hans von Bülow and Sir Charles Hallé were the first to introduce Rheinberger's music into England. At a pianoforte recital which Bülow gave in London in 1873, he played the 'Andante and Toccata,' op. 12, one of the finest and most brilliant of Rheinberger's pianoforte compositions. In the same year at the Musical Union, and also in the following year at a popular concert, Bülow gave the Pianoforte Quartet in E flat, op. 38, which achieved a wide popularity. Among his pianoforte compositions which have been received with special favour are the three 'Kleine Concertstücke,' op. 5, and 'Aus Italien,' op. 29.

Rheinberger's twenty organ sonatas are undoubtedly the most valuable addition to organ music since the time of Mendelssohn, and it is probably upon the artistic worth of these works that his position as a composer ultimately depends. They are characterised by a happy blending of the modern romantic spirit with masterly counterpoint and dignified organ style. As perfect examples of organ sonata form they are probably unrivalled. With the object of obtaining external and material relationship between the chief movements, Rheinberger generally introduced as a coda to his finale a brief summary of one or more of the chief subjects of the first movement. Another device with the same object in view—the unifying of the sonata—was the re-introduction, generally with fine artistic effect, of a first-movement subject as an integral part of the last movement. An instance of this procedure is found in Sonata No. 9 in B flat minor (op. 142). Here the principal subject of the first movement is re-introduced in the finale as the second subject and developed in connection with the fugal subject of this last movement. Similar examples of this method are found in Sonatas No. 16 (op. 175) and No. 17 (op. 181). Throughout the whole of the organ sonatas there is a constant flow of beautiful ideas, though a considerable distance separates his best and weakest movements. There is occasionally a tendency to prolong some of the movements, considering the materials upon which they are built. The two concertos for organ and orchestra show real breadth of treatment and a freedom of manipulation that appeal strongly to the musical sense.

Rheinberger was not much in sympathy with modern art. He strongly disapproved of Wagner's methods and theories. In the ante-chamber of his class-room were lying one day the opened scores of 'Lohengrin' and 'Der Freischütz,' the former on the top of the latter. As Rheinberger passed through, he glanced at the books, and then with a gesture full of meaning, as if to say, 'This is how it ought to be,' pulled out the 'Freischütz' and placed it on the top. In his later years Rheinberger suffered from a chronic lung disease contracted by excessive exposure when making a mountain tour in the Tyrol. His constant ill-health and naturally austere, retiring disposition precluded much personal intercourse with the outside world. Towards his pupils he was invariably exacting and often severe, but his musical genius and commanding personality never failed to compel their respect.

Rheinberger's individuality is faithfully reflected in his compositions. Thoroughness and unpretentiousness are qualities equally characteristic of the artist and of his work. His musical themes are for the most part of great beauty. Much of his work, however, betrays

a lack of strong impassioned enthusiasm, and seldom, if ever, attains to that degree of exalted musical inspiration which marks the finest creations of a great genius.

CATALOGUE OF RHEINBERGER'S COMPOSITIONS

- | | |
|---|---|
| Op. | Op. |
| 1. 4 Pieces, pf. | 74. 5 Male choruses. |
| 2. 5 Part-songs. | *75. 2 Vocal quartets, with pf. |
| 3. 7 Songs. | *76. 'Toggenburg,' soli, chorus, and pf. |
| 4. 5 Songs. | 77. Sonata, vln. and pf., or v'cello and pf. |
| 5. 3 Small pf. pieces. | 78. 3 Pf. pieces. |
| 6. 3 Studies, pf. | 79. Fantasia, orch. or pf., 4 hands. |
| 7. 3 Characteristic pieces, pf. | 80. 5 Part-songs. |
| 8. 'Waltnärrchen,' pf. | 81. 'Die todte Braut,' romance, mezzo-soprano, choir, and orch., or pf. |
| 9. 5 Studies, pf. | 82. String quintet, in A minor (or pf. duet). |
| 10. 'Wallenstein,' symphony. | 83. Missa brevis in D minor, choir. |
| 11. 5 Pieces, pf. | 84. Requiem in E flat, choir. |
| 12. Toccata, pf. | 85. 7 Male choruses. |
| 13. 'Tarantella,' pf., 4 hands. | 86. 4 Epic songs, male choir. |
| 14. 24 Preludes, pf. | 87. Symphony ('Florestine') in F. |
| 15. Duo, 3 pfs. | 88. 3rd Organ sonata ('Pastorale') in G (or pf. duet). |
| 16. 'Stabat Mater,' soli, chorus, and orch. | 89. String quartet in C minor. |
| 17. 2 Four-part Ballads. | 90. 'Vom Rheine,' 6 male choruses. |
| 18. Overture, 'Taming of the Shrew.' | 91. 'Johanniseacht,' male choir and pf. |
| 19. Toccata, pf. | 92. Sonata, pf. and v'cello, in C (or vln. and pf.). |
| 20. 'Die Sieben Eaben,' romantic opera in 3 acts. | 93. Theme and variations, string quartet in G minor (or pf. duet). |
| 21. 'Wasserfee,' vocal quartet and pf. | 94. Concerto, pf. and orch. in A flat. |
| 22. 4 Songs. | 95. 2 Choruses with orch. or pf. |
| 23. Fantasia, pf. | 96. 3 Latin hymns, three-part female choir and organ. |
| 24. 4 Vocal quartets. | *97. Ballad, 'Clarice of Eberstein,' soli, chorus, and orch. |
| 25. 'Lockung,' vocal quartet and pf. | 98. 4th Organ sonata, 'tonus peregrinus,' in A minor (or pf. duet). |
| 26. 7 Songs. | 99. Pf. sonata in D flat. |
| 27. 1st Organ Sonata, in C minor. | 100. 7 Songs, male choir. |
| 28. 4 Humoresken, pf. | 101. 3 Studies, pf. |
| 29. 'Aus Italien,' 3 pf. pieces. | 102. Ballad, 'Wittkind,' male chorus and orch., or pf. |
| 30. 7 Pf. duets (from the music to 'Der Wunderthätige Magus'). | 103. 3 Vocal duets, sop., bass, and pf. |
| 31. 5 Part songs. | 104. Toccata, pf. |
| *32. 'Laughter of Jairus,' cantata for children. | 105. Sonata, vln. and pf., in E minor. |
| 33. Prelude and fugue, pf. | 106. 2 Romantic songs, choir and orch., or pf. |
| 34. Trio, pf. and strings. | 107. 5 Hymns for choir. |
| 35. Hymn for female choir, organ, and harp. | 108. 'Am Strom,' 6 part-songs. |
| 36. 9 Duets, pf. (from the music to 'Die unheilbringende Krone'). | 109. Mass in E flat for double choir, dated Leo XIII. |
| *37. 'Poor Henry,' comic opera for children. | 110. Overture to Schiller's 'Demetrius' (or pf. duet). |
| 38. Quartet, pf. and strings, in E flat. | 111. 5th Organ sonata in F sharp (or pf. duet). |
| 39. 6 Pf. pieces, in fugal form. | 112. 2nd Trio, pf., vln. and v'cello, in A. |
| *40. 5 Motets, choir. | 113. 6 Studies for pf. (left hand). |
| 41. 7 Songs. | 114. Quintet, pf. and strings, in C. |
| 42. Etude and fugato, pf. | 115. Toccata, pf. in C minor. |
| 43. Capriccio giocoso, pf. | 116. 4 Songs, male choir. |
| 44. 3 Male choruses. | 117. 'Missa Sanctissime Trinitatis,' choir, in F. |
| 45. 2 Pf. studies on a theme by Handel. | 118. 6 Two-part hymns, with organ. |
| 46. 'Passion Music,' choir and organ. | 119. 6th Organ sonata, in E flat minor (or pf. duet). |
| 47. Symphonic sonata, pf. | *120. Legend, 'Christophorus,' soli, chorus, and orch., or pf. |
| 48. 4 Male choruses. | 121. Trio, pf. and strings, in B. |
| 49. 10 Organ trios. | 122. Sonata, C minor, pf., 4 hands (or 2 pfs., 2 hands). |
| 50. Ballad, 'Das Thal des Eapings,' male chorus and orch. | 123. 24 Fuguetten for organ. |
| 51. Improvisation on a theme from 'Die Zauberflöte,' pf. | 124. 8 Part-songs. |
| 52. 5 Part-songs. | 125. 7 Male choruses. |
| 53. 3 Studies, pf. | 126. Mass, three-part female choir, in A. |
| 54. 4 Hymns, mezzo-soprano and organ, or pf. | 127. 7th Organ sonata in F minor (or pf. duet). |
| 55. 8 Songs. | 128. 4 Religious songs, with organ. |
| 56. 4 Vocal quartets, with strings and pf. | 129. 3 Italian songs. |
| 57. 7 Songs. | 130. 6 Male choruses. |
| 58. 6 Hymns, choir. | 131. 8 Female choruses. |
| 59. Pf. study. | 132. 8th Organ sonata, in E minor (or pf. duet). |
| 60. Requiem, soli, chorus, and orch. | 133. 4 Motets, six-part choir. |
| 61. Theme and variations, pf. | 134. Easter hymn, double choir. |
| 62. Mass for one voice and organ. | |
| 63. 8 Part-songs. | |
| *64. 'May Day,' 5 three-part female choruses, with pf. | |
| 65. 2nd Organ sonata in A flat. | |
| 66. 3 Studies, pf. | |
| 67. 6 Preludes, pf. | |
| 68. 3 Pieces, in fugal form. | |
| 69. 3 3rd part-songs. | |
| 70. 'Thürmer's 'Fischerlein,' comic opera in 4 acts. | |
| 71. Ballad, 'König Erich,' chorus with pf. | |
| 72. 'Ans den Ferientagen,' 4 pf. duets. | |
| 73. 6 Male choruses. | |

- Op.
135. Pf. sonata, in E flat.
136. 14 Songs.
137. Organ concerto in F, with orch. (or pf. duet).
138. Stabat Mater, choir, string orch. and organ.
139. Nonet, wind and strings (or pf. duet).
140. 5 Hymns, choir and organ.
141. 6 Male choruses.
142. 8th Organ sonata, in B flat minor (or pf. duet).
143. 'Die Rosen von Hildesheim,' male chorus and wind instruments.
144. 3 Male choruses.
145. 'Montfort,' soli, chorus, and orch.
146. 10th Organ sonata, in B minor (or pf. duet).
147. String quartet in F.
148. 11th Organ sonata in D minor (or pf. duet).
149. Suite, organ, violin, 'cello, and string orch.
150. 6 pieces, violin and organ, or 'cello and organ.
151. Mass in G.
152. 30 Children's songs.
153. 'Das Zauberwort,' singspiel, in 2 acts, for children.
154. 12th Organ sonata, in D flat (or pf. duet).
*155. Mass, three-part female choir and organ.
156. 12 Characteristic pieces for organ.
157. 8 Sacred songs, with organ.
158. 9 Soprano (or baritone) songs.
159. Mass, four-part choir and organ, in F minor.
160. 7 Male choruses.
161. 13th Organ sonata, in E flat (or pf. duet).
162. 'Monologue,' 12 organ pieces.
*163. 5 Motets, five-part choir.
*164. 'Star of Bethlehem,' Christmas cantata, soli, chorus, and orch., or pf.
165. 14th Organ sonata, in C (or pf. duet).
166. Suite, vln. and organ, in G minor.
167. 'Meditations,' 12 organ pieces.
168. 15th Organ sonata, in D (or pf. duet).
169. Mass, soli, choir, and orch., or strings and organ.
170. 8 Four-part songs, 'Sturm und Frieden.'
*171. 'Marienische Hymnen,' voice and organ, or pf.
172. Mass, male choir with organ, or wind instruments.
173. 4 Male choruses.
174. 12 Organ pieces.
- Op.
175. 16th Organ sonata, in O sharp minor (or pf. duet).
176. 9 Advent-Motets, choir.
177. 2nd Concerto for organ and orch., in G minor (or pf. duet).
178. Sonata for horn and pf.
179. 'Hymnen an die Tonkunst,' for male chorus and orch.
180. 12 Characteristic pieces for pf.
181. 17th Organ sonata in B.
182. 'Vom goldenen Horn,' Türchisches Liederepiel with pf.
183. 12 Studies, pf.
184. Romantic songs for pf., in F sharp minor.
185. 7 Male choruses.
186. 8 Four-part songs, 'Jahreszeiten.'
*187. Mass, for female voices and organ, in G minor.
188. 18th Organ sonata, in A.
189. 13 Organ trios.
190. Mass, for male choir and organ, in F.
191. Trio, for pf., vln., and 'cello, in F.
192. Mass, 'Misericordias Domini,' choir and organ, in E.
193. 19th Organ sonata, in G minor.
194. Exhumm., for chorus and organ.
195. 'Akademische' overture, fugue with 8 themes for orch.
196. 20th Organ sonata, 'Zur Friedensfeier,' in F.
197. Mass (posthumous), choir and organ (finished by Louis Adolph Goerne of Boston).
Without Opus Numbers.
* 'Ave Maria,' soprano and organ, or three-part female choir.
Romance, for soprano and harp.
'Carmine sacra,' songs with organ.
Arrangement of Bach's 30 variations, for 2 pfs.
Three five-part songs.
Idylle for 'cello and pf.
Rhapsodie, for flute and pf., in B.
'Trennung,' for voice, pf., or organ.
'Walchlein,' for choir.
Pastorale, for oboe and organ, from op. 98.
Rhapsodie, for oboe and organ, or vln. and organ, from op. 127.
Toccata, from op. 122, for 2 pfs., 8 hands.

RHYTHM. This much-used and many-sided term may be defined as 'the systematic grouping of notes with regard to duration.' It is often inaccurately employed as a synonym for its two subdivisions, ACCENT and TIME, and in its proper signification bears the same relation to these that *metre* bears to *quantity* in poetry.

The confusion which has arisen in the employment of these terms is unfortunate, though so frequent that it would appear to be natural, and therefore almost inevitable. Take a number of notes of equal length, and give an emphasis to every second, third, or fourth, the music will be said to be in 'rhythm' of two, three, or four—meaning in *time*. Now take a number of these groups or bars and emphasise them in the same way as their subdivisions: the same term will still be employed, and rightly so. Again,

instead of notes of equal length, let each group consist of unequal notes, but similarly arranged, as in the following example from Schumann—

or in the Vivace of Beethoven's No. 7 Symphony: the form of these groups also is spoken of as the 'prevailing rhythm,' though here *accent* is the only correct expression.

Thus we see that the proper distinction of the three terms is as follows:—

Accent arranges a heterogeneous mass of notes into long and short;

Time divides them into groups of equal duration;

Rhythm does for these groups what *Accent* does for notes.

In short, Rhythm is the Metre of Music.

This parallel will help us to understand why the uneducated can only write and fully comprehend music in complete sections of four and eight bars. [Rhythm is an essential part of all primitive music, and every folk-song has a distinct rhythmical character. It was long before this characteristic was introduced into serious music, which had been rhythmless because the notes of plain-chant exist only with reference to the words.] In polyphonic music the termination of one musical phrase (foot, or group of accents) is always coincident with, and hidden by, the commencement of another. And this although the subject may consist of several phrases and be quite rhythmical in itself, as is the case in Bach's Organ Fugues in G minor and A minor. The *Rhythmus* of the ancients was simply the accent prescribed by the long and short syllables of the poetry, or words to which the music was set, and had no other variety than that afforded by their metrical laws. Modern music, on the other hand, would be meaningless and chaotic—a melody would cease to be a melody—could we not plainly perceive a proportion in the length of the phrases.

The bar-line is the most obvious, but by no means a perfect, means of distinguishing and determining the rhythm; but up to the time of Mozart and Haydn the system of barring, although used more or less accurately from the time of the Elizabethan composers, in Virginal music, etc., was but imperfectly understood. Many even of Handel's slow movements have only half their proper number of bar-lines, and consequently terminate in the middle of a bar instead of at the commencement; as, for instance, 'He shall feed His flock' (which is really in 6-8 time), and 'Surely He hath borne our griefs' (which should be 4-8 instead of C). Where the accent of a piece is strictly *binary* throughout, composers, even to this day, appear to be often in doubt about the rhythm, time, and

barring of their music. The simple and unmistakable rule for the latter is this: the last strong accent will occur on the first of a bar, and you have only to reckon backwards. If the piece falls naturally into groups of four accents it is four in a bar, but if there is an odd two anywhere it should all be barred as two in a bar. Ignorance or inattention to this causes us now and then to come upon a sudden change from C to 2-4 in modern music.

With regard to the regular sequence of bars with reference to close and cadence—which is the true sense of rhythm—much depends upon the character of the music. The dance-music of modern society must necessarily be in regular periods of 4, 8, or 16 bars. Waltzes, though written in 3-4 time, are almost always really in 6-8, and a dance-music writer will sometimes, from ignorance, omit an unaccented bar (really a half-bar), to the destruction of the rhythm. The dancers, marking the time with their feet, and feeling the rhythm in the movement of their bodies, then complain, without understanding what is wrong, that such a waltz is 'not good to dance to.'

In pure music it is different. Great as are the varieties afforded by the diverse positions and combinations of strong and weak accents, the equal length of bars, and consequently of musical phrases, would cause monotony were it not that we are allowed to combine sets of two, three, and four bars. Not so freely as we may combine the different forms of accent, for the longer divisions are less clearly perceptible; indeed, the modern complexity of rhythm, especially in German music, is one of the chief obstacles to its ready appreciation. Every one, as we have already said, can understand a song or piece where a half-close occurs at each fourth and a whole close at each eighth bar, where it is expected; but when an uneducated ear is continually being disappointed and surprised by unexpected prolongations and alterations of rhythm, it soon grows confused and unable to follow the sense of the music. Quick music naturally allows—indeed demands—more variety of rhythm than slow, and we can scarcely turn to any scherzo or finale of the great composers where such varieties are not made use of. Taking two-bar rhythm as the normal and simplest form—just as two notes form the simplest kind of accent—the first variety we have to notice is where one odd bar is thrust in to break the continuity, as thus in the Andante of Beethoven's C minor Symphony:

This may also be effected by causing a fresh phrase to begin with a strong accent on the weak bar with which the previous subject ended, thus really eliding a bar, as for instance in the minuet in Haydn's 'Reine de France' Symphony:

Here the bar marked (a) is the overlapping of two rhythmic periods.

Combinations of two-bar rhythm are the rhythms of four and six bars. The first of these requires no comment, being the most common of existing forms. Beethoven has specially marked in two cases (Scherzo of Ninth Symphony, and Scherzo of C# minor Quartet) 'Ritmo di 4 battute,' because, these compositions being in such short bars, the rhythm is not readily perceptible. The six-bar rhythm is a most useful combination, as it may consist of four bars followed by two, two by four, three and three, or two, two and two. The well-known minuet by Lulli (from 'Le Bourgeois Gentilhomme') is in the first of these combinations throughout.

And the opening of the Andante of Beethoven's First Symphony is another good example. Haydn is especially fond of this rhythm, especially in the two forms first named. Of the rhythm of three two bars a good specimen is afforded by the Scherzo of Schubert's C major Symphony, where, after the two subjects (both in four-bar rhythm) have been announced, the strings in unison mount and descend the scale in accompaniment to a portion of the first theme, thus:

A still better example is the first section of 'God save the King.'

This brings us to triple rhythm, uncombined with double.

Three-bar rhythm, if in a slow time, conveys a very uncomfortable lop-sided sensation to the uncultivated ear. The writer remembers an instance when a band could hardly be brought to play a section of an Andante in 9-8 time and rhythm of three bars. The combination of $3 \times 3 \times 3$ was one which their sense of accent refused to acknowledge. Beethoven has taken the trouble in the Scherzo of his Ninth Symphony to mark 'Ritmo di tre battute,' although

in such quick time it is hardly necessary; the passage,

being understood as though written—

Numerous instances of triplé rhythm occur, which he has not troubled to mark; as in the Trio of the C minor Symphony Scherzo:—

Rhythm of five bars is not, as a rule, productive of good effect, and cannot be used—any more than the other unusual rhythms—for long together. It is best when consisting of four bars followed by one, and is most often found in compound form—that is, as eight bars followed by two.

Minuet, Mozart's Symphony in C (No. 6).

A very quaint effect is produced by the unusual rhythm of seven. An impression is conveyed that the eighth bar—a weak one—has got left out through inaccurate sense of rhythm, as so often happens with street-singers and the like. Wagner has taken advantage of this in his 'Dance of Apprentices' ('Die Meistersinger'), thus:—

It is obvious that all largesymmetrical groups than the above need be taken no heed of, as they are reducible to the smaller periods. One more point remains to be noticed, which, a besuty in older and simpler music, is becoming a source of weakness in modern times. This is the disguising or concealing of the rhythm by strong accents or change of harmony in weak bars. The last movement of Beethoven's Piano-forte Sonata in D minor (op. 31, No. 2) affords a striking instance of this. At the very outset we are led to think that the change of bass at the fourth bar, and again at the eighth, indicates a new rhythmic period, whereas the whole

movement is in four-bar rhythm as unchanging as the semiquaver figure which pervades it. The device has the effect of preventing monotony in a movement constructed almost entirely on one single figure. The same thing occurs in the middle of the first movement of the Sonatina (op. 79, Presto alla Tedesca). Now in both of these cases the accent of the bars is so simple that the ear can afford to hunt for the rhythm and is pleased by the not too subtle artifice; but in slower and less obviously accented music such a device would be out of place; there the rhythm requires to be impressed on the hearer rather than concealed from him.

On analysing any piece of music it will be found that whether the *ultimate* distribution of the accents be binary or ternary, the larger divisions nearly always run in twos, the rhythms of three, four, or seven being merely occasionally used to break the monotony. This is only natural, for, as before remarked, the comprehensibility of music is in direct proportion to the simplicity of its rhythm, irregularity in this point giving a disturbed and emotional character to the piece, until, when all attention to rhythm is ignored, the music becomes incoherent and incomprehensible, though not of necessity disagreeable. In 'Tristan und Isolde' Wagner has endeavoured, with varying success, to produce a composition of great extent, from which rhythm in its larger signification shall be wholly absent. One consequence of this is that he has written the most tumultuously emotional opera extant; but another is that the work is a mere chaos to the hearer until it is closely studied.

F. C.

RIBATTUTA (re-striking), an old contrivance in instrumental music, gradually accelerating the pace of a phrase of two notes, until a trill was arrived at. Beethoven has preserved

it for ever in the Overture 'Leonore No. 3' (bar 75 of *Allegro*).

See too another passage farther on, before the Flute solo. [See TRILL.] G.

RIBIBLE, an obsolete instrument played by a bow. It is mentioned by Chaucer and other early writers, and appears to have been either the rebec itself, or a particular form of it. Sometimes it is spelled 'rubible.' It has been suggested that both 'rebec' and 'ribible' are derived from the Moorish word 'rebeh' or 'rehab,' which seems to have been the name of a somewhat similar musical instrument. (See REBEC.) F. K.

RIBS (Fr. *Éclisses*; Germ. *Zarge*). The sides of stringed instruments of the violin type, connecting the back and the belly. They consist of six (sometimes only five) pieces of maple, and should be of the same texture as the back, and if possible cut out of the same piece. After being carefully planed to the right thickness, they are bent to the required shape, and then glued together on the mould by means of the corner and top and bottom blocks, the angles being feather-edged. The back, the linings, and the belly are then added, and the body of the violin is then complete. The ribs ought to be slightly increased in depth at the broader end of the instrument, but many makers have neglected this rule. The flatter the model, the deeper the ribs require to be; hence the viol tribe, having perfectly flat backs and bellies of slight elevation, are very deep in the ribs. The oldest violins were often very deep in the ribs, but many of them have been since cut down. Carlo Bergonzi and his contemporaries had a fashion of making shallow ribs, and often cut down the ribs of older instruments, thereby injuring their tone beyond remedy. Instruments made of ill-chosen and unseasoned wood will crack and decay in the ribs sooner than in any other part; but in the best instruments the ribs will generally outlast both belly and back. Some old makers were in the habit of glueing a strip of linen inside the ribs. E. J. P.

RICCI, LUIGI, horn in Naples, June 8, 1805, in 1814 entered the Royal Conservatorio, then under Zingarelli, of which he became in 1819 one of the sub-professors together with Bellini. His first work, 'L'Impresario in angustie,' was performed by the students of the Conservatorio in 1823, and enthusiastically applauded. In the following four years he wrote 'La Cena frastornata,' 'L'Abate Taccarella,' 'Il Diavolo condannato a prender moglie,' and 'La Lucerna d'Epiteto,' all for the Teatro Nuovo. In 1828 his 'Ulisse,' at the San Carlo, was a failure. In 1829 'Il Colombo' in Parma and 'L'Orfanella di Ginevra' in Naples were both successful. The winter of 1829-30 was disastrous for Ricci, his four new operas ('Il Sonnambulo,' 'L'Eroina del Messico,' 'Annibale in Torino,' and 'La Neve') being all unsuccessful. In the autumn

of 1831 he produced at the Scala, Milan, 'Chiara di Rosenberg,' and this opera, performed by Grisi, Sacchi, Winter, Badioli, etc., was greatly applauded, and soon became successful in all the theatres of Italy. 'Il nuovo Figaro' failed in Parma in 1832. In it sang Rozer, who afterwards married Balfe. The same fate attended 'I due Sergenti' at the Scala in 1833, where the following year he gave 'Un'Avventura di Scaramuccia,' which was a very great success, and was translated into French by Flotow. The same year 'Gli esposti,' better known as 'Eran due ed or son tre,' was applauded in Turin, whilst 'Chi dura vince,' like Rossini's immortal 'Barbiere,' was hissed at Rome. It was afterwards received enthusiastically at Milan and in many other opera-houses of Europe. In 1835 'Chiara di Montalbano' failed at the Scala, while 'La scrva e l'ussero' was applauded in Pavia. Ricci had thus composed twenty operas when only thirty years old; and although many of his works had met with a genuine and well-deserved success, he was still very poor and had to accept the post of musical director of the Trieste Cathedral and conductor of the Opera. In 1838 his 'Nozze di Figaro' was a fiasco in Milan, where Rossini told him that its fall was due to the music being *too serious*.

For the next six years Ricci composed nothing. In 1844 he married Lidia Stoltz, by whom he had two children, Adelaide, who in 1867 sang at the Théâtre des Italiens in Paris, but died soon after, and Luigi, who lives in London. 'La Solitaria delle Asturie' was given in Odessa in 1844; 'Il Birraio di Preston' in Florence in 1847; and in 1852 'La Festa di Piedigrotta' was very successful in Naples. His last opera, 'Il Diavolo a quattro,' was performed in Trieste in 1859.

Luigi Ricci composed in collaboration with his brother FEDERICO 'Il Colonnello,' given in Rome, and 'M. de Chalumeaux,' in Venice, in 1835; in 1836 'Il Disertore per amore' for the San Carlo in Naples, and 'L'Amante di richiamo,' given in Turin in 1846. Of these four operas, 'Il Colonnello' alone had a well-deserved reception. But Ricci's masterpiece, the opera which has placed him in a very high rank among Italian composers, is 'Crispino e la Comare,' written in 1850 for Venice, and to which his brother Federico partly contributed. This opera, one of the best comic operas of Italy, enjoyed a long success all the world over.

Shortly after the production of 'Il Diavolo a quattro' in 1859, however, symptoms of insanity showed themselves, and the malady soon became violent. He was taken to an asylum at Prague, his wife's birthplace, and died there Dec. 31, 1859. He was much mourned at Trieste; a funeral ceremony was followed by a performance of selections from his principal works, his bust was placed in the lobby of the Opera-house, and a pension was granted to his widow. He

published two volumes of vocal pieces entitled 'Mes Loisirs' and 'Les inspirations du Thé' (Ricordi), and he left in MS. a large number of compositions for the cathedral service. His brother,

FEDERICO, was born in Naples, Oct. 22, 1809, entered the Royal Conservatorio of that town, where his brother was then studying, and received his musical education from Bellini and Zingarelli. In 1837 he gave 'La Prigione d'Edimburgo' in Trieste. The barcarola of this opera, 'Sulla poppa del mio brick,' was for long one of the most popular melodies of Italy. In 1839 his 'Duello sotto Richelieu' was only moderately successful at the Scala, but in 1841 'Michelangelo e Rolla' was applauded in Florence. In it sang Signora Strepponi, who afterwards married Verdi. 'Corrado d'Altamura' was given at the Scala in the same year. At the personal request of Charles Albert he composed in 1842 a cantata for the marriage of Victor Emmanuel, and another for a court festival. In 1843 his 'Vallombra' failed at La Scala. 'Isabella de' Medici' (1844) in Trieste, 'Estella' (1846) in Milan, 'Griselda' (1847) and 'I due ritratti' (1850) in Venice, were all failures. 'Il Marito e l'Amante' was greatly applauded in Vienna in 1852, but his last opera, 'Il paniere d'amore,' given there the following year, did not succeed. He was then named Musical Director of the Imperial Theatres of St. Petersburg, which post he occupied for many years. Of the operas written in collaboration with his brother we have already spoken.

He brought out at the Fantaisies-Parisiennes, Paris, 'Une Folie à Rome,' Jan. 30, 1869, with great success. Encouraged by this he produced an opéra-comique in three acts, 'Le Docteur rose' (Bouffes Parisiens, Feb. 10, 1872), and 'Une Fête à Venise,' a reproduction of his earlier work, 'Il Marito e l'Amante' (Athénée, Feb. 15, 1872). Shortly after this Federico retired to Conegliano in Italy, where he died Dec. 10, 1877. He was concerned partially or entirely in nineteen operas. Of his cantatas we have spoken. He also left two masses, six albums or collections of vocal pieces (Ricordi), and many detached songs.

L. R.

RICCIO, TEODORO, a native of Brescia, who after holding the post of choirmaster at one of the churches of Brescia was in 1576 invited by George Frederick, Margrave of Brandenburg-Anspach, to be his capellmeister at Anspach. When in 1579 George Frederick became also Duke of Prussia, Riccio accompanied him as capellmeister to his new capital Königsberg, where, like Scandello, also a native of Brescia, in similar circumstances at Dresden, Riccio adopted the Lutheran faith, and seems to have settled for the rest of his life with an occasional visit to Anspach. His adoption of Lutheranism made little difference to the nature of his compositions for use in church, as Latin was still

largely used in the services of Lutheran court chapels, and so we find that his publications mainly consist of various volumes of Latin masses, motets, and magnificats, a 4 to 8 or 12. Probably Johann Eccard, who was called to be his coadjutor at Königsberg from 1581, provided the music required for German texts. Besides the Latin works the *Quellen-Lexikon* mentions two incomplete books of madrigals a 5 and 6, and one book of Canzone alla napolitana. 'Riccio is supposed to have died between 1603 and 1604, since in the latter year Eccard is known to have definitely succeeded him as capellmeister.

J. R. M.

RICERCARE, or RICERCATA (from *ricercare*, 'to search out'), an Italian term of the 17th century, signifying a fugue of the closest and most learned description. Frescobaldi's Ricercari (1615), which are copied out in one of Dr. Burney's note-books (Brit. Mus. Add. MS. 11,588), are full of augmentations, diminutions, inversions, and other contrivances, in fact *recherchés* or full of *research*. J. S. Bach has affixed the name to the 6-part Fugue in his 'Musikalisches Opfer,' and the title of the whole contains the word in its initials—Regis Inusu Cantio Et Reliqua Canonica Arte Resoluta. But the term was also employed for a fantasia on some popular song, street-cry, or such similar theme. Dr. Cummings has a MS. book, dated 1580-1600, containing twenty-two ricercari by Cl. da Coreggio, Gianetto Palestina (*sic*), A. Vuillaert (*sic*), O. Lasso, Clemens non Papa, Cip. Rore, and others—compositions in four and five parts, on 'Ce moy de May,' 'Vestiva i colli,' 'La Rossignol,' 'Susan un jour,' and other apparently popular songs. This use of the word appears to have been earlier than the other, as pieces of the kind by Adriano (1520-67) are quoted.

G.

RICH, JOHN, son of Christopher Rich, patentee of Drury Lane Theatre, was born about 1682. His father, having been compelled to quit Drury Lane, had erected a new theatre in Lincoln's Inn Fields, but died in 1714 when it was upon the eve of being opened. John Rich, together with his brother Christopher, then assumed the management and opened the house about six weeks after his father's death. Finding himself unable to contend against the superior company engaged at Drury Lane, he had recourse to the introduction of a new species of entertainment—pantomime—in which music, scenery, machinery,¹ and appropriate costumes formed the prominent features. In these pieces he himself, under the assumed name of Lun, performed the part of Harlequin with such ability as to extort the admiration of even the most determined opponents of that class of entertainment. [He played Harlequin in 'Cheats, or the Tavern Bilkers,' a pantomime by John

¹ Most of Rich's machinery was invented by John Hoole, the translator of Tasso, and his father, Samuel Hoole, an eminent watchmaker.

Weaver (adapted from 'Les Fourberies de Scapin'), with music by Dr. Pepusch, in 1716-17. W. H. G. F.] [See also BEGGAR'S OPERA, vol. i. p. 277; LINCOLN'S INN FIELDS THEATRE, vol. ii. p. 733; PANTOMIME, vol. iii. p. 616.] Encouraged by success he at length decided upon the erection of a larger theatre, the stage of which should afford greater facilities for scenic and mechanical display, and accordingly built the first Covent Garden Theatre, which he opened Dec. 7, 1732. Hogarth produced a caricature on the occasion of the removal to the new house, entitled 'Rich's Glory, or his Triumphal Entry into Covent Garden,' copies of which will be found in Wilkinson's *Londina Illustrata*, and in H. Saxe Wyndham's *Annals of Covent Garden Theatre*, vol. i. He conducted the new theatre with great success until his death, relying much upon the attraction of his pantomimes and musical pieces, but by no means neglecting the regular drama. In his early days he had attempted tragic acting, but failed. He died Nov. 26, 1761, and was buried Dec. 4, in Hillingdon churchyard, Middlesex. (See list of productions, etc., in the *Dict. of Nat. Biog.*) W. H. H.

RICHAFORT, JEAN, a Flemish musician of the earlier part of the 16th century, whom we know on the authority of the poet Ronsard to have been a pupil of Josquin Després. He was one of the more distinguished composers of the period immediately after Josquin, in which with the retention of what was valuable in the older technique of contrapuntal artifice, there was, as Mr. Wooldridge observes, a greater approach made towards purity of sound and beauty of expression. The only known dates of Richafort's career are that between 1543 and 1547 he was choirmaster of the church of St. Gilles, Bruges, but this is supposed to have been towards the end of his life, since as early as 1519 a motet of his composition appears in one of the collections of Petrucci, the Motetti de la Corona, lib. ii. His works appeared only in the collections of the time, and specially in those of Attaignant and Modernus between 1530 and 1550. Two masses are especially mentioned, one 'Ogenetrix gloriosa' published by Attaignant 1532, and afterwards copied into the Sistine chapel and other choir-books; the other, 'Veni Sponsa Christi,' 1540, based on one of his own motets, which Ambros describes as the finest of the collection of motets in which it appears. The motet has been reprinted in Maldeghem's 'Trésor.' A Requiem, a 6, would seem from the account which Ambros gives of it to be on the whole more curious than beautiful, though it testifies to the aim after intensity of expression. While the other voices sing the ritual text, the two tenor sing in canon 'Circumdederunt me gemitus mortis,' and also reply to each other as if with exclamations of personal sorrow, 'c'est douleur non pareille.' If some of Richafort's

works retain a character of antique severity, others, as Eitner observes, are remarkable for their wonderful beauty, clearness, and simplicity. Several of his motets Ambros singles out for high praise. Of one which he mentions, 'Quem dicunt homines,' the opening portion is given by Mr. Wooldridge in the *Oxford History of Music*, vol. ii. pp. 269-70. Glarean gives in full Richafort's motet 'Christus resurgens' as a good example of the polyphonic treatment of the Ionic mode. Of the fifteen chansons of Richafort in various collections, two fine specimens are accessible in modern reprints, 'De mon triste déplaisir' in *Commer Collectio* xii., and 'Sur tous regrets' in Eitner's republication of Ott's 'Liederbuch,' 1544. J. R. M.

RICHARD CŒUR DE LION. An opéra-comique in three acts; words by Sedaine, music by Grétry. Produced at the Opéra-Comique Oct. 21, 1784. The piece has a certain historical value. One of the airs, 'Une fièvre brûlante,' was for long a favourite subject for variations. Beethoven wrote a set of eight upon it (in C major), published in Nov. 1798, having probably heard the air at a concert of Weigl's in the preceding March. Another set of seven (also in C) were for long attributed to Mozart, but are now decided not to be by him. The air 'O Richard, ô mon roi, l'univers t'abandonne,' was played on a memorable occasion in the early stage of the French Revolution—at the banquet at Versailles on Oct. 1, 1789. [Two versions were made for the English stage; General Burgoyne's was acted at Drury Lane in 1786, and Leonard MacNally's at Covent Garden in the same year. Thomas Linley adapted Grétry's music to one of them and the opera remained a standard work for many years. F. K.] G.

RICHARDS, HENRY BRINLEY, son of Henry Richards, organist of St. Peter's, Carmarthen, was born there Nov. 13, 1817, and intended for the medical profession, but preferred the study of music, and became a pupil of the Royal Academy of Music, where he obtained the King's scholarship in 1835, and again in 1837. He soon gained a high position in London as a pianist. As a composer he was financially very successful, his song 'God bless the Prince of Wales' (published in 1862) having reached a high pitch of popularity, even out of England, and his sacred songs, part-songs, and pianoforte pieces having been most favourably received. [An overture in F minor was performed in 1840.] He composed additional songs for the English version of Auber's 'Crown Diamonds,' when produced at Drury Lane in 1846. He especially devoted himself to the study of Welsh music (upon which he lectured), and many of his compositions were inspired by his enthusiastic love for his native land. He exerted himself greatly in promoting the interests of the South Wales Choral Union

on its visits to London in 1872 and 1873, when they successfully competed at the National Music Meetings at the Crystal Palace. [He died in London, May 1, 1885.] (Additions from *Dict. of Nat. Biog.*)

W. H. H.

RICHARDSON, JOSEPH, an eminent flute-player, born in 1814, and died March 22, 1862. He was engaged in most of the London orchestras, was solo player at Jullien's concerts for many years, and afterwards became principal flute in the Queen's private band. [He played at the Melodists' Club and the Società Armonica in 1836, and was a member of the Liszt concert party in 1841, and visited Dublin in that capacity. W. H. G. F.] His neatness and rapidity of execution were extraordinary, and were the great features of his playing. He composed numerous fantasias for his instrument, usually extremely brilliant.

G.

RICHARDSON, VAUGHAN, born in London in the latter half of the 17th century, was in 1685 a chorister of the Chapel Royal, under Dr. Blow. He was possibly a nephew of Thomas Richardson (alto singer, gentleman of the Chapel Royal from 1664 to his death, July 23, 1712, and lay vicar of Westminster Abbey), and a brother of Thomas Richardson, who was his fellow-chorister. In June 1693 he was appointed organist of Winchester Cathedral. In 1701 he published 'A collection of Songs for one, two, and three voices, accompany'd with instruments.' He was author of some church music: a fine anthem, 'O Lord God of my salvation,' and an Evening Service in C (composed in 1713), are in the Tudway Collection (Harl. MSS. 7341 and 7342), and another anthem, 'O how amiable,' also in Tudway, and printed in Page's 'Harmonia Sacra'; others are in the books of different cathedrals. He was also composer of 'An Entertainment of new Musick, composed on the Peace' [of Ryswick], 1697; 'A Song in praise of St. Cecilia,' written for a celebration at Winchester about 1700, and a 'set of vocal and instrumental music,' written for a like occasion in 1703. [An autograph volume of music, containing fourteen anthems, a 'Song for the King' (1697), six sonatas for strings, etc., is in the possession of J. S. Bumpus, Esq.] He died before June 26, 1729, and not, as commonly stated, in 1715.

W. H. H.

RICHAULT, CHARLES SIMON, head of a family of celebrated French music-publishers, born at Chartres, May 10, 1780, came early to Paris, and served his apprenticeship in the music-trade with J. J. Momigny. From him he acquired a taste for the literature of music and chamber compositions; and when he set up for himself at No. 7 Rue Grange Batelière in 1805, the first works he published were classical. He soon perceived that there was an opening in Paris for editions of the best works of German musicians, and the early efforts of French composers of promise. His calcula-

tion proved correct, and his judgment was so sound that his business increased rapidly, and he was soon obliged to move into larger premises in the Boulevard Poissonnière, first at No. 16, and then at No. 26. Here he published Mozart's Concertos in 8vo score, and other works of the classical composers of Germany, and acquired the bulk of the stock of the firms of Frey, Naderman, Sieber, Pleyel, Petit, Erard, and Delahante. He moved in 1862 to No. 4 in the Boulevard des Italiens. In this house he died, Feb. 20, 1866, well known as a publisher of judgment and ability, a man of keen intellect, and a pleasant social companion. His son,

GUILLAUME SIMON, born in Paris, Nov. 2, 1806, had long been his father's partner, and continued in the old line of serious music. At the same time he realised that in so important a business it was well that the Italian school should be represented, and accordingly bought the stock of the publisher Pacini. On his death, Feb. 7, 1877, his son,

LÉON, born in Paris, August 6, 1839, resolved to give a fresh impetus to the firm, which already possessed 18,000 publications. Bearing in mind that his grandfather had been the first to publish Beethoven's Symphonies and Mozart's Concertos in score; to make known in France the oratorios of Bach and Handel, and the works of Schubert, Mendelssohn, and Schumann; to bring out the first operas of Ambrose Thomas and Victor Massé; to encourage Berlioz when his 'Damnation de Faust' was received with contempt, and to welcome the orchestral compositions of Reber and Gouvy; M. Léon Richault above all determined to maintain the editions of the German classical masters which had made the fortune of the firm. His intelligent administration of his old and honourable business procured him a silver medal at the International Exhibition of 1878, the highest recompense open to music-publishers, the jury having refused them the gold medal.

G. C.

RICHTER, ERNST FRIEDRICH EDUARD, son of a schoolmaster, born Oct. 24, 1808, at Grossschönau in Lusatia; from his eleventh year attended the Gymnasium at Zittau, managed the choir, and arranged independent performances. In 1831 he went to Leipzig to study with Weinlig, the then Cantor, and made such progress that soon after the foundation of the Conservatorium, in 1843, he became one of the professors of harmony and counterpoint. Up to 1847 he conducted the Singakademie; he was afterwards organist successively of the Peterskirche (1851) and the Neukirche and Nicolai-kirche (1862). After Hauptmann's death, Jan. 3, 1868, he succeeded him as Cantor of the Thomasschule. Of his books, the *Lehrbuch der Harmonie* (afterwards called *Praktische Studien zur Theorie*), (12th ed. 1876), has been translated into Dutch, Swedish, Italian, Russian, Polish, and English. The *Lehre von der Fuge*

HANS RICHTER

has passed through three editions, and *Vom Contrapunct* through two. The English translations of all these are by Franklin Taylor, and were published by Cramer & Co. in 1864, 1878, and 1874 respectively. Richter also published a *Catechism of Organ-building*. Of his many compositions *de circonstance* the best known is the Cantata 'Dithyrambe,' for the Schiller Festival in 1859. Other works are—an oratorio, 'Christus der Erlöser' (March 8, 1849); masses, psalms, motets, organ-pieces, string-quartets, and sonatas for PF. He became one of the King's Professors in 1868, died at Leipzig, April 9, 1879, and was succeeded as Cantor by W. Rust.

F. G.

RICHTER, FERDINAND TOBIAS, a native of Würzburg, the date of whose birth is given as 1649, succeeded Alessandro Poglietti as Imperial Court organist at Vienna in 1683. In the *Quellen-Lexikon* he is wrongly said to have been the teacher in composition of the Emperor Leopold I., but he was undoubtedly music teacher to Leopold's children, the future Emperor Joseph I., and the three Archduchesses. Richter enjoyed a high reputation as organ-player and composer. Several even of Pachelbel's pupils at Nuremberg came afterwards to Vienna to perfect themselves in organ-playing by further instructions from Richter, and Pachelbel himself must have held Richter in high esteem, since in 1699 he dedicated to him along with Buxtehude his organ or clavier work entitled 'Hexachordum Apollinis.' It is all the more remarkable that so few organ works of Richter have been preserved. In a recent volume of the *Denkmäler der Tonkunst in Oesterreich* (Jahrg. xiii. Th. 2) three clavier suites out of a set of five, and an organ toccata with short fugued Versetti out of a set of five on the church tones intended for liturgical use, have been printed for the first time, but hardly suffice to explain his great reputation. The Imperial Library at Vienna preserves in MS. two serenatas by Richter evidently intended for court festivities, 'L' Istro ossequioso,' and 'Le promesse degli Dei,' also five spiritual dramas composed for performance by the pupils of the Jesuit college at Vienna. There are also some instrumental works, a sonata *a 7* (described as for two Trombe, one Timpano, two violini, two viole da braccio e cembalo), along with some Balletti *a 4* and *a 5*, also two Sonatas *a 8*. Richter died at Vienna in 1711.

J. R. M.

RICHTER, FRANZ XAVER, was born at Hölleschau in Moravia on Dec. 1 or 31,¹ 1709. His first official post was that of capellmeister to the Abbot of Kempten, which he held from 1740 until 1750, when difficulties appear to have arisen with the authorities as the result of his duplication of posts. He had been a bass-singer at

the court of Mannheim since 1747, and no doubt this was the cause of his dismissal from Kempten. He is stated by F. Walter, *Geschichte des Theaters*, etc. (1898), to have appeared in operatic performances in 1748 and 1749. He was also engaged as leader of the second violins in the orchestra. An oratorio, 'La deposizione della croce,' was performed at Mannheim in 1748. He left Mannheim for Strasburg in 1769, becoming capellmeister at the Minster, and spending the remainder of his life there. He died Sept. 12, 1789, and was succeeded by Ignaz Pleyel, who, according to Fétis, had acted as his assistant for six years. Burney, in his *Present State (Germany)*, ii. 327, speaks of the great reputation Richter enjoyed, and of the want of real individuality in his music. He speaks of his frequent employment of the device called ROSALIA. He left sixty-four symphonies, of which the themes of sixty-two are given in the volume devoted to the Mannheim school of symphonists in the *Denkm. der Tonk. in Bayern*, vol. iii. 1. Three of the symphonies are printed in full, and the preface contains a detailed account of the composer. An enormous mass of church music is ascribed to him in Riemann's *Lexikon*, such as twenty-eight masses, two requiems, sixteen psalms, thirty-eight motets, etc. The *Quellen-Lexikon* gives a more limited list of extant works, and contains many doubtful statements concerning the composer.

M.

RICHTER, HANS, celebrated conductor, born April 4, 1843, at Raab in Hungary, where his father was capellmeister of the cathedral. His mother, *née* Josephine Czazinsky, sang the part of Venus in 'Tannhäuser' at the first performance in Vienna in 1857; she was afterwards a very successful teacher of singing in Vienna, and died Oct. 20, 1892. The father died in 1853, and Hans was then placed at the Löwenburg Convict-School in Vienna. Thence he went into the choir of the Court chapel, and remained there for four years. In 1860 he entered the Conservatorium, and studied the horn under Kleinecke, the violin under Heissler, and theory under Sechter. After a lengthened engagement as horn-player in the orchestra of the Kärnthnerthor opera he was recommended by Esser to Wagner, went to him at Lucerne, remained there from Oct. 1866 to Dec. 1867, and made the first fair copy of the score of the 'Meistersinger.' In 1868 he accepted the post of conductor at the Hof- und National Theatre, Munich, and remained there for a year. He next visited Paris, and after a short residence there, proceeded to Brussels for the production of 'Lohengrin' (March 22, 1870). He then returned to Wagner at Lucerne, assisted at the first performance of the 'Siegfried Idyll' (Dec. 1870), and made the fair copy of the score of the 'Nibelungen Ring' for the engraver. In April 1871 he went to Peth as chief conductor of the National Theatre, a post to which he owes

¹ Gerber's *Lexikon*, followed by Riemann, in his *Lexikon*, and in his preface to the *Denkm.* volume containing works by Richter, gives Dec. 1 as the date of birth; Eitner's *Quellen-Lexikon* follows Lobstein's *Beiträge*, etc., in giving Dec. 31 as the date.

much of his great practical knowledge of the stage and stage business. In Jan. 1875 he conducted a grand orchestral concert in Vienna, which had the effect of attracting much public attention to him, and accordingly, after the retirement of Dessoff from the Court opera, Richter was invited to take the post, which he entered upon in the autumn of 1875, concurrently with the conductorship of the Philharmonic Concerts. In 1884-90 he acted as conductor of the concerts of the Gesellschaft der Musikfreunde.

He had conducted the rehearsals of the 'Nibelungen Ring' at Bayreuth, and in 1876 he directed the whole of the rehearsals and performances of the Festival there, and, at the close of the third set of performances, received the Order of Maximilian from the King of Bavaria, and that of the Falcon from the Grand Duke of Weimar. In 1877 he produced the 'Walküre' in Vienna, and followed it in 1878 by the other portions of the trilogy. In 1878 he was made court capellmeister, and received the Order of Franz Josef. His first introduction to English audiences was at the famous Wagner Concerts given in the Albert Hall in 1877, when he shared the duties of conductor with Wagner himself. In 1879 (May 5-12), 1880 (May 10-June 14), and 1881 (May 9-June 23) were started what were at first called 'Orchestral Festival Concerts,' but afterwards the 'Richter Concerts,' in London, which excited much attention, chiefly for the conductor's knowledge of the scores of Beethoven's symphonies and other large works, which he conducted without book. [The Richter Concerts went on for many years with great success, but after the great conductor went to live in Manchester in 1897, as director of the Manchester Orchestra, the London concerts were given less regularly. In 1882 and 1884 he conducted important performances of German operas in London, introducing 'Die Meistersinger' and 'Tristan' to the London public. The special performances of German opera which form part of the Covent Garden season have been conducted by Richter since 1904. Since 1885 he has conducted the Birmingham Festival. In that year he received the honorary degree of Mus.D. at Oxford. He has numberless decorations. (See *Musical Times*, 1899, pp. 441-6.) A special concert in celebration of his thirty years' work in England took place at the Queen's Hall, June 3, 1907.]

Herr Richter is certainly one of the very greatest of conductors. He owes this position in great measure to the fact of his intimate practical acquaintance with the technique of the instruments in the orchestra, especially the wind, to a degree in which he stands alone. As a musician he is a self-made man, and enjoys the peculiar advantages which spring from that fact. His devotion to his orchestra is great, and the high standard and position of the band of the Vienna opera-house is due to him. He is a

great master of *crescendo* and *decrescendo*, and of the finer shades of accelerating and retarding the time. F. G.

RICOCHET. The employment of the bounding *atacцо*—*staccato à ricochet*—is thus indicated in violin music. As the best examples of this bowing are to be found in the works of the French and Belgian composers, it is probable that it owes its invention to the father of virtuosity—Paganini. The same system which governs the flying *staccato*—so brilliantly applied by Paganini, de Bériot, Wieniawski, Vieuxtemps, and latter-day virtuosos, to the execution of a swift chromatic passages—dominates the *ricochet*, but being thrown upon the strings less rapidly, and with more force, the effect is heavier. To accomplish this style of bowing neatly, the stick should be held so that the full breadth of the hair at the upper part shall fall upon the strings accurately. The wrist must remain flexible, while the fingers grip the bow firmly and relax to allow the bow to rebound. Two graceful examples of the application of the *ricochet* are to be found in the *Boiero* of de Bériot's 'Scène de Ballet,' and in the *Polonaise* of Vieuxtemps's 'Ballade et Polonaise.' O. R.

RICORDI, GIOVANNI, founder of the well-known music-publishing house in Milan, where he was born in 1785, and died March 15, 1853. He made his first hit with the score of Mosca's 'Pretendenti delusi.' Since that time the firm has published for all the great Italian *maestri*, down to Verdi and Boito, and has far outstripped all rivals. The *Gazzetta musicale*, edited with great success by Mazzucato, has had much influence on its prosperity. It possesses the whole of the original scores of the operas it has published—a most interesting collection. Giovanni's son and successor TITO (born Oct. 29, 1811, died Sept. 7, 1888) further enlarged the business. The catalogue issued in 1875 contains 738 pages large 8vo. The present head of the firm is his son GIULIO DI TITO, born Dec. 19, 1840, who is a practised writer, a skilled draughtsman, a composer of drawing-room music, under the pseudonym of Burgmein, and in all respects a thoroughly cultivated man. F. G.

RIDDELL, JOHN (or 'Riddle'), composer of Scottish dance music, horn at Ayr, Sept. 2, 1718. It is stated in 'The Ballads and Songs of Ayrshire,' 1846, that Riddell was blind from infancy, also that he was composer of the well-known tune 'Jenny's Bawbee.' This latter statement is not authenticated. Burns mentions him as 'a bard-born genius,' and says he is composer of 'this most beautiful tune' ('Finlayston House').

Riddell published about 1766 his first 'Collection of Scots Reels, or Country Dances, and Minuets,' and a second edition of it, in oblong folio, in 1782. He died April 5, 1795. F. K.

RIDDELL, ROBERT, a Scottish antiquary,

and friend of Robert Burns. He was an army (or Volunteer) captain, and resided on the family estate Glenriddell, Dumfriesshire. He was an amateur composer of Scottish dance music, and wrote the music to one or two of Burns's songs. His most interesting publication (1794) is 'A Collection of Scotch, Galwegian, and Border Tunes . . . selected by Robert Riddell of Glenriddell, Esq.,' folio. He died at Friars' Carse, April 21, 1794. F. K.

RIDOTTO. See REDOUTE.

RIEDEL, CARL, born Oct. 6, 1827, at Kronenberg in the Rhine provinces. Though always musically inclined he was educated for trade, and was at Lyons in the silk business until 1848, when he determined to devote himself to music as a profession. He returned home and at once began serious study under the direction of Carl Wilhelm, then an obscure musician at Crefeld, but destined to be widely known as the author of the 'Wacht am Rhein.' Late in 1849 Riedel entered the Leipzig Conservatorium, where he made great progress under Moscheles, Hauptmann, Becker, and Plaidy. He had long had a strong predilection for the vocal works of the older masters of Germany and Italy. He practised and performed in a private society at Leipzig Astorga's 'Stabat,' Palestrina's 'Impropria,' and Leo's 'Miserere,' and this led him to found a singing society of his own, which began on May 17, 1854, with a simple quartet of male voices, and was the foundation of the famous Association which, under the name of the 'Riedelsche Verein,' was so celebrated in Leipzig. Their first public concert was held in November 1855. The reality of the attempt was soon recognised; members flocked to the society; and its first great achievement was a performance of Bach's B minor Mass, April 10, 1859. At that time Riedel appears to have practised only ancient music, but this rule was by no means maintained; and in the list of the works performed by the Verein we find Beethoven's Mass in D, Kiel's 'Christus,' Berlioz's 'Messe des Morts,' and Liszt's 'Graner Messe' and 'St. Elizabeth.' Riedel's devotion to his choir was extraordinary: he was not only its conductor, but librarian, secretary, treasurer, all in one. His interest in the welfare of music was always ready and always effective, and many of the best vocal associations of North Germany owe their success to his advice and help. He was one of the founders of the 'Beethovenstiftung,' and an earnest supporter of the Wagner performances at Bayreuth in 1876. His own compositions are chiefly part-songs for men's voices, but he edited several important ancient works by Praetorius, Franck, Eccard, and other old German writers, especially a 'Passion' by Heinrich Schütz, for which he selected the best portions of four Passions by that master—a proceeding certainly deserving all that can be

said against it. Riedel died in Leipzig, June 3, 1888. G.

RIEM, WILHELM FRIEDRICH, born at Cölleda in Thuringia, Feb. 17, 1779, was one of J. A. Hiller's pupils in the Thomasschule at Leipzig. In 1807 he was made organist of the Reformed church there, and in 1814 of the Thomasschule itself. In 1822 he was called to Bremen to take the cathedral organ and be director of the Singakademie, where he remained till his death, April 20, 1837. He was an industrious writer. His cantata for the anniversary of the Augsburg Confession, 1830 (for which Mendelssohn's Reformation Symphony was intended) is dead; so are his quintets, quartets, trios, and other large works, but some of his eight sonatas and twelve sonatinas are still used for teaching purposes. He left two books of studies for the PF., which are out of print, and sixteen progressive exercises, besides useful compositions for the organ. G.

RIEMANN, KARL WILHELM JULIUS HUGO, was born at Grossmehlra near Sondershausen, July 18, 1849, and studied law, etc., at Berlin and Tübingen. He saw active service in the Franco-German war, and afterwards devoted his life to music, studying in the Leipzig Conservatorium. After some years' residence at Bielefeld as a teacher, he was appointed to the post of 'privatdozent' in the University of Leipzig, which he held from 1878 to 1880, going thence to Bromberg; in 1881-90 he was teacher of the piano and theory in the Hamburg Conservatorium, and subsequently (after a three-months' stay at the conservatorium of Sondershausen) was given a post at the Conservatorium of Wiesbaden (1890-95). In the latter year he returned to Leipzig, as a lecturer in the University, and in 1901 was appointed professor. He has been amazingly active as a writer on every branch of musical knowledge, but his work is as thorough as if it had been small in extent. On the teaching of harmony, on musical phrasing and the peculiarities of notation required for explaining his system to students, he has strongly supported various innovations, most of them due to his own inventive faculty. The complete list of his works is given in his own *Musiklexikon*, to which the reader must be referred; *Die Natur der Harmonik* (1882), *Vereinfachte Harmonielehre* (1893), *Lehrbuch des . . . Contrapunkts* (1888), have been translated into English, as well as the various catechisms dealing with every branch of musical study, and the famous *Musiklexikon* (first edition, 1882, sixth, 1905, Engl. translation, 1893, etc.). The useful *Opernhandbuch* (1884-93) and works on musical history must not be forgotten. As a practical illustration of his excellent method of teaching the art of phrasing, his editions of classical and romantic pianoforte music, called 'Phrasierungsausgaben,' may be mentioned. He has edited many

masterpieces of ancient music, as, for instance, the works of Abaco and the Mannheim symphonists for the Denkmäler der Tonkunst in Bayern (1900 and 1902 respectively). His original compositions—for he has found time to write music as well as musical literature—are numerous but not very important, being mainly of an educational kind; but his position in the musical world of Germany is deservedly a very high one. M.

RIEMSDIJK, J. C. M. VAN, born 1843, died June 30, 1895, at Utrecht, was a member of an aristocratic family, and thus grew up amid the best and most powerful social influences. An enthusiastic amateur musician, he threw himself into the work of furthering the cause of music. A cultivated scholar, he devoted himself to editing the old songs of the Netherlands with marked success. A practical and business-like citizen, he became Technical Director of the State railway. His house was always open to any artists, and his welcome was always ready for those who followed music as a profession.

He was chairman of the 'Society of Musical history in the North Netherlands,' in which capacity he doubtless had many facilities for collecting old Netherland Folk-Songs, of which he availed himself in the most able manner. His works are as follows:—

1881. *State Music School of Utrecht 1631-1881* (a complete history of the Art of Music in the Netherlands between those dates).

*1882. *Netherland Dances arranged for FF. Duet.*

1888. The first Music books of Tyman Susato (c. 1545), a collection of Netherland Folk Songs of the 16th century.

*1888. *Hortus Musicus of J. A. Reinken (1623-1722)* for two violins, viola, and bass (translation into Dutch).

*1890. *Twenty-four Songs of the 15th and 16th centuries with FF. accompaniment.*

1896. *Folk Song book of the Netherlands* (posthumous).

The works marked thus * are among the publications of the Vereeniging voor N.-Nederlands Musiekschiedenis. D. H. .

RIENZI, DER LETZTE DER TRIBUNEN (the last of the Tribunes). An opera in five acts; words (founded on Bulwer's novel) and music by Wagner. He adopted the idea in Dresden in 1837; two acts were finished early in 1839, and the opera was produced at Dresden, Oct. 20, 1842. 'Rienzi' was brought out in French (Nuitter and Guillaume) at the Théâtre Lyrique, April 16, 1869, and in English at Her Majesty's Theatre, London (Carl Rosa), Jan. 27, 1879. G.

RIES. A distinguished family of musicians.

1. JOHANN RIES, native of Benzheim on the Rhine, born 1723, was appointed Court trumpeter to the Elector of Cologne at Bonn [with a salary of 192 thalers], May 2, 1747, and violinist in the Capelle, March 5, 1754. On April 27, 1764, his daughter Anna Maria was appointed singer. In 1774 she married Ferdinand Drewer, violinist in the band, and remained first soprano till the break-up in 1794. Her father died at Cologne in 1784. Her brother, FRANZ ANTON, was born at Bonn, Nov. 10, 1755, and was an infant phenomenon on the violin; learned from J. P. Salomon, and was able to take his father's place in the orchestra at the age of eleven. His salary began

when he was nineteen [at 25 thalers a year; he occupied the post until 1774]. In 1779 he visited Vienna, and made a great success as a solo and quartet player. But he elected to remain, on poor pay, in Bonn, and was rewarded by having Beethoven as his pupil and friend. [On March 2, 1779, he petitioned the Elector Maximilian for a post, and received it on May 2.] During the poverty of the Beethoven family, and through the misery caused by the death of Ludwig's mother in 1787, Franz Ries stood by them like a real friend. In 1794 the French arrived, and the Elector's establishment was broken up. Some of the members of the band dispersed, but Ries remained, and documents are preserved which show that after the passing away of the invasion he was to have been Court-musician.¹ Events, however, were otherwise ordered; he remained in Bonn, and at Godesberg, where he had a little house, till his death; held various small offices, culminating in the Bonn city government in 1800, taught the violin, and brought up his children well. He assisted Wegeler in his Notices of Beethoven, was present at the unveiling of Beethoven's statue in 1845, had a Doctor's degree and the Order of the Red Eagle conferred on him, and died, Nov. 1, 1846, aged ninety-one all but nine days.

2. Franz's son FERDINAND, who with the Archduke Rudolph enjoys the distinction of being Beethoven's pupil, was born at Bonn in November (baptized Nov. 28) 1784. He was brought up from his cradle to music. His father taught him the pianoforte and violin, and B. Romberg the violoncello. In his childhood he lost an eye through small-pox. After the break-up of the Elector's band he remained three years at home, working very hard at theoretical and practical music, scoring the quartets of Haydn and Mozart, and arranging the 'Creation,' the 'Seasons,' and the Requiem with such ability that they were all three published by Simrock.

In 1801 he went to Munich to study under Winter, in a larger field than he could command at home. Here he was so badly off as to be driven to copy music at 3d. a sheet. But poor as his income was he lived within it, and when after a few months Winter left Munich for Paris, Ries had saved seven ducats. With this he went to Vienna in October 1801, taking a letter from his father to Beethoven. Beethoven received him well, and when he had read the letter said, 'I can't answer it now; but write and tell him that I have not forgotten the time when my mother died'; and knowing how miserably poor the lad was, he on several occasions gave him money unasked, for which he would accept no return. The next three years Ries spent in Vienna. Beethoven took

¹ See the curious and important lists and memorandums, published for the first time in Thayer's *Beethoven*, i. 248.

a great deal of pains with his pianoforte-playing, but would teach him nothing else. He, however, prevailed on Albrechtsberger to take him as a pupil in composition. The lessons cost a ducat each; Ries had in some way saved up twenty-eight ducats, and therefore had twenty-eight lessons. Beethoven also got him an appointment as pianist to Count Browne, the Russian *chargé d'affaires*, and at another time to Count Lichnowsky. The pay for these services was probably not over-abundant, but it kept him, and the position gave him access to the best musical society. Into Ries's relations with Beethoven we need not enter here. They are touched upon in the sketch of the great master in vol. i. of this work, and they are fully laid open in Ries's own invaluable notices. He had a great deal to bear, and considering the secrecy and imperiousness which Beethoven often threw into his intercourse with every one, there was probably much unpleasantness in the relationship. Meantime of course Ries must have become saturated with the music of his great master; a thing which could hardly tend to foster any little originality he may ever have possessed.

As a citizen of Bonn he was amenable to the French conscription, and in 1805 was summoned to appear there in person. He left in Sept. 1805, made the journey on foot *via* Prague, Dresden, and Leipzig, reached Coblenz within the prescribed limit of time, and was then dismissed on account of the loss of his eye. He then went on to Paris, and existed in misery for apparently at least two years, at the end of which time he was advised to try Russia. On August 27, 1808, he was again in Vienna, and soon afterwards received from Reichardt an offer of the post of capellmeister to Jerome Bonaparte, King of Westphalia, at Cassel, which Reichardt alleged had been refused by Beethoven. Ries behaved with perfect loyalty and straightforwardness in the matter. Before replying, he endeavoured to find out from Beethoven himself the real state of the case; but Beethoven having adopted the idea that Ries was trying to get the post over his head, would not see him, and for three weeks behaved to him with an incredible degree of cruelty and insolence. When he could be made to listen to the facts he was sorry enough, but the opportunity was gone.

The occupation of Vienna (May 12, 1809) by the French was not favourable to artistic life. Ries, however, as a French subject, was free to wander. He accordingly went to Cassel, possibly with some lingering hopes, played at Court, and remained till the end of February 1810, very much applauded and fêted, and making money—but had no offer of a post. From Cassel he went by Hamburg and Copenhagen to Stockholm, where we find him in Sept. 1810, making both money and reputation.

He had still his eye on Russia, but between Stockholm and Petersburg the ship was taken by an English man-of-war, and all the passengers were turned out upon an island in the Baltic. In Petersburg he found Berniard Romberg, and the two made a successful tour, embracing places as wide apart as Kiev, Reval, and Riga. The burning of Moscow (Sept. 1812) put a stop to his progress in that direction, and we next find him again at Stockholm in April 1813, *en route* for England. By the end of the month he was in London.

Here he found his countryman and his father's friend, Salomon, who received him cordially and introduced him to the Philharmonic Concerts. His first appearance there was March 14, 1814, in his own PF. Sextet. His symphonies, overtures, and chamber works frequently occur in the programmes, and he himself appears from time to time as a PF. player, but rarely if ever with works of Beethoven's. Shortly after his arrival he married an English lady of great attractions, and he remained in London till 1824, one of the most conspicuous figures of the musical world. 'Mr. Ries,' says a writer in the *Harmonicon* of March 1824, 'is justly celebrated as one of the finest pianoforte performers of the day; his hand is powerful and his execution certain, often surprising; but his playing is most distinguished from that of all others by its romantic wildness.'

His sojourn here was a time of herculean labour. His compositions numbered at their close nearly 180, including 6 fine symphonies; 4 overtures; 6 string quintets, and 14 do. quartets; 9 concertos for PF. and orchestra; an octet, a septet, 2 sextets, and a quintet, for various instruments; 3 PF. quartets, and 5 do. trios; 20 duets for PF. and violin; 10 sonatas for PF. solo; besides a vast number of rondos, variations, fantasias, etc., for the PF. solo and dnet. Of these 38 are attributable to the time of his residence here, and they embrace 2 symphonies, 4 concertos, a sonata, and many smaller pieces. As a pianist and teacher he was very much in request. He was an active member of the Philharmonic Society. His correspondence with Beethoven during the whole period is highly creditable to him, proving his gratitude towards his master, and the energy with which he laboured to promote Beethoven's interests. That Beethoven profited so little therefrom was no fault of Ries's.

Having accumulated a fortune adequate to the demands of a life of comfort, he gave a farewell concert in London, April 8, 1824, and removed with his wife to Godesberg, near his native town, where he had purchased a property. Though a loser by the failure of a London bank in 1825-26, he was able to live independently. About 1830 he removed to Frankfurt. His residence on the Rhine brought him into close contact with the Lower Rhine

Festivals, and he directed the performances of the years 1825, 1829, 1830, 1832, 1834, and 1837, as well as those of 1826 and 1828 in conjunction with Spohr and Klein respectively. In 1834 he was appointed head of the town orchestra and Singakademie at Aix-la-Chapelle. But he was too independent to keep any post, and in 1836 he gave this up and returned to Frankfort. In 1837 he assumed the direction of the Cecilian Society there on the death of Schellble, but this lasted a few months only, for on Jan. 13, 1838, he died after a short illness.

The principal works which he composed after his return to Germany are 'Die Räuberbraut,' which was first performed in Frankfort probably in 1829, then in Leipzig, July 4, and London, July 15, of the same year, and often afterwards in Germany; another opera, known in Germany as 'Liska,' but produced at the Adelphi, London, in English, as 'The Sorcerer,' by Arnold's company, August 4, 1831, and a third, 'Eine Nacht auf dem Libanon'; an oratorio, 'Der Sieg des Glaubens' (The Triumph of the Faith), apparently performed in Dublin for the first time in 1831¹ and then at Berlin, 1835; and a second oratorio, 'Die Könige Israels' (The Kings of Israel), Aix-la-Chapelle, 1837. He also wrote much chamber music and six symphonies. All these works, however, are dead. Beethoven once said of his compositions, 'he imitates me too much.' He caught the style and the phrases, but he could not catch the immortality of his master's work. One work of his will live—the admirable *Biographical Notices of Ludwig van Beethoven*, which he published in conjunction with Dr. Wegeler (Coblenz, 1838). The two writers, though publishing together, have fortunately kept their contributions quite distinct; Ries's occupies from pp. 76 to 163 of a little duodecimo volume, and of these the last thirty-five pages are occupied by Beethoven's letters. The work is translated into French by Le Gentil (Dentu, 1862), and partially into English by Moscheles, as an Appendix to his version of Schindler's *Life of Beethoven*.

3. HUBERT, youngest brother of the preceding, was born at Bonn, April 1, 1802. He made his first studies as a violinist under his father, and afterwards under Spohr. Hauptmann was his teacher in composition. From 1824 he lived at Berlin. In that year he entered the band of the Königstadt Theatre, Berlin, and in the following year became a member of the Royal band. In 1835 he was appointed Director of the Philharmonic Society at Berlin. In 1836 he was nominated Concertmeister, and in 1839 elected a member of the Royal Academy of Arts. [In 1851 he became a teacher at the Kgl. Theater-instrumentalschule, from which he retired with a pension in 1872.] A thorough musician and a solid violinist, he was held in great esteem as

a leader, and more especially as a methodical and conscientious teacher. His Violin-School for beginners is a very meritorious work, eminently practical, and widely used. He published two violin-concertos, studies and duets for violins, and some quartets. An English edition of the Violin-School appeared in 1873 (Hofmeister). He died in Berlin, Sept. 14, 1886. Three of his sons gained reputation as musicians:—

LOUIS, violinist, born at Berlin, Jan. 30, 1830, pupil of his father and of Vieuxtemps, has, since 1853, been settled in London, where he enjoys great and deserved reputation as violinist and teacher. He was a member of the Quartet of the Musical Union from 1855 to 1870, and held the second violin at the Monday Popular Concerts from their beginning in 1859, until his retirement in 1897.

ADOLPH, pianist, born at Berlin, Dec. 20, 1837, died in April 1899. He was a pupil of Kullak for the piano, and of Boehmer for composition, and lived in London as a pianoforte teacher. He published a number of compositions for the piano, and some songs. A. W. T.; with additions in square brackets by E. H.-A.

RIES, FRANZ, violinist and composer, was born on April 7, 1846, in Berlin. His musical gifts were apparent in early youth. The possessor of an alto voice of exceptional beauty, he was admitted at the age of twelve to the *Königl. Domchor* (royal Cathedral choir), which then, under Neithardt's direction, enjoyed considerable reputation in the musical circles of Berlin. He studied the violin in the first instance under his father, and afterwards, in Paris, under Léon Massart and Henri Vieuxtemps. In composition he was a pupil of Friedr. Kiel. Gained in 1868 the first prize at the Paris Conservatoire, and was active in the musical life of the city as soloist and also as viola-player in the Vieuxtemps Quartet. In 1870 he migrated, owing to the Franco-German war, to London, appearing as a soloist at the Crystal Palace. But in 1872 an unfortunate nerve affection of the left hand compelled him to renounce the career of an executive artist. He founded in 1874 a publishing business in Dresden, and ten years later became partner in the firm Ries & Erler in Berlin, where he still resides. As a composer his main successes have been made in four suites for violin and pianoforte, which are in the repertory of almost every famous violinist. He has also written a string quintet, two string quartets, a dramatic overture, piano and violin solos and arrangements, besides a series of songs, one of which, the 'Rheinlied,' has taken rank in the Rhine provinces as a Folk-song. w. w. c.

RIETER-BIEDERMANN. An eminent German firm of music-publishers. The founder was Jacob Melchior Rieter-Biedermann (born May 14, 1811; died Jan. 25, 1876), who in June 1849 opened a retail business and lending-

¹ Information from L. M'C. L. Dix, Esq.

library at Winterthur. Since the first work was published in 1856, the business has continually improved and increased. In 1862, a publishing branch was opened at Leipzig. The stock catalogue of the firm includes music by Berlioz, Brahms (PF. Concerto, PF. Quintet, Requiem, Magelone-Lieder, etc.); A. Dietrich; J. O. Grimm; Gernsheim; von Herzogenberg; F. Hiller; Holstein; Kirchner; Lachner; F. Marschner; Mendelssohn (op. 98, Nos. 2, 3; opp. 103, 105, 106, 108, 115, 116); Raff; Reinecke; Schumann (opp. 130, 137, 138, 140, 142); etc. G.

RIETZ (originally RITZ¹) EDUARD, the elder brother of Julius Rietz, an excellent violinist, was born at Berlin, Oct. 17, 1802. He studied first under his father, a member of the royal band, and afterwards, for some time, under Rode. He died too young to acquire more than a local reputation, but his name will always be remembered in connection with Mendelssohn, who had the highest possible opinion of his powers as an executant,² and who counted him amongst his dearest and nearest friends. It was for Rietz that he wrote the Octet which is dedicated to him, as well as the Sonata for PF. and violin, op. 4. For some years Rietz was a member of the royal band, but as his health failed him in 1824 he had to quit his appointment and even to give up playing. He founded and conducted an orchestral society at Berlin, with considerable success; he died of consumption Jan. 23, 1832. Mendelssohn's earlier letters teem with affectionate reference to him, and the news of his death affected him deeply.³ The Andante in Mendelssohn's string quintet, op. 18, was composed at Paris 'in memory of E. Ritz,' and is dated on the autograph 'Jan. 23, 1832,' and entitled 'Nachruf.' P. D.

RIETZ, JULIUS, younger brother of the preceding, violoncellist, composer, and eminent conductor, was born at Berlin, Dec. 28, 1812. Brought up under the influence of his father and brother, and the intimate friend of Mendelssohn, he received his first instruction on the violoncello from Schmidt, a member of the royal band, and afterwards from Bernhard Romberg and Moritz Ganz. Zelter was his teacher in composition. Having gained considerable proficiency on his instrument, he obtained, at the age of sixteen, an appointment in the band of the Königsstadt Theatre, where he also achieved his first success as a composer by writing incidental music for Holtei's drama, 'Lorbeerbaum und Bettelstab.' In 1834 he went to Düsseldorf as second conductor of the opera. Mendelssohn, who up to his death showed a warm interest in Rietz, was at that time at the head of the opera, and on his

resignation in the summer of 1835, Rietz became his successor. He did not, however, remain long in that position, for, as early as 1836, he accepted, under the title of 'Städtischer Musikdirector,' the post of conductor of the public subscription-concerts, the principal choral society, and the church-music at Düsseldorf. In this position he remained for twelve years, gaining the reputation of an excellent conductor, and also appearing as a solo violoncellist in most of the principal towns of the Rhine-province. During this period he wrote some of his most successful works—incidental music to dramas of Goethe, Calderon, Immermann, and others; music for Goethe's *Liederspiel* 'Jery und Bätely,' his first Symphony in G minor; three overtures—'Hero and Leander,'⁴ Concert overture in A major, Lustspiel-overture, the 'Altdeutscher Schlachtgesang' and 'Dithyrambe'—both for men's voices and orchestra. He was six times chief conductor of the Lower Rhine Festivals—in 1845, 1856, and 1869 at Düsseldorf; in 1864, 1867, and 1873 at Aix.

In 1847, after Mendelssohn's death, he took leave of Düsseldorf, leaving Ferdinand Hiller as his successor, and went to Leipzig as conductor of the opera and the Singakademie. [He gave up the post at the opera in 1854.] From 1848 we find him also at the head of the Gewandhaus orchestra, and teacher of composition at the Conservatorium. In this position he remained for thirteen years. Two operas, 'Der Corsar' and 'Georg Neumark,' were failures, but his Symphony in E_b had a great and lasting success. At this period he began also to show his eminent critical powers by carefully revised editions of the scores of Mozart's symphonies and operas, of Beethoven's symphonies and overtures for Breitkopf & Härtel's complete edition, and by the work he did for the Bach and (German) Handel Societies. His editions of Handel's scores contrast very favourably with those of some other editors. An edition of Mendelssohn's complete works closed his labours in this respect.

In 1860 the King of Saxony appointed him Conductor of the Royal Opera and of the music at the Hofkirche at Dresden. He also accepted the post of Artistic Director of the Dresden Conservatorium. In 1874 the title of General-Musikdirector was given to him. The University of Leipzig had already in 1859 conferred on him the honorary degree of Doctor of Philosophy.

Rietz was for some time one of the most influential musicians of Germany. He was a good violoncellist, but soon after leaving Düsseldorf he gave up playing entirely. As a composer he showed a rare command of all the resources of the orchestra and a complete mastery of all technicalities of composition. Yet few of Rietz's works have shown any vitality.

¹ Uniformly so spelt by Mendelssohn.

² 'I long earnestly,' says he, in a letter from Rome, 'for his violin, and his depth of feeling; they come vividly before my mind when I see his beloved neat handwriting.'

³ Mendelssohn's *Letters from Italy and Switzerland*, English translation, p. 327.

⁴ See Mendelssohn's *Letters*, ii. p. 234 (Eng. ed.).

As a composer he can hardly be said to show distinct individuality; his ideas are wanting in spontaneity, his themes are generally somewhat dry, and their treatment often rather diffuse and laboured. In fact Rietz was an excellent musician, and a musical intellect of the first rank—but not much of a poet. His great reputation rested, first, on his talent for conducting, and secondly on his rare acquirements as a musical scholar. An unfailing ear, imperturbable presence of mind, and great personal authority, made him one of the best conductors of modern times. The combination of practical musicianship with a natural inclination for critical research and a pre-eminently intellectual tendency of mind, made him a first-rate judge on questions of musical scholarship. After Mendelssohn and Schumann, Rietz probably did more than anybody else to purify the scores of the great masters from the numerous errors of text by which they were disfigured. He was an absolute and uncompromising adherent of the classical school, and had but little sympathy with modern music after Mendelssohn; and even in the works of Schubert, Schumann, and Brahms he was over-apt to see the weak points. As to the music of the newest German School, he held it in abhorrence, and would show his aversion on every occasion. He was, however, too much of an opera-conductor not to feel a certain interest in Wagner, and in preparing his operas would take a special pride and relish in overcoming the great and peculiar difficulties contained in Wagner's scores.

Rietz has many personal friends, but, as will appear natural with a man of so pronounced a character and opinions, also a number of bitter enemies. He died at Dresden, Sept. 12, 1877, leaving a large and valuable musical library, which was sold by auction in Dec. 1877. Besides the works already mentioned he published a considerable number of compositions for the chamber, songs, concertos for violin and for various wind-instrumenta. He also wrote a great Mass.

P. D.

RIGADOON (French *Rigadon* or *Rigaudon*), a lively dance, which most probably came from Provence or Languedoc, although its popularity in England has caused some writers to suppose that it is of English origin. It was danced in France in the time of Louis XIII., but does not seem to have become popular in England until the end of the 17th century. According to Rousseau it derived its name from its inventor, one Rigaud, but others connect it with the English 'rig,' i.e. wanton or lively.

The Rigadoon was remarkable for a peculiar jumping step (which is described at length in Compañ's *Dictionnaire de la Danse*, Paris, 1802); this step survived the dance for some time. The music of the Rigadoon is in 2-4 or C time, and consists of three or four parts, of which the third is quite short. The number of bars

is unequal, and the music generally begins on the third or fourth beat of the bar. The following example is from the third part of Henry Playford's 'Apollo's Banquet' (sixth edition, 1690). The same tune occurs in 'The Dancing Master,' but in that work the bars are incorrectly divided.

W. B. S.

RIGBY, GEORGE VERNON, born at Birmingham, Jan. 21, 1840, when about nine years old was a chorister of St. Chad's Cathedral, Birmingham, where he remained for about seven years. In 1860, his voice having changed to a tenor, he decided upon becoming a singer, tried his strength at some minor concerts in Birmingham and its neighbourhood, and succeeded so well that in 1861 he removed to London, and on March 4, appeared at the Alhambra, Leicester Square (then a concert room, managed by E. T. Smith), and in August following at Mellon's Promenade Concerts at Covent Garden. In 1865 he sang in the provinces as a member of H. Corri's Opera Company, until November, when he went to Italy and studied under Sangiovanni at Milan, where, in Nov. 1866, he appeared at the Carcano Theatre as the Fisherman in 'Guglielmo Tell.' He next went to Berlin, and in Jan. 1867 appeared at the Victoria Theatre there, in the principal tenor parts in 'Don Pasquale,' 'La Sonnambula,' and 'L'Italiana in Algeri.' He then accepted a three months' engagement in Denmark, and performed Almaviva in the 'Barbiere,' the Duke in 'Rigoletto,' and other parts, in Copenhagen and other towns. He returned to England in Sept. 1867, and sang at various places. In 1868 he was engaged at the Gloucester Festival with Sims Reeves, whose temporary indisposition afforded him the opportunity of singing the part of Samson in Handel's oratorio, in which he acquitted himself so ably that he was immediately engaged by the Sacred Harmonic Society, where he appeared, Nov. 27, 1868, with signal success, and immediately established himself as an oratorio singer, appearing at all the principal festivals. In 1869 he appeared on the stage of the Princess's Theatre as Acis in Handel's 'Acis

and Galatea.' His voice was of fine quality, full compass, and considerable power, and he sang with earnestness and care. Since an appearance at Brighton in 1887 in 'Eli,' he has virtually retired.

W. H. H.

RIGHINI, VINCENZO, a well-known conductor of the Italian opera in Berlin, born at Bologna, Jan. 22, 1756. As a boy he was a chorister at San Petronio, and had a fine voice, but owing to injury it developed into a tenor of so rough and muffled a tone, that he turned his attention to theory, which he studied with Padre Martini. In 1776 he sang for a short time in the Opera buffa at Prague, then under Bustelli's direction, but was not well received. He made a success there, however, with three operas of his composition, 'La Vedova scaltra,' 'La Bottega del Caffè,' and 'Don Giovanni,' also performed in Vienna (August 1777), whither Righini went on leaving Prague in 1780. There he became singing-master to Princess Elisabeth of Würtemberg, and conductor of the Italian opera. He next entered the service of the Elector of Mainz, (1788-92) and composed for the Elector of Treves 'Alcide al Bivio' (Coblenz) and a missa solennis (1790). In April 1793 (owing to the success of his 'Enea nel Lazio') he was invited to succeed Alessandri at the Italian Opera of Berlin, with a salary of 3000 thalers (about £450). Here he produced 'Il Trionfo d'Arianna' (1793), 'Armida' (1799), 'Tigrane' (1800), 'Gerusalemme liberata,' and 'La Selva incantata' (1802). The last two were published after his death with German text (Leipzig, Herklotz).

In 1793 Righini married Henriette Kneisel (born at Stettin in 1767, died of consumption at Berlin, Jan. 25, 1801), a charming blonde, and according to Gerber, a singer of great expression. After the death of Friedrich Wilhelm II. (1797) his post became almost a sinecure, and in 1806 the opera was entirely discontinued. Righini was much beloved. Gerber speaks in high terms of his modesty and courtesy, and adds, 'It is a real enjoyment to hear him sing his own pieces in his soft veiled voice to his own accompaniment.' As a composer he was not of the first rank, and of course was eclipsed by Mozart. His best point was his feeling for *ensemble*, of which the quartet in 'Gerusalemme' is a good example. He was a successful teacher of singing, and counted distinguished artists among his pupils. After the loss of a promising son in 1810, his health gave way, and in 1812 he was ordered to try the effects of his native air at Bologna. When bidding good-bye to his colleague, Anselm Weber, he said, 'It is my belief that I shall never return; if it should be so, sing a Requiem and a Miserere for me'—touching words, too soon fulfilled by his death at Bologna, August 19, 1812. His own Requiem (score in the Berlin Library) was performed by the Singakademie in his honour.

Besides twenty operas, of which a list is given by Fétis (thirteen are mentioned in the *Quellen-Lexikon* as still extant), Righini composed church music—a Te Deum and a Missa Solennis were published—several cantatas, and innumerable Scenas, Lieder, and songs; also a short ballet, 'Minerva belebt die Statuen des Dädalus' (1802), and some instrumental pieces, including a serenade for two clarinets, two horns, and two bassoons (1799, Breitkopf & Härtel). One of his operas, 'Il Convitato di pietra, ossia il dissoluto,' will always be interesting as a forerunner of Mozart's 'Don Giovanni.' It was produced at Vienna, August 21, 1777 (ten years before Mozart's), and is described by Jahn (*Mozart*, ii. 333). His best orchestral work is his overture to 'Tigrane,' which was often played in Germany and England. Breitkopf & Härtel's Catalogue shows a tolerably long list of his songs, and his exercises for the voice (1804) are amongst the best that exist. English amateurs will find a duet of his, 'Come opprima,' from 'Enea nel Lazio,' in the 'Musical Library,' vol. i. p. 8, and two airs in Lonsdale's 'Gemme d'Antichità.' He was one of the sixty-three composers who set the words 'In questa tomba oscura,' and his setting was published in 1878 by Ritter of Magdeburg.

F. G.

RIGOLETTO. An opera in three acts; libretto by Piave (founded on V. Hugo's *Le Roi s'amuse*), music by Verdi. Produced at the Teatro Fenice, Venice, March 11, 1851, and given in Italian at Covent Garden, May 14, 1853, and at the Italiens, Paris, Jan. 19, 1857.

G.

RILLÉ, FRANÇOIS ANATOLE LAURENT DE, the composer of an enormous number of part-songs and other small choral works, born at Orleans in 1828. He was at first intended to be a painter, but altered his purpose and studied music under an Italian named Comoghio, and subsequently under Elwart. His compositions, of which a list of the most important is given in the supplement to Fétis, have enjoyed a lasting popularity with 'orphéoniste' societies, and although they contain few if any characteristics which would recommend them to the attention of earnest musicians, they have that kind of vigorous effectiveness which is exactly suited to their purpose. A large number of operettas of very slight construction have from time to time been produced in Paris, and the composer has made various more or less successful essays in the department of church music.

M.

RIMBAULT, EDWARD FRANCIS, LL.D., son of Stephen Francis Rimbault, organist of St. Giles in the Fields, was born in Soho, June 13, 1816. He received his first instruction in music from his father, but afterwards became a pupil of Samuel Wesley. At sixteen years old he was appointed organist of the Swiss Church, Soho. He early directed his attention to the study of musical history and literature, and in 1838

delivered a series of lectures on the history of music in England. In 1840 he took an active part in the formation of the Musical Antiquarian and Percy Societies, of both which he became secretary, and for both which he edited several works. In 1841 he was editor of the musical publications of the Motet Society. In the course of the next few years he edited a collection of Cathedral Chants; The Order of Daily Service according to the use of Westminster Abbey; a reprint of Lowe's *Short Direction for the performance of Cathedral Service*; Tallis's Responses; Marbeck's Book of Common Prayer, noted; a volume of unpublished Cathedral Services; Arnold's Cathedral Music; and the oratorios of 'Messiah,' 'Samson,' and 'Saul,' for the Handel Society. In 1842 he was elected a F.S.A. and member of the Academy of Music in Stockholm, and obtained the degree of Doctor in Philosophy. He was offered, but declined, the appointment of Professor of Music in Harvard University, U.S.A. In 1848 he received the honorary degree of LL.D., from the university of Oxford. He lectured on music at the Collegiate Institution, Liverpool; the Philosophic Institute, Edinburgh; the Royal Institution of Great Britain, and elsewhere. He published *The Organ, its History and Construction* (1855) (in collaboration with Mr. E. J. Hopkins), *Notices of the Early English Organ Builders* (1865), *History of the Pianoforte* (1860), *Bibliotheca Madrigaliana* (1847), *Musical Illustrations of Percy's Reliques, The Ancient Vocal Music of England, The Rounds, Catches, and Canons of England* (in conjunction with Rev. J. P. Metcalfe), two collections of Christmas Carols. 'A Little Book of Songs and Ballads,' etc. etc. He edited North's *Memoirs of Music* (1846), Sir Thomas Overbury's Works (1856), the *Old Cheque Book of the Chapel Royal* (1872), and two Sermons by Boy Bishops. He arranged many operas and other works, was author of many elementary books, and an extensive contributor to periodical literature. His compositions were but few, the principal being an operetta, 'The Fair Maid of Islington' (1838), music to 'The Castle Spectre' (1839), and a posthumous cantata, 'Country Life.' His pretty little song, 'Happy Land,' had an extensive popularity. After his resignation of the organistship of the Swiss Church, he was successively organist of several churches and chapels, such as St. Peter's, Vere Street. He died, after a lingering illness, Sept. 26, 1876 (buried at Highgate Cemetery), leaving a fine musical library, which was sold by auction at Sotheby's on July 3, 1877, and following days. See an account of the library in the *Musical World*, 1877, p. 539. An obituary notice appeared in the *Musical Times*, 1877, p. 427, and other papers. The most complete list of his works is in *Brit. Mus. Biog.*

W. H. H.

RIMSKY-KORSAKOV, NICHOLAS ANDREIE-

VICH, was born March 18 (O.S. March 6), 1844, in the little town of Tikhvin, in the Government of Novgorod. The child's earliest musical impressions were derived from a small band, consisting of four Jews employed upon the family estate. These musicians mustered two violins, cymbals, and a tambourine, and were often summoned to the house to enliven the evenings when there was company or dancing. At six years old the boy began to be taught the piano, and at nine he made his first attempts at composition. His talent for music was evident to his parents, but being of aristocratic family he was destined for one of the only two professions then considered suitable for a young man of good birth. In 1856 Rimsky-Korsakov entered the Naval College in St. Petersburg, where he remained until 1862. This period of his life was not very favourable to his musical development, but he managed on Sundays and holidays to receive some instruction in the violoncello from Ulich, and in the pianoforte from an excellent teacher, Fedor Kanillé. His acquaintance with Balakirev, dating from 1861, was the decisive moment in his career. Intercourse with the young but capable leader of the new Russian school of music, and with his disciples, Cui, Moussorgsky, and Borodin, awoke in the young naval cadet an ambition to study the art to more serious purpose. He had only just begun to profit by Balakirev's teaching when he was sent abroad; but, undaunted by the interruption, during this cruise, which lasted three years (1862-65), he completed a symphony, op. 1. From the letters which he wrote at this time to César Cui it is evident that he composed under great difficulties, but the work was completed in spite of them, and, movement by movement, the manuscript was sent to Balakirev for advice and correction. The work was performed for the first time in December 1865, when Balakirev conducted it at one of the concerts of the Free School of Music, St. Petersburg. It was the first symphony from the pen of a native composer, and the public, who gave it a hearty reception, were surprised when a youth in naval uniform appeared to acknowledge their ovation. Rimsky-Korsakov now remained in St. Petersburg, and was able to renew his musical studies and his close association with the circle of Balakirev.

The compositions which followed the First Symphony—the symphonic poem 'Sadko' (1867), and the opera 'Pskovitianka' ('The Maid of Pskov')—called the attention of all musical Russia to this promising composer. In 1871 he was appointed professor of composition and instrumentation in the St. Petersburg Conservatoire. He retired from the navy, which can never have been a congenial profession, in 1873, and at the wish of the Grand Duke Constantine Nikolaevich was appointed

NICHOLAS ANDREIEVICH RIMSKY-KORSAKOV

inspector of naval bands, a post which he held until it was abolished in 1884. From 1883 to 1884 he was assistant director to the Court Chapel under Balakirev. Succeeding to Balakirev, he became director and conductor of the Free School Concerts from 1874 to 1881, and conducted the Russian Symphony Concerts, inaugurated in St. Petersburg by Belaiev, from 1886 to 1900. His gifts in this respect, although ignored in England, have been highly appreciated in Paris and Brussels. Rimsky-Korsakov's career has remained closely associated with St. Petersburg, which was the scene of his earliest successes, and on more than one occasion he has declined the directorship of the Moscow Conservatoire. His pupils number some distinguished names: Liadov, Ippolitov-Ivanov, Sacchetti, Grechianinov, and Glazounov have all studied under him for longer or shorter periods. In 1873 Rimsky-Korsakov married Nadejda Nicholaevna Pourgold, a gifted pianist, who proved a helpmeet in the truest sense of the word. This lady and her sister, A. P. Molas, have played important parts in the history of the modern Russian school; the former by her clever pianoforte arrangements of many of the great orchestral works, while the latter, gifted with a fine voice and dramatic instinct, created most of the leading female rôles in the operatic works of Cui, Moussorgsky, and Borodin, before they obtained a hearing at the Imperial Opera.

Rimsky-Korsakov had already composed his symphonic works 'Sadko' and 'Antar,' and his opera 'Pskovitianka,' and had been appointed professor at the St. Petersburg Conservatoire, when his 'ideal conscientiousness' awoke in him some doubts as to the solidity of his early musical education. Admirably as the system of self-education had worked in his case, he still felt it a duty to undergo a severe course of theoretical study in order to have at his disposal that supreme mastery of technical means in which all the great classical masters excelled. Accordingly he began to work at fugue and counterpoint, thereby calling forth from Tchaikovsky, in 1875, this tribute of admiration: 'I do not know how to express all my respect for your artistic temperament. . . . I am a mere artisan in music, but you will be an artist in the fullest sense of the word.' Most of Rimsky-Korsakov's early works have been revised since this period of artistic discipline. In the earlier phases of his career he was obviously influenced by Glinka and Liszt, and in a lesser degree by Schumann and Berlioz. The imitative period was, however, of short duration, and perhaps no contemporary composer can boast a more individual and distinctive utterance than Rimsky-Korsakov. But its distinctiveness lies in extreme refinement and restraint rather than in violent and sensational expression. He wins but does not force our

attention. A lover of musical beauty rather than musical truth—or, to put it more justly, believing truth to lie in idealistic rather than realistic methods of creation, he was never deeply influenced by the declamatory and naturalistic style of Dargomijsky and Moussorgsky. Like Tchaikovsky, he has divided his career between operatic and symphonic music, but with a steadily increasing tendency towards the former. After his first symphony, written on more or less conventional lines, he showed a distinct preference for the freer forms of programme music, as shown in the symphonic poem 'Sadko,' the Oriental Suite 'Antar,' and the Symphonic Suite 'Scheherezade.' In the Sinfonietta upon Russian themes, and the Third Symphony in C major, he returns to more traditional treatment. Of all his orchestral works the Spanish Capriccio seems to have met with the greatest appreciation in England. Almost without exception Rimsky-Korsakov's symphonic works are distinguished by a poetic and tactful expression of national sentiment. His art is rooted in the Russian soil, and the national element pervades it like a subtle but unmistakable aroma. We may be repelled or fascinated by it, according to individual taste, but we are forced to recognise that this is not mere local colour laid on by a coarse brush to give factitious and sensational interest to music which would be otherwise commonplace in character, but an essential product of the national spirit.

His music invariably carries the charm of expressive orchestration. Taking it up where Glinka left it in his 'Jota Aragonesa' and incidental music to 'Prince Kholmisky,' Rimsky-Korsakov has developed this characteristic quality of Russian musicians beyond any of his contemporaries, without, however, overstepping the bounds of what sane minds must still regard as legitimate effect. He is at his best in descriptive orchestration—in the suggestion of landscape and atmospheric conditions. But his clear objective outlook leads him to a luminous and definite tone-painting quite different from the subtle and dreamy impressionism of Debussy. The musical pictures of Rimsky-Korsakov are mostly riant and sunny; sometimes breezy and boisterous, as in the sea-music of 'Sadko' and 'Scheherezade'; often full of a quaint pastoral grace, as in the springtide music in his opera 'The Snow Maiden.' His harmony has freshness and individuality. He makes considerable use of the old Church modes and Oriental scales.

All Rimsky-Korsakov's operas, except 'Mozart and Salieri,' are based upon national subjects, historical or legendary. Tales from the Slavonic mythology, which combine poetical allegory with fantastic humour, exercise the greatest attraction for him. In his first opera, 'The Maid of Pskov,' he evidently started under the partial influence

of Dargomijsky's 'The Stone Guest,' for the solo parts consist chiefly of mezzo-recitative, the dryness of which is compensated by the orchestral colour freely employed in the accompaniments. In the two operas which followed, 'A Night in May' and 'The Snow Maiden,' the dramatic realism of his first work for the stage gives place to lyrical inspiration and the free flight of fancy. With 'Mozart and Salieri'—a setting of Poushkin's dramatic duologue—and 'The Boyarina Vera Sheloga' Rimsky-Korsakov shows a return to the declamatory style, while 'Sadko,' which appeared in 1896, is a skilful compromise between lyrical and dramatic forms, and may be accepted as the mature expression of his artistic creed. Of all his operatic works, 'The Snow Maiden,' founded upon Ostrovsky's poetical legend of the spring-tide, has perhaps the most characteristic charm, and seems best calculated to win popular favour outside Russia. 'Sadko,' the thematic material for which is partly drawn from the symphonic poem of the same name, is more epic in character and full of musical interest. It must be surmised that it is only the peculiarly national character of the libretto which has hindered this remarkable work from becoming more widely known. Time, which must inevitably bridge over this intellectual gulf which separates eastern and western Europe, will probably bring these two masterpieces of Russian art to Paris, and perhaps farther afield. Most of Rimsky-Korsakov's operas combine with this strong national element that also of the neighbouring East.

As a song-writer he takes a high place in a school which has shown itself pre-eminent in this branch of art. He has composed about eighty songs, remarkable for an all-round level of excellence, for few are really poor in quality, while the entire collection comprises such lyrical gems as 'Night,' the Hebrew song ('Awake, long since the dawn appeared'), 'A Southern night,' 'Spring,' and 'Come to the kingdom of roses and wine.' In his songs, as in his operas, he inclines more to the lyrical grace of Glinka than to the declamatory force of Dargomijsky. His melodies are not lacking in distinction and charm, especially when they approach in style to the melodies of the folk-songs; but in this respect he is somewhat lacking in impassioned inspiration and copious invention. The richness and picturesqueness of his accompaniments make the characteristic interest of his songs.

A close study of the works of Rimsky-Korsakov reveals a distinguished musical personality; a thinker, a fastidious and exquisite craftsman, an artist of that refined and discriminating type who is chiefly concerned in satisfying the demands of his own conscience rather than the tastes of the general public. Outside Russia he has been censured for his exclusive devotion to national ideals. On the

other hand, some Russian critics have accused him of opening the door to Wagnerism in national opera. This is only true in so far as he has grafted upon the older lyrical forms the use of some modern methods, notably the occasional employment of the *leitmotif*. As regards instrumentation he has a remarkable faculty for the invention of new and brilliant effects, and is a master in the skilful use of onomatopœia. Given a temperament, musically endowed, which sees its subject with the direct and observant vision of the painter, instead of *dreaming* it through a mist of subjective exaltation, we get a type of mind that naturally tends to a programme which is clearly defined. Rimsky-Korsakov belongs to this class. We feel in all his music the desire to *depict*, which so often inclines us to the language of the studio in attempting to express the quality of his work. His music is entirely free from that tendency to melancholy unjustly supposed to be the characteristic of all Russian art. The folk-songs of Great Russia—the source from which the national composers have drawn their inspiration—are pretty evenly divided between the light and shade of life; it is the former aspect which makes the strongest appeal to the vigorous, optimistic, but highly poetical temperament of this musician.

Many gifted members of the New Russian School were prevented by illness, by the enforced choice of a second vocation, and by the imperfect conditions of artistic life fifty or sixty years ago, from acquiring a complete musical education. Rimsky-Korsakov, out of the fulness of his own technical equipment, has ever been ready to sacrifice time and labour in the interest of his fellow-workers. Thus, he orchestrated 'The Stone Guest' which Dargomijsky endeavoured to finish on his death-bed; part of Borodin's 'Prince Igor' and Moussorgsky's operas 'Khovantshina' and 'Boris Godounov.'

In 1889, during the Paris Exhibition, he conducted two concerts devoted to Russian music given in the Salle Trocadéro. In 1890 and again in 1900 he conducted concerts of Russian music in the Théâtre de la Monnaie, Brussels.

In March 1905, in consequence of a letter published in the *Russ*, in which he advocated the autonomy of the St. Petersburg Conservatoire, hitherto under the management of the Imperial Russian Musical Society, and complained of the too stringent police supervision to which the students were subjected, Rimsky-Korsakov was dismissed from his professorship. This high-handed action on the part of the authorities was deeply resented by all his colleagues, and Glazounov, Liadov, and Blumenfeld immediately resigned their posts by way of protest. By the autumn of the same year the Conservatoire had actually wrested some powers of self-government from the Musical Society, and having elected Glazounov as

director, the new committee lost no time in re-instating Rimsky-Korsakov in the professorship of composition and instrumentation which he had honourably filled since 1871. The following is a list of Rimsky-Korsakov's numerous compositions:—

ORCHESTRAL

Symphony No. 1, E♭ minor, op. 1, afterwards transposed into E minor; Symphony No. 2, 'Antar,' op. 9, afterwards entitled 'Oriental Suite'; Symphony No. 3, C minor, op. 32, 1873, revised 1884; *Sinfonietta* on Russian themes, A minor, op. 31; Overture on Russian themes, op. 25; 'Easter,' overture, op. 36, 1888; 'Sadko,' musical picture, op. 5, 1867, revised 1891; Serbian *Psalmist*, op. 6; 'A Tale,' op. 29, subject from the Prologue of Pushkin's 'Russian and Lioudmilla'; *Capriccio* on Spanish themes, op. 34, 1887; *Symphonic Suite 'Schéhérazade'* (from the *Arabian Nights*), op. 35, 1888; *Suites* from the opera 'The Snow Maiden' and 'Tisár Saltana,' and the opera-ballet 'Mlada,' op. 57; prelude 'At the Grave,' op. 51; Suite from the opera 'Christmas Eve' (chorus *ad lib.*).

CHAMBER MUSIC

String quartet, F major, op. 12; string sextet, A major (MS.); first movement of the string quartet on the theme B-A-C, (Belakov); third movement of the quartet 'for a Fête Day'; allegro of the string quartet in the collection 'Fridays'; Serenade for violoncello and pianoforte, op. 37.

ORCHESTRA AND SOLO INSTRUMENTS

Pianoforte concerto, C♯ minor, op. 30; Fantasia on Russian themes for violin and orchestra.

PIANOFORTE

Six variations on the theme B-A-C, op. 10; four pieces, op. 11; three pieces, op. 15; six fugues, op. 17; eight variations on a folk-tune (no op. number); five variations for the 'Paraphrases' (see Boronin).

CHORAL WITH ORCHESTRA

Folk-song, op. 30; 'Slava,' op. 21; cantata for soprano, tenor, and mixed chorus, op. 44; 'The Fir and the Palm' (from op. 31) for baritone; two ariosos for bass, 'Anchor' ('The Ups Tree') and 'The Prophet,' op. 49; trio for female voices, op. 53; 'The Legend of St. Olga,' cantata for soli and chorus, op. 58; 'Fragment from Homer,' cantata for three female voices and chorus, op. 60.

CHORUS ONLY

Two trios for female voices, op. 13; four variations and a fughetto for female quartet, op. 14; six chorusses a capella, op. 16; two mixed choruses, op. 18; fifteen Russian folk-songs, op. 19; four trios for male voices, op. 23.

SONGS, ETC.

Four songs, op. 2; four songs, op. 3; four songs, op. 4; four songs, op. 7; six songs, op. 8; two songs, op. 25; four songs, op. 26; four songs, op. 27; four songs, op. 38; four songs, op. 40; four songs, op. 41; four songs, op. 42; four songs, op. 43; four songs, op. 45; five songs, op. 46; two duets, op. 47; four duets, op. 50; five duets, op. 51; two duets, op. 52; four duets for tenor, op. 55; two duets, op. 56.

SACRED WORDS

The liturgy of St. John Chrysostom (a portion only), op. 22; six transcriptions, including the psalm 'By the waters of Babylon,' op. 22 a; 'We praise Thee, O God' (MS. 1863).

OPERAS

'The Maid of Pskov' ('Pskovitskanka'), libretto from a drama by May (1870-72); performed St. Petersburg, 1873, revised in 1894; 'A Night in May,' text from Gogol (1873, St. Petersburg, 1880); 'The Snow Maiden,' text from Ostrovsky (1880-Si. St. Petersburg, 1882); 'Mlada,' fairy opera-ballet (St. Petersburg, 1893); 'Christmas Eve,' legendary opera, text from Gogol, 1874 (Maryinsky Theatre, St. Petersburg, 1895); 'Sadko,' epic-opera, 1895-96 (Private Opera, Moscow, 1897; St. Petersburg, 1901); 'Mozart and Salieri,' dramatic scenes, op. 48, 1888 (Private Opera, Moscow, 1898); 'Boyarina Vera Sheloga,' musical dramatic prologue to 'The Maid of Pskov,' op. 54 (Private Opera, Moscow, 1899; St. Petersburg, 1902); 'The Tsar's Bride,' 1898 (Private Opera, Moscow, 1899; St. Petersburg, Maryinsky Theatre, 1902); 'The Tale of Tsár Saltana,' etc. (1895-1900 (Private Opera, Moscow, 1900); 'Servilia' (Maryinsky Theatre, St. Petersburg, 1902); 'Koschei the Immortal,' an autumn legend (Private Opera, Moscow, 1902); 'Pan Voyevoda,' 'The Tale of the Invisible City of Kitezh and the Maiden Fevronia.'

One hundred Russian folk-songs, op. 24 (1877); forty Russian folk-songs (1882); *A Practical Guide to the Study of Harmony* (1898).

R. N.

RINALDO. (i.) Handel's first opera in England; composed in a fortnight, and produced at the King's Theatre in the Haymarket, Feb. 24, 1711. The libretto was founded on the episode of Rinaldo and Armida in Tasso's *Gerusalemme liberata* (the same on which Gluck based his 'Armida'). Rossi wrote it in Italian, and it was translated into English by Aaron Hill. The opera was mounted with extraordinary magnificence, and had an un-

interrupted run of fifteen nights—at that time unusually long. The march, and the air 'Il tricerbero,' were long popular as 'Let us take the road' ('Beggars' Opera'), and 'Let the waiter bring clean glasses.' 'Lascia ch'io pianga'—made out of a saraband in Handel's earlier opera 'Almira' (1704)—is still a favourite with singers and hearers. [John Walsh published the songs in folio with the title 'Arie del' opera di Rinaldo composta dal Signor Hendel, Maestro di Capella di sua Altezza Elettorale d'Hannover. London, printed for J. Walsh, Servant in ordinary to her Britannick Majesty.' It is said that Walsh made £1500 by the publication, and that the composer addressed to him a satirical letter:— 'My dear Sir, as it is only right that we should be on an equal footing, you shall compose the next opera, and I will sell it.' F. K.] G.

(ii.) Cantata for male voices, set to Goethe's words, by Johannes Brahms (op. 50). First performed by the Akademisches Gesangverein, Vienna, Feb. 28, 1869.

RINALDO DI CAPUA, an Italian composer of the 18th century, of whose life very little is known. Burney made his acquaintance in Rome in 1770, and since he describes him as an old man we may suppose him to have been born about 1700-10. Fétis gives 1715 as the year of his birth, and Rudhardt 1706, but neither writer states his authority for the date. According to Burney he was 'the natural son of a person of very high rank in that country [*i.e.* the kingdom of Naples], and at first studied music only as an accomplishment; but being left by his father with only a small fortune, which was soon dissipated, he was forced to make it his profession.' It has been assumed that he was born at Capua, and took his name from that place; but it may be noted that whether Rinaldo had a legitimate claim to it or not, Di Capua was a fairly common surname in the neighbourhood of Naples at that time. He composed his first opera at the age of seventeen, at Vienna, according to Burney; Spitta showed that no opera by Rinaldo was ever produced at Vienna, but thought it probable that he had some connection with that city, since Metastasio's 'Ciro Riconosciuto,' which formed the libretto of an opera by Rinaldo produced at Rome in 1737, was set to music for the first time by Caldara for performance at Vienna on August 28, 1736. A further connection with the imperial court is shown by the fact that he composed a special work to celebrate the election of Francis I. in 1745. It seems, therefore, not unreasonable to take Burney's words literally, and to understand that the opera 'Ciro Riconosciuto,' though performed in Rome, was composed in Vienna. If this was his first opera, it would settle 1720 as the year of Rinaldo's birth. Spitta was, however, not aware of the existence of a few airs from a comic opera, the title of which has not been

preserved, produced at the Teatro Valls in Rome in the autumn of 1737. Of the subsequent history of Rinaldo's life nothing is known. Burney informs us that 'in the course of a long life he has experienced various vicissitudes of fortune; sometimes in vogue, sometimes neglected.' Most of his operas were given at Rome, a few being produced at Florence and Venice; although described in some libretti as a Neapolitan, no opera of his is known to have been performed in Naples. The Bouffons Italiens performed an intermezzo of his, 'La Zingara' (La Bohémienne), at Paris in 1758, in a version which included songs by other composers; among these was the well-known 'Tre giorni son che Nina,' generally ascribed to Pergolesi, and on this account attributed to Rinaldo by Spitta. The song has, however, been recently proved to be by another composer [TRE GIORNI SON CHE NINA]. When Burney knew him he was in somewhat impoverished circumstances, owing to the indifference of the public which had once applauded him. He had collected his works with a view to making provision for his old age, but at the moment when they were required, discovered that his son had sold them for waste paper. The date of his death is not known. Burney mentions an intermezzo composed for the Capranica theatre in 1770 ('I finti pazzi'), when he was already an old man. Another opera, 'La donna vendicativa' (ascribed by Clément and Larousse to 1740, though on no apparent authority), was performed in Rome in 1771, and this was probably his last work. After this date we know only of 'La Giocondina' (Rome, 1778), which was probably a revival of an earlier work. Burney, with characteristic kindness, recommended him as a teacher to William Parsons, who had studied at a Neapolitan conservatorio, where according to his own account he learnt nothing. Parsons became Master of the King's Musick in 1786, to the great disappointment of Burney, to whom the post had been promised. Another pupil of Rinaldo's was Antonio Aurisicchio.

Rinaldo was supposed to have been the inventor of accompanied recitative; Burney pointed out that this invention belonged to Alessandro Scarlatti. Rinaldo himself only claimed 'to have been among the first who introduced long *ritornellos* or symphonies into the recitatives of strong passion and distress, which express or imitate what it would be ridiculous for the voice to attempt.' An example from 'Vologeso' is in the Fitzwilliam Museum. His musical education having been that of an amateur, his technique of composition was sometimes defective; but apart from this slight weakness of harmony, he was one of the best composers of his period for dramatic power and melodic beauty. He was especially successful in brilliant coloratura, but was also

capable of producing most attractive light operas. To judge from the few fragments of his work that remain, 'Ciro Riconosciuto' and 'Vologeso' seem to have been his most important dramatic works.

CATALOGUE OF EXTANT WORKS OF RINALDO DI CAPUA

OPERAS

- A comic opera, name unknown (Rome, T. Valle, 1737). Fragments: Palermo B.C.M.
 Ciro Riconosciuto (Rome, T. Tordinona, 1737; revived Rome, 1739). Fragments: formerly in possession of Spitta; Brit. Mus.; Münster.
 La Commedia in Commedia (Rome, T. Valle, 1738). Libretto: Brussels Conservatorio. Fragments: Palermo B.C.M. Revived at Venice (T. San Cassiano, 1749). Libretto: Venice, Bibl. Marc.
 The opera was also performed in London; Walsh printed five airs as 'The favourite Songs in the Opera call'd La Commedia in Commedia.' Rinaldo's name is not mentioned, and the work was probably a pasticcio; one song, however, 'Non so la prole mia,' is in the Palermo collection, which bears Rinaldo's name.
 Farnace (Venice, T. S. Giovanni Grisostomo, 1739). Libretto: Venice, Bibl. Marc.
 Vologeso Re de' Parti (Rome, T. Argentina, 1739). Libretto: Bologna, Lic. Mus. Fragments: Brit. Mus.; Brussels Cons.; Cambridge, Fitz. Mus.; Dresden; Münster; New York, in possession of H. E. Krehbiel, Esq.
 La Libertà Nociva (Rome, T. Valle, 1740). Libretto: Bologna, Brussels Cons. Fragments: Brit. Mus.; Cambridge, Fitz. Mus. Revived in Florence (T. Cocconero, 1742), Bologna (T. Formagliari, 1743). Libretti: Bologna. Also at Venice (T. San Cassiano, 1744). Libretto: Bologna, Venice.
 Turbido (Rome, T. Capranica, 1743). Libretto: Bologna, Brussels Cons.
 Le Nozze di Don Trifone (Rome, T. Argentina, 1743). Libretto: Bologna.
 L' Ambizione delusa (Venice, T. S. Cassiano, 1744). Libretto: Bologna, Venice. Revived at Millau (T. Ducal, 1745). Libretto: Bologna.
 La Forza del Sangue (intermezzo), (Florence, T. Pallacorda, 1746). Libretto: Brussels Cons.
 Il bravo è il bello (intermezzo), (Rome, T. Granari, 1746). Libretto: Brussels Cons.
 Mario in Numidia (Rome, T. Dame, 1749). Libretto: Bologna. Fragments: Brit. Mus., Dresden, Munich.
 Il Bravo Burlato (intermezzo), (Florence, T. Pallacorda, 1749). Libretto: Brussels Cons.
 A comic opera (Rome? 1750). Fragment: Dresden.
 Il Ripiego in Amore (Rome, T. Valle, 1751). Libretto: Bologna.
 Il Cavalier Mignotta (intermezzo), (Rome, T. Capranica, 1751). Libretto: Brussels Cons.
 La Donna superba (intermezzo), (Paris, Opéra, 1752). Libretto: Brussels Cons. Fragments (with French words): Brussels Cons.
 La Forza della Pace (Rome, T. Pace, 1752). Libretto: Bologna.
 La Zingara (intermezzo), (Paris, Opéra, 1753). Libretto: Brussels Cons. Score, printed in Paris, Brussels Cons. Revived at Pesaro, 1755, as 'Il Vecchio Amante e la Zingara.' Libretto: Bologna.
 La Serva Sposa (Rome, T. Valle, 1753). Libretto: Bologna.
 La Chiavina (Rome, T. Valle, 1754). Libretto: Bologna.
 Attila (Rome, T. Capranica, 1754). Libretto: Brussels Cons.
 Rinaldo di Capua appears here under the pseudonym of Cleofante Doriano.
 Adriano in Siria (Rome, Argentina, 1758). Libretto: Brussels Cons.; Brit. Mus.
 La Smorfosa (Florence, T. Cocconero, 1758). Libretto: Bologna.
 Le Donne Ridoole (intermezzo), (Rome, T. Capranica, 1759). Libretto: Brussels Cons.
 Il Caffè di Campagna (farsetta), (Rome, T. Pace, 1764). Libretto: Bologna, Brussels Cons.
 I Finti Fazzi per Amore (farsetta), (Rome, T. Pace, 1770). Libretto: Bologna, Brussels Cons.
 La Donna Vendicativa (farsetta), (Rome, T. Pace, 1771). Libretto: Bologna. Score: Brit. Mus.
 La Giocondina (farsetta), (Rome, T. Pace, 1778). Libretto: Brussels Cons.
 [La Statura per Puntiglio, ascribed to E. di Capua by Eitner, is by Marcello di Capua.]

SACRED MUSIC

Cantata per la Natività della Beata Vergine (Rome, Collegio Nazareno, 1747). Score: Münster. Paris, Bibl. Nat. f. (Eitner).
 A few other works are mentioned by Eitner: symphonies, probably opera overtures, and cantatas (Venice) ascribed to Cavaliere Rinaldo, who may have been his most famous composer.
 Aims from operas as yet unidentified are at Cambridge, Fitz. Mus., Münster, and Montemassaro.
 The writer is indebted to Mr. H. E. Krehbiel for notice of the airs in his possession; the MS. from which they are taken formerly belonged to Thomas Gray, the poet, and is described in Mr. Krehbiel's *Music and Manners in the Classical Period*. Other authorities consulted: Burney's *Present State of Music in France and Italy* (1771); as article by Spitta in the *Viertelejahrsschrift für Musikwiss.*, vol. iii. (1887), and A. Wotquenne's *Catalogue of the library of the Brussels Conservatoire*, vol. i. (1898). The two latter works give fuller bibliographical details than we have space for here.

E. J. D.

RINCK, or RINK, JOHANN CHRISTIAN HEINRICH, celebrated organist and composer for his instrument, was born at Elgersburg in Saxe-Gotha, Feb. 18, 1770, and died at Darmstadt, August 7, 1846. His talent developed itself at an early

period, and, like JOHANN SCHNEIDER, he had the advantage of a direct traditional reading of the works of Sebastian Bach, having studied at Erfurt (in 1786-89) under Kittel, one of the great composer's best pupils. Rinck having sat at the feet of Forkel at the University of Göttingen, obtained in 1790 the organistship of Giessen, where he held several other musical appointments. In 1805 he became organist at Darmstadt, and 'professor' at its college; in 1813 was appointed Court organist, and in 1817 chamber musician to the Grand Duke (Ludwig I.). Rinck made several artistic tours in Germany, his playing always eliciting much admiration. At Trèves, in 1827, he was greeted with special honour. He received various decorations,—in 1831 membership of the Dutch Society for Encouragement of Music; in 1838 the cross of the first class from his Grand Duke; in 1840 'Doctor of Philosophy and Arts' from the University of Giessen. Out of his 125 works a few are for chamber, including sonatas for PF., violin, and violoncello, and PF. duets. But his reputation is based on his organ music, or rather on his 'Practical Organ School,' a standard work. Rinck's compositions for his instrument show no trace of such sublime influence as might have been looked for from a pupil, in the second generation, of Bach; indeed, throughout them fugue-writing is conspicuous by its absence. But without attaining the high standard which has been reached by living composers for the instrument in Germany, his organ-pieces contain much that is interesting to an organ student.

Rinck's name will always live as that of an executant, and of a safe guide towards the formation of a sound and practical organ-player; and his works comprise many artistic studies. Amongst these the more important are the 'Practical Organ School,' in six divisions (op. 55, re-edited by Otto Dienel, 1881), and numerous 'Preludes for Chorales,' issued at various periods. He also composed for the church a 'Pater Noster' for four voices with organ (op. 59); motets, 'Praise the Lord' (op. 88) and 'God be merciful' (op. 109); twelve chorales for men's voices, etc. H. S. O.

RINFORZANDO, 'reinforcing' or increasing in power. This word, or its abbreviations, *rinf.* or *rfz.*, is used to denote a sudden and brief *crescendo*. It is applied generally to a whole phrase, however short, and has the same meaning as *sforzando*, which is only applied to single notes. It is sometimes used in concerted music to give a momentary prominence to a subordinate part, as for instance in the Beethoven Quartet, op. 95, in the Allegretto, where the violoncello part is marked *rinforzando*, when it has the second section of the principal subject of the movement. M.

RING DES NIBELUNGEN, DER, 'The Ring of the Nibelung,' a tetralogy or sequence of four music-dramas (more correctly

a 'trilogy' with a prelude drama), words and music by Richard Wagner, was first performed in its entirety at Bayreuth, August 13, 14, 16, and 17, 1876, and repeated during the two following weeks. The book, which is written in an alliterative style modelled on that of the 'Stabreim,' is founded on the Icelandic Sagas, and has little in common with the Nibelungenlied, or more correctly 'Der Nibelunge Nôt,' a mediæval German poem of the beginning of the 13th century, in which the mythical types of the old Norse sagas appear in humanised modifications. The poem was completed in 1852. The whole was given at Her Majesty's Theatre, under the management of Angelo Neumann and the conductorship of Anton Seidl, on May 5-9, 1882; four performances of the complete cycle took place. The dates of first performances of the separate parts are appended:—

DAS RHEINGOLD. The 'Vorabend,' or Preludial Evening, was first performed at Munich, Sept. 22, 1869.

DIE WALKÜRE was completed in 1856, and the first performance took place at Munich June 25, 1870. It was given in English at Covent Garden, Oct. 16, 1895.

SIEGFRIED was completed early in 1869, and first performed in its place in the cycle, at Bayreuth, August 16, 1876. It was given in French at Brussels, June 12, 1891, and subsequently at the Opéra in Paris; and in English, by the Carl Rosa Company, in 1898.

GOTTERDÄMMERUNG, completed in 1874, was first heard at Bayreuth, August 17, 1876. The whole trilogy was announced for production in English at Covent Garden in the winter season of 1907-8. M.

RIOTTE, PHILIPP JACOB, born at St. Mendel, Trèves, August 16, 1776. André of Offenbach was his teacher in music, and he made his first appearance at Frankfort in Feb. 1804. In 1806 he was music-director at Gotha. In 1808 he conducted the French operas at the Congress of Erfurt. In April 1809 his operetta 'Das Grenzstädtchen' was produced at the Kärnthnertheater, and thenceforward Vienna was his residence. In 1818 he became conductor at the Theatre an-der-Wien, beyond which he does not seem to have advanced up to his death, August 20, 1856. The list of his theatrical works is immense. His biography in Wurzbach's *Leicon* enumerates, between 1809 and 1848, no less than forty-eight pieces, operas, operettas, ballets, pantomimes, music to plays, etc., written mostly by himself, and sometimes in conjunction with others. In 1852 he wound up his long labours by a cantata 'The Crusade,' which was performed in the great Redoutensaal, Vienna, with much applause. He wrote an opera called 'Mozart's Zaubrerflöte' at Prague about 1820. He left also a symphony (op. 25), nine solo-sonatas, six do. for PF. and violin, three concertos for clarinet and orchestra, but these are defunct. He

became very popular by a piece called 'The Battle of Leipzig,' for PF. solo, which was republished over half Germany, and had a prodigious sale. G.

RIPIENO, 'supplementary.' The name given in the orchestral concertos of the 17th and 18th centuries, to the accompanying instruments which were only employed to fill in the harmonies and to support the solo or 'concertante' parts. [See CONCERTANTE, and CONCERTINO, vol. i. pp. 576-7.] M.

RIPPON, JOHN, born at Tiverton, April 29, 1751. Died in London, Dec. 17, 1836 (*Brit. Mus. Biog.*). He was a doctor of divinity, and had a meeting-house for a number of years in Carter Lane, Tooley Street. His 'Selection of Psalm and Hymn Tunes,' from the best authors in three and five parts (1795) was a tune-book in much request for congregational singing, and ran through a large number of editions. In its compilation and arrangement he was assisted by T. Walker. Rippon was composer of an oratorio 'The Crucifixion,' published in 1837. F. K.

RISELEY, GEORGE, born at Bristol, August 28, 1845, was elected chorister of Bristol Cathedral in 1852, and in Jan. 1862 article to Mr. John Davis Corfe, the Cathedral organist, for instruction in the organ, pianoforte, harmony, and counterpoint. During the next ten years he was organist at various churches in Bristol and Clifton, at the same time acting as deputy at the Cathedral. In 1870 he was appointed organist to the Colston Hall, Bristol, where he started weekly recitals of classical and popular music, and in 1876 succeeded Corfe as organist to the Cathedral. In 1877 he started his orchestral concerts, which have won for him a well-deserved reputation. Notwithstanding considerable opposition, and no small pecuniary risk, he has continued, during each season, to give fortnightly concerts, at which the principal works of the classical masters have been well performed, and a large number of interesting novelties by modern writers, both English and foreign, produced. [In 1878 he was appointed conductor of the Bristol Orpheus Society, and has enlarged its scope and greatly increased its reputation. He is conductor of the Bristol Society of Instrumentalists, and was the founder of the Bristol Choral Society in 1889. He retired with a pension from the cathedral appointment in 1898, and was appointed conductor of the Alexandra Palace, and of the Queen's Hall Choral Society. In 1896 he conducted his first Bristol Festival, with great success. His compositions include a Jubilee Ode (1887), part-songs, etc. See an interesting article on him in *Musical Times*, 1899, p. 81 ff.] W. B. S.

RISLER, JOSEPH EDOUARD, born at Baden, Feb. 23, 1873, studied at the Paris Conservatoire, where he gained, among other distinctions,

first medals in solfège and elementary piano in 1887, a first piano prize (in Diémer's class) in 1889, a second harmony prize in 1892, and the first prize for accompaniment in 1897. On leaving the Conservatoire, Risler made further studies with Dimmler, Stavenhagen, D'Albert, and Klindworth. In 1896 and 1897 he was one of the 'Assistenten auf der Bühne' at Bayreuth, and took part as 'répétiteur,' in preparing the 'Meistersinger' for the Paris Opéra. In 1906 he was appointed a member of the Conseil supérieur of the Paris Conservatoire. Risler has given many pianoforte recitals in France, Germany, Holland, Russia, Spain, etc. His first appearance in England took place at Prince's Hall, May 17, 1894, when he played two sonatas of Beethoven, a master for whom he has a special predilection. His playing was then found to be singularly free from affectation, although in his later years he has yielded to certain mannerisms which detract from the artistic beauty of his earlier performances. His technique is very remarkable. He played the thirty-two sonatas of Beethoven in London in 1906. He has written a concert-transcription of Strauss's 'Till Eulenspiegel,' etc. G. F.

RISPOSTA (Lat. *Comes*; Eng. 'Answer'). The Answer to the subject of a Fugue, or point of imitation. [See PROPOSTA.]

In Real Fugue, the answer imitates the subject, interval for interval. In Tonal Fugue, the Tonic is always answered by the Dominant, and *vice versa*. In both, the imitation is usually conducted, either in the fifth above the Proposta, or the fourth below it, when the subject begins upon the Tonic; and, in the fourth above, or the fifth below, when it begins upon the Dominant. [See FUGUE, SUBJECR.] W. S. R.

RITARDANDO; RITENENTE; RITENUTO. [See RALLENTANDO.]

RITORNELLO (Abbrev. *Ritornel.*, *Ritor.*; Fr. *Ritournelle*). I. An Italian word, literally signifying a little return or repetition; but more frequently applied, in a conventional sense, (1) to a short instrumental melody played between the scenes of an opera, or even during the action, either for the purpose of enforcing some particular dramatic effect or of amusing the audience during the time occupied in the preparation of some elaborate 'set-scene'; or, (2) to the symphonies introduced between the vocal phrases of a song or anthem.

1. The earliest known use of the term, in its first sense, is to be found in Peri's 'Euridice,' in connection with a melody for three flutes, which, though called a 'Zinfonia' on its first appearance, is afterwards repeated under the title of 'Ritornello.' 'Euridice' was first printed at Florence in 1600, and at Venice in 1608.

A similar use of the term occurs soon afterwards in Monteverde's 'Orfeo,' printed at Venice

in 1609, and republished in 1615. In this work, the Overture—there called Toccata—is followed by a 'Ritornello' in five parts, the rhythmic form of which is immeasurably in advance of the age in which it was produced. [Both toccata and ritornello are printed in the *Musical Times* for 1880, in an essay on Monteverde; and the toccata is given in Parry's *Seventeenth Century* (*Oxford Hist. of Music*, vol. iii.), p. 51.]

2. When vocal music with instrumental accompaniment became more extensively cultivated, the word was brought into common use, in its second sense, as applied to the instrumental symphonies of a song, or other composition for a solo voice. Ritornelli of this kind were freely used by Cavalli, Cesti, Carissimi, and many other composers of the early Venetian dramatic school, who imitated their manner. An example from Cavalli's 'Il Giasone' will be found at vol. iii. p. 440. Towards the close of the 17th century such instrumental interpolations became very common, in all styles and countries. For instance, in early editions of the Verse Anthems, of Croft, Greene, and other English composers, of the 17th and 18th centuries, we constantly find the words 'Ritornel,' 'Ritor,' or 'Rit.,' printed over little interludes, which, unknown in the more severe kind of ecclesiastical music, formed a marked feature in works of this particular school, frequently embodying some of its choicest scraps of melody, as in Dr. Boyce's Anthem, 'The Heavens declare the glory of God.'

In later editions the term disappears, its place being supplied, in the same passages, by the words 'Organ,' or 'Sym. ;' which last abbreviation is almost invariably found in old copies of Handel's songs, and other similar music, in which the symphonies are interpolated, as often as opportunity permits, upon the line allotted to the voice.

II. An ancient form of Italian verse, in which each Strophe consists of three lines, the first and third of which rhyme with each other, after the manner of the *Terza rima* of Dante. Little Folk-Songs of this character are still popular, under the name of 'Ritornelli' or 'Stornelli,' among the peasants of the Abruzzi and other mountain regions of Italy.

W. S. R.

RITTER, FRÉDÉRIC LOUIS, hornist at Strasburg, June 22, 1834. His paternal ancestors were Spanish, and the family name was originally Caballero. His musical studies were begun at an early age under Hauser and Schletterer, and continued at Paris (whither he was sent when sixteen years of age) under the supervision of his cousin, Georges Kastner. Possessed with the idea that beyond the Rhine he would find better opportunities for the study of composition, he ran away to Germany, where he remained for two years, assiduously pursuing his studies with eminent musicians, and attending concerts whenever good music could be heard. Return-

ing to Lorraine, aged eighteen, he was nominated professor of music in the Protestant seminary of Fénéstrange, and invited to conduct a Société de Concerts at Bordeaux. The representations made by some of his family who had settled in America induced him to visit the New World. He spent a few years in Cincinnati, where his enthusiasm worked wonders in the development of taste. The Cecilia (choral) and Philharmonic (orchestral) Societies were established by him, and a large number of important works presented at their concerts for the first time in the United States. In 1861 Ritter went to New York, becoming conductor of the Sacred Harmonic Society for seven years, and of the Arion Choral Society (male voices), and instituting (1867) the first musical festival held in that city. In 1867 he was appointed director of the musical department of Vassar College, Poughkeepsie, whither he removed in 1874 on resigning his conductorships. The University of New York conferred on him the degree of Doctor of Music in 1878. He died at Antwerp, July 22, 1891. Ritter's literary labours have included articles on musical topics printed in French, German, and American periodicals. His most important work is *A History of Music, in the Form of Lectures*—vol. i. 1870; vol. ii. 1874, Boston; both republished by W. Reeves, London, 1876. *Music in England* appeared in New York in 1883, and *Music in America* in the same year.

The following works have appeared in the catalogues of Hamburg, Leipzig, Mainz, and New York publishers:—

- | | |
|--|---|
| Op. 1. 'Hafis,' cyclus of Persian songs. | Op. 10. Five songs. Ten Irish Melodies with new PF. acct. |
| 2. Preambule Scherzo, PF. | 11. Organ fantasia and fugue. |
| 3. Ten children's songs. | 12. Voices of the Night, PF. |
| 4. Fairy Love. | 'O Salutaris,' baritone, organ. |
| 5. Eight PF. pieces. | 'Ave Maria,' mezzo-sopr., organ. |
| 6. Six songs. | 'Parting,' song, mezzo-soprano. |
| 7. Five choruses, male voices. | A practical Method for the Instruction of Chorus-classes. |
| 8. Psalm xxiii. female voices. | |

The following are his most important unpublished compositions:—

- | | |
|---|---|
| 3 Symphonies—A, E minor, Eb. | One string quartet; three PF. |
| 'Stella,' Poème symphonique, d'après V. Hugo. | Do. |
| Overture, 'Othello.' | Psalm iv. baritone solo, chorus, and orchestra. |
| Concerto, PF. and orch. | Psalm xvi. solo, chor. and orch. |
| Do. violoncello and orch. | Psalm xcv. female voices with organ. |
| Fantasia, bass clarinet and orch. | |

Dr. Ritter's wife, née Raymond, is known under the name of FANNY RAYMOND RITTER (born at Philadelphia in 1840), as an author and translator of works on musical subjects. She brought out translations of Ehlert's *Letters on Music, to a Lady*; and of Schumann's *Essays and Criticisms*—in two series, as *Music and Musicians*; and a pamphlet entitled *Woman as a Musician*—all published by Reeves, London.

F. H. J.

RITTER, HERMANN, son of a German government official, was born at Wismar, Mecklenburg, Sept. 26, 1849. A gifted writer and able violinist and musician, he attracted considerable public interest in Germany during the latter half of the 19th century by his performances

on the 'Viola Alta,' an instrument which he claimed to be his own invention. While studying history and art at the Heidelberg University, Herr Ritter became deeply interested in the history of musical instruments, and the desire to improve the muffled tone of the ordinary viola induced him to attempt the construction of a similar instrument which should possess the acute resonant qualities of the violin. According to his own account, this consummation was effected by the aid of the rules laid down by Antonio Bagatella in his pamphlet entitled *Regole per la costruzione di Violini, Viols, Violoncelli, e Violoni*, etc. etc., Padua, 1786, of which a second edition appeared in Padua in 1883, and German translations at Padua in 1786 and Leipzig in 1806. In point of fact Hermann Ritter's 'Viola Alta' was in reality a revival of the large 'Tenor Viol,' that direct descendant of those *instruments de remplissage* the *Quinte* and *Haute Contre*, which he methodised into a tenor of extra large proportions constructed on the scientific acoustical basis appertaining to the violin. His public appearances with the instrument began in 1876. They attracted the consideration of many eminent composers, and Wagner, who was at that time occupied with his 'Nibelungen,' invited his aid for the production of that opera in the same year. After completing this engagement Herr Ritter travelled for several years, touring in Germany, Austria, Switzerland, Holland, Russia, England, and Scotland, and in 1879 he was appointed professor of musical history and æsthetics, as well as of the viola, at the Royal School of music at Würzburg. There his talents and personal influence were the means of attracting a vast number of students, who assisted in spreading the fame of his invention, and in 1889 five of his pupils were playing in the orchestra of the Bayreuth festival. In 1889 he was learnedly advocating the use of a three-footed binder in a pamphlet entitled *Der Dreifüssige oder Normal-Geigensteg* (Würzburg, G. Hartz).

The Grand Duke of Mecklenburg appointed Herr Ritter his 'Court Chamber Virtuoso,' and the Emperor Ludwig II. of Bavaria gave him the title of 'Court Professor.' He married the singer Justine Haecker in 1884. He wrote and arranged an immense amount of music for his 'Viola Alta' and traced its history in his book entitled *Die Geschichte des Viola Alta* (Leipzig, Merseburg). (See VIOLA.) G. Adema, *Hermann Ritter und seine Viola alta* (Würzburg, 1881, 2nd edition, 1890); Hermann Ritter, *Die Viola alta oder Altgeige* (Leipzig, 1885), 1st edition, Heidelberg, 1876, 2nd edition, Leipzig, 1877. (Riemann, *Dict. of Music*.) E. R-A.

RITTER (properly BENNETT), THEODORE, born near Paris, April 5, 1841, was a pupil of Liszt and wrote a number of successful drawing-room pieces ('Chant du braconnier,' 'Sylphes,' etc.). He produced two operas ('Marianne,' at

Paris in 1861, and 'La dea risorta,' at Florence, 1865); he died in Paris, April 6, 1886.

RIVARDE, SERGE ACHILLE, violinist, was born on Oct. 31, 1865, in New York of an American mother, his father being a Spaniard. He lived in America till the age of eleven, receiving lessons successively from Felix Simon, Henri Wieniawski and Joseph White (a man of colour). Coming to Europe he entered the Paris Conservatoire, to become a pupil of Charles Dancla. He won a first prize in July 1879, sharing the same with Franz Ondricek. In 1881 he returned to America, where he stayed three years, and then gave up violin-playing entirely for a time. In 1885 he came back to Paris and entered Lamoureux's orchestra, in which he remained for five years as principal violin, and occasional soloist. He gave up the appointment in 1891 and made his début in London in 1894. In 1899 he took the post of violin professor at the Royal College of Music. He is occasionally heard as soloist in London and abroad, being the possessor of an exceptionally pure style, but spends most of his time in teaching. Until recently he played almost exclusively upon violins made by a modern maker, Szepeßy Bela, but recently has taken to a Nicolas Lupot. W. W. C.

RIVISTA MUSICALE ITALIANA, an important quarterly review on music, published by the firm of Bocca in Turin, and edited by L. Torchi. Each quarterly 'fascicolo' contains about 200 pages in Italian or French, the articles headed 'Memorie' dealing frequently with points of musical archæology, while 'Arte contemporanea' is the heading of those which treat of current events or the criticism of new music. Operas and other works of importance are discussed in detail, there are illustrations, musical and otherwise, and shorter reviews of musical books appear under the title of 'Recensioni.' A useful feature is a list of articles on music which appear in other periodicals. Among the Italian contributors to the first volume may be mentioned Signori Chilesotti, Giani, de Piccolellis, Tacchinardi, Tebaldini, and Valdirighi; while the names of some of the most eminent writers of other countries, such as Guido Adler, F. Draeseke, F. A. Gevaert, Adolphe Jullien, Arthur Pougin, Saint-Saëns, Philipp Spitta, and J. Weckerlin, appear in the list of contributors. The publication began in 1894, and has maintained a high standard of excellence ever since. M.

RIZZIO, DAVID (Rizzi, or Ricci), the son of a professional musician and dancing-master, born at Turin, in Italy, in the early years of the 16th century. He obtained a post at the court of the Duke of Savoy, and came over to Scotland in the train of the ambassador in 1561. With his brother Joseph he remained in the service of Queen Mary, in the first instance as a bass singer, receiving £80 per year.

He so won his way into her favour (no doubt primarily by his ability in connection with court masques, of which she was so fond), that he became, in 1564, her foreign secretary. By this he aroused political and other feelings, and he was stabbed to death, almost in the Queen's presence, in Holyrood Palace, on the evening of March 9, 1566.

There is no doubt that Rizzio exercised some influence on the music then fashionable in Scotland (or at least in Edinburgh), and there appears to have been a very strong tradition that he was the composer of several of the well-known Scots tunes. In 1725 William Thomson in the 'Orpheus Caledonius' puts this tradition into definite form by affixing a mark to seven of the airs there engraved, stating them to be the composition of Rizzio (see ORPHEUS CALEDONIUS). James Oswald and others have in one or two instances also assigned other airs to Rizzio with probably less of tradition to justify them. F. K.

ROAST BEEF OF OLD ENGLAND, THE.

An English national song whose tune has become associated with the serving of dinner at public functions, and occasionally used as a signal for the same in the army.

The air is a fine marked specimen of English melody, and is probably the composition of Richard Leveridge, who doubtless sang the song in public. The first two verses were inserted in Henry Fielding's ballad opera, 'Don Quixote in England,' produced in 1733. They are considered to be by Fielding himself, and are marked as to be sung to the air 'The Queen's old Courtier.' Another claim, however, arises. In Walsh's *British Musical Miscellany* or *The Delightful Grove*, vol. iii., is 'A Song in praise of Old English Roast Beef: the words and Musick by Mr. Leveridge.' This is a version of seven verses, including the two, with slight verbal differences, already placed in Fielding's 'Don Quixote.' The tune is, however, the now well-known melody as under—

When mighty roast beef was the Englishman's food, It en-
 nobl'd our veins, and enriched our blood. Our soldiers were
 CHORUS.
 brave, and our courtiers were good. Oh, the roast beef of old
 England, and old English roast beef.

The melody has been used for many songs, one, formerly well known in the north, being 'The Kail Brossa of auld Scotland.' 'The Roast Beef Cantata' was a well-known piece originally published about 1760-70. Headed by a copy of Hogarth's picture the 'Gate of Calais,' the

subject of which is the carrying of a huge piece of beef before a starved French sentry, the praises of roast beef are set to several popular airs, concluding with the 'Roast Beef of Old England.' F. K.

ROBARTT, of Crewkerne, was an 'orgyn maker' who let out organs to churches by the year. The Mayor of Lyme Regis, in 1551, paid him ten shillings for his year's rent. V. DE P.

ROBERT BRUCE. A pasticcio adapted by Niedermeyer from four of Rossini's operas—'Zelmira,' the 'Donna del Lago,' 'Torvaldo e Dorliska,' and 'Bianca e Faliero.' Produced without success at the Académie Royale, Dec. 30, 1846. It is published in Italian as 'Roberto Bruce' by Ricordi. G.

ROBERT LE DIABLE. Opera in five acts; words by Scribe, music by Meyerbeer. Produced at the Académie, Paris, Nov. 21, 1831. In London, and in English, imperfectly, as 'The Demon, or the Mystic Branch,' at Drury Lane, Feb. 20, 1832, and as 'The Fiend Father, or Robert of Normandy,' at Covent Garden the day following; as 'Robert the Devil' at Drury Lane (Bunn), March 1, 1845. In French, at Her Majesty's, June 11, 1832, with Nourrit, Levasseur, Damoreau. In Italian, at Her Majesty's, May 4, 1847 (first appearance of Jenny Lind and Staudigl). G.

ROBERTO DEVEREUX, CONTE D'ESSEX. (1) Opera in three acts, text by Romani (from Corneille), music by Mercadante. Produced at Milan, March 10, 1833. (2) An opera in three acts; libretto by Camerano from Corneille's 'Comte d'Essex,' music by Donizetti. Produced in Naples in 1837; at the Italiens, Paris, Dec. 27, 1838; at Her Majesty's Theatre, London, June 24, 1841. The overture contains the air of 'God save the King.' G.

ROBERTS, HENRY, a music and an ornamental engraver, who issued several notable books of songs with music, now much sought after, mainly on account of their decorative character. In these works the pieces are headed with pictorial embellishments. The earliest of Roberts's publications is 'Calliope, or English Harmony,' in two volumes octavo. It was issued by and for the engraver in periodical numbers of 8 pp. and commenced late in the year 1737. Twenty-five numbers formed the first volume, which was completed in 1739. The second volume began in this year, but from some cause now unknown, the publication came to a standstill when half through, and was not resumed until 1746, when it came out with the imprint of John Simpson (q.v.). This volume contains 'God save the King,' which, from the date 1739 appearing on some of the plates, has been hastily assumed to be prior to the copy in the *Gentleman's Magazine* of 1745; this, however, is not the case, for ample proof exists that this portion of the volume was not issued before the spring of 1746. The plates

of 'Callopie,' thirty or forty years afterwards, came into possession of Longman & Broderip, who reprinted from them. Roberts's other famous work is 'Clio and Euterpe,' precisely similar in style, which, issued in two volumes, bears the dates 1758 and 1759. A later edition has a third volume added, and is dated 1762. A fourth was again added when re-issued by John Welcker. Henry Roberts kept a music and a print-shop in Holborn 'near Hand Alley almost opposite Great Turnstile.' His name is attached as engraver to several pieces of decorative engraving on music-sheets. F. K.

ROBERTS, JOHN, composer of sacred music, born in Wales, Dec. 22, 1822. Before 1839 he had adopted the name 'Ieum Gwyllt.' He removed to Liverpool and became editor of a Welsh newspaper, besides writing upon musical matters. In 1858 he again returned to Wales, and at Aberdare set up as a music teacher. On Jan. 10, 1859, he founded there the first of a long series of Welsh musical festivals, and in the same year published a tune-book, 'Llyfr Tonau,' which was much used throughout Wales, and passed through many editions. Roberts was a strong advocate of temperance, and preached as a Calvinistic Methodist. He died May 6, 1877. [Information principally from *Dict. Nat. Biog.*] F. K.

ROBERTS, J. VARLEY, Mus.D., native of Stanningley, near Leeds, born Sept. 25, 1841. He early exhibited much ability for music, and at twelve was appointed organist of S. John's, Farsley, near Leeds. In 1862 he became organist of S. Bartholomew's, Armley, and in 1868 organist and choirmaster of the parish church, Halifax. In 1871 he graduated Mus.B., and in 1876 Mus.D., at Christ Church, Oxford. During his organistship at Halifax, upwards of £3000 was raised to enlarge the organ, originally built by Snetzler—the instrument upon which Sir William Herschel, the renowned astronomer, formerly played—and it is now one of the finest and largest in the North of England. In 1876 Dr. Roberts became a Fellow of the Royal College of Organists, London. In 1882 he was elected organist at Magdalen College, Oxford, succeeding Mr. (now Sir Walter) Parratt. In 1884 the University Glee and Madrigal Society was founded under his conductorship. In 1885-93 he was organist of St. Giles's, Oxford, and in the former year was appointed examiner in music to the Oxford Local Examinations, and also became conductor of the Oxford Choral Society. In 1883 he was appointed one of the University examiners for musical degrees. In 1907 he presented a new organ to his native village of Stanningley. His compositions include sacred cantatas, 'Jonah,' for voices and orchestra; 'Advent,' 'The Story of the Incarnation,' 'The Passion,' for church choirs; Psalm ciii. for voices and orchestra; six services, one an evening service in C written for

the London Church Choir Association Festival in 1894; about fifty anthems, besides part-songs, and organ pieces. His *Practical Method of Training Choristers*, 1898, 1900, and 1905, is very useful. W. B. S.

ROBIN ADAIR. [See EILEEN AROON, vol. i. p. 770.]

ROBIN DES BOIS. The title of the French version of 'Der Freischütz' at its first appearance in Paris (Odéon, Dec. 7, 1824; Opéra-Comique, Jan. 15, 1835; Lyrique, Jan. 24, 1855). The libretto was made by Sauvage; the names of the characters were changed, the action and the story were altered, portions of 'Preciosa' and 'Oberon' were introduced, and the piece was made to end happily. The alterations were due to Castil Blaze, who, to save expense, scored the music himself from a PF. copy. Nevertheless, with all these drawbacks, so great was the popularity of the music that Castil Blaze made a large sum of money by it. For the translation by Pacini and Berlioz see FREISCHÜTZ, vol. ii. p. 107. G.

ROBIN HOOD. An opera in three acts; words by John Oxenford, music by G. A. Macfarren. Produced at Her Majesty's Theatre, London, Oct. 11, 1860, and had a very great run. G.

Other operas on the same subject have been produced, besides many masques of the 16th and 17th centuries, more or less associated with the May Day games and observances; of these early pieces little record as to detail has survived.

A ballad opera of the name was acted at Lee & Harper's great booth, at St. Bartholomew's Fair, in 1730; the music and libretto of this was published by John Watts in the year of production. A different 'Robin Hood,' by Moses Mendez, was performed at Drury Lane in 1750, the music being supplied by Charles (afterwards Dr.) Burney. Another English ballad opera in three acts, which attained some degree of fame, was entitled 'Robin Hood, or Sherwood Forest.' This was written by Leonard MacNally, with the music selected, arranged, and composed by William Shield. It was produced at Covent Garden Theatre in 1784, the principals being Mrs. Kennedy, Mrs. Martyr, Mrs. Banister, and Miss Kemble, while the male singers were Banister, Johnstone, and Edwin. The piece had a considerable run, and several of the songs lasted in popularity long after the opera itself was dead. F. K.

ROBINSON, ANASTASIA, born about 1698, was daughter of a portrait painter, who, becoming blind, was compelled to qualify his children to gain their own livelihood. Anastasia received instruction from Dr. Croft, Pier Giuseppe Sandoni, and the singer called The Baroness, successively. She appeared in 'Creso,' in 1714; as Ariana in Handel's 'Amadigi,' May 25, 1715; and in 1720 at the King's Theatre as

Echo in Domenico Scarlatti's opera, 'Narciso.' She afterwards sang in the pasticcio of 'Muzio Scevola,' in Handel's 'Ottone,' 'Floridante,' 'Flavio,' and 'Giulio Cesare'; in Buononcini's 'Crispo' and 'Griselda,' and other operas. Her salary was £1000 for the season, besides a benefit-night. She possessed a fine voice of extensive compass, but her intonation was uncertain. She quitted the stage in 1724, having two years previously been privately married to the Earl of Peterborough, who did not avow the marriage until shortly before his death in 1735, although, according to one account, she resided with him as mistress of the house, and was received as such by the Earl's friends. According to another account, she resided with her mother in a house at Parson's Green, which the Earl took for them, and never lived under the same roof with him, until she attended him in a journey in search of health, a short time before his death. She died at Bevis Mount, Southampton, in April 1755, and was buried at Bath Abbey. There is a fine portrait of her by Faber after Bank, 1727.

Her younger sister, ELIZABETH, intended for a miniature painter, preferred being a singer. She studied under Buononcini, and afterwards at Paris under Rameau; but though an excellent singer, was said to have been prevented by timidity from ever appearing in public.¹ A fortunate marriage, however, relieved her from the necessity of obtaining her own subsistence. W. H. H.; with additions from the *Dict. of Nat. Biog.*

ROBINSON, JOHN, born 1682, was a chorister of the Chapel Royal under Dr. Blow. He became organist of St. Lawrence, Jewry, in 1710 and St. Magnus, London Bridge, in 1713. Hawkins, in his History, describes him as 'a very florid and elegant performer on the organ, inasmuch that crowds resorted to hear him'; and elsewhere says: 'In parish churches the voluntary between the Psalms and the first Lesson was anciently a slow, solemn movement, tending to compose the minds and excite sentiments of piety and devotion. Mr. Robinson introduced a different practice, calculated to display the agility of his fingers in *allegro* movements on the cornet, trumpet, sesquialtera, and other noisy stops, degrading the instrument, and instead of the full and noble harmony with which it was designed to gratify the ear, tickling it with mere airs in two parts, in fact solos for a flute and a bass.' On Sept. 30, 1727, Robinson was appointed to succeed Dr. Croft as organist of Westminster Abbey. He had an extensive practice as a teacher of the harpsichord, and will be long remembered by his double chant in E♭. He died April 30, 1762, and was buried, May 13, in the north aisle of Westminster Abbey. He married, Sept. 6, 1716, Ann,

¹ A 'Miss Robinson, jun.,' appeared at Drury Lane, Jan. 2, 1729, as Ariel in 'The Tempest.' It is possible that this was Margaret Robinson.

youngest daughter of William Turner, Mus.D. She was a singer, and appeared at the King's Theatre in 1720 in Domenico Scarlatti's opera 'Narciso,' being described as 'Mrs. Turner-Robinson' to distinguish her from Anastasia Robinson, who sang in the same opera. She died Jan. 5, and was buried Jan. 8, 1741, in the west cloister of Westminster Abbey. Robinson had a daughter, who was a contralto singer and the original representative of Daniel in Handel's oratorio 'Belshazzar,' 1745, and also sang in others of his oratorios. W. H. H.

ROBINSON, JOSEPH, was the youngest of four brothers, born and resident in Dublin. Their father Francis was an eminent professor of music, and in 1810 was mainly instrumental in founding 'the Sons of Handel,' probably the earliest society established there for the execution of large works. His eldest son Francis, Mus.D., born about 1799, had a tenor voice of great beauty and sympathetic quality; was a vicar-choral of the two Dublin Cathedrals; and, at the Musical Festival in Westminster Abbey, in June 1834, sang a principal part. He died Oct. 31, 1872. Another son, William, had a deep bass of exceptional volume; while John, born about 1812, died in 1844, the organist of both Cathedrals and of Trinity College, had a tenor ranging to the high D. The four brothers formed an admirable vocal quartet, and were the first to make known the German Part-songs then rarely heard either in England or Ireland.

JOSEPH ROBINSON, born August 20, 1815, was a chorister of St. Patrick's at the early age of eight, and afterwards a member of all the choirs, where his fine delivery of recitative was always a striking feature. He also played in the orchestra of the Dublin Philharmonic. But it is as a conductor that his reputation is best established. In 1834 he founded the 'Antient Concert Society,' of which he was conductor for twenty-nine years, and which ceased to exist soon after his resignation. It commenced its meetings in a private house, then took a large room, now the Royal Irish Academy of Antiquities, and in 1843 had made such progress that it purchased and remodelled the building since known as the 'Antient Concert Rooms.' Amongst the last things written by Mendelssohn was the instrumentation of his 'Hear my Prayer' (originally composed for voices and organ only), expressly for Mr. Robinson to produce at the 'Antients.' It did not reach him till after the composer's death. [See MENDELSSOHN, vol. iii. p. 145a, note 2.] In 1837 he became conductor of the 'University Choral Society,' founded by the students. At one of its concerts the music of 'Antigone' was given for the first time out of Germany. He continued to conduct the Society for ten years. [In 1849 he married Miss Fanny Arthur (see below).] In 1852, at the opening of the Cork Exhibition, Mr. Robinson conducted the music,

which was on a large scale, and included a new cantata by Sir Robert Stewart. In 1853, an International Exhibition was opened in Dublin; there he assembled 1000 performers, the largest band and chorus yet brought together in Ireland.

In 1856 efforts were made to revive the 'Irish Academy of Music,' founded in 1848, but languishing for want of funds and pupils. (See ROYAL IRISH ACADEMY.) Mr. and Mrs. Robinson joined as Professors, and nearly all the Irish artists, both vocal and instrumental, who appeared during their time, owed both training and success to their teaching; and when, after twenty years, Mr. Robinson resigned, the institution was one of importance and stability. In 1859, for the Handel Centenary, he gave the 'Messiah,' with Jenny Lind and Belletti among the principals. The net receipts amounted to £900, an unprecedented sum in Dublin. In 1865 the large Exhibition Palace was opened by the Prince of Wales, and Robinson conducted the performance with a band and chorus of 700.

After the cessation of the 'Antients,' there was no Society to attempt systematically the worthy production of great works. To remedy this a chorus was trained by Robinson, and established in 1876 as the 'Dublin Musical Society.' The last concert conducted by Robinson was on Dec. 6, 1888, previous to which the members presented him with an address and a purse of 100 sovereigns. The purse was returned by him with warm expressions of gratitude, but with the characteristic words, 'While I think a professional man should expect his fair remuneration, yet his chief object may be something higher and nobler—the advancement of art in his native city.' The Society was revived in 1889, under the conductorship of Dr. Joseph Smith, but collapsed after some years. He wrote a variety of songs, concerted pieces and anthems, besides arranging a number of standard songs and Irish melodies. In 1881 he married for the second time; he died August 23, 1898.

In 1849 a young pianist, Miss FANNY ARTHUR (born Sept. 1831), arrived in Dublin from Southampton, and made her first successful appearance there—Feb. 19, 1849. She had studied under Sterndale Bennett and Thalberg. Mr. Robinson and she were married July 17 following, and she continued for thirty years to be an extraordinary favourite. Her first appearance in London was at the Musical Union, June 26, 1855, when she played Beethoven's Sonata in F (op. 24), with Ernst, and received the praises of Meyerbeer; also at the New Philharmonic in 1856, where she played Mendelssohn's Concerto in D.

Mrs. Robinson also passed a very active musical life, though it was often interrupted by nervous illness. In teaching she had a peculiar power of infusing her own ideas into others. She played from time to time at concerts of a high class, and herself gave a very successful

concert in Paris, at the Salle Erard (Feb. 4, 1864). Her pianoforte compositions are numerous and graceful. Her sacred cantata, 'God is Love,' was repeatedly performed throughout the kingdom.

On Oct. 31, 1879, she met a sudden and tragic end, which caused profound regret. H. M'C. D.; with additions from *Brit. Mus. Biog.*, *Musical Times*, Sept. 1898, p. 609, and from W. H. Grattan Flood, Esq. [See also an article by Sir C. V. Stanford in *Cornhill Magazine*, June 1899.]

ROBINSON, THOMAS, was author of a curious work published at London in folio in 1603, bearing the following title—*The Schoole of Musicke: wherein is taught the perfect method of the true fingering of the Lute, Pandora, Orpharion and Viol de Gamba*. In 1609 he published 'New Citharen Lessons.' Nothing is known of his biography. W. H. H.

ROBSON, JOSEPH, organ-builder. See APOLLONICON, vol. i. p. 95, and FLIGHT, vol. ii. p. 61.

ROCHE, EDMOND, born at Calais, Feb. 20, 1828, died at Paris, Dec. 16, 1861, began life as a violin-player, first as Habeneck's pupil at the Conservatoire, but quickly relinquished music for literature. Roche undertook the translation of the libretto of 'Tannhäuser' for its representation at the Opéra, March 13, 1861, and in a preface to his *Poésies posthumes* (Paris, Lévy, 1863) M. Sardon has described the terrible persistence with which Wagner kept his translator to his task. (See Pougin's supplement to *Fétis*.) In Jullien's *Richard Wagner*, 1887, the facts of the case were made public; it seems that Roche, not knowing German, had recourse to the services of a friend named Lindau, and the translation, when sent to the director of the Opera, was rejected, as it was in blank verse; the necessary alteration into rhyme was made by Roche, Nuitter, and Wagner in collaboration. On this Lindau brought an action against Wagner, to enforce the mention of his name as one of the translators; the case was heard on March 6, 1861, a week before the first representation of the opera, and it was decided that no name but that of Wagner should appear in the books. So that Roche had not even the satisfaction of seeing his name in print, in connection with the work, for even Lajarte (*Bibl. Mus. de l'Opéra*, ii. 230) gives Nuitter as the author of the French words. Besides the poems contained in the volume cited, Roche contributed critical articles to several small periodicals. M.

ROCHLITZ, JOHANN FRIEDRICH, critic, and founder of the *Allgemeine musikalische Zeitung*, born of poor parents at Leipzig, Feb. 12, 1769. His fine voice procured his admission at thirteen to the Thomasschule, under the Cantorship of Doles, where he spent six years and a half. He began to study theology in the University, but want of means compelled him to leave and take a tutorship, which he supplemented by writing. [For the

titles of his non-musical works see Riemann's *Lexikon*.] He also attempted composition, and produced a mass, a Te Deum, some part-songs for male voices, a setting of Ps. xxiii., and a cantata, 'Die Vollendung des Erlösers.' In 1798 he founded the *Allgemeine musikalische Zeitung* (Breitkopf & Härtel), and edited it till 1818, during which period his articles largely contributed to the improved general appreciation of the works of the three great Austrian composers, Haydn, Mozart, and Beethoven, in North Germany. The best of these were afterwards re-published by himself under the title of *Für Freunde der Tonkunst*, in four vols. (1824 to 1832, reprinted later by Dörffel, third edition, 1868). It contains, amongst other matter, an interesting account of a visit to Beethoven at Vienna in 1822. Another important work was a collection in three vols. (Schott, 1838 to 1840) of vocal music, from Dufay to Haydn, in chronological order, of which the contents are given below. The first two volumes of the *A.M.Z.* contain a series of anecdotes on Mozart, whose acquaintance he made during Mozart's visit to Leipzig; but Jahn, in the preface to his *Mozart*, has completely destroyed the value of these as truthful records. Rochlitz was a good connoisseur of paintings and engravings. In 1830 he was one of the committee appointed by the Council of Leipzig to draw up a new hymn-book, and some of the hymns are from his own pen. He also wrote the librettos for Schicht's 'Ende des Gerechten,' Spohr's 'Last Judgment' and 'Calvary,' and for Bierey's opera 'Das Blumenmädchen.' He was a Hofrath of Saxony, and died Dec. 16, 1842. F. G.

The following are the contents of the collection mentioned above—'Sammlung vorzüglicher Gesangstücke vom Ursprung gesetzmässiger Harmonie bis auf die neue Zeit':—

FIRST PERIOD (1380-1550)

1. Dufay. Kyrie, a 4. Se la face ay pale.
2. Do. Kyrie, u. 4. 'L'homme armé.'
3. Okeghem. Kyrie and Christe, a 4.
4. Josquin de Prés. Hymnus, a 4. Tu pauperum refugium.
5. Do. Zwischengesang einer der grössten Meisen des Meisters, et Incarnatus, a 4.
6. Do. Motet, Misericordias Domini, a 4.
7. O. Lasso. Regina Coeli, a 4.
8. Do. Salve Regina, a 4.
9. O. Lasso. Angelus pastores, a 5.
10. Do. Misereere, Amplius, Cor mundum. Ne proficeas, Redde mihi, etc., a 5.
11. C. Goudimel. Domine quid multiplicasti, a 4.
12. Ch. de Morles. Kyrie et Christe, a 4.
13. Do. Gloria.
14. F. Tallis. Verba mea, a 4.
15. L. Senl. Motet on a Choral. 'Mag ich unglück,' a 4.
16. Do. Deus propitius esto, a 5.
17. Do. Nunc dimittis, a 4.

SECOND PERIOD (1550-1630)

1. Palestrina. Adoramus, a 4.
2. Do. Gloria, two choirs, a 4.
3. Do. Pleni sunt, a 3.
4. Do. O bone Jesu, a 4.
5. Do. Popule meus, two choirs, a 4.
6. Do. Madrigal, 'Cedro gentili,' a 5.
7. Do. Lauda anima mea, a 4.
8. G. M. Nasini. Stabat mater, a 4.
9. Do. Exaudi nos, a 4.
10. Do. Haec dies, a 5.
11. Victoria. Jesu dulcis, a 4.
12. Do. O quam gloriosum, a 4.
13. P. Anerio. Adoramus, a 4.
14. Do. Christus factus est, a 4.
15. Allegri. Misereere, two choirs, a 5.
16. Gabrieli. In excelsis. Soprano solo. Tenor solo and chorus, a 4, with three horns, two trombones and violins.
17. Do. Benedictus, three choirs, a 4.
18. Böhm, Brüder. Two Lieder, a 4: Der Tag verkehrt; Die Nacht ist kommen.
19. Do. Two Lieder, a 4: Verleib' aus Frieden; Nimm' von uns.
20. Walther. Eterno gratias, a 4.
21. Gesänge Martin Luthers, a 4: Mit Fried und Freud: Es woll' uns Gott: Nun komm der Heiden Heiland; Christ lag; Jesus Christus.

22. Gallus. Ecce quomodo moritur justus, a 4.
23. Do. Adoramus, a 3.
24. Do. Media vitae, two choirs, a 4.
25. Vulpus. Exultate just, a 4.
26. Do. Surrexit Christus, two choirs, a 4.
27. Walliser. Gaudent in coelis, two choirs, a 4.
28. Praetorius. Ecce Dominus, a 3.

Appendix

- Palestrina. Et incarnatus, etc. (from mass 'Assumpta est'), a 8.
Praetorius. O vos omnes.

THIRD PERIOD (1600-1700)

1. Caccini. Solo and chorus, Funeste piaggie.
2. Do. Chorus, Biondo arcier.
3. Carissimi. Recitative and chorus, Turbavuntur (from Cantata 'Plantes des réprochées').
4. Do. Ardens est cor, four solos and chorus.
5. Do. O sacrum convivium, three solo voices.
6. Do. Cantemus omnes, chorus and scena (Jetta).
7. Beccadelli. Sanctus, four choirs, a 4.
8. Do. Christe, a 4.
9. Bernabei. Alleluja, a 4.
10. Do. Salve regina, a 4.
11. A. Scattini. Kyrie, a 4.
12. Do. Gloria, a 5.
13. Do. Vacuum est, Canto solo and chorus, with violins.
14. Do. Sautus, a 4, and Agnus, a 7.
15. Caldara. Salve regina, a 3.
16. Do. Agnus, alto and tenor.
17. Do. Qui tollis, a 4.
18. Astorga. Stabat.
19. Do. Fac me.
20. Do. O quam.
21. Durante. Kyrie.
22. Do. Regina angelorum.
23. Do. Requiem aeternam.
24. Do. Domine Jesu.
25. Lottl. Crucifixus, a 8.
26. Do. Qui tollis, a 4.
27. Do. Crucifixus, a 8.
28. Marcello. Udir' le orecchie, Pe. xlv. a 4.
29. Do. Et incarnatus, a 7.
30. Hasler. Pater noster, a 7.
31. H. Schütz. Selig sind die Todten, a 4.
32. Do. Chorus, Christus ist hier, a 4.
33. Do. Psalm, Was betrübet Du?
34. Do. Vater unser.
35. V. Leiringer. Trotz sey dem Teufel, two choirs, a 4.
36. Grimm. Gloria, a 5.
37. J. J. Fux. Domine Jesu, a 4.
38. Do. Trema la terra. Coro from oratorio 'La Deposizione.'

FOURTH PERIOD (1700-1780)

1. Handel. Te Deum, in D, Gloria tuse.
2. Do. He sent a thick darkness.
3. Do. He rebuked the Red Sea.
4. Do. And Israel saw.
5. Do. Behold the Lamb of God.
6. Do. He was despised.
7. Do. Thy rebuke.
8. Do. Lift up your heads.
9. Do. Hear, Jacob's God.
10. Do. Zedek the Priest.
11. Christoph Bach. Ich lasse dich nicht.
12. J. S. Bach. Nimm' von uns Herr.
13. Do. Mache dich mein Geist.
14. Do. Wir setzen uns mit Thronen nieder.
15. Do. Wie sich ein Vater. Lobet den Herrn.
16. Zelenka. Credo.
17. Telemann. Amen. Lob und Ehre, a 8.
18. Stölzel. Gloria.
19. Homilius. Vater unser, a 4.
20. Pastoretz. Requiem.
21. Hasse. Duet and Chorus, Le porte a noi.
22. Hasse. Alto solo, Ad te clama-mus.
23. Do. Misereere, and Benigni.
24. Do. Te Deum, a 4.
25. Graun. Machede die Thür weit.
26. Do. Tu rex gloriae, a 4.
27. Do. Freuet euch (Tod Jesu).
28. Do. Wir hier liegen.
29. Rolia. Der Herr ist König.
30. Do. Welt-Richter (Tod Abel).
31. Wolf. Laus et perennis gloria, a 4.
32. Do. Des Lebens Fürsten.
33. C. P. E. Bach. Et miseri-cordia, a 6, from Magnificat.
34. Do. Heilig, two choirs, a 4.
35. M. Haydn. Salvos fac nos.
36. Do. Resurrexisti.
37. Leo. Coro. Di quanta pena (S. Elena).
38. Do. Et incarnatus.
39. Do. Misereere; Ecce enim, a 8.
40. Jommelli. Confirma hoc Deus, five solos and chorus.
41. Do. Misereere.
42. Pergolesi. Eja ergo (Salve Regina).
43. Do. Qui tollis, a 8.
44. Do. Stabat Mater.

G.

ROCK, MICHAEL, was appointed organist of St. Margaret's, Westminster, June 4, 1802, in succession to William Rock, junr., who had filled the office from May 24, 1774. He composed some popular glees—'Let the sparkling wine go round' (which gained a prize at the Catch Club in 1794), 'Beneath a churchyard yew,' etc. He died in March 1809. W. H. H. ROCKSTRO (originally RACKSTRAW), WILLIAM SMITH, born at North Cheam, Surrey, on Jan. 5, 1823, and baptized at Morden church. The form of his surname by which he was known was an older style resumed after 1846. He was successively pupil of John Purkis, the blind organist, of Sterndale Bennett, and at the Leipzig Conservatorium, where he studied from 1845 till 1846. He enjoyed the special friendship and tuition of Mendelssohn, and was with Hauptmann for theory and with Plaidy for pianoforte. For some years after his

return to England, he was active as a teacher and performer in London, being regular accompanist at the 'Wednesday concerts,' where Braham and other eminent singers were to be heard. At this period he wrote his most popular and beautiful song, 'Queen and huntress'; and his pianoforte editions of classical and other operas led the way in popularising that class of music in an available form for the use of those who could not read full scores; and in his indications of the orchestral instruments above the music-staves he did much to point the way towards a general appreciation of orchestral colour. In the early sixties he left London for Torquay on account of his mother's health and his own, and on her death in 1876, he openly became a member of the Roman communion. He had been organist and honorary precentor at All Saints' Church, Babbacombe, from 1867, and won a high position as a teacher. He published, with T. F. Ravenshaw, a 'Festival Psalter, adapted to the Gregorian Tones,' in 1863, and 'Accompanying Harmonies to the Ferial Psalter,' in 1869. These were the first-fruits of his assiduous study of ancient music, on which he became the first authority of his time in England. A couple of valuable text-books, on harmony (1881) and counterpoint (1882) respectively, had a great success, and in the latter part of the first edition of this Dictionary he wrote a large number of articles on musical archaeology generally. In the present day, musical research has been sedulously carried on in other countries, and it is inevitable that some of his conclusions should have been controverted, if not disproved; but, considering the state of musical education at the time he wrote, the value of his contributions to such subjects as the music of the period which closed in 1600, can hardly be exaggerated. He was too ardent a partisan to be an ideal historian, but his *History of Music for Young Students* (1879) and his larger work *A General History of Music* (1886) contain much that is of permanent value. His *Life of Handel* (1883) and *Mendelssohn* (1884) are fine examples of eulogistic biography, though they are hardly to be recommended as embodying a calmly critical estimate of either composer. In his larger *History* he showed that he was, nevertheless, not above owning himself in the wrong, and his recantation of certain excessive opinions expressed by him in the Dictionary against Wagner's later works was due to true moral courage. He conducted a concert of sacred music of the 16th and 17th centuries at the Inventions Exhibition of 1885, and in 1891 gave up Torquay for London, giving lectures at the Royal Academy and Royal College of Music, and holding a class for counterpoint and plain-song at the latter institution. Here he imparted the true principles of the ancient music with great success to many worthy pupils; and as a

singing-master and teacher of the pianoforte his method of imparting instruction was remarkably successful. As a composer, he never quite freed himself from the powerful influences engendered by his studies; the lovely madrigal, 'O too cruel fair,' was judged unworthy of a prize by the Madrigal Society on the ground that it was modelled too closely on Palestrina; and his oratorio, 'The Good Shepherd,' produced at the Gloucester Festival of 1886 under his own direction, was found to bear too many traces of Mendelssohnian influence to deserve success. In 1891, he collaborated with Canon Scott Holland in writing the life of his old friend, Jenny Lind-Goldschmidt; an abbreviated edition came out in 1893, and with Mr. Otto Goldschmidt he wrote a still shorter book, *Jenny Lind, her Vocal Art and Culture* (partly reprinted from the biography). For many years his health had been bad, and he had many adverse circumstances to contend with. He fought bravely for all that he held best in art, and boundless enthusiasm carried him through. He died in London, July 2, 1895. (*Dict. of Nat. Biog.* etc.) M.

RODE, JACQUES PIERRE JOSEPH, a great violinist, was born at Bordeaux, Feb. 16, 1774. When eight years of age he came under the tuition of Fauvel aîné, a well-known violinist of his native town, and studied under him for six years. In 1788 he was sent to Paris. Here Punto (or Stich), the famous horn-player, heard him, and being struck with the boy's exceptional talent, gave him an introduction to Viotti, who at once accepted him as his pupil. With this great master he studied for two years, and in 1790 made his first public appearance, when he played Viotti's 13th Concerto at the Théâtre de Monsieur with complete success. Although then but sixteen years of age, he was appointed leader of the second violins in the excellent band of the Théâtre Feydeau. In this position, appearing at the same time frequently as soloist, he remained till 1794, and then started for his first tour to Holland and the north of Germany. His success, especially at Berlin and Hamburg, was great. From the latter place he sailed for his native town, but the vessel was compelled by adverse winds to make for the English coast. So Rode came to London; but he only once appeared in public, at a concert for a charitable purpose, and left England again for Holland and Germany. Finally he returned to France and obtained a professorship of the violin at the newly established Conservatoire at Paris. He was solo violin at the Opéra until November 1799. In 1799 he went to Spain, and at Madrid met Boccherini, who is said to have written the orchestration for Rode's earlier concertos, especially for that in B minor. On his return to Paris in 1800 he was appointed solo-violinist to the First Consul, and it was at that period that he

achieved his greatest success in the French capital. In 1803 he went with Boieldieu to St. Petersburg. Spohr heard him on his passage through Brunswick, and was so impressed that for a considerable time he made it his one aim to imitate his style and manner as closely as possible. Arrived at the Russian capital, Rode met with a most enthusiastic reception, and was at once attached to the private music of the Emperor with a salary of 5000 roubles (about £750). But the fatigues of life in Russia were so excessive that from this period a decline of his powers appears to have set in. On his return to Paris in 1808 his reception was less enthusiastic than in former times, and even his warmest friends and admirers could not but feel that he had lost considerably in certainty and vigour. From 1811 we find him again travelling in Germany. Spohr, who heard him in 1813 at Vienna, tells in his Autobiography (i. 178) of the disappointment he felt at Rode's playing, which he now found mannered, and deficient in execution and style.

In Vienna Rode came into contact with Beethoven, who finished the great Sonata in G, op. 96, expressly for him. It was played by Rode and the Archduke Rudolph, Beethoven's pupil, at a private concert, but as far as the violin part was concerned, not much to the composer's satisfaction. Soon afterwards, at any rate, Beethoven requested the Archduke to send the violin part to Rode that he might play it over before a second performance, and he adds: 'He will not take it amiss; certainly not! would to God there were reason to beg his pardon for doing so.'¹ Fétis's statement that Beethoven wrote a Romance for Rode, probably rests on a confusion of the G major Sonata with the Romanza in the same key.

In 1814 Rode went to Berlin, married, and remained for some time. He then retired to his native place. At a later date he made an ill-advised attempt to resume a public career. But his appearance at Paris proved a complete failure, and Mendelssohn, writing from thence in April 1825, says that he was fixed in his resolution never again to take a fiddle in hand.² This failure he took so much to heart that his health began to give way, and he died at Bordeaux, Nov. 25, 1830.

Rode was one of the greatest of all violinists. During the earlier part of his career he displayed all the best qualities of a grand, noble, pure, and thoroughly musical style. His intonation was perfect; his tone large and pure; boldness and vigour, deep and tender feeling, characterised his performances. In fact he was no mere virtuoso, but a true artist. His truly musical nature shows itself equally in his compositions. Although his general

musical education appears to have been, like that of most French violinists, deficient (we have already mentioned that Boccherini added the simple orchestration to his earlier concertos), yet his works, especially his concertos, have a noble dignified character and considerable charm of melody, while, it need hardly be added, they are thoroughly suited to the nature of the violin. On the other hand, they hardly show high creative power; of thematic treatment there is very little, the form, though not unsymmetrical, is somewhat loose, and the instrumentation poor.

He published ten concertos (three more were issued after his death); five sets of quartets; seven sets of variations; three books of duos for two violins, and the well-known twenty-four caprices.

Of his concertos, the 7th in A minor is still in the repertory of some eminent violinists. The variations in G major—the same which the famous singer Catalani and other celebrated vocalists after her have made their *cheval de bataille*—are occasionally heard. But above all, his '24 caprices or études' will always, along with Kreutzer's famous forty caprices, hold their place as indispensable for a sound study of the violin.

Although, owing to his life of travel, he had but few direct pupils, his influence through his example and compositions on the violinists of France, and more especially of Germany, was very great indeed. Böhm, the master of Joachim, and Ednard Rietz, the friend of Mendelssohn, both studied under him for some time. P. D.

RODWELL, GEORGE HERBERT BONAPARTE, born Nov. 15, 1800, brother of J. T. G. Rodwell, part proprietor and manager of the Adelphi Theatre, London, and author of several dramatic pieces, was for many years music-director of the Adelphi. On the death of his brother, in March 1825, he succeeded to his share in the theatre. He was a pupil of Vincent Novello and Henry Bishop, and became in 1828 professor of harmony and composition at the Royal Academy of Music. He was the composer of very many operettas and other dramatic pieces, of which the following are the principal: 'The Flying Dutchman' (Adelphi, 1826); 'The Cornish Miners' (English Opera-House, 1827); 'The Bottle Imp' and 'The Mason of Buda' (partly adapted from Anber's 'Le Maçon'), 1828; 'The Spring Lock,' 'The Earthquake,' and 'The Devil's Elixir,' 1829; 'The Black Vulture,' 1830; 'My Own Lover,' and 'The Evil Eye,' 1832; 'The Lord of the Isles,' 1834; 'Paul Clifford' (with Blewitt), 1835; 'The Spirit of the Bell' (Lyceum, 1835); 'The Sexton of Cologne,' 1836; 'Jack Sheppard,' 1839; and 'The Seven Sisters of Munich,' 1847. In 1836 he was director of the music at Covent Garden, where he brought out many adaptations of operas, etc., 'anticipating the

¹ Thayer, *Life of Beethoven*, iii. p. 223.

² *Die Familie Mendelssohn*, i. p. 149.

repertory of Drury Lane' (*Dict. of Nat. Biog.*). He was author of several farces and other dramatic pieces, amongst which were 'Teddy the Tiler' (written in 1830 for Tyrone Power, and eminently successful), 'The Chimney-Piece,' 'The Pride of Birth,' 'The Student of Lyons,' and 'My Wife's Out'; of three novels, 'Old London Bridge,' 'Memoirs of an Umbrella,' and 'Woman's Love'; and of 'The First Rudiments of Harmony,' 1831. He composed also two collections of songs: 'Songs of the Sabbath Eve,' and 'Songs of the Birds' (1827). He for many years persistently advocated the establishment of a National Opera. He married the daughter of Liston, the comedian; died in Upper Ebury Street, Pimlico, Jan. 22, 1852, and was buried at Brompton Cemetery. W. H. H.

ROECKEL, PROFESSOR JOSEPH AUGUST, was born August 28, 1783, at Neumburg vorm Wald, in the Upper Palatinate. He was originally intended for the church, but in 1803 entered the diplomatic service of the Elector of Bavaria as Privats Secretary to the Bavarian Chargé d'Affaires at Salzburg. On the recall of the Salzburg Legation in 1804, he accepted an engagement to sing at the Theatrs an-der-Wien, where, March 29, 1806, he appeared as Florestan in the revival of 'Fidelio.'¹ In 1823 Roeckel was appointed Professor of Singing at the Imperial Opera; in 1828 he undertook the direction of the opera at Aix-la-Chapelle, and in the following year made the bold experiment of producing German operas in Paris with a complete German company. Encouraged by the success of this venture, Professor Roeckel remained in Paris until 1832, when he brought his company to London, and produced 'Fidelio,' 'Der Freischütz,' and other masterpieces of the German school, at the King's Theatre; the principal artists being Schröder-Devrient and Haitzinger, with Hummel (Roeckel's brother-in-law) as conductor. In 1835 he retired from operatic life, and in 1853 finally returned to Germany, where he died, at Anhalt-Cöthen, in September 1870.

AUGUST, his eldest son, was born Dec. 1, 1814, at Graz. He was Musikdirector at Bamberg, at Weimar (1838-43), and lastly was Musikdirector at the Dresden Opera in 1843-49, and so a colleague of Richard Wagner; being, like the latter, involved in the Revolution of 1848 (he had also witnessed the Paris revolution of 1830), he abandoned music and devoted himself entirely to politics. He spent thirteen years in prison (1849-62), and on his release became editor of various newspapers, at Coburg, Frankfurt, Munich, and Vienna, successively. He published an account of his imprisonment (*Sachsen's Erhebung*, etc.). Wagner's letters to him were published in 1894, and translated into English by Miss E. C. Sellar shortly after-

¹ For Roeckel's own account of his intercourse with Beethoven see Thayer, vol. ii. p. 204, and vol. iii. p. 269.

wards. From admiration of Wagner's genius, Roeckel withdrew an opera of his own, 'Farinelli,' which had been accepted for performance at Dresden. See also Praeger's *Wagner as I knew him*, p. 119 ff. He died at Buda-Pesth on June 18, 1876.

EDWARD, the second son of Professor Roeckel, was born at Trèves on Nov. 20, 1816, and received his musical education from his uncle J. N. Hummel. He came to London in 1835, and gave his first concert in 1836 at the King's Theatre. He subsequently went on a concert-tour in Germany, and performed with great success at the courts of Prussia, Saxony, Saxe-Weimar, Anhalt-Dessau, etc. In 1848 Roeckel settled in England, and resided at Bath, where he succeeded the late Henry Field. He died there Nov. 2, 1899. He published a considerable quantity of pianoforte music.

JOSEPH LEOPOLD, the youngest son of Professor Roeckel, was born in London, April 11, 1838. He studied composition at Würzburg under Eisenhofer, and orchestration under Götze at Weimar. Like his brother, Mr. J. L. Roeckel settled in England, and lives at Clifton; he is well known as a teacher and a voluminous composer of songs. His orchestral and instrumental compositions are less well known, but his cantatas 'Fair Rosamond,' 'Ruth,' 'The Sea Maidens,' 'Westward Ho,' and 'Mary Stuart,' 'The Victorian Age' (1887), and many others, have been received with much favour. The first of these was performed at the Crystal Palace in 1871, and a baritone scena with orchestra, 'Siddartha,' was produced at the Bristol Festival of 1896. A song-cycle was brought forward at the same festival in 1902. In 1864 Roeckel married Miss Jane Jackson, a successful pianist, who did much good work as a teacher at Clifton, and wrote pianoforte pieces, etc., under the name of Jules de Sivrai. She died at Clifton on Aug. 26, 1907, aged 73. W. B. S.

RÖNTGEN, ENGELBERT, born Sept. 30, 1829, at Deventer in Holland, entered the Conservatorium at Leipzig in 1848, as a pupil of David for violin and of Hauptmann for theory. Upon graduating at the Conservatorium, Röntgen was engaged as a first violin both in the Opera orchestra and in the famous Gewandhaus orchestra. In 1869 he became professor of the violin at the Conservatorium; second Concertmeister of the Gewandhaus orchestra, and, on the death of his illustrious master, David, in 1873, he was made first Concertmeister in his place. Röntgen was a fine violinist although he never adopted the career of a virtuoso, and his careful editing of Beethoven's Quartets proves him to have been a scholarly musician. He married a daughter of Moritz Kleugel, himself Concertmeister at the Gewandhaus. He died in Leipzig, Dec. 12, 1897.—A. Ehrlich's *Celebrated Violinists*; Bachmann, *Le Violon*; Lahee's *Famous Violinists*.

E. H.-A.

His son, JULIUS, was born at Leipzig, May 9, 1855, and soon displayed a great gift for music. His parents were his first teachers, and he afterwards learned from Hauptmann, Richter, Plaidy, and Reinecke. In 1872 he went to Munich, and remained there for some time studying counterpoint and composition under Franz Lachner. A tour with Stockhausen in 1873-74, during which he played chiefly his own compositions, launched him favourably before the world. [He now lives in Amsterdam, where he was teacher in the Conservatorium for some years before succeeding Verhulst as director of the Maatschappij tot Bevordering der Tonkunst in 1886. He was also conductor of the Felix Meritis society for the last two years of its existence. Since 1898 Röntgen has devoted himself entirely to teaching and composition.] His published works amount to eighteen, almost all of a serious character. They are, for the PF.—a duet for four hands, in four movements (op. 16); two sonatas (opp. 2, 10), a phantasie (op. 8); a suite (op. 7); a ballade (op. 5), a cyclus of pieces (op. 6), and a theme with variations (op. 17), etc. etc.; a sonata for PF. and violin (op. 1) and for PF. and violoncello (op. 3); a concerto for PF. and orchestra (op. 18); a serenade for seven wind instruments (op. 14); 'Toskanische Rispetti,' a Liederspiel (op. 9); nine songs (op. 15) etc. etc. The violoncello sonata was played at the Monday Popular Concert of Feb. 14, 1881, and was well received. G.

ROGEL, JOSÉ, Spanish conductor and composer, born at Orihuela, Alicante, Dec. 24, 1829; began music under Cascales and Gil, organist and conductor of the cathedral, and made great progress, till sent to Valencia by his father to study law. The six years which he spent there were, however, devoted much more to music than to law, under the guidance of Pascual Perez, a musician of ability, from whom he learned composition and other branches of practical music. After completing his legal course and taking his degree at Madrid, Rogel was able to indulge his taste, plunged into music without restraint, and became, or at any rate acted as, conductor and composer to several theatres. The notice of him in Pougin's supplement to Fétis, from which this notice is taken, enumerates no fewer than sixty-one zarzuelas or dramatic pieces of his composition, fourteen of them in three acts, eight in two acts, and the remainder in one act, besides a dozen not yet brought out. The titles of the pieces are of all characters, ranging from 'Revista de un muerto' and 'Un Viage de mil demonios' to 'El General Bumbum.' No criticism is given on the merits of the music, but it must at least be popular. G.

ROGER, ESTIENNE, an Amsterdam music-publisher, who was in a very extensive way of business from 1696 to 1722. His work is of the highest class of music-printing and engraving,

and is from copper plates. It is said that he was one of the first to introduce the practice of punching the notes on the copper as a substitute for engraving. Walsh and Hare are stated to have taken this idea from him and to have used pewter, a cheaper and a more ductile metal. He translated the *Traité de la composition* of de Nivers into Flemish (1697).

Among other works Roger issued, circa 1720, a fine edition of Corelli's four sets of Sonatas, and also of the same composer's Concertos. Several collections of miscellaneous works are mentioned in the *Quellen-Lexikon*.

Roger either died or gave up business about 1725 (his last dated publication is 1722), leaving as his successor Michel Charles Le Cène, who reissued many of his predecessor's publications. F. K.

ROGER, GUSTAVE HIPPOLITE, eminent French singer, born Dec. 17, 1815, at La Chapelle-Saint-Denis, Paris. He was brought up by an uncle, and educated at the Lycée Charlemagne for the legal profession, but his studies were so neglected for an amateur theatre of which he was the leading tenor and self-constituted manager, that he was at length allowed to follow his real vocation. He entered the Conservatoire in 1836, and after studying for a year under Martin carried off the first prizes both for singing and opéra-comique. He obtained an immediate engagement, and made his début at the Opéra-Comique, Feb. 16, 1838, as Georges in 'L'Éclair.' To a charming voice and distinguished appearance he added great intelligence and stage tact, qualities which soon made him the favourite tenor of the Parisian world, and one of the best comedians of the day. Ambroise Thomas composed for him 'Le Perrier de la Régence' and 'Mina,' Halévy gave him capital parts in 'Les Mousquetaires de la Reine' and 'Le Guitarrero,' and Auber secured him for 'Le Domino Noir,' 'La Part du Diable,' 'La Sirène,' and 'Haydée.' Meyerbeer declared him to be the only French artist capable of creating the part of John of Leyden. In consequence, after ten years of uninterrupted success, Roger left the Opéra-Comique for the Académie, where on April 16, 1849, he created an immense sensation with Mme. Viardot, in 'Le Prophète.' His acting was quite as good in tragedy as it had been in comedy, but his voice could not stand the wear and tear of the fatiguing *répertoire* he had now to undertake. During the next ten years, however, he was invaluable at the Opéra, creating new parts in the 'Enfant prodigue,' the 'Juif errant,' and many more. His best creation after John of Leyden, and his last part at the Opéra, was Hélios in David's 'Herculanum' (March 4, 1859). In the following autumn he lost his right arm while shooting, by the bursting of a gun; he reappeared with a false one, but with all his skill and bravery he could not conceal his misfortune, and found

himself compelled to bid farewell to the Académie and to Paris.

He went once more to Germany, which he had been in the habit of visiting since 1850, and where he was invariably successful, partly owing to his unusual command of the language. After this he sang in the principal provincial theatres of France, and in 1861 reappeared at the Opéra-Comique in his best parts, especially that of Georges Brown in 'La Dame Blanche,' but it was evident that the time for his retirement had arrived. He then took pupils for singing, and in 1868 accepted a professorship at the Conservatoire, which he held till his death, Sept. 12, 1879.

Roger was of an amiable and benevolent disposition. He talked well, wrote with ease, and was the author of the French translation of Haydn's 'Seasons,' and of the words of several romances and German Lieder. His book, *Le Carnet d'un ténor* (Paris, Ollendorff, 1880), is a portion of his autobiography. It contains an account of his visits to England in 1847 (June), and 1848 (June–Nov.), when he sang at the Royal Italian Opera, and made an artistic tour in the provinces with Mlle. Jenny Lind, and other artists. G. C.

ROGERS, BENJAMIN, Mus.D., son of Peter Rogers, lay-clerk of St. George's Chapel, Windsor, was born at Windsor in 1614. He was a chorister of St. George's under Dr. Giles, and afterwards a lay-clerk there. He succeeded Jewett in 1639 as organist of Christ Church, Dublin, where he continued until the rebellion in 1641, when he returned to Windsor and obtained a lay-clerk's place there; but on the breaking up of the choir in 1644 he taught music in Windsor and its neighbourhood, and obtained some compensation for the loss of his appointment. In 1653 he composed some airs in four parts for violins and organ, which were presented to the Archduke Leopold, afterwards Emperor of Germany, and favourably received by him. In 1658 he was admitted Mus.B. at Cambridge. (See Carlyle's *Oliver Cromwell*, v. 243, 244 (People's edition).) In 1660 he composed a 'Hymnus Eucharisticus' in four parts, to words by Dr. Nathaniel Ingelo, which was performed at Guildhall when Charles II. dined there on July 5.¹ About the same time he became organist of Eton College. On Oct. 21, 1662, he was reappointed a lay-clerk at St. George's, Windsor, his stipend being augmented by half the customary amount; and he also received out of the organist's salary £1 per month as deputy organist. On July 22, 1664, he was appointed Informator Choristarum and organist of Magdalen College, Oxford. On July 8, 1669, he proceeded Mus.D. at Oxford. In Jan. 1685 he was removed from his place at Magdalen College on account of irregularities

(see West's *Cath. Org.*, p. 120), the College, however, assuring to him an annuity of £30 for life. He survived until June 1698, on the 21st of which month he was buried at St. Peter-le-Bailey. His widow, whom the College had pensioned with two-thirds of his annuity, survived him only seven months, and was laid by his side Jan. 5, 1699.—Rogers composed much church music; four services are printed in the collections of Boyce, Rimbault, and Sir F. Ouseley; another, an Evening Verse Service in G, is at Ely in MS. Some anthems were printed in 'Cantica Sacra,' 1674, and by Boyce and Page; and many others are in MS. in the books of various cathedrals and college chapels. Four glees are contained in Playford's 'Musical Companion,' 1673, and many instrumental compositions in 'Courtly Masquing Ayres,' 1662. [Some MS. organ compositions are in the library of the Royal College of Music, and Mr. J. S. Bumpus possesses a volume in the handwriting of Dr. Philip Hayes, containing the whole of Rogers's compositions for the church.] His 'Hymnus Eucharisticus' (the first stanza of which, commencing 'Te Deum Patrem colimus,' is daily sung in Magdalen College Hall by way of grace after dinner, and is printed in the Appendix to Hawkins's *History*) is sung annually on the top of Magdalen tower at five in the morning of May 1 in lieu of a requiem which, before the Reformation, was performed in the same place for the soul of Henry VII. His service in D and some of his anthems, which are pleasing and melodious in character, are still sung in cathedrals. W. H. H.

ROGERS, JOHN, a famous lutenist, born in London, was attached to the household of Charles II. in 1661–63. He lived near Aldersgate, and died there about 1663. W. H. H.

ROGERS, SIR JOHN LEMAN, Bart., born April 18, 1780, succeeded his father in the baronetcy in 1797. He became a member of the Madrigal Society in 1819, and in 1820 was elected its permanent President (being the first so appointed), and held the office until 1841, when he resigned on account of ill-health. He composed a cathedral service, chants, anthems, madrigals, glees, and other vocal music. [See Hullah's PART MUSIC, Class A, and VOCAL SCORES.] He was an ardent admirer of the compositions of Tallis, and by his exertions an annual service was held for several years in Westminster Abbey, the music being wholly that of Tallis. He died Dec. 10, 1847. W. H. H.

ROGERS, ROLAND, Mus.D., born at West Bromwich, Staffordshire, Nov. 17, 1847, where he was appointed organist of St. Peter's Church in 1858. He studied under Mr. S. Grosvenor, and in 1862 obtained by competition the post of organist at St. John's, Wolverhampton. In 1867 he similarly obtained the organistship of Tettenhall parish church, and in 1871 was appointed organist and choirmaster of Bangor Cathedral, a post which he resigned at the end

¹ The hymn was different from that, bearing the same title, which Rogers afterwards set for Magdalen College, Oxford.

of 1891. He took the Oxford degree of Mus. B. in 1870, and that of Mus. D. in 1875. Dr. Rogers's published works are 'Prayer and Praise,' a cantata, a prize cantata, 'The Garden' (Llandudno, 1896), Evening Services in B \flat and D, Anthems, Part-songs, Organ Solos, and Songs; a Symphony in A, a Psalm 'De Profundis,' and several Anthems and Services are still in MS. W. B. S.

ROGUES' MARCH, THE. Originally a military quickstep, which from some cause has become appropriate to use when offenders are drummed out of the army. When, from theft, or other crime, it is decided to expel a man from the regiment, the buttons bearing the regimental number, and other special decorations, are cut from his coat, and he is then marched, to the music of drums and fifes playing 'The Rogues' March,' to the barrack gates, and kicked or thrust out into the street. The ceremony still continues at the present day. The writer, though he has made diligent search, cannot find traces of the tune before the middle of the 18th century, although there can be but little doubt that the air, with its association, had been in use long before that time. About 1790, and later, a certain more vocal setting of the air was used for many popular humorous songs. 'Robinson Crusoe,' 'Abraham Newland,' and the better-known 'Tight little Island,' are among these. The latter song, as 'The Island,' was written by Thomas Dibdin about 1798, and sung by a singer named Davies at Sadler's Wells in that year.

The original 'Rogues' March' stands thus—

It is found in many 18th-century collections of fife and flute music; the above copy is from 'The Compleat Tutor for the Fife,' London, printed for and sold by Thompson & Son, 8vo, circa 1759-60. F. K.

ROHR FLUTE (Rohrflöte). See **FLUTE**-WORK, vol. ii. pp. 68-9.

ROI DE LAHORE, LE. Opera in five acts, libretto by Louis Gallet, music by Jules Massenet. Produced at the Grand Opéra, Paris, April 27, 1877, and at Covent Garden, Royal Italian Opera, June 28, 1879.

ROI DES VIOLONS—'King of the violins'—a title of great interest as illustrating the struggle between Art and Authority. On Sept.

14, 1321, the *ménéstriers* or fiddlers of France formed themselves into a regular corporation, with a code of laws in eleven sections, which was presented to the Prevôt of Paris, and by him registered at the Châtelet. The Confraternity, founded by thirty-seven *jongleurs* and *jongleresses*, whose names have been preserved, prospered so far as in 1330 to purchase a site and erect on it a hospital for poor musicians. The building was begun in 1331, finished in 1335, and dedicated to St. Julien and St. Genest. The superior of this 'Confrérie of St. Julien des ménestriers' was styled 'king,' and the following were 'Rois des ménestriers' in the 14th century:—Robert Caveron, 1338; Copin du Brequin, 1349; Jean Caumez, 1387; and Jehan Portevin, 1392.

In 1407 the musicians, vocal and instrumental, separated themselves from the mountebanks and tumblers who had been associated with them by the statutes of 1321. The new constitution received the sanction of Charles VI., April 24, 1407, and it was enacted that no musician might teach, or exercise his profession, without having passed an examination, and been declared *suffisant* by the 'Roi des ménestrels' or his deputies. These statutes continued in force down to the middle of the 17th century. History, however, tells but little about the new corporation. The only 'rois' whose names have been preserved in the charters are—Jehan Boissard, called Verdelet, 1420; Jehan Facien, the elder, and Claude de Bouchardon, oboes in the band of Henri III., 1575; Claude Nyon, 1590; Claude Nyon, called Lafont, 1600; François Rishomme, 1615; and Louis Constantin, 'roi' from 1624 to 1655. Constantin, who died in Paris 1657, was a distinguished artist, violinist to Louis XIII., and composer of pieces for strings in five and six parts, several of which are preserved in the valuable collection already named under **PHILIDOR**, vol. iii. p. 703.

In 1514 the title was changed to 'roi des ménestrels du royaume.' All provincial musicians were compelled to acknowledge the authority of the corporation in Paris, and in the 16th century branches were established in the principal towns of France under the title of 'Confrérie de St. Julien des ménestriers.' In Oct. 1658, Louis XIV. confirmed Constantin's successor, Guillaume Dumanoir I., in the post of 'Roi des violons, maitres à danser, et joueurs d'instruments tant haut que bas,' ordaining at the same time that the 'Roi des violons' should have the sole privilege of conferring the mastership of the art throughout the kingdom; that no one should be admitted thereto without serving an apprenticeship of four years, and paying sixty livres to the 'roi,' and ten livres to the masters of the Confrérie; the masters themselves paying an annual sum of thirty sous to the corporation, with a further commission to the 'roi' for each

pupil. The masters alone were privileged to play in taverns and other public places, and in case this rule were infringed, the 'roi' could send the offender to prison and destroy his instruments. This formidable monopoly extended even to the King's band, the famous 'twenty-four violons,' who were admitted to office by the 'roi' alone on payment of his fee. [See VINGT-QUATRE VIOLONS.]

So jealously did Guillaume Dumanoir I. guard his rights, that in 1662 he commenced an action against thirteen dancing-masters, who, with the view of throwing off the yoke of the corporation, had obtained from Louis XIV. permission to found an 'Académie de danse.' The struggle gave rise to various pamphlets,¹ and Dumanoir was beaten at all points. He bequeathed a difficult task to his son Michel Guillaume Dumanoir II., who succeeded him as 'roi' in 1668, and endeavoured to enforce his supremacy on the instrumentalists of the Académie de Musique, but, as might have been expected, was overmatched by Lully. After his difficulties with the director of the Opéra, Dumanoir II., like his father, came into collision with the dancing-masters. In 1691 a royal proclamation was issued by which the elective committee was abolished, and its place filled by hereditary officials, aided by four others appointed by purchase. Against this decree the corporation and the thirteen members of the Académie de danse protested, but the Treasury was in want of funds, and declined to refund the purchase money. Finding himself unequal to such assaults Dumanoir resigned in 1693, and died in Paris in 1697. He delegated his powers to the privileged committee of 1691, and thus threw on them the onus of supporting the claims of the Confrérie over the clavecinists and organists of the kingdom; a parliamentary decree of 1695, however, set free the composers and professors of music from all dependence on the corporation of the *ménétriers*. This struggle was several times renewed. When Pierre Guignon (born 1702, died 1775), a good violinist, and a member of the King's chamber-music, and of the Chapel Royal, attempted to reconstitute the Confrérie on a better footing, it became evident that the musicians as a body were determined to throw off the yoke of the association. Guignon was appointed 'Roi des violons' by letters patent, June 15, 1741, was installed in 1742, and in 1747 endeavoured to enforce certain new enactments, but a parliamentary decree of May 30, 1750, put an end to his pretended authority over clavecinists, organists, and other serious musicians. The corporation was maintained, but its head was

obliged to be content with the title of 'Roi et maître des ménestriers, joueurs d'instruments tant haut que bas, et hautbois, et communauté de maîtres à danser.' Roi Guignon still preserved the right of conferring on provincial musicians the title of 'lieutenants généraux et particuliers' to the 'roi des violons,' but even this was abrogated by a decree of the Conseil d'État, Feb. 13, 1773. The last 'roi des violons' at once resigned, and in the following month his office was abolished by an edict of the King dated from Versailles.

This hasty sketch of a difficult subject may be supplemented by consulting the following works: *Abrégé historique de la Ménestrandie* (Versailles, 1774, 12mo); *Statuts et règlements des maîtres de danse et joueurs d'instruments . . . enregistrés au Parlement le 22 Août 1659* (Paris, 1753); *Recueil d'édits, arrêts du Conseil du roi, lettres patentes, . . . en faveur des musiciens du Royaume* (Ballard, 1774, 8vo); and *Les Instruments à archet*, by A. Vidal (i. and ii. Paris, 1876, 1877, 4to), which last contains nearly all the necessary information. G. C.

ROI D'YS, LE. Opera in three acts, text by Édouard Blan, music by Édouard Lalo, produced at the Opéra-Comique, Paris, May 7, 1888, and at Covent Garden, July 17, 1901.

ROI L'A DIT, LE. Opéra-comique in three acts, text by Edm. Gondinet, music by Léo Delibes; produced at the Opéra-Comique, Paris, May 24, 1873, in English at Prince of Wales's Theatre, by the Royal College of Music, Dec. 13, 1894.

ROI MALGRÉ LUI, LE. Opéra-comique in three acts, text by Émile de Najac and Paul Burani, music by Emmanuel Chabrier; produced at the Opéra-Comique, Paris, May 18, 1887.

ROITZSCH, F. AUGUST, born Dec. 10, 1805, at Gruna, near Görlitz, won a high reputation as a careful editor of old music, and more especially of Bach's instrumental compositions, in the valuable cheap editions of the firm of Peters. He died at Leipzig, Feb. 4, 1889. M.

ROKITANSKY, HANS, FREIHERR VON, born March 8, 1835, at Vienna, eldest son of Carl Freiherr von Rokitansky (1804-78), an eminent medical professor. He studied singing chiefly at Bologna and Milan, and first appeared in England at concerts in 1856. In 1862 he made his début at Prague in 'La Juive,' and fulfilled a very successful engagement there of two years. In 1863 he sang the same part at Vienna, in 1864 obtained an engagement there, and was a member of the opera company for many years, retiring in 1892. His voice was a basso-profondo of great compass and volume, very equal in all its range; he had a commanding presence, and was an excellent actor. His operas include 'La Juive,' 'Robert le Diable,' 'Les Huguenots,' 'Don Juan,' 'Zauberflöte,' 'Guillaume Tell,' 'La Prophète,'

¹ Of these the principal are *Établissement de l'Académie royale de danse* [etc.] en la ville de Paris, avec un discours Académique pour prouver que la danse, dans sa plus noble partie, n'a pas besoin des instruments de musique, et qu'elle est en tout absolument indépendante du violon (Paris, 1668, 8to), and *Le mariage de la musique et de la danse, contenant la réponse* [etc.] au livre des trois prétendus académiciens touchants ces deux arts (Paris, 1664, 12mo).

'Aida,' 'Faust,' 'Vestale,' 'Medea,' and Wagner's operas. On June 17, 1865, he reappeared in London at Her Majesty's as Marcel with very great success, and then sang there and at Drury Lane for four consecutive seasons, and was greatly esteemed. He played with success as Rocco, Sarastro, Leporello, Il Commendatore, Oroveso, Falstaff, Osmin (June 30, 1866, on production in Italian of Mozart's 'Entführung'), and Padre Guardiano in 'La Forza del Destino,' June 22, 1867. He returned for the seasons of 1876 and 1877 in some of his old parts, and played for the first time the King in 'Lohengrin,' and Giorgio in 'I Puritani.' He retired from public life at the end of 1894, and is now a professor in the Vienna Conservatorium.

A. C.

ROKITANSKY, VICTOR. A younger brother of the above, and a fashionable singing-master at Vienna. Born July 9, 1836. From 1871 to 1880 he filled the post of Professor of Singing at the Conservatorium of Vienna; he published *Ueber Sängen und Singen* in 1894, and died in Vienna, July 17, 1896.

A. C.

ROLFE & CO., pianoforte makers. William Rolfe was at 112 Cheapside in 1796 as a music-seller and publisher of minor musical works, also as maker of musical instruments. Before this date he was partner in a small music-publishing firm, Culliford, Rolfe, & Barrow, at the same address, about 1790. With Samuel Davis, Rolfe took out a patent for improvements in pianofortes on Jan. 31, 1797, and his pianofortes had some degree of reputation. His business continued until 1806, when the firm was William Rolfe & Sons, and in 1813 they had additional premises at 28 London Wall. Rolfe & Sons (or Co.) remained in Cheapside for many years. In 1850 the number had been changed to 61, and the London Wall premises to 31 and 32. They removed to 12 Great Marlborough Street (1869), and then (1878) to 11 Orchard Street. During the eighties their place of business was at 6 Lower Seymour Street, but after 1890 the writer can find no traces of them.

F. K.

ROLL, in drumming, is a tremolo-effect on the side-drum, produced by a certain varied method of playing according to the kind of roll desired. The first practice of this is called 'daddy mammy,' which, commencing deliberately, with a long stroke for each syllable, gradually increases in speed until the beats are merged into one continuous roll. The 'long roll' is an alternate beat of two with the left stick, followed by two with the right. The 'five stroke roll' is two with the left, two with the right, one with the left, two with the right, two with the left, and one with the right; or more briefly—LLRR.L; RLL.L.R. The 'seven stroke roll' is—LLRRL.L.R. The 'nine stroke roll' is—LLRRLRLR.L followed by a short rest, and RLLRLRL.L.L. Rolls

on the timpani are made by the simple alternation of strokes with the two sticks. See **DRUM.**

F. K.

ROLL-CALL. See **MILITARY SOUNDS AND SIGNALS.**

ROLLA, ALESSANDRO, violinist and composer, born at Pavia, April 22, 1757. He first studied the pianoforte, but soon exchanged it for the violin, which he learned under Renzi and Conti. He had also a great predilection for the viola, and wrote and performed in public concertos for that instrument. In 1782-1802 he was leader of the band at Parma, and it was there that Paganini was for some months his pupil. [See **PAGANINI.**] In 1802 he went to Milan as leader and conductor of the opera at La Scala, in which position he gained a great reputation. He became in 1805 a professor at the Conservatorio of Milan, and died in that town, Sept. 15, 1841, aged eighty-four. His compositions, now entirely forgotten, had considerable success in their time; they consist of a large number of violin duets, some serenades, trios, quartets, and quintets for stringed instruments, and concertos for the violin and for the viola, as well as songs. (See the *Quellen-Lexikon*.) His son and pupil, Antonio, violinist, was born at Parma, April 18, 1798; from 1823 till 1835 was leader of the Italian Opera band at Dresden, and died there, May 19, 1837. He published concertos and other solo pieces for the violin. P. D.

ROLLE. A German musical family. The father, **CHRISTIAN FRIEDRICH**, was town musician of Quedlinburg and of Magdeburg in 1721, and died there in 1751. Of his three sons, **CHRISTIAN CARL**, born at Quedlinburg in 1714, was Cantor of the Jerusalem Church, Berlin, about 1760, but was apparently of no account. He had sons, of whom **FRIEDRICH HEINRICH** left a biography of his father; while **CHRISTIAN CARL** (the younger) succeeded him as Cantor. 2. A second son is mentioned, but without name. 3. The third, **JOHANN HEINRICH**, was born at Quedlinburg, Dec. 23, 1718, and at an early age began to play and to write. He held the post of organist at St. Peter's, Magdeburg, in 1732 when only fourteen years old (*Quellen-Lexikon*). He was at the Leipzig University in 1736, and migrated to Berlin in hopes of some legal post; but this failing he adopted music as his career, and about 1740 entered the Court chapel of Frederick the Great as a chamber musician (viola player). There he remained till 1746, and then took the organist's place at the Johanniskirche, Magdeburg, as town musician, worked there with uncommon zeal and efficiency, and died at the age of sixty-seven, Dec. 29, 1785. His industry seems almost to have rivalled that of Bach himself. He left several complete annual series of church music for all the Sundays and Festivals; cantatas for Easter, Whitsuntide, and Christmas,

of which many are in the Royal Library at Berlin; five Passions, and at least sixty other large church compositions. Besides these there exist twenty-one large works of his, of a nature between oratorio and drama, such as 'Saul, or the power of Music,' 'Samson,' 'David and Jonathan,' 'The Labours of Hercules,' 'Orestes and Pylades,' 'Abraham on Moriah,' 'The Death of Abel,' etc. The last two were for many years performed annually at Berlin, and were so popular that the editions had to be renewed repeatedly. In addition to these he left many songs and compositions for organ, orchestra, and separate instruments. (See the *Quellen-Lexikon* for list.) All have now as good as perished; but those who wish to know what kind of music they were, will find a specimen in Hullah's 'Vocal scores,' 'The Lord is King.' It has a good deal of vigour, but no originality or character. Others are given in the collections of Sander and Rochlitz, and a set of twenty motets for four voices was published at Magdeburg by Rebling (1851-66.) G.

ROLLI, PAOLO ANTONIO, an Italian poet, a Florentine, who was employed by the managers of the Italian opera to supply the libretti for several of the operas put before the English public in the early years of the 18th century. It is said that he was originally a pastry-cook, but coming to England about 1718, his productions pleased the public, and he became much noticed. In 1727 he issued a small book of canzonets and cantatas, with the music, dedicated to the Countess of Pembroke. At a later date he set up as teacher of the Italian language, and left England for Italy in 1744. Two stanzas of his poem, 'Se tu m'ami,' were set by Pergolesi, and three by J. J. Rousseau; and his whole book of canzonets and cantatas was adapted to new music by William De Fesch about 1745-46, and published with a fresh dedication to Lady Frances Erskine. F. K.

ROMANCE (Germ. *Romanze*). A term of very vague signification, answering in music to the same term in poetry, where the characteristics are rather those of personal sentiment and expression than of precise form. The Romanze in Mozart's D minor PF. Concerto differs (if it differs) from the slow movements of his other Concertos in the extremely tender and delicate character of its expression; in its form there is nothing at all unusual: and the same may be said of Beethoven's two Romances for the violin and orchestra in G and F (opp. 40 and 50), and of Schumann's 'Drei Romanzen' (op. 28). Schumann has also affixed the title to three movements for oboe and PF. (op. 94), and to a well-known piece in D minor (op. 32, No. 3), just as he has used the similar title, 'in Legendenton.' The Romance which forms the second movement of his symphony in D minor, is a little poem full of sentimental expression.

In vocal music the term is obviously derived

from the character or title of the words. In English poetry we have few 'romances,' though such of Moore's melodies as 'She is far from the land where her young hero sleeps' might well bear the title. But in France they abound, and some composers (such as Puget and Panseron) have derived nine-tenths of their reputation from them. 'Partant pour la Syrie' may be named as a good example, well known on this side the water. Mendelssohn's 'Songs without Words' are called in France 'Romances sans Paroles.' G.

ROMANI, FELICE, a famous Italian littérateur, born at Genoa, Jan. 31, 1788. He was educated for the law, but soon forsook it for more congenial pursuits, and was in early life appointed to the post of poet to the royal theatres, with a salary of 6000 lire. The fall of the French government in Italy drove him to his own resources. He began with a comedy, 'L' Amante e l' Impostore,' which was very successful, and the forerunner of many dramatic pieces. But his claim to notice in a dictionary of music rests on his opera-librettos, in which he was for long the favourite of the Italian composers. For Simone Mayr he wrote 'Medea' (1812), 'La Rosa bianca e la Rosa rossa,' and others; for Rossini, 'Anreliano in Palmira,' and 'Il Turco in Italia'; for Bellini, 'Bianca e Faliero,' 'La Straniera,' 'La Sonnambula,' 'Il Pirata,' 'Norma,' 'I Capuletti,' and 'Beatrice di Tenda'; for Donizetti, 'Lucrezia,' 'Anna Bolena,' 'L' Elisir d' amore,' and 'Parisina'; for Mercadante, 'Il Conte d' Essex'; for Ricci, 'Un Avventura di Scaramuccia'; and many others, in all fully a hundred. As editor for many years of the *Gazzetta Piemontese*, he was a voluminous writer.

In the latter part of his life he became blind, and was pensioned by government, and spent his last years in his family circle at Moneglia, on the Riviera, where he died full of years and honours, Jan. 28, 1865. G.

ROMANO, one of the names (derived from his birthplace) of a certain ALESSANDRO, who was also known under the name of ALESSANDRO DELLA VIOLA from his favourite instrument—a composer and performer on the viola, was born at Rome about the year 1530. His published works include a set of madrigals, Venice, 1554 (Royal College of Music, etc.); five-part madrigals, *Ib.* 1565; two books of Canzoni Napolitane for five voices (Venice, 1572 and 1575); a set of motets in five parts (Venice, 1579). A five-part madrigal by him, 'Non pur d' almi splendori,' is published in the 'Libro terzo delle Muse' (Venice, Gardano, 1561). [See the *Quellen-Lexikon*, s.v. Alessandro.] P. D.

ROMANTIC is a term which, with its antithesis CLASSICAL, has been borrowed by music from literature. But so delicate and incorporeal are the qualities of composition which both words describe in their application to music, and

so arbitrary has been their use by different writers, that neither word is susceptible of very precise definition. The best guide, however, to the meaning of 'romantic' is supplied by its etymology. The poetic tales of the Middle Ages, written in the old Romance dialects, were called Romances. In them mythological fables and Christian legends, stories of fairyland, and adventures of Crusaders and other heroes of chivalry, were indiscriminately blended, and the fantastic figures thus brought together moved in a dim atmosphere of mystic gloom and religious ecstasy. These mediæval productions had long been neglected and forgotten even by scholars, when, about the close of the 18th century, they were again brought into notice by a group of poets, of whom the most notable were the brothers August Wilhelm and Friedrich von Schlegel, Ludwig Tieck, and Friedrich Novalis. They set themselves to rescue the old romances from oblivion, and to revive the spirit of mediæval poetry in modern literature by the example of their own works. Hence they came to be called the Romantic School, and were thus distinguished from writers whose fidelity to rules and models of classic antiquity gave them a claim to the title of Classical.

It was not long before the term Romantic was introduced into musical literature; and it was understood to characterise both the subjects of certain musical works and the spirit in which they were treated. Its antithetical significance to the term Classical still clung to it; and regard to perfection of form being often subordinated by so-called romantic composers to the object of giving free play to the imaginative and emotional parts of our nature, there grew up around the epithet Romantic the notion of a tendency to depart more or less from the severity of purely classical compositions. But, in truth, no clear line divides the romantic from the classical. As we shall endeavour to show, the greatest names of the Classical school display the quality of romanticism in the spirit or expression of some of their works,¹ while, on the other hand, the compositions of the Romantic school are frequently marked by scrupulous adherence to the forms of traditional excellence. Again, as the associations of the word Classical convey the highest meed of praise, works at first pronounced to be romantic establish, by general recognition of their merit, a claim to be considered classical. What is 'romantic' to-day may thus grow, although itself unchanged, to be 'classical' to-morrow. The reader will thus understand why, in Reichardt's opinion, Bach, Handel, and Gluck were classical, but Haydn and Mozart romantic; why later critics, in

presence of the fuller romanticism of Beethoven, placed Haydn and Mozart among the classical composers; and why Beethoven himself, in his turn, was declared to be classical.

The propriety of applying the term *Romantic* to *operas* whose subjects are taken from *romantic literature*, or to songs where music is set to *romantic words*, will not be questioned. And from such works it is easy to select passages which present romantic pictures to the mind, as, for instance, the Trumpet passage on the long B₂ in the bass in the great Leonore overture, the three horn notes in the overture to 'Oberon,' or the three drum notes in the overture to 'Der Freischütz.' But in pure *instrumental music* the marks of romanticism are so fine, and the recognition of them depends so much on sympathy and mental predisposition, that the question whether this or that work is romantic may be a subject of interminable dispute among critics. Sometimes the only mark of romanticism would seem to be a subtle effect of instrumentation, or a sudden change of key, as in the following passage from the Leonore Overture:—

Another example from Beethoven is supplied by the opening bars of the P.F. Concerto in G major, where after the solo has ended on the dominant the orchestra enters *pp* with the chord of B major. The whole of the slow movement of this Concerto is thoroughly romantic, but perhaps that quality is most powerfully felt in the following passage:—

Yet so subtle is the spell of its presence here that it would be difficult to define where its intense romanticism lies, unless it be in the abrupt change both in key (A minor to F major), and in the character of the phrase, almost forcing a scene, or recollection, or image, upon the hearer.² Indeed, romantic music possesses in the highest degree the power of evoking in the mind some vivid thought or conception—as for instance, in a passage from the Adagio of the Ninth Symphony, where a sudden transition into D₂ seems to say, 'Vanitas vanitatum, omnia vanitas'; and again in the 'Eroica,' where at the end of the Trio, the long holding notes and peculiar harmony in the horns seem to suggest the idea of Eternity:—

¹ Premonitions of musical romanticism existed in fact long before the word came into use. To our modern ears, now conscious of this special quality, traces are clearly discernible. As examples we may take J. S. Bach's preludes Nos. 14 and 18 in the second book of the 'Wohltemperiertes Clavier,' or the Arioso 'Am Abend da es kühle war' from the Matthew Passion. Also many passages from Gluck's and Mozart's operas.

² Fater's definition may well be applied to this example: 'The essence of romanticism is the blending of strangeness with the beautiful.'

That there are times when music has a fuller and wider range of meaning than language, and defies expression in words, might be illustrated by many passages in Beethoven's B flat trio or the last five sonatas. But with regard to the choice of examples we must remind the reader that, where the standpoint of criticism is almost wholly subjective, great diversities of judgment are inevitable.

It was not until after the appearance of the works of Carl Maria von Weber, who lived in close relation with the romantic school of literature, and who drew his inspirations from their writings, that critics began to speak of a 'romantic school of music.' Beethoven had by this time been accepted as classical, but in addition to Weber himself, Schubert and afterwards Mendelssohn, Schumann, and Chopin were all held to be representatives of the romantic school. Widely as the composers of this new school differed in other respects, they were alike in their susceptibility to the tone of thought and feeling which so deeply coloured the romantic literature of their time. None of them were strangers to that weariness of the actual world around them, and those yearnings to escape from it, which pursued so many of the finest minds of the generations to which they belonged. To men thus predisposed, it was a relief and delight to live in an ideal world as remote as possible from the real one. Some took refuge in mediæval legends, where no border divided the natural from the supernatural, and where nothing could be incongruous or improbable; some in the charms and solitudes of nature; and others in the contemplation of peace and beatitude beyond the grave. But in all there was the same impatience of the material and mundane conditions of their existence, the same longing to dwell in the midst of scenes and images which mortals could but dimly see through the glass of religious or poetic imagination. As might have been expected of works produced under such influences, indistinctness of outline was a common attribute of compositions of the romantic school. The hard, clear lines of reality were seldom met with in them, and the cold analysis of pure reason was perpetually eluded. It was equally natural that the creations of minds withdrawn from contact with the actual world and wrapt in their own fancies, should vividly reflect the moods and phases of feeling out of which they sprang—that they should be, in short, intensely subjective. Nor was it surprising that when impatience of reality, indistinctness of outline, and excessive

subjectivity co-existed, the pleasures of imagination sometimes took a morbid hue. Such conditions of origin as we have been describing could not fail to affect the forms of composition. It was not that the romanticists deliberately rejected or even undervalued classic models, but that, borne onward by the impulse to give free expression to their own individuality, they did not suffer themselves to be bound by forms, however excellent, which they felt to be inadequate for their purpose. Had the leaders of the romantic school been men of less genius, this tendency might have degenerated into disregard of form; but happily in them liberty did not beget license, and the art of music was enriched by the addition of new forms. 'The extremes,' says Goethe, speaking of the romantic school of literature, 'will disappear, and at length the great advantage will remain that a wider and more varied subject-matter, together with a freer form, will be attained.' Goethe's anticipations were equally applicable to music.

Among masters of the romantic school, Weber stands second to none. In youth he surrendered himself to the fascination of literary romanticism, and this early bias of his mind was confirmed in later years by constant intercourse at Dresden with Holtei, Tieck, E. T. A. Hoffmann, and other men of the same cast of thought. The subjects of Weber's operas were selected exclusively from romantic literature, and the 'Romantic Opera,' of which Germany has so much reason to be proud, owed to him its origin and highest development, although the names of Spohr,¹ Marschner, Lindpaintner, Kreutzer, Lortzing, and others are justly associated with it. The romantic effects which Weber could produce in his instrumentation are indisputable, and never, even in the least of his pianoforte works, did he cease to be romantic.

Though Weber holds the first place in the opera of the romantic school, he was surpassed in other branches of composition by his contemporary, Franz Schubert. Pure and classic as is the form of Schubert's symphonies and sonatas, the very essence of romanticism is disclosed in them. His unrivalled wealth of melody was the gift of romanticism. It gave him also a certain indefiniteness and, as it were, indivisibility of ideas, which some critics have judged to be a failing, but which were in fact the secret of this strength, because they enabled him to repeat and develop, to change and then again resume his beautiful themes and figures in long and rich progression, without pause and without satiety. None have known, as he knew, how to elicit almost human sounds from a single instrument—as for instance, in the well-known passage for the horn in the second movement of the C major Symphony, of which, Schumann said that 'it seems to have come

¹ These points, and Spohr's claim to priority of invention of the Romantic opera, are discussed in OPERA, vol. iii. p. 456, etc.

to us from another world.' Many glorious passages might be pointed out in this Symphony, the romanticism of which it would be difficult to surpass; for instance, the second subject in the first movement, the beginning of the working out in the Finale, etc. etc. In Song Schubert stands alone. Even from boyhood he had steeped his soul in romantic poetry; and so expressive is the music of his songs that they require no words to reveal their deeply romantic character. Few were the thoughts or feelings which Schubert's genius was unable to express in music. 'He was' (to quote Schumann again) 'the deadly enemy of all Philistinism, and after Beethoven the greatest master who made music his vocation in the noblest sense of the word.'

Schumann's own enmity to Philistinism was not less deadly than that of Schubert, and romanticism was its root in both men. So strongly did Schumann resent the popularity of Herz, Hüntten, and other Philistines, whose works were in vogue about the year 1830, that he founded the *Davidbund* to expose the hollowness of their pretensions. And equally dissatisfied with the shallow and contracted views of the musical critics of that day, he started his *Neue Zeitschrift für Musik* to vindicate the claims of music to freedom from every limitation, except the laws of reason and of beauty. Even in childhood Schumann was an eager reader of romantic literature, and the writings of Hoffmann and Jean Paul never lost their charm for him. He told a correspondent that if she would rightly understand his 'Papillons,' op. 2, she must read the last chapter of Jean Paul's *Flegeljähre*; and from Hoffmann he borrowed the title of 'Kreisleriana.' It was not, however, the imaginary sufferings of Dr. Kreisler, but the real deep melancholy of Schumann's own soul, which expressed itself in these noble fantasias. Though perfect in form, they are thoroughly romantic in thought and spirit. Not less romantic were the names he gave to his pianoforte pieces. These names, he said, were scarcely necessary—'for is not music self-sufficing? does it not speak for itself?'—but he admitted that they were faithful indexes to the character of the pieces. The clearest tokens of the same source of inspiration may be found in his *Fantasie*, op. 17, which bears as its motto a verse from Schlegel. In the last part a deeply moving effect is produced by the abrupt change of key in the arpeggios from the chords of C to A and then to F. But changes of key were not his only resource for the production of romantic effects. Excepting Beethoven, none have illustrated the power of rhythm so well as Schumann. He often imparts a strange and entirely novel significance to commonplace or familiar phrases by syncopated notes, by putting the emphasis on the weak part of the bar, or by accents so marked as to give the impression of a simultaneous combination of triple and common time. These strong and eccentric

rhythms appear in all his works; and the frequent directions *Marcato assai* or *Molto marcato* show what stress he laid upon emphasis. The influence of Jean Paul may be traced also in Schumann's sometimes grave and sometimes playful humour. Many of his pianoforte pieces are marked *mit Humor* or *mit vielem Humor*. And in this respect he is inferior only to Beethoven, of whose 'romantic humour' he so often speaks in his *Gesammelte Schriften*. The romantic bias of Schumann's mind was not less evident in his treatment of Oriental subjects. The colouring of his 'Paradise and the Peri,' and of his 'Bilder aus Osten,' is vividly local. And of his songs we may cite the 'Waldesgespräch' (op. 39, No. 3) as an example of the purest essence of romance. Full as the poem is in itself of romantic feeling and expression, the music interprets the words, rather than the words the music.

The romantic spirit found a less congenial abode in the happy, equable disposition, and carefully disciplined imagination of Mendelssohn; but his genius was too sensitive and delicate to remain unaffected by the main currents of his age.¹ Take, for example, the first four chords in the overture to 'A Midsummer Night's Dream.' And could it indeed be possible to illustrate Shakespeare's romantic play in music with fuller success than Mendelssohn has done? The overtures 'The Hebrides,' 'Melusine,' and 'Calm Sea and Prosperous Voyage,' are likewise full of the brightest qualities of romanticism.

Not unlike Mendelssohn was William Sterndale Bennett; and the points of resemblance between them were strict regard to form, clearness of poetic thought, and cultivated refinement of taste. Romantic, too, Bennett certainly was; as may at once be seen in his overtures, 'The Naiads' and 'The Wood Nymphs.' So tranquil, clear and perfect in detail are most of Bennett's compositions, so delicate was the touch which fashioned them, that they have been likened to the landscapes of Claude Lorraine. Yet there were rare moments when Bennett's habitual reserve relaxed, and to the inspiration of such moments we may ascribe the romantic passages which occur in his beautiful 'Paradise and the Peri' and 'Parisina' overtures.

Notice of the modern German composers on whom the stamp of Schumann is so unmistakable, would lead us too far, but the names of Robert Franz and Adolf Jensen cannot be omitted. Some of the tenderest and most delicate attributes of romanticism are to be found in their songs, as for instance in the 'Dolorosa' cycle of the latter composer. Peter Cornelius's spirit moves in a different atmosphere; a poet himself, he casts a peculiar and magic

¹ In describing to Reichardt's daughter the success of her father's 'Morgengegengang' at the Rhine Festival, Mendelssohn adds, 'At the words *Und schlich in dieser Nacht* the music becomes so romantic and poetical that every time I hear it, I am more touched and charmed.'

spell of romance over his music. Wagner we pass by, because he cannot be counted among the followers of the romantic school, and, within the limits of this article, it would be impossible to show the points wherein he differs from all former romanticists. We may, however, designate one of the greatest of modern composers as one of the greatest romanticists; and it is no disparagement to the individuality of Johannes Brahms to say that he is in many respects the disciple of Schubert and Schumann. The romanticism of such productions as the beautiful romances from Tieck's 'Magelone' (op. 33) or the cantata 'Rinaldo' (op. 50) is of course visible at a glance, and there are many other songs in which the presence of romantic sensibility is felt throughout. For instance in one of his most exquisite songs 'Immer leiser wird mein Schlummer,' the phrase 'Eh' die Drossel singt im Wald' reaches a point of romantic emotion difficult to describe. In Brahms's greater works the romanticism seems sometimes veiled, but there are passages in his chamber-music and symphonies where this quality in its deepest sense resides. As examples, the romanticism of which could hardly be surpassed, we may cite the slow movement of the A major pianoforte quartet and the opening of the last movement of the C minor symphony; or the last part of the first movement of the D major symphony (seventy-three bars before the end, where the horns enter and the strings are kept in the low register); or the andante of the third symphony in F, where the different instruments softly call to each other, as if from another world after the passionate working-up twenty-seven bars before the close.

Chopin holds a solitary position in romantic art. No school can claim him wholly for its own, and the best poetic gifts of the French, German, and Slavonic nationalities were united in him. 'Chopin,' says Liszt, 'refused to be bound by deference to rules which fettered the play of his imagination, simply because they had been accepted as classical.' But the classic training and solid studies of his youth, combined with his exquisite taste and innate refinement, preserved him from abuse of the liberty which he was determined to enjoy. The mental atmosphere of his life in Paris may be felt in his works. In hatred of whatever was commonplace and ordinary, he was one with the French romantic school; but unlike them he would not allow originality alone to stand in his compositions. Beauty there must always be to satisfy him; and he would have recoiled from the crudities and extravagances which disfigure some works of the French romantic period. So uniformly romantic was Chopin in every stage of his career, that it would be impossible to illustrate this quality of his music by extracts. Among the Slavonic and Scandinavian races the romantic element is especially marked; a study of the

poetic creations of Tchaikovsky and Grieg will illustrate this.

The French romantic school of literature was of later date than the German, and was considerably affected by it. The general features of the two schools were very similar, but the French authors wrote even more than the German in the mediæval and mystic vein, and were more prone to unhealthy exaggeration. In France, moreover, the antagonism between the romantic and classical schools was carried to a pitch that had no parallel in Germany. The completeness and universality of the empire which classic example and tradition had gained over the educated public of France intensified the revolt against them, when at last it arrived. The revolt was as widespread as it was uncompromising: there was not a field of art or literature in which the rebel flag of the new school was not unfurled, and a revolutionary temper, inflamed perhaps by the political storms of that time, was manifest in all that they did. In the false simplicity and sickly sentimentality, in the stilted diction and threadbare forms of expression affected by the reigning school, the insurgent authors had indeed much to provoke them. But in the vehemence of their reaction against such faults they were apt to fall into an opposite extreme; and thus, finish of form, clearness of outline, and coherent sequence of thought are too often absent from their works.

With respect to music, Berlioz is the typical name of the renaissance of 1830; but Liszt, on whom the French school exercised so strong an influence, may be associated with him. So far were these composers and their countless followers borne by the revolutionary impulse, that they did not shrink at times from a total rejection of the old traditional forms in their instrumental music; but it cannot be said that very valuable results were obtained by their hardihood. They chose indeed romantic subjects for musical representation, as Weber and Schumann had done, but there the resemblance ceased. They aimed not, as the earlier masters did, to reproduce the feelings stirred in them by external objects, but rather to present the objects themselves to the minds of an audience.

To this kind of music, the term programme-music has been applied, and we may here perhaps fitly show wherein it differs from romantic music, with which there is a tendency in the present day to confound it. In reality a distinct line divides the two. Romantic music implies an emotional and imaginative atmosphere, combined with an idealistic, as distinct from an imitative presentment of whatever theme may be associated with the music. Programme-music avowedly endeavours to depict and imitate the actual scenes and sounds so literally that no doubt is left in the mind of the hearer as to what the composer desired to represent or reproduce. Neither emotional nor imaginative

qualities are essential to it. Romantic music does not necessarily desire to call up a given picture, but to induce a mental attitude. Unconsciously the romantic composer may have written passages which evoke as clearly, but not in so limited a degree, some mental image in the mind of the hearer. The composer has stimulated the imagination of his hearer, and left it free to conjure up what it wills. Herein lies the difference between the two schools. Individualism or subjectivity, the characteristic mark of the romantic movement in philosophy and literature, asserts itself as distinctively in music. Programme or pictorial music stands on a lower plane. It is purely imitative work on the composer's part; it gives no scope for, and makes no demands upon the imagination of the hearer. An undoubted loss of romantic effect was the consequence of this method. It produced in the younger French romanticists an excessive realism, which too readily sacrificed artistic beauty to originality and vivid representation. Nor can we deny the frequent obscurity and incoherence of their compositions, though we are unable to acquiesce in the imputation so often fastened upon them that their romanticism was merely the veil of ignorance, and that they violated rules because they knew no better. As a matter of fact, even those among them who pushed extravagances to the farthest point were thorough masters of the strictest rules and severest forms of musical composition.

To sum up, in conclusion, our obligations to the masters of the romantic school, we must acknowledge that they saved music from the danger with which it was at one time threatened, of being treated as an exact but dry and cold science; that they gave it a freer and more elastic form; that they developed the capabilities and technique of various instruments; that being themselves always filled with a deep reverence for their art they have added, by their own genius and labour, many a noble masterpiece to the treasures of music.¹ A. H. W.

ROMBERG. One of those musical families of whom, from the Bachs downwards, so many are encountered in Germany. The founders were ANTON and HEINRICH, a pair of inseparable brothers, who dressed alike, and lived together in Bonn. They were still alive in 1792. Another ANTON, a bassoon-player, born in Westphalia, March 6, 1742, lived at Dinklage (Duchy of Oldenburg), gave concerts

at Hamburg, and died in Dec. 14, 1814, living long enough to play a concerto for two bassoons with his youngest son ANTON, born 1777. His eldest son, BERNHARD, born Nov. 12, 1767, at Dinklage, is justly regarded as head of the school of German violoncellists. When only fourteen he attracted considerable attention in Paris during a visit there with his father; from 1790 to 1793 he was in the band of the Elector of Cologne at Bonn, at the same time with Ferdinand Ries, Reicha, and the two Beethovens. During the French invasion he occupied himself in a professional tour in Italy, Spain, and Portugal, and was well received, especially in Madrid, where Ferdinand VII. accompanied him on the violin. His cousin Andreas went with him, and on their return through Vienna late in 1796, they gave a concert at which Beethoven played (Thayer, ii. 16). After his return Bernhard married Catherine Rameck at Hamburg. From 1801 to 1803 he was a professor in the Paris Conservatoire, and we next find him in the King's band at Berlin. Spohr (*Autob.* i. 78) met him there at the end of 1804, and played quartets with him. Perhaps the most remarkable fact he mentions is that after one of Beethoven's early quartets (op. 18) Romberg asked how Spohr could play 'such absurd stuff' (*barockes Zeug*). It is of a piece with the well-known anecdote of his tearing the copy of the first Rasounowsky quartet from the stand and trampling on it.

The approach of the French forces in 1806 again drove Romberg on the world, and in 1807 he was travelling in South Russia, but returned to Berlin, and was Court-Capellmeister, 1815-19, when he retired into private life at Hamburg. [In 1814 he visited England, giving a concert under the patronage of Prince Blucher and the Hetman of the Cossacks, at Willis's Rooms, June 27. A. F. H.] In 1822 he went to Vienna, in 1825 to St. Petersburg and Moscow, to Frankfort in 1836, and in 1839 to London² and Paris, where his *Method for the Violoncello* (Berlin, Trautwein, 1840) was adopted by the Conservatoire. He died at Hamburg, August 13, 1841.

The great importance of B. Romberg both as composer and executant arises from the fact that he materially extended the capabilities of the violoncello. His celebrated concertos may be said to contain implicitly a complete theory of violoncello playing, and there are few passages known to modern players the type of which may not be found there. Probably no better knowledge of the finger-board could be gained than by studying these concertos. Although they are now seldom played in public, being somewhat too old-fashioned

Dannreuther; *The Quarterly Review* for October 1906, pp. 357-74; and Daniel Gregory Mason's *From Grieg to Brahms*, and *The Romantic Composers*.

² He does not seem to have played on this occasion; but a slight trace of his presence is perhaps discoverable in an overture of his nephew's, which closes the Philharmonic programme of June 17, 1839.

to hit the taste of modern artists and audiences, they are yet of considerable merit as compositions, and contain passages of distinct grace and charm. It may be gathered from the character of his compositions, that his tone was not so full and powerful as that of artists who confine themselves more to the lower register of the instrument, and to passages of less complication. As an indication that this view agrees with that which prevailed during his lifetime, we find him for instance spoken of as follows by a correspondent of the *Allgemeine Musikalische Zeitung* for 1817, who had heard him play at Amsterdam:—'The visit of B. Romberg had long been eagerly looked for. The immense reputation which preceded him caused his first concert to be crowded to excess. He played a concerto ('die Reise auf den Bernhardsberg') and a capriccio on Swedish national airs. In regard to the perfection and taste of his performance, to the complete ease and lightness of his playing, our great expectations were far exceeded—but not so in respect of tone—this, especially in difficult passages, we found much weaker than the powerful tone of our own Rauppe, and indeed scarcely to compare with it.' At a second concert Romberg played his well-known Military Concerto, and the same view was reiterated.

Bernhard Romberg composed violoncello solos of various kinds; string quartets; PF. quartets; a funeral symphony for Queen Louise of Prussia; a concerto for two violoncellos (Breitkopf & Härtel), his last work; and operas—'Die wiedergefundene Statue,' words by Gozzi von Schwick (1790), and 'Der Schiffbruch' (1791, Bonn), 'Don Mendocce,' with his cousin Andreas (Paris), 'Alma,' 'Ulysses und Circe' (July 27, 1807), and 'Rittertreue,' three acts (Jan. 31, 1817, Berlin). His son KARL, also a violoncellist, born at St. Petersburg, Jan. 17, 1811, played in the court band there from 1832 to 1842, and afterwards lived at Vienna.

Anton Romberg, the father of Bernhard, had a brother GERHARD HEINRICH, born August 8, 1745, a clarinet-player, and Musikdirector at Münster, who lived with him for some time at Bonn, and had several children, of whom the most celebrated was ANDREAS JAKOB, a violinist, born April 27, 1767, at Vechta, near Münster. When only seven he played in public with his cousin Bernhard, with whom he remained throughout life on terms of the closest friendship. At seventeen he excited great enthusiasm in Paris, and was engaged for the Concerts Spirituels (1784). In 1790 he joined his cousin at Bonn, played the violin in the Elector's band, and accompanied him to Italy in 1793. In Rome they gave a concert at the Capitol (Feb. 17, 1796) under the patronage of Cardinal Rezzonico. Andreas then made some stay in Vienna, where Haydn showed great interest in his first quartet. In 1797 he

went to Hamburg, and in 1798 made a tour alone. In 1800 he followed Bernhard to Paris, and composed with him 'Don Mendocce, ou le Tuteur portugais.' The opera failed, and the success of their concerts was but partial, so Andreas left for Hamburg, where he married, and remained for fifteen years. He next became Court-Capellmeister at Gotha, where he died, in very great destitution, Nov. 10, 1821. Concerts were given in various towns for the benefit of his widow and children. The university of Kiel gave him a degree of Doctor of Music. He composed six symphonies, quartets, quintets, and church music; a Te Deum, Psalms, a Dixit, Magnificat, and Hallelujah, in four, five, eight, and sixteen parts; several operas—'Das graue Ungeheuer' (1790, Bonn), 'Die Macht der Musik' (1791), 'Der Rabe,' operetta (1792). 'Die Grossmuth des Scipio,' and 'Die Ruinen zu Paluzzi,'—the two last not performed. His best-known work is the music for Schiller's 'Lay of the Bell,' which kept its place in concert programmes for many years. His music is solid, but not original, being too closely modelled on Mozart. His larger works are well known in England. 'The Transient and the Eternal,' 'The Harmony of the Spheres,' 'The Power of Song,' and a Te Deum (in D), as well as 'The Lay of the Bell,' are all published with English words by Novello. His Toy-symphony is now and then played as an alternative to Haydn's, and was chosen for performance by an extraordinary company, embracing most of the great artists of London, May 14, 1880. Two sons, CYPRIAN and HEINRICH are mentioned in the *Allg. musikalische Zeitung*. [The former, a violoncellist, pupil of his uncle, was born at Hamburg, Oct. 28, 1807, and died there Oct. 14, 1865; he made concert-tours, became a member of the court orchestra of St. Petersburg, and published compositions for his instrument. Riemann's *Lexikon*.] Andreas's brother BALTHASAR, born 1775, and educated for a violoncellist, died aged seventeen. His sister THERESE, born 1781, had a considerable reputation as a pianist. F. G.

ROME. The early music schools of Rome, from the times of St. Sylvester to that of Palestrina, were so closely connected with the papacy that their history, as far as it is known, may be read in the article *SISTINE CHOIR*.

Whether or not Guido d'Arezzo founded a school of singing at Rome in the first half of the 11th century is only a matter of conjecture; the probabilities are in favour of the theory, as it is known that Guido spent a short time, at least, at the capital about the year 1032, and that the then Pope John XIX. was so delighted with his method of teaching singing that he urged him to take up his residence in Rome, an invitation which only ill-health prevented Guido from accepting. (See vol. ii. p. 256.) In any case there can be no reasonable doubt that the

papal choir received many valuable hints from him.

The Sistine Chapel was not the only one which had a school or college of music attached to it, though it was by far the earliest. In 1480 Sixtus IV. proposed the formation of a 'cappella musicale' in connection with the Vatican, distinct from the Sistine; his idea was not, however, realised till the time of Julius II., when the 'Cappella Giulia' was founded (in 1513) for twelve singers, twelve scholars, and two masters for music and grammar. Arcadelt was the first 'Maestro de' Putti' (in 1539), Palestrina the first 'Maestro della cappella della basilica Vaticana' (1551-54); among celebrated 'maestri' in later days were Tommaso Bai (1713-1715), and Domenico Scarlatti (1715-19). The 'Cappella musicale nella protobasilica di S. Giovanni in Laterano' was founded in 1535 by Cardinal de Cupis; one of the earliest 'Maestri de' Putti' was Lasso (1541); Palestrina held the office of 'Maestro di cappella' here after his exclusion from the Vatican chapel (1555-61). The 'Cappella di Musica nella basilica Liberiana' (or Sta. Maria Maggiore) was founded about the same time as the Lateran chapel, and numbers among its maestri Palestrina (1561-71), Giov. Maria Nanini (1571-1575), and Alessandro Scarlatti (1703-9).

Besides these exclusively ecclesiastical schools, others were established by private individuals. The first man who is known to have kept a public music school at Rome was a certain Gaudio Mell, whose school is supposed to have been founded about the year 1539; and among his earliest pupils were Palestrina, Giovanni Animuccia, and Giovanni Maria Nanini. In 1549, Nicola Vicentino, the would-be restorer of the ancient Greek Modes, opened a small private school at Rome, into which a few select pupils were admitted, whom he endeavoured to indoctrinate with his musical views. But it was not till a quarter of a century later that a public music school was opened by an Italian. Whether it was that Nanini was inspired by his master's example, or, which is still more likely, was stirred by the musical agitation of the day, is of little importance; but it is certain that the year to which the opening of his school is attributed was the same which saw the foundation of the order of Oratorians, who in the person of their leader, St. Filippo Neri, were then doing so much for the promotion of music. Nanini soon induced his former fellow-pupil, Palestrina, to assist him in teaching, and he appears to have given finishing lessons. Among their best pupils were Felice Anerio and Gregorio Allegri. After Palestrina's death, Nanini associated his younger brother Bernardino with him in the work of instruction, and it was probably for their scholars that they wrote jointly their treatise on counterpoint. Giovanni Maria dying in 1607 was succeeded by

Bernardino, who was in his turn succeeded by his pupil and son-in-law Paolo Agostini. It must have been this school that produced the singers in the earliest operas and oratorios of Peri, Caccini, Monteverde, Cavaliere, Gagliano, etc. In the second quarter of the 17th century a rival school was set up by a pupil of B. Nanini, Domenico Mazzocchi, who, with his younger brother Virgilio, opened a music school, which was soon in a very flourishing condition; this was due in a great measure to the fact that the masters were themselves both singers and composers. Their curriculum differed but slightly from that of the Palestrina-Nanini school. In the morning one hour was given daily to practising difficult passages, a second to the shake, a third to the study of literature, and another hour to singing with the master before a mirror; in the afternoon an hour was occupied in the study of the theory of music, another in writing exercises in counterpoint, and another in literature; the remainder of the day (indoors) was employed in practising the harpsichord and in composition. Outside the school the pupils used sometimes to give their vocal services at neighbouring churches, or else they went to hear some well-known singer; at other times they were taken to a spot beyond the Porta Angelica to practise singing against the echo for which that neighbourhood was famous. In 1662 Pompeo Natale kept a music school, at which Giuseppe Ottavio Pitoni, the reputed master of Durante and Leo, learnt singing and counterpoint. G. A. Angelini-Buontempi, a pupil of the Mazzochis, writing in 1695, says that Fedi, a celebrated singer, had opened the first school exclusively for singing at Rome. His example was soon followed by Giuseppe Amadori, with equal success; the latter was a pupil of P. Agostini and no doubt had not entirely forgotten the teachings of the old school; but by the end of the 17th century its traditions were gradually dying out, to be replaced by the virtuosity of the 18th century.

We must now retrace our steps and give some account of the most important musical institution at Rome of past or present time—the 'Congregazione dei Musici di Roma sotto l' invocazione di Sta. Cecilia.' It was founded by Pius V. in 1566, but its existence is usually dated from 1584, when its charter was confirmed by Gregory XIII.; almost all the masters and pupils of the Palestrina-Nanini school enrolled their names on its books, and their example has been since followed by over 4000 others, including every Italian of note, and in the 19th century many illustrious foreigners, such as John Field, Wagner, Liszt, Gounod, etc. etc.

The officers originally appointed were a Cardinal Protector, a 'Primicerio' or president, usually a person of high position, a 'Consiglio dirigente' of four members (representing the four sections—composition, the organ, singing,

and instrumental music), a Secretary, a Chancellor, twelve Counsellors, two Prefects, etc.; there were also professors for almost every branch of music; Corelli was head of the instrumental section in 1700. Those qualified for admission into the institution were chapel-masters, organists, public singers, and well-known instrumentalists. By a papal decree of 1689 all musicians were bound to observe the statutes of the Academy; and by a later decree (1709) it was ordained that its licence was necessary for exercising the profession. Soon after this the Congregation began to suffer from an opposition which, though covert, was none the less keenly felt; and in 1716 a papal decree unfavourable to the institution was passed. In 1762 it was flourishing again, for in that year we find that a faculty was granted to the cardinal protector, to have the general direction of all ecclesiastical music at Rome. By another decree of 1764, it was enacted that none but those *skilled* in music should be in future admitted as members. The entrance-fee was, as it has continued to be, a very small one. The demands made upon members were also very slight. At first they were only expected to assist, by their compositions or performances, in the grand annual festival in honour of the patron saint. Towards the close of the 17th century were added one or two annual services in memory of benefactors; in 1700 a festival in honour of St. Anna, and in 1771 a '*piccola festa di Sta. Cecilia*.'

The Congregation originally took up its quarters at the College of Barnabites (afterwards Palazzo Chigi) in the Piazza Colonna, where they remained for nearly a century; thence they moved to the Convent of Sta. Maria Maddalena, and again to another college of Barnabites dedicated to San Carlo a Catinari. Here they resided for the greater part of two centuries, and, after the temporary occupation of premises in the Via Ripetta, finally, in 1876, settled at their present quarters, formerly a convent of Ursuline nuns, in the Via dei Greci. Beside the hostility which the Congregation had to undergo, as we have seen, from outsiders, at the beginning of the 18th century—which was repeated in another form as late as 1836—it has had its financial vicissitudes. Indeed at the end of the 18th, and beginning of the 19th century, the funds were at a very low ebb, from which they have been gradually recovering. The institution was dignified with the title of Academy of Gregory XVI. in 1839. Two years later Rossini's '*Stabat Mater*' was performed for the first time in Italy in its entirety by the members of the Academy. Pius IX., who became Pope in 1846, though he founded several other schools for singing, such as that of '*S. Salvatore in Lauro*', did little more for the Academy than to bestow upon it the epithet '*Pontificia*.' [During the early years of his

reign two attempts were made to found a Liceo musicale or music-school in connection with the Academy. The first, in 1847, received encouragement and sympathy from the pontiff, but efforts to obtain a government subsidy for the purpose failed owing to the political disturbances of 1848-49. Another endeavour by Professor Filippo Borgia in 1857 had no better result. It was not until 1869, when two young associates of the institute, Giovanni Sgambati and Ettore Penelli, opened gratuitous classes for pianoforte and violin on the premises of the Accademia that a practical start was made in this direction. In the following year the two professors sought and obtained from Cardinal Di Pietro, Protector of the Accademia, official sanction for their venture. This was given in a decree, dated May 23, 1870, establishing the classes on a recognised footing as belonging to and dependent upon the institution. The fresh departure received further impetus later in the same year. Soon after the fall of the pontifical government in September, the associates of the Accademia, now a '*Royal*' institution, expressed in general assembly unanimous approval of the classes, and entrusted a provisional committee with Professor Borgia at its head with the task of formally constituting a Liceo Musicale.

From this period the energies of the Accademia, which until now had been little more than a body of examiners and licentiates, became centred in the new development, and its history identified with that of the daughter-institute of which the classes formed by Sgambati and Penelli were the nucleus, and of which, therefore, they are rightly considered the founders. The provisional committee remained in office until 1875, when its duties were taken over by the Accademia's newly constituted Council of Direction, of which Comm. Emilio Broglio was president. Meanwhile the music-school had been rapidly growing. Sgambati had engaged three assistants for pianoforte teaching, Alessandro Orsini with a sub-professor had opened classes for singing, and violoncello and brass instruments were being taught by Ferdinando Forino and Vedasto Vecchietti. At length after seven years of careful preparation the Liceo Musicale was formally constituted under the direction of a '*Commissione disciplinare*' and a '*Comitato tecnico*,' with a staff of twenty-nine professors. The new institute was launched on March 3, 1877, in the presence of the Crown Prince and Princess (Umberto and Margherita) of Italy.

The Accademia now occupied itself with the compilation of a Statute for the Liceo, and in accordance with the wishes of the Government the '*Commissione disciplinare*' was substituted, in 1886, by an administrative council. On this the Government, the Province of Rome, and the Municipality, as contributors to the main-

tenance of the Liceo, were represented, while its Director was nominated by the Accademia itself. The first to occupy the newly created post was Comm. Filippo Marchetti, who vacated the presidential chair of the Accademia to undertake it.

In 1907 the Liceo had 225 students and a professorial staff of about forty. In the first twenty-five years of its existence instruction was given to 1387 pupils, of whom 415 received diplomas. Every branch of practice and theory is taught, besides Italian literature and the history of music. The charge for instruction is so low (five francs a month) that tuition is, to all intents and purposes, free. The Liceo receives yearly subsidies from the Government (£1600), from the Province of Rome (£320), and from the Municipality (£1200). Arrangements are now pending to place it directly under the Government, and its professors will then enjoy the distinction, highly prized in Italy, of State officials. Professors Sgambati and Penelli, after thirty-eight years, still take an active part in examining and teaching. The director is Comm. Stanislao Falchi, who succeeded Comm. Marchetti in 1901.

To its premises in the Via dei Greci the Accademia, assisted by contributions from the Government and Queen Margherita, has added a spacious concert-hall with an organ, opened in 1895. Here, during winter and spring, public orchestral and chamber concerts are given. The library also constitutes an increasingly important branch of its influence. Originally small, the collection of books and MSS. was increased by the musical library of Gregory XVI. bequeathed in 1846. It was still further enriched in 1875 by the Orsini collection, and later by the musical works which had formerly belonged to the dissolved monasteries. In 1882 were added copies of all modern musical publications since 1500, so that the Accademia now possesses one of the largest and most important musical libraries in Italy (see vol. ii. p. 714*a*). The books having been removed to the ground floor, the library and reading-room are the more easily accessible to the public. The Accademia still enjoys royal patronage, and the King of Italy is its honorary president, while the Conte di San Martino is at the head of its Council of Direction.

Quite apart from the Accademia, which with its Liceo is the musical centre of Rome, much has been done for the improvement of the popular taste in music. For this the municipal orchestra, under Signor Alessandro Vessella, has been chiefly responsible. Concerts are given weekly during the greater part of the year at the Argentina theatre. Formerly, popular audiences in Rome were for the most part intolerant of music which was not Italian. Thanks to the courage and perseverance of Signor Vessella this is the case no longer. His pro-

grammes, open to composers of all nationalities, have familiarised the Roman public with classical and modern works—Bach, Haydn, Beethoven, Mozart, Mendelssohn, Berlioz, Liszt, Wagner, Tchaikovsky, and Elgar being often associated with Rossini, Verdi, Puccini, and Mascagni. As an operatic centre, however, Rome lacks the prestige of Milan and Naples.

Ecclesiastical music in the Italian capital still leaves much to be desired, the excellent ideals of Pius X. being as yet far from any wide realisation. Divine service is sometimes accompanied by devout and careful singing, as at the church of Santa Maria dell' Anima and at St. John Lateran under Maestro Filippo Capocci; but artistic performances are unhappily rare, and organ-playing is, too generally, careless and vulgar.] A. H.-H.; with additions in square brackets by H. A. W.

ROMEO AND JULIET. A subject often set by opera composers; e.g.—

1. *Roméo et Juliette*; three acts; words by de Ségur, music by Steibelt. Théâtre Feydeau, Paris, Sept. 10, 1793.

2. '*Giulietta e Romeo*.' Opera seria in three acts, words by Giuseppe Foppa, music by Zingarelli. Produced at the Scala, Milan, Jan. 30, 1796.

3. '*Giulietta e Romeo*,' three acts, words by Romani, music by Vaccaj. Produced at the Teatro della Canobbiana, Milan, Oct. 31, 1825; King's Theatre, London, April 10, 1832.

4. '*I Capuletti ed i Montecchi*,' in three acts; libretto by Romani, music by Bellini. Produced at Venice, March 11, 1830. It was written for the two Grisis and Rubini. King's Theatre, London, July 20, 1833.

5. '*Les Amants de Vérone*,' five acts, text and music by the Marquis d'Ivry (under the pseudonym of Richard Yrvid), written in 1864, performed privately in 1867, and publicly at the Salle Ventadour, Oct. 12, 1878. At Covent Garden, May 24, 1879.

6. '*Roméo et Juliette*,' in five acts; words by Barbier and Carré, music by Gounod. Produced at the Théâtre Lyrique, April 27, 1867. In London, at Covent Garden, in Italian, July 11, 1867.

7. In addition to these it has been made the subject of a work by Berlioz, his Fifth Symphony—'*Roméo et Juliette*. Symphonie dramatique avec chœurs, solos de chant, et prologue en récitatif choral, op. 17.' Dedicated to Paganini. The words are Berlioz's own, versified by Emil Deschamps. It was composed in 1839, and performed three times consecutively at the Conservatoire, first on Nov. 24, 1839. In England the First Part (four numbers) was executed under Berlioz's direction at the New Philharmonic Concerts of March 24, and April 28, 1852, and the entire work by the Philharmonic Society (Cusins), March 10, 1881.

8. A symphonic poem by Tchaikovsky was first

performed at the Musical Society in Moscow, March 4, 1870. It was published by Bote & Boch in the following year, and was afterwards, (in 1881) issued in a curtailed and revised form. G.

ROMER, EMMA, soprano singer, pupil of Sir George Smart, born in 1814, made her first appearance at Covent Garden, Oct. 16, 1830, as Clara in 'The Duenna.' She met with a favourable reception, and for several years filled the position of prima donna at Covent Garden, the English Opera-House, and Drury Lane, with great credit. In 1852 she took the management of the Surrey Theatre, with a company containing Miss Poole and other good singers, and brought out a series of operas in English. Miss Romer was rarely heard in the concert-room, but appeared at the Westminster Abbey Festival in 1834. She was the original singer of the title-parts in Barnett's 'Mountain Sylph' and 'Fair Rosamond.' Her performance of Amina in the English version of Bellini's 'Sonnambula' was much admired. She married a Mr. Almond, and died at Margate, April 14, 1868. W. H. H.

RONALD, LANDON. See RUSSELL, HENRY.

RONCONI, DOMENICO, was born July 11, 1772, at Lendinara-di-Polesine in Venetia. He first appeared on the stage in 1797 at La Fenice, Venice, and obtained great renown both as a singer and actor, there and in other Italian cities, sang in Italian opera at St. Petersburg (1801-5), was director of the Italian opera in Vienna in 1809, sang in Paris in 1810, and was engaged at Munich in 1819-29, becoming a teacher of singing there. He founded a vocal school in 1829 at Milan. He died at St. Petersburg, April 13, 1836. Of his three sons,

FELICE, born in 1811, at Venice, under the direction of his father devoted himself to instruction in singing, and became a professor in 1837 at Würzburg, at Frankfort, and, in 1844-48, at Milan. He was similarly engaged for some years in London, and finally at St. Petersburg, where he died Sept. 10, 1875. He was the author of a method of teaching singing, and of several songs. His elder brother,

GIORGIO, the celebrated baritone, was born at Milan, August 6, 1810. He received instruction in singing from his father, and began his dramatic career in 1831, at Pavia, as Arturo in 'La Straniera.' He played in some of the small Italian cities, then at Rome, where Donizetti wrote for him 'Il Furioso,' 'Torquato Tasso,' and 'Maria di Rohan,' in which last, as the Duc de Chevreuse, he obtained one of his greatest triumphs—also at Turin, Florence, and Naples, where he on Oct. 8, 1837, married Signorina Elguerra Giannoni, who, according to some accounts, had recently sung with success at the Lyceum and King's Theatres, London. He began his career in England at Her Majesty's, April 9, 1842, as Enrico in 'Lucia,' and was

well received during the season in that character and in those of Filippo ('Beatrice di Tenda'), Belcore ('L'Elisir'), Basilio, Riccardo ('Puritani'), Tasso, etc. In the last opera his wife played with him, but neither then, nor five years later as Maria di Rohan, did she make the least impression on the English public. He then made a provincial tour with her, Thalberg, and John Parry. In the winter he played at the Italiens, Paris, with such success that he was engaged there for several subsequent seasons, and at one time was manager of the theatre, and was also engaged at Vienna, Pesth, Madrid (where he was manager), Barcelona, and Naples. He reappeared in England, April 13, 1847, at Covent Garden, as Enrico, and also played Figaro ('Barbiere'), May 8, De Chevreuse on the production in England of 'Maria di Rohan,' and the Doge on the production of Verdi's 'Idue Foscari,' June 19, in which 'by his dignity and force he saved the opera . . . from utter condemnation' (Chorley). 'There are few instances of a voice so limited in compass (hardly exceeding an octave), so inferior in quality, so weak, so habitually out of tune. . . . The low stature, the features, unmarked and commonplace when silent, promising nothing to an audience, yet which could express a dignity of bearing, a tragic passion not to be exceeded, or an exuberance of the wildest, quaintest, most whimsical, most spontaneous comedy. . . . These things we have seen, and have forgotten personal insignificance, vocal power beyond mediocrity, every disqualification, in the spell of strong real sensibility' (Ib.). There have been few such examples of terrible courtly tragedy as 'Signor Ronconi's Chevreuse—the polished demeanour of his earlier scenes giving a fearful force of contrast to the latter ones. . . .' (Ib.). He sang at the Italian Opera every season until 1866 inclusive, excepting in 1855 and 1862. His parts included Don Juan, Papageno, Leporello, Masetto, Iago, Podestà ('La Gazza Ladra'), Isidoro ('Matilda di Shabran'), Nabucco, Faust (Spohr), Rigoletto, Lord Allicash ('Fra Diavolo'), Dandolo ('Zampa'), Barberino ('Stradella'), and Crispino ('Crispino e la Comare'), etc. His Rigoletto was unrivalled, but his Don Juan was a disappointment. He sang in America (1866-74) with great success, and on his return to Europe he became a teacher of singing at the Conservatorio at Madrid. In 1863 he founded a school of singing at Granada. He died at Madrid, Jan. 8, 1890. A warm appreciation of his powers appears in Santley's *Student and Singer*.

SEBASTIANO, the other son, also a baritone, born May 1814, at Venice, received instruction from his father and the elder Romani, and made his first appearance in 1836, at the Teatro Pantera, Lucca, as Torquato Tasso, in which part throughout his career he made one of his greatest successes. He enjoyed considerable

popularity in his own country, at Vienna, and in Spain, Portugal, and America, as an able artist in the same line of parts as his brother—unlike him in personal appearance, being a tall thin man, but like him in the capability of his face for great variety of expression. He appeared in England on Dec. 17, 1836, at the Lyceum, as Cardenio in Donizetti's 'Furioso,' and also sang for a few nights at the King's Theatre, as well as at the Philharmonic, Feb. 27, 1837. He reappeared in 1860 at Her Majesty's, as Rigoletto, Masetto, and Grillette ('Prova d' un Opera Seria'). He retired from public life after a career of thirty-five years, and settled in Milan as a teacher of singing.¹ A. C.

RONDEAU. A French name for a short poem of six or eight lines, containing but two rhymes, and so contrived that the opening and closing lines were identical, thus forming as it were a circle or *round*. The name has come to be used in music for a movement constructed on a somewhat corresponding plan. [See RONDO.] C.

RONDO (Fr. *Rondeau*). A piece of music having one principal subject, to which a return is always made after the introduction of other matter, so as to give a symmetrical or *rounded* form to the whole.

From the simplicity and obviousness of this idea it will be readily understood that the Rondo-form was the earliest and most frequent definite mould for musical construction. For a full tracing of this point see FORM, vol. ii. p. 74, etc. In fact the First Movement and the Rondo are the two principal types of Form, modifications of the Rondo serving as the skeleton for nearly every piece or song now written. Marx (*Allgemeine Musiklehre*) distinguishes five forms of Rondo, but his description is involved, and, in the absence of any acknowledged authority for these distinctions, scarcely justifiable.

Starting with a principal subject of definite form and length, the first idea naturally was to preserve this unchanged in key or form through the piece. Hence a decided melody of eight or sixteen bars was chosen, ending with a full close in the tonic. After a rambling excursion through several keys and with no particular object, the principal subject was regained and an agreeable sense of contrast attained. Later on there grew out of the free section a second subject in a related key, and still later a third, which allowed the second to be repeated in the tonic. This variety closely resembles the first-movement form, the third subject taking the place of the development of subjects, which is rare in a Rondo. The chief difference lies in the return to the first subject immediately after the second, which is the invariable characteristic of the Rondo. The first of these classes is the Rondo from Couperin to Haydn, the second

and third that of Mozart and Beethoven. The fully developed Rondo-form of Beethoven and the modern composers may be thus tabulated:—

1st sub.	2nd sub.				
(domi-	1stsub.	3rdsub.	1stsub.	2ndsub.	Coda.
nant).				(tonic).	

In the case of a Rondo in a minor key, the second subject would naturally be in the relative major instead of in the dominant.

One example—perhaps the clearest as well as one of the best known in all music—will suffice to make this plan understood by the untechnical reader. Taking the Rondo of Beethoven's 'Sonate Pathétique' (op. 13) we find the first subject in C minor:—

this is of 17½ bars in length, and ends with a full close in the key. Six bars follow, modulating into E_b, where we find the second subject, which is of unusual proportions compared with the first, consisting as it does of three separate themes:—

After this we return to the first subject, which ends just as before. A new start is then made with a third subject (or pair of subjects) in A_b:—

this material is worked out for twenty-four bars and leads to a prolonged passage on a chord of the dominant seventh on G, which heightens the expectation of the return of the first subject by delaying it. On its third appearance it is not played quite to the end, but we are skilfully led away, the bass taking the theme, till, in the short space of four bars, we find the whole of the second subject reappearing in C major. Then, as this is somewhat long, the first subject comes in again for the *fourth* time and a *Coda* formed from the second section of the second subject concludes the Rondo with still another 'positively last appearance' of No. 1.

Beethoven's Rondos will all be found to present but slight modifications of the above form. Sometimes a 'working-out' or development of the second subject will take the place

¹ We are indebted to him and Mr. J. C. Griffith of Sydney for much of the above information with regard to his family.

of the third subject, as in the Sonata in E minor (op. 90), but in every case the principal subject will be presented in its entirety at least three times. But as this was apt to lead to monotony—especially in the case of a long subject like that in the Sonata just quoted—Beethoven introduced the plan of varying the theme slightly on each repetition, or of breaking off in the middle. It is in such delicate and artistic modifications and improvements as these that the true genius shows itself, and not in the complete abandonment of old rules. In the earliest example we can take—the Rondo of the Sonata in A (op. 2, No. 2)—the form of the opening *arpeggio* is altered on every recurrence, while the simple phrase of the third and fourth bars

is thus varied:—

In the Rondo of the Sonata in E \flat (op. 7) again, we find the main subject cut short on its second appearance, while on its final repetition all sorts of liberties are taken with it; it is played an octave higher than its normal place, a free variation is made on it, and at last we are startled by its being thrust into a distant key—E \sharp . This last effect has been adopted by many a composer since—Chopin in the Rondo of his E minor Pianoforte Concerto, for instance. It is needless to multiply examples: Beethoven shows in each successive work how this apparently stiff and rigid form can be invested with infinite variety and interest; he always contradicted the idea (in which too few have followed him) that a Rondo was bound in duty to be an eight-bar subject in 2-4 time, of one unvarying, jaunty, and exasperatingly jocosse character. The Rondo of the E \flat Sonata is most touchingly melancholy, so is that to the Sonata in E minor (op. 90), not to mention many others. There will always remain a certain stiffness in this form, owing to the usual separation of the subject from its surroundings by a full close. When this is dispensed with, the piece is said to be

in Rondo-form, but is not called a Rondo (*e.g.* the last movement of Beethoven's Sonata op. 2, No. 3).

Modern composers, like Chopin, with whom construction was not a strong point, often omit the central section, or third subject, together with the repetition of the first subject which accompanies it, and thus what they call a Rondo is merely a piece on the plan of a French overture; that is to say, having produced all his material in the first half of the piece, the composer repeats the whole unchanged, save that such portions as were in the Dominant are, in the repetition, given in the Tonic. Chopin's 'Rondeau brillant' in E \flat , the 'Adieu à Varsovie'—indeed all his Rondos—show this construction. F. C.

RONZI. [See BEGNIS, DE, vol. i. p. 278.]
ROOKE, WILLIAM MICHAEL, son of John Rourke, or O'Rourke, a Dublin tradesman, was born in South Great George's Street, Dublin, Sept. 29, 1794. His bent for music, which displayed itself at an early age, was sternly discouraged by his father, who wished him to follow his own avocation, but before he was sixteen, he was, by his father's death, left free to follow his own inclination. He studied, almost unaided, so assiduously, that in 1813 he took to music as a profession (having altered the form of his name), learned counterpoint under Dr. Cogan, a Dublin professor, and became a teacher of the violin and pianoforte. Among his pupils on the former instrument was Balfe, then a boy. In 1817 he was appointed chorus-master and deputy leader at the theatre in Crow Street, Dublin, and soon afterwards composed a polacca, 'Oh Glory, in thy brightest hour,' which was sung by Braham, and met with great approbation. [In 1818 he composed his first opera, 'Amilie' (see below), and in 1822 he removed to England, where he became chorus-master at Drury Lane Theatre, under Tom Cooke, and, in 1830-33, leader at Vauxhall, under Sir Henry Bishop. W. H. G. F.] A few years later he removed to England. In 1826 he was leading oratorios at Birmingham, and in the same year came to London, and sought the appointment of chorus-master at Drury Lane, and established himself as a teacher of singing. His opera, 'Amilie, or The Love Test,' after he had waited many years for an opportunity of producing it, was brought out at Covent Garden, Dec. 2, 1837, with decided success, and at once established his reputation as a composer of marked ability. He immediately commenced the composition of a second opera, and on May 2, 1839, produced at Covent Garden 'Henrique, or, The Love Pilgrim,' which, although most favourably received, was withdrawn after five performances on account of a misunderstanding with the manager. He composed two more entitled 'Cagliostro,' and 'The Valkyrie,' which have never been performed.

He died Oct. 14, 1847, and was buried in Brompton Cemetery. W. H. H.

ROOT. The classification of the chords which form the structural material of modern harmonic music is attained by referring them to what are called their roots; and it is mainly by their use that these harmonic elements are brought into intelligible order.

As long as the purely polyphonic system was in full force, the chordal combinations were merely classified according to recognised degrees of consonance and dissonance, without any clear idea of relationship: but as that system merged by degrees into the harmonic system, it was found that fresh principles of classification were indispensable; and that many combinations which at first might appear to have quite a distinct character must somehow be recognised as having a common centre. This centre was found in an ultimate bass note, namely, the bass note of the complete chord in what would be considered its natural or first position; and this was called the Root, and served as the common indicator of all the various portions of the complete chord which could be detached, and their test of closest possible relationship. Further, these roots were themselves classified according to their status in any given key; and by this means a group of chords which were related to one another most closely by having the same root, might be shown to be related severally and collectively to the group which belonged to another root; and the degree of relationship could be easily and clearly ascertained according to the known nearness or remoteness of the roots in question. By this means the whole harmonic basis of a piece of music can be tested; and it must be further noted that it is only by such means that the structural principles of that kind of music which has been called 'absolute' because of its dissociation from words, is rendered abstractedly intelligible.

The principle upon which modern Instrumental Music has been developed is that a succession of distinct tunes or recognisable sections of melody or figures can be associated by the orderly distribution of harmonies and keys in such a manner that the mind can realise the concatenation as a complete and distinct work of art. It is obvious that fine melodic material is a vital point; but it is not so obvious that where the dimensions of the work are such that a continuous flow of melody of a uniform character is impossible, the orderly arrangement of the materials in successions of keys and harmonies is no less vital. The harmonic structure requires to be clearly ascertainable in works of art which are felt to be masterpieces of form, and to be perfectly understood and felt by those who attempt to follow such models: hence, in discussing the structure of works of this kind, the frequent use of such terms as Tonic, or Domi-

nant or Subdominant harmony, which is only a short way of describing harmony of which these respective notes are the roots.

The simplest and most stable of complete combinations in music are the chords consisting of a bass note with its third and perfect fifth; and of these the bass note is considered the root. In most cases such a root is held to be the fundamental sound of the series of harmonics which an essential chord may be taken to represent. For instance, the chord of the major third and perfect fifth on any note is supposed to represent the ground tone or generator with two of its most distinct and characteristic lower harmonics; and whatever be the positions of the individual notes in respect of one another, they are still referred to this ground-tone as a root. Thus the chord GBD

(a) would be taken to be the representative of the ground-tone G with its second and fourth harmonics (b); and every transposition or 'inversion' of the same notes, such as BDG, or DGB in close or open order (as in c), or even lesser portions to which the implication of a context would afford a clue, would be referred alike to this same root. If F be added (d) to the above chord it may be taken to represent the sixth harmonic (b), and similar 'inversions' of the component portions of the chord will similarly be referred to the note G. If A be added further above the F of the preceding chord, producing GBDFA (as in e), that is commonly taken as a yet more complete representation of the group of harmonics generated by the sounding of G, of which it is the eighth; and, as before, all the different portions which could be intelligibly isolated, and all the transpositions of its component notes, would be still referable to the one root G. If A_♯ had been taken instead of A_♮, the same general explanation would hold good, though the special question might remain open whether it was a representative of the 16th harmonic, which is four octaves from the fundamental sound, or an artificial softening of the clear and strong major ninth, A_♯. Some theorists carry the same principles yet further, and include the C above A, and even the E and E_♭ above that in the group which represents the harmonic series of G, calling them respectively the

eleventh and major and minor thirteenth of that note.

The discords contained in the above series are frequently styled fundamental from this supposed representation of the group of harmonics generated by their fundamental or root note; they are characterised among discords by the peculiar freedom of the notes of which they are composed, on both sides. It will be observed that they are all members of the Diatonic series of the key of C, major or minor; and as G, their root note, is the Dominant of that key, they represent the scope of what is called the Dominant harmony of C, which of course has its counterpart in every other key. No other note than the Dominant serves to this extent as the root of chords of this class which are Diatonic. The Tonic, for instance, can only supply the third and fifth, and even the minor seventh is a chromatic note. Nevertheless this chromatic chord and the ninths which are built upon it are commonly used as if they belonged to the key of C; and the same remark applies to the similar discords founded on the Super-tonic root (as D in the key of C); and these are most readily intelligible through their close connection as Dominant harmony to the Dominant of C.

The roots of the various combinations which are arrived at by modifying the intervals of such distinct and essential harmonies as the above, are of course the same as those of the unmodified harmonies. Thus the roots of suspensions are the same as those of the harmonies upon which they are said to resolve, because they are modifications of that which follows in its complete state, and not of that which precedes; and the same applies to the combinations produced by adventitious notes, such as appoggiaturas and the like.

The combinations which arise from the simultaneous occurrence of ordinary passing notes must find their root in the chord which precedes, as that has possession of the field till new harmony presents itself.

From these considerations it will be obvious that a very considerable variety of apparently different combinations are referable to a single root. In fact a great portion of music is built upon very few roots; many examples of good popular music especially do not exceed the limits of Tonic and Dominant harmony with an occasional move as far as the Subdominant, and next to no modulation. Even in works which belong to the domain sometimes distinguished as high art, a great deal is often done within very narrow limits. For instance, the whole of the first section of a violin and pianoforte sonata of Mozart's in A is based on six successive alternations of Tonic and Dominant harmony, and modulation to the new key for the second section is effected merely by the Dominant and Tonic harmony of that key.

Notwithstanding the importance which attaches to a clear understanding of the classification of chords according to their roots, there are some combinations upon whose derivation doctors disagree; and it must be confessed that the theory of music is yet far from that complete and settled stage which would admit any hope of a decisive verdict in the matter at present. In such circumstances variety of opinion is not only inevitable but desirable; and though the multitude of counsellors is a little bewildering there are consolations; for it happens fortunately that these differences of opinion are not vital. Such chords, for instance, as augmented sixths have so marked and immediate a connection with the most prominent harmonies in the key, that the ascertainment of their roots becomes of secondary importance; and even

with the chord which stands as $\left. \begin{array}{c} D \\ C \\ A \\ F \end{array} \right\}$ in the key

of C for instance (*f*), it is not so indispensable to decide whether G or F or D is the root, or whether indeed it is even a double-rooted chord, because, among other reasons, the very attention which has been called to it and the very characteristics which have made it difficult to classify have given it a prominence and a unique individuality which relieves it of the need of being assigned to any category; and even when it is an important factor in the harmonic structure, the process of analysis need not be rendered doubtful, because its actual position in the key is so thoroughly realised. Other disputed points there are having reference to roots, which are even of less importance. For instance, whether what is called an augmented fifth is really an augmented fifth or a minor thirteenth; or whether the augmented octave which Mozart uses with such marked emphasis in the third bar of the Allegro in the overture to 'Don Giovanni' is properly a minor ninth, as some maintain—since happily the roots would be the same in both cases.

C. H. H. P.

ROOT, GEORGE FREDERICK, an American popular composer, born at Sheffield, Mass., U.S.A., August 30, 1820. He studied under Webb of Boston, and afterwards in Paris in 1850. He was a music-publisher in Chicago in 1859-71. He was associated with Lowell Mason in popularising music in American schools, etc., and had a musical doctor's degree conferred on him at the Chicago University. He died at Barley's Island, August 6, 1895. He wrote various cantatas, such as 'The Flower Queen,' 'Daniel,' and others, but is best known as composer of certain songs much sung during the American Civil War, as, 'The Battle-Cry of Freedom,' 'Just before the Battle, Mother,' but his composition of the spirited 'Tramp, tramp, tramp, the boys are marching,' now almost better known as 'God save Ireland,' should

entitle him to rank among the makers of living national music. His son, FREDERICK WOODMAN ROOT, born at Boston, June 13, 1846, has done useful work as a teacher of singing, both individually and in large classes. F. K.

ROPARTZ, J. GUY, born at Quingamp (Côtes du Nord), June 15, 1864, was a pupil of Dubois and Massenet in the Paris Conservatoire, and afterwards studied with César Franck. Though his life has been chiefly devoted to composition he has, since 1894, directed the Conservatoire of Nancy with great success, and has given a strong impulse to the symphony concerts in that town. His dramatic works include two pieces in one act, 'Le Diable conturrier' and 'Marguerite d'Écosse'; he has written incidental music for 'Pêcheur d'Islande' (Loti and Tielcelin), played in Paris, 1893; 'Paysages de Bretagne' (written for a 'théâtre d'ombres chinoises'), 'Les Landes,' 'Marie endormie,' and five short pieces, a 'Marche de fête,' three 'Airs de ballet,' a suite in four movements called 'Dimanche breton,' a symphony on a Breton chorale, a 'Serenade,' etc., and among his smaller published works which have been brought to a hearing are a string quartet and a 'fantaisie' for strings, some church music (Psalm xxxvi. for choir, organ, and orchestra), songs, and pieces for organ and for piano. C. F.

RORE, CIPRIANO DE, composer of the Venetian school, born at Mechlin (or possibly Antwerp) about 1516. He studied under Willaert,¹ chapel-master of St. Mark's, Venice, and was probably in early life a singer in that cathedral. In 1542 he brought out his first book of madrigals *a* 5, and in 1550 his first book *a* 4 appeared, a work long held in favour,² and for the next seven or eight years published continually.³ About 1550⁴ he appears to have left Venice for the court of Hercules II., Duke of Ferrara, and for some years we hear nothing of him.⁵ [In 1558 he was given leave of absence to visit his parents

at Antwerp, and soon afterwards visited the court of Margaret of Austria, Governess of the Netherlands, whose husband, Duke Ottavio Farnese, engaged him as his maestro di cappella at Parma.] On the death of Willaert he was appointed his successor, Oct. 18, 1563. He resigned this position almost immediately, and returned to the court of Parma in July 1564, where he died, in the autumn of 1565, at the age of forty-nine. He was buried in the cathedral of that city, and the following epitaph gives an authentic sketch of his life:—

Cypriano Roro, Flandro
Artis Musicae
Viro omnium peritissimo,
Cujus nomen fama
Nec vetustate obrui
Nec oblivione deleri poterit,
Hercules Ferrariensis. Ducis II.
Deinde Venetorum,
Postremo
Octavi Farnesi Parmae et Placentiae
Ducis II Chori Praefecto.
Ludovicus frater, fil. et haeredes
Moestissimi posuerunt.
Obiit anno MDLXV. aetatis vero suae XLIX.

The position to which Rore attained at St. Mark's, and the rank as a musician which contemporary writers assigned him, point to his having been something of an innovator, and a really original composer. His sacred and secular compositions were frequently reprinted, and were included in many collections of the time.⁶ (See the *Quellen-Lexikon* for these and for MS. copies.) We know that they were held in high esteem in the court chapel at Munich, and were constantly performed there under Lassus's direction.⁷ Duke Albert of Bavaria caused a superb copy of Rore's motets to be made for his library, where it remains to this day, with a portrait of the composer on the last page, by the court painter Mielich. J. R. S.-B.

ROSA (ROSE), CARL AUGUST NICOLAS, born at Hamburg, March 22, 1842, was educated as a violin-player and made such progress as to be sent to the Leipzig Conservatorium, which he entered in 1859. [He afterwards studied at the Paris Conservatoire, and obtained the post of concertmeister at Hamburg in 1863.] In 1866 he came to England and appeared as a solo player at the Crystal Palace on March 10. After a short stay in London he joined Mr. Bateman in a concert-tour in the United States, and there met Madame Parepa, whom he married at New York, in Feb. 1867. His wife's success on the stage led to the formation of a company under the management and conductorship of Mr. Rose, which, during its early campaigns could boast such names as Parepa, Wachtel, Santley, Ronconi, and Formes among its artists.

Early in 1871 Mr. Rose—who by this time had changed his name to Rosa to avoid mistakes

¹ See title-page 'Fantasie e Recercari, etc., composti da Io Eccell. A. Vuigliaert e Cipriano suo Discipolo, etc., Venetia, 1549' (Brit. Mus. A. 287).

² The Fétis library at Brussels contains imperfect copies of three editions, 1552, 1569, and 1582. The edition in the British Museum is 1575.

³ The following list of books of motets and madrigals is taken from Fétis's *Biographie*. Elton's *Bibliographie*, the *Quellen-Lexikon*, and the catalogues of the British Museum and Fétis's libraries. Some contain work by other composers, but in all cases they bear Cipriano's name, and he is the chief contributor. The date given is that of the supposed first edition:—

Motets. Bk. I. *a* 5, Venice, 1544 (Brit. Mus.); bk. II. *a* 4 and 5, Venice, 1547 (Fétis, *Biogr.*); bk. III. *a* 5, Venice, 1549 (Elton).
Madrigals. Bk. I. *a* 5, Venice, 1542; bk. II. *a* 5, Venice, 1544 (Brit. Mus.), the *Quellen-Lexikon* gives 1552 as the first edition; bk. III. *a* 5, Venice, 1544. The 1562 edition in Brit. Mus.; bk. IV. and V. (1557 and 1566). (The fifth book contains an ode to the Duke of Parma, and from the events of the composer's life we may assume this volume to be one of his latest publications.) For the first book of madrigals *a* 4, see above; the second was printed in 1557, and in 1565 came out a selection of the four- and five-part madrigals, as 'Le vite flame,' etc. A large number of the four-part madrigals were brought out in score in 1577.

Chromatic madrigals. Bk. I. *a* 5, 1544 (Brit. Mus.); the word 'ri-stampato' on title-page shows that this is not the first edition. The first book was reprinted as late as 1593 (Fétis library). Burney has inserted one number in his *History*.

⁴ In this year a reprint of his first book of madrigals was brought out at Ferrara.

⁵ Except the publication of two *Passiones* (Paris 1557) with the following curious titles: 'Passio D. N. J. Christi in qua solus Johannes canens introducit cum quatuor vocibus' and 'Passio . . . in qua introducuntur Jesus et Judaei canentes, cum duobus et sex vocibus.'

⁶ Fétis mentions a book of Cipriano's masses, *a* 4, 5, 6 (Venice, 1566) on the authority of Draudius's *Bibliotheca Classica*. This is probably 'Liber Missarum' *a* 4, 5, 6 (Venice, 1566) to which Cipriano only contributes the first mass 'Douce memoire.'

⁷ Discorsi della triumph, etc. nelle nozze dell' illustr. duca Gugi. etc. da Massimo Trojano (Moacaco, Berg. 1598).

in pronunciation—returned to England with his wife, and then made a lengthened visit to Egypt for health. After this they again returned to London, but only for the lamented death of Madame Parepa-Rosa, which took place Jan. 21, 1874. Mr. Rosa, however, was resolved, notwithstanding this serious blow, to test the fortunes of English opera in London, and on Sept. 11, 1875, he opened the Princess's Theatre with a company including Miss Rose Hersee as prima donna, Mr. Santley, and other good singers. He closed on Oct. 30, having produced 'Figaro,' 'Faust,' *'The Porter of Havre' (Cagnoni), 'Fra Diavolo,' 'Bohemian Girl,' 'Trovatore,' *'The Water-Carrier' (Cherubini), and 'Siege of Rochelle.'

The season of 1876 was undertaken at the Lyceum (Sept. 11–Dec. 2). It included 'The Water-Carrier'; 'The Lily of Killarney' (with additions; 'Sonnambula'; 'Faust'; *'Giralda' (Adam); 'Bohemian Girl'; *'Flying Dutchman'; 'Zampa'; 'Trovatore'; 'Montana'; *'Joconde' (Nicolò); 'Fidelio'; 'Fra Diavolo'; *'Pauline' (Cowen): 'Porter of Havre.' The next season was at the Adelphi Theatre (Feb. 11–April 6, 1878). It included *'The Golden Cross,' by Brüll; 'The Merry Wives'; 'The Flying Dutchman'; 'The Lily of Killarney,' and others of those already named. For the fourth season Mr. Rosa took Her Majesty's Theatre, Jan. 27–March 22, 1879, brought out *'Rienzi,' *'Piccolino' (by Guiraud), and *'Carmen,' and played 'The Golden Cross,' 'Huguenots,' 'Lily of Killarney,' etc. etc. His fifth season was at the same theatre (Jan. 10–March 6, 1880); *'Mignon' (Thomas), *'Lohengrin,' and *'Aida' were all produced for the first time in English; and 'The Taming of the Shrew' (Goetz), 'Carmen,' 'Rienzi,' etc., were performed. In 1882 a season was given at Her Majesty's Theatre, from Jan. 14 to March 11. 'Tannhäuser' and Balfe's *'Painter of Antwerp' ('Moro') were produced, and Mme. Valleria joined the company. For the season of 1883 (March 26–April 21) the company moved to Drury Lane, which was its London centre until 1887. Thomas's *'Esmeralda' and Mackenzie's *'Colomba' were produced, and Mme. Marie Roze appeared as 'Carmen,' etc. In 1884 (April 14–May 10) Stanford's *'Canterbury Pilgrims' was the only new work produced. In 1885 (April 6–May 30) Thomas's *'Nadeshda' and Massenet's 'Manon' were given. In 1886 (May 23–June 26) Mackenzie's *'Troubadour,' and in 1887 (April 7–June 11) Corder's *'Nordisa' were the novelties. In 1888 'Robert the Devil,' 'The Puritan's Daughter,' 'The Star of the North,' and 'The Jewess' were produced; and on Jan. 12, 1889, Planquette's 'Paul Jones' at the Prince of Wales's Theatre, London. G.

¹ The asterisk prefixed to these names signifies that the works had not been before produced in England, at least in English.

After the death of Carl Rosa, which took place in Paris, April 30, 1889, the company began to lose a little of the prestige it had formerly enjoyed. An amalgamation with Harris, which had just been entered into at the time of Rosa's death, had no very artistic results, although a few works of importance were given from time to time. It must of course be remembered that the chief influence of such a company is in the provinces rather than in London, and as a rule, from this time, the first performances of the Carl Rosa productions took place away from London. Cowen's *'Thorgrim' was the main attraction of a Drury Lane season in 1890; and the production of MacCunn's *'Jeanie Deans' in Edinburgh took place in November 1894. In December 1894, the company again laid London musicians under a great obligation, by producing *'Hänsel and Gretel' with Mozart's early *'Bastien et Bastienne' at Daly's Theatre. In 1896 the same theatre was occupied for a short series of miscellaneous performances. 1897 was an eventful year in the life of the company, and in its course permission was granted to prefix the word 'Royal' to the name. In January 'Die Meistersinger' was given at the Garrick Theatre; in April, Puccini's *'La Bohème' was introduced to England at Manchester, and in October they gave a season at Covent Garden (opening with the work just named), in the course of which MacCunn's *'Diarmid' was produced. After *'Siegfried' (1898) the energy of the company failed for some time. A series of performances of 'popular' operas at the Lyceum in 1899 was attended by no remarkable success; but in November 1900, at the Coronet Theatre, Notting Hill, they introduced Gounod's *'Cinq Mars,' and in the following week, at the Brixton Theatre, gave Goldmark's *'Heimchen am Herd' to the English public. In the following October they gave 'Siegfried,' and in April 1902, Giordano's *'André Chenier' was given for the first time in England. The company's record is an honourable one, and its influence on English music cannot be denied; with rather higher aims, its prestige might have been kept up at the same level that was attained during the founder's lifetime, but the usual temptation to beat successful rivals on their own ground, and to present the 'popular' operas in ultra-'popular' style, was too strong to be quite resisted, and the result has been that the most artistic productions have perhaps been suspected by the cultivated amateurs who were the company's best patrons in former times. M.

ROSA, SALVATOR, was born at Arenella, near Naples, July 21, 1615. His father Vito Antonio de Rosa sent him to be educated at the college of the padri Somaschi. He soon began to study music, and became an expert player of the lute, improvising accompaniments and interludes to his own verses. His ambition to go to Rome

and devote himself seriously to painting seemed on the point of being fulfilled in 1635, when he visited Rome for the first time. But becoming ill, he returned to Naples at the end of six months, and there became a pupil of the painter, Aniello Falcone, until 1637. Then again he went to Rome, and accompanied a friend, Mercurio, in the service of the Cardinal Brancaccio, to Viterbo, where he received a commission to paint an altar-piece.

After a visit to Naples, he was again in Rome in 1638 until September 1640, when he went to Florence to take an appointment as painter to the court of the Medici, a post he held for nearly nine years. During this time he met Filippo Lippi, poet and painter, and Cesti, the musician, and wrote *La Strega*, to which Cesti composed the music, and *Il Lamento*, later on set to music by Bandini. It was probably towards the end of 1640 that he wrote the satire *La musica*, a violent attack on the depraved taste shown in Italian church music. It was not published till some years after Rosa's death, and evidently caused much agitation. It was answered with a bitterness almost equal to its own by Mattheson in his *Mithridat wider den Gift einer welschen Satyre, genannt la Musica*, Hamburg, 1749; in which a German translation of the satire is given, with pages of comments and annotations. The six satires, *La Musica*, *La Poesia*, *La Pittura*, *La Guerra*, *La Babilonia*, and *L'Invidia*, written by Rosa between 1640 and 1669, were probably first published in Rome in 1695; the title-page, without date, and with Amsterdam falsely indicated as the printing place, is as follows: *Satire di Salvator Rosa dedicate a settano. In Amsterdam presso Severo Prothomastix*, 12mo, p. 161. It was followed by numberless unauthorised editions. The first dated edition of 186 pages was printed in Amsterdam by J. F. Bernard in 1719, the second edition is dated 1781, and the third 1790. In 1770 there was an edition *Con note di A. M. Salvini*, printed at Florence, but with Amsterdam on the title-page; this was reprinted in 1781, 1784, and 1787.

Rosa on leaving Florence was in Volterra for a time, and then returned to Rome in February 1649. The year 1647 was certainly passed peaceably in Tuscany, in spite of the legend which has it that Rosa was at Naples during the insurrection in July 1647, and was one of the 'compagnia della morte' under the leadership of the painter Falcone. To begin with, no such company existed, and secondly, there are letters preserved, written by Rosa to his friend Maffei, one from Pisa, on Jan. 9, 1647, and another from Florence, on Sept. 26, 1647, in which the tumults at Naples are not even alluded to (Cesareo, *Poesie e lettere*, 1892, p. 55). In 1650 Rosa again visited Florence, Pisa, and Siena, returning to Rome in December,

where he worked at his painting, finding relaxation in writing songs to which either he or his friend Cavalli, then in Rome, composed the airs.

Rosa died in Rome on March 15, 1673, at the age of fifty-eight, and was buried in the church of Santa Maria degli Angioli alle Terme di Diocleziano.

Little of Rosa's music is known, with the exception of the songs published in the 'Gemme d'antichità' and other modern collections. His position, however, was one of some musical interest. A personal friend of some of the leading composers of the time—Cavalli, Cesti, Bandini and others—he was so far in touch with the new ideas just germinating, as to adopt the method of writing for a single voice with *basso continuo* accompaniment.

In 1770 Dr. Burney acquired from a great-grand-daughter of Rosa, occupying the same house on the Monte Santa Trinità in Rome in which he had lived and died, a musical manuscript in Rosa's handwriting, containing, besides airs and cantatas by Cesti, Rossi, etc., eight cantatas written and composed by Rosa himself. The airs are melodious and vivacious, and have a good deal of charm. Burney (*Hist. of Music*, iv. pp. 165-8) gives the music of a certain number of them; they were also included by N. d' Arienzo in his paper on Rosa in the *Rivista Mus. Ital.* 1894, i. 389.

The better-known airs are 'Vado ben spesso,' printed by Dr. Crotch in *Specimens of Various Styles*, 1808. Edited by H. Bishop in 'Gemme d'antichità,' No. 26, and in *La scuola antica*, No. 24, also in Marx's *Gluck und die Oper*, 1863. Beilage, No. 2. 'Star vicino,' edited by W. H. Calcott, 'Gemme,' No. 27. And 'Selve voi che,' edited by J. Pittmann, London, 1878. A manuscript copy of the latter is in the Vienna Imperial Library, No. 19,242 in Mantuani's catalogue. C. S.

ROSALIA (Germ. *Vetter Michel*, *Schusterfleck*). A form of melody, vocal or instrumental, in which a figure is repeated several times in succession, transposed a note higher at each reiteration.

The name is derived from an old Italian Canto popolare, 'Rosalia, mia cara,' the Melody of which is constructed upon this principle.

The well-known German Volkslied, 'Gestern Abend war Vetter Michel da,' begins with a similar repetition, and hence the figure is frequently called in Germany, 'Vetter Michel.' These titles, as well as that of 'Schusterfleck'—a cobble—are of course given to it in derision—for writers on composition regard its frequent introduction as indicative of poverty of inventive power. Nevertheless, it is frequently employed by the great masters, with charming effect, as

may be seen in the Minuet in Handel's 'Ariadne,' in which it will be observed that this figure is suffered to appear three¹ times only in succession. Almost all great writers have imposed this limit upon its employment, experience having proved that a fourfold repetition generally tends to render the passage wearisome. Strikingly effective instances of threefold repetition will be found, in Mozart's Requiem, at the words 'Ingemisco tamquam reus'; in Spohr's 'Last Judgment,' at 'The grave gives up its dead'; and in a remarkably forcible passage in the 'Rigaudon' from Rameau's 'Dardanus.' Still, this restriction is frequently disregarded. Vallerano has left a Canon,² which ascends a Tone higher at each repetition, *ad infinitum*; and the resulting effect is far from inharmonious, though the work must be regarded rather as a musical curiosity than a serious composition.

Closely allied to this figure is another, in which the leading phrase is transposed one or more notes lower at each repetition; as in 'Habbiam vinto' from Handel's 'Scipio,' in which the transposition proceeds by thirds.

Here, again, the figure breaks off after a threefold reiteration; and, in two cases in which Mozart has employed the same device, in his Requiem—at the words 'Qui Mariam absolvisti,' and 'Oro supplex et acclinis'—it is relinquished after the second enunciation. [For a fivefold repetition see the Branle given under FORM, vol. ii. p. 75a.] This kind of imitation is, indeed, subject to exactly the same form of treatment as the true Rosalia; though it would be inexact to call it by that name, and equally so to apply the term to the regular ascents or descents of a sequence—as constantly exhibited in the fugues of Seb. Bach; or to those of vocal divisions—as in 'Every Valley,' or Rossini's 'Quis est homo'; or to the scene, in 'Tannhäuser,' in which the stanzas of 'Dir töne Lob' are sung a note higher at each repetition.

Schumann was accused of writing Rosalie *usque ad nauseam*. He does employ them very frequently: but often—as in the opening of his 'Arabeske' (op. 18)—with an effect which true genius alone could have dictated. This is not the place for a detailed criticism of Schumann's principles of composition: but when—as in a bitter article, by Joseph Rubinstein, which appeared in *Bayreuther Blätter*—his masterly use of this particular device is made

to serve as an excuse for its unqualified condemnation, as a 'vicious monotony-producing repetition of musical phrases on related degrees, which the student of composition loves to introduce in his first exercises,' we naturally revolt from a conclusion so illogical. That a form which neither Handel, nor Mozart, nor Beethoven, nor any other great writer has disdained to employ, can possibly be, in its own nature, 'vicious,' we cannot believe. With equal reason might we condemn the 'monotony-producing' effect of a regular figure. It is, indeed, quite possible to make such a figure monotonous to the last degree; yet nearly the whole of Beethoven's 'Andante in F' (op. 34), is founded on the rhythmic form of the first four notes of the opening subject. The truth is, that, in the hands of a great master, all such devices are made productive of pure and beautiful effects; while all are 'vicious' when viciously misused.

W. S. R.

ROSAMOND. An opera by Joseph Addison, music by Thomas Clayton; produced at Drury Lane Theatre on March 4, 1707, but only ran three nights.

Thomas Augustine Arne, many years later, took the libretto for one of his early musical efforts; and produced a work that bore considerable promise of his future excellence.

His setting of the opera was given at the Little Theatre in the Haymarket, on March 7, 1733.

F. K.

ROSAMUNDE FÜRSTIN VON CYPERN (Rosamond, Princess of Cyprus). A romantic play in four acts; written by Wilhelmine Christine von Chezy, the overture and incidental music by Franz Schubert (op. 26). Produced at the Theatre an-der-Wien, Vienna, Dec. 20, 1823, and only performed twice. The music as then played is as follows:—

- * 1. Overture (D minor).
- † 2. Entr'acte between Acts 1 and 2 (B minor).
- † 3. Ballo (B minor), and Andante un poco assai (G).
- 4. Entr'acte between Acts 2 and 3 (D).
- * 5. Romance for soprano, 'Der Vollmond strahlt' (F minor).
- * 6. Chorus of Spirits.
- * 7. Entr'acte between Acts 3 and 4 (E♭).
- 8. Shepherds' Melody.
- * 9. Shepherds' Chorus.
- * 10. Huntsmen's Chorus.
- † 11. Air de Ballet (G).

This overture played at the performances was published in 1827, for PF. four hands, by Schubert himself, as op. 52, under the title of 'Alfonso und Estrella' (now op. 69). The overture (in C), known as the 'Overture to Rosamunde' (op. 26) was composed for the melodrama of the 'Zauberharfe,' or Magic Harp (produced August 19, 1820), and was published by Schubert with its present name and opus-number for PF. four hands, in 1828. The pieces marked have been published—those marked with * by Schubert himself, as op. 29; those marked with † more recently. For parti-

¹ Sometimes called 'Les trois Réverences.'

² Reprinted in vol. i. of Clementi's *Practical Harmony*.

culars *see Nottebohm's Thematic Catalogue, pp. 46, 84. The Entr'acte in B minor is one of the finest of all Schubert's works; the Romance, the Entr'acte No. 7, the Shepherds' Melody, and the Air de Ballet (in G), are all admirable, the Shepherds' Melody for two clarinets especially characteristic. The second Trio to the Entr'acte No. 7 was previously composed, in May 1819, as a song, 'Der Leidende.' G.¹

ROSE or KNOT (Fr. *Rosace*; Fr. and Germ. *Rosette*; Ital. *Rosa*). The ornamental device or scutcheon inserted in the sound-hole of the belly of stringed instruments, such as the lute, guitar, mandoline, dulcimer, or harpsichord, serving not only a decorative purpose, but—in the Netherlands especially—as the maker's 'trade mark.' In the harpsichord and spinet there was usually but one sound-hole with its rose; but owing to the origin of these keyboard instruments from the psaltery, their analogy with the lute, and the fact of the Roman lutes having three, several sound-holes were sometimes perforated. In fact, a harpsichord dated 1531 was seen in Italy by the eminent art critic, Mr. T. J. Gullick, which possessed no less than five, each with a rose inserted. From the analogy above referred to, the old Italian harpsichord makers named the bottom of the instrument 'cassa armonica' (sound-chest); as if its office were like that of the back of the lute or viol, while the belly was the 'piano armonico' (sound-flat).² The Flemings, retaining the sound-hole, doubtless adhered more or less to this erroneous notion of a sound-chest. The Hitchcocks in England (1620 and later) appear to have been the first to abandon it; no roses are seen in their instruments. Kirkman in the next century still adhered to the rose and trade scutcheon, but Shudi did not. In the *Giornale de' Letterati d' Italia* (Venice, 1711, tom. v.), Scipione Maffei, referring to Cristofori, who had recently invented the pianoforte, approves of his retention of the principle of the rose in his ordinary harpsichords, although contemporary makers for the most part had abandoned it. But Cristofori, instead of a large rose, to further, as he thought, the resonance, used two small apertures in the front. Under the head RUCKERS will be found illustrations of the rose or *rosace*, as used by those great makers.

A. J. H.

ROSE OF CASTILE. An opera in three acts; compiled by Messrs. Harris & Falconer (from 'Le Muletier de Tolède'), music by M. W. Balfe. Produced at the Lyceum Theatres (Pyne and Harrison), London, Oct. 29, 1857. G.

ROSE OF PERSIA, THE. Comic opera in two acts, libretto by Basil Hood, music by Arthur Sullivan, produced at Savoy Theatre, Nov. 29, 1899.

ROSEINGRAVE or ROSINGRAVE, DANIEL, Church musician and organist. The exact date of his birth is not known. He received his early musical education as one of the children of the Chapel Royal; though whether before 1660, under Captain Cook, or after that date, under Pelham Humfrey, is uncertain. He is stated subsequently to have studied under Dr. John Blow and Henry Purcell. He was organist of Gloucester Cathedral from 1679 to 1681, of Winchester Cathedral from 1682 to 1692, of Salisbury Cathedral from 1692 to 1698, was appointed organist and Vicar-choral of St. Patrick's Cathedral, Dublin, in the year 1698, and organist and stipendiary of Christ Church Cathedral, Dublin, in the same year. He retired from the organistship of St. Patrick's in 1719 in favour of his son Ralph, but remained organist of Christ Church until his death in 1727. He married Ann, daughter of the Rev. Thomas Washbourne, D.D., who survived him, and by whom he had several children, including his sons Thomas and Ralph, who were also distinguished musicians. There appear to have been Roseingraves in Ireland before Daniel Roseingrave's time, as mention is made in the Chapter Acts of Christ Church of a lease from the Dean and Chapter to one Ralph Roseingrave in 1661.

Daniel Roseingrave succeeded Robert Hodge as organist of St. Patrick's. Hodge, who resigned the post of organist, was thereupon appointed 'Master of the song to the Quire,' apparently as a *solatium* for losing the post of organist. The arrangement does not appear to have been a happy one, for in 1699 we find a Chapter Act in the following words: 'The said Dean and Chapter having received information that Mr. Hodge and Mr. Rosingrave, two of the Vicars-choral, gave each other very scurrilous language in Christ Church, Dublin, and after went together to the tavern and there fought, upon which the said Hodge and Roseingrave were ordered to appear before the said Dean and Chapter to answer in their places touching such their misdemeanours. And upon hearing what they could severally say for themselves touching the matter. And it thereupon appearing to the said Dean and Chapter that Mr. Roseingrave was ye first and chief aggressor, and that also the said Mr. Hodge was to blame. It was thereupon ordered by the aforesaid Dean and Chapter that the said Mr. Daniell Roseingrave should forthwith pay into the hands of ye steward of the said Vicars choralls the sume of three pounds and the said Mr. Hodge the sume of 20s. sterling for a penall mulct for such their offences, the same to be disposed of as the said Dean shall think fitt, and that the said Mr. Roseingrave should then and there beg publick pardon of the said Mr. Hodge for the scurrilous language hee gave him as aforesaid, which was accordingly done in the presence of the said Dean and

¹ [Sir George Grove, with characteristic modesty, here omits all reference to the fact that he himself discovered the missing portions of the music. See vol. II. p. 247b, and *infra*, p. 301a.]

² In modern Italian we more frequently meet with 'tompagno,' 'tavola armonica,' and 'fondo,' meaning 'belly,' or 'sound-board.'

Chapter.' Robert Hodge, it may be mentioned, had previously, when organist of Wells Cathedral (1688), been corrected and admonished for breaking windows.

At Christ Church Cathedral Roseingrave appears to have been equally combative. By a Chapter Act in 1700 the Dean and Chapter, on hearing the Petition of Daniel Roseingrave complaining of assault by Mr. Thomas Finell, 'ordered on hearing the Petition of Daniel Roseingrave and examination of several witnesses that the said Daniel Roseingrave and Thomas Finell be and are hereby suspended *ab officio et beneficio*'; and further ordered 'that from henceforth no Vicar or Stipendiary of this Church do wear a sword under the penalty of expulsion.' This suspension was subsequently removed on payment of 'mulets' by the offending parties.

By his will, dated Oct. 21, 1724, Daniel Roseingrave left the house in Peter Street, Dublin, in which he then dwelt, to his 'second son Ralph,'¹ to whom he also left the residue of his property, subject to his providing an annuity of £20 for his (Daniel's) wife, the said Ann Roseingrave. To his 'eldest son Thomas' he only left five shillings. Daniel Roseingrave died in 1727, at Golden Lane (the same street where, fifty-five years later, John Field was born), and was buried in the churchyard of St. Bride's Church. His widow died in 1732-3, and was buried in the old churchyard in St. Patrick's Cathedral.

Although Daniel Roseingrave seems to have written a great deal of church music, and is highly spoken of as a composer by Burney and Hawkins, very little of his music is now extant. One of his anthems, 'Lord, Thou art become gracious,' is preserved in manuscript in the library of Christ Church, Oxford, and another, 'Haste Thee, O Lord,' in the Bodleian library. Mr. J. S. Bumpus has autograph scores of four other anthems of his.

By a Chapter Act of Christ Church, Dublin, dated Dec. 15, 1699, it is ordered 'that the Proctor do pay unto Mr. Daniel Roseingrave three pounds as a gratuity for his writing three services and two Creeds for the use of the Church. Unfortunately all traces of these compositions have long since disappeared. L. M'C. L. D.

ROSEINGRAVE, THOMAS (1690 to 1766), the second son of Daniel Roseingrave, was born at Winchester in 1690. At the age of seven he came with his father to Dublin, and from him received his early education in music. Thomas Roseingrave entered Trinity College, Dublin, in 1707, and his then age is given in

¹ Although in his will Daniel describes Ralph as his 'second son,' his eldest son was DANIEL ROSEINGRAVE, JUNIOR, who was born at Winchester in 1685, entered Trinity College, Dublin, in 1702, obtained a scholarship in 1708, and took out his B.A. degree in 1707. He was, doubtless, the 'young Roseingrave' who appears by the College Register to have been appointed organist of Trinity College Chapel in 1705, as in that year Thomas was only fourteen, and Ralph still younger. In 1707 he was given leave of absence for one year, 'in order to improve himself in music.' He had probably died some years before 1724, the date of his father's will.

the College Register as sixteen. He did not, however, proceed to his degree in Arts.

In a Chapter Act of St. Patrick's Cathedral, dated 14th December 1709, it is ordered by the Dean and Chapter 'that whenever Thomas Roseingrave sonn of Daniell Roseingrave, the present organist of the said Cathedrall, being minded to travell beyond seas to improve himself in the art of music, and that hereafter he may be useful and serviceable to the said Cathedrall, yt tenne guineas be by the Proctor of the said Canonry given him as a guift from the said Canonry towards bearing his charges.' He went to Italy in 1710, and at Venice made the acquaintance of the Scarlattis, Alessandro and Domenico. For the latter he appears to have formed a great admiration. Burney (*History of Music*, iv. p. 263) says, that he 'followed him to Rome and Naples, and hardly ever quitted him while he remained in Italy, which was not till after the Peace of Utrecht, [1713], as appears by an anthem which he composed at Venice in 1713, "Arise, shine, for thy light is come." The manuscript of this anthem, which he wrote with orchestral accompaniment, is preserved in the Tudway collection (Harl. MS. 7342). Burney says of it, 'There is much fire in the introductory symphony, which is of a very modern cast.' How long he continued abroad is not exactly known, but in 1720 we find him in London, where he produced, at the Haymarket Theatre, Domenico Scarlatti's opera, 'Narciso,' with two additional songs and two duets of Roseingrave's own composition.

As a composer and organist he appears to have been held in high estimation, his powers of reading at sight and of improvising being especially dwelt on by his contemporaries.

Burney says: 'In his younger days, when he enjoyed the *mens sana in corpore sano*, he was regarded as having a power of seizing the parts and spirit of a score, and executing the most difficult music at sight, beyond any musician in Europe.'

In 1725 he was appointed the first organist of St. George's, Hanover Square. There were seven other competitors, all of whom had to give a performance on the organ before Dr. Greene, Dr. Pepusch, and Mr. Galliard, who acted as judges. Burney says that Roseingrave's performance of the set pieces was by no means good, but that when he was asked to improvise on given themes, he 'treated the subjects with such science and dexterity, inverting the order of notes, augmenting and diminishing their value, introducing counter subjects, and treating the themes to so many ingenious purposes, that the judges were unanimous in declaring him the victorious candidate.'

Archdeacon Cox, in his *Anecdotes of George Frederick Handel and John Christopher Smith*, speaking of Roseingrave at this time, says:—

'His reputation was at this period so high that on commencing teaching he might have gained one thousand pounds a year, but an unfortunate event reduced him to extreme distress. Among Roseingrave's scholars was a young lady to whom he was greatly attached, and whose affections he had gained, but her father, who intended to give her a large fortune, did not approve of her marrying a musician, and forbade Roseingrave his house. This disappointment affected his brain, and he never entirely recovered the shock. He neglected his scholars and lost his business. He lived upon fifty pounds per annum, which his place produced, and was often in indigence. He was perfectly rational upon every subject but the one nearest his heart; whenever that was mentioned he was quite insane.'

About the year 1737 he was compelled to give up the organistship, and lived for some time at Hampstead. Thence in about the beginning of 1753 he removed to Dublin, where he probably lived with his nephew, William Roseingrave, a son of Ralph's, who was born in 1725 and at this time (1753) held the Office of Chief Chamberlain of the Exchequer Court.

Mrs. Delany, in her memoirs, under date Jan. 12, 1753, writes:—'Mr. Roseingrave, who was sent away from St. George's Church on account of his mad fits, is now in Ireland, and at times can play very well on the harpsichord' (*Correspondence*, iii. 194). Faulkner's *Dublin Journal* of Feb. 3, 1753, contains an announcement that 'the celebrated Opera of "Phaedra and Hippolytus," composed by Mr. Roseingrave lately arrived from London, will be performed at the Great Music Hall in Fishamble Street, and conducted by himself on Tuesday the 6th of March. Between the acts Mr. Roseingrave will perform Scarlatti's "Lessons on the Harpsichord," with his own additions, and will conclude with his celebrated "Almand." And in the same *Journal* of Feb. 27, we read:—'Yesterday there was a public rehearsal of Mr. Roseingrave's Opera of "Phaedra and Hippolytus" at the great Music Hall in Fishamble Street, to a numerous audience, which met the highest applause, the connoisseurs allowing it to exceed any musical performance ever exhibited here, in variety, taste, and number of good songs.' One wonders if the writer of this notice had been at the production of the 'Messiah' in the same hall eleven years earlier.

Two anthems of Thomas Roseingrave ('Great is the Lord' and 'One Generation') are included in the manuscript collection of Anthems in the Library of the Royal College of Music. He was an enthusiastic admirer of Palestrina, and is said to have adorned the walls of his bedroom with scraps of paper containing extracts from the works of that master.

He died on June 26, 1766, and is buried in the churchyard of St. Patrick's Cathedral, in the same grave with his brother Ralph. The inscription on the tombstone adds that he died in the 78th year of his age, 'a most celebrated musician and accomplished man.' Although an inscription added to this tombstone at a later date (1802) states that his wife, Mrs. Jane Roseingrave, is also buried there, this is incorrect, as the Jane Roseingrave in question was the wife of the before-mentioned William Roseingrave, who died in 1780, and is buried in an adjoining grave. Thomas Roseingrave does not appear to have been married.

The most important of his published compositions are:—Fifteen Voluntaries and Fugues for the organ or harpsichord; six double Fugues for the organ or harpsichord; the Opera 'Phaedra and Hippolytus'; eight suits of lessons for the harpsichord or spinet; six cantatas (Italian words); the additional songs and duets sung with Scarlatti's Opera 'Narciso'; and twelve solos for the German flute with thoroughbass for the harpsichord. He edited the 'Forty-Two Suits of Lessons for the Harpsichord by Domenico Scarlatti,' prefixing an introductory movement in G minor. L. M'C. L. D.

ROSEINGRAVE, RALPH (about 1695 to 1747), the youngest son of Daniel Roseingrave, was born at Salisbury, and received his musical education from his father. In 1718-19 Daniel Roseingrave petitioned the Dean and Chapter of St. Patrick's Cathedral, Dublin, to allow him to resign the post of organist in favour of his son Ralph, who appears to have been forthwith appointed Vicar-Choral, but did not formally succeed his father as organist until 1726. On his father's death in 1727 he also succeeded him as organist of Christ Church Cathedral, Dublin, at a salary of fifty pounds per annum. He appears to have written a good deal of church music. Eight of his Anthems and two Services in C and F are preserved at Christ Church, and some of them are still sung there. Another anthem of his, 'O God of Truth,' is published in Hullah's Part Music, and an old organ hook in the possession of Mr. J. S. Bumpus contains a Service of his in F with a setting of the Benedicite. He died in 1747, and is buried in the churchyard of St. Patrick's Cathedral. The headstone mentions that his wife Sarah, who died in 1746, and four of their children, are buried with him, as are also his mother Ann Roseingrave, and his brother Thomas. Ralph Roseingrave is sometimes mentioned as having taken part as a soloist in the production of the 'Messiah' on April 13, 1742, but Dr. J. C. Culwick, in his pamphlet on the original *Word Book of Handel's 'Messiah'* (1891), points out the improbability of his having done so. L. M'C. L. D.

ROSELLEN, HENRI, son of a PF. maker, born in Paris, Oct. 13, 1811; took second PF. prize at the Conservatoire, 1827, and first

harmony do. 1828. Was a pupil and imitator of Herz. He published nearly 200 works for PF., including a 'Méthode de Piano' (Heugel), a collection of progressive exercises entitled 'Manuel des Pianistes' (*Ibid.*), a trio for piano and strings, and many separate pieces of drawing-room character, one of which, a *Réverie* (op. 32, No. 1), enjoyed an extraordinary popularity for many years over the whole of Europe. He died in Paris, March 18, 1876. G.

ROSENHAIN, JACOB, eldest son of a banker, was born at Mannheim, Dec. 2, 1813. His teachers were Jacob Schmitt, Kalliwoda, and Schnyder von Wartensee. His first appearance as a pianoforte-player was in 1823 at Frankfort, where his success induced him to take up his residence. A one-act piece of his, 'Der Besuch im Irrenhause,' was produced at Frankfort, Dec. 29, 1834, with great success; his second, 'Liswenna,' three acts, was never performed in its original form. In 1837 he came to London, played at the Philharmonic, April 17, and was much heard in the concerts of the day. After this he took up his abode in Paris, where he became very prominent, giving chamber concerts in combination with Alard, Ernst, and other eminent players, and carrying on a school of pianoforte-playing in conjunction with J. B. Cramer. His early opera, 'Liswenna,' was provided with a new libretto (by Bayard and Arago), and brought out at the Grand Opéra as 'Le Démon de la Nuit,' March 17, 1851. It had, however, but a moderate success, and was withdrawn after four representations, though it was afterwards occasionally played in Germany. Another one-act piece, 'Volage et Jaloux,' produced at Baden-Baden, August 3, 1863, completes the list of his works for the stage. In instrumental music he was much more prolific. He composed three symphonies—in G minor (op. 42), played at the Gewandhaus, Leipzig, under Mendelssohn's direction, Jan. 31, 1846; in F minor (op. 43), played at Brussels, and at the Philharmonic, London, April 24, 1854; 'Im Frühling,' in F major (op. 61), rehearsed at the Conservatoire, and played at a Concert Populaire. Four trios for PF. and strings; one PF. concerto; three string quartets; two violoncello sonatas; twelve characteristic studies (op. 17) and twenty-four *Études mélodiques* (op. 20), both for PF. solo; a PF. concerto, op. 73; Sonata, op. 74; do. PF. and violoncello, op. 98; 'Am Abend' for quartet, op. 99. Also various pieces for piano entitled, 'Poèmes,' 'Réveries,' etc.; a biblical cantata, and various songs, etc. [He died at Baden-Baden, March 21, 1894.] Schumann criticised several of his pieces with kindness and liberality. G.

ROSENMÜLLER, JOHANN, was born of poor parents about 1619 at Pelsnitz in the Vogtland of Saxony. In spite of the poverty of his parents the arrangements of the time enabled him to obtain a good general education,

and in 1640 his name appears inscribed in the Matriculation-book of the University of Leipzig. In 1642 he became Collaborator or Assistant-Master at the Thomasschule. In musical matters he would appear to have been mainly a pupil of Tobias Michael, who then held the important office of Cantor at the school. In 1645 Rosenmüller published his first work, a work for instruments entitled, 'Paduanen, Alemanden, Couranten, Balletten, Sarabanden mit 3 Stimmen und ihrem Basso pro Organo.' A more important work was his 'Kernsprüche,' published in two parts, 1648 and 1652-53, each part consisting of twenty Latin and German Motets on Scripture and other Church Texts for three to seven voices, mostly with accompaniment of two violins, and also occasionally trombones and other instruments with Basso Continuo. When Tobias Michael became too infirm to discharge adequately his duties as Cantor, Rosenmüller acted as his deputy, and in this position gave such satisfaction to the city council as to obtain the promise of succession to the Cantorship. In 1651 he also held the post of organist at the Nikolaikirche. But in May 1655 his prospects of further promotion were blighted by an accusation made against him of some grave moral offence, for which he was temporarily imprisoned. He succeeded in effecting his escape, and betook himself for a time to Hamburg. From Hamburg he is said to have addressed a 'Supplication' to the Elector of Saxony, Johann Georg I., along with a setting of the Hymn of Albinus, 'Straf mich nicht in deinem Zorn.' This would almost seem to be an admission of his guilt, although Winterfeld in his *Evangelischer Kirchengesang* endeavours to prove him innocent of the charge made against him. However the case may be, Rosenmüller did not feel himself safe in Hamburg, but fled to Italy, and settled in Venice as a teacher of music for a considerable number of years. Of his stay in Venice little would have been known if Johann Philipp Krieger, who was afterwards Capellmeister at Weissenfels, had not sought him out and become his pupil in composition. A large number of works existing only in MSS., consisting of Latin Motets, Vesper Psalms, Lamentations, and various parts of the Mass, must be referred to this Venetian stay. The only work published in Venice was one for instruments, entitled 'Sonate da Camera cioe Sinfonie, Alemande, Correnti, Balletti, Sarabande da suonare con 5 strom. da arco et altri' . . . 1670. This work was dedicated to Duke Johann Friedrich of Brunswick, who became acquainted with the composer on the occasion of one of his visits to Venice. It has recently been republished as *Bd. xviii.* of the *Denkmäler deutscher Tonkunst, Erste Folge*, where also in his introduction the editor Karl Nef traces the influence of the Venetian opera-symphonies upon Rosenmüller's

style of instrumental composition. The acquaintance with Duke Johann Friedrich had important consequences for Rosenmüller. It led to his recall to Germany. Duke Johann Friedrich recommended him to his brother the reigning Duke Anton Ulrich, who was an enlightened patron of literature and music, and himself a hymn-writer of some reputation. In 1674 Duke Anton Ulrich appointed Rosenmüller Capellmeister at Wolfenbüttel, where he remained for the rest of his life, dying there on 10th or 11th of September 1684. Only one other work was published in this later period of his life, 'Sonate a 2, 3, 4, e 5 Stromenti da Arco et altri . . . Nuremberg, 1682,' dedicated to his patron Duke Anton Ulrich. A large number of German Motets and Cantatas belonging to this time remained unpublished. None of Rosenmüller's vocal works have yet been republished in modern editions, with the exception of two Chorale-tunes and settings—'Straf mich nicht in deinem Zorn' and 'Welt ade, ich bin dein müde.' The former of these tunes indeed seems far less suitable to its original German words than to those of the Easter hymns to which it has been so successfully adapted in our English hymn-books, 'Christ the Lord is risen again.' Of Rosenmüller's 5-voice setting of 'Welt ade' it would appear that Sebastian Bach thought so highly that he took it over bodily from Vopelius' 'Leipziger Gesangbuch,' 1682, to incorporate it into his own church-cantata of 1731, 'Wer weiss, wie nahe mir mein Ende.' This led to both tune and setting being afterwards ascribed to Bach in earlier editions of his 'Choral-gesänge.' J. R. M.

ROSENTHAL, MORIZ, born Dec. 18, 1862, at Lemberg, where his father was a professor in the chief Academy. From him Rosenthal obtained the solid foundation of the philosophical turn of mind which early in his career became very fully developed. At eight years of age the boy began the study of the pianoforte under a certain Galoth, whose method was curious in that he permitted his pupil absolute freedom in sight-reading, transposing, and modulating, without paying over-much attention to the systematic development of his technique. All who have heard the pianist in later life will agree that this system did no harm, for it is probable that there has never lived a player possessing a more perfect technique. Beethoven, Weber, and others were one and all boldly attacked by the youth, who as yet knew not a syllable of the conventional methods of fingering either chords or scales. In 1872 Carl Mikuli, the editor of Chopin, who was then director of the Lemberg Conservatorium, took charge of Rosenthal's education, and within the same year played in public with him Chopin's Rondo in C for two pianos. All this time, however, nothing had been determined as to Rosenthal's ultimate career, and it was only on

the urgent advice of Rafael Joseffy that the parents consented to Rosenthal's adoption of a career as pianist. When, in 1875, the family moved to Vienna, Rosenthal became a pupil of Joseffy, who set to work systematically to ground the boy on Tausig's method. The results were astonishing enough, since in 1876 Rosenthal played at his first public recital Beethoven's thirty-two Variations, Chopin's F minor concerto, and some Liszt and Mendelssohn. Promptly a tour followed through Roumania, where at Bucharest the king created the fourteen-year-old lad court-pianist. In the next year Liszt came into Rosenthal's life, and henceforth played a great part therein, and in 1878 and subsequently they were together in Weimar and Rome. As Liszt's pupil Rosenthal then appeared in Paris, St. Petersburg, and elsewhere.

Meanwhile the philosophical studies were by no means neglected, for in 1880 Rosenthal qualified at the Staatsgymnasium in Vienna to take the philosophical course at the University, where he studied with Zimmermann, Brentano, and Hanslick (musical aesthetics). Six years elapsed before he resumed public pianoforte-playing. Then there followed in quick succession, after a triumph in the Liszt Verein at Leipzig, a long series of concert-tours, in America and elsewhere, which brought him ultimately to England in 1895 and to America again later, where in the spring of the present year (1907) he was making a remarkably successful tour. As a master of technique Rosenthal is not surpassed by any pianist of his time, while as an interpreter, especially of music of the modern composers and of Schubert, he has earned a prodigious reputation. To his great technical accomplishment he adds a beautiful touch, and to those who know him personally he is a musician of unquestionable distinction.

R. H. L.

ROSES, JOSE, priest and musician, born at Barcelona, Feb. 9, 1791, learned music from Sampere, chapelmaster at Barcelona; was first organist of the monastery of San Pablo and then succeeded his master at Santa Maria del Pino, a post which he held for thirty years. During this time he composed a large quantity of music—masses, requiems, motets, graduales, etc., which are preserved in MS. in the church. Among his pupils may be mentioned Calvo, Puig, Rius, Casanovas, etc. He died at his native city, Jan. 2, 1856.

G.

ROSIN, RESIN (Fr. *Colophane*), a preparation applied to the hair of the violin bow to give it the necessary 'bite' upon the strings. Without some such agent, the horsehair would slip noiselessly over the catgut. Rosin is the residuary gum of turpentine after distillation. The ordinary rosin of commerce is a coarse, hard substance, quite useless to the fiddler, for whom the rough material undergoes a process of refinement. The ancient English recipe was to boil

rough rosin down in vinegar, a process no longer in vogue, as excellent French rosin is now to be had at a very trifling cost. It is prepared by dissolving the rough article in a glazed earthen vessel over a slow charcoal fire. As it melts, it is strained through coarse canvas into a second vessel also kept at a moderate heat, from which it is poured into pasteboard or metal moulds. The process requires some delicacy of eye and hand, and the greatest care in handling so inflammable a material, and is usually entrusted to women. Some players affect to prefer the rosin of Gand, others that of Vuillaume, but both are made of the same material and at the same factory. Rosin should be transparent, of a darkish yellow colour in the mass, and quite white when pulverised: it ought to fall from the bow, when first applied to the strings, in a very fine white dust: when crushed between the fingers it ought not to feel sticky. The best rosin is made from Venetian turpentine. The same sort of rosin serves for the violin, viola, and violoncello. The double-bass bow requires a stiffer preparation than pure rosin, and accordingly double-bass rosin is made of ordinary rosin and white pitch in equal proportions. Emery powder and other matters are sometimes added in the composition of rosin, but are quite unnecessary, and even injurious to the tone. A liquid rosin, applied to the bow with a camel's-hair brush, has its advocates. [See COLOPHANE, vol. i. p. 565.]

E. J. P.

ROSINA. An English ballad opera, of the 18th century, which attained an extraordinary degree of popularity, holding the boards, as a stock piece, for nearly half a century. The libretto, written by Mrs. Brooke, is founded on the Scriptural story of Ruth and Boaz; or of Palemon and Lavinia, in Thomson's 'Seasons,' a subject which has inspired numbers of theatrical pieces.

The opera was first produced at Covent Garden in 1783, and its music was written, selected, and arranged by William Shield. Miss Harper took the title-rôle; Mrs. Martyr, Phœbe, and Mrs. Kennedy the hero, William, while the rest of the male characters were taken by Messrs. Banister, Brett, and Davies.

A passage in the overture has long been a bone of contention. It is arranged for the oboe, with a bass for 'bassoon, etc. to imitate the bagpipe.' This fragment of melody is exceedingly like that of 'Auld Lang Syne,' and it has, therefore, been contended that Shield was the author of the air for the celebrated Scotch song. This is, however, scarcely proven, for there exist in prior publications other strathspeys, as 'The Miller's Daughter,' and 'The Miller's Wedding,' which also resemble the well-known air, and these, together with a song, are also prototypes of the Scotch national melody.

F. K.

ROSS, JOHN, born at Newcastle-upon-Tyne,

Oct. 12, 1763, was placed in his eleventh year under Hawdon, organist of St. Nicholas Church, a disciple of Charles Avison, with whom he studied for seven years. In 1783 he was appointed organist of St. Paul's Chapel, Aberdeen, where he remained until his death, July 28, 1837. He composed 'An Ode to Charity,' pianoforte concertos and sonatas, songs, canzonets, hymns, waltzes, etc. W. H. H.; additions from *Brit. Mus. Biog.*

ROSSETER, PHILIP, a lutenist, born about 1575, in 1601 issued 'A Booke of Ayres, set foorth to be song to the Lute, Orpherian, and Base Violl,' containing forty-two songs, the poetry and music of the first twenty-one by Campion, and the rest by Rosseter himself. [A selection of eight of the forty-two songs was reprinted in 1907, as vol. iv. of the Oriana Madrigal Society's publication, 'Euterpe' (Breitkopf & Härtel)]. In 1609 he published 'Lessons for Consort: Made by sundry excellent Authors, and set to sixe severall instruments; Namely, the Treble Lute, Treble Violl, Base Violl, Bandora, Citterne, and the Flute.' On Jan. 4, 1610, a patent was granted to him and others appointing them Masters of the Children of the Queen's Revels, under which they carried on dramatic performances at the theatre in Whitefriars. In March 1612, Rosseter's company was joined by 'The Lady Elizabeth's Servants,' but the union lasted for a year only. In May 1615 a privy seal for a patent for the erection of a theatre in Blackfriars was granted to Rosseter, Philip Kingman, Robert Jones, and Ralph Reeve, but the Lord Mayor and Aldermen compelled them to surrender it, when the building was nearly finished. [See JONES, ROBERT, vol. ii. p. 544, where the date of the patent is to be corrected.] Rosseter died on May 5, 1623. (Corrections, etc. from *Dict. of Nat. Biog.*) W. H. H.

ROSSI. No fewer than twenty-eight musicians of this name are enumerated in the *Quellen-Lexikon*, and as there are motets and other works in various libraries attributed to 'Rossi' without further identification, there is still a large field open for careful research before the facts can be absolutely ascertained. Of these older bearers of the name there are seven who may be distinguished as important: (1) **SALOMONE**, a Jewish musician, was at the court of Mantua from 1587 to 1628, when he appears to have died. He enjoyed such high favour with two successive dukes that he was privileged to dispense with the yellow badge that all Jews were ordered to wear. He issued madrigals and canzonets in 1589, 1600, 1602, 1603, 1610, 1614, and 1628, but his most important works were instrumental, being contained in four books, called 'Sinfonie e Gagliarde' and 'Sonate' (1607, 1608, 1623, and 1636). He wrote twenty-eight compositions (a 4-8) to Hebrew psalms, published in two editions, in

Hebrew and Italian, in 1623. The authority for his life is Birnbaum's *Jüdische Musiker am Hofe zu Mantua*. A selection from his vocal music was published in 1877 by S. Naumburg and Vincent d'Indy, and examples of his instrumental music are included in Riemann's 'Alte Kammermusik.' (2) GIOVANNI BATTISTA, a monk, born at Genoa, who published in 1618 at Venice a book on mensural notation, *Organo de cantori per intendere da se stesso ogni passo difficile*, etc., containing cantilene u 2-5, and a book of four-part masses in the same year.

M.

(3) MICHAEL ANGELO, a Roman musician of the earlier part of the 17th century, was a pupil of Frescobaldi for organ-playing. He is known as the composer of an opera entitled 'Erminia sul Giordano,' which in 1635 or 1637 (Fétis and Clément, *Dictionnaire Lyrique*, erroneously give the date 1625) was performed with all stage accessories in the Palace of Taddeo Barberini, Prefect of Rome and Prince of Palestrina. It was published in 1637, and dedicated to the Signora Anna Colonna Barberina, the Princess of Palestrina. A full account of the opera, the libretto of which is based on an episode in Tasso's *Gerusalemme Liberata*, is given in H. Goldschmidt's *Studien zur Geschichte der Italienischen Oper*, with some specimens of the music. Like most of the Roman Operas of the period, the music would appear to be utterly wanting in any dramatic power; the form of the drama is merely an excuse for scenic decorations, and occasional graceful pastoral music. Rossi is better known as a composer for clavier. He published a collection of Toccate e Correnti for organ or cembalo (second edition, Rome, 1657, first edition without date). These are now generally accessible in Torchi's 'L'Arte Musicale in Italia,' vol. iii. They are modelled on the style of the pieces of the same name by Frescobaldi, but show no advance either in technique or treatment, though the Correnti are melodious enough. Previous to this republication by Torchi, there used to appear in various modern collections of older music, such as L. Köhler's 'Maitres du Clavecin,' Pauer's 'Alte Meister,' and others, an Andantino and Allegro ascribed to Rossi, which have now been proved to be spurious, their whole style showing them to belong to the following century. Ernst von Werra was the first to prove by examination of the genuine works of Rossi previously unknown, the anachronism of this attribution (*Monatshfte für Musikgeschichte*, xxviii. pp. 123 ff.). It would be interesting to know how these two pieces came to be ascribed to M. A. Rossi.

J. R. M.

(4) LUIGI, born about the end of the 16th century in Naples, was about 1620 in the service of Cardinal Barberini in Rome as a singer. Through Mazarin's influence he was invited to Paris, where on March 2, 1647, his

opera, 'Le Mariage d'Orphée et Euridice,' was given, being the first Italian opera performed in Paris. Five years before he had composed a dramatic work, 'Il palagio d'Atlante,' to words by G. Ruspigiosi (a copy in the Royal College of Music has the title 'Il Pallazzo incantato'). Gevaert edited a selection of thirteen cantatas by him. (5) FRANCESCO, an Abbate, a native of Apulia (Fétis gives Bari as his birthplace), who brought out several operas in Venice between 1686 and 1689, viz. 'Il Sejano moderno' (1686), 'La Clorilda' and 'La pena degl'occhi' in 1688, and 'Mitrane' in 1689. The last work contains the beautiful air, 'Ah! rendimi quel core,' by which alone Rossi's name is known in the present day. An oratorio, 'La Caduta dei Giganti,' is in MS. (6) GIUSEPPE, was successively maestro di cappella at the Castle of St. Angelo, Rome, Pistoia, and San Loreto, Rome. He died in Rome about 1719. A mass in twelve parts, divided into three choirs, and two settings of Dixit Dominus for twelve and sixteen voices respectively, are preserved at Bologna, where the latter are ascribed to the later Giuseppe Rossi. (7) Another GIUSEPPE was maestro in the cathedral of Terni, and was the composer of an opera, 'La sposa in Livorno,' given in Rome in 1807. He published a treatise, *Alli intendenti di contrappunto*, in 1809, and several of his motets are at Bologna.

M.

There are, furthermore, three modern opera-composers of the name: (8) LAURO, born at Macerata, Feb. 19, 1810, was a pupil of Crescentini, Forno, and Zingarelli at Naples. He began to write at once, and at eighteen had his first two operas—'Le Contesse Villane' and 'La Villana Contessa'—performed at the Fenice and Nuovo Theatres of Naples respectively. Other pieces followed: one of them, 'Costanza ed Oringaldo,' being written expressly for the San Carlo at the request of Barbaja. On the recommendation of Donizetti, Rossi was engaged for the Teatro Valle at Rome, and there he remained for 1832 and 1833, and composed four operas and an oratorio. In 1834 he moved to Milan, and brought out 'La Casa disabitata' (or 'I falsi Monetari'), which, though but moderately successful at the Scala, was afterwards considered his *chef-d'œuvre*, and spoken of as 'Rossi's Barbieri di Siviglia.' It pleased Malibran so much that she induced Barbaja to bespeak another opera from Rossi for the San Carlo, in which she should appear. The opera was composed, and was named 'Amelia' (produced at Naples, Dec. 4, 1834); but owing to her caprice was a failure. She insisted on having a *pas de deux* inserted for her and Mathis. The theatre was crowded to the ceiling to see the great singer dance; but her dancing did not please the public, and the piece was damned. This disappointment, though somewhat alleviated by the success of his

'Leocadia' (1834) seems to have disgusted Rossi with Italy; he accepted an engagement from Mexico, left Europe, Oct. 15, 1835, and arrived at Vera Cruz the 6th of the following January. From Mexico he went to the Havannah, New Orleans, and Madras; married in 1841, and returned to Europe, landing at Cadiz, Feb. 3, 1843. He began again at once to compose—'Cellini a Parigi' (Turin, 1845), etc., but with very varying success. In 1846 he reappeared at the Scala at Milan with 'Azema di Granata,' 'Il Borgomastro di Schiedam,' and three or four other operas in following years. His great success, however, appears to have been made with 'Il Domino nero,' at the Teatro Canobbiana, Sept. 1849. In 1850 he was called to be director of the Conservatorio at Milan. For this institution he published a *Guida di armonia pratica orale* (Ricordi, 1858), and between 1850 and 1859 composed a great many operas, and detached pieces for voices and for instruments. After the death of Mercadante in 1870, Rossi succeeded him as head of the Conservatorio at Naples. This office he resigned in 1873, and he went to Cremona in 1880, dying there on May 5, 1885. Lists of his works are given by Florimo (*Cenni Storici*, pp. 948-962), Riemann (*Lexikon*), and Pougin. They comprise twenty-nine operas, a grand mass, and a dozen miscellaneous compositions, including six fugues for strings, two sets of vocal exercises, and the *Guide to Harmony* already mentioned. His best works are 'Cellini a Parigi,' 'I falsi Monetari,' 'La Contessa di Mons,' and 'Il Domino nero.' One of his operas, 'La Figlia di Figaro,' is said to have been produced at the Kärnthnertheater, Vienna, April 17, 1846; and another, 'Biorn,' was announced for performance at the Queen's Theatre, London, Jan. 17, 1877—English libretto by Frank Marshall; but no notice of either performance can be found. [An oratorio, 'Saul,' elegies on Ballini and Mercadante, a mass, and other works, are mentioned by Riemann.] G.

(9) GIOVANNI GAETANO, born at Borgo San Donnino, Parma, August 5, 1828, studied at the Milan Conservatorio, was leader of the orchestra in the theatre at Parma, and organist of the court chapel there, from 1852 to 1873, and director of the Parma Conservatorio in 1864-1873. In 1873 he became conductor at the Teatro Carlo Felice, Genoa, until 1879; he died at Parma, March 30, 1886. His operas were: 'Elena di Taranto' (Parma, 1852), 'Giovanni Giscala' (Parma, 1855), 'Niccolò de' Lapi' (Ancona, 1865), 'La contessa d'Altamberg' (Borgo San Donnino, 1872), and 'Maria Sanz' (Bergamo, 1895). A symphony, 'Saul,' won a prize in Paris in 1878, and Rossi wrote besides three masses, an oratorio, and a requiem. (10) CESARE, born at Mantua in 1864, has won success as a composer in many branches of art, his opera 'Nadeja' having been received

with much favour at Prague in 1903 (Riemann's *Lexikon*, etc.) M.

ROSSINI, GIOACCHINO ANTONIO, was born Feb. 29, 1792, at Pesaro, and was the only child of Giuseppe Rossini of Lugo. The position of his parents was of the humblest; his father was town-trumpeter (*trombadore*) and inspector of laughter-houses, and his mother a baker's daughter, but their life was a happy one, and the irrepressible good-humour of the town-trumpeter was celebrated among his friends. In the political struggles of 1796 the elder Rossini declared himself for the French, and for republican government, and was naturally sent to gaol. His wife, thus deprived of her means of subsistence, was driven to turn her voice to account. She went with her little Gioacchino to Bologna, and there made her début as 'prima donna buffa' with such success as to procure her engagements in various theatres of the Romagna during the Carnival. Meantime the *trombadore* had regained his liberty and was engaged as horn-player in the bands of the theatres in which his wife sang; the child remaining at Bologna, in the charge of an honest pork butcher. In such surroundings it is not wonderful that Gioacchino's learning was confined to reading, writing, and arithmetic. Music he acquired from a certain Prinetti of Novara, who gave him harpsichord lessons for three years; but the lessons must have been peculiar, for Prinetti was accustomed to play the scale with two fingers only, combined his music-teaching with the sale of liquors, and had the convenient habit of sleeping as he stood. Such a character was a ready butt for the son of a joker like Giuseppe Rossini; and so incorrigible was Gioacchino's love of mimicking his master that at length he was taken from Prinetti, and apprenticed to a smith.

Ashamed of this result he resolved to amend and apply. In Angelo Tesei he fortunately found a clever master, able to make singing and practical harmony interesting to his pupil; in a few months he learned to read, to accompany, and to sing well enough to take solos in church at the modest price of three pauls' per service. He was thus able, at the age of ten, to assist his parents, who, owing to a sudden change in his mother's voice, were again in misfortune. In his desire to help them he seized every opportunity of singing in public, and eagerly accepted an offer to appear at the theatre of the Commune as Adolfo in Paër's 'Camilla.' This was his first and only step in the career of a dramatic singer, but it must have been often difficult to resist taking it up again, when he saw singers receiving a thousand ducats for appearing in operas which he both composed and conducted for fifty.

Thus at the age of thirteen Rossini was a sufficiently good singer to be well received at the theatre; he also played the horn by his father's

GIOACCHINO ANTONIO ROSSINI

side, and had a fair reputation as accompanist. At this time he acquired a valuable friend in the Chevalier Giusti, commanding engineer at Bologna, who took a great affection for the lad, read and explained the Italian poets to him, and opened his fresh and intelligent mind to the comprehension of the ideal; and it was to the efforts of this distinguished man that he owed the start of his genius, and such general knowledge as he afterwards possessed. After three years with Tesei he put himself under a veteran tenor named Babbini to improve his singing. Shortly after this his voice broke, at the end of the autumn of 1806, during a tournée in which he accompanied his father as chorus-master and *maestro al cembalo*, an engagement in which the daily income of the two amounted to 11 pauls, about equal to 4 shillings. The loss of his voice cost him his engagements in church; but it gave him the opportunity of entering the Conservatorio, or Liceo comunale, of Bologna. On March 20, 1807, he was admitted to the counterpoint class of Padre Mattei, and soon after to that of Cavedagni for the violoncello. He little anticipated when he took his first lesson that his name would one day be inscribed over the entrance to the Liceo.

His progress was rapid, and he was soon able to take his part in Haydn's quartets; but his counterpoint lessons were a trouble to him from the first. Before he entered Mattei's class he had composed a variety of things—little pieces for two horns, songs for Zambini, and even an opera, called 'Demetrio,' for his friends the Mombellis. Unfortunately Mattei was a pedant, who could see no reason for modifying his usual slow mechanical system to suit the convenience of a scholar, however able or advanced. His one answer to his pupil's inquiry as to the reason of a change or a progression was, 'It is the rule.' The result was that after a few months of discouraging labour Gioacchino began to look to instinct and practice for the philosophy, or at least the rhetoric of this art. The actual parting is the subject of an anecdote which is not improbably true. Mattei was explaining that the amount of counterpoint which his pupil had already acquired was sufficient for a composer in the 'free style'; but that for church-music much severer studies were required. 'What,' cried the boy, 'do you mean that I know enough to write operas?' 'Certainly,' was the reply. 'Then I want nothing more, for operas are all that I desire to write.' There was in this something of the practical wisdom which distinguished the Rossini of later life. Meantime it was necessary that he and his parents should live, and he therefore dropped counterpoint and returned to his old trade of accompanist, gave lessons, and conducted performances of chamber-music. He was even bold enough to lead an orchestra, and took the direction of the 'Accademia dei Concor di' of

Bologna. There is no reason to doubt that it was more by scoring the quartets and symphonies of Haydn and Mozart than by any lessons of Padre Mattei's that Rossini learned the secrets and the magic of the orchestra. His fame at the Liceo increased day by day, and at the end of his first year his cantata 'Il Pianto d'armonia per la morte d'Orfeo' was not only rewarded with the prize, but was performed in public, August 8, 1808. He was then in his seventeenth year. The cantata was followed, not by a symphony, as is sometimes said, but by an overture in the fugued style, in imitation of that to 'Die Zauberflöte,' but so weak, that after hearing it played he lost no time in destroying it. The same fate probably attended some pieces for double bass and strings, and a mass, both written at the instance of an amateur of the double bass. Rossini had hitherto been known at Bologna as 'il Tedeschino'—'the little German'—for his devotion to Mozart; but such serious efforts as composing a mass, and conducting a work like Haydn's 'Seasons' were probably intended as hints that he wished to be looked upon no longer as a scholar, but as a master waiting his opportunity for the stage.

It may be easier to enter on a career in Italy than elsewhere, but even there it is not without its difficulties. Rossini by his wit and gaiety had, in one of his tours, made a friend of the Marquis Cavalli, who had promised him his interest whenever it should be wanted. The time was now come to claim the fulfilment of the promise, and Rossini's delight may be imagined when he received an invitation to compose an opera, from the manager of the San Mosè theatre at Venice. He hastened to prepare the piece, and 'La Cambiale di Matrimonio' or the 'Matrimonial Market' was produced there in the autumn of 1810. The piece was an opera buffa in one act; it was supported by Morandi, Ricci, De Grecis, and Raffanelli, and had a most encouraging reception. After this feat he returned to Bologna, and there composed for Esther Mombelli's benefit a cantata called 'Didone abbandonata.' In 1811 he wrote for the Teatro del Corso of Bologna an opera buffa in two acts, 'L'Equivoco stravagante,' which closed the season with success, and in which both he and Marcolini the contralto were highly applauded.

'Demetrio e Polibio' was brought out at the Teatro Valle, by his old friends the Mombellis, in 1811. Early in 1812 he produced, at the San Mosè theatre, Venice, two buffa operas—'L'Inganno felice,' and 'L'Ocasione fa il Ladro, ossia il Cambio della valigia.' The first of these, a *Farsa*, a trifle in one act, was well sung and much applauded, especially an air of Galli's, 'Una voce,' a duet for the two basses, and a trio full of force and original melody. After the Carnival he went to Ferrara, and there composed an oratorio, 'Ciro in Babilonia,' which

was brought out during Lent, and proved a fiasco. [It was performed as 'Cyrus in Babylon' at Drury Lane Theatre (Lent Oratorios), Jan. 30, 1823, under Sir George Smart.] Another failure was 'La Scala di Seta,' an opera buffa in one act, produced at Venice in the course of this spring. While the Mombellis were engaged on his serious opera, he flew off to Milan to fulfil an engagement which Marcolini had procured for him, by writing, for her, Galli, Bonoldi, and Parlamagni, a comic piece in two acts called 'La Pietra del Paragone,' which was produced at the Scala during the autumn of 1812, with immense success. It was his first appearance at this renowned house, and the piece is underlined in the list as 'musica nuova di Gioacchino Rossini, di Pesaro.' The numbers most applauded were a cavatina, 'Ecco pietosa,' a quartet in the second act, the duel-trio, and a finale in which the word 'Sigillara' recurs continually with very comic effect. This finale is memorable as the first occasion of his employing the *crescendo*, which he was ultimately to use and abuse so copiously. Mosca has accused Rossini of having borrowed this famous effect from his 'Pretendenti delusi,' produced at the Scala the preceding autumn, forgetting that Mosca himself had learned it from Generali and other composers. Such accusations, however, were of little or no importance to Rossini, who had already made up his mind to adopt whatever pleased him, whosoever he might find it. In the meantime he took advantage of his success to pass a few days at Bologna with his parents, *en route* for Venice; and thus ended the year 1812, in which he had produced no less than six pieces for the theatre.

Nor was 1813 less prolific. It began with a terrible myetification. He had accepted a commission of 500 francs for a serious opera for the Grand Theatre at Venice, but the manager of San Mosè, furious at his desertion, in pursuance of some former agreement, forced on him a libretto for that theatre, 'I due Bruchini, o il figlio per azzardo,' which, if treated as intended, would inevitably have been the death of the music. From this dilemma Rossini ingeniously extricated himself by reversing the situations, and introducing all kinds of tricks. The second violins mark each bar in the overture by a stroke of the bow on the lamp shade; the bass sings at the top of his register and the soprano at the bottom of hers; a funeral march intrudes itself into one of the most comical scenes; and in the finale the words 'son pentito' are so arranged that nothing is heard but 'tito, tito, tito.' Those of the audience who had been taken into the secret were in roars of laughter, but the strangers who had paid for their places in good faith, were naturally annoyed, and hissed loudly. But no complaints were of any avail with Rossini, he only laughed at the success of his joke. 'I due Bruchini' dis-

appeared after the first night, and the remembrance of it was very shortly wiped out by the appearance of 'Tancredi' at the Fenice during the Carnival. The characters were taken by Manfredini, Malanotte, Todran, and Bianchi. A work so important and so full of spirit, effect, and melody, was naturally received with enthusiasm, and nobody had time to notice various plagiarisms from Paisiello and Paër. It was in fact the first step in the revolution which Rossini was destined to effect in Italian opera. All Venice, and very soon all Italy, was singing or humming 'Mi rivedrai, ti rivedrò.' Hardly any one now remembers that it is only to the happy accident that Malanotte was dissatisfied with her air, and insisted on its being rewritten, that we owe the 'Di tanti palpiti,' which was nicknamed the 'aria de' rizzi,' because it was said to have been dashed off while waiting for a dish of rice. One must read the accounts of the day to understand the madness—for it was nothing else—which 'Tancredi' excited among the Venetians. 'I fancied,' said Rossini, with his usual gaiety, 'that after hearing my opera they would put me into a mad-house—on the contrary, they were madder than I.'

Henceforward he was as much fêted for his social qualities as for his music. But he did not give way to such dissipations for long. His next work was 'L'Italiana in Algeri,' an opera buffa produced at the San Benedetto theatre, Venice, in the summer of 1813. Its greatest novelty was the famous trio 'Papataci,' a charming union of melody and genuine comedy; while the patriotic air, 'Pena alla Patria,' which closes the work, spoke not less powerfully to the hearts of his countrymen.

'Aureliano in Palmira' and 'Il Turco in Italia' were both brought out at the Scala, Milan, the first in Dec. 1813, the second in August 1814, before an audience somewhat more critical than that at Venice. 'Aureliano,' though it contains some fine things, which were afterwards utilised in 'Elisabetta' and the 'Barbiere,' was a fiasco. The 'Turco,' too, was not received with the applause which it afterwards commanded. Rossini, however, was greatly fêted during his stay in Milan, and among his 'amiable protectresses'—to use the expression of Stendhal—was the Princess Belgiojoso, for whom he composed a cantata entitled 'Egle ed Irene.' His next opera, 'Sigismondo,' written for the Fenice at Venice, in the Carnival of 1815, was unsuccessful, and the failure so far affected him as to make him give up work for a time, and retire to his home at Bologna. There he encountered Barbaja, who from being a waiter at a coffee-house had become the farmer of the public gaming-tables and impresario of the Naples theatre. Barbaja, though rich, was still bent on making money; he had heard of the success of the young composer, and of his brilliant talents, and was resolved to get hold of him;

and Rossini, with the support of his parents on his hands, was ready enough to listen to any good proposal. He accordingly engaged with Barbaja to take the musical direction of the San Carlo and Del Fondo theatres at Naples, and to compose annually an opera for each. For this he was to receive 200 ducats (about £35) per month, with a small share in the gaming-tables, amounting in addition to some 1000 ducats per annum, for which, however, he obtained no compensation after the tables were abolished in 1820.

During Murat's visit to Bologna in April 1815 Rossini composed a cantata in favour of Italian independence; but politics were not his line, and he arrived in Naples fully conscious of this, and resolved that nothing should induce him to repeat the experiment. The arrival of a young composer with so great a reputation for originality was not altogether pleasing to Zingarelli, the chief of the Conservatorio, or to the aged Paisiello. But no intrigues could prevent the brilliant success of 'Elisabetta, regina d' Inghilterra,' which was produced before the Court for the opening of the autumn season, 1815, and in which Mlle. Colbran, Dardanelli, Manuel Garcia, and Nozzari took the principal parts. The libretto of this opera was by a certain Schmidt, and it is a curious fact that some of its incidents anticipate those of 'Kenilworth,' which was not published till January 1821. Two historical facts should be noted in regard to 'Elisabetta.' It is the first opera in which Rossini so far distrusted his singers as to write in the ornaments of the airs; and it is also the first in which he replaced the *recitativo secco* by a recitative accompanied by the string quartet. The overture and the finale to the first act of 'Elisabetta' are taken from 'Aureliano.'

Shortly before Christmas Rossini left Naples for Rome to write and bring out two works for which he was under engagement. The first of these, 'Torvaldo e Doriiska,' produced at the Teatro Valle, Dec. 26, 1815, was coldly received, but the second, 'Almaviva, ossia l' inutile precauzione,' founded on Beaumarchais' 'Barbier de Séville,' by Sterbini, which made its first appearance at the Argentina, Feb. 5, 1816, was unmistakably damned. The cause of this was the predilection of the Romans for Paisiello, and their determination to make an example of an innovator who had dared to reset a libretto already treated by their old favourite. Rossini, with excellent taste and feeling, had inquired of Paisiello, before adopting the subject, whether doing so would annoy the veteran, whose 'Barbieri' had been for a quarter of a century the favourite of Europe, and not unnaturally believed that after this step he was secure from the ill-will of Paisiello's friends and admirers.¹ But

the verdict of a theatre crammed with partisans is seldom just. It is also as changeable as the winds, or as Fortune herself. Though hissed on the first night, 'Almaviva' was listened to with patience on the second, advanced in favour night by night, and ended by becoming, under the title of 'Il Barbiere di Siviglia,' one of the most popular comic operas ever composed, and actually eclipsing in spirit and wit the comedy on which it is founded. It was acted by Giorgi-Righetti (Rosina), Rossi (Berta), Zamboni (Figaro), Garcia (Almaviva), Botticelli (Bartolo) and Vitarelli (Basilio). The original overture was lost, and the present one belongs to 'Elisabetta'; the opening of the cavatina 'Ecco ridente' is borrowed from the opening of the first chorus in 'Aureliano.' The air of Berta, 'Il vecchietto cerca moglie,' was suggested by a Russian tune, and the eight opening bars of the trio 'Zitti, zitti' are notoriously taken note for note from Simon's air in Haydn's 'Seasons.' Indeed it is astonishing that, with his extraordinary memory, his carelessness, and his habitual hurry, Rossini should not have borrowed oftener than he did. He received 400 scudi (£80) for the 'Barbiere,' and it was composed and mounted in a month. When some one told Donizetti that it had been written in thirteen days, 'Very possible,' was his answer, 'he is so lazy.'

Lazy as he was, Rossini was destined to write twenty operas in eight years, 1815-23. On his return to Naples after the Carnival of 1816, and the gradual success of the 'Barbiere,' he found the San Carlo theatre in ashes. Barbaja undertook to rebuild it more magnificently than before in nine months. He kept his word, and thus acquired not only the protection but the favour of the king. Rossini obtained the same boon by composing a grand cantata entitled 'Teti e Peleo' for the marriage of the Duchesse de Berry. No sooner had he completed this than he dashed off a two-act comic opera entitled 'La Gazzetta' to a libretto by Tottola, which was produced at the Teatro dei Fiorentini, Naples, and which, although in the hands of a clever and charming actress like Chambrand, and of two such public favourites as Pellegrini and Casaccia, was but moderately successful. Rossini completed his reform of serious opera by his 'Otello,' which was brought out at the Teatro del Fondo, Naples, Dec. 4, 1816, with Isabella Colbran, Nozzari, Davide, Cicimarra, and Benedetti as its interpreters. Some of the most remarkable features of this work, such as the finale of the first act, the duet 'Non m'inganno,' and the passionate trio of defiance, were not at first appreciated: the touching air of Desdemona, 'Se il padre,' and the romance of the Willow, with harp accompaniment, were better received; but the tragic termination of the whole was very distasteful to the public, and when the opera was taken to Rome, it was found necessary

¹ We have Rossini's own authority for this, and for the opera having been written in thirteen days, in his letter to M. Schiavux. See *Musical World*, Nov. 6, 1875, p. 751.

to invent a happy conclusion, a fact which throws a curious light on the dramatic taste of the period.

The machinery, and power of rapidly changing the scenes, were at that time so very imperfect in smaller Italian theatres, that Rossini would only accept the subject of Cinderella when proposed to him by the manager of the Teatro Valle at Rome, on condition that the supernatural element was entirely omitted. A new comic piece was therefore written by Ferretti under the title of 'Cenerentola, ossia la bontà in trionfo'; Rossini undertook it, and it was produced at the Carnival of 1817. Its success was unmistakable, though the cast was by no means extraordinary—Giorgi, Catarina, Rossi, Guglielmi, De Begnis, Verni, and Vitarelli.

In the profusion and charm of its ideas this delicious work is probably equal to the 'Barbieri,' but it is inferior in unity of style. No doubt this is partly owing to the fact that many of the pieces were originally composed to other words than those to which they are now sung. The duet 'Un soave non sò chè,' the drinking-chorus, and the mock proclamation of the Baron, are all borrowed from 'La Pietra del Paragone'; the air 'Miei rampolli' is from 'La Gazzetta,' where it was inspired by the words 'Una prima ballerina'; the air of Ramiro recalls that to 'Ah! vieni' in the trio in 'Otello'; the delightful strettò of the finale, the duet 'Zitto, zitto,' the sestet 'Quest' è un nodo avvilupato,' and various other incidental passages originally belonged to the 'Turco in Italia'; and the humorous duet 'Un segreto' is evidently modelled on that in Cimarosa's 'Matrimonio.' Such repetitions answered their purpose at the moment, but while thus extemporising his operas Rossini forgot that a day would arrive when they would all be published, and when such discoveries as those we have mentioned, and as the existence of the principal motif of the duet of the letter in 'Otello' in the *agitato* of an air from 'Torvaldo e Dorliska,' would inevitably be made. As he himself confessed in a letter about this time, he thought he had a perfect right to rescue any of his earlier airs from operas which had either failed at the time or become forgotten since. Whatever force there may be in this defence, the fact remains that 'Cenerentola' and the 'Barbieri' share between them the glory of being Rossini's *chefs d'œuvre* in comic opera.

From Rome he went to Milan, to enjoy the triumph of the 'Gazza ladra'—libretto by Gherardini,—which was brought out on May 31, 1817, at the Scala. The Milanese found no difference between the really fine parts of the opera and those which are mere padding—of which the 'Gazza ladra' has several. Nor would any one have noticed, even had they had the necessary knowledge, that in the first duet and the finale—as was the case also in the

finale to the 'Cenerentola'—Rossini had borrowed an effect from the *Poco adagio* of Mozart's Symphony in C (Köchel, p. 425) by maintaining a sustained accompaniment in the wind while the strings and the voices carry on the ideas and the ornaments.

From Milan he returned to Naples, and produced 'Armida' during the autumn season, a grand opera in three acts, with ballet, which was mounted with great splendour, and enjoyed the advantage of very good singers. The duet 'Amor, possente Nume!'—which was soon to be sung through the length and breadth of Italy, the air 'Non soffro l'offensa,' the incantation scene, the chorus of demons, and the airs de ballet, would alone have been sufficient to excite the Neapolitans; but these were not the only pieces applauded, and the remarkable trio 'In quale aspetto imbelles,' written for three tenors with extraordinary ease, a pretty chorus of women 'Qui tutto è calma,' and a scena with chorus 'Germano a te richiede'—afterwards employed in the French version of 'Moïse'—all deserve mention.

This fine work had hardly made its appearance before Rossini had to dash off two more—'Adelaide di Borgogna,' sometimes known as 'Ottone Rè d'Italia,' and an oratorio—'Mosè in Egitto.' 'Adelaide' was produced at the Argentina at Rome, in the Carnival of 1818, was well sung and warmly received. 'Mosè' was written for the San Carlo at Naples, and brought out there in Lent with an excellent cast—Isabella Colbran, Benedetti, Porto, and Nozzari. Here for the first time Rossini was so much pressed as to be compelled to call in assistance, and employed his old and tried friend Carafa in the recitatives and in Pharaoh's air 'Aspettar mi.'¹ The scene of the darkness was another step onwards, and the whole work was much applauded, with the exception of the passage of the Red Sea, the representation of which was always laughed at, owing to the imperfection of the theatrical appliances already spoken of. At the resumption of the piece, therefore, in the following Lent, Rossini added a chorus to divert attention from the wretched attempt to represent the dividing waves, and it is to the sins of the Neapolitan stage machinists that we owe the popular prayer 'Dal tuo stellato soglio.'

As some relaxation after this serious effort he undertook, in the summer of 1818, a one-act piece 'Adina, o il Califfo di Bagdad,' for the San Carlos Theatre, Lisbon; and immediately after, 'Ricciardo e Zoraide' for San Carlo, Naples, which was sung to perfection at the autumn season there by Isabella Colbran, Pisaroni (whose excessive plainness was no bar to her splendid singing), Nozzari, Davide, and Cicimarra.

'Ricciardo' was extraordinarily full of orna-

¹ Omitted in the Italian score published in Paris.

ment, but 'Ermione,' which was produced at San Carlo in the Lent of 1819, went quite in the opposite direction, and affected an unusual plainness and severity. Though splendidly sung, 'Ermione' did not please, and the single number applauded was the one air in which there was any ornamentation. So much for the taste of Naples in 1819! An equally poor reception was given to a cantata written for the re-establishment of the health of the King of Naples, and sung at the San Carlo, Feb. 20, 1819. It consisted of a cavatina for Isabella Colbran, and an air with variations, which was afterwards utilised in the ballet of the 'Viaggio a Reims.' The piece was hastily thrown off, and was probably of no more value in the eyes of its author than was an opera called 'Edoardo e Cristina' which was brought out at the San Benedetto, Venice, this same spring, and was in reality a mere pasticcio of pieces from 'Ermione,' 'Ricciardo,' and other operas, hitherto unheard in Venice, attached to a libretto imitated from Scribe. Fortunately the opera pleased the audience, and sent Rossini back to Naples in good spirits, ready to compose a new cantata for the visit of the Emperor of Austria. The new work was performed on May 9, 1819, at the San Carlo, and was sung by Colbran, Davide, and Rubini, to the accompaniment of a military band. This Rossini probably accepted as a useful experience for his next new opera, the 'Donna del Lago,' in the march of which we hear the results of his experiments in writing for a wind band. Even at the present day the first act of the opera is well worthy of admiration, and yet the evening of Oct. 4, 1819, when it was first given, with the magnificent cast of Colbran, Pisaroni, Nozzari, Davide, and Benedetti, was simply one long torture of disappointment to the composer, who was possibly not aware that the storm of disapprobation was directed not against him so much as against Barbaja the manager, and Colbran his favourite.

On the following evening the hisses became *bravos*, but of this Rossini knew nothing, as by that time he was on his road to Milan. The Scala opened on Dec. 26, 1819, for the Carnival season with 'Bianca e Faliero,' libretto by Romani, which was admirably sung by Camprose and others. No trace of it, however, now remains except a duet and quartet, which were afterwards introduced in the 'Donna del Lago,' and became very popular at concerts.

His engagement at Milan over, he hurried back to Naples, to produce the opera of 'Maometto secondo,' before the close of the Carnival. It had been composed in great haste, but was admirably interpreted by Colbran, Chaumel (afterwards Madame Rubini), Nozzari, Cicimarra, Benedetti, and F. Galli, whose Maometto was a splendid success. It was the last opera that Rossini was destined to give at

Naples before the revolt of July 20, 1820, of the Carbonari, under Pepe, which obliged the King to abandon his capital, ruined Barbaja by depriving him at once of a powerful patron and of the monopoly of the gambling-houses, and drove Rossini to make important changes in his life. Having for the moment no engagement for the Scala, he undertook to write 'Matilda di Ciabranco' ('Mathilde di Shabran') for Rome. Torlonia the banker had bought the Teatro Tordinone, and was converting it into the Apollo; and it was for the inauguration of this splendid new house that Rossini's opera was intended. The opening took place on the first night of the Carnival of 1821. The company, though large, contained no first-rate artists, and Rossini was therefore especially careful of the *ensemble* pieces. The first night was stormy, but Rossini's friends were in the ascendancy, Paganini conducted in splendid style, and the result was a distinct success.

On his return to Naples, Rossini learned from Barbaja his intention of visiting Austria, and taking his company of singers to Vienna. Rossini's next opera, 'Zelmira,' was therefore to be submitted to a more critical audience than those of Italy, and with this in view he applied himself to make the recitatives interesting, the harmonies full and varied, and the accompaniments expressive and full of colour, and to throw as much variety as possible into the form of the movements. He produced the opera at the San Carlo before leaving, in the middle of December 1821. It was sung by Colbran, Cecconi, Davide, Nozzari, Ambrosi, and Benedetti, and was enthusiastically received. On the 27th of the same month, he took his benefit, for which he had composed a special cantata entitled 'La Riconoscenza'; and the day after left for the North. He was accompanied by Isabella Colbran, with whom he had been in love for years, whose influence over him had been so great as to make him forsake comedy for tragedy, and to whom he was married on his arrival at Bologna. The wedding took place in the chapel of the Archbishop's palace, and was celebrated by Cardinal Opizzoni. Rossini has been accused of marrying for money, and it is certain that Colbran had a villa and £500 a year of her own, that she was seven years older than her husband, and that her reputation as a singer was on the decline.

After a month's holiday, the couple started for Vienna, where they arrived about the end of February 1822. He seems to have made his debut before the Vienna public on March 30, as the conductor of his 'Cenerentola,' in the German version, as 'Aschenbrödel,' and his *tempi* were found somewhat too fast for the 'heavy German language.' 'Zelmira' was given at the Kärnthnerthor opera-house on April 13, with a success equal to that which it obtained at Naples. Rossini was not without violent

opponents in Vienna, but they gave him no anxiety, friends and enemies alike were received with a smile, and his only retort was a good-humoured joke. He is said to have visited Beethoven, and to have been much distressed by the condition in which he found the great master. The impression which he made on the Viennese may be gathered from a paragraph in the Leipzig *Allgemeine musik. Zeitung*¹ of the day, in which he is described as 'highly accomplished, of agreeable manners and pleasant appearance, full of wit and fun, cheerful, obliging, courteous, and most accessible. He is much in society, and charms every one by his simple, unassuming style.' After the close of the Vienna season, the Rossinis returned to Bologna, where his parents had resided since 1798. There, at the end of September, he received a flattering invitation from Prince Metternich, entreating him to come to Verona, and he accordingly arrived at the Congress in time for its opening, Oct. 20, 1822. Rossini's contribution to the Congress was a series of cantatas, which he poured forth without stint or difficulty. The best known of these is 'Il vero Omaggio'; others are 'L' Augurio felice,' 'La sacra Alleanza,' and 'Il Bardo.'

The Congress at an end, he began to work at 'Semiramide,' which was brought out at the Fenice, Venice, Feb. 3, 1823, with Madame Rossini, the two Marianis, Galli, and Sinclair the English tenor, for whom there were two arias. The opera was probably written with more care than any of those which had preceded it; and possibly for this very reason was somewhat coldly received. The subject no doubt would seem sombre to the gay Venetians, and they even omitted to applaud the fine quartet (which Verdi must surely have had in his mind when writing the *Miserere* in the 'Trovatore'), the finale, and the appearance of Ninus, the final trio, at once so short and so dramatic, the cavatina with chorus, and all the other new, bold, bright passages of that remarkable work. Rossini was not unnaturally much disappointed at the result of his labour and genius, and resolved to write no more for the theatres of his native country. The resolution was hardly formed when he received a visit from the manager of the King's Theatre, London (Sigr. Benelli), and a proposal to write an opera for that house, to be called 'La Figlia dell' aria,' for the sum of £240—£40 more than he had received for 'Semiramide,' a sum at the time considered enormous. The offer was promptly accepted, and the Rossinis started for England without delay, naturally taking Paris in their road, and reaching it Nov. 9, 1823. Paris, like Vienna, was then divided into two hostile camps on the subject of the great composer. Berton always spoke of him as 'M. Crescendo,' and he was caricatured on the stage as 'M. Vacar-

mini'; but the author of the 'Barbieri' could afford to laugh at such satire, and his respectful behaviour to Cherubini, Lesueur, and Reicha, as the heads of the Conservatoire, his graceful reception of the leaders of the French School, his imperturbable good temper and good spirits, soon conciliated every one. A serenade, a public banquet, triumphant receptions at the opera-house, a special vaudeville ('Rossini à Paris, ou le Grand Dîner')—everything in short that could soothe the pride of a stranger was lavished upon him from the first. He in his turn was always kind and amiable, consenting, for instance, at the request of Panzeron—an old colleague at Rome—to act as accompanist at a concert with the object of saving Panzeron's brother from the conscription. Under the hands of Rossini the piano became as effective as an orchestra; and it is on record that the first time that Auber heard him accompany himself in a song he walked up to the instrument and bent down over the keys to see if they were not smoking. Paris, however, was not at present his ultimate goal, and on Dec. 13, 1823, Rossini and his wife arrived in London. They were visited immediately by the Russian ambassador, M. de Lieven, who gave the composer barely time to recover from the fatigues of the journey before he carried him off to Brighton and presented him to the King. George IV. believed himself to be fond of music, and received the author of the 'Barbieri' in the most flattering manner. 'Zelmira' was brought out at the Opera on Jan. 24, 1824; and the royal favour naturally brought with it that of the aristocracy, and a solid result in the shape of two grand concerts at Almack's, at two guineas admission. The singers on these occasions were Mme. Rossini, Mme. Catalani, Mme. Pasta, and other first-rate artists, but the novelty, the attraction, was to hear Rossini himself sing the solos² in a cantata (or 'ottavino') which he had composed for the occasion, under the title of 'Il Pianto delle Muse in Morte di Lord Byron.' He also took part with Catalani in a duet from Cimarosa's 'Matrimonio' which was so successful as to be encored three times. He appeared at the so-called 'Cambridge Festival' again with Catalani, in July 1824. The opera manager was unable to finish the season, and became bankrupt before discharging his engagements with Rossini. Nor was this all. Not only did he not produce the 'Figlia dell' aria,' but the music of the first act unaccountably vanished, and has never since been found. It was in vain for Rossini to sue the manager; he failed to obtain either his MS. or a single penny of the advantages guaranteed to him by the contract. True, he enjoyed a considerable set-off to the loss just mentioned in the profits of the countless soirées at which he acted as accompanist at a fee of £50. At

² This recalls the visit of a great composer in 1746, when Gluck gave a concert at the King's Theatre, at which the great attraction was his solo on the musical glasses! [See vol. ii. p. 1836.]

¹ May 8, 1822, reporting the early part of March.

the end of five months he found himself in possession of £7000; and just before his departure was honoured by receiving the marked compliments of the king at a concert at the Duke of Wellington's, for which His Majesty had expressly come up from Brighton. [See *Musical Times*, 1900, pp. 18 ff.]

In leaving England on July 26, after so hearty and profitable a reception, Rossini was not taking a leap in the dark; for through the Prince de Polignac, French ambassador in England, he had already concluded an agreement for the musical direction of the Théâtre Italien, Paris, for eighteen months at a salary of £800 per annum. In order to be near his work he took a lodging at No. 28 Rue Taitbout, and at once set about getting younger singers for his company. Knowing that Paër was his enemy, and would take any opportunity of injuring him, he was careful to retain him in his old post of *maestro al cembalo*; but at the same time he engaged Hérold (then a young man of twenty-five) as chorus-master, and as a check on the pretensions of Madame Pasta he brought to Paris Esther Mombelli, Schiassetti, Donzelli, and Rubini, successively. To those who sneered at his music he replied by playing it as it was written, and by bringing out some of his operas which had not yet made their appearance in Paris, such as 'La Donna del Lago' (Sept. 7, 1824), 'Semiramide' (Dec. 8, 1825), and 'Zelmira' (March 14, 1826). And he gave much éclat to his direction by introducing Meyerbeer's 'Crociato'—the first work of Meyerbeer's heard in Paris—and by composing a new opera, 'Il Viaggio a Reims, ossia l'Albergo del giglio d'oro,' which he produced on June 19, 1825, during the fêtes at the coronation of Charles X. The new work is in one act, and three parts; it is written for fourteen voices, which are treated with marvellous art. It was sung by Mmes. Pasta, Schiassetti, Mombelli, Cinti, Amigo, Dotti, and Rossi; and by MM. Levasseur, Zucchelli, Pellegrini, Graziani, Auletta, Donzelli, Bordogni, and Scudo—a truly magnificent assemblage. In the ballet he introduced an air with variations for two clarinets, borrowed from his Naples cantata of 1819, and played by Gambaro (a passionate admirer of his) and by F. Berr. In the hunting scene he brought in a delicious fanfare of horns, and the piece winds up with 'God save the King,' 'Vive Henri Quatre,' and other national airs, all newly harmonised and accompanied. After the Revolution of 1848 the words were suitably modified by H. Dupin, and the piece appeared in two acts at the Théâtre Italien as 'Andremo noi a Parigi,' on Oct. 26 of that year.¹

After the expiration of Rossini's agreement

¹ The score of 'Andremo noi a Parigi' is in the Library of the Conservatoire, but the finale of the 'Viaggio,' which we have mentioned as containing national airs, is not there, and all trace of this curious feat seems to have vanished.

as director of the Théâtre Italien, it was a happy idea of the Intendant of the Civil List to confer upon him the sinecure posts of 'Premier Compositeur du Roi' and 'Inspecteur Général du Chant en France,' with an annual income of 20,000 francs, possibly in the hope that he might settle permanently at Paris, and in time write operas expressly for the French stage. This was also an act of justice, since in the then absence of any law of international² copyright his pieces were public property, and at the disposal not only of a translator like Castil-Blaze, but of any manager or publisher in the length and breadth of France who chose to avail himself of them. Fortunately the step was justified by the event. The opera of 'Maometto'—originally written by the Duke of Ventagnano, and produced at Naples in 1820—had never been heard in France. Rossini employed MM. Soumet and Balocchi to give the libretto a French dress; he revised the music, and considerably extended it; and on Oct. 9, 1826, the opera was produced at the Académie as 'Le Siège de Corinthe,' with a cast which included Nourrit and Mlle. Cinti, and with great success. For the new opera Rossini received 6000 francs from Troupenas.

After this feat Rossini turned to another of his earlier works, as not only sure of success but eminently suited to the vast space and splendid *mise en scène* of the Grand Opéra. This was 'Moïse.' He put the revision of the libretto into the hands of Etienne Jouy and Balocchi, and arranged for Cinti, Nourrit, and Levasseur to be in the cast. 'Moïse' was produced March 25, 1827, and created a profound impression. True, it had been heard in its original form at the Italiens five years before, but the recollection of this only served to bring out more strongly the many improvements and additions in the new version—such as the Introduction to the first act; the quartet and chorus; the chorus 'La douce Aurore'; the march and chorus, etc. The airs de ballet were largely borrowed from 'Armida' (1817) and 'Ciro in Babilonia' (1812). This magnificent work gave Rossini a sort of imperial position in Paris. But it was necessary to justify this, and he therefore resolved to try a work of a different character, and according to the axiom of Boileau, to pass

From grave to gay, from lively to severe—

not in the direction of comic but of lyric opera. With this view he employed Scribe and Poirson to develop a vaudeville which they had written in 1816 to the old legend of 'Le Comte Ory,' adapting to that lively piece some of his favourite music in the 'Viaggio a Reims,'—the introduction and finale of the first act, the duet of the Count and Countess, and the famous narrative of Raimbaut when he brings up the

² The custom in Italy in those days was to sell an opera to a manager for two years, with exclusive right of representation; after that it became public property. The only person who derived no profit from this arrangement was the unfortunate composer.

wine from the cellar, which it is difficult to believe was in its first form applied to the taking of the Trocadéro! Adolphe Nourrit, who was not only a great artist, but a poet of very considerable dramatic power, was privately of much assistance to Rossini in the adaptation of his old music to the new words, and in the actual mounting of the piece in which he was to take so important a share. 'Le Comte Ory' was produced at the Académie, August 20, 1828, and the principal characters were taken by Mme. Damoreau-Cinti, Mlles. Jawurek and Mori, Adolphe Nourrit, Levasseur, and Dabadie. The Introduction is based on the old song which gives its name to the piece. The best thing in the second act is borrowed from the *Allegretto scherzando* of Beethoven's Eighth Symphony. Rossini was at that time actually engaged with Habeneck, the founder of the Concerts of the Conservatoire, and his intimates friend, in studying the Symphonies of Beethoven; and it is easy to understand how impossible it must have been to forget the fresh and graceful movement referred to.

The study of Beethoven was at any rate not a bad preparation for the very serious piece of work which was next to engage him, and for a great portion of which he retired to the château of his friend Aguado the banker at Petit-Bourg. Schiller had recently been brought into notice in France by the translation of M. de Barante; and Rossini, partly attracted by the grandeur of the subject, partly inspired by the liberal ideas at that moment floating through Europe, was induced to choose the Liberator of the Swiss Cantons as his next subject. He accepted a libretto offered him by Etienne Jouy, Spontini's old librettist, who in this case was associated with Hippolyte Bis. Their words, however, were so unmusical and unrhymical, that Rossini had recourse to Armand Marrast, at that time Aguado's secretary, and the whole scene of the meeting of the conspirators—one of the best in operatic literature, and the only thoroughly satisfactory part of the book of 'Guillaume Tell'—was rewritten by him, a fact which we are glad to make public in these pages.

This grand opera, undoubtedly Rossini's masterpiece, was produced at the Académie on August 3, 1829, with the following cast:—Arnold, Nourrit; Walter Fürst, Levasseur; Tell, Dabadie; Ruodi, A. Dupont; Rodolphe, Massol; Gessler, Prévost; Leutold, Prévôt; Mathilde, Damoreau-Cinti; Jemmy, Dabadie; Hedwige, Mori.

'Tell' has now become a study for the musician, from the first bar of the overture to the storm scene and the final hymn of freedom. The overture is no longer, like Rossini's former ones, a piece of work on a familiar, well-worn pattern, but a true instrumental prelude, which would be simply perfect if the opening and the

fiery peroration were only as appropriate to the subject as they are tempting to the executant. We find no absurdities like those in 'Moïse'—no song of thanksgiving accompanied by a brilliant polonaise, no more cabalettas, no more commonplace phrases or worn-out modulations—in short, no more padding of any kind. True, it would not be difficult to criticise the length of the duet in the second act, which recalls the duet in 'Semiramide,' and breathes rather the concert-room than the stage—or the style of the finale of the third act, which is not appropriate to the situation.

The spectacle of a great master at the zenith of his glory and in the very prime of life thus breaking with all the traditions of his genius and appearing as in a second avatar is indeed a rare and noble one. The sacrifice of all the means of effect by which his early popularity had been obtained is one which Rossini shares with Gluck and Weber, but for which our former experience of his character would hardly have prepared us. He seems at length to have discovered how antagonistic such effects were to the simplicity which was really at the base of the great musical revolution effected by him; but to discover, and to act on a discovery, are two different things, and he ought to have full credit for the courage and sincerity with which, at his age, he forsook the flowery plains in which his genius had formerly revelled, for loftier and less accessible heights.

But the career thus splendidly inaugurated was not destined to be pursued; circumstances, political and domestic, stopped him on the threshold. He was anxious to visit once more the city in which his beloved mother died in 1827, and where his father, who had soon tired of Paris, was awaiting him. With this view he resigned his office as inspector of singing in France, and made an arrangement with the Government of Charles X., dating from the beginning of 1829, by which he bound himself for ten years to compose for no other stage but that of France, and to write and bring out an opera every two years, receiving for each such opera the sum of 15,000 francs. In the event of the Government failing to carry out the arrangement he was to receive a retiring pension of 6000 francs. 'Guillaume Tell' was thus to be the first of a series of five operas.

After a serenade from the opera orchestra, Rossini, therefore, left Paris for Bologna. Here he was engaged in considering the subject of 'Faust,' with a view to his next work, when he received the sudden news of the abdication of Charles X., and the revolution of July 1830. The blow shattered his plans and dissipated his fondest hopes. He flattered himself that he had regenerated the art of singing in France. What would become of it again under a king who could tolerate no operas but those of Grétry? Anxious to know if his friend Lubbert was still at the

head of the Académie de Musique, and if the new Intendant of the Civil List would acknowledge the engagements of his predecessor, he returned to Paris in Nov. 1830; and intending only to make a short stay, took up his quarters in the upper storey of the Théâtre des Italiens, of which his friend Severini was then director. Here, however, he was destined to remain till Nov. 1836. The new Government repudiated the agreement of its predecessor, and Rossini had to carry his claim into the law-courts. Had his law-suit alone occupied him, it would not have been necessary to stay quite so long, for it was decided in his favour in Dec. 1835. But there was another reason for his remaining in Paris, and that was his desire to hear 'The Huguenots' and ascertain how far Meyerbeer's star was likely to eclipse his own. It is impossible to believe that a mere money question could have detained him so long at a time when almost every day must have brought fresh annoyances. After reducing 'Guillaume Tell' from five acts to three, they carried their love of compression so far as to give only one act at a time, as a *lever de rideau*, or accompaniment to the ballet. This was indeed adding insult to injury. 'I hope you won't be annoyed,' said the Director of the Opera to him one day on the boulevard, 'but to-night we play the second act of "Tell." 'The whole of it?' was the reply. How much bitter disappointment must have been hidden under that reply! During the whole of this unhappy interval he only once resumed his pen, namely in 1832 for the 'Stabat Mater,' at the request of his friend Agusto, who was anxious to serve the Spanish minister Señor Valera. He composed at that time only the first six numbers, and the other four were supplied by Tadolini. The work was dedicated to Valera, with an express stipulation that it should never leave his hands. In 1834 he allowed Troupenas to publish the 'Soirées musicales,' twelve lovely vocal pieces of very original form and harmony, several of which have still retained their charm.

The rehearsals of 'The Huguenots' lingered on, and it was not till Feb. 29, 1836, that Rossini could hear the work of his new rival. He returned to Bologna shortly after, taking Frankfurt in his way, and meeting Mendelssohn.¹ He had not been long in Bologna before he heard of the prodigious success of Duprez in the revival of 'Guillaume Tell' (April 17). Such a triumph might well have nerved him to fresh exertions. But it came a year too late; he had already taken an unfortunate and irrevocable resolution never again to break silence. It would be very wrong to conclude from this that he had lost his interest in music. The care which he bestowed on the Liceo of Bologna, of which he was honorary director, shows that the art still exercised all its claims on him. He was especially anxious to improve the singing of the pupils,

and among those who are indebted to his care, Marietta Alboni held the first rank.

Rossini's father died April 29, 1839, and he soon afterwards learned to his disgust that the MS. of the 'Stabat' had been sold by the heirs of Señor Valera, and acquired by a Paris publisher for 2000 francs. He at once gave Troupenas full power to stop both publication and performance, and at the same time completed the work by composing the last four movements, which, as we have already said, were originally added by Tadolini. The first six movements were produced at the Salle Herz, Paris, Oct. 31, 1841, amidst very great applause. Troupenas² bought the entire score for 6000 francs. He sold the right of performance in Paris during three months to the Escudiers for 8000, which they again disposed of to the director of the Théâtre Italien for 20,000. Thus three persons were enriched by this single work. It was performed complete for the first time at the Salle Ventadour, Jan. 7, 1842, by Grisi, Albertazzi, Mario, and Tamburini.

Notwithstanding its brilliant success, some critics were found to accuse the composer of importing the strains of the theatre into the church; but it must not be forgotten that religion in the South is a very different thing from what it is in the North. Mysticism could have no place in the mind of such a man as Rossini, who would naturally utter his prayers aloud, in the sunshine of noon, rather than breathe them to himself in the gloom and mystery of night. The prayer and the scene of the darkness in 'Moïse,' as well as the first movement and the unaccompanied quartet in the 'Stabat,' will always hold their place as religious music; and are of themselves sufficient to show that Rossini, sceptic as he was, was not without religious feeling.

But at the very moment that the 'Stabat' was making its triumphant progress round the world, Rossini began to suffer tortures from the stone, which increased to such an extent as to force him, in May 1843, to Paris, where he underwent an operation which proved perfectly satisfactory. We next find him writing a chorus to words by Marchetti for the anniversary festival of Tasso at Turin, on March 13, 1844. On the 2nd of the following September 'Othello' was produced in French at the Académie with Duprez, Barroilhet, Levasseur, and Mme. Stoltz. Rossini, however, had nothing to do with this adaptation, and the divertissement was arranged entirely by Benoist from airs in 'Mstilde de Sabran' and 'Armida.' While 'Othello' was thus on the boards of the opera, Troupenas brought out 'La Foi, l'Espérance et la Charité' (Faith, Hope, and Charity), three choruses for women's voices, the first two composed many years previously for an opera on the subject of

² We have mentioned that he paid 6000 francs for the 'Stige de Corinthe.' For 'Moïse' he gave only 2400; but, on the other hand, the 'Comte Ory' cost him 12,000, and 'Guillaume Tell' 24,000.

¹ See Hüller's *Mendelssohn*, and M.'s own letter, July 14, 1836.

Œdipus. These choruses are hardly worthy of Rossini. They justify Berlioz's sarcasm—'his Hope has deceived ours; his Faith will never remove mountains; his Charity will never ruin him.' It is fair to say that Louis Engel, in his book *From Mozart to Mario*, states that Rossini repudiated them. Troupenas also brought out a few songs hitherto unpublished, and these reattracted the attention of the public in some degree to the great composer. His statue was executed in marble¹ by Etex, and was inaugurated at the Académie de Musique, June 9, 1846. A few months later (Dec. 30), by his permission, a pasticcio adapted by Niedermeyer to portions of the 'Donna del Lago,' 'Zelmira,' and 'Armida,' and entitled 'Robert Bruce,' was put on the stage of the Opéra, but it was not successful, and Mme. Stoltz was even hissed. From his seclusion at Bologna Rossini kept a watchful eye upon the movements of the musical world. It would be interesting to know if he regretted having authorised the manufacture of this pasticcio. If we may judge from the very great difficulty with which, some time later, Méry obtained his permission to translate and produce 'Semiramide,' he did. It is certain that during his long residence at Bologna he only broke his vow of silence for the 'Inno popolare a Pio IX.' The commencement of this was adapted to an air from 'La Donna del Lago,' and its peroration was borrowed from 'Robert Bruce,' which gives ground for supposing that he himself was concerned in the arrangement of that opera, and explains his annoyance at its failure.

The political disturbances which agitated the Romagna at the end of 1847 compelled Rossini to leave Bologna. He quitted the town in much irritation. After the death of his wife (Oct. 7, 1845), he married (in 1847) Olympe Pélissier, with whom he had become connected in Paris at a time when she was greatly in public favour, and when she sat to Vernet for his picture of 'Judith and Holofernes.' In fact at this time the great musician had to a great extent disappeared in the voluptuary. From Bologna he removed to Florence, and there it was that this writer visited him in 1852. He lived in the Via Larga, in a house which bore upon its front the words *Ad votum*. In the course of a long conversation he spoke of his works with no pretended indifference, but as being well aware of their worth, and knowing the force and scope of his genius better than any one else. He made no secret of his dislike to the violent antivocal element in modern music, or of the pleasure he would feel when 'the Jews had finished their Sabbath.' It was also evident that he had no affection for the capital of Tuscany, the climate of which did not suit him.

At length, in 1855, he crossed the Alps and returned to Paris, never again to leave it. His

reception there went far to calm the nervous irritability that had tormented him at Florence, and with the homage which he received from Auber and the rest of the French artists his health returned. His house, No. 2 in the Rue Chaussée d'Antin, and, at a later date, his villa at Passy, were crowded by the most illustrious representatives of literature and art, to such an extent that even during his lifetime he seemed to assist at his own apotheosis. Was it then mere idleness which made him thus bury himself in the Capua of his past successes? No one who, like the present writer, observed him coolly, could be taken in by the comedy of indifference and modesty that it pleased him to keep up. We have already said that, after Meyerbeer's great success, Rossini had taken the resolution of writing no more for the Académie de Musique and keeping silence.

The latter part of this resolution he did not, however, fully maintain. Thus he authorised the production of 'Bruschino' at the Bouffes Parisiens on Dec. 28, 1857, though he would not be present at the first representation. 'I have given my permission,' said he, 'but do not ask me to be an accomplice.' The discovery of the piece—which is nothing else but his early farce of 'Il figlio per azzardo' (Venice, 1813)—was due to Prince Poniatowski, and some clever librettist was found to adapt it to the French taste. A year or two later Méry with difficulty obtained his permission to transform 'Semiramide' into 'Sémiramis,' and the opera in its new garb was produced at the Académie, July 9, 1860, with Carlotta Marchisio as Semiramis, her sister Barbara as Arsace, and Obin as Assur. In this transformation Rossini took no ostensible part. Carafa at his request arranged the recitatives, and wrote the ballet music. These were mere revivals. Not so the sacred work which he brought out at the house of M. Pillet-Will the banker on March 14, 1864, and at the rehearsals of which he presided in person. We allude to the 'Petite messe solennelle,' which though so called with a touch of Rossinian pleasantry is a mass of full dimensions, lasting nearly two hours in performance. Rossini had always been on good terms with the bankers of Paris, and after Rothschild and Aguado he became very intimate with the Count Pillet-Will (1781-1860), a rich amateur, passionately fond of music, who had learned the violin from Baillot, and amused himself with composing little pieces for that instrument. His son, more retiring but not less enthusiastic than his father, had always been one of Rossini's most devoted admirers, and on the occasion of the inauguration of his magnificent house in the Rue Moncey, it was a happy thought of the composer to allow his 'Petite messe solennelle' to be heard there for the first time. This important composition, comprising solos and choruses, was written with the accompaniment of a harmonium and two

¹ It represented him seated in an easy attitude. It was destroyed when the opera-house was burnt down in 1873.

pianos. On this occasion it was sung by the two Marchisios, Gardoni, and Agnesi, and was much applauded. Rossini afterwards scored it with slight alterations for the full orchestra—perhaps a little heavily—and in this shape it was performed for the first time in public at the Théâtre Italien, on the evening of Sunday Feb. 28, 1869, on the seventy-eighth anniversary of the composer's birth as nearly as that could be, seeing that he was born in a leap year, on Feb. 29.

In the last years of his life Rossini affected the piano, spoke of himself as a fourth-rate pianist, and composed little else but pianoforte pieces. Most of these were in some sense or other *jeux d'esprit*; some were inscribed to his parrot, or had the most fanciful titles—'Valse anti-dansante,' 'Fausse couche de Polka-mazurka,' 'Étude asthmatique,' 'Échantillon de blague,' etc. The whole were arranged in cases with such quaint names as 'Album olla podrida,' 'Les quatre mendiants,' 'Quatre hors-d'œuvre,' 'Album de Château,' 'Album de Chaumière,' etc. For the Exposition universelle of 1867, however, he wrote a Cantata, which was performed for the first time at the ceremony of awarding the prizes on July 1, and was also executed at the Opéra at the free performances on August 15, 1867 and 1868. It opens with a hymn in a broad style, in which the author of 'Sémiramis' and 'Moïse' is quite recognisable, but winds up with a vulgar quick-step on a *motif* not unlike the country dance known as 'L'Ostendaise.' The title, which we give from the autograph, seems to show that the son of the jolly 'trombadore' of Pesaro was quite aware of the character of the finale of his last work.

Excusez du peu !!

The final touch is quite enough to show that Rossini to the last had more gaiety than propriety, more wit than dignity, more love of independence than good taste. He preferred the society of artists to any other, and was never so happy as when giving free scope to his caustic wit or his Rabelaisian humour. His *bons mots* were abundant, and it is surprising that no one has yet attempted to collect them. One or two may find place here. One day, in a fit of the spleen, he cried out, 'I am miserable; my nerves are wrong, and every one offers me string instead.' D'Ortigue, the author of the *Dictionnaire liturgique*, had been very severe on him in an article in the *Correspondant* on 'Musical

royalties,' and an enthusiastic admirer of the Italian School having replied somewhat angrily, Rossini wrote to him, 'I am much obliged to you for your vigorous treatment (*lavement*) of the tonsure of my friend the Curé d'Ortigue.' A number of friends were disputing as to which was his best opera, and appealed to him. 'You want to know which of my works I like best? "Don Giovanni"! He took extreme delight in his summer villa at Passy, which stood in the Avenue Ingres, and had a fine garden of about three acres attached to it. In that house he died on Friday Nov. 13, 1868, at 9 P.M., after a long day of agony. His funeral was magnificent. As Foreign Associate of the Institute (1833); Grand Officer of the Legion of Honour (1864), and the orders of St. Maurice and St. Lazare; commander of many foreign orders, and honorary member of a great number of Academies and musical institutions—Rossini had a right to every posthumous honour possible. The funeral took place at the church of the Trinité on Saturday Nov. 21, it was gorgeous, and was attended by several deputations from Italy. Tamburini, Duprez, Gardoni, Bonnehée, Faure, Capoul, Belval, Obin, Delle Sedie, Jules Lefort, Agnesi, Alboni, Adelina Patti, Nilsson, Krauss, Carvalho, Bloch, and Grossi, with the pupils of the Conservatoire, sang the Prayer from 'Moïse.' Nilsson gave a fine movement from the 'Stabat' of Pergolesi, but the most impressive part of the ceremony was the singing of the 'Quis est homo' from Rossini's own 'Stabat mater' by Patti and Alboni. To hear that beautiful music rendered by two such voices, and in the presence of such artists, over the grave of the composer, was to feel in the truest sense the genius of Rossini, and the part which he played in the music of the 19th century.

At the opening of his career Rossini had two courses before him, either, like Simone Mayr and Paër, to follow the footsteps of the old Neapolitan masters, or to endeavour to revolutionise the Italian opera, as Gluck and Mozart had revolutionised those of France and Germany. He chose the latter. We have described the eagerness with which he threw himself into the path of innovation, and the audacity with which, while borrowing a trait of harmony or of piquant modulation from Majò (1740-71) or the skeleton of an effect from Generali (1783-1832), he extinguished those from whom he stole, according to the well-known maxim of Voltaire. We have already mentioned his innovations in the accompaniment of the recitatives, first, in 'Elisabetta,' the full quartet of strings, and next in 'Otello' the occasional addition of the wind instruments. This was a great relief to the monotony of the old *secco* recitative. But his innovations did not stop there; he introduced into the orchestra generally a great deal

more movement, variety, colour, combination, and (it must be allowed) noise, than any of his predecessors had done, though never so as to drown the voices. In Germany the orchestra was well understood before the end of the 18th century; and we must not forget that—not to speak of Mozart's operas of 'Fidelio' or of Cherubini's masterpieces—before the production of the 'Barbiers' (1816), eight of Beethoven's Symphonies were before the world. But in Italy instrumentation was half a century behind, and certainly none of Rossini's predecessors in that country ever attempted what he did in his best operas, as for instance in the *finale* to 'Semiramide' (1823), where the employment of the four horns and the clarinets, and the astonishingly clever way in which the orchestra is handled generally, are quite strokes of genius. The horns are always favourites of his, and are most happily used throughout 'Guillaume Tell,' where we may point to the mixture of pizzicato and bowed notes in the Chorus of the first act, the harp and bell in the Chorus of the second act, and other traits in the Conspiracy scene as marks of real genius, for the happy and picturesque effects produced by very simple means. Rossini had further, like all the great masters, a strong feeling for rhythm, as the most powerful of all aids to interest and success, and was fond of quick movements and of triple time.¹ But an excessive love of jewels is apt to lead to the use of sham diamonds, and his incessant pursuit of effect led him to excessive ornamentation, to noise, and to a passion for attractive forms rather than for the feeling which should lie at the root of them. Much of this, however, was atoned for in his early operas by his masterly way of writing for the voices, by the strength of his melody, the copious flow of his ideas, and the irresistible contagion of his good spirits, especially in comic opera. Having thus secured his position in public favour, his next step—a very legitimate one—was to satisfy the demands of his own taste and conscience. During this second period the subjects of his operas increase in interest. In 'Mosè' he deals with the religious sentiment. In the 'Donna del Lago' he rivals Walter Scott on his own field; and in 'Semiramide' he has recourse to oriental history in his endeavour to give an independent value to his drama. During this period his melodies drop some of their former voluptuous character, but in return are more pathetic and more full of colour, though still wanting in tenderness and depth.

Lastly, in his Paris operas, and especially in 'Guillaume Tell,' the influence of French taste makes itself strongly felt, and we find a clearness, a charm, a delicacy in the small details, a sense of proportion and of unity, a breadth of style, an attention to the necessities of the

stage, and a dignity, which raise this epoch of his career far higher than either of the others.

Rossini's music, as we have already said, has been very differently estimated. Ingres, in whose view honesty in art held almost as high a place as genius or originality, has called it 'the music of a dishonest (*malkonnète*) man.' Berlioz would gladly have burnt it all, and Rossini's followers with it.² On the other hand, Schubert, though fully alive to his weaknesses, as his caricatures of Rossini's overtures show, and with every reason to dislike him from the fact that the Rossini *furor* kept Schubert's own works off the stage—contrasts his operas most favourably with the 'rubbish' which filled the Vienna theatres at that time, and calls him emphatically 'a rare genius.' 'His instrumentation,' he continues, 'is often extremely original, and so is the voice-writing, nor can I find any fault with the music (of "Otello"), if I except the usual Italian gallopades and a few reminiscences of "Tancredi."'³ Mendelssohn, too, as is well known, would allow no one to depreciate Rossini. Even Schumann, so intolerant of the Italian School, is enthusiastic over one of his operas, and calls it 'real, exhilarating, clever music.' Such exaggerations as those of Ingres and Berlioz are as bad as intentional injustice; it is better to recollect the very difficult circumstances which surrounded an Italian composer eighty years ago, and to endeavour to discover why music which was once so widely worshipped has now gone out of fashion. Is it the fault of his librettos? No doubt he would have been wiser to stick to comic subjects, like that of the 'Barbieri,' and to have confined himself for his librettos to the poets of his own family. Is it the elaborate ornamentation of much of his music? No doubt ornamented music decays sooner than that of a plainer style, and it is always dangerous, though tempting, to adopt the fashionable forms. But one main reason is to be found in the deterioration of the art of singing; the Paris opera can now boast neither 'ténor de force' nor 'ténor de grâce'; and the revival of the 'Comte Ory' (on Oct. 29, 1880) showed conclusively the mediocrity of the singers at the Académie. In fact Rossini is now expiating his fault in having demanded too much from his singers.⁴ Some feeling of remorse on this head seems to have prompted his efforts to improve the art of singing both in Paris and Bologna. Indeed so keenly alive was he to the tendencies which

¹ Berlioz, *Memoires*, chap. xiv. The abuse of the 'brutale grosse caisse de Rossini' sounds oddly from Berlioz's pen.

² Letter in Kreisler's *Life of Schubert*, chap. vii.

³ It is amusing to find Rossini accused in his own time, as were both Beethoven and Wagner, of being a destroyer of the voice. The correspondent of the *Allg. Musik. Zeitung*, writing from Venice in April 1819, mentions a certain Countess Dieterichstein at Bonn, who pronounced that his passages were so straining and ruinous for both throat and chest that if he wrote operas for ten years longer there would be no more singers left in Italy. 'Giorgi,' continues the correspondent, 'for whom he wrote the "Cenerentola," is already completely ruined.' [It is perhaps only fair to remind the reader that since the above article was written there have been many singers at the Paris Opera and elsewhere fully capable of performing Rossini's operas if the public wanted them.]

⁴ The English reader will find these points happily touched on in Rutherford Edwards's *History of the Opera*, chap. xvi.

have degraded the stage since 1830, and so anxious to further the love of fresh melody and the prosecution of sound musical study, that he bequeathed to the Institute an annual sum of 6000 francs (£240) for a competition both in dramatic poetry and composition, specifying particularly that the object of the prize should be to encourage composers with a turn for melody. The greater part of his property Rossini devoted to the foundation and endowment of a Conservatorio di Music at his native town Pesaro, of which A. Bazzini and Mascagni were successively directors.

In order to complete this sketch it is necessary to give as complete a list as possible of his works. N.B.—In the column after the names, (1) signifies that the score has been engraved; (2) that it is published for voices and piano; (3) that it is still in manuscript.

I. OPERAS

Title.	1=Full Score. 2=PF. do. 3=Mss.	First representation.	First performance in London at King's Theatre.
Adelaide di Borgogna, or Ottone Rè d'Italia	— 2, 3	Rome, Car. 1818	
Adina (farsa)	— 2, 3	Lisbon, 1818	
Armida	— 2, 3	Naples, Aut. 1817	
Assedio di Corinto, L'	— 2, 3	Milan, Dec. 26, 1828	June 5, 1834
Aureliano in Palmira	— 2, 3	Milan, Dec. 26, 1818	June 22, 1828
Barbiere di Siviglia, Il	— 2, 3	Rome, Feb. 5, 1816	Jan. 27, 1818
Barbier de Séville, Le	1, 2, 3	Paris, May 8, 1824	
La Bianca e Faliero	— 2, 3	Milan, Dec. 26, 1819	
Bruschini, I due (farsa)	— 2, 3	Venice, 1818	
Bruschino	— 2, 3	Paris, Dec. 28, 1867	
Cambiale di matrimonio, La (farsa)	— 2, 3	Venice, Aut. 1810	
Cambio della valigia, Il, or L'occasione, etc. (farsa)	— 2, 3	Venice, 1812	
Cenerentola, La	— 2, 3	Rome, Car. 1817	Jan. 8, 1820
Conte Ory, Le	1, 2, 3	Paris, Aug. 20, 1828	Feb. 23, 1828
Dame du Lac, La	1, —	Paris, Oct. 21, 1828	
Demetrio e Polibio	— 2, 3	Rome, 1812	
Donna del Lago, La	— 2, 3	Naples, Oct. 4, 1819	Feb. 15, 1823
Edoardo e Cristina	— 2, 3	Venice, Car. 1818	
Elisabetta	— 2, 3	Naples, Aut. 1815	Apr. 20, 1818
Equivoco stravagante	— 2, 3	Bologna, Aut. 1811	
Ermineo	— 2, 3	Naples, Lent, 1819	
Figlio per Azzardo, Il. See Bruschini			
Gazza ladra, La	— 2, 3	Milan, May 31, 1817	Mar. 10, 1821
Gazzetta, La	— 2, 3	Naples, 1816	
Goffaume Tell	1, 2, 3	Paris, Aug. 3, 1829	July 11, 1839
Innamorato felice, L' (farsa)	— 2, 3	Venice, Car. 1812	July 1, 1819
Isabelle, adapted from do.	— 2, —		
Italiana in Algeri, L'	— 2, 3	Venice, 1813	Jan. 27, 1819
Maometto Secondo	— 2, 3	Naples, Car. 1820	
Matilde di Sabaan	— 2, 3	Rome, Car. 1821	July 3, 1823
Matilde de Sabran	— 2, —	Paris, 1867	
Mose	1, 2, 3	Paris, Mar. 25, 1827	(Pietro l'Eremita)
Mose in Egitto (2 or 4 acts)	— 2, 3	Naples, Lent, 1818	Apr. 23, 1822
Do, 2nd Italian libretto Occasione fa il ladro, L', or Il cambio, etc. (farsa)		Paris, 1827	
Otello	— 2, 3	Venice, 1812	
Otello, ou le More de Venise (Castil-Elise)	— 2, 3	Naples, Dec. 4, 1818	May 18, 1829

II. CANTATAS

Il pianto d' armonia, Bologna, 1808.	L' Anguria felice, Verona, 1823.
Didone abbandonata, Bologna, 1811.	La sacra alleanza, Verona, 1823.
Egle ed Irene, 1814.	Il Bardo, Verona, 1823.
Teti e Peleo, 1815.	Il ritorno, 1823.
Igea, 1819.	Il pianto delle Muse, London, 1823.
Partenope, 1819.	I Pastori, Naples, 1825.
La riconoscenza, 1821.	Il serio votivo, Bologna, 1829.
Il vero omaggio, Verona, 1823.	

III. SACRED MUSIC

Oratorio, 'Oiro in Babilonia', Ferrara, Lent, 1812.	re-establishment of the service in the church of S. Francesco del Minori conventuali.
Stabat Mater, 1832-41, 1, 2, 3.	Quoniam, bass solo and orchestra, 1, 2, 3.
Petita Messe Solennelle, 1864, 2, 3.	O Sultaris, 4 solo voices. Published at Paris in <i>La Maitrise</i> and reproduced in facsimile by Avevedo in his <i>Rossini</i> .
Tantum ergo, for 2 tenors and bass, with orchestra, 1, 2, 3. Composed at Bologna, and performed Nov. 28, 1847, for the	

IV. MISCELLANEOUS VOCAL MUSIC

Gorgheggi e Solfeggi. A collection of exercises for the voice.	Non posso, o Dio, resistere. Cantata.
Oh quanto son grato. Duet-tino.	Caro Patria. Cantata.
Ridiamo, cantiamo, a 4.	Chant des Titans. Chorus.
Alle voci della gloria. Scena ed Aria.	Se il vuol la Molinara.—Rossini's first composition.
Les Solitaires musicales. 3 ariettes and 4 duets.	La Separazione. Dramatic song.

Various other airs and pieces, thirty or forty in number, will be found in the catalogues of Ricordi, Lucca, Brandus (Troupenas), and Escudier, which it is hardly necessary to enumerate here. Probably no composer ever wrote so much in albums as did Rossini. The number of these pieces which he threw off while in London alone is prodigious. They are usually composed to some lines of Metastasio's, beginning 'Mi lagnerà' tacendo della sorte amara,' which he is said to have set more than a hundred times. [The famous aria, 'Pietà, Signore,' which credulous amateurs still regard as Stradella's, was, according to Signor Alfredo Piatti, written as a joke by Rossini.]

We have stated that during the latter years of his life Rossini composed a great quantity of music for the PF. solo, both serious and comic. These pieces were sold by his widow *en masse* to Baron Grant for the sum of £4000. After a time the whole was put up to auction in London and purchased by Ricordi of Milan, M. Paul Dalloz, proprietor of a periodical entitled *La Musique*, at Paris, and other persons.

V. INSTRUMENTAL MUSIC

Le rendezvous de chasse. A fan-fare for 4 trumpets, composed at Compiègne in 1828 for M. Schikler, and dedicated to him.	March (Pas redoublé) composed for the Sultan Abdul Medjid. Arranged for PF. solo (Benedict) and 4 mains.
3 Marches for the marriage of H.R.H. the Duke of Orleans. Arranged for PF. & 4 mains.	5 String Quartets, arranged as Sonatas for the PF. by Mock-witz (Breitkopf & Härtel).

To enumerate and elucidate all the biographical and critical notices of Rossini would require a volume; we shall therefore confine ourselves to mentioning these of importance either from their authority, their ability, or the special nature of their contents; and for greater convenience of reference we have arranged them according to country and date.

I. ITALIAN

G. Carpani. 'Lettera all' anonimo autore dell' articolo sul 'Tancredi' di Rossini. Milan, 1813, 8vo.

G. Carpani. *Le Rossiniane, ossia Lettere musico-teatrali*. Padua, 1824, 180 pages, 8vo. Portrait.

N. Bettioni. *Rossini et sa musique*. Paris, Bettioni, 1836, 8vo.

Anon. *Vie de Rossini*, etc. Antwerp, 1839, 12mo; 215 pages. (By M. Van Damme, who in his turn has borrowed much from Stendhal.)

L. de Loménis. *M. Rossini, par un homme de rien*. Paris, 1842, 8vo.

Aulagnier. *Quelques observations sur la publication du 'Stabat mater' de Rossini*. Paris, 1842, 4to.

Anon. *Observations d'un amateur non dilettante au sujet du 'Stabat' de M. Rossini*. Paris, 1842, 8vo.

E. Troupenas. *Résumé des opinions de la Presse sur le 'Stabat' de Rossini*. Paris, 1842, 8vo; 75 pages.

Escudier frères. *Rossini, sa vie et ses œuvres*. Paris, 1854, 12mo; 333 pages.

Eug. de Mirecourt. *Rossini*. Paris, 1855, 32mo.

A. Azevedo. *G. Rossini, sa vie et ses œuvres*. Paris, 1855, large 8vo; 810 pages, with portraits and facsimiles.

This is the most complete and eulogistic work on Rossini. It appeared originally in the *Ménestrel*, but was discontinued there, the editor not approving of a violent attack on Meyerbeer, which Azevedo included in it.

Virmaitre et Elie Fréhsult. *Les maisons comiques de Paris*, 1863, 12mo. One chapter is devoted to the house of Rossini.

N. Roqueplan. *Rossini*. Paris, 1869, 12mo; 16 pages.

E. Beulé. *Eloge de Rossini*. Paris, 1869.

A. Pougin. *Rossini: Notes, impressions, souvenirs, commentaires*. Paris, 1870, 8vo; 91 pages. The detailed and annotated chronological list mentioned on p. 8 has not yet been published.

O. Moutoz. *Rossini et son 'Guillaume Tell.'* Bourg, 1872, 8vo.

Vander Straeten. *La mélodie populaire dans l'opéra 'Guillaume Tell' de Rossini*. Paris, 1879, 8vo. [J. Sittard. *Rossini*, 1882.]

III. GERMAN

Oettinger. *Rossini, Komischer Roman*. Leipzig, 1847. A satirical work translated into Danish by Marlow (Copenhagen, 1849, 2 vols. 8vo.); into Swedish by Landberg (Stockholm, 1850, 2 vols. 8vo.); and into French by Royer, *Rossini, l'homme et l'artiste* (Brussels, 1858, 3 vols. 16mo).

Otto Gumprecht. *Musikalische Charakterbilder*. Leipzig, 1869, 8vo.

Fd. Hiller. *Plaudereien mit Rossini*. Inserted (with date 1856) in Hiller's *Aus dem Tonleben unserer Zeit* (Leipzig, 1868); translated into French by Ch. Schwartz in *La France musicale*, 1855; and into English by Miss M. E. von Glehn in *Once a Week*, 1870.

A. Struth. *Rossini, sein Leben, seine Werke und Charakterzüge*. Leipzig.

La Mara. *Musikalische Studienköpfe*, vo. ii. Leipzig, 1874-1876, 2 vols. 12mo.

IV. ENGLISH

Hogarth. *Memoirs of the Musical Drama*. London, 1838, 2 vols. 8vo.

H. S. Edwards. *Rossini's Life*. London, 1869, 8vo; portrait.—*History of the Opera*, lb. 1862, 2 vols. 8vo.—*Rossini and his School*, 1881.

Portraits of Rossini are frequent at all periods of his life. Marochetti's statue, in which he is represented sitting, was erected in his native town in 1864. There is a good bust by Bartolini of Florence. In the 'foyer' of the Opera in the Rue Le Peletier, Paris (now destroyed), there was a medallion of Rossini by Chevalier; a duplicate of this is in the possession of the editor of the *Ménestrel*. The front of the new opera-house has a bronze-gilt bust by M. Evrard. A good early engraving of him is that from an oil-painting by Mayer of Vienna (1820). Of later ones may be mentioned that by Thévenin after Ary Scheffer (1843): still later, a full-length drawn and engraved by Masson, and a photograph by Erwig, engraved as frontispiece to the PF. score of *Sémiramis* (Heugel). Among the lithographs the best is that of Grévedon; and of caricatures the only one deserving mention is that by Dantan. G.C.

ROTA, or ROTTA (Fr. *rote*; Ger. *rotte*, or *rotta*). (i.) A stringed instrument of the psaltery class, the three (or seven) strings of which were plucked either with the fingers or with a plectrum. It is mentioned as early as A.D. 868 by Otfried. It seems to be allied to the ancient lyre. The derivation of the word from the Irish *crott* or *cruist*, or the Welsh *cwrth* (called *chrotta* by Venantius Fortunatus), seems hardly likely without more definite evidence than is before us. The instruments of the crwth kind were generally played with a bow.

(ii.) The name *rota* is applied to the famous round, 'Sumer is icumen in' (see that article), and may have been a generic name for what we now call rounds, the derivation being in that case quite obvious.

M.

ROTA, ANDREA, was born in Bologna about 1553, and in 1583 was appointed choir-master to the church of San Petronio in that city. He died in 1597. His publications consist of

three books of madrigals, two *a 5* (Venice, 1579-1589), one *a 4* (1592); two books of motets *a 5-10* (1584, 1595); and one book of masses *a 4-6* (1595). A very pleasing madrigal *a 5* is republished in Torchi's 'L'Arte Musicale in Italia,' vol. i., also an *Agnus Dei a 7* with double canon, and a *Dixit Dominus a 8*. Padre Martini's *Esemplare* contains a *Da Pacem* by Rota, and Paolucci's 'L'Arte Pratica,' a motet *a 10*.

J. R. M.

ROUGET DE LISLE, CLAUDE JOSEPH, author of the 'Marseillaise,' born at Montaignu, Lons-le-Saulnier, May 10, 1760. He entered the School of Royal Engineers ('École royale du génie') at Mezières in 1782, and left it two years later with the rank of 'aspirant-lieutenant.' Early in 1789 he was made second lieutenant, and in 1790 he rose to be first lieutenant, and was moved to Strasburg, where he soon became very popular in the triple capacity of poet, violin-player, and singer. His hymn, 'à la Liberté,' composed by Ignace Pleyel, was sung at Strasburg, at the fête of Sept. 25, 1791. While there he wrote three pieces for the theatre, one of which, 'Bayard en Bresse,' was produced at Paris, Feb. 21, 1791, but without success. In April 1792 he wrote the 'Marseillaise,' of which an account has been given elsewhere. [See vol. iii. p. 62 ff.] As the son of royalist parents, and himself belonging to the constitutional party, Rouget de Lisle refused to take the oath to the constitution abolishing the crown; he was therefore stripped of his military rank, denounced, and imprisoned, only to escape after the fall of Robespierre in 1794, [an event he celebrated in a 'Hymne dithyrambique,' etc. A 'Chant des vengeances' (1798) and 'Chant du combat' (1800) are mentioned in Riemann's *Lexikon*.] He re-entered the army, and made the campaign of La Vendée under General Hoche; was wounded, and at length, under the Consulate, returned to private life at Montaignu, where he remained in the depth of solitude and of poverty till the second Restoration. His brother then sold the little family property, and Rouget was driven to Paris; and there would have starved but for a small pension granted by Louis XVIII. and continued by Louis Philippe, and for the care of his friends Béranger, David d'Angers, and especially M. and Mme. Voïart, in whose house, at Choisy-le-Roi, he died, June 27, 1836.

Besides the works already mentioned, he published in 1797 a volume of *Essais en vers et en prose* (Paris, F. Didot, an V de la République), dedicated to Méhul, and now extremely rare; so also is his 'Cinquante chants Français' (1825, 4to), with PF. accompaniment. One of these songs, 'Roland à Roncevaux,' was written in 1792, and its refrain—

Mourir pour la patrie,

C'est le sort le plus beau, le plus digne d'envie—

was borrowed by the authors of the 'Chant des

Girondins,' which was set to music by Varney, and played a distinguished part in the Revolution of 1848. [He wrote another set of twenty-five romances with violin obbligato, and two operalibrettos, 'Jacquot, ou l'école des mères' for Della Maria, and 'Macbeth' for Chelard, produced in 1827.] His 'Relation du désastre de Quiberon,' is in vol. ii. of the *Mémoires de tous*.

There exists a fine medallion of Rouget by David d'Angers, which is engraved in a pamphlet by his nephew, entitled *La vérité sur la paternité de la Marseillaise* (Paris, 1865). See the volume of M. Le Roy de Ste. Croix (Strasburg, 1880).

G. C.

ROUND. I. 'A species of canon in the unison, so called because the performers begin the melody at regular rhythmical periods, and return from its conclusion to its commencement, so that it continually passes round and round from one to another of them.'¹ Rounds and Catches, the most characteristic forms of English music, differ from canons in only being sung at the unison or octave, and also in being rhythmical in form. Originating at a period of which we have but few musical records, these compositions have been written and sung in England with unvarying popularity until the present day. The earliest extant example of a round is the well-known 'Sumer is icumen in,' as to the date of which there has been much discussion, although it is certainly not later than the middle of the 13th century. [See SUMER IS ICUMEN IN.] Amongst early writers on music, the terms 'round' and 'catch' were synonymous, but at the present day the latter is generally understood to be what Hawkins (vol. ii.) defines as that species of round 'wherein, to humour some conceit in the words, the melody is broken, and the sense interrupted in one part, and caught again or supplied by another,' a form of humour which easily adapted itself to the coarse tastes of the Restoration, at which period rounds and catches reached their highest popularity. That catches were immensely popular with the lower classes is proved by the numerous allusions to 'alehouse catches' and the like in the dramas of the 16th and 17th centuries. According to Drayton (*Legend of Thomas Cromwell*, Stanza 29) they were introduced into Italy by the Earl of Essex in 1510.

The first printed collection of rounds was that edited by Thomas Ravenscroft, and published in 1609 under the title of 'Pammelia. Musickes Miscellanie: or Mixed Varietie of pleasant Roundelays and delightfull Catches of 3. 4. 5. 6. 7. 8. 9. 10. Parts in one.' This interesting collection contains many English, French, and Latin rounds, etc., some of which are still

¹ 'The Rounds, Catches, and Canons of England; a Collection of Specimens of the sixteenth, seventeenth, and eighteenth centuries adapted to Modern Use. The Words revised, adapted, or re-written by the Rev. J. Powell Metcalfe. The Music selected and revised, and An Introductory Essay on the Rise and Progress of the Round, Catch, and Canon; also Biographical Notices of the Composers, written by Edward F. Rimbault, LL.D., from which work much of the information contained in the above article has been derived.'

popular. Amongst them there is also a curious 'Round of three Country Dances in one' for four voices, which is in reality a Quodlibet on the country-dance tunes 'Robin Hood,' 'Now foot it,' and 'The Crampe is in my purse.' 'Pammelia' was followed by two other collections brought out by Ravenscroft, 'Deuteromelia' in 1609, and 'Melismata' in 1611, and the numerous publications of the Playfords, the most celebrated of which is 'Catch that catch can, or the Musical Companion' (1667), which passed through many editions. The most complete collection of rounds and catches is that published by Warren in thirty-two monthly and yearly numbers, from 1763 to 1794, which contains over 800 compositions, including many admirable specimens by Purcell, Blow, and other masters of the English school. It is to be regretted that they are too often disfigured by an obscurity of so gross a nature as to make them now utterly unfit for performance. A good specimen of the round proper is Hayes's 'Wind, gentle evergreen.' The Round has never been much cultivated by foreign composers. One or two examples are, however, well known, amongst them may be mentioned Cherubini's 'Perfida Clori.'

II. Any dance in which the dancers stood in a circle was formerly called a round or roundel.¹ The first edition of the 'Dancing Master' (1651) has thirteen rounds, for six, eight, or 'as many as will.' Subsequent editions of the same book have also a dance called 'Cheshire Rounds,' and Part II. of Walsh's 'Compleat Country Dancing Master' (1719) has Irish and Shropshire rounds. These latter dances are, however, not danced in a ring, but 'longways,' i.e. like 'Sir Roger de Coverley.' In Jeremiah Clarke's 'Choice Lessons for the Harpsichord or Spinett' (1711), and similar contemporary publications, the word rondo is curiously corrupted into 'Round O.'

W. B. S.

ROUND, CATCH, AND CANON CLUB.

A society founded in London in 1843, by Enoch Hawkins, for the purpose of singing the new compositions of the professional members and others, written in the form of Round, Catch, and Canon; hence the title of the Club. Among the original members were Messrs. Enoch Hawkins, Hobbs, Bradbury, Handel Gear, Henry Phillips, Addison, D'Almaine, and F. W. Collard. The meetings were originally held at the Crown and Anchor Tavern whence the Club removed to the Freemasons' Tavern, thence to the Thatched House, again to Freemasons' Tavern, and to St. James's Hall, where, until the demolition of the building, it assembled every fortnight from the first Saturday in November until the end of March, ten meetings being held in each season. [Its meetings are now held in the Criterion Restaurant, and take place on Mon-

day evenings instead of Saturdays.] In the earlier years of its existence the number both of professional and non-professional members at each dinner rarely exceeded eighteen, but now, from sixty to seventy dine together. The management of the Club is in the hands of the officers, who are the proprietors, and each of whom in turn takes the chair, and is alone responsible for the entertainment. The musical programmes now consist mainly of glees, although an occasional catch is introduced. [The professional members at present (1907) are Messrs. W. Coward, G. May, E. Dalzell, F. Norcup, G. and H. Stubbs, assisted by a boy treble. The officers are Messrs. J. A. Brown, Fred. Walker, and Robt. Hilton.] For non-professional members there is an entrance fee of three guineas, and an annual subscription for the ten meetings and dinner of five guineas. C. M.

ROUSSEAU, JEAN JACQUES, born at Geneva, June 28, 1712, died at Ermenonville, near Paris, July 8, 1778, five weeks after Voltaire. The details of his life are given in his *Confessions*; we shall here confine ourselves to his compositions, and his writings on music. Although, like all who learn music late in life and in a desultory manner without a master, Rousseau remained to the end a poor reader and an indifferent harmonist, he exercised a great influence on French music. Immediately after his arrival in Paris he read a paper before the Académie des Sciences (August 22, 1742) on a new system of musical notation, which he afterwards extended and published under the title of *Dissertation sur la musique moderne* (Paris, 1743, 8vo). His method of representing the notes of the scale by figures—1, 2, 3, 4, 5, 6, 7—had been already proposed by Souhaitty, but Rousseau's combinations, and especially his signs of duration, are so totally different as entirely to redeem them from the charge of plagiarism. A detailed analysis and refutation of the system may be found in Raymond's *Des principales systèmes de notation musicale* (Turin, 1824, 8vo), to which the reader is referred; but it is evident that, however convenient notation by means of figures may be for writing a simple melody, it becomes as complicated as the old system when modulation or polyphony are attempted. Its very uniformity also deprives the reader of all assistance from the eye; the sounds must be spelt out one by one, and the difficulty of deciphering orchestral combinations or complicated harmonies becomes almost insuperable.

Copying music had been Rousseau's means of livelihood, and this led him to believe that the best way to learn an art is to practise it; at any rate he composed an opera, 'Les Muses galantes' (1747), which was produced at the house of La Popelinière, when Rameau, who was present, declared that some pieces showed the hand of a master, and others the ignorance of a schoolboy. Not being able to obtain access to any of the

¹ 'Come now a roundel and a fairy song.'
Midsummer Night's Dream, act ii. sc. 2.

theatres, Rousseau undertook to write the articles on music for the *Encyclopédie*, a task which he accomplished in three months, and afterwards acknowledged to have been done hastily and unsatisfactorily. We have mentioned in the article RAMEAU (*ante*, p. 22) the exposé by that great musician of the errors in the musical articles of the *Encyclopédie*; Rousseau's reply was not published till after his death, but it is included in his complete works.

Three months after the arrival in Paris of the Italian company who popularised the 'Serva padrona'¹ in France, Rousseau produced 'Le Devin du village' before the King at Fontainebleau, on Oct. 18 and 24, 1752. The piece, of which both words and music were his own, pleased the court, and was quickly reproduced in Paris. The first representation at the Académie took place March 1, 1753, and the last in 1828, when some wag² threw an immense powdered perruque on the stage and gave it its deathblow. [DEVIN DU VILLAGE, vol. i. p. 692a.] It is curious that the representations of this simple pastoral have coincided so exactly with the vehement discussions to which the performances of Italian opera gave rise. We cannot enter here upon the literary quarrel known as the 'Guerre des Bouffons,' or enumerate the host of pamphlets to which it gave rise,³ but it is a strange fact, only to be accounted for on the principle that man is a mass of contradictions, that Rousseau, the author of the 'Devin du Village,' pronounced at once in favour of Italian music.

His *Lettre sur la musique Française* (1753) raised a storm of indignation, and not unnaturally, since it pronounces French music to have neither rhythm nor melody, the language not being susceptible of either; French singing to be but a prolonged barking, absolutely insupportable to an unprejudiced ear; French harmony to be crude, devoid of expression, and full of mere padding; French airs not airs, and French recitative not recitative. 'From which I conclude,' he continues, 'that the French have no music, and never will have any; or that if they ever should, it will be so much the worse for them.' To this pamphlet the actors and musicians of the Opéra replied by hanging and burning its author in effigy. His revenge for this absurdity, and for many other attacks, was the witty *Lettre d'un symphoniste de l'Académie royale de musique à ses camarades de l'orchestre* (1753), which may still be read with pleasure. The æsthetic part of the *Dictionnaire de musique* which he finished in 1764 at Motiers-Travers, is admirable both for matter and style. He obtained the privilege of printing it in Paris,

¹ It has been generally supposed that the 'Serva padrona' was not heard in Paris before 1762: this, however, is a mistake; it had been played so far back as Oct. 4, 1746, but the Italian company who performed it was not satisfactory, and it passed almost unnoticed.

² Supposed to have been Berlioz, but he exculpates himself in his *Mémoires*, chap. xv.

³ See Chouquet's *Histoire de la musique dramatique*, pp. 134 and 434.

April 15, 1765, but did not make use of the privilege till 1768; the Geneva edition, also in one vol. 4to, came out in 1767. In spite of mistakes in the didactic, and serious omissions in the technical portions, the work became very popular, and was translated into several languages; the English edition (London, 1770, 8vo) being by William Waring.

Rousseau's other writings on music are: *Lettre à M. Grimm, au sujet des remarques ajoutées à sa Lettre sur Omphale* (1752), belonging to the early stage of the 'Guerre des Bouffons'; *Essai sur l'origine des langues*, etc. (1753), containing chapters on harmony, on the supposed analogy between sound and colour, and on the music of the Greeks; *Lettre à M. l'Abbé Raynal au sujet d'un nouveau mode de musique inventé par M. Blainville*, dated May 30, 1754, and first printed in the *Mercur de France*; *Lettre à M. Burney sur la Musique, avec des fragments d'Observations sur l'Alceste italienne de M. le chevalier Gluck*, an analysis of 'Alceste' written at the request of Gluck himself; and *Extrait d'une réponse du Petit Faiseur à son Prête-Nom, sur un morceau de l'Orphée de M. le chevalier Gluck*, dealing principally with a particular modulation in 'Orphée.' From the last two it is clear that Rousseau heartily admired Gluck, and that he had by this time abandoned the exaggerated opinions advanced in the *Lettre sur la musique Française*. The first of the above was issued in 1752, the rest not till after his death; they are now only to be found in his complete works.

On Oct. 30, 1775, Rousseau produced his 'Pygmalion' at the Comédie Française; it is a lyric piece in one act, and caused some sensation owing to its novelty. Singing there was none, and the only music consisted of orchestral pieces in the intervals of the declamation. He also left fragments of an opera 'Daphnis et Chloé' (published in score, Paris, 1780, folio), and a collection of about a hundred romances and detached pieces, to which he gave the title 'Consolations des Misères de ma vie' (Paris, 1781, 8vo); in the latter collection are the graceful 'Rosier,' often reprinted, and a charming setting of Rolli's 'Se tu m'ammi.' Rousseau was accused of having stolen the 'Devin du Village' from a musician of Lyons named Granet, and the greater part of 'Pygmalion' from another Lyonnais named Coigniet. Among his most persistent detractors is Castil-Blaze (see *Molière musicien*, ii. 409), but he says not a word of the 'Consolations.' Now any one honestly comparing these romances with the 'Devin du Village,' will inevitably arrive at the conviction that airs at once so simple, natural, and full of expression, and so incorrect as regards harmony, not only may, but must have proceeded from the same author. There is no doubt, however, that the instrumentation of the 'Devin' was touched up, or perhaps

wholly re-written, by Francœur, on whose advice, as well as on that of Jelyotte the tenor singer, Rousseau was much in the habit of relying. An air ('de trois notes') and a duettino, melodious and pretty but of the simplest style, are given in the *Musical Library*, vol. iii. G. C.

ROUSSEAU'S DREAM. A very favourite air in England in the early part of the 19th century. Its first appearance under that name is presumably as 'an Air with Variations for the Pianoforte, composed and dedicated to the Rt. Hon. the Countess of Delaware, by J. B. Cramer. London, Chappell' [1812].

But it is found (with very slight changes) a quarter of a century earlier, under the title of 'Melissa. The words by Charles James, Esq., adapted to the Pianoforte, Harp, or Guitar. London, J. Dale, 1788.' The melody occurs in the 'Pantomime' in Scene 8 of the 'Devin du Village,' where its form is as follows:—

[The tune, no doubt, made its way in England through the adaptation of the opera by Dr. Burney, as 'The Cunning Man,' in 1766. It seems to have been first adapted to a hymn in Thomas Walker's 'Companion to Dr. Rippon's Tunes' (1825), and after its appearance in 'Sacred Melodies' (1843), with the name 'Rousseau' attached to it, became widely popular as a hymn-tune. W. H. G. F.] The origin of the title 'Dream' is not forthcoming. G.

ROUSSEAU, SAMUEL ALEXANDRE, was born at Neuve-Maison (Aisne), June 11, 1853, and studied at the Paris Conservatoire, where he gained successively the first organ prize in 1877, in César Franck's class, and the Grand Prix de Rome in 1878 with 'La Fille de Jephté.' In the latter year the Prix Cressent was awarded to his opéra-comique, 'Dinorah,' which was produced at the Opéra-Comique in December 1879. Works sent from Rome, and executed at the Conservatoire, were 'Labines' (1880), 'Raddir' (1881), 'La Florentina' (1882). He was for many years maître de chapelle in Sainte-Clotilde, and chorus-master of the Société des

Concerts du Conservatoire. He wrote a great quantity of admirable church music, two masses, motets, organ pieces, etc.; secular choral works, pieces for piano, harmonium, violin, small orchestra, etc. and songs. He was president of the Société des Compositeurs, and vice-president of the Association de la critique musicale et dramatique. His most famous work was the opera, 'La Cloche du Rhin,' in three acts, brought out at the Paris Opéra, June 8, 1898; another three-act opera, 'Mérowig,' gained the prize of the City of Paris, and produced at Nancy, Jan. 12, 1899. Rousseau died of a tumour on the brain, in Paris, Oct. 1, 1904. G. F.

ROVELLI. A family of eminent Italian musicians. GIOVANNI BATTISTA was first violin in the orchestra of the church of S. Maria Maggiore of Bergamo, at the beginning of the 19th century. GIUSEPPE, his son, was a violoncellist, born at Bergamo in 1753, and died at Parma, Nov. 12, 1806. Of ALESSANDRO we only know that he was at one time director of the orchestra at Weimar, and that he was the father of PIETRO, who was born at Bergamo, Feb. 6, 1793, and received his first lessons, both in violin-playing and the general science of music, from his grandfather. By an influential patron he was sent to Paris to study under R. Kreutzer, and his playing attracted much attention there. On his father's appointment to Weimar he joined him for a time. At the end of 1814 we find him at Munich, playing with great applause. He remained there for some years, and was made 'Royal Bavarian chamber-musician,' and 'first concerto-player.' In Feb. 1817 he was playing at Vienna; there he married Micheline, daughter of E. A. Förster, and a fine PF.-player, and in 1819 went on to Bergamo, took the place once occupied by his grandfather, and seems to have remained there, suffering much from bad health, till his death, Sept. 8, 1838. The writer in the *Allg. mus. Zeitung* for Dec. 26, 1838, from whom the above facts have been mainly taken, characterises his playing as 'simple, expressive, graceful, noble; in a word, classical—a style which takes instant possession of the heart of the hearer.' In other notices in the same periodical, he is said to have inherited the pure, singing, expressive style of Viotti, and practised it to perfection. Moliqwas his pupil at Munich. G.

ROVESCIO, AL. A term used, in instrumental music, to express two different things. (1) An imitation by contrary motion, in which every descending interval in the leading part is imitated by an ascending one, and *vice versa*; see Moscheles's *Étude 'La Forza'*, op. 51. (2) A phrase or piece which may be played backwards throughout. It is then synonymous with CANCRIZANS. An interesting example occurs in the minuet of a Sonata for PF. and violin by Haydn, in which, on the repetition after the Trio, the minuet is played backwards, so as to

end on the first note, Haydn's indication being *Mennetto D.C. wird zurückgespielt.* [SEE RECTE ET RETRO.]

Mennetto al Rovescio.

[The Repeat, as played after the Trio.]

F. T.

ROW OF KEYS. A single CLAVIER or MANUAL. The term is not applied, in the organ, to a pedal-clavier from the simple fact that one row of keys is all that is required by the feet; two rows of pedal-keys have sometimes been constructed, but they have proved always unnecessary and generally unmanageable. Harpsichords had often two rows of keys acting on different sets of jacks, and thus allowing of changes of force and quality of tone. J. S.

ROYAL ACADEMY OF MUSIC, 1720-1728. From 1717 to 1720 there was no Italian Opera in London, but in the latter year a sum of £50,000 was raised by subscription, and an establishment was founded for the performance of Italian operas. This was the first Royal Academy of Music. It consisted of a Governor, a Deputy-Governor, and twenty Directors. The first governor was the Duke of Newcastle, the deputy-governor was Lord Bingley, and the directors included the leaders of society at the Court of George I. Buononcini was invited to England from Rome, Ariosti from Berlin, and Handel left Cannons and went to Dresden to engage singers. Under these brilliant auspices the Academy opened at the King's Theatre in the Haymarket, on April 2, 1720, with Giovanni Porta's 'Numitor,' and the following strong cast:—Senesino, Durastanti, Boschi, and Berenstadt. The season ended on June 25. It was remarkable for the production of Handel's 'Radamisto' and D. Scarlatti's 'Narciso,' the latter conducted by Roseingrave, and including Mrs. Anastasia Robinson in the cast. The second season lasted from Nov. 19, 1720, to July 5, 1721. The new works performed were 'Astarto' (Buononcini), 'Arsace' (a pasticcio), 'Muzio Scaevola' (Ariosti, Buononcini, and Handel), and 'Ciro' (Ariosti). During the first year of the undertaking £15,000 of the subscription had been spent. The third season began Nov. 1, 1721, and ended June 16, 1722. The new operas were Handel's 'Floridante,' Buononcini's 'Crispo'

and 'Griselda.' The fourth season lasted from Nov. 7, 1722, to June 15, 1723, and was remarkable for the first appearance in England

of Cuzzoni, who sang in Handel's 'Ottone' on Jan. 12. The other new works (besides 'Ottone') were Ariosti's 'Coriolano,' Buononcini's 'Erminia,' and Handel's 'Flavio.' In the fifth season (Nov. 27, 1723, to June 13, 1724) Buononcini's 'Farnace,' Ariosti's 'Vespasiano,' and a pasticcio called 'Aquilio,' were produced. At the end of the season Mrs. Robinson retired from the stage. The sixth season (Oct. 31, 1724, to May 19, 1725) opened with Handel's 'Tamerlano,' Ariosti's 'Artaserse' and 'Dario' (partly by Vivaldi), Handel's 'Rodelinda,' Buononcini's 'California,' and Vinci's 'Elpidia' were the other new works produced. The seventh season (November 1725 to June 1726) ended abruptly, owing to the illness of Senesino, but it was remarkable for the first appearance of the celebrated Faustina Hasse, who sang in Handel's 'Alessandro' on May 5. Handel's 'Scipione' was also produced in March. Owing to Senesino's absence, the operas were suspended till Christmas, and the next season ended on June 6, 1727. Ariosti's 'Lucio Vero,' Handel's 'Admeto,' and Buononcini's 'Astyanax' (the last of his operas performed at the Academy) were the chief works; but the season, although short, was enlivened by the continual disturbances caused by the rivalry between Cuzzoni and Faustina. The ninth season lasted from Oct. 3, 1727, to June 1, 1728. The operas were entirely under Handel's direction: his 'Siroe,' 'Tolomeo,' and 'Riccardo I' were produced, but the success of the 'Beggars' Opera' at Lincoln's Inn Fields Theatre, as well as the continual disputes and dissensions amongst the singers, caused the season to be more than usually disastrous. At the end of it, the whole sum subscribed, as well as the receipts, was found to have been entirely spent. The company was dispersed, and although a few meetings of the court were held during the year, the establishment was allowed to die gradually, and was never revived.¹

W. B. S.

¹ Further information as to the Royal Academy of Music will be

ROYAL ACADEMY OF MUSIC. The original plan for this institution was proposed by Lord Westmorland (then Lord Burghersh) at a meeting of noblemen and gentlemen held at the Thatched House Tavern, London, on July 5, 1822. The proposal meeting with approval, at a second meeting, July 12, rules and regulations were drawn up, and a committee was appointed to carry out the undertaking. According to the rules adopted, the constitution of the new Academy was to be modelled upon the British Institution. The king was announced as the principal Patron, the government was to consist of a committee of twenty-five Directors and a sub-committee of nine subscribers, and the school was to be supported by subscriptions and donations. There was also to be a Board, consisting of the Principal and four professors, and the number of pupils was not to exceed forty boys and forty girls, to be admitted between the ages of ten and fifteen, and all to be boarded in the establishment. A sub-committee, the members of which were Lord Burghersh, Sir Gore Ouseley, Count St. Antonio, Sir Andrew Barnard, Sir John Murray, and the Hon. A. Macdonald, was empowered to form the Institution. Dr. Crotch was appointed the first Principal, and by September 1, the sum of £4312:10s. had been collected, including an annual subscription of 100 guineas from George IV., which was continued by his successors, William IV. and Queen Victoria. In November the house, No. 4 Tenterden Street, Hanover Square, was taken for the new school, but the opening was deferred until March 1823, on the 24th of which month the first lesson was given by Mr. Cipriani Potter to Mr. Kellow Pye.

The Academy began its labours with the following staff: Head Master—Rev. John Miles. Governess—Mrs. Wade. Principal—Dr. Crotch. Board of Professors—Messrs. Attwood, Greate-rex, Shield, and Sir George Smart. Supplementary members of the Board—Messrs. Horsley and J. B. Cramer. Professors—Messrs. Aufossi, Andrew, Bishop, Bochsa, Crivelli, F. Cramer, Clementi, Coccia, Cerruti, Dragonetti, Dizi, Griesbach, Hawes, Ireland, C. Kramer, Liverati, Lindley, Loder, Mori, Macintosh, Nicholson, Cipriani Potter, Puzzi, Ries, H. Smart, Spagnoletti, Watts, Willmann, and Caravita.¹

The Foundation students who were first elected were the following: Girls—M. E. Lawson, C. Smith, M. Chancellor, S. Collier, E. Jenkyns, M. A. Jay, C. Bromley, H. Little, J. Palmer, C. Porter. Boys—W. H. Holmes, H. A. M. Cooke,² A. Greate-rex, T. M. Mudie, H. G. Blagrove, Kellow J. Pye, W. H. Phipps, A. found in Burney's *History of Music*, vol. iv., from which the above is compiled.

¹ Although the above was published in the *Morning Post* as the list of professors, instruction seems only to have been given by the following:—Dr. Crotch, Messrs. Lord, Potter, Haydon, Crivelli, F. Cramer, Spagnoletti, Lindley, Bochsa, Cooke, Caravita, Clechetti, Goodwin, J. B. Cramer, Beale, and Finart; and by Misses. Bignoli, Reguindin, and Miss Adams. (See First Report of the Committee, June 2, 1822.)

² Known as 'Grattan Cooke.'

Devaux, C. Seymour, E. J. Neilson, and C. S. Packer. The pupils were divided into two classes, those on the foundation paying ten guineas per annum, while extra students paid twenty guineas, or if they lodged and boarded in the establishment, thirty-eight guineas. Although the first report of the Committee (June 2, 1823) was satisfactory, yet financial difficulties soon made themselves felt. In March 1824, the Committee reported a deficiency for the current year of £1600, if the institution were conducted on the same plan as before. To meet this, the difference between the students' payments was abolished, and the fees were fixed for all at £40, the professors at the same time giving their instruction gratis for three months. Lord Burghersh also applied to the Government for a grant, but without effect. In 1825 further alterations were made as to the admission of students, by which the numbers amounted in four months' time to a hundred, and Lord Burghersh made another appeal for a Government grant. In spite of this, the year's accounts still showed an unsatisfactory financial condition. During the latter part of the year Moscheles was included among the staff of professors. Early in 1826 the increased number of students compelled the Academy to enlarge its premises, the lease³ of No. 5 Tenterden Street was bought, and the two houses were thrown into one. In February the Government were petitioned for a charter. In reply it was stated that though unwilling to give a grant, they were ready to defray the cost of a charter. In 1827 the financial condition of the Academy was so disastrous that it was proposed to close the institution; but a final appeal to the public procured a loan of £1469, beside further donations, enabling the Directors to carry on the undertaking on a reduced scale and with increased fees. Henceforward the state of things began to mend. The charter was granted on June 23, 1830. By this document the members of the Academy and their successors were incorporated and declared to be, and for ever hereafter to continue to be by the name of the 'Royal Academy of Music,' under the government of a Board of Directors, consisting of thirty members, with power to make rules and regulations; a Committee of Management, with full power over the funds and both students and professors; and a Treasurer.

In 1832 Dr. Crotch resigned his post of Principal, and was succeeded by Cipriani Potter, who retained office until his resignation in 1859. The financial position of the Academy, although not prosperous, remained on a tolerably secure footing. In 1834, William IV. directed that a quarter of the proceeds of the Musical Festival held in Westminster Abbey should be handed over to the institution. This sum, amounting

³ Relinquished in or before 1853.

to £2250, was devoted by the Committee to the foundation of four King's Scholarships, to be competed for by two male and two female students. Instead, however, of being invested separately, the fund was merged in the general property of the Academy, a mistake which eventually led to the discontinuance of the scholarships. For the next ten years the financial condition of the Academy continued to fluctuate. In July 1853 the Committee of Management (which was totally unprofessional in its constitution) summoned the professors, revealed to them the decline of the funded property, and asked their counsel as to the remedies to be adopted. The professors advised that the management should be made entirely professional. This course was so far adopted that a Board of Professors was appointed to advise the Committee.

The first act of this Board (Sept. 1853) was to recommend the discontinuance of the practice of students lodging and boarding on the premises. This recommendation was adopted, and since that time the Academy only receives day students. The Board formed in 1853 was disbanded by Lord Westmorland in 1856, but after his death in 1859, a new Board was formed; this, however, found itself obliged to resign in 1864. Before its resignation it drew up a memorial to Government, praying for an annual grant. After a conference with a deputation of Professors, Mr. Gladstone, then Chancellor of the Exchequer, inserted in the estimates for the year a sum of £500 'to defray the charge which will come in course of payment during the year ending March 31, 1865, for enabling the Directors of the Royal Academy of Music to provide accommodation for the Institution.' In 1866, upon the change of Administration, suggestions were made to the Committee on the part of the Government, and were renewed personally in 1867 by the then Chancellor of the Exchequer, in consequence of which the Committee was induced to expend the whole of its funds, in order to accommodate the institution to the designs in which it was invited to participate. In 1867, Lord Beaconsfield (then Mr. Disraeli), in reply to a question as to the grant, announced in the House of Commons that 'the Government were of opinion that they would not be authorised in recommending any enlargement of the grant, the results of the institution not being in fact of a satisfactory character.' This was followed by the total withdrawal of the grant, in order (to quote from an official letter addressed to Sir W. Sturndale Bennett) 'simply to give effect to the opinion that it was not so expedient to subsidise a central and quasi-independent association, as to establish a system of musical instruction under the direct control of some Department of Government.' In this emergency the Committee decided to close the establishment. The funds

(including the sum devoted to the King's Scholarships) were totally exhausted. The Professors met in 1868 to consider what could be done, and generously offered to accept a payment *pro rata*. It was then, however, announced that the Committee had resigned the Charter into the hands of the Queen. Upon this the Professors obtained a legal opinion, to the effect that the Charter could not be resigned without the consent of every member of the Academy. As many of the members protested at the time against the resignation of the Charter, it was returned, and by great exertions on the part of the Professors, a new Board of Directors was formed under the Presidency of the Earl of Dudley, who appointed a new Committee of Management, in which the professional element formed an important ingredient. From the time of this change the institution has continued to prosper. In 1868, on the return to office of the Liberal Ministry, Mr. Gladstone restored the annual grant of £500. In 1876 the number of pupils had so increased that the lease of the house adjoining the premises in Tenterden Street had to be repurchased out of the savings of the institution. This house was joined on to the original premises, and a concert-room was formed out of part of the two houses, which though small has proved a great boon not only to the students for their regular concerts, but to many concert-givers for whose purposes the more extensive rooms of St. James's Hall, Exeter Hall, etc., were too large. [For some time the room was not licensed as a public concert room, and at the present time it is not available for outside performances.] In July 1880 Mr. William Shakespeare was appointed conductor of the Students' Concerts, *vice* Mr. Walter Macfarren. He was succeeded in 1886 by Sir Joseph Barnby, but since the election of Sir A. C. Mackenzie the Principal has conducted the students' concerts. [It is since that appointment of Sir Alexander Campbell Mackenzie as Principal in Feb. 1888 that the real tide of prosperity for the institution set in, since which date it has never slackened. The neighbouring houses, 11 and 12 Dering Street, 6 Tenterden Street, and the upper part of 3 Tenterden Street have been successively added to the premises, and still the accommodation is insufficient. The number of students, which was 300 in 1876, rose to 500 in 1896, and remains at that number, the full capacity of the school.

The following have been the Principals of the Academy from its foundation to the present time: Dr. Crotch (1823-32), Cipriani Potter (1832-59), Charles Lucas (1859-66), William Sturndale Bennett (1866-75), George Alexander Macfarren (1875-87), Alexander Campbell Mackenzie (1888).

The Academy is supported by the Government grant, subscriptions, donations, and fees from students. It is under the direction of a President (H.R.H. the Duke of Connaught and

Strathearn, K.G.), four Vice-Presidents (the Earl of Kilmorey, Lord Strathcona, Lord Glenesk, and Lord Alverstone), about twenty Directors, amongst whom are Earls De Grey and Shaftesbury, Sir Benjamin Baker and other distinguished gentlemen, and a Committee of Management, consisting partly of Professors of the Institution and partly of well-known business men who are so good as to place their powers at the service of the Institution. It was the Principal's wish that his office and that of Chairman of this Committee should be separate functions, and accordingly since 1890 this has been the case. Mr. Thomas Threlfall was elected to the latter post in 1890, and filled it with zeal and distinguished success till his death in February 1907. The Committee therefore consists, at the present date, of Messrs. P. L. Agnew, Oscar Beringer, E. E. Cooper (Treasurer), F. Corder (Curator), C. T. D. Crews, Sir Geo. Donaldson, H. C. Gooch, Sir A. C. Mackenzie (Principal), A. Randegger, C. Rube, John Thomas, F. P. Tosti, Fred Walker, and Hans Wessely. The secretary is Mr. F. W. Renaut, and the Lady Superintendent Miss Marion White. A staff of one hundred and two Professors and about twenty sub-professors (students) gives instruction in every branch of music, besides which there are classes for Languages, Diction, Elocution, Opera, Dancing, Drama, Fencing, and Deportment. Students cannot enter for less than a year, nor for a single subject; the normal course is three years, and all pupils receive an all-round musical training. The library of the institution has been noticed in vol. ii. pp. 705-6.

The list of scholarships and prizes open to competition is too large for enumeration, being fifty-nine of the former and thirty-three of the latter (not all awarded annually); but mention should be made of the noble foundation, by the late Mrs. Ada Lewis Hill, of the fifteen scholarships bearing her name, five of which are awarded each year and tenable for three years. Deserving but indigent musical ability is also assisted by the Students' Aid Fund, of which the interest is appropriated, at the Committee's discretion, towards the reduction of the fees of talented pupils.]

Public performances have been given by the pupils of the Royal Academy at various intervals from the date of its foundation. Their locality was sometimes in the Hanover Square Rooms and sometimes at Tenterden Street. [The present custom is to have Fortnightly Concerts of chamber and organ music at the Academy, and one chamber concert and one Orchestral ditto at the Queen's Hall every term. Public operatic and dramatic performances are also given from time to time, these being sometimes of works by the students themselves. At the orchestral practices on Tuesday and Friday afternoons the pupils have the opportunity of hearing their own instrumental or vocal com-

positions, and of performing concertos and songs with orchestral accompaniments.

An account of the Royal Academy would be incomplete without some reference to the part it has taken in the holding of public examinations—so prominent a factor in modern musical life. For many years the Royal Academy of Music held Local Examinations throughout the kingdom, which were popular and lucrative. In order, however, to raise the standard of these examinations and assist the public towards the elimination of defective instruction in music, the Royal Academy of Music entered into negotiations with the Royal College of Music for combined action in the matter. These negotiations happily resulted in a union of the forces of the two Institutions for the purposes of Local Examinations in Music, and the formation, in the year 1889, of the 'Associated Board,' under the Presidency of H.R.H. the Prince of Wales. The work of the 'Associated Board' of the two great Chartered Schools of Music has already produced excellent results. The scheme includes the Local Examination of Schools, as well as Local Centre Examinations, and has recently been extended to the Colonies.

The Academy continues its own separate Examination in London (independent of Academy Teaching) of music teachers and performers. This is known as the 'Metropolitan Examination.' Successful candidates at this Examination, which increases annually in popular estimation, receive Diplomas certifying to their proficiency, and are created by the Directors, Licentiates of the Royal Academy of Music.] W. B. S.; with additions by F. C.

ROYAL AMATEUR ORCHESTRAL SOCIETY, THE, was established in 1872 by H.R.H. the Duke of Edinburgh (late Duke of Coburg), who was the first president, and leader of the orchestra for many years. Mr. J. R. Gow was honorary secretary, and Mr. George Mount acted as conductor for the first twenty-six years of the Society's existence, retiring in 1897, when Mr. Ernest Ford, the present conductor, was appointed. Sir Arthur Sullivan conducted the first concert in 1873, and took a lifelong interest in the institution, which has done much to raise the standard of amateur proficiency in London. The subscription is two guineas, and the present honorary secretary is Hermann Schmettau, Esq. M.

ROYAL CHORAL SOCIETY. On the opening of the Albert Hall, Knightsbridge, in 1871, a choral society was formed by Charles Gounod, and was amalgamated in 1872 with a successful institution called 'Barnby's Choir,' and conducted by that musician, the name being from that time 'The Royal Albert Hall Choral Society.' The change to the present title was made in 1888, by command of Queen Victoria. The conductor was Sir Joseph Barnby until his death in 1896, when he was succeeded

by Sir Frederick Bridge, who still fills the post with distinction. The great number of voices required to produce a tone adequate to the size of the building makes it unwise to attempt any very complicated choral music or delicate effects of vocal writing; this cause, added to the indifference of the musical amateurs in London to new choral works, is responsible for the lack of interest which is sometimes complained of in the Society's repertory. But, although the institution has relied for its chief successes upon the hackneyed oratorios, the list of its achievements is a long and honourable one. Fourteen performances took place, in the earlier years, of Bach's *St. Matthew Passion*; three have been given of Beethoven's *Choral Symphony*, while his *Mass in D* has been attempted. Gounod's '*Redemption*' was for many years a regular attraction, and other choral works of the composer's were frequently given. In addition to the more hackneyed oratorios of Handel, '*Judas Maccabæus*,' '*Belshazzar*,' '*Theodora*,' '*Samson*,' '*Jephtha*,' '*L' Allegro*,' and '*Alexander's Feast*' have been performed; and certain notable foreign compositions have been introduced to England by the Society, such as Verdi's famous '*Requiem*,' Wagner's '*Parsifal*' (in concert form), and Benoit's '*Lucifer*.' The English works given by the Society have been, for the most part, repetitions of oratorios, etc. written for the provincial festivals, and therefore only new as regards London. Parry's '*War and Peace*' (1903), and the third part of Coleridge-Taylor's '*Hiawatha*,' completing the work, were given by the Society for the first time, as well as Bridge's '*Flag of England*' (1897) and '*Ballad of the Clampheddown*' (1899). M.

ROYAL COLLEGE OF MUSIC. For information as to the commencement of this institution see NATIONAL TRAINING SCHOOL, vol. iii. p. 354. The new institution was founded by the Prince of Wales at a meeting held at St. James's Palace, Feb. 28, 1882, and was opened by H.R.H. on May 7 of the following year. Negotiations took place with the ROYAL ACADEMY OF MUSIC with the object of a union with the two bodies; but these unfortunately came to nothing. Like its predecessor, the College rests on the basis of endowed scholarships lasting not less than three years; but the funds for these are in this case provided by the interest of money subscribed throughout the country and permanently invested. The College opened with fifty Scholars elected by competition, of whom fifteen received maintenance in addition, and forty-two paying students. It was incorporated by Royal Charter on May 23, 1883, and is governed by a Council, presided over by the Prince of Wales (the present King), and divided into a Finance Committee, and an Executive Committee. The staff was as follows:—Director, Sir George Grove, D.C.L.; Principal Teachers,

forming the board of Professors, J. F. Bridge, Mus.D.; H. C. Deacon; Henry Holmes; Mme. Lind-Goldschmidt; Walter Parratt; C. Hubert H. Parry, Mus.D.; Ernst Pauer; C. V. Stanford, Mus.D.; Franklin Taylor; A. Visetti. Other principal teachers were Mme. A. Goddard; John F. Barnett; G. C. Martin, Mus.D.; R. Gompertz; C. H. Howell; F. E. Gladstone, Mus.D.; J. Higgs, Mus.B.; G. Garcia, etc. Registrar, G. Watson, jun. At the dissolution of the Sacred Harmonic Society (1882) the valuable library was acquired for the College through the exertions of Sir P. Cunliffe Owen, and the library of the Concerts of Antient Music was given by Queen Victoria. In 1887 the Alexandra House was opened, containing a beautiful concert hall, where the students' concerts were regularly held, as well as accommodation for 100 ladies, some of whom are pupils of the College.

When the accommodation in the old building was found insufficient for the needs of the College, a new site was granted in Prince Consort Road, and the first stone of the new building was laid on July 8, 1890. The structure, erected by the generosity of the late Mr. Samson Fox, M.I.C.E., was formally opened on May 2, 1894, and the fine concert-room connected with it was opened on June 13, 1901. In 1894, on the resignation of Sir George Grove, Sir Hubert Parry was appointed director of the institution, and has filled the post with great distinction till the present time. The Council consists (1907) of the following:—H.R.H. The Prince of Wales, H.R.H. Prince Christian, the Archbishop of Canterbury, the Marquis of Northampton, the Earls of Cawdor, Pembroke, Plymouth, Shaftesbury; Lords Revelstoke, Althorp, Farquhar, The Lord Mayor; Messrs. C. B. Stuart Wortley, Herbert J. Gladstone, G. W. Spencer Lyttelton, Robert H. Lyttelton, Robert T. O'Neill, Sir J. Whittaker Ellis, Sir Edward W. Hamilton; Messrs. Lionel Benson, Jacques Blumenthal, Eaton Fanning, A. W. Fox, Rev. Canon F. A. J. Hervey; Messrs. William H. Leslie, Alfred H. Littleton, C. Harford Lloyd, R. F. M'EWen, George A. Macmillan, Charles Morley, Howard Morley, S. Ernest Palmer, Edward H. Pember; and J. W. Sidebotham, Esq.

The Board of Professors includes the following names: for singing, Messrs. Randegger and Visetti; piano, Mr. Franklin Taylor; organ, Sir Walter Parratt; violin, Señor Arbos and Mr. Rivarde; composition, Sir C. V. Stanford; harmony, etc., Sir J. F. Bridge. A large number of professors in addition to these are on the staff. At the present time, the number of scholars is 67, and of paying students 352.

In 1889 the College of Music and the Royal Academy joined in forming the 'Associated Board,' intended to bring the local examinations of the two schools into line with each other. Both institutions have benefited by the new undertaking, and the standard of musical educa-

tion in all parts of the Empire has been importantly raised. In 1894 Sir George Donaldson presented a large collection of musical instruments. (See vol. iii. p. 337.) The 'Patron's Fund' was instituted in 1903 by Mr. S. Ernest Palmer, who handed to the College sums amounting in all to £27,000 for the encouragement of composition by the younger British musicians, etc.

ROYAL COLLEGE OF ORGANISTS. See ORGANISTS, ROYAL COLLEGE OF, vol. iii. p. 564.

ROYAL IRISH ACADEMY OF MUSIC, THE, founded in 1848, was re-organised in 1856, the necessary funds being obtained by private subscription, and by the proceeds of operatic performances given by amateur musicians resident in the country. It was not until 1870 that the English Government, of which Mr. Gladstone was then head, voted it an annual grant of £150, subsequently increased to £300, on condition that £100 should be contributed annually by private subscribers. The title 'Royal' was granted in 1872.

Various capital sums have been acquired by the Academy at different times, chiefly through the agency of Sir Francis Brady, Bart., whose efforts on behalf of the Academy cannot be forgotten. These are: The Begley Fund, £125, the Albert Fund, £940, the Vandeleur Bequest, £4000, and the Coulson Bequest, £13,000. The last named was left by Miss Elizabeth Coulson in 1883, to found a School in which 'the children of respectable Irish parents' could be taught instrumental music. The money was handed over to the Academy for administration in 1887 by the Commissioners of Charitable Donations and Bequests, the Academy having been first reconstituted and incorporated under the Educational Endowments (Ireland) Act of 1885.

The Government of the Academy consists at present of: a Patron, His Majesty the King; a vice-patron, H. R. H. the Duke of Connaught; a President, the Lord Lieutenant of Ireland; nine vice-presidents; a Board of twenty-four Governors, of whom twelve are nominated by subscribers, eight by the Municipal Corporation, three by the Coulson Endowment trustees, and one by the Board of Studies, which consists of the Professors. There is no Director, orders being carried out by a Secretary under direction of the Board of Governors.

From small beginnings the Academy has come to hold a very important position in the musical life of the country. While almost every resident musician of distinction has been among its professors—among others Sir Robert Stewart, Mr. Joseph Robinson, Mrs. Fanny Robinson, Mr. R. M. Levey, Herr Elsner,—it has also been the means of bringing to Ireland many foreign artists of talent who have spent their lives in the country and rendered incalculable service in its musical development.

Notable among these must be mentioned the late Herr Bast the violoncellist, and also Signor Michele Esposito, who has created in Dublin a fine school of pianoforte playing, and founded an Orchestral Society of which he is at present conductor. The teaching staff of the Academy in 1906 numbered forty-one, and the students almost 500.

After 1856, the premises of the Academy were the upper portion of a house No. 18 St. Stephen's Green, the classes having previously been held in the rooms of the Antient Concert Society. In 1871 the Council purchased the present building, No. 36 Westland Row, which was the town residence of Sir FitzGerald Aylmer, a fine old house, but now quite inadequate to the needs of the Academy.

R. O. B.

ROYAL SOCIETY OF MUSICIANS OF GREAT BRITAIN, THE, was founded by the exertions of Festing the violinist, and Wiedemann the flautist, who were struck by the appearance of two little boys driving milch asses, who proved to be orphans of a deceased oboe-player named Kytch. [See FESTING, vol. ii. p. 27.] They immediately raised subscriptions to relieve the family, and feeling that some permanent establishment was required to meet similar cases, induced the most eminent music-professors of the day to associate themselves together as a Society for that purpose. This excellent work was formally accomplished on April 19, 1738, and amongst its first members were Handel, Boyce, Arne, Christopher Smith, Carey, Cooke, Edward Purcell, Leveridge, Greene, Reading, Hayes, Pepusch, and Travers. In 1739 the members of the Society executed a 'deed of trust,' which was duly enrolled in the Court of Chancery; the signatures of the members, 226 in number, include the most eminent professors of music of the time. The deed recites the rules and regulations for membership and for the distribution of the funds, and provides for regular monthly meetings at the sign of Saint Martin, in St. Martin's Lane. Handel took an especial and active interest in the welfare of the Society, composing concertos and giving concerts for the benefit of its funds, and at his death bequeathing to it a legacy of £1000. The Handel Commemoration held in Westminster Abbey in 1784 brought a further addition of £6000. In 1789 George III. granted the Society a charter, by virtue of which its management is vested in the hands of the 'Governors' and 'Court of Assistants.' In 1804 the funds of the Society not being in a flourishing condition, the king gave a donation of 500 guineas. Considerable sums have been given or bequeathed to the Society by members of the music profession, especially Signora Storace £1000, Crosdill £1000, Begrez £1000, Schulz £1000; the latest amount of 1000 guineas being that of Mr. Thomas Molineux (Feb. 10, 1881), for many years an eminent performer on the

bassoon and double-bass at Manchester, who died in 1891.

The Society pays away annually to relieve distress over £3000, which amount is provided by donations from the public, subscriptions and donations of members of the Society, and interest (about £2500 per annum) on the Society's funded property.

Members of the Society must be professional musicians, and are of both sexes. The Royal Society of Female Musicians was established in 1839 by several ladies of distinction in the musical profession, amongst others Mrs. Anderson, Miss Birch, Miss Dolby, and Miss Mounsey (Mrs. Bartholomew), in consequence of the Royal Society of Musicians having made no provision in their laws for the admission of female members. Practically it soon became evident that the co-existence of two separate societies with the same aim was resulting in considerable loss of sympathy and support; and that one expenditure would suffice for the management of both institutions, if they could be amalgamated. With the consent of the trustees and members this happy union was effected in 1866, and the two societies have now become one.

There is, says Dr. Burney, 'no lucrative employment belonging to this Society, excepting small salaries to the secretary and collector, so that the whole produce of benefits and subscriptions is nett, and clear of all deductions or drawbacks.' The large staff of physicians, surgeons, counsel, solicitors, give their gratuitous services to the Society. The present secretary is Mr. Charles Lucas, and the honorary treasurer Dr. W. H. Cummings. The Society's rooms are at No. 12 Lisle Street, Leicester Square, and contain some interesting memorials of music, as well as a collection of portraits, including Handel, by Hudson; Haydn; Corelli, by Howard; Geminiani, by Hudson; Purcell, by Closterman; C. E. Horn, by Pocock; John Parry, the elder; Sir W. Parsons; J. Sinclair, by Harlowe; Gaetano Crivelli, by Partridge; Domenico Francesco Maria Crivelli; J. S. Bach, by Clark of Eton; Beethoven, with autograph presenting it to C. Neate; W. Dance by his brother; and a life-size painting of George III. by Gainsborough. w. h. c.

ROZE, MARIE HIPPOLYTE, *née* PONSIN, born March 2, 1846, at Paris; received instruction in singing from Mocker at the Conservatoire, and in 1865 gained first prizes in singing and comic opera. She made her début August 16 of that year at the Opéra-Comique as Marie, in Hérold's opera of that name, and at once concluded an engagement for the next three years there. She created the part of Djelma in 'Le Premier jour de Bonheur' of Auber, at his request, on Feb. 15, 1868. After further instruction from Wartel she appeared at the Opéra as Marguerite in 'Faust' (Jan. 2, 1870),

returned to the Opéra-Comique to create the part of Jeanne in Flotow's 'L'Ombre,' July 7, 1870. At the outbreak of the war she left the opera for the army, and served with zeal in the ambulance. After the war she sang for a season at Brussels and elsewhere, and on April 30, 1872, first appeared in England at the Italian Opera, Drury Lane, as Marguerite, and as Marcelline in 'Les Deux Journées,' on its production (for one night only), June 20, 1872. The ensuing seasons, until 1881 (except 1878 and 1880) she sang at that theatre or at Her Majesty's, becoming a great favourite, both on account of her charm of person and manner, and by her readiness to undertake any part, from the small one of Berengaria in Balfe's 'Talismano' (Drury Lane, June 11, 1874), to Donna Anna, Ortrud, Aida, etc. She also appeared in the provinces, singing both in Italian and English in opera or the concert-room. In 1874 she married an American bass singer, Julius Edson Perkins, who died in the following year at Manchester. She afterwards married Mr. Henry Mapleson. In the winter of 1877 she made a highly successful visit to America, returning in 1879 to Her Majesty's Theatre, where her parts included Donna Anna, Donna Elvira, Pamina, Susanna, Alice, Leonora (Verdi), Agatha, Mignon, Carmen, Aida, Ortrud, etc. After singing at the Birmingham Festival of 1882 with great success, she joined the Carl Rosa Company from 1883 to 1889; in that time she added to her repertory Fidelio, and Elsa, and was the first representative in England of Manon Lescaut in Massenet's opera of that name. Margaret and Helen in Boito's 'Mefistofele,' Fadette in Maillart's 'Dragons de Villars,' Donna Maria in Marchetti's 'Ruy Blas,' are among the parts which she has sung on the first production of these works in English. Her impersonation of Carmen was her greatest success, as it was full of delicate detail, and presented Bizet's music in an ideal way. Many Carmens before and since have emphasised the wild, lawless nature of the gipsy more realistically than she chose to do; but none have brought out the individuality and charm of the musical conception so finely. She sang the part first in Italian in 1879 in America and afterwards in London, next in English in 1880 at Boston (U.S.A.), in 1883 at Manchester, and on April 15, 1884, appeared in it at Drury Lane, where it was a constant attraction of the Carl Rosa season. She sang it in 1889 in Italian at Covent Garden. Scarcely less effective was her Manon in Massenet's opera, first sung by her in English at Liverpool, Jan. 17, 1885, and at Drury Lane on May 7. In 1890 she settled in Paris as a teacher of singing, reappearing at long intervals in London and the English provinces in concerts. She made a farewell tour in 1894; her last appearance in London was as late as 1903,

when she sang at a concert given by one of her pupils.

A. C.

RUBATO, lit. 'robbed' or 'stolen,' referring to the values of the notes, which are diminished in one place and increased in another. The word is used, chiefly in instrumental music, to indicate a particular kind of licence allowed in order to emphasise the expression. This consists of a slight *ad libitum* slackening or quickening of the time in any passage, in accordance with the unchangeable rule that in all such passages any bar in which this licence is taken must be of exactly the same length as the other bars in the movement, so that if the first part of the bar be played slowly, the other part must be taken quicker than the ordinary time of the movement to make up for it; and *vice versa*, if the bar be hurried at the beginning, there must be a *rallentando* at the end. In a general way this most important and effective means of expression is left entirely to the discretion of the performer, who, it need scarcely be said, should take great care to keep it within due limits, or else the whole feeling of time will be destroyed, and the emphasis so desirable in one or two places will fail of its effect if scattered over the whole composition. Sometimes, however, it is indicated by the composer, as in the first Mazurka in Chopin's op. 6 (bar 9), etc. This licence is allowable in the works of all the modern 'romantic' masters, from Weber downwards, with the single exception of Mendelssohn, who had the greatest dislike to any modification of the time that he had not specially marked. In the case of the older masters, it is entirely and unconditionally inadmissible, and it may be doubted whether it should be introduced in Beethoven, although many great interpreters of his music do not hesitate to use it. [See TEMPO.] M.

RUBINELLI, GIOVANNI BATTISTA, celebrated singer, born at Brescia in 1753, made his first appearance on the stage at the age of eighteen, at Stuttgart, in Sacchini's 'Calliroe.' For some years he was attached to the Duke of Würtemberg's chapel, but in 1774 he sang at Modena in Paisiello's 'Alessandro nelle Indie' and Anfossi's 'Demofonte.' His success was very great; and during the next few years he performed at all the principal theatres in Italy. In 1786 he came to London, after a journey from Rome by no means propitious. The weather was unusually severe, and, in going through France, his travelling chaise was overturned at Macon; besides which, when approaching Dover, the boat that landed him was upset, and the unlucky singer remained for a time up to his chin in the water. In spite of these perils he made a successful début in a pasticcio called 'Virginia,' his own part in which was chiefly composed by Tarchi. He next sang with Mara, in 'Armida,' and in Handel's 'Giulio Cesare,' revived for him, with several interpolations from

Handel's other works. These are said to have been most admirably sung by Rubinelli.

After his season in London he returned to Italy, where he had enormous success at Vicenza and Verona, in 1791 and 1792, in 'La Morte di Cleopatra' of Nasolini, and 'Ageilao' of Andreozzi. In 1800 he left the stage, and settled at Brescia, where he died in 1829.

F. A. M.

RUBINI, GIOVANNI BATTISTA, one of the most celebrated tenor singers, was born at Romano, near Bergamo, on April 7, 1795. The son of a professor of music, he learned the rudiments of his art from his father, and at eight years old could sing in church choirs and play the violin in an orchestra. He was then placed as a pupil with one Don Santo, a priest, organist at Adro, who, however, soon sent him home again, saying that he had no talent for singing. In spite of this, the father persisted in teaching his unpromising son, and allowed him, at the age of twelve, to appear in public at the Romano theatre in a woman's part. The boy was next engaged at Bergamo as chorus-singer, and to play violin solos in the entr'actes. It happened while he was here that in a new drama that was brought out, an air by Lamberti, of considerable difficulty, had to be introduced, for which it was not easy to find a singer. The song was finally entrusted to young Rubini, who acquitted himself with much applause, and was rewarded by the manager with a present of five francs. His elation at the time must have been sadly damped just afterwards by the refusal of a Milan manager to engage him as chorus-singer, because of his insufficient voice.

After belonging for a time to a strolling company, and making an unsuccessful attempt at a concert tour with a violinist called Madi, he got a small engagement at Pavia, then another at Brescia for the Carnival; he next appeared at the San Moisè theatre at Venice, and lastly at Naples, where the director, Barbaja (according to Escudier), engaged him to sing with Pellegrini and Nozzari, in two operas written for him by Fioravanti. (The name of one of these operas 'Adelson e Salvina,' is identical with that of an early work of Bellini's, produced about this time.) With the public Rubini was successful, but so little does Barbaja appear to have foreseen his future greatness that he wished to part with him at the end of the first year's engagement, and only consented to retain his services at a reduced salary. Rubini preferred making some sacrifice to leaving Naples, where he was taking lessons of Nozzari, and he acceded to Barbaja's conditions, which very soon, however, had to be rescinded, owing to Rubini's brilliant successes at Rome (in 'La Gazza ladra') and at Palermo. Some time in 1819 he married Mlle. Chomel, known at Naples as La Comelli, a singer of some contemporary

GIOVANNI BATTISTA RUBINI

celebrity, a Frenchwoman by birth, and pupil of the Paris Conservatoire.

His first appearance at Paris was on Oct. 6, 1825, in the 'Cenerentola,' and was followed by others in 'Otello' and 'La Donna del Lago.' He was hailed unanimously as 'King of Tenors,' and began here the series of triumphs which lasted as long as his stage career. He was still bound by his engagement with Barbaja, who by this time had become aware of his worth, and only yielded him for six months to the Théâtre Italien, claiming him back at the end of that time to sing at Naples, then at Milan, and at Vienna.

Up to this time his laurels had been won in Rossini's music, on which his style was first formed, and it was not till now that he found his real element, the vehicle most congenial to his special individuality, and thanks to which he was to reach the summit of his fame. Rubini was the foundation and *raison d'être* of the whole phase of Italian opera that succeeded the Rossinian period. He and Bellini were said to have been born for one another, and in all probability Rubini was not more captivated by the tender, pathetic strains of Bellini, than the sensitive Bellini was influenced by Rubini's wonderful powers of expression. Such a singer is an actual source of inspiration to a composer, who hears his own ideas not only realised, but, it may be, glorified. During the whole composition of 'Il Pirata,' Rubini stayed with Bellini, singing each song as it was finished. To this fortunate companionship it cannot be doubted that we owe 'La Sonnambula' and 'I Puritani.' Donizetti, again, achieved no great success until the production of 'Anna Bolena,' his *thirty-second* opera, in which the tenor part was written expressly for Rubini, who achieved in it some of his greatest triumphs. It was followed by 'Lucia,' 'Lucrezia,' 'Marino Faliero,' and others, in which a like inspiration was followed by the same result.

Rubini first came to England in 1831, when freed from his engagement with Barbaja, and from that time till 1843 he divided each year between Paris and this country, singing much at concerts and provincial festivals, as well as at the Opera, and creating a *furor* wherever he went.

His voice extended from E of the bass clef to B of the treble, in chest notes, besides commanding a falsetto register as far as F or even G above that. A master of every kind of florid execution, and delighting at times in its display, no one seems ever to have equalled him when he turned these powers into the channel of emotional vocal expression, nor to have produced so magical an effect by the singing of a simple, pathetic melody, without ornament of any kind. He indulged too much in the use of head-voice, but 'so perfect is his art,' says Escudier, writing at the time, 'that the transition from one

register to the other is imperceptible to the hearer. . . . Gifted with immense lungs, he can so control his breath as never to expend more of it than is absolutely necessary for producing the exact degree of sound he wishes. So adroitly does he conceal the artifice of respiration that it is impossible to discover *when* his breath renews itself, inspiration and expiration being apparently simultaneous, as if one were to fill a cup with one hand while emptying it with the other. In this manner he can deliver the longest and most drawn-out phrases without any solution of continuity.' His stage appearance was not imposing, for his figure was short and awkward, his features plain and marked with small-pox. He was no actor, and seems rarely to have even tried to act. His declamation of recitative left something to be desired. 'In concerted pieces he does not give himself the trouble of singing at all, and if he goes as far as to open his mouth, it is only to preserve the most absolute silence' (Escudier). 'He would walk through a good third of an opera languidly, giving the notes correctly and little more,—in a duet blending his voice intimately with that of his partner (in this he was unsurpassed); but when his own moment arrived there was no longer coldness or hesitation, but a passion, a fervour, a putting forth to the utmost of every resource of consummate vocal art and emotion, which converted the most incredulous, and satisfied those till then inclined to treat him as one whose reputation had been overrated' (Chorley). Some of his greatest effects were produced by an excessive use of strong contrasts between *piano* and *forte*, 'which in the last years of his reign degenerated into the alternation of a scarcely-audible whisper and a shout.' He was the earliest to use that thrill of the voice known as the *vibrato* (with the subsequent abuse of which we are all of us too familiar), at first as a means of emotional effect, afterwards to conceal the deterioration of the organ. To him, too, was originally due that species of musical sob produced by the repercussion of a prolonged note before the final cadence, which, electrifying at first as a new effect, has become one of the commonest of vocal vulgarisms. But such was his perfection of finish, such the beauty of his expression, such his thorough identification of himself, not with his dramatic impersonations but with his songs, that his hold on the public remained unweakened to the last, even when his voice was a wreck and his peculiarities had become mannerisms. He has had numberless imitators, but no rival in the art of gathering up and expressing in one song the varied emotions of a whole opera, and to this may be due the fact that he was as much worshipped and as affectionately remembered by numbers who never set foot in a theatre, as by the most constant of opera-goers.

In 1843 he started with Liszt on a tour

through Holland and Germany, but the two separated at Berlin, and Rubini went on alone to St. Petersburg, where he created an enthusiasm verging on frenzy. By his first concert alone he realised 54,000 francs. The Emperor Nicholas made him 'Director of Singing' in the Russian dominions, and a colonel into the bargain.

In the summer of this year Rubini went to Italy, giving some representations at Vienna by the way. He returned to Russia in the winter of 1844, but finding his voice permanently affected by the climate resolved to retire from public life. He bought a property near Romano, where he passed his last years, and died, on March 2, 1854, leaving behind him one of the largest fortunes ever amassed on the operatic stage, which, unlike too many of his brother artists, he had not squandered. He seems to have been a simple, kindly-natured man, and letters of his, still extant, show that he was ready and willing to assist needy compatriots.

F. A. M.

RUBINSTEIN, ANTON GREGOR, an eminent composer and one of the greatest pianists the world has ever seen, was born Nov. 28, 1830,¹ of Jewish parents, at Wechwotynetz, in Volhynia, near the Austrian frontier of Russia. He received his first musical instruction from his mother, and afterwards from a pianoforte-teacher in Moscow named Villoing. So early as 1839 he made his first public appearance in Moscow, and in the following year undertook a concert-tour with his teacher, journeying to Paris, where he made the acquaintance of Liszt, who was then teaching in that city, and under whose advice he there pursued his studies. A year later he made a more extended tour, going to England (1842), and thence to Holland, Germany, and Sweden. In 1845 he went to study composition with Professor Dehn in Berlin. From 1846 to 1848 he passed in Vienna and Pressburg, teaching on his own account. In 1848 he returned to Russia, where the Grand Duchess Helen nominated him Kammervirtuos. After studying diligently in St. Petersburg for eight years he appeared as a fully-fledged artist with piles of original compositions, first in Hamburg and then all over Germany, where he found enthusiastic audiences and willing publishers. His early operas, to Russian words, were performed as follows:—'Dimitri Donskoi,' 1852; 'Die Sibirischen Jäger,' 1852; 'Toms der Narr,' 1853, and 'Hadji-Abrek,' were not performed. From this time his fame as a pianist and composer spread rapidly over Europe and America. He again visited England in 1857, and made his first appearance at the Philharmonic on May 18. In 1858 he returned home again, gave

brilliant concerts in St. Petersburg, Moscow, etc., and settled in the former city. At this period he was appointed Imperial Concert-director, with a life-pension. Thenceforward he worked in conjunction with his friend Carl Schuberth for the advancement of music in Russia, and had the merit of being the founder of the St. Petersburg Conservatorium in 1862, remaining its Principal until 1867. The Russian Musical Society, founded in 1859, was also his. On leaving Russia he made another triumphant tour through the greater part of Europe, which lasted till the spring of 1870. When in his native country, in 1869, the Emperor decorated him with the Vladimir Order, which raised him to noble rank. In 1870 he rested awhile, and expressed the intention of retiring from public life; but it was not likely that this desire could be fulfilled. He held the Directorship of the Philharmonic Concerts and Choral Society in Vienna for the next year or two, and this was followed by fresh concert tours. In 1872-73 he toured in America. Every year the same threat of retirement was made, but the entreaties of the public, and, probably, the desire of providing for his wife and family, brought the gifted genius before us again and again. He gave a set of farewell recitals all over Europe in 1885-87, and in 1887-1890 he again undertook the direction of the St. Petersburg Conservatorium, and from the latter year lived for a time in Dresden. In 1889 he celebrated his artistic jubilee and published an Autobiography. He died at Peterhof, Nov. 20, 1894.

Rubinstein's playing was not only remarkable for the absolute perfection of *technique*, in which he was the only rival Liszt ever had, but there was the fire and soul which only a true and genial composer can possess. He could play a simple piece of Haydn or Mozart so as positively to bring tears into the eyes of his hearers, but on the other hand, he would sometimes fall a prey to a strange excitement which caused him to play in the wildest fashion. An example (though hardly a commendable one) of his perfect mastery over tone is to be found in his performance of the Funeral March of Chopin's Sonata in B \flat minor. Regardless of the composer's intentions, he began it *ppp*, proceeding *crescendo*, with perfect gradation, up to the Trio, after which he recommenced *ff* and with an equally long and subtle *diminuendo* ends as softly as he began. As an effect—the idea of a band passing—this is stale and unworthy of an artist, but as a *tour de force* it can only be justly appreciated by those who have heard it done and then sought to imitate it.

The compositions of Rubinstein may be considered as the legitimate outcome of Mendelssohn; there is a fine broad vein of melody which is supported by true and natural harmony, and a thorough technical skill. But

¹ Nov. 30 is given in most books of reference, as the equivalent of Nov. 18 (O.S.). In this autobiography (see below) he declares Nov. 16 (O.S.) to be the actual day, but that the 18th had been so long regarded as his birthday that he had no intention of changing it. Nov. 16 (O.S.) is the equivalent of Nov. 28.

ANTON GREGOR RUBINSTEIN

there is also the fatal gift of fluency, and the consequent lack of that self-criticism and self-restraint which alone make a composer great. Rubinstein has written in every department of music, but as yet his songs and chamber-music are all that can be called really popular, excepting always his 'Ocean Symphony,' which is known all over the world.¹ This is undoubtedly one of his very best works, the ideas throughout being vivid and interesting, while the workmanship shows unusual care. From the composer's having added an extra Adagio and Scherzo after the first appearance of this Symphony we may presume he had a particular regard for it, though to risk wearying an audience by inordinate length is scarcely the way to recommend a work to their favour. The 'Dramatic' Symphony (op. 95) has been admired, while of the other three symphonies the first and fifth have each only been performed once in England. His Pianoforte Concertos are very brilliant and effective, especially that in G (op. 45); they will perhaps in time take a permanent position. His Violin Concerto (op. 46) is a very fine work, though but little known. The Persian Songs (op. 34) are perhaps the most popular of his vocal works, but there are many very striking and successful specimens among his other songs—'Es blinkt der Thau' and 'Die Waldhexe' for instance—and the duets are full of beauty and passion. The numerous drawing-room pieces which he has written for the piano are far superior to most of their class, his writing for the instrument being invariably most brilliant, as is but natural in so great a pianist. His chamber-music is not much known in England, and he is apt to give the piano an undue prominence in it; the Quintet in F (op. 55) is almost a Pianoforte Concerto in disguise. His operas and oratorios have as yet met with but qualified success, seeming to lack dramatic force. This is in some measure due to his antagonism to the theories and practice of Wagner and the modern German school. He had a preference for sacred subjects, which are but ill fitted for the stage.

List of dramatic works (including the oratorios, or sacred operas, which were all intended for stage-performance):—

- Dimitri Donekoi. St. Petersburg, 1852.
Sibirskije Ochotulki. St. Petersburg, 1852. ('Die Sibirischen Jäger').
Foma Durashchok ('Toma, der Narr'). St. Petersburg, 1853.
Mest ('Die Rache'). St. Petersburg, 1853.
Hadji-Abrek (apparently not performed).
Die Kinder der Halde, five acts. Vienna, 1861.
Peramors (Lalla Bookh), three acts. Dresden, 1863.
Der Thurm zu Babel ('The Tower of Babel'). Königsberg, 1870 (see op. 80).
Der Dämon, three acts. St. Petersburg, 1875. As 'Il Demonio,' Covent Garden, 1881.
Die Makabrier, three acts. Berlin, 1875.
Das Verlorene Paradies (Düsseldorf, 1875). A preliminary performance had taken place in 1855 under Liszt at Weimar (see op. 54).
Nero, four acts. Hamburg, 1879.
Kalashnikov Moskovski Kuppets ('Der Kaufmann von Moskau'). St. Petersburg, 1880.
Die Rebe ('La Vigne'), 1882.

- Sulamith. Hamburg, 1883.
Unter Räubern, one act (Hamburg, 1883, played before 'Sulamith').
Der Papagei, one act. Hamburg, 1884.
Moses (1887), see op. 112.
Gorjushka ('Die Kummervolle'). St. Petersburg, 1888.
Christus. Berlin, 1888, Bremen, 1890, on the stage (see op. 117).

The complete list of Rubinstein's numbered works is as follows:—

- | | |
|--|--|
| <p>Op.
1. 6 Little Songs in Low German dialect. Voice and FF. Schreiber.
2. 2 Fantasia on Russian themes. FF. solo. Schreiber.
3. 2 Melodies for FF. solo (F, B). Schreiber.
4. Masourka-Fantasia. FF. solo (G). Schreiber.
5. Polonaise, Cracovienne and Mazurka. FF. solo. Schreiber.
6. Tarantelle. FF. solo (B). Schreiber.
7. Impromptu. Caprice, 'Homage to Jenny Lind.' FF. solo (A minor). Schreiber.
8. 6 Songs (words from the Russian). Voice and FF. Schreiber.
9. Octet in D for FF. V., Viola, Viollo, Bass, Fl., Clar., and Horn. Peters.
10. Kamennol-Ostrow. 24 Portraits for FF. Schott.
11. 3 Pieces for FF. and V.; 3 do. for FF. and Viollo; 3 do. for FF. and Viola. Schreiber.
12. 1st Sonata for FF. solo (B). Peters.
13. 1st Sonata for FF. and V. (G). Peters.
14. 'The Ball,' Fantasia in 10 Nos. for FF. solo. B. B. 2.
15. 2 Trios. FF. V. and Viollo (F, G min.). Hofmeister.
16. Impromptu, Berceuse and Serenade. FF. solo. Hofmeister.
17. 3 String Quartets (G, C min., F). B. & H. 3.
18. 1st Sonata for FF. and Viollo (D). B. & H.
19. 2nd Sonata for FF. and V. (A min.). B. & H.
20. 2nd Sonata for FF. solo (C min.). B. & H.
21. 3 Caprices for FF. solo (F, D, Eb). B. & H.
22. 3 Serenades for FF. solo (F, G min., Eb). B. & H.
23. 6 Études for FF. solo. Peters.
24. 6 Preludes for FF. solo. Peters.
25. 1st FF. Concerto (E min.). Peters.
26. Romance and Impromptu. FF. solo (F, A minor). Schreiber.
27. 9 Songs (words from Russian). Voice and FF. Schreiber.
28. Nocturne (G) and Caprice (Eb) for FF. solo. Kistner.
29. 2 Funeral Marches. FF. solo. —1. For an Artist (F min.); 2. For a Hero (C min.). Kistner.
30. Barcarolle (F. min.); All'o Appass. (D min.) for FF. solo. Kistner.
31. 54-part Songs for Male Voices. Kistner.
32. 6 Songs from Reine. Voice and FF. Kistner.
33. 8 Songs. Voice and FF. Kistner.
34. 12 Persian Songs. V. and FF. Kistner.
35. 2nd FF. Concerto (F). Schreiber.
36. 12 Songs from the Russian. Voice and FF. Schreiber.
37. Akrostichon (Laura) for FF. solo. Schreiber.
38. Songs (10 Nos.) for FF. solo. Schott.
39. 2nd Sonata for FF. and Viollo (G). B. & H.
40. 1st Symphony for Orchestra (C). Kahnt.
41. 3rd Sonata for FF. solo (F). B. & H.
42. 2nd Symphony, 'Ocean' (C). Schott.
43. Triumphant Overture for Orchestra. Schott.</p> | <p>Op.
44. 'Soirées de St. Petersburg,' for FF. solo (6 pieces). Kahnt.
45. 3rd FF. Concerto (G). B. B. 4.
46. Concerto, V. and Orch. (G). Peters.
47. 3 String Quartets (Nos. 4, 5, 6, E min., Bb, D min.). B. & H.
48. 12 3-part Songs (from the Russian) with FF. Schott.
49. Sonata for FF. and Viola (F min.). B. & H.
50. 6 'Charakter-Bilder.' FF. Schott.
51. 6 Morceaux for FF. Schott.
52. 3rd Trio. FF. and Strings (Bb). Schott.
53. 6 Preludes and Fugues in free style. FF. solo. Peters.
54. 'Paradise Lost,' Sacred Opera after Milton, in 3 parts. Schott.
55. Quintet for FF. and Wind (F). Schuberth.
56. 3rd Symphony (A). Schuberth.
57. 6 Songs. Voice and FF. Schott.
58. Scena ed Aria, 'E dunque vengo.' Sop. and Orch. Schott.
59. String Quintet (F). Schott.
60. Concert Overture in Bb. Schott.
61. 3 Part-Songs for Male Voices. Schott.
62. 5 Part-songs for Mixed Voices. Schreiber.
63. 'Die Nixe.' Alto Solo, Female Chorus, and Orch. Schott.
64. 5 Fables by Krloff. Voice and FF. Schott.
65. 1st Concerto for Viollo and Orch. (A min.). Schott.
66. Quartet. FF. and Strings (C). Schott.
67. 6 Two-part Songs with FF. Schott.
68. 'Faust.' Musical portrait, for Orch. Siegel.
69. 5 Morceaux for FF. solo. Siegel.
70. 4th FF. Concerto (D min.). Schott.
71. 3 Morceaux. FF. solo. Siegel.
72. 6 Songs for a Low Voice and FF. Schott.
73. Fantasia for 2 Pianos (F). Schott.
74. 'Der Morgen.' Cantata for Male Voices and Orch. (from the Russian). Schott.
75. 'Album de Peterhof,' 12 Pieces. FF. solo. Schott.
76. 8 Songs for Voice and FF. Schott.
77. Fantasia for FF. (E min.). Schott.
78. 12 Songs from the Russian. Voice and FF. Schott.
79. 'Ivan the Terrible.' Musical portrait for Orch. B. B.
80. 'The Tower of Babel.' Sacred opera in one act. Schott.
81. 8 Études for FF. solo. B. B.
82. Album of National Dances (6) for FF. solo. B. B.
83. 10 Songs. Voice and FF. B. B.
84. Fantasia for FF. and Orch. (C). Schott.
85. 4th Trio. FF. and Strings (A). Lewy.
86. Romance and Caprice for Viollo and Orch. Schott.
87. 'Don Quixote.' Musical portrait. Humoreske for Orch. Schott.
88. Theme and Variations for FF. solo (G). Schott.
89. Sonata for FF. deoet (D). Schott.
90. 2 String Quartets (Nos. 7, 8, G min., E min.). Schott.</p> |
|--|--|

¹ First performed in London by Musical Art Union (Kilndworth) May 31, 1861; with extra movements, Crystal Palace, April 12, 1877. Philharmonic, June 11, 1879.

² B. B. = Rote & Bock.

³ B. & H. = Breitkopf & Härtel.

- Op.
91. Songs and Requiem for Mignon (from Goethe's 'Wilhelm Meister') for Solos, Chorus, and PF. Senff.
92. 2 Scenes for Contralto and Orchestra, No. 1. 'Häulhe', No. 2. 'Hagar in the desert.' Senff.
93. 9 Books of Miscellaneous Pieces (12) for PF. solo. Senff.
94. 5th PF. Concerto (Eb). Senff.
95. 4th Symphony, 'Dramatic' (D min.). Senff.
96. 3rd Concerto. Viollo and Orch. Senff.
97. Sextuor for Strings (D). Senff.
98. 3rd Sonata. PF. and V. (B min.). Senff.
99. Quintet. PF. and Strings (G min.). Senff.
100. 4th Sonata for PF. solo (A min.). Senff.
101. 12 Songs. Voice and PF. Senff.
102. Caprice. Basse. PF. and Orch. Senff.
103. Bal costume. Set of characteristic pieces (20) for PF. 4 hands. B. B.
104. Éclésié; Variations; Étude. PF. solo. B. B.
- Op.
105. A series of Russian songs. Voice and PF. B. B.
106. 2 String Quartets (Nos. 9. 10. A♭, F min.).
107. 5th Symphony (G min.). In memory of the Grand-duchess Hélène Paulowna. Senff.
108. 5th Trio for PF. and Strings in C minor.
109. Soirées Musicales. 9 PF. pieces.
110. Erolas, Fantasia for PF. and Orchestra.
111. 5th Symphony (A minor).
112. 'Moses', a Biblical opera, in 8 tableaux. Part I, containing four tableaux (Bildar), was published by Senff, 1888.
113. Concertstück for PF. and Orch.
114. Akerstichn, for PF. solo.
115. Songs.
116. Concert-overture, 'Antony and Cleopatra.'
117. Christus, Biblical Opera.
118. Six PF. solos.
119. Suite in Eb for orchestra, in six movements.

Without opus numbers appeared the following:—
Symphonic poem, 'Russij.' Moscow, 1882.
Fantasia eroica for orchestra.

Ouverture solennelle, for orchestra, with organ and chorus (poeth.). Three hexameres (A minor, G, and C minor).
Pianoforte pieces:—'Valse caprice,' 'E flat,' and 'Ungarische Phantasie,' 'Russische Sereenade,' 'Phantasie,' 3 Morceaux caractéristiques, 6 preludes, cadenzas to Beethoven's pianoforte concertos, and to Mozart's concerto in D minor, arrangement of the march in Beethoven's 'Ruins of Athens.'

Rubinstein's appearance was remarkable. His head was of a very Russian type, without beard or moustache, but with a thick shock of dark-brown hair.

We have said that Rubinstein's first visit to London was in 1842. He was then only just twelve. Mendelssohn and Thalberg were both here, and the Philharmonic was thus naturally already occupied. Mention of him is to be found in Moscheles's Diary for 1842 (*Leben*, ii. 90), where he is spoken of by that genial master as 'a rival to Thalberg . . . a Russian boy whose fingers are as light as feathers, and yet as strong as a man's.' In the *Musical and Dramatic Review* of May 28, 1842, he is mentioned. He did not return to this country till 1857, when he appeared at the Philharmonic on May 18, playing his own Concerto in G. He came back in the following year, played again at the Philharmonic on June 7, and at the Musical Union, May 11. In 1869 he came a fourth time, and played at the Musical Union only (May 18, June 1). In 1876 he made his fifth visit, played at the Philharmonic, May 1, and gave four Recitals in St. James's Hall. In 1877 he again gave recitals, and conducted his 'Ocean' Symphony (six movements) at the Crystal Palace, April 21; he conducted his 'Dramatic' symphony, and played Beethoven's Concerto in G, at the Crystal Palace on June 4. In 1881 he gave another series of Recitals at St. James's Hall, his opera 'The Demon' was brought out in Italian at Covent Garden on June 21, and his 'Tower of Babel,' with other music, at the Crystal Palace on June 11. In May and June 1887, he gave a final set of seven historical recitals in St. James's Hall.

Rubinstein made sundry attempts as a writer on musical subjects. The 'Autobiography' spoken of above appeared in German to celebrate his artistic jubilee in 1889, and was translated into English by Aline Delano in 1890. (See *Musical Times*, 1891, p. 105.) 'Die Kunst und ihre Meister' appeared in 1892, as well as 'Erinnerungen aus 50 Jahren.' (German transl. in 1895.) A posthumous supplement to 'Die Kunst,' etc., called 'Gedankenkorb,' was published posthumously in 1897. Among various biographies of Rubinstein may be mentioned those of W. Baskin (1886), N. Lissowski (1889), A. MacArthur (1889), and Sandra Droucker (1904).

NICHOLAS, his younger brother, born at Moscow, June 2, 1835, was also a fine pianist and no mean composer, though overshadowed by the fame of his great brother. He studied under Kullak and Dehn in Berlin during 1844-46. In 1859 he founded at Moscow the Russian Musical Society, which gives twenty concerts each year; and in 1864 the Conservatorium, and was head of both till his death.. In 1861 he visited England, and played twice at the Musical Union (June 4, 18). In 1878 he gave four orchestral concerts of Russian music in the Trocadéro at Paris with great success. He died of consumption in Paris, Mar. 23, 1881, on his way to Nice for his health, widely and deeply lamented. His latest published work is op. 17—'Scène du Bal, Polonaise.' His best-known pupils are Taneiev, Siloti, and Sauer. The Musical Society gives annual concerts in his memory, on the anniversaries of his birth and death.

RUBINSTEIN, JOSEPH—no relation to the foregoing—was born at Staro Konstantinov, in Russia, Feb. 8, 1847, and acquired some fame as a pianist and composer of drawing-room music. He also obtained an unenviable notoriety through certain newspaper articles in the *Bayreuther Blätter* signed with his name, and attacking Schumann and Brahms in a most offensive and vindictive manner. He made some good pianoforte transcriptions of the works of Wagner, of whom he was an ardent if not very judicious propagandist. He committed suicide at Lucerne, Sept. 15, 1884. F. C.

RUCKERS, harpsichord makers of Antwerp, who were working as masters between 1579 and 1667 or later, the first of whom, Hans Ruckers, is always credited with great improvements in keyboard instruments. It is certain that the tone of the Ruckers harpsichords has never been surpassed for purity and beauty of tone-colour, and from this quality they remained in use in England, as well as in France and the Netherlands, until harpsichords and spinets were superseded, at the end of the 18th century, by the pianoforte. The art of harpsichord making, as exemplified in London by Kirkman and Shudi, was directly derived from Antwerp and the

Ruckers. Time seemed to have no effect with the Ruckers instruments. They were decorated with costly paintings in this country and France, when a hundred years old and more. New keys and new jacks replaced the old ones; so long as the sound-board stood lasted the 'silvery sweet' tone. It has done so in some instances until now, but modern conditions of life seem to be inimical to the old wood; it will be difficult, if not impossible, to preserve any of these old instruments much longer. As a work of piety we have catalogued all that we have seen or can hear of, appending the list to this notice.

In John Broadwood's books, 1772-73, are several entries concerning the hiring of Rucker, Rooker, and Rouker harpsichords to his customers; to the Duchess of Richmond, Lady Pembroke, Lady Catherine Murray, etc. etc. In 1790 Lord Camden bought a 'double Ruker': in 1792 Mr. Williams bought another, the price charged for each being twenty-five guineas. These entries corroborate the statement of James Broadwood (*Some Notes*, 1838, printed privately 1862) that many Ruckers harpsichords were extant and in excellent condition fifty years before he wrote. He specially refers to one that was twenty years before in possession of Mr. Preston, the publisher, reputed to have been Queen Elizabeth's, and sold when Nonsuch Palace was demolished. To have been hers Hans Ruckers the elder must be credited with having made it.

If the tons caused, as we have said, the long preservation of the Ruckers clavecins, on the other hand the paintings which adorned them not unfrequently caused their destruction. A case in point is the instrument of the Parisian organist, Balbastre, whom Burney visited when on his famous tour. Burney says it was painted inside and out with as much delicacy as the finest coach or snuff-box he had ever seen. Inside the cover was the story of Rameau's 'Castor and Pollux,' the composer, whom Burney had seen some years before, being depicted crowned with a wreath. He describes the tone as delicate rather than powerful (he would be accustomed in London to the sonorous pompous Kirkmans, which he so much admired), and the touch, in accordance with the French practice of quilling, as very light. This instrument was then more than a hundred years old, perhaps more than a hundred and fifty. On the front board above the keys is inscribed a complete piece of clavecin music, 'Pastorale par Mr. Balbastre, le 6 Aoust, 1767,' beginning—

The stand for this instrument is rococo, and gilt. We learn more of its fate from Rimbault (*The Pianoforte*, 1860, p. 76), who tells us that it became the property of Mr. Goding of London,

who sacrificed Ruckers' work, to display the paintings by Boucher and Le Prince that had adorned it, on a new grand piano made for the purpose by Zeitter. This maker showed respect for his predecessor by preserving the sound-board, which he converted into a music-box, the inscription 'Joannes Ruckers me fecit Antverpiæ' being transferred to the back. This box ultimately became Rimbault's; the piano was sold at Goding's sale by Christie & Manson in 1857. In the same house (Carlton House Terrace), and sold by auction at the same time for £290, was an Andries Ruckers harpsichord that had also been made into a pianoforte by Zeitter. In this instrument the original belly, dated 1628, was preserved. The sound-hole contained the rose (No. 6) of this maker. The present compass of the piano is five octaves F—F. Inside the top is a landscape with figures, and outside, figures with musical instruments on a gold ground. Round the case on gold are dogs and birds, a serpent and birds, etc. All this decoration is 18th-century work. The instrument is on a Louis Quinze gilt stand.

It was this intimate combination of the decorative arts with music that led to the clavecin and clavichord makers of Antwerp becoming members of the artists' guild of St. Luke in that city. They were enrolled in the first instance as painters or sculptors. We must, however, go farther back than Hans Ruckers and his sons to estimate truly their position and services as clavecin makers. For this retrospect the pamphlet of the Chevalier Léon de Burbure—*Recherches sur les Facteurs de Clavecins et les Luthiers d'Anvers* (Brussels, 1863), supplies valuable information. We learn that at the end of the 15th and beginning of the 16th centuries, precisely as in England and Scotland at the same period, the clavichord was in greater vogue than the clavecin; possibly because clavecins were then always long and sometimes trapeze-shaped. It must be remembered that the names Clavicordio in Spain, Clavicordo in Italy, and Clavicorde in France, have been always applied to the quilled instruments. We are not, therefore, sure whether old references to the clavichord are to be taken as describing a plectrum or a tangent keyboard instrument. About the year 1500 the clavecin had been made in the clavichord shape in Venice, and called Spinet. [See SPINET.] This new form must have soon travelled to the Low Countries, and have superseded the Clavicordo as it did in England and France about the same epoch.

A clavecin maker named Josse Carest was admitted in 1523 to the St. Luke's guild as a sculptor and painter of clavichords (literally 'Joos Kerrest, clavecordmaker, snyt en scildert').¹ Another Carest had been accepted in 1519 as an apprentice painter of clavecins ('Goosen

¹ See *De Lijvereren en andere Historische Archieven der Antwerpsche Sint Lucasgilde*. Rombout en Van Lerius. 2 vols. Baggerman, Antwerp; Nijhoff, The Hague.

Kareest, schilder en Klavecimbelsmaker, gheleert by Peeter Mathys'). This is an earlier instance of the name Clavecin than that quoted by M. de Burbure as the oldest he had found in Belgium, viz. a house in the parish of Notre Dame, Antwerp, which, in 1532, bore the sign of 'de Clavizimbels.' No doubt at that time both clavecins and clavichords were in use in Antwerp, but in a few years we hear of the latter no more; and the clavecin soon became so important that, in 1557, Josse Carest headed a petition of the clavecin-makers to be admitted to the privileges of the guild as such, and not, in a side way, merely as painters and sculptors of their instruments. Their prayer was granted and the ten petitioners were exempted from the production of 'masterworks,' but their pupils and all who were to come after them¹ were bound to exhibit masterworks, being clavecins, oblong or with bent sides ('viercante oft gehoeete clavisimbale,' square or grand as we should say), of five feet long or more; made in the workshops of master experts, of whom two were annually elected; and to have the mark, design, or scutcheon, proper to each maker (ayn eygen marck, teecken, oft wapene), that is, a recognised trade-mark on each instrument. We will give these trade-marks of the members of the Ruckers family from sketches kindly supplied by [the late] M. Abel Régibo, of Renaix in Belgium; three, belonging to Hans and his two sons, having been already published by M. Edmond Vander Straeten in his monumental work *La Musique aux Pays-Bas*, vol. iii. (Brussels, 1875).² It is at once evident that such regulations tended to sound work. The trade-marks we have more particularly described under ROSE. They were usually made of lead, gilt, and were conspicuous in the sound-holes of the instruments.

Some of the contemporary Italian keyboard-instruments might be taken to give a general idea of what the Antwerp ones were like prior to the improvements of Hans Ruckers the elder. In the preparation of the sound-boards the notion of the sound-chest of LUTE and PSALTERY prevailed. Ruckers adhered to this principle, but being a tuner and perhaps a builder of organs, he turned to the organ as a type for an improved clavecin, and while holding fast to *timbre* as the chief excellence and end of musical instrument making, introduced different tone colours, and combined them after organ analogies and by organ contrivances of added keyboards and registers. It is doubtful what changes of construction Hans Ruckers made in the harpsichord—perhaps the octave strings only. Yet a clavimbalo by Domenico di Pesaro, dated 1590, in the Victoria and Albert Museum, has the octave strings with two stops. Ruckers's great service may after all have only

been to improve what others had previously introduced. It is nearly certain that harpsichords with double keyboards and stops for different registers existed before his time, and their introduction may be attributed to the great favour the Clavierorganum, or combined spinet and organ, was held in during the 16th century. The researches of M. Edmond Vander Straeten (*La Musique aux Pays-Bas*, vol. viii. Brussels, 1885) have done much to bring into prominence the great use of the Clavierorganum at an early time; see Rabelais, who, before 1552, described Carêmeprenant as having toea like an 'épinette organisée.' The merit of Hans Ruckers, traditionally attributed to him, and never gainsaid, was his placing the octave as a fixture in the long clavecin, boldly attaching the strings to hitch-pins on the sound-board (strengthened beneath for the purpose), and by the addition of another keyboard, also a fixture, thus establishing a model which remained dominant for large instruments until the end of the clavecin manufacture.³ [On the inventions of H. Ruckers the elder, see Hipkins's *Pianoforte Primer*, p. 81.]

An interesting chapter is devoted to the Ruckers family by M. Edmond Vander Straeten in the work already referred to (vol. iii. p. 325, etc.). He has gathered up the few documentary notices of the members of it discovered by MM. Rombouts and Van Lierus, by M. Génard and by M. Léon de Burbure, with some other facts that complete all that is known about them.

The name Ruckers, variously spelt Rukers, Rueckers, Ruyckers, Ruekaers, Rieckers, and Rikaert, is really a contraction or corruption of the Flemish Ruckaerts or Ryckaertszoon, equivalent to the English Richardson. Hans the elder was certainly of Flemish origin, being the son of Francis Ruckers of Mechlin. He can hardly have been born later than 1555. Married at Notre Dame (the cathedral), Antwerp, June 25, 1575, as Hans Ruckaerts, to Naenken Cnaeps, he was admitted as Hans Ruyckers, 'clavisinbalmakerre,' to the Lucas guild in 1575. It appears strange that he was not enrolled a citizen until 1594, but this may have been, as M. de Burbure suggests, a readmission, to repair the loss of a record burnt when the Spaniards sacked the Hôtel de Ville in 1576. In those troubled times there could have been but little to do in clavecin-making. May we see in this a reason for his acquiring that knowledge of the organ which was to lead ultimately to his remodelling the long clavecin?

He had four sons, Francis, Hans, Andries, and Anthony. It is only with Hans (baptized Jan. 13, 1578) and Andries (baptized August 30, 1579) that we are concerned, since they

¹ Later on, tuners also became members of the guild. For instance Michel Colyns, *Claverringelstelder*, in 1631-32; who was, however, the son of a member.

² Burney refers to these marks when writing about the Ruckers.

³ The end of the manufacture for Antwerp is chronicled by M. de Burbure in one seen by him—he does not say whether single or double—made by a blind man, and inscribed 'Joannes Helsenon me fecit A° 1795, Antwerpplae.' The latest harpsichord made (apart from modern revivals) seems to be an instrument by Clementi, dated 1802, and shown at the Bologna Exhibition of 1888.

became clavecin-makers of equal reputation with their father. We learn that in 1591 Hans Ruckers the elder became tuner of the organ in the Virgin's chapel of the Cathedral, and that in 1593 he added fourteen or fifteen stops to the large organ in the same church. In 1598 and 1599 either he or his son Hans (the records do not specify which) had charge of the organs of St. Bavon, and from 1617 to 1623 of St. Jacques. The like doubt exists as to the Hans who died in 1642. We believe that this date refers to the son, as the latest clavecin we have met with of his make is the Countess of Dudley's beautiful instrument dated that year (list, No. 41); the latest certain date of the father's clavecins at present found being 1614. The earliest is 1590, with which date three existing instruments are marked.

The trade-mark of Hans the elder is here represented.

Of the instruments catalogued below, it will be observed that twenty are probably by Hans the elder. The long ones are provided with the octave stop and, with a few exceptions, have the two keyboards identified with him as the inventor. But it is interesting to observe the expedients agreeing with the statement of Praetorius, that octave instruments¹ were employed with and in the oblong clavecins. These expedients doubtless originated before Hans Ruckers; indeed in the Museum at Nuremberg, there is an oblong clavecin of Antwerp make, signed 'Martinus Vander Biest,' and dated 1580, that has an octave spinet in it.² 'Merten' Vander Biest entered the Guild in Antwerp, as one of the ten clavecin makers, in 1558. Now Messrs. Chappell of London had such an instrument, No. 16 in appended catalogue, made by Hans Ruckers, certainly the elder. No keys remain, but the scale of both the fixed and movable

keyboards is the same, four octaves marked near the wrest-pins *si—si* (B—B). In this clavecin it is the left-hand keyboard which is removable and is tuned an octave higher. In the Museum of the Conservatoire, Brussels, there is an oblong clavecin by Hans the elder (No. 8), wherein the octave spinet is above and not by the side of the fixed one—according to M. Victor Mahillon a later addition, though the work of the maker himself. This curious instrument formerly belonged to Fétis (who sold the paintings that adorned it), and is dated 1610. While on the subject of these removable octave spinets we will refer to one with keyboards side by side, made by Hans the younger (No. 23), and dated 1619, the property of M. Régibo, and another, a long clavecin, also by Hans the younger (No. 44), not dated, now in the Hochschule, Berlin, that has the octave spinet fixed in the angle side, precisely as in a more modern one, made by Coenen of Ruremonde, which may be seen in the Plantin museum, Antwerp. The same construction is found in a harpsichord by Hans the elder (No. 5).

Hans Ruckers the younger—known to the Belgian musicologists as Jean, because he used the initials J. R. in his rose, while the father, as far as we know, used H. R.—was, as we

have said, the second son. M. Régibo has supplied us with three of his roses.

We have given the date of his baptism in the cathedral in 1578, but have no further details to record beyond the ascertained facts that he was married to Marie Waelrant, of the family of the musician Hubert Waelrant,³ in the cathedral, Nov. 14, 1604; that either he or his brother Andries was admitted as a master in the Guild in 1611; and that he was employed to tune the organ of St. Jacques from 1631 until 1642.

¹ We hesitate to accept Praetorius's statement literally as to such spinets being tuned a fifth as well as an octave higher. This more likely originates in the fact that the F and C instruments had before his time been made at one and the same pitch, starting from the lowest key, although the disposition of the keyboards and names of the notes were different, as in organs, where pipes of the same measurement had been actually used for the note F or the note C. See SHORT OCTAVE; Arnold Schlick's *Spiegel der Orgelmacher*, 1511.

² A woodcut of this rare instrument is given in Part ix. of Dr. A. Reissmann's *Illustrirte Geschichte der deutschen Musik*, Leipzig, 1881. Both keyboards, side by side, are apparently original, with white materials and compass of four octaves C—C. It is the right-hand keyboard that is tuned the octave higher, and is removable like a drawer. A full description of this double instrument is reproduced in Reissmann's work, copied from the *Anzeiger für Kunde der deutschen Vorzeit* (Nuremberg, 1879, No. 9).

³ Dr. John Bull succeeded Bunoold Waelrant as organist of the cathedral in 1617, and retained the post until his death in 1628. He must have known Hans Ruckers and his two sons well, and been well acquainted with their instruments.

There is also evidence as to his having died in that year, and not the father, who would seem to have died before.

Mr. Vander Straeten has, however, brought us nearer Hans the younger, by reference to Sainsbury's collection of *Original unpublished papers illustrative of the life of Sir Peter Paul Rubens* (London, 1859, p. 208, etc.), wherein are several letters which passed in 1638 between the painter, Balthazar Gerbier, at that time at Brussels, and the private secretary of Charles I., Sir F. Windebank. They relate to the purchase of a good virginal from Antwerp for the King of England. Be it remembered that up to this time, and even as late as the Restoration, all clavecins in England, long or square, were called Virginals. [See VIRGINAL.] Gerbier saw one that had been made by Hans Ruckers, the younger ('Johannes Rickarts'), for the Infanta. He describes it as having a double keyboard placed at one end, and four stops; exactly what we should now call a double harpsichord. There were two paintings inside the cover, the one nearest the player by Rubens; the subject Cupid and Psyche. The dealer asked £30 for it, such instruments without paintings being priced at £15. After some correspondence it was bought and sent over. Arrived in London it was found to be wanting six or seven keys, and to be insufficient for the music,¹ and Gerbier was requested to get it exchanged for one with larger compass. Referring to the maker, Gerbier was informed that he had not another on sale, and that the instrument could not be altered. So after this straightforward but rather gruff answer Gerbier was written to not to trouble himself further about it. Mr. Vander Straeten inquires what has become of this jewel? We agree with him that the preservation of the pictures has probably long since caused the destruction of the instrument. With such decoration it would hardly remain in a lumber-room. Mr. Vander Straeten himself possessed a Jean Ruckers single harpsichord (now in the Berlin Hochschule), restored by M. Ch. Meerens, of which he has given a heliotype illustration in his work. It is a splendid specimen of Hans the younger. (See No. 27 below).

Andries Ruckers (the elder, to distinguish him from his son Andries), the third son of Hans, was, as we have said, baptized in 1579, and was a master in 1610. As a member of the confraternity of the Holy Virgin in the cathedral he tuned the chapel organ gratuitously in 1644. His work, spite of Burney's impression about the relative excellence of his larger instruments, was held in as great esteem as that of his father and brother. In 1671, Jean Cox, choirmaster of the cathedral, left by will, as a precious object, an André Ruckers clavecin. Handel, many years after, did the same. Within the writer's

¹ The Hitchcocks were active in the latter half of the 17th century, and early in the 18th, making spinets in London with five octaves, G—G.

recollection there have been three honoured witnesses in London to this maker's fame, viz. Handel's (No. 77), dated 1651, given by Messrs. Broadwood to the Victoria and Albert Museum; Mr. Howard Head's (No. 55), dated 1614; and one belonging to the late Miss Twining, a single keyboard one (No. 74), dated 1640.² A tradition exists that Handel had also played upon both the last-named instruments. We do not know when Andries Ruckers the elder died. He was certainly living in 1651, since that date is on

his harpsichord (Handel's) at South Kensington. His roses are here given.

Of Andries Ruckers the younger, the information is most meagre. Born in 1607, he probably became a master in 1636. The Christian name is wanting to the entry in the ledger, but as the son of a master, the son of Andries the elder is apparently indicated. The researches of M. Génard have proved the birth of a daughter to Hans the younger, but not that of a son. It might be Christopher, could we attribute to him a master for a father. Regarding him, however, as living earlier, we are content to believe that Andries the younger then became free of the Guild; but as his known instruments are of late date, it is possible that he worked much with his father. We know from a baptism in 1665 that the younger Andries had married Catherina de Vriese, perhaps of the family of Dirck or Thierry de Vries, a clavecin-maker whose death is recorded in 1628. Fétis (*Biog. Univ.*, 2nd edit. vii. 346b) says he had seen a fine clavecin made by Andries the younger, dated 1667. M. Régibo possesses undoubted instruments by him, and has supplied a copy of his rose (7). He has done the same for

² This instrument formerly belonged to the Rev. Thomas Twining, Rector of St. Mary, Colchester, who died in 1804. A learned scholar (he translated Aristotle's *Poetics*) and clever musician, he enjoyed the friendship of Burney and valued highly his favourite harpsichord, on which the great Handel had played. Charles Salaman used both this instrument and Messrs. Broadwood's in his admirable lectures given in 1855-56 in London and the provinces.

Christopher Ruckers (8), of whose make he owns a specimen. M. Vander Straeten refers to another in the Museum at Namur. We cannot determine Christopher's relationship to the other Ruckers, but he might have been the Her Christofel Ruckers, organist and clockmaker of Termonde, where he set up a carillon in 1549 — probably a priest, at least the title 'Her' would indicate a person regarded with veneration. The same writer, in the 5th vol. p. 393 of *La Musique aux Pays-Bas*, continues, 'who knows if this Christopher did not own a work-

shop for clavessin making? The priest was everything at that epoch, and a scholar, an organ or spinet-builder seems to us quite natural and normal.'

We will now give the list of the existing Ruckers instruments as complete as we have been able to make it. The kind and never-tiring help of MM. Mahillon, Meerens, and Vander Straeten of Brussels, and of MM. Snoeck and Régibo of Renaix, as well as of other friends, in compiling it, is gratefully acknowledged.

Catalogue of Ruckers Clavescins, still existing (1907), as far as possible according to date.

Extreme measurements of length and width.¹

In all the sound-boards are painted with devices, generally of fruit, birds, and flowers.

I. HANS RUCKERS DE OUDE (the Elder).

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of Information.
1	Bent side.	1590	ft. in. 7 4 by 2 9	2 keyboards, not original; black naturals; 4½ octaves, G—E; finely painted. Rose No. 1.	Collection of the late M. Régibo, Renaix.	A. Régibo.
2	Bent side.	1590	7 0 by 2 10½	2 keyboards, not original; black naturals; 5 oct.; extended by Blanchet. ² Inscribed HANS RUCKERS ME FECIT ANTWERPIAE; Rose No. 1.	Musée du Conservatoire, Paris.	O. Chouquet.
3	Bent side.	1590	2 keyboards; case 'en laque de Chine'; 5 stops 'à genouillère.	Château de Pau, France.	Spire Blondel, <i>La Revue Britannique</i> , Oct. 1880. ³
4	Trapezoid.	1591	5 7 by 1 11	1 keyboard; compass 3½ octaves, E—C. White naturals. Rose No. 1. Red and black ornamentation on yellow ground. Inscribed 'Sclantis non habet inimicum nisi ignorantem.' Date on cover, 1591.	T. J. Cannuel, Director of the Académie Royale, Ghent.	T. J. Cannuel.
5	Bent side harpsichord with octave spinet in one.	1594	5 11 by 2 6	2 keyboards; the front one 4 oct., C—C; the side one 3½ oct., E—A, without the highest C; 3 stops in original position at the right-hand side; white naturals. Rose No. 1; and Rose to octave spinet an arabesque. Painting inside top showing a similar combined instrument. Mr. Lionel Cusht considers the painting to be by Hieronymus Janssens. Inscribed HANS RUCKERS ME FECIT ANTWERPIA.	Oewerbe Museum, Berlin.	A. J. Hipkins.
6	Oblong.	1598	1 keyboard, 4½ oct., G—C (short octave in bass, not original); white naturals. Inscribed JOHANNES RUCKERS FECIT ANTWERPIAE 1598, and 'Indicatum relict trista corda melos.'	Mlle. Jeanne Lyon, Paris.	Paris Exhibition, 1889.
7	1634	1 mètre. 45 (width)	3½ oct. Rose H.R. Original decoration simple, subsequently painted in grisaille. Inscribed JOHANNES ET ANDREAS RUCKERS FECERVNT 1604.	The late M. Régibo, Renaix.	Vander Straeten.
8	Oblong.	1610	5 7 by 1 7	2 keyboards, one above the other; white naturals; 4½ oct., C—F each. The upper and octave instrument a later addition by the maker. Inscribed HANS RUCKERS ME FECIT ANTWERPIAE, 1610.	Musée du Conservatoire, Brussels.	V. Mahillon.
9	Oblong.	1610	1 keyboard, 3 octaves, short octave in bass. Inscribed HANS RUCKERS ME FECIT ANTWERPIAE, 1610, and 'Laudabo nomen Dei cum cantico et magnifico eum in laude.' The case is of ebony inlaid with engraved ivory. A small octave instrument.	Musée du Conservatoire, Paris.	Rev. P. W. Galpin.
10	Oblong.	1611	6 6 by 1 7½	1 keyboard; 3½ oct., E—C; case patterned paper. Inscribed JOHANNES RUCKERS FECIT ANTWERPIAE, 1611; H. R. ROSS.	Musée du Steen, Antwerp.	R. Vander Straeten and V. Mahillon.
11	Bent side.	1612	7 6 by 2 11	2 keyboards (put in by Messrs. Broadwood, 1885). Rose No. 1. Case and compass as No. 77. New keys, jacks, and stops. Inscribed JOHANNES RUCKERS ME FECIT ANTWERPIAE, 1612. Found at Windsor Castle, 1883. This may have been the large Harpsichord left by Handel to Smith, and given by the latter to King George III.	H.M. The King.	A. J. Hipkins.

¹ The present ownership of the instruments has not been possible to trace in all cases, owing to the frequent dispersal of private collections.

² It was believed by MM. Snoeck, Vander Straeten, Régibo, and V. Mahillon, that few of the Ruckers clavescins were of the original compass of keys. The statements of compass in this list and also in Knyssman should be qualified by this remark. The increase was, however, made long ago, and in some instances possibly by the maker himself. M. Vander Straeten, p. 348, has a passage quoted from Van Rlenkenburg: 'This was at the time when clavescins had still a narrow keyboard. In the present day (1789) it would be difficult to meet with one of this kind; all the keyboards having been lengthened.' Again, white naturals are believed to be original

in these instruments. Upon very old alterations it is not easy to decide. We are of opinion that black naturals and ivory sharps were occasionally substituted when the paintings were done. In dealing with these questions, however, it is best to refrain from generalising; many errors having arisen from too hasty conclusions.

³ M. Spire Blondel (*Histoire Anecdote du Piano*) mentions a Ruckers clavessin, painted by Gravelot, as finding a buyer at the sale of Blondel d'Azimourt. M. du Sommerard in a private letter refers to one found in a village, probably a Hans Ruckers. There are more in France, as M. Chouquet has heard of three, but has no particulars of them to communicate. Inquiry has failed to discover one in Holland or the Belgian provinces.

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of Information.
13	Bent side.	1612	ft. in. 7 6 by 3 0	2 keyboards; black naturals. Rose No. 1. No name of original maker, but inscribed 'Mileu ravalement par Pascal Taskin, 1774,' meaning that the compass of keys was extended. This beautiful instrument, painted inside and out with Louis XIV. subjects by Vander Meulen, is said to have belonged to Maria Antoinette. It will be remembered as having adorned the Louis Seles Room of the Historic Collection, Inventions Exhibition, London, 1885.	Sir Edgar Speyer.	A. J. Hipkins.
13	Gblong.	1814	5 5½ by 1 7½	1 keyboard; 3½ oct., E—C; white naturals.	The late M. Snoeck, Renaix.	C. Meerens.
14	Bent side.	1614	7 4½ by 3 3	2 keyboards; not original; 5 oct., etc. F—G; white naturals; curved bent side and round narrow end; 2 genouillères and a soundline of the 18th century. Rose No. 1.	Museum of the Hochschule für Musik, Berlin.	C. Meerens.
15	Bent side.	1628	7 7½ by 3 6½	Rose No. 5 in sound-board, which is painted with the usual decoration. The width has been increased to admit of a greater compass.	Walter H. Burns, Esq., and Captain Hall.	A. J. Hipkins.
16	Oblong.	Undated	5 7 by 1 5½	2 keyboard side by side, the left-hand one removable, having its own belly and rose, but to be tuned an 8ve higher than the fixed instrument; no keys left; 4 oct., B—E. Both stretchers inscribed JOHANNES RUCKERS MS FICIT. 2 roses No. 1. (See No. 23.) Good paintings. Stand, an arcade with 6 balusters.	Royal College of Music, London.	A. J. Hipkins.
17	Bent side.	.	7 4 by 2 7	2 original keyboards; 4½ oct., C—F (5 keys added); white naturals; 3 stops.	M. Régibo, Renaix.	A. Régibo.
18	Bent side.	..	Not original.	Described on p. 121a, b.	Pamphre Gordon, Esq.	A. J. Hipkins.
19	Oblong.	Undated	Double virginal, inscribed JOHANNES RUCKERS MS FICIT. Compass, 4 octaves, C—C. White naturals; not original. Keyboard of the larger instrument to the right, the smaller (octave) instrument enclosed in the larger case to the left.	Morris Steiner Collection, New Haven, Connecticut, U.S.A.	Rev. F. W. Galpin.
20	Oblong.	Undated	Virginal, keyboard to right.	Musée du Steen, Antwerp.	Rev. F. W. Galpin.
II. HANS RUCKERS DE JONGE (the Younger).						
21	Bent side.	1617	6 6 by 3 7	2 keyboards; white naturals. Paintings in Veron Martin, lately removed.	M. Pilette, Brussels, 1878, since sold, Hôtel Drouot.	Victor Mahillon.
22	Oblong.	1818	2 8½ by 1 3	1 original keyboard; 3½ oct., E—C; white naturals. Inscribed JOHANNES RUCKERS FICIT. Rose No. 2.	Musée du Conservatoire, Paris.	G. Choquet.
23	Oblong.	1619	7 4 by 2 7	2 original keyboards, side by side, 4 stops to the fixed one, the other tuned 8ve higher; 4½ oct., C—F; white naturals. Roses No. 4. (See No. 16.)	M. Régibo, Renaix.	A. Régibo.
24	Oblong.	1619	3 5 by 1 8½	1 original keyboard; 3½ oct., E—C; white naturals. Rose No. 2.	M. Régibo, Renaix.	A. Régibo.
25	Oblong.	1622	5 7 by 1 7½	1 keyboard; 4½ oct., C—F; white naturals. Inscribed JOHANNES RUCKERS FICIT. ANTWERPIAE, 1622, and OMNIS SPIRITUS LAUDAT DOMINUM.	M. Victor Mahillon, Brussels.	V. Mahillon.
26	Gblong.	1626	4 3 by 1 7	1 keyboard. Inscribed JOHANNES RUCKERS FICIT. ANTWERPIAE, 1626.	Play Collection, Brussels (dispersed Nov. 1906).	Rev. F. W. Galpin.
27	Bent side.	1627	6 0 by 2 7½	1 original keyboard; 4½ oct., C—E; white naturals; 2 stops; Rose No. 4; painting inside top, drawn in <i>La Musique aux Pays-Bas</i> , tome 3. Inscribed as No. 25, and MOSICA DORUM DEI.	Museum of the Hochschule, Berlin.	E. Vander Straeten.
28	Gblong.	1628	5 9 by 1 7½	1 keyboard; 4½ oct., C—F, without lowest C; appears to have been extended by the maker from 3½ oct., E—C. A soundline 'A genouillère'.	M. Léon Joutet, Brussels.	V. Mahillon.
29	Bent side.	1628	1 keyboard; sound-board painted with musical subjects.	Mme. Snoeck, Ghent.	Rev. F. W. Galpin.
30	Bent side.	1629	7 4 by 3 0	2 keyboards; 38 keys, G—F; black naturals. Rose No. 4.	M. Gerard de Frins, Louvain.	F. F. de Frins, Limerick.
31	Bent side.	1630	4 10½ by 2 10	2 keyboards; 4½ oct., G—E; black naturals; painting inside top said to be by La Tour. Inscribed JOHANNES RUCKERS MS FICIT. ANTWERPIAE. Case and top black and gold lacquer, Chinese. Drawn in <i>L'Illustration</i> , March 13, 1856, and as frontispiece to Chevalier de Burbanck's pamphlet.	Baroness James de Rothschild, Paris.	Georges Pfeiffer.
32	Bent side.	1632	6 2 by 3 3	2 keyboards; 5 oct. and 1 note, F—G; white naturals; 4 stops 'A genouillère.' Rose No. 3.	M. Snoeck, Renaix.	C. Meerens.
33	.	1632	Top plaited. (The date inclines us to attribute this one to Hans the Younger); the rose is not described.	M. De Breyne, Ypres.	E. Vander Straeten.
34	Bent side.	1634	7 3 by 3 2	1 keyboard; compass 4½ octaves, G—E. White naturals. Name-board, JOHANNES RUCKERS MS FICIT. ANTWERPIAE. On flap, 'Soll Das gloria.' Inside top, 'Acta virum probant.'	Earl of Dysart.	A. J. Hipkins.
35	Gblong.	1636	5 0 by 1 6	1 keyboard. Inscribed JOHANNES RUCKERS FICIT. ANTWERPIAE, 1636. The stand also original.	Play Collection, Brussels (dispersed).	Rev. F. W. Galpin.
36	Gblong.	1637	1 keyboard to right, 4 oct., C—C (short oct. in bass); white naturals. On sound-board the date 1637, and on the cover the inscription—'Audi Vide et Tace Si via vivere in Euse.'	Museum of the Hochschule für Musik, Berlin.	Rev. F. W. Galpin.
37	Bent side.	1637	6 1 by 2 9½	1 keyboard; 4½ oct., A—F; white naturals. Inscribed as No. 31, with date.	The late John Callcott Horsley, Esq., B.A., London.	J. C. Horsley.
38	Oblong.	1638	5 9 by 1 7	1 keyboard; 4 oct., etc., C—D; white naturals. Inscribed as No. 25, with date, and MOSICA MAJORUM EST SOLAMUS DULCES LABORUM, Rose No. 2.	Mme. Snoeck, Ghent.	C. Meerens.

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of Information.
39	Bent side.	1638	ft. in. ft. in. 7 4½ by 2 6	2 original keyboards, the lower, 4 oct. and a note, E-F; the upper, 45 keys, E-C. The upper have prolongations on the lowest F# and G# keys at an angle to touch the fourths below, in order to preserve the semitonal succession after the short octave of the lower keyboard, while securing the short octave of the upper. Below E of the upper is a wooden block described by Quirio van Blankenburg. This is the only Ruckers known to Mr. Hipkins left unaltered in the instrument and keyboards. A restorer has taken away two rows of jacks and the stops, as may be still seen; making the instrument two independent spinets, an eleventh apart in pitch, so as to set the keyboards with untransposed notes. Foisted belly with date; over keys JOANNES RUCKERS FECIT ANTWERPIAE. Paintings inside top, black and gold case and old stand. Formerly in the possession of the late Mr. Spence of Florence. See <i>Piano-forte Primer</i> , p. 88.	The late Right Hon. Sir Bernhard Samuelson (1896).	A. J. Hipkins.
40	Bent side.	1639	5 9 by 2 7½	1 keyboard; no keys; 4 stops; Rose No. 4; black and gold case.	South Kensington Museum (gift of Messrs. Kirkman).	A. J. Hipkins.
41	Bent side.	1642	7 4½ by 2 8	2 keyboards; 4½ oct., B-D; 4 stops at the side as originally placed; Rose No. 4; paintings.	Countess of Dudley.	A. J. Hipkins.
42	Bent side.	Undated	7 11 by 3 0	2 keyboards; 5 oct., F-F; painted outside by Teniers or Brouwer, inside by Breughel and Paul Brill. Rose No. 3.	Musée du Conservatoire, Paris (Clapiasson Collection).	G. Chouquet.
43	Bent side.		7 1 by 2 7	1 keyboard; 4½ oct., G-D; black naturals; Rose No. 4; blackwood case with incrustated ivory, according to M. du Sommerard, Italian work.	Musée de l'Hôtel de Clugny, Paris. Cat. 1875, No. 2825.	A. J. Hipkins.
44	Bent side, with oblong clavichord attached.		5 11 by 2 5½	2 keyboards; each 3½ oct., B-C; black naturals; 2 stops to the bent side instrument and Rose No. 4; to the oblong one, Rose No. 2; superbly painted. The two instruments together form an oblong square.	Museum of the Hochschule, Berlin.	C. Meerens.
45	Bent side.		5 11 by 2 7½	4½ oct., C-E; white naturals; superb paintings.	M. Snoeck, Renaix.	C. Meerens.
46	Bent side.		6 0 by 2 7	1 original keyboard, 4½ oct., C-F; 5 keys added in treble; white naturals; 8 stops; Rose No. 3; painting of Orpheus playing a lute and viol.	M. Régibo, Renaix.	A. Régibo.
47	Bent side.		1 original keyboard, 4½ oct., C-F; 4 keys added in treble; Rose No. 3, cut in hardwood.	M. Régibo, Renaix.	A. Régibo.
48	Oblong.		1 keyboard; 5 oct. and a note, F-G; not original. An exceptional form, allied to the older Italian pentagonal spinet, enclosed in an oblong case.	Museum of the Hochschule, Berlin.	Rev. F. W. Galpin.
49 and 50	Oblong.		{ Two specimens in the Flemish collection of the late C. Snoeck.	Mme. Snoeck, Ghent.	Rev. F. W. Galpin.
51	Bent side.			1 keyboard with two registers, unison and octave.	Musée du Steen, Antwerp.
III. ANDRIES RUCKERS DE OUDE (the Elder).						
52	Oblong.	1510	4 4 by 1 8	1 keyboard to the right; 4 oct., C-C; (short oct. in base); white naturals. Inscribed ANDREAS RUCKERS ME FECIT ANTWERPIAE, and 'Omnia spiritus laudet Dominum.' On the sound-board is the date 1510. A 'sourdine' added in the 18th century.	Rev. F. W. Galpin, Hatfield, Essex.	Rev. F. W. Galpin.
53	Oblong.	1613	3 8½ by 1 4½	1 keyboard; 4 oct., C-C; white naturals. Inscribed ANDREAS RUCKERS ME FECIT ANTWERPIAE, 1613. Belonged to the clavichordist and carillonneur, Matthias Vanden Gheyn, who put his mark upon it in 1740.	Musée du Conservatoire, Brussels.	V. Mahillon.
54	Oblong.	1613	1 keyboard to the left; 4 oct., C-C; (short oct. in base). A small instrument.	Mme. Snoeck, Ghent.	
55	Bent side.	1614	7 6 by 2 8	2 keyboards, not original; 4½ oct., A-E; white naturals; buff leather, lute and octave stops; pedal, not original; case rescued 18th century. Inscribed as No. 53. Rose No. 6. Painting inside top attributed to Van der Meulen.	Howard Head, Esq., London.	A. J. Hipkins.
56	Bent side.	1615	4 0 by	Inscribed CONCORDIA RES PARVAS CRESCUNT. DISCORDIA MAXIMAS. DILASUNTUS; was in the Collegiate Church of St. Jacques, Antwerp.	Léon de Burbure, p. 28.
57	Bent side.	1618	7 4 by 2 10	4½ oct., C-F; white naturals. Inscribed SOLO DEO GLORIA.	Museum of the Hochschule, Berlin.	C. Meerens.
58	Bent side.	1619	8 10½ by 2 10	2 keyboards; 5 oct., C-C; the lowest note 5ve below cello C; belly gilt and diapered in Moorish style; painting of Orpheus outside. Inscribed as No. 53, with date. Rose No. 5.	M. Régibo, Renaix.	A. Régibo.
59	Bent side.	1620	5 10 by 2 8	2 keyboards; 4½ oct., G-F; (short oct. in base); 4 stops. Workmanship very similar to No. 14, but has the initials A. R.	Museum of the Hochschule, Berlin.	C. Meerens.
60	Oblong.	1620	1 keyboard; 4 oct., C-C; (short oct. in base); white naturals. Inscribed ANDREAS RUCKERS ME FECIT ANTWERPIAE and SIO TRANSIT GLORIA MUNDI. Perhaps identical with No. 62.	Morris Steinert Collection, New Haven, Connecticut.	Rev. F. W. Galpin.
61	Oblong.	1620	5 8 by 1 7½	1 keyboard to the right; 4 oct., C-C; white naturals; chromatic compass, the short octave having been completed by a later hand. Inscribed ANDREAS RUCKERS ME FECIT ANTWERPIAE, and 'Omnia spiritus laudet Dominum.' On the sound-board the date 1620.	Musée du Conservatoire, Brussels.	Rev. F. W. Galpin.
62	Oblong.	1620	4 1 by 1 3½	1 keyboard; 3½ oct., E-C; white naturals. Inscribed as No. 53, and inside the top SIO TRANSIT GLORIA MUNDI. See No. 60.	M. Alfred Campo, Brussels.	V. Mahillon.

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of Information.
63	Oblong.	1823	ft. in. ft. in. 5 7½ by 1 7½	1 keyboard; 4 oct., C—C; white naturals. Inscribed as No. 53, with date.	M. Victor and Joseph Mahillon, Brussels.	V. Mahillon.
64	Bent side.	1823	7 9 by 3 1	2 keyboards; 5 oct., F—F; white naturals; 3 stops; pedal not original; case veneered 18th century. Rose No. 8.	The late John Kullah, London.	H. Holiday.
65	Bent side.	1824	8 0 by 2 10	5 oct., F—F; 3 stops. Inscribed MUSICA LAMENTATITUR COMES, MEDICINA DOLORUM.	Musée Archéologique, Bruges.	V. Mahillon.
66	Oblong.	1826	4 0 by 3 1½	1 keyboard; 3½ oct. and 2 notes; at least an Sve added in the 18th century. Inscribed as No. 53, and inside top as No. 52. The stand a row of five balusters.	E. Vander Straeten.
67	Oblong.	1832	5 8 by 1 7½	1 original keyboard to right hand of front; 4½ oct., C—F; white naturals. Inscribed inside top MUSICA. MAGNORUM. SOLAMEN. DULCE. LABORUM. Rose No. 8.	M. Régibo, Renaix.	A. Régibo.
68	Oblong.	1833	2 1½ by 1 6	1 original keyboard to left hand of front; 4½ oct. C—F; white naturals. Inscribed ANDREAS RUCKERS FECIT ANTWERPIAE. Hardwood jacks of double thickness; painting inside top. Rose No. 8.	M. Régibo, Renaix.	A. Régibo.
69	Bent side.	1833	7 0 by 2 8	1 keyboard. Inscribed ANDREAS RUCKERS IN COLLECTIONE ANNO 1833. Formerly in the collection of Paul de Wit, Leipzig.	Heyer Collection, Cologne.	Rev. F. W. Galpin.
70	1834	Inscribed ANDREAS RUCKERS ANTWERPIAE.	In a village in Flanders.	E. Vander Straeten.
71	Bent side.	1836	2 keyboards not original; 5 oct.; black naturals stops and legs like Taskin's; beautifully painted. Inscribed as No. 53, with date. Dijon, France.	E. Vander Straeten.
72	Bent side.	1838	7 8 by 3 1	2 keyboards. Rose No. 8. Buff stop. Painted on name-board ANDRÉ RUCKERS ANNEE 1838. 'Mis en revêtement par Pascal Taskin, 1782.' Case and top lacquer with Japanese figures. Exhibited, London, 1885.	Museo Civico, Turin.	A. J. Hipkins.
73	Bent side.	1839	8 4 by 2 9 at keyboard.	2 keyboards, compass 4½ octaves G—D, white naturals. Two unisons and octave. Case dark green, powdered with gold. Sound-board painted, and usual A. Ruckers rose.	Morley, London.	Mr. C. Cramp, and E. J. Hipkins.
74	Bent side.	1840	8 0 by 2 5	1 original keyboard; 4 oct., etc., C—D; white naturals. Inscribed ANDREAS RUCKERS, 1840; and inside top MUSICA LAMENTATITUR COMES MEDICINA DOLORUM; inside flap CONCORDIA MUSICA AMICA. 2 stops; Rose No. 8; case patterned paper.	The late Miss Twining, Dial House, Twickenham.	A. J. Hipkins.
75	Oblong.	1844	5 8 by 1 8	1 keyboard; 4 oct., C—U. Inscribed ANDREAS RUCKERS, ANNO 1844.	M. Victor Mahillon, Brussels.	V. Mahillon.
76	Bent side.	1846	7 5 by 3 0	2 keyboards, each 5 oct.; black naturals. Rose No. 8. Inscribed ANDREA RUCKERS ME FECIT ANTWERPIAE.	M. Paul Endel, Paris.	F. Endel.
77	Bent side.	1851	8 8 by 3 0	2 keyboards not original; nearly 5 oct., G—F, lowest G wanting; white naturals. Inscribed as No. 53, with date, and sic THABERT GLORIA MUNDI, MUSICA DONUM DEI, and formerly ACTA VIRUM PROBANT. Concert of monkeys on the belly, one conducting. Rose No. 6.	South Kensington Museum (gift, as having been Handel's, of Messrs. Broadwood).	A. J. Hipkins.
78	Oblong.	Un-dated	2 7 by 1 3½	1 original keyboard placed in the middle; 4 oct., C—C; white naturals. Rose No. 6.	M. Régibo, Renaix.	A. Régibo.
79	Bent side.	..	7 8 by 2 7	2 keyboards; the lower 4 oct., etc., B—C, the upper 5½ oct., E—C; only one key, a white natural, left; 3 stops; no name or rose, but style of work of A. R. Inscribed OMNIS SPIRITUS LAUDAT DOMINUM CONCORDIA RES PARVAE CRESCUNT DISCORDIA MAXIMAE DILASANTUR.	Musée du Steen, Antwerp.	V. Mahillon.
80	Bent side.	..	7 9 by 2 11	2 keyboards, not original; 5 oct., F—F; black naturals; inscribed as No. 58; date of renovation, 1738, marked on a jack; fine paintings.	Le Barou de Gier, Château de Velu, Pas de Calais, France.	V. Mahillon.
81	Oblong.	..	3 8 by 1 5	1 keyboard; 4½ oct., C—F; white naturals; inscribed as No. 53.	Musée du Conservatoire, Brussels.	V. Mahillon.
82	Bent side.	..	8 8 by 2 8	2 keyboards; 4½ oct., B—F; white naturals; name and rose wanting; attributed to A. R. by the work.	M. Snoeck, Renaix.	C. Meereens.
83	Oblong.	..	3 8 by 1 4	1 keyboard 3½ oct., E—C. Rose No. 8.	M. Snoeck, Renaix.	C. Snoeck.
84	Bent side.	..	6 1 by 2 10½	1 keyboard; 4 oct., C—C; without lowest C; white naturals. Rose No. 6; painting of a hunt.	M. G. de Prins.	F. F. de Prins.
85	Four cornered	..	32 in. long, 12½ in. wide, 5 in. deep; keyboard projects 4 in.	White natural keys, E to D, nearly 4 octaves. Inscribed ANDREA RUCKERS ME FECIT ANTWERPIAE (Rose No. 6). Inside surfaces painted in black curved design on a white ground. Red line round the inside. Georgian mahogany case.	The late W. H. Hammond Jones, Esq., Witely, Godalming.	W. H. H. Jones.
86 and 87	Bent side.	2 specimens each with one keyboard, on one the inscription, 'sic transit gloria mundi.' The Ruckers rose with the initials A. R.	Musée du Steen, Antwerp.	Rev. F. W. Galpin.
88	Bent side.	2 keyboards; five oct., G—G, white naturals; 3 stops. Inscribed ANDREAS RUCKERS ME FECIT ANTWERPIAE. Formerly in the Bodlington Collection; sold 1901.	Rev. F. W. Galpin.
IV. ANDRIES RUCKERS DE JONGE (the Younger).						
89	Bent side.	1855	Case painted in blue camaleu in rococo style; attribution to the younger A. R. from the late date.	M. Lavignée from the Château de Perceau, près Cosne).	S. Blondel.
90	Bent side.	1858	5 4½ by 2 2½	1 original keyboard; 4 oct., C—C; white naturals; painting inside top. Rose No. 8.	M. Régibo, Renaix.	A. Régibo.
91	Bent side.	1859	5 10 by 2 4	1 original keyboard; 4 oct., C—C; white naturals. Rose No. 7.	M. Régibo, Renaix.	A. Régibo.
92	Oblong.	..	4 9 by 1 5½	1 original keyboard to the left; 4 oct., etc., D—E; white naturals. Rose No. 7.	M. Régibo, Renaix.	A. Régibo.

V. CHRISTOFEL RUCKERS.

No.	Form.	Date.	Dimensions.	General Description.	Present Owner.	Source of Information.
98	Oblong.	Un-dated	ft. in. ft. in. 3 7 by 1 5½	1 original keyboard to the right; 4 oct. E—K, without the highest D♯; white naturals; Rose No. 3, with initials C. R. Sound-board and top renewed. Inscribed 'Acta virum probant.' An instrument by Christofel Ruckers was stated by Vander Straeten to be in the museum at Namur.	In the Crosby-Brown Collection, Metropolitan Museum, New York. Museum, Namur.	A. Régibo.

A. J. H.; with additions by Rev. F. W. Galpin and Miss E. J. Hipkins.

RUDDYGORE: OR, THE WITCH'S CURSE (Title afterwards spelt RUDDIGORE). Comic opera in two acts; the words by W. S. Gilbert, music by Sir Arthur Sullivan. Produced at the Savoy Theatre, Jan. 22, 1857.

RUDERSDORFF, HERMINE, born Dec. 12, 1822, at Ivanowsky in the Ukraine, where her father, Joseph Rudersdorff, a distinguished violinist (afterwards of Hamburg), was then engaged. She learned singing at Paris from Bordogni, and at Milan from de Micherout, also master of Clara Novello, Catherine Hayes, etc. She first appeared in Germany in concerts, and sang the principal soprano music at the production of Mendelssohn's 'Lobgesang' at Leipzig, June 25, 1840. The next year she appeared on the stage at Carlsruhe with great success, and then at Frankfurt—where in 1844 she married Dr. Küchenmeister, a professor of mathematics,—and at Breslau, Berlin, etc. Her repertory was large, and included both dramatic and coloratura parts. On May 23, 1854, she first appeared in England in German opera at Drury Lane, as Donna Anna, and was fairly well received in that and her subsequent parts of Constance in Mozart's 'Entführung,' Agatha, Fidelio, and Margaret of Valois, and in English as Elvira in 'Masaniello.' She took up her residence in England for several years, only occasionally visiting Germany for concerts and festivals. She sang at the Royal Italian Opera in 1855, also from 1861 to 1865, as Donnas Anna and Elvira, Jemmy, Bertha, Natalia ('L'Étoile du Nord'), etc.; and in English at St. James's Theatre for a few nights in Loder's opera, 'Raymond and Agnes.' But it was as a concert-singer that she was best appreciated, her very powerful voice (not always pleasing), combined with admirable powers of declamation, certainty of execution, and thorough musicianship, having enabled her to take high rank as a singer of oratorio. Especially fine was her singing of the opening soprano recitatives in the 'Messiah' with the air, 'Rejoice greatly,' and of the final air and chorus in the 'Israel,' especially at the Handel Festivals, when her voice would tell out with wonderful effect against the powerful band and choir. In concerts, whatever she undertook she always showed herself a thorough artist, being devoted to her art, in which she worked with untiring industry. This she proved by her

revival of Mozart's fine scenas 'Ahi lo previdi' and 'Misera dove son,' and of Handel's air from 'Semele,' 'O Sleep,' or by the introduction in their own tongue of Danish melodies and the Spanish songs of Yradier. She was engaged at the Boston festivals of 1871 and 1872, and finally settled in that city, becoming a teacher of singing there. Her best pupils were Misses Emma Thursby and Isabel Fassett. Her son was the well-known actor, Richard Mansfield, for whose revival of *Richard III.* at the Globe Theatre in 1889, Mr. Edward German wrote the incidental music. Mme. Rudersdorff died at Boston, Feb. 26, 1882. For the Birmingham Festival of 1873 she wrote the libretto of Signor Randegger's cantata 'Fridolin,' founded on Schiller's 'Gang nach dem Eisenhammer.' She had previously introduced, in 1869, at the Gewandhaus concerts, Leipzig, the same composer's scena 'Medea,' which she sang also at the Crystal Palace and in 1872 at Boston.

A. C.

RUDHALL. A family of bell-founders of this name carried on business in Bell Lane, Gloucester, from 1648 until late in the 18th century. Its successive members were Abraham, sen., Abraham, jun., Abel, Thomas, and John. From catalogues published by them it appears that from 1648 to Lady Day, 1751, they had cast 2972 bells 'for sixteen cities' and other places 'in forty-four several counties,' and at Lady Day 1774 the number had increased to 3594. The principal metropolitan peals cast by them were those of St. Bride, St. Dunstan in the East, and St. Martin in the Fields. The most eminent member of the family was Abraham junior, who brought the art of bell-casting to great perfection. He was born 1657, and died Jan. 25, 1736, 'famed for his great skill, beloved and esteemed for his singular good nature and integrity,' and was buried in Gloucester Cathedral. His daughter, Alicia, married William HINE, the cathedral organist. W. H. H.

RUDOLPH JOHANN JOSEPH RAINER, ARCHDUKE of Austria, born at Florence, Jan. 8, 1788, died suddenly at Baden, Vienna, July 24, 1831, was the youngest child of Leopold of Tuscany and Maria Louisa of Spain. Music was hereditary in his family. His great-grandfather, Carl VI., so accompanied an opera by Fux, that the composer exclaimed: 'Bravo! your Majesty might serve anywhere as chief Capellmeister!'

'Not so fast, my dear chief Capellmeister,' replied the Emperor; 'we are better off as we are!' His grandmother, the great Maria Theresa, was a fine singer; her children, from very early age, sang and performed cantatas and little dramas, to words by Metastasio, on birthdays and fêtes. His uncle, Max Franz, was Elector of Cologne, viola-player, and organiser of the splendid orchestra at Bonn, to which the Rombergs, Rieses, Reichas, and Beethovens belonged. It was his father, Leopold, who, after the first performance of Cimarosa's 'Matrimonio segreto,' gave all those who took part in the production a supper, and then ordered the performance to be repeated; and it was his aunt, Marie Antoinette, who supported Gluck against Piccinni at Paris.

Like the other children of the Imperial family, Rudolph was instructed in music by Anton Teyher, and tradition says that as early as twelve or fourteen he gave ample proof of more than ordinary musical talent and taste; as soon as he had liberty of choice he exchanged Teyher for Beethoven. The precise date and circumstances attending this change have eluded investigation; but it seems probable that the connection between Rudolph, a youth of sixteen, and Beethoven, a man of thirty-four, began in the winter of 1803-4.

Ries relates that Beethoven's breaches of court etiquette were a constant source of trouble to his pupil's chamberlains, who strove in vain to enforce its rules on him. He at last lost all patience, pushed his way into the young Archduke's presence, and, excessively angry, assured him that he had all due respect for his person, but that the punctilious observance of all the rules in which he was daily tutored was not his business. Rudolph laughed good-humouredly and gave orders that for the future he should be allowed to go his own way.

Beethoven's triple concerto, op. 56 (1804), though dedicated to Prince Lobkowitz, was written, says Schindler, for the Archduke, Seidler, and Kraft. The work does not require great execution in the piano part, but a youth of sixteen able to play it must be a very respectable performer.

The weakness of the Archduke's constitution is said to have been the cause of his entering the Church. The coadjutorship of Olmütz secured to him the succession; and the income of the position was probably not a bad one; for, though his allowance as Archduke in a family so very numerous was of necessity comparatively small, yet, in the spring of 1809, just after completing his 21st year, he subscribed 1500 florins to Beethoven's annuity. [See vol. i. pp. 244, 246.] In 1818 Beethoven determined to compose a solemn Mass for the installation service of his pupil, a year or two later. On Sept. 28, 1819, the Cardinal's insignia arrived from the Pope, and the installa-

tion was at length fixed for March 9,¹ 1820. But the Mass had assumed such gigantic proportions that the ceremony had passed nearly two years before it was completed.² [See vol. i. p. 253.] Instead of it, the music performed was a Mass in Bb, by Hummel; a 'Te Deum' in C, by Preindl; 'Ecce Sacerdos magnus,' by a 'Herr P. v. R.'; and Haydn's Offertorium in D minor.

Apart from the annuity, Rudolph's purse was probably often opened to his master; but the strongest proofs of his respect and affection are to be found in his careful preservation of Beethoven's most insignificant letters; in the zeal with which he collected for his library everything published by him; in his purchase of the caligraphic copy of his works made by Haslinger;³ and in his patience with him, often in trying circumstances. For Beethoven, notwithstanding all his obligations to his patron, chafed under the interference with his perfect liberty, which duty to the Archduke-Cardinal occasionally imposed. There are passages in his letters to Ries and others (suppressed in publication), as well as in the conversation-books, which show how galling even this light yoke was to Beethoven; and one feels in perusing those addressed to the Archduke how frivolous are some of the excuses for not attending him at the proper hour, and how hollow and insincere are the occasional compliments, as Rudolph must have felt. That Beethoven was pleased to find the Forty Variations dedicated to him by 'his pupil, R. E. H.' (Rudolph Erz-Herzog), was probably the fact; but it is doubtful whether his satisfaction warranted the superlatives in which his letter of thanks is couched. Other letters again breathe throughout nothing but a true and warm affection for his pupil. Köchel sensibly remarks that the trouble lay in Beethoven's 'aversion to the enforced performance of regular duties, especially to giving lessons, and teaching the theory of music, in which it is well known his strength did not lie, and for which he had to prepare himself.' When the untamed nature of Beethoven, and his deafness, are considered, together with his lack of worldly wisdom and his absolute need of a Maecenas, one feels deeply how fortunate he was to have attracted and retained the sympathy and affection of a man of such sweet and tender qualities as Archduke Rudolph.

We can hardly expect an Archduke-Cardinal to be a voluminous composer, but the Forty Variations already mentioned, and a sonata for PF. and clarinet, composed for Count Ferdinand Troyer, both published by Haslinger, are good specimens of his musical talents and acquire-

¹ This date is from the report of the event in the *Wiener musicalische Zeitung* of March 25, 1820.

² Beethoven announces its completion in a letter to the Archduke Feb. 27, 1822.

³ These, a splendid series of red folio volumes, beautifully copied, are conspicuous in the Library of the Gesellschaft der Musikfreunde at Vienna.

ments. There is also a set of Variations on a theme of Rossini's, corrected by Beethoven in MS. He was for many years the 'protector' of the great Gesellschaft der Musikfreunde at Vienna, and bequeathed to it his very valuable musical library. An oil portrait in the possession of his son, shows a rather intellectual face, of the Hapsburg type, but its peculiarities so softened as to be more than ordinarily pleasing, and even handsome.¹

The Archduke's published works are the two alluded to above: Theme by L. van Beethoven, with Forty Variations—for PF. solo (Haslinger); Sonata for PF. and clarinet, op. 2, in A (Haslinger).

A. W. T.

RUDORFF, ERNEST, was born in Berlin, Jan. 18, 1840; his family was of Hanoverian extraction. At the age of five he received his first musical instruction from a god-daughter of C. M. von Weber, an excellent pianist and of a thoroughly poetical nature. From his twelfth to his seventeenth year he was a pupil of Bargiel in PF. playing and composition. A song and a PF. piece composed at this period he afterwards thought worthy of publication (op. 2, No. 1; op. 10, No. 4). For a short time in 1858 he had the advantage of PF. lessons from Mme. Schumann, and from his twelfth to his fourteenth year learned the violin under Louis Ries. In 1857 he entered the Friedrichs Gymnasium, whence in 1859 he passed to the Berlin university. During the whole of this time his thoughts were bent on the musical profession. When Joachim visited Berlin in 1852 Rudorff had played before him, and had made such a favourable impression that Joachim advised his being allowed to follow the profession of music. His father at length consented that he should go to Michaelmas, 1859, and attend the Conservatorium and the University at Leipzig. After two terms of theology and history he devoted himself exclusively to music, and on leaving the Conservatorium in 1861, continued his musical studies for a year under Hauptmann and Reinecke. Rudorff went to Stockhausen early in 1864, conducted those of the Choral Society's concerts in which Stockhausen himself sang, and finally made concert tours with him. In 1865 he became professor at the Cologne Conservatorium, and there in 1867 he founded the Bach Society, whose performance at their first concert in 1869 gave such satisfaction to Rudorff that he at first refused an appointment as professor in the new Hochschule at Berlin under Joachim's direction. He afterwards changed his mind, and since October 1869 has been first professor of PF. playing and director of the piano classes in that institution, besides conducting part of the orchestral practices, and in Joachim's absence directing the public performances. In the summer of 1880, on Max Bruch's appointment as director of the Liverpool Philharmonic Society,

Rudorff succeeded him as conductor of the Stern Singing-Society in Berlin, but without resigning his post at the Hochschule. [He retained the direction of this Society till 1890.]

He has much talent for piano-playing, though an unfortunate nervousness prevents him from exercising it much in public. His tone is beautiful, his conception poetical, and he possesses considerable power of execution, never degenerating into mere display. He is an excellent teacher; but his greatest gifts are shown in composition. His musical style is founded throughout upon the romantic school of Chopin, Mendelssohn, and Schumann, and especially of Weber. His part-songs interest by their elegance and thoughtfulness, but few, if any, leave a pleasant impression on the mind. This is true also of his solo songs. He has an almost feminine horror of anything rough or common, and often carries this to such a pitch as seriously to interfere with simplicity and naturalness. He has deeply imbibed the romantic charm of Weber's music, but the bold easy mirth which at times does not shrink from trivialities is unfortunately utterly strange to him. His early songs opp. 1 and 2 follow, it is true, closely in Schumann's steps, but they are among the most beautiful that have been written in his style.

Rudorff's works are for the most part of great technical difficulty, and many of them are over-elaborated, a fact which has kept his works from being as well known as they deserve. The following is a list of his published works:—

- | | |
|--|--|
| Op. | Op. |
| 1. Variations for two PPs. | 15. 'Der Aufzug der Romane,' from Tieck, for solos, chorus, and orchestra. |
| 2. Six songs. | 20. Serenade for orchestra. |
| 3. Six songs from Eichendorff. | 21. Six three-part songs for female voices. |
| 4. Six duets for PF. | 24. Variations on an original theme for orchestra. |
| 5. Sextet for strings (played at the Popular Concerts in April 1900 and January 1903). | 25. Four six-part songs. |
| 6. Four part-songs for mixed voices. | 26. 'Gesang an die Sterne,' by Rückert, for six-part chorus and orchestra. |
| 7. Romance for violoncello and orchestra. | 27. Six four-part songs. |
| 8. Overture to 'Der blonde Ekbert' for orchestra. | 28. Three songs. |
| 9. Six part-songs for female voices. | 29. Two études for PF. |
| 10. Eight Fantasiestücke for PF. | 30. Four part-songs for mixed choir. |
| 11. Four part-songs for mixed voices. | 31. Symphony in B flat. |
| 12. Overture to 'Otto der Schütze' for orchestra. | 32. Kinderwaller for P.F. duet. |
| 13. Four part-songs for mixed voices. | 33. A second symphony in G minor (1891). |
| 14. Fantasia for PF. | Symphonic variations for orchestra. |
| 15. Ballade for full orchestra. | Scherzo capriccioso for orchestra. |
| 16. Four songs. | |
| 17. Four songs. | |

He has also arranged Schubert's 4-hand fantasia in F minor (op. 103) for orchestra. P. S.

RÜBEZAHL. An opera in two acts; words by J. G. Rhode, music composed by C. M. von Weber, at Breslau, between October 1804 and May 1806. Weber's autograph list shows that the first act contained fifteen scenes, the second twelve. Of these pieces of music, however, only three have survived (in MS.)—a Chorus of Spirits, a Recitative and Arietta, and a Quintet. Of the overture (in D minor) only the last eleven bars of the first violin part exist; it was recast into the overture called 'The Ruler of the Spirits.'

¹ For a more detailed notice see the *Musical World*, April 2, 1881.

(See Jahn's List, Nos. 44, 45, 46, 122; Anhang 2, No. 27.)

RÜCKAUF, ANTON, was born March 13, 1855, at Prague, and died Sept. 19, 1903, at Schloss Alt-Erlaa. He was a pupil of Proksch, and studied at the same time at the Prague Organ School, taught for a time at Proksch's Institute till he went, at the expense of the state, to further his studies in Vienna, where, advised by Brahms, he learnt counterpoint with Nottebohm and with Nawratil when Nottebohm died. His connection with Gustav Walter, whose permanent accompanist he was, had a great influence over his development as a composer of songs, and having been an excellent pianist himself, he belongs unquestionably to the comparatively small number of modern song-writers, who give equal expression and effect to the formation of the voice-part and accompaniment. His compositions are of various sorts, including songs, 'Balladen,' settings to five Minnelieder of Walter von der Vogelweide, gipsy songs, duets, choral songs with PF. accompaniment and also a cappella, besides a violin sonata (op. 7), a PF. quintet (op. 13), some piano solos and duets, and an opera, 'Die Rosenthalerin,' which was produced at Dresden in 1897, and attracted a considerable amount of attention.

H. V. H.

RUFFO, VINCENZO, a member of a noble Veronese family, who flourished as a composer in the 16th century. His name is included by Baini in his list of the 'good musicians' of his fourth epoch. Unless a five-part magnificat, stated to have been published at Venice in 1539, and to exist at Lüneburg, be a genuine work, his first publication would seem to be a book of motets dated 1542, where he is described as 'musico' (i.e. castrato) in the service of the Marchese Alfonso d'Avalli. In 1554 he became maestro di cappella at the cathedral of Verona, and in 1563 was appointed to a similar post at the cathedral of Milan. In 1574-79 he was at Pistoia in the same capacity, and in 1580 we find him again at Milan. His last publication, a book of masses, dated 1592, contains no mention of any official post, and it is argued that he therefore held none in his latest years. The other masses appeared in 1557, 1574, and 1580; motets in 1542, 1555, and 1583, settings of the magnificat in 1578, and psalms a 5 in 1574. His madrigals were published in 1545, 1554, 1555, 1556, and 1560. The psalms and a mass were written for his patron Saint Carlo Borromeo in accordance with the decrees of the Council of Trent. An Adoramus is printed by Lück, and a madrigal, 'See from his ocean bed,' edited by Oliphant, is in Hullah's Part Music. Torchi, in his 'Arte Musicale in Italia,' vol. i., gives two movements from masses, a motet, and two madrigals. The libraries of Christ Church, Oxford, and the Royal College of Music, contain specimens of his works in

MS., and for others the article in the *Quellen-Lexikon* and an interesting monograph by Luigi Torri in the *Riv. Mus. Ital.* iii. 635, and iv. 233, should be consulted.

M.

RUGGIERI, the name of a celebrated family of violin-makers, who flourished at Cremona and Brescia. The eldest was FRANCESCO, commonly known as 'Ruggieri il Per' (the father), whose instruments date from 1668 to 1720 or thereabouts. JOHN BAPTIST (1700-1725) and PETER (1700-20), who form the second generation of the family, were probably his sons; and John Baptist (called 'il buono'), who was indisputably the best maker in the family, claims to have been a pupil of Nicholas Amati. Besides these, we hear of GUIDO and VINCENZO Ruggieri, both of Cremona, early in the 18th century. The instruments of the Ruggieri, though differing widely among themselves, bear a general resemblance to those of the Amati family. They rank high among the works of the second-rate makers, and are often passed off as Amatis.

E. J. P.

RUINS OF ATHENS, THE. A dramatic piece (Nachspiel) written by Kotzebue, and composed by Beethoven (op. 113), for the opening of a new theatre at Pesth, Feb. 9, 1812, when it was preceded in the ceremony by 'King Stephen' (op. 117). It contains an overture and eight numbers, and was probably composed late in 1811. The 'Marcia alla turca,' No. 4, is founded on the theme of the Variations in D, op. 76, which was composed two years earlier. The March and Chorus, No. 6, were used in 1822, with the Overture, op. 124, for the opening of the Josephstadt Theatre, Vienna. The Overture to 'The Ruins of Athens' and the Turkish March were published in 1823, but the rest of the music remained in MS. till 1846.

G.

RULE, BRITANNIA! The music of this 'ode in honour of Great Britain,' which, according to Southey, 'will be the political hymn of this country as long as she maintains her political power,' was composed by Arne for his masque of 'Alfred' (the words by Thomson and Mallet), and first performed at Cliefden House, Maidenhead, August 1, 1740. Cliefden was then the residence of Frederick, Prince of Wales, and the occasion was to commemorate the accession of George I., and the birthday of Princess Augusta. The masque was repeated on the following night, and published by Millar, August 19, 1740.

Dr. Arne afterwards altered the masque into an opera [and it was so performed at the Smock Alley Theatre, Dublin, on March 10, 1744. In the advertisement it is announced that 'Alfred' will conclude with a 'favourable Ode in honour of Great Britain, beginning "When Britain first at Heaven's command."'] It was not heard in London till March 20, 1745, when it was given at Drury Lane for the benefit

of Mrs. Arne. W. H. C. F.]. In the advertisements of that performance, and of another in April, Dr. Arne entitles 'Rule, Britannia!' 'a celebrated ode,' from which it may be inferred that it had been especially successful at Cliefden, and Dublin.

The year 1745, in which the opera was produced, is memorable for the Jacobite rising in the North, and in 1746 Handel produced his 'Occasional Oratorio,' in which he refers to its suppression, 'War shall cease, welcome Peace,' adapting those words to the opening bars of 'Rule, Britannia!'—in itself a great proof of the popularity of the air.

By a singular anachronism, Schoelcher, in his *Life of Handel* (p. 299), accuses Arne of copying these and other bars in the song from Handel, instead of Handel's quoting them from Arne. He says also: 'Dr. Arne's *Alfred*, which was an utter failure, appears to have belonged to 1751.' It was not Arne's 'Alfred' that failed in 1751, but Mallet's alteration of the original poem, which he made shortly after the death of Thomson. Mallet endeavoured to appropriate the credit of the masque, as he had before appropriated the ballad of 'William and Margaret,' and thereby brought himself into notice.¹ Mallet's version of 'Alfred' was produced in 1751, and, in spite of Garrick's acting, failed, as it deserved to fail.²

The score of 'Rule, Britannia!' was printed by Arne at the end of 'The Judgment of Paris,' which had also been produced at Cliefden in 1740. The air was adopted by Jacobites as well as Hanoverians, but the former parodied, or changed, the words.

A doubt was raised as to the authorship of the words of 'Rule, Britannia!' by Dr. Dinsdale, editor of the re-edition of Mallet's *Poems* in 1851. Dinsdale claims for Mallet the ballad of 'William and Margaret,' and 'Rule, Britannia!' As to the first claim, the most convincing evidence against Mallet—unknown when Dinsdale wrote—is now to be found in the Library of the British Museum. In 1878 I first saw a copy of the original ballad in an auction room, and, guided by it, I traced a second copy in the British Museum, where it is open to all inquirers. It reproduces the tune, which had been utterly lost in England, as in Scotland, because it was not fitted for dancing, but only for recitation. Until Dinsdale put in a claim for Mallet, 'Rule, Britannia!' had been universally ascribed to Thomson, from the advertisements of the time down to the 'Scotch Songs' of Ritson—a most careful and trustworthy authority for facts.

¹ For 'William and Margaret,' with and without Mallet's alterations, see Appendix to vol. III. of *Roxbury's Ballads*, reprinted for the Ballad Society; also an article in No. 1 of the periodical entitled *The Antiquary*.

² See Chappell's *Popular Music of the Olden Time*.

Mallet left the question in doubt. Thomson was but recently dead, and consequently many of his surviving friends knew the facts. 'According to the present arrangement of the fable,' says Mallet, 'I was obliged to reject a great deal of what I had written in the other; neither could I retain of my friend's part more than three or four single speeches, and a part of one song.' He does not say that it was the one song of the whole that had stood out of the piece, and had become naturalised, lest his 'friend' should have too much credit, but 'Rule, Britannia!' comes under this description, because he allowed Lord Bolingbroke to mutilate the poem, by substituting three stanzas of his own for the fourth, fifth, and sixth of the original. Would Mallet have allowed this mutilation of the poem had it been his own? [During Mallet's lifetime, the words were printed in the second edition of a well-known song-book, 'The Charmer,' in Edinburgh, with the initials of James Thomson.] On the whole, internal evidence is strongly in favour of Thomson. See his poems of 'Britannia,' and 'Liberty.' As an antidote to Dinsdale's character of David Mallet, the reader should compare that in Chalmers's *General Biographical Dictionary*. W. C.

[See an article by J. Cuthbert Hadden in the *Nineteenth Century* for Dec. 1896; and another by Churton Collins in the *Saturday Review* of Feb. 20, 1897.]

'Rule, Britannia!' was first published by Henry Weylett as an appendix (with another song) to Arne's 'Music in the Judgment of Paris.' The copyright privilege is dated Jan. 29, 1740-41. An extraordinary perversion or religious parody was sung as a hymn in the Rev. Rowland Hill's Chapel, and was included in his *Surrey Chapel Hymns* at the beginning of the 19th century. Since the above account was written no fresh clue has come to light regarding the authorship of the words. F. K.

Beethoven wrote five variations for the piano upon the air, and besides numberless references to it in occasional compositions of all sorts, mention may be made of Wagner's overture upon it, which was written at Königsherg in 1836, sent to the Philharmonic Society of London in 1840, and apparently lost for many years. A set of parts, no doubt made for some performance which never took place, was acquired by the late Hon. Mrs. Burrell from a German dealer in old music; and another set came to light in 1904, corresponding exactly with these, from which the score was reconstructed and the work played at the Queen's Hall in Jan. 1905. It is a composition of no intrinsic value, though historically it is of some interest. M.

RUMMEL. A German musical family. (1) CHRISTIAN FRANZ LUDWIG FRIEDRICH ALEXANDER was born at Brichsenstadt, Bavaria, Nov. 27, 1787. He was educated at Mannheim, and seems to have had instruction from the Abbé

Vogler. In 1806 he took the post of bandmaster to the 2nd Nassau infantry, made the Peninsular Campaign, married in Spain, was taken prisoner, released, and served with his regiment at Waterloo. He was then employed by the Duke of Nassau to form and lead his Court orchestra, which he did with great credit to himself till 1841, when it was dissolved. Christian Rummel died at Wiesbaden, Feb. 13, 1849. He was not only an able conductor and a composer of much ability and industry, but a fine clarinetist and a good pianist. His works are numerous, and embrace pieces for military band, concertos, quintets and other pieces for clarinet, many pianoforte compositions, especially a sonata for four hands (op. 20), waltzes, variations, etc., and a Method for the PF. (2) His daughter JOSEPHINE was born at Manzanares in Spain during the Peninsular War, May 12, 1812. She was pianist at the Court at Wiesbaden, and died Dec. 19, 1877. (3) His son JOSEPH, born at Wiesbaden, Oct. 6, 1818, was educated by his father in music generally, and in the clarinet and PF. in particular, on both of which he was a good player. He was for many years Capellmeister to the Prince of Oldenburg, then residing at Wiesbaden—a post in which he was succeeded by Adolph Henselt. Up to 1842 he lived in Paris, and then removed to London for five years. In 1847 he returned to Paris, and remained there till driven back to London by the war in 1870; and in London he resided till his death, March 25, 1880. Joseph Rummel wrote no original music, but he was one of the most prolific arrangers of operas and operatic selections for the PF. that ever existed. For nearly forty years he worked incessantly for the houses of Schott and Escudier, publishing about 400 pieces with each house under his own name, besides a much larger number under *noms de plume*. His arrangements and transcriptions amount in all to fully 2000. He wrote also a series of exercises for Augener & Co., and for Escudier. (4) Joseph's sister FRANZISKA, born at Wiesbaden, Feb. 4, 1821, was educated by her father until she went to Paris to study singing under Bordogni, and afterwards to Lamperti at Milan. She became principal singer at the Court of Wiesbaden, and at length married Peter Schott, the well-known music publisher at Brussels, who died in 1873. (5) Another son, AUGUST, a capable pianist, born at Wiesbaden, Jan. 14, 1824, became a merchant in London, where he died, Dec. 14, 1886, and where (6) his son FRANZ was born, Jan. 11, 1853. At the age of fourteen he went to Brussels to study the PF. under Brassin, first as a private pupil and afterwards in the Conservatoire. He took the first prize for PF.-playing there in 1872, and afterwards became one of the staff of teachers. He made his first public appearance at Antwerp, Dec. 22,

1872, in Henselt's PF. Concerto; in July 1873 played Schumann's Concerto at the Albert Hall Concerts, London; and again at Brussels, before the King and Queen of the Belgians, with great distinction. He remained at the Conservatoire as professor till 1876, when on the advice of Rubinstein he threw up his post and began to travel, playing in the Rhine Provinces, Holland, and France. Early in 1877 he came to London, and played at the Crystal Palace on April 7. Next year he went to America, where he met with great success, though interrupted by a serious accident. He returned in 1881, and played again at the Crystal Palace on April 30. [He was for a long time a teacher in the Stern Conservatorium at Berlin. He afterwards lived at Dessau, and died at Berlin, May 2, 1901.] G.

RÜNGENHAGEN, CARL FRIEDRICH, born at Berlin, Sept. 27, 1778, became in 1815 second director of the Singakademie, and in 1833 succeeded Zelter as first director. In 1848 he received the title of professor: he wrote four operas, three oratorios, a mass, a Stabat Mater for female voices, a great deal of church music, many songs, and orchestral and chamber music, all of which is now forgotten. He died in Berlin, Dec. 21, 1851. (Riemann's *Lexikon*.) M.

RUSSELL, HENRY, was born at Sheerness on Dec. 24, 1812; went to Bologna, in 1825, to study music [was for a time a pupil of Rossini in Naples, appeared as a singer at the Surrey Theatre in 1828, and went to Canada about 1833. He was organist of the Presbyterian Church, Rochester (N.Y.), and travelled in America till 1841, when he returned to England and gave entertainments by himself and in company with Charles Mackay. The first took place at the Hanover Square Rooms, March 8, 1842]. In his particular style he had no rival. His songs 'I'm afloat,' 'A life on the ocean waves' (which in 1889 was authorised as the march of the royal marines), 'Cheer, boys, cheer' (the only air played by the regimental drum and fife band when a regiment goes abroad), 'Woodman, spare that tree,' etc., are still familiar, and some of his dramatic songs, as 'The Dream of the Reveller,' 'The Maniac,' 'The Gambler's Wife,' etc., were immensely popular in their day. It may certainly be said that over 800 songs were either written or composed by him. At a time when Australia, Tasmania, and New Zealand were almost unknown, Henry Russell was instrumental, through the Canadian government, in sending over thousands of poor people who are now wealthy. A memoir was published in 1846, and a book of reminiscences, *Cheer, boys, cheer*, in 1895. [He retired from public life in 1865, was fêted at a special concert given in his honour by Sir A. Harris in Covent Garden Theatre, Oct. 12, 1891, and died in London Dec. 8, 1900.] *L' amico dei cantanti* is a treatise

on the art of singing. [Two of his sons have attained distinction in music, Henry Russell as a singing master and operatic impresario, and Landon Ronald (born June 7, 1873) as a pianist and composer. The last-named studied at the Royal College of Music, went on tour with 'L'Enfant Prodigue' in 1891 as pianist, conducted opera at Drury Lane in 1896, and has composed many songs of high artistic aims, besides gaining wide popularity as an accompanist and conductor.] J. H. D.; with additions from *Dict. of Nat. Biog.* (suppl.), *Musical Times* for Jan. 1901, etc.

RUSSELL, WILLIAM, Mus.B., son of an organ builder and organist, was born in London, Oct. 6, 1777. He was successively a pupil of Cope, organist of St. Saviour's, Southwark, Shrubsole, of Spa Fields Chapel, and Groombridge, Hackney and St. Stephen's, Coleman Street. In 1789 he was appointed deputy to his father as organist of St. Mary, Aldermanbury, and continued so until 1793, when he obtained the post of organist at the chapel in Great Queen Street, Lincoln's Inn Fields, which he held until 1798, when the chapel was disposed of to the Wesleyan body. In 1797 he became a pupil of Dr. Arnold, with whom he studied for about three years. In 1798 he was chosen organist of St. Ann's, Limehouse. In 1800 he was engaged as pianist and composer at Sadler's Wells, where he continued about four years. In 1801 he was engaged as pianist at Covent Garden and appointed organist of the Foundling Hospital Chapel. He took his Mus.B. degree at Oxford in 1808. He composed three oratorios, 'The Deliverance of Israel,' 'The Redemption,' and 'Job' (1826); a mass in C minor, an 'Ode to Music,' an 'Ode to the Genius of Handel,' Christopher Smart's 'Ode on St. Cecilia's Day,' and an 'Ode to Harmony,' several glees, songs, and organ voluntaries, and about twenty dramatic pieces, chiefly spectacles and pantomimes. He edited in 1809 'Psalms, Hymns and Anthems for the Foundling Chapel.' He was much esteemed both as pianist and organist. He died Nov. 21, 1813. W. H. H.

RUSSLAN I LIODUMILLA. A Russian romantic opera, in five acts, based on a poem by Pushkin, the music by Glinka. Produced at St. Petersburg, Nov. 27, 1842. The scene is laid in the Caucasus, in fabulous times, and the music partakes strongly of the oriental character. The overture was played at the Crystal Palace, Sydenham, London, July 4, 1874. G.

RUST. A distinguished German musical family. FRIEDRICH WILHELM was born at Wörlitz, Dessau, July 6, 1739; his father was a person of eminence, and he received a first-rate education. He was taught music by his elder brother, Johann Ludwig Anton, who, as an amateur, had played the violin in J. S. Bach's orchestra at Leipzig; and at thirteen he played the whole of the 'Wohltemperirtes

Clavier' without book. Composition, organ, and clavier he learned from Friedemann and Emmanuel Bach, and the violin from Höckh and F. Benda; and in 1765, during a journey to Italy, from G. Benda, Tartini, and Pugnani. In 1766 he returned to Dessau, and became the life and soul of the music there. On Sept. 24, 1774, a new theatre was opened through his exertions, to which he was soon after appointed music-director. He married his pupil, Henriette Niedhart, a fine singer, and thenceforward, with a few visits to Berlin, Dresden, etc., his life was confined to Dessau, where he died March 28, 1796. His compositions include a Psalm for solo, chorals, and orchestra; several large Church Cantatas; Duodramas and Monodramas; Operas; music to Plays; Prologues and Occasional pieces, etc.; Odes and Songs (2 collections); Sonatas and Variations for the PF. solo—'4 dozen' of the former and many of the latter—Concertos, Fugues, etc. etc.; and three Sonatas for violin solo, which have been republished by his grandson (Peters), and are now the only music by which Rust is known; that in D minor was often played at the Monday Popular Concerts. The sonatas are analysed in Shedlock's *Pianoforte Sonata*, pp. 152 ff. His last composition was a violin sonata for the E string, thus anticipating Paganini. A list of his works, with every detail of his life, extending to 6½ large pages, is given in Mendel. A monograph on him, with list of works, etc., was published in 1882 by W. Hofäns, and Dr. E. Prieger published a pamphlet, *F. W. Rust, ein Vorgänger Beethovens*. His eldest son was drowned; the youngest, WILHELM KARL, born at Dessau, April 29, 1787, began music very early; and besides the teaching he naturally got at home, learned thorough-bass with Türk while at Halle University. In Dec. 1807 he went to Vienna, and in time became intimate with Beethoven, who praised his playing of Bach, and recommended him strongly as a teacher. Amongst other pupils he had Baroness Ertmann and Maximilian Brentano. His letters to his sister on Beethoven are given by Thayer, iii. 35-6. He remained in Vienna till 1827, when he returned to his native place, and lived there till his death, April 18, 1855.

WILHELM RUST, the nephew of the foregoing, himself an advocate, and a fine amateur player on both violin and PF., was born August 15, 1822, at Dessau; he learned music from his uncle and F. Schneider. After a few years' wandering he settled in Berlin, where he soon joined the Singakademie. He played at the Philharmonic Society of Berlin, Dec. 5, 1849, and was soon much in request as a teacher. In Jan. 1861 he became organist of St. Luke's church, and twelve months afterwards director of Vierling's Bach Society, which he conducted till 1874, performing a large number of fine

works by Bach and other great composers, many of them for the first time. The list of occasional concerts conducted by him is also very large. In 1870 he undertook the department of counterpoint and composition in the Stern Conservatorium at Berlin, and in 1878 was appointed organist of the Thomaskirche, Leipzig, and in 1880 succeeded E. F. E. Richter as Cantor of the Thomaaschule. He was connected with the Leipzig Bachgesellschaft from 1850, and edited vols. v., vii., ix.-xxiii. and xxv. His original works have reached op. 33, of which eight are for the PF. and the rest for voices. [He died at Leipzig, May 2, 1892. A biography appeared in the *Musikal. Wochenblatt* for 1890.] G.

RUTHERFORD, DAVID, a Scotch music publisher in London, who worked in St. Martin's Court, near Leicester Fields, 'at the sign of the Violin and German Flute,' about 1745. His publications consist principally of minor works for the violin, or flute, such as country dances, minuets, and books of airs. He republished in octavo William M'Gibbon's 'Scotch Airs,' and issued song-sheets, etc. He was publisher, and probably author, of several quaint instruction books, as *The Fiddle new model'd, or a useful introduction for the violin, exemplified with familiar dialogues*, circa 1750, 8vo, and *The art of playing on the violin, showing how to stop every note exactly*.

He was succeeded at the same address by John Rutherford, who issued a similar class of works, and who remained in business until 1783, or later. F. K.

RUY BLAS. A play by Victor Hugo, to which Mendelssohn composed an Overture and a Chorus for soprano voices and orchestra. The Overture (op. 95) is in C minor, and the Chorus (op. 77, No. 3) in A. Both pieces were conceived, written, copied, rehearsed, and executed in less than a week (see Letter, March 18, 1839). The first performance was Monday, March 11, 1839. Mendelssohn brought it to London in MS. in 1844, and it was tried at a Philharmonic Rehearsal, but for some reason was not performed till a concert of Mrs. Anderson's, May 25, 1849; it is now in the library at Buckingham Palace. The MS. differs in a few passages from the published score, which was not printed till after Mendelssohn's death (No. 5 of the posth. works). G.

RYAN, MICHAEL DESMOND, dramatic and musical critic, was born at Kilkenny, March 3, 1816, son of Dr. Michael Ryan. On the com-

pletion of his academical education at an early age he entered the University of Edinburgh, early in the year 1832, for the purpose of studying medicine. He remained in Edinburgh steadily pursuing his studies for some three years, after which, being fairly well read, a dabbler in literature, an enthusiastic admirer of art, a good amateur musician, and a keen follower of the stage, Ryan determined to quit Edinburgh and try his fortune in London. Here he arrived in 1836, by chance met with J. W. Davison, and commenced an intimate and lifelong friendship. Ryan now entered upon his literary career in earnest, writing articles and poems for *Harrison's Miscellany*, etc., and producing verses for songs. A set of twelve sacred songs, versified from the Old Testament and set to music by Edward Loder (D'Almaine), may also be mentioned. The 'Songs of Ireland' (D'Almaine), in which, in conjunction with F. N. Crouch, new verses were fitted to old melodies, is another example of effective workmanship. In 1844 Ryan became a contributor to *The Musical World*, and two years later sub-editor, a post which he filled as long as he lived. For years he was a contributor to the *Morning Post*, *Court Journal*, *Morning Chronicle*, and other periodicals, writing criticisms on the drama and music, which had the merit of being trenchant, sound, and erudite. In 1849 he wrote the opera libretto of 'Charles II.' for G. A. Macfarren. The subject was taken from a well-known comedy by Howard Payne, rendered popular at Covent Garden by Charles Kemble's acting some quarter of a century before. A short time afterwards Ryan was commissioned by M. Jullien to provide the libretto of a grand spectacular opera, on the subject of Peter the Great—brought out at the Royal Italian Opera on August 17, 1852, under the title of 'Pietro il Grande.' With the late Frank Mori, Ryan collaborated in an opera called 'Lambert Simnel,' originally intended for Sims Reeves, but never performed. In 1857 he formed his first association with the *Morning Herald*, and its satellite the *Standard*, and became permanently connected with those journals in 1862 as musical and dramatic critic. Few temperaments, however, can sustain the excitement and toil demanded in these days of newspaper activity, and after a painful and prolonged illness Ryan quitted this life on Dec. 8, 1868, followed to the grave by the regretful memories of those who had known and esteemed his character. D. L. R.

SABBATINI, **GALEAZZO**, of Pesaro, was probably maestro di cappella there for some years before 1626; this is indicated at any rate in the preface to the 'Sacrae Laudes,' Venice, 1626 (Parisini, *Catalogo*, ii. 492). On the title-pages of his works he is called maestro di cappella di camera to the Duke of Mirandola in 1630 and again in 1636. The dates of his publications range from 1625 to 1640. In G. B. Doni's *Annotazioni*, published in 1640, the 'Discorso primo dell' inutile osservanza de' tuoni' (p. 234), is dedicated to 'Signor Galeazzo Sabbatini a Bergamo.' Sabbatini is highly commended by Kircher, *Musurgia universalis*, Rome, 1650, tom. i. p. 460, for his scientific knowledge of music, a 'rarus musicus, qui tria genera novo ausu ad arithmeticas leges revocans, multo plura sanè invenit, quorum diversis in locis huius operis mentio fiet, et inter coetera abacum novum ordinavit exactissimè quicquid in musica desiderari potest referentem, omnibus harmoniis exhibendis perfectissimum,' etc. Sabbatini published one theoretical work, on the thorough-bass or basso continuo, which Burney (*Hist. of Music*, iii. p. 538) criticises as inadequate because it only treats of common chords given to every note of the scale. The title is: *Regola facile e breve per sonare sopra il basso continuo, nell' organo, manacordo, o altro simile stromento*. Composta da Galeazzo Sabbatini. Dalla quale in questa prima parte ciascuno da se stesso potrà imparare da i primi principii quello che sarà necessario per simil' effetto. Venetia per il Salvatori, 1628, 4to. The second edition, dated 1644, is in the British Museum, and a third edition was published in Rome in 1669. No 'seconda parte' of the work is known. Sabbatini's published compositions were as follows:—

1. Il primo libro de' madrigali di Galeazzo de Sabbatini da Pesaro. Concertati a due, tre, e quattro voci. Opera prima. Nouamente composta, e data in luce. Venetia, Aless. Vincenti, 1625, 4to. A second edition was issued in 1627, and a third in 1639.
2. Il secondo libro de' madrigali di G. S., concertati a 2, 3, et 4 voci. Con la risposta a quattro voci e due violini ad alcuni versi che incominciano quando la Donna si dimostra altiera, posti nel terzo de' madrigali a 6 del Sig. Steffano Bernardi, etc. Opera seconda. Nouamente composta et data in luce. Venetia, Aless. Vincenti, 1626, 4to. Second edition in 1636.
3. Sacrae Laudes musicis concentibus a G. S. contextae, 2, 3, 4, et 5 vocibus concinendae. Una cum bassus continuus pro organo, etc. Opus tertium, liber primus. Venetia, A. Vincentium, 1626, 4to. Second edition, 1637; another edition, Antwerp, 1642.
4. Madrigali concertati a cinque voci con alcune canzoni concertate an' esse disarmonie con sinfonie e ritornelli, e nel fine una canzonetta con voci, e instrumenti, che si concerta in tempo imperfetto, ò in proportion minor perfetta, cioè ò in numero binario, ò in numero ternario. Di G. S. Opera quarta, de' madrigali libro terzo. Nouamente composti e dati in luce. Venetia, Aless. Vincenti, 1627, 4to. Second edition in 1634.
5. Madrigali concertati a 2, 3, 4, e 5 voci. Con alcune canzoni concertate, e tramezzate diversamente con sinfonie e ritornelli. Di G. S. maestro di cappella di camera dell' eceli, sig. duca della Mirandola. Opera quinta, de' madrigali libro quarto. Nouamente composti e dati in luce. Venetia, A. Vincenti, 1630, 4to. Second edition, 1637.
6. Madrigali concertati a 2, 3, e 4 voci, con alcune canzonette concertate con instrumenti, di G. S. maestro di cappella di camera dell' eceli, sig. duca della Mirandola, etc. Opera sesta, de' madrigali libro quinto. Nouamente composti e dati in luce, et a sua eccellenza illustratissima dedicati. Venetia, A. Vincenti, 1636, 4to.
7. Sacrum laudum musicis conceptibus a Galeatio Sabbatino contextarum 2, 3, 4, et 5 vocibus ad organum concinendarum. Liber secundus. Opus septimum, etc. Venetia, A. Vincentium, 1637, 4to. Another edition was published at Antwerp in 1641.

8. Deiparae Virginis Laudes a G. S. musicis conceptibus cum 3, 4, 5, et 6 vocibus contextae, etc. Opus octavum. Venetia, A. Vincentium, 1638, 4to.

9. Sacre lodi coacerto a voce sola, C.A.T.B. Con la parte continua da sonare di G. S. Opera nona. Venetia, A. Vincenti, 1640, 4to. These are the 'Motetti a voce sola di G. S. Lib. primo.'

10. Libro de' madrigali di G. S. concertati a 2, 3, e 4 voci, con la risposta a quattro voci, e due violini ad alcuni versi che incominciano quando la donna si dimostra altiera. Posti nel terzo de' madrigali a 6 del sig. Steffano Bernardi. Con il basso continuo. Nouamente ristampati. In Anversa presso i heredi di Pietro Phaleis al Re David, 1640, obl. 4to. A reprint of the second volume of madrigale published in 1626.

Compositions in other publications:—

A motet and a mass 'dal sig. Galeazzo Sabbatini, maestro dell' antore,' in Raniero Scarselli's *Sacrum modulatioam*, Venice, 1637.

'Laudate pueri' for three voices, in Marcello Minozzi's *Salmi*, Venice, 1638. Minozzi in the preface mentions that Sabbatini was his teacher, 'huomo di quel grido che particolarmente è noto a gli intendenti dell' arte.' (Parisini, ii. 275.)

'O nomen Jesu' for three voices, in Ambr. Profus's *Andr Theil geistlicher Concerten*, Leipzig, 1641; 'Jesu Domine' for two voices, in the *Dritter Theil*, 1642; 'Laudate pueri,' 'Omnes sancti,' and a Missa, all for four voices, in the *Vierder und letzter Theil*, 1646.

One motet in Profus's *Cunis solennib. Jesu recen-nati*, 1646.

'Nos autem gloriari' for three voices, in Benedetto Pace's *Motetti d' autori eccellentissimi*, Loreto, 1646.

'Ho perœ il mio core,' in Florido concerto di madrigali, Rome, 1663.

MSS. In the Berlin König. Bibliothek: MS. 1100, 'Amare desidero.'

In the Upsala Univ.-Bibliothek: 'Io amo,' one of the Madrigali concertati a cinque voci, published 1627.

In the Westminster Abbey Library: 'Amor porta' for voice with basso continuo, in a 17th-century folio manuscript. C. S.

SABBATINI, **LUIGI ANTONIO**, was born in 1732 at Albano Laziale, near Rome. He was educated at Bologna in the Franciscan monastery of minori conventuali, where he studied music under padre G. B. Martini. There is a manuscript in Sabbatini's handwriting in the Bologna Liceo Musicale, which contains the 'Regole per accompagnare del pre. G. B. Martini, min. conle. maestro di cappella di San Francesco in Bologna, 1761. Per uso di Fra Luigi Ant. Sabbatini, min. conle.' (Parisini, *Catalogo*, i. 282). He remained there eight years according to a long and interesting letter which he wrote to Martini from Albano on Nov. 2, 1766, now preserved in the library of the Accademia filarmonica, Bologna (Suoci, *Mostra internazionale*, Bologna, 1888). He was afterwards in the Franciscan monastery at Padua, where Vallotti gave him lessons in composition. Eventually he was appointed maestro di cappella at the church of the SS. Apostoli in Rome, a letter in the Bologna collection, written to Martini from Rome, is dated July 17, 1776 (Massangeli, *Catalogo della collezione de' autografi*, Bologna, 1881).

Before Vallotti, maestro di cappella of S. Antonio, Padua, died in January 1780, he expressed a wish that Sabbatini should be his successor. Sabbatini was offered the post, but, unwilling to leave Rome, he suggested that Agostino Ricci would be a suitable candidate. Ricci was therefore appointed on April 26, 1780, and remained in Padua for six years, but when he left for Assisi, Sabbatini was persuaded to reconsider his decision and was finally appointed to the post on April 22, 1786, which he held until his death on January 29, 1809, in Padua. During these twenty-three years of his life, he enriched the archives of S. Antonio with many compositions, writes Gonzati

(*La Basilica di S. Antonio di Padova*, 1853, ii. p. 453), among which may be especially mentioned his *Salmi di Terza*, four masses, a vespero, and a *Compieta breve*, all composed for four voices.

Sabbatini was elected one of the eight members of the music section of the *Accademia italiana* in May 1807. In 1887 a bust of Sabbatini was placed in the *Piazza Feoli*, Albano; this tribute to his memory was due to Signor *Cesare de Sanctis*, also an Albano musician.

The larger part of Sabbatini's church music remains in manuscript in the archives of S. Antonio, but Tebaldini, who gives a list of eighty-six compositions (*L'Archivio mus. della cappella Antoniana*, 1895, p. 81), has published some examples for four voices with orchestra, which he considers show that Sabbatini instinctively tried for new combinations, new effects, and that he sometimes lent his music quite an individual character by giving the canto fermo to the alto or soprano part instead of the tenor. Sabbatini was generally recognised as a sound and erudite theorist; Gervasoni (*Nuova teoria di musica*, Parma, 1812, p. 258) testifies to his profound knowledge no less than to his great personal charm.

Some other manuscript compositions are in the Bologna *Liceo Musicale*; autograph scores of twelve pieces of sacred music for two and four voices with orchestral accompaniment, in one volume, and three *Kyrie*, two *Gloria*, two *Credo*, and 'Qui habitat,' all for four voices with orchestral accompaniment, in another volume (Parisini, *Catalogo*, ii. pp. 186, 306); as well as twenty-one pieces of sacred music for four voices with figured bass; and 'Atto di contrizione' for two voices with basso continuo. The nineteenth volume of the Martini correspondence in the same library consists entirely of letters from Sabbatini.

In the Vienna *Hofbibliothek* in MS. 16,217 there is a mass for four voices with organ accompaniment; and in MS. 19,103 a treatise on music 'trascritto ad litteram nell' anno 1791. Dal p. L. A. Sabbatini, min. con. maestro di cappella nella sacra Basilica del Santo in Padova' (Mantuan's *Catalogue*).

The following theoretical works were published:—

Elementi teorici della musica collo pratica de' madrisimi, in duetti e terzetti a canon, ecc. di Fra L. A. Sabbatini, min. con. già maestro di cappella nella Basilica Costantiniana de' SS. XII. Apostoli in Roma ed al presente in quella del Santo in Padova. In Rome, 1789-90, obl. folio. In three books. A second edition was published at Rome in 1798.

La vera idea delle musicanti numeriche signature ecc. dal fra L. A. S. m.c. maestro di cappella nella Basilica di S. Antonio di Padova. Venezia, 1799, presso Seb. Valle, 4to, pp. 179. A manuscript of Sabbatini's inscribed *Trattato di contrappunto*, which is in the Padua library, would appear to be the first sketch for this more elaborate work.

Trattato sopra le fughe musicali di Fra L. A. S. m.c. corredato da copiosi angeli del suo antecessore P. France. Ant. Vallotti. Venezia, 1802, presso Seb. Valle, 4to. In two books. An analysis of Vallotti's fugues with examples taken from his church music.

Solfèges ou leçons élémentaires de musique, etc. en canon avec basse continue. Par le R. P. Louis A. Sabbatini, etc. Publié par M. Alex. Choron, Paris, circa 1810, 8vo, pp. 120. Consists of music taken from *Elementi teorici*, 1798. Another edition was published in 1834.

Besides these works Sabbatini also published a life of Vallotti: *Notizie sopra la vita e le opere del R. P. Fr. Ant. Vallotti* (Padua, 1780); and edited a collection of Marcello's psalms which was published at Venice in 1801. (Félics, *Biogr. univ.*) C. S.

SABBATINI, PIETRO PAOLO, was a native of Rome. The dates of his published works range from 1628 to 1657, and from their titles it is to be gathered that in 1628 he was maestro di cappella dell' *Archiconfraternità della morte et oratione di Roma*; 1630-31 maestro di cappella di S. Luigi de' francesi, Rome; and in 1650 professore di musica. Catalisano alludes to him in his *Grammatica armonica*, 1781, p. xii. 'Per esprimere quanto mai sia tenuto a questi celebri maestri di cappella . . . P. P. Sabbatini,' etc. His published works were:—

1. Il sesto di Pietro Paolo Sabbatini maestro di cappella dell' archiconfraternità della morte et oratione di Roma. Opera VIII. In Bracciano, per And. Fel. stampatore ducale, 1628, folio, pp. 83. Contains songs for one, two, and three voices, some with guitar accompaniment.

2. Intermedii spirituali di P. P. S., etc. as above. Libro I. Opera IX. In Roma appresso Paolo Masotti, 1628, folio, pp. 27. Contains three Intermedii.

3. Psalmi magnificati cum quatuor antiphonis ad Vespera, cum Letantiis B.V. octonis vocibus, uno cum Basso ad organum decantandi. Auctore P. P. S. romano in Ecclesia S. Aloysii Gallicane nationis musicae moderatore, Liber I. Opus XII. Romae, P. Masottum, 1630, 4to.

4. Il terzo di P. P. S. maestro di cappella di S. Luigi de' francesi in Roma. In Roma, appresso P. Masotti, 1631, folio, pp. 19. Contains Villanelle for one, two, and three voices.

5. Il quarto de Villanelle a una, due e tre voci. Del Sig. P. P. S. etc. as above. Roma, G. B. Robletti, 1631, folio, pp. 19. The dedication is written by Pietro Simi, a pupil of Sabbatini, from Rome, May 1, 1631, he states that he rescues from oblivion these Villanelle by P. P. Sabbatini.

6. Canzoni spirituali ad una, a due, et a tre voci da cantarsi, e sonarsi sopra qualsivoglia istrumento. Libro II. Opera XIII. di P. P. S. In Roma, appresso Lod. Grignani, 1640, folio, pp. 32.

7. Varii espresii, o canzonette a una e tre voci da cantarsi sopra qualsivoglia istrumento con l'alfabeto della chitarra spagnuola, di P. P. S. Romano. Libro VII. Opera XIV. Roma, Vinc. Bianchi, 1641, folio, pp. 32.

8. Prima scelta di villanelle a due voci composte da P. P. S. da sonarsi in qualsivoglia istrumento con le lettere accomodate alla chitarra spagnuola in quelle più à proposito. In Roma, Vitale Mascardi, 1652, folio, pp. 19.

9. Ariette spirituali a una, due e tre voci di P. P. S. in diversi stili da cantarsi in qualsivoglia istrumento. Libro V. Opera XXI. Roma, Jacomo Fel del q. Andrea, 1657, folio, pp. 24.

The following treatise was also published:—
Tonic ecclesiastici colle sue intonazioni, all' uso romano. Modo per sonare il basso continuo, chivari corrispondenti all' altre chivari generali, et ordinarie, etc., da P. P. S. Professore della musica. Libro I., Opera XVIII. Roma, Lod. Grignani, 1650, 4to. C. S.

SACCHINI, ANTONIO MARIA GASPARE, born at Pozzuoli, near Naples, on July 23, 1734. This 'graceful, elegant, and judicious composer,' as Burney calls him, who enjoyed great contemporary fame, and was very popular in this country, was the son of poor fisher-people who had no idea of bringing him up to any life but their own. It chanced, however, that Durante heard the boy sing some popular airs, and was so much struck with his voice and talent that he got him admitted into the Conservatorio of San Onofrio, at Naples. Here he learned the violin from Niccolò Forenza, and acquired a considerable mastery over the instrument, which he subsequently turned to good account in his orchestral writing. He studied singing with Gennaro Manna; harmony and counterpoint with Durante himself, who esteemed him highly, holding him up to his other pupils, among whom were Jommelli, Piccinni, and Guglielmi, as their most formidable rival. Durante died in 1755, and in the following year Sacchini left the Conservatorio, but not until he had produced

an intermezzo, in two parts, 'Fra Donato,' very successfully performed by the pupils of the institution. For some years he supported himself by teaching singing, and writing little pieces for minor theatres, till, in 1762, he wrote a serious opera, 'Semiramide,' for the Argentina theatre at Rome. This was so well received that he remained for seven years attached to the theatre as composer, writing operas not only for Rome but many other towns. Among these, 'Alessandro nelle Indie,' played at Venice in 1768, was especially successful, and obtained for its composer, in 1769, the directorship of the 'Ospedaleto' school of music there. He seems to have held this office for little more than a year, but during that time formed some excellent pupils, among whom may be mentioned Gabrieli, Canti, and Pasquali.

Before 1770 he left Venice, and proceeded by way of Munich, Stuttgart, and other German towns, to England, arriving in London in April 1772. [For Munich he wrote 'Scipione in Cartagena' and 'L'Eroe cinese' in 1770, and for Stuttgart 'Calliroë.'] His continental fame had preceded him to this country, and a beautiful air of his, 'Care luci,' introduced by Guarducci into the pasticcio of 'Tigrane' as early as 1767, had, by its popularity, paved the way for his music. True, a strong clique existed against the new composer, but he soon got the better of it.

In addition to the 'Cid' and 'Tamerlano,' mentioned by Burney, he produced here 'Lucio Vero' and 'Nitetti e Perseo' (1773-74). His perfect comprehension of the art of writing for the voice, and the skill with which he adapted his songs to their respective exponents, contributed an important element to the success of his music, even indifferent singers being made to appear to advantage. His popularity, however, was undermined, after a time, from a variety of causes. Jealousy led to cabals against him. He would probably have lived down calumny, prompted by personal spite, but his idle and dissolute habits estranged his friends, impaired his health, and got him deeply into debt, the consequence of which was that he left this country and settled in Paris—Burney says in 1784; Fétis in 1782. It seems probable that this last date is correct, as several of his operas were produced in the French capital during 1783-84. He had been there on a visit in 1781, when his 'Isola d' Amore,' translated by Framéry and adapted to the French stage, was played there successfully, having been played under the name of 'La Colonie' in 1775. His 'Olimpiade' had been given in 1777. Burney says that in Paris Sacchini was almost adored. He started with an apparent advantage in the patronage of Joseph II. of Austria, who was in Paris at the time, and recommended the composer to the protection of his sister, Marie Antoinette. Thanks to this, he obtained a

hearing for his 'Rinaldo' (rearranged and partly rewritten for the French stage as 'Renaud'), and for 'Il gran Cid,' which, under the name of 'Chimène,' was performed before the Court at Fontainebleau. Both of these works contained great beauties, but neither had more than a limited success. 'Dardanus,' a French opera, was not more fortunate in 1784. 'Œdipe à Colone' was finished early in 1785, and performed at Versailles, April 4, 1786. This, his masterpiece, brought him his bitterest disappointment. The Queen had promised that 'Œdipe' should be the first opera at the royal theatre during the Court's next residence at Fontainebleau. The time was approaching, but nothing was said about it, and Sacchini remarked with anxiety that the Queen avoided him and seemed uneasy in his presence. Suspense became intolerable, and he sought an audience, when the Queen unwillingly and hesitatingly confessed the truth. 'My dear Sacchini, I am accused of showing too much favour to foreigners. I have been so much pressed to command a performance of M. Lemoine's "Phèdre" instead of your "Œdipe" that I cannot refuse. You see the situation; forgive me.' Poor Sacchini controlled himself at the moment, but on arriving at home gave way to despair. The Queen's favour lost, he believed his only chance gone. He took to his bed then and there, and died three months afterwards, on Oct. 7, 1786.

It is very difficult to form a just estimate of this composer, whose merits were great, yet whose importance to the history of Art seems now so small. The dramatic music of the end of the 18th century is summed up to us in the operas of Gluck and Mozart, exclusive of many others, akin to these in style and tendency, deficient only in the vital element which makes one work live while others die out. At the time of their production the line may have seemed more difficult to draw. One drop of essence may be distilled from a large quantity of material, yet without the proportion of material that drop would not be obtained. Among the second-rate writers of this transition period, Sacchini must rank first. A little more force, perhaps a little less facility, and he might have been a great, instead of a clever or a 'graceful, elegant, and judicious' composer. He, better than most Italians, seems to have understood the dawning idea of the 'poetical basis of music'; unfortunately the musical ideas, of which the superstructure must, after all, consist, while good and appropriate as far as they went, were limited. His dramatic sense was keen and just, but was not backed by sufficient creative power to make a lasting mark. Fear, remorse, love, hatred, revenge,—these things repeat themselves in the world's drama from Time's beginning to its end, but their expressions are infinite in variety. They repeat themselves, too, in Sacchini's operas, but always

in very much the same way. In his later works, the influence of Gluck's spirit is unmistakable. There is a wide gulf between such early Italian operas as 'L' Isola d' Amore,' consisting of the usual detached series of songs, duets, and concerted pieces, and the 'Œdipe à Colone,' where each number leads into the next, and where vigorous accompanied recitative and well-contrasted dialogued choruses carry on and illustrate the action of the drama, while keeping alive the interest of the hearer. Burney remarks that Sacchini, 'observing how fond the English were of Handel's oratorio choruses, introduced solemn and elaborate choruses into some of his operas; but, though excellent in their kind, they never had a good effect; the mixture of English singers with the Italian, as well as the awkward figure they cut as actors, joined to the difficulty of getting their parts by heart, rendered those compositions ridiculous which in still life would have been admirable.' In Paris they managed these things better, for in all the operas of Sacchini's which were composed or arranged for the French stage, choruses are used largely and with admirable effect, while in 'Œdipe' they are the principal feature. A somewhat similar transition to this is apparent in comparing Piccinni's earlier and later works; but his French operas are only Italian ones modified and enlarged. Sacchini had far more dramatic spirit, and took more kindly to the change. He bears the kind of relation to Gluck that Piccinni does to Mozart, but he approached his model more nearly, for he handled Gluck's theory almost as well as Gluck himself; had he possessed the one thing lacking—force of originality—there might have been more in his works for criticism to censure, but they might not now have been forgotten. As it was, they made a hard struggle for life. The 'Œdipe' was continuously on the boards of the Académie for fifty-seven years (from 1787 to 1844), which can be said of no other opera. During this time it had 583 representations. It was revived in July 1843, and was performed six times in that year and once in May 1844.

Sacchini understood orchestral as well as choral effect. His scores are small, oboes, horns, and sometimes trumpets and bassoons, being the only additions to the string quartet, but the treatment is as effective as it is simple. His part-writing is pure and good, while the care and finish evident in his scores are hard to reconcile with the accounts of his idle and irregular ways. The same technical qualities are shown in his compositions for the church, which in other ways are less distinguished than his operas from contemporary works of a similar kind.

Much of Sacchini's music is lost. Four oratorios, a mass, and various motets, etc., are mentioned in the *Quellen-Lexikon*, Fétis gives a list of twenty-one sacred compositions, and the names of forty-one operas, the chief of which have been mentioned here, but Burney puts the

number of these much higher [twenty-seven are given as still extant in the *Quellen-Lexikon*]. The last of them, 'Arvire et Evelina,' was left unfinished. It was completed by J. B. Rey, and performed with success after the composer's death (April 29, 1788). He also left two symphonies in D, six trios for two violins and bass; six quartets for two violins, tenor and bass; and two sets, each of six harpsichord sonatas, with violin, as well as twelve sonatas (opp. 3 and 4) for claviers solo. These were all published in London. One of the sonatas, in F, is included in Pauer's 'Alte Meister.' [See the list, vol. iii. p. 103.] A couple of cavatinas are given by Gevaert in his 'Gloires d'Italie,' and an antiphon for two voices by Choron in his 'Journal de Chant.'

F. A. M.

SACKBUT, an early name for the trombone, probably derived from the Spanish *sacabuche* ('draw-tube') i.e. *sacar* 'to draw,' and *bucha* 'a pipe,' originally of boxwood (cf. Portuguese *sacabuxa*), the name being also given to a form of pump. Other derivations, however, are from O.F. *saquier-boter* ('to pull and to push') or Sp. *sacar del buche* ('to exhaust the chest'). The form first appears in Spanish literature of the 14th century, the trombone having been evolved from the trumpet about the year 1300. At the beginning of the next century the French form *saqueboule* is found, and at the close of the same century, when the instrument was introduced into England, it was known as the *shakbusshe* and subsequently as the *saykebud*, *sackbut*, or *sagbut*. One of the earliest uses of the word in English literature occurs in Hawes's *Passetyme of Pleasure* (1506). English players were held in high esteem both in this country and on the continent, the popularity of the sackbut continuing till the 18th century, when it gave place to the horn and serpent. Burney (*Musical Performances in Westminster Abbey, 1784*) relates the difficulty experienced in obtaining players on the sackbut or double trumpet, the only performers to be found in England being the six German musicians of the Royal Band. About the year 1800 the use of the instrument was revived in connection with the Opera, but the old English name was supplanted by the Italian *trombone*. Notwithstanding Shakespeare's allusion (*Coriolanus*, Act V. Sc. iv.), there is at present no authority for believing that the sackbut was known to the Romans, the specimen said to have been discovered in the 18th century at Pompeii or Herculaneum having proved a myth. The so-called representation of a 9th-century sackbut in the Boulogne Psalter (MS. No. 20) is also an error, the instrument depicted being a fanciful delineation of the sambuke, an ancient four-stringed lyre. The phrase 'tuba ductilis' applied in later times to the sackbut, originally meant a trumpet of metal beaten or drawn out by the hammer, i.e. not cast. For details

of the instrument see art. *TROMBONE*; also Mahillon, *Le Trombone*, Brussels, 1906, and Galpin, *The Sackbut, its Evolution and History*, *Mus. Assoc. Proceedings*, 1907. F. W. G.

SACRED HARMONIC SOCIETY. This Society was originated by Thomas Brewer, Joseph Hart, W. Jeffreys, Joseph Surman, and — Cockerell, who first met, with a view to its establishment, on August 21, 1832. Its practical operations did not, however, commence until Nov. 20 following. Its first meetings were held in the chapel in Gate Street, Lincoln's Inn Fields, where the first concert was given on Tuesday evening, Jan. 15, 1833. The programme comprised selections from Handel's 'Messiah' and 'Funeral Anthem,' and from Perry's 'Fall of Jerusalem' and 'Death of Abel,' with Attwood's Coronation Anthem, 'O Lord, grant the king a long life,' and the hymn 'Adeste fideles.' The names of the principal singers were not published; Thomas Harper was engaged as solo trumpeter. The then officers of the Society were John Newman Harrison, president; Thomas Brewer, secretary; J. G. Moginie, treasurer; Joseph Surman, conductor; George Perry, leader of the band; and F. C. Walker, organist. In Nov. 1833, the permission to meet in the chapel being suddenly withdrawn, the Society removed to a chapel in Henrietta Street, Brunswick Square, and shortly afterwards to a room belonging to the Scottish Hospital in Fleur de Lys Court, Fleet Street; but at Midsummer, 1834, it migrated to Exeter Hall, which was its home until Michaelmas, 1880. The concerts were for the first two years given in the Minor Hall, and consisted principally of selections, in which a few short complete works were occasionally introduced, such as Handel's 'Dettingen Te Deum,' Haydn's 'Mass,' No. 1, Bishop's 'Seventh Day,' and Romberg's 'The Transient and the Eternal.' The Society having on June 28, 1836, given a concert in the Large Hall in aid of a charity with very great success, was shortly afterwards induced to give its own concerts there. At the same time an important change in its policy was effected, viz. the abandonment of miscellaneous selections for complete oratorios, a change which was received by the public with great favour. Up to that period, even at the provincial festivals, it was very rarely that any complete oratorio, except Handel's 'Messiah,' was performed, whilst the programmes of the so-called 'Oratorios' at the two patent theatres on the Wednesdays and Fridays in Lent were a mongrel mixture of oratorio songs and choruses, secular songs of all kinds, and instrumental solos. The first concert given in the Large Hall on the Society's own account was Handel's 'Messiah,' on Dec. 20, 1836, the orchestra consisting of about 300 performers. In 1837 the works performed included Mendelssohn's 'St. Paul' (March 7), for the first time in

London and second in England, Handel's 'Messiah,' 'Israel in Egypt,' and 'Dettingen Te Deum,' Haydn's 'Creation,' and the Mass known as Mozart's 12th. On Sept. 12 another performance of 'St. Paul' was given, in the composer's presence [see MENDELSSOHN, vol. iii. p. 134a]. During the year the number of performers was increased to 500. In the same year the formation of a musical library was commenced, and Robert Kanzow Bowley appointed honorary librarian. In 1838 Handel's 'Judas Maccabæus,' 'Samson,' and 'Solomon' were revived, and Beethoven's 'Mass in C,' Spohr's 'Last Judgment,' and Perry's 'Fall of Jerusalem' introduced. 1839 witnessed the revival and repetition of Handel's 'Joshua.' A new organ was built for the Society by Walker, and opened Jan. 23, 1840, with a performance by Thomas Adams. Handel's 'Saul' was revived, and Elvey's 'Resurrection and Ascension,' and Perry's 'Thanksgiving Anthem on the birth of the Princess Royal' introduced. 1841 was distinguished by a revival of Handel's 'Jephtha,' and by two performances of a selection of anthems. The latter was received with great interest, public attention having been then lately drawn to our cathedral music. The programme was chronologically arranged, and exhibited the various changes in the style of English church music from Tallis to Samuel Wesley, a period of two centuries and a half. It is true that a performance of a so-called 'Selection of Anthems' had been given in the preceding year, but the programme being injudiciously arranged—a few anthems being interspersed with songs and other pieces in no wise connected with church-music,—had produced but little effect: the distinguishing feature of it was two admirable performances upon the organ by Mendelssohn. Perry's 'Death of Abel' was brought forward on March 19, 1841. In 1842 Handel's 'Jubilate Deo,' and Beethoven's 'Mount of Olives' (the 'Engedi' version), were introduced. In 1843 Spohr's 'Fall of Babylon' was produced, conducted by the composer, who was then on a visit to England; Dr. Crotch's anthem, 'The Lord is King,' was performed for the first time; Mendelssohn's 'Hymn of Praise' was introduced, and also Handel's 'Deborah.' The new introductions in 1844 were a Coronation Anthem and an organ concerto by Handel, Mendelssohn's 42nd Psalm, and Haydn's Mass, No. 16; but the season was chiefly distinguished by two performances of Mendelssohn's 'St. Paul,' conducted by the composer. Handel's 'Athaliah,' Purcell's 'Jubilate in D,' and cantata 'Saul and the Witch of Endor,' Neukomm's 'David,' and a new selection of anthems, were brought forward for the first time in 1845. In 1846 the new introductions comprised Perry's 'Belshazzar's Feast,' Mendelssohn's 114th Psalm, Haydn's Mass, No. 2, and some minor pieces.

1847 was an important epoch in the Society's annals; Handel's 'Belshazzar' was revived, and a new selection of Anthems given, but the greatest event was the production for the first time in its improved form of Mendelssohn's 'Elijah,' under his own personal direction. Four performances of it were given, and it at once took that firm position which it has ever since maintained. Subsequently Spohr visited this country at the invitation of the Society and conducted two performances of his 'Fall of Babylon' and one of his 'Christian's Prayer' and 'Last Judgment' (the last for the only time in England under his direction), and produced his '84th Psalm, Milton's version,' composed expressly for the occasion. An incident of this year eventually led to changes which had an important influence on the fortunes of the Society. A committee, appointed to investigate the conduct of Joseph Surman, both in respect of his dealings with the Society and his execution of the office of conductor, having unanimously reported adversely to him, he was removed from his office Feb. 15, 1848. Pending a regular appointment the remaining concerts of the season were conducted by the leader of the band, George Perry. Mr. (afterwards Sir Michael) Costa was elected conductor, Sept. 22, 1848. Very beneficial results followed this appointment: both band and chorus were strengthened and improved, and the number of performers was augmented to nearly 700. The performances of the season consisted principally of more effective renderings of the stock pieces, but Mendelssohn's music for 'Athalie' was introduced with great success. In 1850 nothing new was given but Mendelssohn's 'Lauda Sion' in an English dress. 1851 was chiefly remarkable for the number of concerts given—thirty-one; 'Messiah,' 'Elijah,' and the 'Creation' having been performed alternately, one in each week, from May to September for the gratification of visitors to the Great Exhibition in Hyde Park. Later in the year Haydn's 'Seasons' was introduced for the first time. In 1852 Spohr's 'Calvary' and the fragments of Mendelssohn's 'Christus' were introduced. In 1853 some changes took place in the officers of the Society; R. K. Bowley became treasurer, and W. H. Husk succeeded him as librarian: Mozart's 'Requiem' was first brought forward this year. 1854 was distinguished by two performances of Beethoven's Mass in D. Griesbach's 'Daniel' was also brought forward, and the Society undertook the performance of the music at the opening of the Crystal Palace on May 10. In 1856 Costa's 'Eli' was performed for the first time in London with marked success. In 1857 Rossini's 'Stabat Mater' was introduced, and the Society undertook the musical arrangements for the first Handel Festival at the Crystal Palace. [See HANDEL FESTIVAL.] In 1862 Beethoven's 'Mount of Olives' was given with

its proper libretto. Costa's 'Naaman' was introduced to a London audience in 1865. In 1867 Benedict's 'Legend of St. Cecilia' was given for the first time in London. In 1870 Beethoven's Mass in D was again performed. The Society sustained the loss, by death, of three of its principal officers, J. N. Harrison, president; R. K. Bowley, treasurer; and T. Brewer, secretary and, for a few weeks, president. They were replaced by D. Hill, president; W. H. Withall, treasurer; and J. F. Puttick, secretary. In 1873 the last named died, and E. H. Mannering was appointed in his stead. Bach's 'St. Matthew Passion' was given for the first time. In 1874 Dr. Crotch's 'Palestine' was introduced, and Macfarren's 'St. John the Baptist' given for the first time in London. Mozart's Litany in Bb, in an English dress, was introduced in 1877. In 1878 Rossini's 'Moses in Egypt' was restored to its original position as an oratorio. Nothing new was brought forward in the season of 1879-80, which ended on April 30, 1880, with 'Israel in Egypt.' Owing to a change in the proprietorship of Exeter Hall the Society had to quit that building, and the concerts of the season 1880-81 were given in St. James's Hall, the number of performers being reduced, on account of the limited space of the orchestra, to about 300. The first concert was on Dec. 3. Sullivan's 'Martyr of Antioch' (first time in London) and Cherubini's Requiem in C minor were brought out during the season.

The Society's library was the largest collection of music and musical literature ever gathered together by a musical body in England. Space does not allow here of even a brief list of its principal contents, and the reader is therefore referred to the last edition of its printed catalogue, issued in 1872. It was acquired for the Royal College of Music at the dissolution of the original Society. [See also LIBRARIES, vol. ii. p. 706.] The Society also possessed some interesting original portraits, statuary, and autograph letters. It was in constitution an essentially amateur body, none but amateurs being eligible for membership, and the governing committee being chosen by and from the members. Every member was required to take some part in the orchestra, and a strict examination as to his qualification for so doing was made prior to his admission. The most eminent professors were engaged as principal vocalists and instrumentalists, the rest of the band and the whole of the chorus being amateurs. The members were comparatively few in number, the majority of the amateurs being assistants, who gave their gratuitous services, but paid no subscription. The subscription of members, originally £1, was afterwards £2:2s. per annum. The original Society was dissolved in 1882, its last concert being a performance of 'Solomon' on April 28 of that year. Some members of the committee deter-

mined to resuscitate the Society, and the new institution was incorporated in 1882. Charles Hallé was appointed conductor, and in 1885 was succeeded by W. H. Cummings, who had, up to that time, acted as assistant conductor. In the autumn of 1888 the new Society ceased to exist.

The Benevolent Fund of the Society was instituted March 14, 1855, for the aid of necessitous persons who had at any time been connected with the Sacred Harmonic Society. The management of the Fund was entrusted to an independent committee, chosen by the Governors of the Fund from the members of the Sacred Harmonic Society. W. H. H.

SADLER'S WELLS, a place of entertainment near the New River Head, Pentonville, much associated with music from the end of the 17th century. In a garden belonging to a person named Sadler an ancient well was discovered in 1683. The water of the well was chalybeate and ferruginous, and Sadler, who owned a sort of tavern, having attached a wooden 'Music House,' exploited the medicinal qualities in rivalry of the waters at Tunbridge and at Epsom. He laid out the grounds and engaged tumblers and musicians, and the place was much frequented for its open-air concerts. In 1699 James Miles and a Francis Forcer, the latter a musician, were proprietors, and the place became known also as 'Miles's Music House.' Miles having died in 1724, Francis Forcer, junior, increased the attractions, and Forcer dying in 1743, the gardens passed into the hands of one Rosoman, who made many alterations, rebuilding the Music House in brick. This brick structure, erected in 1765, formed part of Sadler's Wells theatre until quite recent years. Mrs. Lampe, Thomas Lowe, and other vocalists of repute sang at Sadler's Wells, and at a later date Miss Romanzini (Mrs. Bland), and Braham were among the performers engaged there. Mrs. Mountain, the singer, whose parents were engaged at Sadler's Wells, was named after Rosoman the proprietor. Charles Dibdin the elder, and his sons Thomas and Charles were all more or less closely connected with Sadler's Wells, writing plays and musical pantomimes for production there. The younger Dibdins were proprietors and managers. Grimaldi's connection with this theatre and that of other pantomimists, tumblers, rope-dancers, and actors, do not concern the musical records of it. The theatre has seen many changes, and it is now a music-hall. Much information regarding details can be gathered from a collection of scraps relating to Sadler's Wells, bound in fourteen volumes, formed by Mr. Percival in the British Museum. *London Pleasure Gardens* by W. and A. E. Wroth, *Old and New London*, and similar works may be also consulted. F. K.

SAFFO. See SAPPHO.

SAGGIO DI CONTRAPPUNTO (Sample

of Counterpoint). A very important work, published at Bologna, in 1774-75, by the Padre Giambattista Martini, in two large 4to volumes, dedicated to Cardinal Vincenzo Malvezzi, and now very scarce. The full title, *Esemplare, o sia saggio fondamentale pratico di contrappunto sopra il canto fermo*, etc., sufficiently explains the design of the work, in which the author endeavours to teach the art of counterpoint rather by reference to the most perfect obtainable models than by any code of written laws. The method adopted for this purpose is above all praise. The bulk of the volume consists of a series of examples, in the form of Motets, Madrigals, Movements from Masses, and other similar compositions, selected from the works of the greatest masters of the 16th and 17th centuries, beautifully printed, from movable types, in lozenge-headed notes, resembling those found in Italian Part-Books of the best period, but without the Ligatures which render those books so puzzling to the modern musician. The masters selected are, Agostini, Animuccia, Barbieri, Baroni, Benevoli, Bernabei, Carezana, Cifra, Clari, Corvo, Falconio, Foggia, Gabussi, Gesualdo, Lotti, Marcello, Marenzio, Minarti, Monteverde, Morales, Navarro di Siviglia, Nitrami, Olstani, Ortiz, Pacchioni, Palestrina, P. Pontio Parmigiano, Pasquale, Perti, Picocchi, Porta, Predieri, Riccieri, Rota, A. Scarlatti, Stradella, Turini, Vittoria, Willaert, Zarlino, and several Anonymi. The works are arranged in accordance with the characteristics of their respective schools; and each movement is illustrated by a copious series of annotations, explaining its general design, pointing out the various devices employed in its construction, and calling particular attention to its merits, and the lessons to be learned from it. The amount of sound scholarship and able criticism displayed in these annotations renders the work extremely valuable for purposes of study; while the rarity of the original edition suggests that a careful reprint would be useful. W. S. R.

SAINT ANNE'S TUNE. This well-known tune, in accordance with a practice of which there are several examples,¹ was constructed by the addition of a new continuation to a fragment of an older melody. A seven-part motet of Palestrina's, published in May 1569, leads off in the first treble with this phrase

identical with the first phrase of St. Anne's; after which the resemblance ceases. The entire first strain of the tune is said to be traceable to a French chanson of the 16th century. It was adopted by J. S. Bach as the subject of an organ fugue, known in England as 'St. Anne's fugue'—

¹ The 'Old Hundredth' psalm tune is another instance. Its first strain is the commencement of several distinct tunes.

a misleading title, as, except in the identity of its subject with the first strain of St. Anne's, the fugue has no connection with the hymn-tune. As early as 1638 the same strain was employed by Henry Lawes as the commencement of the tunes set by him to the 9th and 136th Psalms in Sandys's 'Paraphrase upon the Psalmes of David.'

St. Anne's tune, under that name, is first found in 'A Supplement to the New Version of the Psalmes,' sixth edition, much enlarged, 1708. Dr. Croft's name is not mentioned in the work, but he is believed to have been the musical editor of this edition of the Supplement; the name of the tune is probably derived from that of the parish, St. Anne's, Westminster, of which church he was then organist, and the tune itself is directly ascribed to him by his contemporaries, viz., Philip Hart in 'Melodies proper to be sung to any of y^e Versions of y^e Psalmes of David,' *cir.* 1716, and John Church in his 'Introduction to Psalmody,' 1723. The tune appears in the 'Supplement' in the following form:—

Psalm xlii. St. Anne's Tune.

See *Musical Times* for 1900, p. 585, where the tune is given in facsimile and Croft's authorship discussed.

Of late years some doubt has been thrown on the authorship of the tune from its having been found in Abraham Barber's 'Book of Psalm Tunes,' a Yorkshire collection, of which the license bears date Feb. 14, 1687, when Croft was but ten years of age. Here the tune appears under the name of 'Leeds,' and is ascribed to 'Mr. Denby,' whose name some editors of hymnals have too hastily substituted for that of Croft. The edition, however, of Barber's Psalms which contains the tune is the seventh, dated 1715, or seven years after the publication of the 'Supplement' already mentioned. This edition contains, besides tunes for Canticles, Psalms, etc., twenty-eight hymn-tunes arranged in four parts, with the melody in the tenor. Of these tunes three only have a composer's name prefixed, and these three, which bear the names of northern

towns ('Leverpool,' 'Hallifax,' and 'Leeds'), are all ascribed to 'Mr. Denby.' It may be observed that while the melody of 'Leeds' is identical with that of St. Anne's in the 'Supplement,' the modulation at the end of the third strain is different.

Leeds Tune.

MR. DENBY.

The supposition, however, that 'Leeds' was originally in Barber's Psalm-book has been disproved by the recent discovery of a copy of an early edition of the collection, which from the evidence of the preface appears to be either the third or fourth, and to have been published about 1696.¹ The title-page is unfortunately missing. This volume, a smaller book than the edition of 1715, contains but twelve hymn-tunes arranged in two parts, and neither the tune in question nor Denby's name occurs in it. Until, therefore, an edition of Barber's Psalms is found, containing 'Leeds,' and of earlier date than 1708, Denby must be regarded as merely the author of a rearrangement of Croft's tune.

That some confusion existed respecting the authorship may perhaps be inferred from the fact that Dr. Miller, organist of Doncaster Parish Church, in his 'Psalmes of David,' 1790, gives 'St. Ann's, Dr. Croft' on one page, and opposite to it 'Leeds, Denby,' in triple time and as a different tune. On the other hand, it may be noticed that in another Yorkshire collection, John and James Green's 'Collection of choice Psalm Tunes' (Sheffield, 3rd ed., 1715), St. Anne's tune is quoted under that name. G. A. C.

SAINT-AUBIN, JEANNE CHARLOTTE SCHREGER, a very remarkable opera-singer, born in Paris, Dec. 9, 1764. She was daughter of a theatrical manager, began to act as a mere child, and, when only nine, charmed Louis XV. by her precocious talent. In 1782 she married Saint-Aubin, an actor in Mlle. Montansier's company, and in 1786 made her first appearance at the Académie, in 'Colinette à la Cour,' but perceiving that she was not qualified for so large a stage, had the good sense to transfer herself to the Comédie Italienne. There her expressive face, graceful acting, and good singing, could

¹ The preface speaks of 'former editions,' and adds—'since the Psalmes in metre are this last year much reft'd as to the English by some good grave Divine Persons who hath only left out all the old words and made the meter good English.' The preface to the seventh edition is a different one.

be properly appreciated, and she speedily became a favourite. No actress ever created a greater number of parts, in a variety of styles. She sang romances with great charm, and became the acknowledged star of the company and its most profitable member. She was, however, badly treated by the management, for though admitted as *sociétaire* to the fourth of a share in 1788, she was not advanced to a full share till 1798, after her success in 'Le Prisonnier.'

At her farewell benefit (April 2, 1808) she took the part of Mme. Belmont in this work, leaving Rosine, her own creation, to her second daughter, Alexandrine. Her modest pension of 1900 francs was increased by Louis XVIII. to 3000. She took her final farewell, assisted by her elder daughter, Mme. Duret, on Nov. 7, 1818, in 'Une heure de mariage,' and was as much applauded as ever. Mme. Saint-Aubin lived to a great age, and died in Paris, Sept. 11, 1850. Three of her children distinguished themselves; the son, JEAN DENIS, born at Lyons in 1783, a violinist and composer of great promise, died at Paris in 1810.

The elder daughter, CÉCILE, born at Lyons in 1785, a pupil of Garat, made her début in 1805 at the Opéra-Comique in 'Le Concert interrompu,' but went back to the Conservatoire to study, and did not reappear till 1808. In the interval she gained both style and taste in singing, but remained an indifferent actress. Under the name of Mme. Duret she rose for a short time to distinction as the favourite singer of Nicolo Isouard, who composed several important and difficult parts for her. Her best creations were in 'Le Billet de Loterie,' and 'Jeannot et Colin.' She retired in 1820. Her sister ALEXANDRINE, born at Paris, 1793, made a brilliant début at the Théâtre Feydeau in 1809, and in the following year excited great enthusiasm in Isouard's 'Cendrillon.' This was, however, the only original part in which she distinguished herself, and on her marriage with an actor at the Vaudeville in 1812, she retired from the stage.

SAINT CECILIA. See vol. i. p. 489 ff.

SAINT CECILIA'S HALL, a famous Edinburgh concert-room, associated, during the last half of the 18th century, with the chief musical events of the northern capital. It was at the foot of Niddry Wynd (now Niddry Street), and almost adjoining the Cowgate. Robert Mylne, the well-known Scottish architect, designed the building, taking the opera-house at Parma for his model. The main hall was a long-shaped oval, and its acoustic properties were admirable. It was opened in 1762, and remained in possession of the Musical Society of Edinburgh from that date to June 1801. It then became successively a Baptist Chapel, a Freemasons' Hall, a school, and, in 1899, a book-binder's works.

Though at the foot of a steep and dirty wynd,

in a quarter that had ceased to be fashionable even at the time of its first building, it was frequented by the highest society of Edinburgh. All the important concerts were held here. Previous to its erection the chief concerts were held in St. Mary's Chapel, in the same wynd, as early as 1728. The Taylors' Hall in the Cowgate, the Assembly Rooms, Assembly Close, and the Concert Hall, in Playhouse Close.

At a later date Corri's Rooms and other places, as the New Town began to grow, superseded the Hall. Some interesting reminiscences of the Concerts at St. Cecilia's Hall were contributed in 1847 by George Thomson to Robert Chambers's *Traditions of Edinburgh*. Wilson's *Memorials of Edinburgh*, Grant's *Old and New Edinburgh*, and other works deal with the famous Concert-room. See Mr. Fraser Harris's *Saint Cecilia's Hall in the Niddry Wynd*, 1899.

F. K.

SAINT-GEORGES, JULES HENRI VERNON, MARQUIS DE,—not to be confounded with the notorious Chevalier de Saint-Georges (1745-99 or 1801)—born in Paris, 1801, died there, Dec. 23, 1875, writer of novels, and author of numerous librettos for operas and opéras-comiques, was the favourite collaborator of Halévy. Among his 120 librettos we need only specify those for Donizetti's 'Fille du Régiment'; Adolphe Adam's 'La Marquise,' 'Cagliostro,' 'Le Bijou perdu,' operas; and 'Giselle,' 'La jolie Fille de Gand,' and 'Le Corsaire,' ballets; Auber's 'L'Ambassadrice,' 'Zanetta,' and 'Les Diamants de la Couronne,' with Scribe; Grisar's 'Lady Melvil,' 'Le Carillonleur de Bruges,' and 'Les Amours du Diable'; Clapisson's 'La Fanchonnette'; and Halévy's 'L'Eclair,' 'Les Mousquetaires de la Reine,' 'Le Val d'Andorre,' 'La Fée aux Roses,' 'Le Juif errant,' 'Le Nabab,' and 'Jaguarita l'Indienne.'

From this list it will appear that Saint-Georges was the most prolific, as he was the ablest, of all French contemporary librettists after Scribe.

G. C.

SAINT HUBERTY,¹ ANTOINETTE CÉCILE, an eminent French operatic actress, whose real surname was Clavel, was born at Toul, about 1756. Her father, who had previously served in the army, became stage manager to a French opera company at Mannheim, and afterwards at Warsaw, where she studied for four years with Lemoyne, conductor of the orchestra. Her first public appearance was in an opera of his, 'Le Bouquet de Collette.' She then went to Berlin, and is said to have been married there to a certain Chevalier de Croisy, of whom, however, nothing is heard in her subsequent history. For three years she sang at Strasburg, as Mlle. Clavel, and thence went to Paris, and made her début at the Académie as 'un

¹ How she obtained this name is not known.

démon, un plaisir' in the first performance of Gluck's 'Armide' (Sept. 23, 1777). For a considerable time she only played in subordinate parts. Her appearance was not striking; she was fair, thin, and below middle height, with a face expressive, but not beautiful. Her voice was produced badly and with effort, her stage action was spasmodic and exaggerated, and she had a strong German accent. But Gluck found in this ill-trained actress some qualities he may have vainly sought for in more finished singers. She appeared one morning at rehearsal in an old black gown in the last stage of patched decrepitude. 'Here comes Madame la Ressource,' remarked some gay rival (alluding to the character of that name in 'Le Joueur'). 'Well said,' answered Gluck; 'that woman will some day be the resource of the opera.' Perhaps she heard the words—we may be sure she heard of them. She laboured to improve herself, and on the retirement of two leading singers succeeded to their parts. Her first great success was as Angélique in Piccinni's 'Roland,' and was followed by others in Flouquet's 'Le Seigneur Bienfaisant,' Gossec's 'Thésée' (March 1, 1782), and Edelmann's 'Ariane' (Sept. 24, 1782), all tragic parts; while as Rosette in Grétry's 'L'Embaras des Richesses' (Nov. 26, 1782), she showed all the versatility and vivacity necessary for comedy. As Armide (in Sacchini's 'Renaud'), in 'Didon,' 'Chimène,' 'Les Danaïdes,' 'Alceste,' and 'Phèdre,' she had a succession of triumphs. 'Didon,' Piccinni's masterpiece, made no impression till she undertook the title-rôle, and the composer declared that, without her, his opera was 'without Dido.' On her first appearance in that part (Jan. 16, 1784) she was crowned upon the stage.

In 1785 she made a journey to Marseilles, which resembled a royal progress. The excitement she created amounted to frenzy, and when she left Provence she carried away more than a hundred crowns, many of them of great value. But on her return to Paris she found new rivals to dispute her sway. She failed, too, as Clytemnestra, a part altogether unsuited to her. It ended four years later by her marrying the Comte d'Entraigues, of strong royalist sympathies, in which she participated warmly. In 1790 he had emigrated to Lausanne, and there their marriage took place, at the end of that year. It was only acknowledged, however, in 1797, after the Count, imprisoned at Milan by Bonaparte, had been released by his wife, who found means of enabling him to escape, and of preserving his portfolio, full of political papers. For this service she was rewarded by Louis XVIII. with the Order of St. Michel and, it seems, by her husband with the recognition of their marriage.

The Count afterwards entered the Russian diplomatic service, and was employed on secret

missions. The peace of Tilsit changed his tactics. He possessed himself in some manner of a copy of the secret articles of the Treaty, and hastened with them to England to communicate them to the government. For this he is said to have received a pension. He established himself, with his wife, at Barnes, near Richmond, where, July 22, 1812, they were assassinated by their servant, who stabbed them as they were getting into their carriage, and blew out his own brains afterwards. This man had been bribed by emissaries of Fouché's, sent to watch the proceedings of the Comte d'Entraigues, and had allowed them to take copies of correspondence with the Foreign Office, entrusted to his care by his master. He had reason to think that his treachery was being discovered, and fear of the consequences probably prompted him to the dreadful deed. F. A. M.

SAINT JAMES'S HALL CONCERT ROOMS were erected, at the cost of a company with limited liability, from designs by Owen Jones. Messrs. Lucas were the builders.

The project was taken up by two of the music-publishing firms, Messrs. Beale & Chappell of Regent Street, and Chappell & Co. of New Bond Street; and the company was formed mainly by them, and among their friends. Messrs. T. F. Beale and W. Chappell became the tenants of the Crown for the land, holding it in trust for the Company. The capital was fixed at £40,000, because the original estimate for the new building was £23,000 and the remainder was supposed to be an ample sum for compensations, working expenses, etc. It was then unknown that between Regent Street and Piccadilly, was the ancient boundary of Thorney Island with its quicksand, but this was encountered in the course of the building, and had to be saturated with concrete at great cost, in order to make a sure foundation. Other demands raised the cost of the building to beyond £70,000. The Great Hall was opened to the public on March 25, 1858, with a concert for the benefit of Middlesex Hospital, given in presence of the Prince Consort.

The principal entrance to the Great Hall was originally from Regent Street, and that to the Minor Hall from Piccadilly. The dimensions of the Great Hall were 139 feet in length, 60 in height, and 60 in breadth. It seated on the ground floor 1100; in the balcony 517; in the gallery 210; in the orchestra 300; total 2127. Under the platform end of the Great Hall was the Minor Hall 60 feet by 57, having also a gallery, an orchestra, and a small room. This was occupied for many years by the Christy (Moore & Burgess) Minstrels. Under the Regent Street end of the Great Hall was one of the dining rooms, 60 feet by 60, and on the Regent Street level was another dining-room 40 feet by 40, with a large banquetting-room on the floor above, etc.

CHARLES CAMILLE SAINT-SAËNS

In 1860 alterations and additions were made to the restaurant attached to the concert rooms, at a further outlay of £5000. The Company was eventually enabled to pay these charges, through the uncovenanted liberality of some of the directors, in accepting personal responsibility to mortgagees and bankers, while they diminished the debt annually through the receipts of the Hall. Many concerts were given for the express purpose of engaging the Hall on off-nights, especially the Monday Popular Concerts, which became a national institution, but were originally started by Chappell & Co. to bring together a new public to fill the Hall on Monday nights. In 1874 three more houses in Piccadilly were purchased to add to the restaurant. The rebuilding of these entailed a further expenditure of £45,000, so that the total cost exceeded £120,000. w. c. [In much later days important alterations were made in the approaches to the hall, a fine marble staircase leading direct from the Piccadilly entrance. In spite of these, there was an element of danger from the presence of kitchens and the Christy Minstrels' hall below, and in spite of the beautiful acoustics of the great hall and its wonderful artistic associations, it was not wholly a misfortune when it was determined to pull it down and use the site for a hotel. The last concert took place on Feb. 11, 1905.]

ST. PATRICK'S DAY. This rousing Irish melody has been regarded for over a century as the unofficial anthem of Ireland. It can be definitely traced back to the first decade of the 18th century, and was very popular, so much so that we find it as one of the two tunes played by the Irish war-pipers at the famous battle of Fontenoy, on May 11, 1745. Between the years 1746 and 1766 it was in vogue in England, and was printed by Rutherford in his 'Country Dances,' in 1749. In 1759 Oswald published a fairly good setting of it in his *Caledonian Pocket Companion* (Bk. xi.), and the Irish dramatist, Isaac Bickerstaffe, set one of his songs in 'Love in a Village' to it, in 1762. Numerous Anglo-Irish songs were adapted to the tune, and at length, in 1810, Moore wrote his lyric 'Tho' dark are our sorrows,' which duly appeared in the fourth number of the 'Irish Melodies' (1811). Oswald's setting is as follows:—

St. Patrick's Day.

OSWALD'S Setting, 1759.

W. H. G. F.

SAINT-SAËNS, CHARLES CAMILLE, born Oct. 9, 1835, in the Rue du Jardinot (now No. 3), Paris. Having lost his father, he was brought up by his mother and a great-aunt, who taught him the elements of music, and to this day the composer keeps the little old-fashioned instrument on which this dearly-loved relative gave him his first lessons. At seven he began to study the piano with Stamaty, and afterwards had lessons in harmony from Maleden. Gifted with an excellent ear and a prodigious memory, he showed from childhood a marvellous aptitude for music, and an unusual thirst for knowledge. He played at a concert of his own in 1846, and in 1847 he entered Benoist's class at the Conservatoire, and was with Halévy for composition; he obtained the second organ-prize in 1849, and the first in 1851. He left in the following year, but competed for the Prix de Rome, which was, however, won by Léonce Cohen, his senior by six years. He was not more fortunate at a second trial in 1864, although by that time he had made a name in more than one branch of composition. These academic failures are therefore of no real importance, and we merely mention them because it is remarkable that the most learned of French contemporary musicians should have gained every possible distinction except the Grand Prix de Rome.

Saint-Saëns was only sixteen when he composed his first symphony, which was performed with success by the Société de Sainte Cécile. In 1853 he became organist of the church of St. Merri, and shortly after accepted the post of pianoforte professor at Niedermeyer's École religieuse. Though overwhelmed with work he found time for composing symphonies, chamber-music, and vocal and instrumental pieces—and for playing at concerts, where he became known as an interpreter of classical music. In 1858 he became organist of the Madeleine, and distinguished himself as much by his talent for improvisation as by his execution. He resigned this coveted post in 1877, when he was much gratified by the appointment of Théodore Dubois, a solid musician, worthy in every respect to be his successor.

The stage being the sole road to fame and fortune in Paris, all French musicians naturally aim at dramatic composition. Saint-Saëns was no exception to this rule. He was in the first rank of pianists and organists, and his cantata 'Les Noces de Prométhée' had been awarded the

prize at the International Exhibition of 1867, and performed with great éclat, but these successes could not content him, and he produced 'La Princesse jaune,' one act, at the Opéra-Comique, June 12, 1872, and 'Le Timbre d'argent,' a fantastic opera in four acts, at the Théâtre Lyrique, Feb. 23, 1877. Both operas were comparative failures; and, doubtless discouraged by so harsh a judgment from the Parisian public, he produced his next work, 'Samson et Dalila,' a sacred drama (Dec. 2, 1877), at Weimar, and 'Étienne Marcel,' opera in four acts (Feb. 8, 1879), at Lyons. ['Henri VIII.' was produced at the Opéra, March 5, 1883, and not given in England until 1898; 'Proserpine' was given at the Opéra-Comique, March 16, 1887, 'Ascanio' at the Opéra, March 21, 1890, 'Phryné' in May 1893, 'Frédégonde' (completion of Guiraud's unfinished opera) in 1895, 'Les Barbares' in 1901, 'Parysatis' in 1902 in the ancient theatre of Béziers, 'Andromaque' in 1903, 'Hélène' (one-act, Monte Carlo, Feb. 18, 1904, and Covent Garden, June 20 of the same year); 'L'Ancêtre,' produced Feb. 24, 1906, at Monte Carlo, is the master's last opera. His 'Javotte,' a two-act ballet, was given at Lyons and Brussels in 1896, music to 'Antigone' (Th. Français, 1893), and 'Déjanire,' incidental music to Gallet's play, at the Odéon, Nov. 11, 1898. He also wrote music to 'Le Malade Imaginaire.']

Saint-Saëns has been an extensive traveller. He has been in Russia, Spain, Portugal, Africa, etc., besides paying repeated visits to Germany, Austria, and England, so that he may be truly said to have acquired a European reputation. His fame mainly rests on his instrumental music, and on his masterly and effective manner of dealing with the orchestra. He is an excellent contrapuntist, shines in the construction of his orchestral pieces, has a quick ear for picturesqueness of detail, and has written enough fine music to procure him an unique position among French composers. He has very great power of combination, and of seizing instantaneously all the latent capacities of a given theme, both in the way of melody and harmony.

[Saint-Saëns is a consummate master of composition, and no one possesses a more profound knowledge than he does of the secrets and resources of the art; but the creative faculty does not keep pace with the technical skill of the workman. His incomparable talent for orchestration enables him to give relief to ideas which would otherwise be crude and mediocre in themselves; and it is this talent which makes him the one French musician most fitted to compete with the classic masters of the Symphony. His weakness consists not only in the inequality of his inspiration, but also in the indecision of his artistic principles; this is shown in all his compositions, and it is this

which leads him to place excellent and objectionable passages in juxtaposition. For the same reason his works are on the one hand not frivolous enough to become popular in the widest sense, nor on the other do they take hold of the public by that sincerity and warmth of feeling which is so convincing. Saint-Saëns, who was made a knight of the Légion d'honneur in 1867, and an officer of the same in July 1884, is always the same incomparable pianist. It would even seem that during the last twenty years his talent in this direction had increased, and such receptions as he has received at the Conservatoire, where he played Beethoven's Choral Fantasia, in Russia, on the occasion of his tour in 1887 with Taffanel, Turban, and Gillet, and in London, on many occasions, as in 1871, 1874, 1879, prove him to be one of the most remarkable and earnest pianoforte players of the day. On June 13, 1892, he received the honorary degree of Mus.D. from the University of Cambridge, where he played his 'Africa' at a concert of the Cambridge University Musical Society on the previous day. On June 2, 1896, the fiftieth anniversary of his first appearance in public was celebrated in Paris.

In addition to his other claims to distinction, Saint-Saëns is a first-rate musical critic, and has contributed articles to *La Renaissance*, *L'Estafette*, and *Le Voltaire*, the best of which were published in 1885, under the title of *Harmonie et Mélodie* (Paris: Calmann Lévy, 1885), with an introduction and appendix explaining the change which his views have undergone in relation to Richard Wagner. An 'Essai sur les lyres et cithare antique' appeared in 1902, and 'Portraits et Souvenirs' in 1903.] He was elected member of the Institute, *vice* Henri Reber, Feb. 19, 1881.

LIST OF SAINT-SAËNS'S COMPOSITIONS

Op.

1. Three pieces for harmonium.
2. First Symphony, E♭ (published 1856).
3. F.F. solos, Bagatelles.
4. Mass for soli, choir, organ, and orchestra.
5. Tantum ergo for 8-part choir with organ.
6. Tarentelle for flute, clarinet, and orch.
7. Rhapsodies on Breton themes for organ.
8. Six duets for harmonium and pf.
9. Bénédiction nuptiale, for organ.
10. Scenes from Horace.
11. Duettino in G, for pf.
12. Gratorio du Noël.
13. Elevation for harmonium.
14. Quintet, A minor, for pf. and strings.
15. Serenade for pf., organ, vln., and viola or viollo.
16. Suite for pf. and viollo.
17. First pf. concerto in D.
18. Trio, pf. and strings in F.
19. Les Noces de Prométhée, cantata.
20. First violin concerto, A minor.
21. First Mazurka for pf.
22. Second pf. concerto, G minor.
23. Gavotte for pf.
24. Second Mazurka for pf.
25. March for pf., 'Orient at Occident,' 4 hands.
26. Méloides Persanes for voice.
27. Romance for pf., organ, and violin.
28. Introduction and Rondo capriccioso for violin and orch.
29. Third pf. concerto, E♭.
30. La Princesse Jaune, opera.
31. Le Rouet d'Omphale, symphonic poem.
32. Sonata in C minor, pf. and viollo.
33. Violoncello concerto, A minor.
34. Marche héroïque for orchestra.
35. Variations for two pfs. on a theme of Beethoven.
36. Romance, horn or viollo and orch. in F.
37. Romance for flute or vln. in D flat.
38. Berceuse in B flat, pf. and vln.
39. Phæton, symphonic poem.

- Op. Danse macabre, symphonic poem.
 41. Quartet for pf. and str. in B flat.
 42. Ps. xix. (vulg. xviii.), 'Coeli enarrant,' for soli, choir, and orch.
 43. Allegro Appassionato for pf. and cello.
 44. Pf. concerto in C minor.
 45. Le Déluge, biblical opera.
 46. Les Soldats de Gédéon, for double male chorus, unaccomp.
 47. Sannone et Dalila, opera.
 48. Romance, vln. and orch.
 49. Suite for orchestra.
 50. La Jeunesse d'Hercule, symphonic poem.
 51. Romance in D, pf. and cello.
 52. Six études for pf.
 53. Chanson de grand-père for two female voices, and Chanson d'ancêtre, male choir, baritone solo; accomp. orch. or pf.
 54. Requiem for soli, choir, and orchestra.
 55. Second symphony, A minor.
 56. Minuet and Valse for pf.
 57. La Lyre et la Harpe, soli, choir, and orchestra.
 58. Second violin concerto in C.
 59. Ballade for pf., 4 hands.
 60. Suite Algérienne for orchestra.
 61. Third violin concerto, B minor.
 62. Morceau de Concert, vln. and orch.
 63. Une nuit à Lishonne, Barcarolle for orchestra.
 64. Jota Aragonese for orchestra.
 65. Septet for pf., 3 stringed instruments, and trumpet.
 66. Third Mazurka, B minor, for pf.
 67. Romance for horn (four op. 16).
 68. Two choruses with *ad lib.* pf. accompaniment.
 69. Hymne à Victor Hugo for orchestra and chorus *ad lib.*
 70. Allegro Appassionato for pf. and orch.
 71. Two choruses for male voices.
 72. Pf. album.
 73. Rhapsodie d'Auvergne, for pf. and orchestra.
 74. Saltarelle, for male choir, unaccompanied.
 75. Sonata for pf. and vln., D minor.
 76. Wedding Cake, caprice-valse for pf. and strings.
 77. Polonaise for two pf.
 78. Third Symphony in C minor, orch. organ, pf., 4 hands.
 79. Caprice for pf. and three wind instruments, on Danish and Russian airs.
 80. Souvenir d'Italie, for pf.
 81. Albumblatt for pf. 4 hands.
 82. La Fiancée du Tambour (Victor Hugo's ballade), voice and orch.
 83. Havanalse for pf. and vln.
 84. Les Guerriers, for male chorus, unaccompanied.
 85. Les Cloches du Soir, pf.
 86. Pas redoublé for pf., 4 hands.
 87. Scherzo for two pf., 4 hands.
 88. Valse canariote for pf.
 89. Africa, fantasia, pf. and orch.
 90. Suite, pf.
 91. Chant saphique, cello and pf.
 92. Second trio, B minor, pf. and strings.
 93. Sarabande and Rigaudon for orchestra.
 94. Concertstück for horn.
 95. Fantaisie for harp.
 96. Caprice Arabe for two pf.s., 4 hands.
 97. Thème varié, for pf.
 98. Pallas Athene, hymn for sop. and orchestra.
 99. Three preludes and fugues for organ.
 100. Souvenir d'Ismaïlia, pf.
 101. Fantaisie for organ.
 102. Second sonata, pf. and violin, E♭.
 103. Fifth pf. concerto in F.
 104. Valse Mignonne for pf.
 105. Berceuse for pf., 4 hands.

Works without opus numbers—

- Fantaisie for violin and harp (1907).
 Twenty-five motets; songs, part-songs, etc.
 Transcriptions of his own and other music.

e. c.; with additions by MM. Adolphe Julien and Gustave Ferrari; from the monograph by O. Neitzel in *Berühmte Musiker*; Reimann's and Baker's Dictionaries, etc.

SAINTON, PROSPER PHILIPPE CATHERINE, an eminent violin-player, born June 5, 1813, at Toulouse, where his father was a merchant. He received his education at the College of Toulouse, and was destined to the law, but his great talent for music, combined with other reasons, fortunately altered this, and in Dec. 1831 he entered the Conservatoire at Paris, and studied the violin under Habeneck, taking the first prize in 1834. For two years after this he was a member of the orchestra of the Société des Concerts, and the Grand Opéra; and then made an extended tour through Italy, Germany, Russia, Finland, Sweden, Denmark, and Spain, with great success. In 1840 he was appointed Professor of the violin in the Conservatoire of

his native city. In 1844 he made his first visit to England, and played at the Philharmonic on June 10, and July 8, of that memorable season, under the baton of Mendelssohn. The following year he returned, was appointed Professor at the Royal Academy of Music, and settled in London. He took the first and second violin alternately with Sivori, Ernst, Molique, and Vieuxtemps, at the performances of Beethoven's quartets, at the house of Mr. Alsager in 1845 and 1846, which resulted in the 'Beethoven Quartet Society.' He was also a constant leader at the performances of the Musical Union, the Quartet Association, the Monday Popular Concerts, etc. etc. On the establishment of the Royal Italian Opera at Covent Garden, April 6, 1847, Mr. Sainton became leader of the orchestra, a post which he held until 1871, when he accompanied Sir Michael Costa to the rival house, and remained there till 1880. He was leader of the Philharmonic band from 1846 to 1854 inclusive, and of the Sacred Harmonic Society from 1848, conducting the performances of the latter Society in the absence of his chief, as he did those of the Opera. He was also for many years leader of the Birmingham Festivals, and other provincial musical performances. From 1848 to 1855 he was conductor of the State Band and violin solo to the Queen, resigning the post of his own accord. At the opening of the International Exhibition of 1862 Sainton conducted the performance of Sterndale Bennett's Ode (to Tennyson's words) and was presented by the composer with the autograph of the work as a token of his gratitude and consideration. Among the many pupils whom he formed during his long career as Professor of the Violin at the Royal Academy may be mentioned H. Weist Hill, F. Amor, A. C. Mackenzie, A. Burnett, Gabrielle Vaillant, W. Sutton, and many more good players. His works comprise two Concertos for the violin with orchestra; a Solo de Concert; a Rondo mazurka; three Romances; several airs with variations; and numerous Fantasias on operas. In 1860 Mr. Sainton married Miss Dolby, the well-known English contralto singer. [See below.] His farewell concert took place at the Albert Hall, on June 25, 1883, and he died on Oct. 17, 1890. G.

SAINTON-DOLBY, CHARLOTTE HELEN, was born in London, May 17, 1821, and gave signs of possessing decided musical talent when still young. Her earliest instructress was a Mrs. Montague, from whom she received pianoforte lessons. On the death of her father Miss Dolby determined to adopt the musical profession, and in Jan. 1834 entered the Royal Academy of Music, where she first studied under Mr. J. Bennett and Mr. Elliott, and then under Signor Crivelli. In 1837 so great was her promise that she was elected a King's Scholar, although her voice was still weak and not fully developed. She remained at the Academy for three years.

and after leaving was elected an honorary member of the institution. Almost from the date of her first appearance in public, until her retirement in 1870, she remained unrivalled as a singer of oratorio and English ballads. The admirable skill with which she controlled a powerful contralto voice, the exquisite intonation, perfect enunciation, and noble declamation which distinguished her singing, caused her to take a very high place, not only among English, but among European artists of the 19th century. She made her first appearance at the Philharmonic in a quartet, June 14, 1841, and in a solo, April 14, 1842. In the winter of 1845-1846, Mendelssohn, who had been delighted by her singing in 'St. Paul,' obtained for her an engagement at the Gewandhaus Concerts at Leipzig, where her first appearance took place Oct. 25, 1845, and on Dec. 6 she sang in a duet with Jenny Lind. About this time Mendelssohn dedicated to her his Six Songs¹ (op. 57), besides writing the contralto music in 'Elijah' with the special view to her singing it. Her success in Leipzig was followed by several concert tours in France and Holland, in both of which countries Miss Dolby established her reputation as a singer of the first rank. In 1860 she married M. Prosper Sainton, (see above), and ten years later she retired from public life. In 1872 Mme. Sainton opened her Vocal Academy, at which she successfully trained many excellent artists in the admirable school of pure vocalisation, of which she was herself so distinguished an example. Mme. Fanny Moody is her most eminent pupil. Besides her labours in connection with this Academy, Mme. Sainton appeared before the world as a composer. Her cantatas 'The Legend of St. Dorothea,' and 'The Story of the Faithful Soul,' produced respectively at St. James's Hall on June 14, 1876, and Steinway Hall on June 19, 1879, have been performed in the provinces and the colonies with unvaried success. A fairy cantata for female voices, 'Florimel,' was published after her death, which took place at 71 Gloucester Place, Hyde Park, Feb. 18, 1885; she was buried at Highgate Cemetery, the great concourse of persons assembled testifying to the estimation in which the singer was held. The Royal Academy of Music founded, shortly after her death, a scholarship in memory of the eminent singer, once a student within its walls.

W. B. S.

SAITEN, SAITENINSTRUMENTE (Germ.) Strings, Stringed Instruments.

SALA, NICOLA, born at a little village near Benevento, Naples, in 1701, and brought up in the Conservatorio della Pietà de' Turchini under Fago, Abos, and Leo. He died in 1800, and devoted the whole of a long life to his Conservatorio, in which he succeeded Fago as second master about 1764, and Cafaro in 1787, as first

master. The great work to which all his energies were devoted was his *Regole del contrappunto pratico* in three large volumes, containing methodical instruction in the composition of fugues, canons, etc., which was published in 1794. During the disturbances in Italy the engraved plates vanished for a time and were supposed to be lost. Choron then reprinted the work (Paris, 1808), but the plates were afterwards discovered. Both editions are in the Library of the Royal College of Music. Sala wrote little besides this work. Three operas, 'Vologeso,' 1737; 'Zenobia,' 1761; and 'Merope,' 1769; an oratorio, 'Giuditta,' 1780; three 'Prologues' on the births of kings of Naples; a Mass, a Litany, and a few smaller pieces, are mentioned by Florimo (*Cenno storico*, p. 562).

SALAMAN, CHARLES KENSINGTON,² born in London, March 3, 1814; began music early—violin, PF., and composition. In 1824 he became a student of the Royal Academy of Music, but soon left it and studied under Charles Neate, the friend of Beethoven. He made his first public appearance at Blackheath, in 1828, as a PF. player; then went to Paris and took lessons of Herz, and in the following summer returned to London and began teaching, playing, and writing.

In 1830 he played a rondeau brilliant of his own in London, and composed an ode for the Shakespeare commemoration, which was performed at Stratford-on-Avon, April 23, and was repeated in London. From 1833 to 1837 he gave annual orchestral concerts in London, at one of which he played Mendelssohn's G minor Concerto for the third time in England—the former two performances having been by the composer himself. [In 1835 he instituted, with Henry Blagrove and others, the Concerti da Camera. He was an associate of the Philharmonic Society from 1837 to 1855.] In 1846, 1847, and 1848 he resided at Rome, and while conducting Beethoven's Symphony No. 2 (for the first time in Rome), the concert was interrupted by the news of Louis Philippe's flight from Paris. [He was made a member of the Academy of St. Cecilia in 1847. He founded an amateur choral society in London in 1849.] On March 18, 1850, he played at the Philharmonic. In 1855 he began a series of lectures on the History of the Pianoforte, and other musical subjects, which he continued both in London and the country for several years. In 1858 he was one of the founders of the MUSICAL SOCIETY OF LONDON, and acted as its honorary secretary until 1865. [He was one of the founders of the Musical Association, and its secretary until 1877.] Mr. Salaman was for many years a well-known professor and teacher of music in London. Besides the ever-popular 'I arise

² He assumed this name in 1867 at the desire of his father, who had been born in Kensington in 1789.

¹ Also dedicated to Mme. Livia Frege.

ANTONIO SALIERI

from dreams of thee,' he composed many songs, some to Hebrew, Greek, and Latin words; Psalms (the 84th, 29th); anthems, choral works, in Hebrew for the service of the Synagogue, and various PF. pieces. He contributed to various musical journals. [He died in London, June 23, 1901. An interesting obituary notice appeared in the *Musical Times*, 1901, p. 530. Additions from that article and from *Brit. Mus. Biog.*] G.

SALAMMBO. Opera in three acts; text by Du Locle, music by E. Reyer. Produced at Brussels, Feb. 9, 1890.

SALCIONAL. See **SALICIONAL.**

SALE, JOHN, born at Gainsborough, March 19, 1734, was admitted in 1766 a lay clerk of St. George's Chapel, Windsor, and held that post until his death, Oct. 2, 1802.

His son **JOHN**, born in London in 1758, was in 1767 admitted a chorister of St. George's Chapel, Windsor, and Eton College under William Webb, and so continued until 1775. In 1777 he obtained a lay clerk's place in both choirs. On July 12, 1788, he was admitted a gentleman of the Chapel Royal in the room of Nicholas Lade or Ladd; in 1794 he succeeded John Soaper as vicar choral of St. Paul's; and in 1796 John Hindle as lay-vicar of Westminster Abbey. At Christmas 1796 he resigned his appointments at Windsor and Eton. In 1800 he succeeded Richard Bellamy as almoner and master of the choristers of St. Paul's. On Jan. 14, 1812, he was appointed successor to Samuel Webbe as secretary to the Catch Club, and soon afterwards resigned his places of almoner and master of the choristers of St. Paul's. He was also conductor of the Glee Club. He possessed a rich, full, and mellow-toned bass voice, and sang with distinct articulation and energetic expression. He was for thirty years a principal singer at the Concert of Antient Music and other leading concerts in London, and at various provincial festivals. He composed several glees (published in 1800) and some which were included, with glees by Lord Mornington and other composers, in collections published by him. He died at Westminster, Nov. 11, 1827. He left two sons, viz.—

JOHN BERNARD, born at Windsor, June 24, 1779, and admitted a chorister of St. George's Chapel, Windsor, and Eton College in 1785. [He was in the chorus of the Antient Concerts in 1792, and in 1794 was principal soprano at the Three Choir Festival at Hereford.] In 1800 he succeeded Richard Bellamy as lay-vicar of Westminster Abbey; on Jan. 19, 1803, was admitted a gentleman of the Chapel Royal, in the place of Samuel Champness, and in 1806, on the death of Richard Guise, obtained a second lay-vicar's place at Westminster Abbey.¹ On March 30, 1809, he succeeded Michael Rock as organist of St. Margaret's, Westminster. About

1826 he was appointed musical instructor to the Princess Victoria. In 1838 he was admitted organist of the Chapel Royal on the death of Attwood. His voice was a powerful bass, and his style of singing chaste and refined; he excelled in anthems, glees, and other part-music. He was for many years principal second bass at the Concerts of Antient Music. He long enjoyed a high reputation as a teacher of singing and the pianoforte. His compositions were few, consisting only of some chants, psalm-tunes, Kyries, glees, songs, and duets. One of his duets, 'The Butterfly,' was long in favour. In 1837 he published a collection of psalm and hymn tunes, chants, etc., with a concise system of chanting. He died at Westminster, Sept. 16, 1856. Of his three daughters, two, **MARY ANNE** and **SOPHIA**, were organists and teachers of music; Sophia died May 3, 1869. The youngest, **LAURA**, was the wife of William John Thoms, the antiquary, and originator of *Notes and Queries*.

The other son, **GEORGE CHARLES**, born at Windsor in 1796, was admitted a chorister of St. Paul's under his father in 1803. He afterwards became a skilful organist; in 1817 succeeded Dr. Busby as organist of St. Mary, Newington, and in 1826 was appointed organist of St. George's, Hanover Square. He died Jan. 23, 1869. W.H.H.

SALICIONAL, or **SALICET**, a soft-toned organ-stop of a reedy quality. The pipes are of a very small scale, the tenor C being of about the same diameter as the middle C of an ordinary open diapason. The mouth is also much more 'cut up' than that of a diapason pipe. The origin of the word *Salicet* is plain; to this day country boys make toy wind-instruments out of 'withy'; but withy is also called 'sally,' and 'sally' is *salix*, a willow. In some counties a willow is called (by combining both names) a 'sally-withy.' A *Salicet* is therefore a stop made to imitate a rustic 'willow-pipe.' The introduction of the *Salicional* or *Salicet* was later than that of the *Dulciana* (said to have been invented by Snetzler), and it must be considered merely as a variety of that stop. It is of 8 ft. or unison pitch.

J. S.

SALIERI, ANTONIO, Court-capellmeister at Vienna, son of a wealthy merchant, born August 19, 1750, at Legnago in the Veronese territory, learnt music early from his brother Franz, a pupil of Tartini. After the death of his parents a member of the Mocenigo family took him to Venice, where he continued his studies, and made the acquaintance of Gassmann, composer and late Capellmeister to the Emperor, who became much interested in him, and took him to Vienna in June 1766. Here Gassmann continued his fatherly care, provided his protégé with teachers, and himself instructed him in composition, made him acquainted with Metastasio, and introduced him to the Emperor Joseph, whose chamber-concerts he henceforth attended, and often took an active part in.

¹ In order to understand how one person could perform the duties of two in the same choir it is necessary to explain that by longstanding custom each lay vicar attends during six months of the year only, i.e. in each alternate month.

While Gassmann was in Rome, composing an opera for the Carnival of 1770, Salieri conducted the rehearsals for him, and composed his own first comic opera, 'Le Donne letterate,' which received the approval of Gluck and Calzabigi, and was performed with success at the Burgtheater. On Gassmann's death in 1774 Salieri returned his paternal kindness by doing all in his power for the family, and educating the two daughters as opera-singers. In the same year the Emperor appointed him court composer, and on Bonno's death in 1788 he became Court-capellmeister. He was also a director of the opera for twenty-four years, till 1790, when he resigned, and out of compliment to him the post was given to his pupil Weigl. In 1778 Salieri was in Italy, and composed five operas for Venice, Milan, and Rome. For the Emperor's newly-founded National Singspiel he wrote 'Der Rauchfangkehrer' (1781), and for a fête at Schönbrunn 'Prima la musica, poi le parole' (1786).¹ When the Académie de Musique in Paris requested Gluck to suggest a composer who could supply them with a French opera in which his own principles should be carried out, he proposed Salieri, who accordingly received the libretto of 'Les Danaïdes' from Moline, worked at it under Gluck's supervision, and personally superintended its production in Paris (April 26, 1784).² He was entrusted with librettos for two more operas, and returned with a great increase of fame to Vienna, where he composed an opera buffa, 'La Grotto di Trofonio' (Oct. 12, 1785), the best of its kind and one of his finest works, which had an extraordinary success, and was engraved by Artaria. In 1787 he again visited Paris, where the first of his operas, 'Les Horaces,' had failed (Dec. 7, 1786), owing to a variety of untoward circumstances, a failure amply retrieved, however, by the brilliant success of 'Axur, Re d'Ormus' (June 8, 1787) or 'Tarare,' as it was first called. This, which has remained his most important work, was first performed in Vienna, Jan. 8, 1788. Another work composed in Vienna for Paris was a cantata, 'Le Dernier Jugement'³ (libretto by Chevalier Roger), ordered by the Société d'Apollon, and performed there and at the Concerts Spirituels with great applause from the connoisseurs. In 1801 Salieri went to Trieste to conduct an opera composed for the opening of a new opera-house. This was his last Italian opera, and 'Die Neger' (Vienna, 1804) his last German one, for owing to his dislike to the change of taste in dramatic

¹ Mozart's 'Schauspieldirector' was given the same evening.

² The play-bill of the first twelve performances described it as an opera by Gluck and Salieri, in accordance with a stipulation of the publisher Deslauriers, but before the thirteenth representation Gluck publicly stated in the *Journal de Paris* that Salieri was the sole author.

³ The following anecdote is connected with this cantata. Salieri was talking over the difficulties of the work with Gluck, especially as to the voice to be assigned to the part of Christ, for which he finally proposed a high tenor. Gluck assented, adding, half in joke, half in earnest, 'Before long I will send you word from the other world in what key our Saviour speaks.' Four days later, Nov. 15, 1787, he was dead.

music, he devoted himself chiefly to church music, composing also a few instrumental pieces, choruses, and canons in various parts, published as 'Scherzi armonici.' On June 16, 1816, he celebrated the fiftieth anniversary of the commencement of his career in Vienna, when he was decorated with the gold 'Civil-Ehrenmedaille' and chain, and honoured by a fête, at which were performed special compositions by each of his pupils, including Schubert.⁴ Salieri was also vice-president of the Tonkünstler Societät, and till 1818 conducted nearly all the concerts. For the twenty-fifth anniversary of its foundation (1796) he composed a cantata 'La Riconoscenza,' and for the fiftieth (1821) a part-song, 'Zu Ehren Joseph Haydn,' to whom the society was largely indebted. Salieri was also a generous contributor to the funds. He took great interest in the foundation of the Conservatorium (1817), and wrote a singing-method for the pupils. He lost his only son in 1805, and his wife in 1807, and never recovered his spirits afterwards. On June 14, 1824, after fifty years of service at court, he was allowed to retire on his full salary, and died May 7, 1825.

His biographer, Edler von Mosel (*Ueber das Leben und die Werke des Anton Salieri*, Vienna, 1827), describes him as a methodical, active, religious-minded, benevolent, and peculiarly grateful man, easily irritated, but as quickly pacified. We have seen how he discharged his obligations to Gassmann. He gave gratuitous instruction and substantial aid of various kinds to many poor musicians, and to the library of the Tonkünstler Societät he bequeathed forty-one scores in his own handwriting (thirty-four operas, and seven cantatas) now in the Hofbibliothek. In accordance with his own wish his Requiem was performed after his death at the Italian church. He remained throughout on cordial terms with Haydn, whose two great oratorios he often conducted, and Beethoven dedicated to him in 1799 three sonatas for PF. and violin, op. 12. In the first volume of his *Beethoven's Studien* (Rieter-Biedermann, 1873), Nottebohm has printed ten Italian vocal pieces, submitted by Beethoven to Salieri, with the corrections of the latter. These chiefly concern the arrangement of the notes to the words, so as to conform to the rules of Italian prosody, and produce the best effect. The pieces are undated, but internal evidence fixes them to the period between 1793 and 1802. It appears that as late as 1809 the great composer consulted his old adviser as to the arrangement of his Italian, probably in the 'Four Ariettas and Duet' of op. 82; and that even then, when Beethoven was so fiercely independent of all other musicians, their relations were such that he voluntarily styled himself 'Salieri's

⁴ The autograph of Schubert's Cantata—both words and music by him—was sold by auction in Paris, May 14, 1881.

pupil.¹ As regards Mozart, Salieri cannot escape censure, for though the accusation of having been the cause of his death has been long ago disproved, it is more than possible that he was not displeased at the removal of so formidable a rival. At any rate though he had it in his power to influence the Emperor in Mozart's favour, he not only neglected to do so, but even intrigued against him, as Mozart himself relates in a letter to his friend Puchberg.² After his death, however, Salieri befriended his son, and gave him a testimonial, which secured him his first appointment.

His works were too much in accordance with the taste, albeit the best taste, of the day to survive. He drew up a catalogue of them in 1818. They comprise five Masses, a Requiem, three Te Deums, and several smaller church works; four oratorios (including 'La Passione di Gesù Cristo,' performed by the Tonkünstler Societät in 1777); one French, three Italian, and two German cantatas, and five patriotic part-songs; several instrumental pieces; two operas to French, and thirty-seven to Italian words; one German Singspiel, three German operas, and numerous vocal pieces for one or more voices, choruses, canons, fragments of operas, etc. [See the *Quellen-Lexikon* for detailed list.] C. F. P.

SALIMBENE, FRA, a Minorita monk, of Parma, who began his life early in the 13th century, and seems to have lived through the greater part of the same century (achieving a good deal of distinction in his order) and whose extremely curious *Cronaca* or Diary, throws considerable interesting side-light on musical affairs in his time. He was a skilled and passionate music-lover. He gives us accounts of two or three distinguished monkish composers and singers of his day, including the once-famous Fra Enrico da Pisa, and Fra Vita da Lucca, who were in great demand during their careers. The *Cronaca* was found in the Vatican Library in the middle of the 19th century. It has been printed (though never completely) in the original Latin, and in a translation into Italian made by Cantarelli, and published by Battei, at Parma in 1882. The Latin version is now extremely rare; and even the Italian text long out of print. But the book deserves the attention of musicians, *passim*, in much the way that Pepys's *Diary* does, on account of its intelligent references to the art of music at a period so early, and not too clearly depicted by contemporaries. A new and complete edition is about to be published (1907). E. I. P. S.

SALMON, MRS., whose maiden name was Eliza Munday, was born at Oxford in 1787. Her mother's family had produced several good musicians; her uncle, William Mahon (born 1753, died at Salisbury, May 2, 1816), was

the best clarinettist of his day; her aunts, Mrs. Warton, Mrs. Ambrose, and Mrs. Second, were excellent singers of the second rank. She was a pupil of John Ashley, and made her first appearance at Covent Garden in the Lenten concerts given by him under the name of 'oratorios,' March 4, 1803. On Feb. 11, 1806, she married James Salmon, and went to reside at Liverpool, where she became distinguished as a concert singer, occasionally appearing in London, and rapidly attaining the highest popularity. In 1812 she sang at the Gloucester Festival, and in 1815 at the Antient Concerts. From that time to the close of her career her services were in constant request at nearly all the concerts, oratorios, and festivals in town and country. Her voice was a pure soprano of the most beautiful quality, of extensive compass, very brilliant tone, and extraordinary flexibility. She excelled in songs of agility, and was unsurpassed for the rapidity, neatness, and certainty of her execution, and the purity of her taste in the choice of ornament. In the higher and more intellectual qualities of singing, expression and feeling, she was wanting. But she extorted admiration, even from those most sensible of her deficiencies, by the loveliness of her voice and the ease with which she executed the most difficult passages. She unfortunately gave way to intemperance, which eventually occasioned derangement of the nervous system, and in 1825 she suddenly lost her voice. She endeavoured to gain a livelihood by teaching singing, but, although she was well qualified for it, the ignorant public concluded that, as she herself had lost the power of singing, she was incapable of instructing others. She remarried a Rev. Mr. Hinde, who died leaving her totally destitute. A concert was given for her relief, June 24, 1840, which proved a complete failure. She gradually sank into a state of the greatest poverty; in 1845 an effort was made to raise a fund to purchase an annuity for her, but it was only partially successful. She died at No. 33 King's Road East, Chelsea, June 5, 1849. Her death was registered in the names of Eliza Salmon Hinde.

Her husband, JAMES SALMON, son of James Salmon (gentleman of the Chapel Royal, Nov. 30, 1789, vicar choral of St. Paul's, and lay clerk of St. George's Chapel, Windsor, died 1827), received his early musical education as a chorister of St. George's, Windsor. In 1805 he was appointed organist of St. Peter's, Liverpool, and was in much esteem as a performer. In 1813, having fallen into embarrassed circumstances (by some attributed to his wife's extravagance, and by others to his own irregularities), he enlisted, and went with his regiment to the West Indies, where he died.

WILLIAM, another son of James Salmon, sen., born 1789, was also a chorister of St. George's. He was admitted a gentleman of the Chapel

¹ See Moscheles's *Lt.*, i. 10.

² Nottebohm's *Mozartiana*, p. 64.

Royal, May 28, 1817, and was also lay vicar of Westminster Abbey and lay clerk of St. George's, Windsor. With an ungrateful voice he sang with much taste and expression, and was an excellent singing-master. He died at Windsor, Jan. 26, 1858. W. H. H.

SALMON, THOMAS, born at Hackney, Middlesex, June 24, 1648, was on April 8, 1664, admitted a commoner of Trinity College, Oxford. He took the degree of M.A. and became rector of Mepsal or Meppershall, Bedfordshire. In 1672 he published *An Essay to the Advancement of Musick, by casting away the perplexity of different Cliffs, and uniting all sorts of Musick in one universal character*. His plan was that the notes should always occupy the same position on the stave, without regard as to which octave might be used; and he chose such position from that on the bass stave—i.e. G was to be always on the lowest line. Removing the bass clef, he substituted for it the capital letter B, signifying Bass. In like manner he placed at the beginning of the next stave the letter M (for Mean), to indicate that the notes were to be sung or played an octave higher than the bass; and to the second stave above prefixed the letter T (for Treble), to denote that the notes were to be sounded two octaves above the bass. Matthew Locke criticised the scheme with great asperity, and the author published a *Vindication* of it, to which Locke and others replied. [See LOCKE, MATTHEW.] [In 1688 he wrote a book on Temperament, *A Proposal to perform Music in Perfect and Mathematical Proportions*; he lectured before the Royal Society on Just Intonation, in July 1705; and in the following December approached Sir Hans Sloane with a view of making researches into the Greek enharmonic music. He died at Mepsal, and was buried there August 1, 1706. For his non-musical works, see *Dict. of Nat. Biog.*] W. H. H.

SALO, GASPARO DA, a celebrated violin-maker of Brescia. [The career of this maker rested entirely upon conjecture, until the keeper of the Brescian State Archives, Cavaliere Livi, undertook to investigate da Salo's life, and published the result of his researches in the *Nuova Antologia*, on August 16, 1891. The documentary evidence there quoted has proved Gasparo da Salo to have been a member of an artistic family; that his legitimate name was Gasparo di Bertolotti; that his grandfather was a lute-maker of Polepenazze, named Santino di Bertolotti; and that his father was a painter, Francesco di Bertolotti, who was, apparently called 'Violino' by his intimate friends. Owing to the loss of certain requisite pages of the parish registers of Salo, the exact date of this violin-maker's birth is still unknown, but calculating by the income-tax returns of Brescia, which declare him to be twenty-six in 1568, and forty-five in 1588, his birth locates itself with some degree of accuracy in the year 1542.

It is supposed that da Salo learnt his art partly from his grandfather and partly from a Brescian viol-maker who stood sponsor to his son Francesco, named Girolamo Virchi. Whether Virchi was da Salo's master or not is merely surmise, but what is certain is that the great Brescian master's earliest efforts met with such small encouragement that he contemplated removing to France, but was turned from his purpose by a loan of 60 lire from a certain brother Gabriel of St. Pietro. This advance was apparently the turning-point in da Salo's career; it was the moment when hazardous venture gave place to definite aim. In 1568 da Salo was renting a house and shop in the Contrada del Palazzo Vecchio, Brescia, at £20 per annum. He then possessed the title of 'Magistro di Violino,' and owned a stock of musical instruments which he valued at £60. In 1579 there is an added title of 'Magistro a Cittari,' and in 1583 'Artifice d' Instrumenti di Musica.' Five years later, 1588, and twenty after his first establishment in the Contrada del Palazzo Vecchio, he changed his residence to the Contrada Cocere, where he valued his stock of finished and unfinished violins at £200, and styled himself 'Magister instrumentorum musica.' In 1599 he bought a house in Brescia, in a street called St. Peter the Martyr; and between 1581 and 1607 owned some small properties about Calvegese, near Salo. He died in Brescia on April 14, 1609, and although all trace of the place of his interment is lost, it is known that he was buried at Santo Joseffo in Brescia. His wife's Christian name was Isabella; she was born in the year 1546. G. da Salo's son, Francesco, was born in Brescia, 1565, and died there in 1614 (?). He was married to Signorina Fior di Calvegese, near Salo, in his twenty-third year. He followed the fiddle-making profession during his father's lifetime, but ceased to do so after his death. It is probable that he sold his business to his father's pupil Paolo Maggini, and retired. In any case he apparently left Brescia in 1614, and nothing further is known of him after that date.] Gasparo da Salo was one of the earliest makers of stringed instruments who employed the pattern of the violin as distinguished from that of the viol. His works are of a primitive pattern, more advanced than that of Zanetto and other old Brescian makers, but totally different from that of the contemporary Anati family. The model varies, being sometimes high, sometimes flat; the middle curves are shallow, and the sound-holes straight and angular. The wood is generally well chosen, and the thicknesses are correct; and the tone of the instrument, when of the flat model and in good preservation, peculiarly deep and penetrating. [He made many instruments, especially basses, of pear wood as well as sycamore wood. His selection of timber was most careful; indeed, the remarkable regularity

of the grain in the bellies of his instruments bears evidence to this particular trait of the Brescian master. His varnish is principally deep yellow, and rich in tone, though some of his instruments are much darker in colour; in fact some are almost black, an effect doubtless due to age. The sound-holes are long, parallel, and pointed in form, and in the gambas and viols still retain the more simple C shape; yet in spite of their length they are in perfect harmony with the form of the instrument. The purfling is usually single, and the general appearance of his work is bold, but not highly finished. His tickets run as follows: 'Gasparo da Salo: In Brescia,' and are undated.]

The pattern of Gasparo da Salo was partially revived in the 18th century, owing no doubt to its great tone-producing capacity, by the celebrated Joseph Guarnerius (see that article), and to a less extent by some of the French makers. As a maker of tenors and double-basses Gasparo da Salo has never had an equal, and his instruments of these classes are eagerly sought after. The objection to his tenors is their great size, but their effect in a quartet is unrivalled. Two remarkably fine specimens, formerly in the possession successively of Dr. Stewart of Wolverhampton, and of Mr. John Adam of Blackheath, are now in the possession of Mr. J. A. Torrens Johnson. [The most perfect specimen of a da Salo viola ever seen by the writer was the one which belonged to Mr. Edward Withers in 1884. This was a fine primitive instrument, and another perfect specimen was the property of Mr. Tyssen Amherst, an English amateur of celebrity. At the Special Loan Exhibition of Musical Instruments at the Fishmongers' Hall in 1904 there were three of da Salo's masterpieces. One was a viola of 1570, the property of Mr. E. A. Sandermann; another a viola da gamba of the same date, lent by Messrs. W. E. Hill & Sons; and a third was a viol of 1565, belonging to F. Pengrie, Esq. (The dates quoted are according to the catalogue.) At the Victoria and Albert Museum there are two Gasparo da Salo Viols da Gamba. One is mounted with seven strings, an innovation attributed to Marais in the 17th century. The sound-holes are in the C form, the ribs curve into the neck in the true viol fashion, the wood of the belly is even in grain, and the varnish is brownish yellow. Its complete length is 4 feet, and it was bought at the sale of the Engel collection for £8. The other gamba by this maker is mounted for six strings. The neck terminates in a well-carved grotesque head of an old woman; the wood of the belly is even in grain; the sound-holes are in the C form; the varnish is slightly darker than the instrument mentioned above. The finger-board is ornamented with ivory and tortoise-shell, and bound with catgut frets. The purfling is in one single broad line. It is labelled within 'Gasparo da Salo: In

Brescia.' The length measures 3 feet 9 inches, and it was bought at the sale of the Engel collection for £10. The well-known violin-maker, August Reichers of Berlin, possessed a small-sized violoncello by this maker in 1894 (probably a cut-down bass), and Dragonetti possessed three or four double-basses by da Salo. The most celebrated of these instruments was presented to him by the monks of the monastery of St. Marco, Venice, about the year 1776, and was returned to the donors after his death. It would appear that this bass has disappeared. Another of Dragonetti's basses was bequeathed by him to the Duke of Leinster, and a third was in the possession of the Rev. G. Leigh Blake in 1875. In the same year Mr. John Hart owned a Gasparo da Salo bass (small size) in an exceptional state of preservation. The most renowned instrument of this maker is the violin which was made by him to the order of the Cardinal Aldobrandini, a noble patron of the fine arts in Rome, who paid da Salo 3000 Neapolitan ducats for his work, and presented it to the treasury of Innsbruck, where it was preserved as a curiosity. The head of this curious violin is said to have been carved by Benvenuto Cellini; it represents an angel's face carved and coloured, surrounded by flowing locks of hair. Behind this there leans a little mermaid, the human form of which terminates in scales of green and gold. The tail-piece is another mermaid, in bronze colour, and the finger-board is ornamented with arabesques in blue and gold; while the bridge is delicately carved in the form of two intertwining fish, similar to the zodiacal sign of the month of February. The belly is made of an exceedingly rare species of Swiss pine, which grows on the Italian side of the Swiss Alps, and is even-grained. When Innsbruck was taken by the French in 1809, this violin was carried to Vienna and sold to a wealthy Bohemian amateur named Rahaczek, who was a well-known collector. Ole Bull saw it at Rahaczek's house during a visit to Vienna in 1839, and tried to persuade his host to part with it, but this he refused to do. However, after his death Rahaczek's sons offered it to the great Swedish virtuoso at a price, and he purchased it from them in the year 1841. At the death of Ole Bull this violin became the property of an American amateur resident in the United States.] Gasparo's violins, which are mostly of small size, are not in request for practical purposes.

M. Fétis, in *A. Stradivari* (1864), mentions a very remarkable violin of da Salo which was sold at Milan in 1807; and that Baron de Bagge also possessed one in the year 1788, of which Rudolph Kreutzer spoke with admiration. Another violin he states to be in the possession of Mr. T. Forster, an English amateur, and the owner of a numerous collection of violins, which bore the inscription 'Gasparo da Salo: In Brescia, 1613,' but either the ticket or instrument was

doubtless counterfeit. On April 21, 1907, commemorative tablets in honour of Gasparo da Salo and G. P. Maggini were placed in the façade of the church of San Giuseppe, and of a house near the Palazzo Vecchio, at Brescia.

SALOMÉ. 'Drama' in one act, founded on the French play by Oscar Wilde, the German version by Frau Hedwig Lachmann, music by Richard Strauss. Produced at Dresden, Dec. 9, 1905. Performed frequently at various German music centres, and in New York, 1907, the representation being forbidden after the first night. Six special representations took place at the Théâtre du Châtelet, Paris, in German, beginning May 8, 1907. The work had previously been performed in Brussels, in French. M.

SALOMÉ, THÉODORE CÉSAR, born in Paris, Jan. 20, 1834; received his education at the Conservatoire, where he obtained various prizes for harmony, counterpoint, and organ, and gained the second Prix de Rome in 1861. For many years he was organist of the small organ in the church of the Trinité, in 1872-73 taught solfège in the Conservatoire, and was maître de chapelle at the Lycée Saint-Louis, etc. He wrote various excellent organ pieces, and several interesting orchestral works, performed by the Société Nationale in 1877. He died at Saint Germain-en-Laye in July 1896. G. F.

SALOMON, JOHANN PETER, a name inseparably connected with that of Haydn, born at Bonn,¹ 1745 (christened Feb. 2), early became an expert violinist, and in 1758 was admitted into the orchestra of the Elector Clement August. In 1765 he made a concert-tour to Frankfort and Berlin; and Prince Henry of Prussia, who had an orchestra and a small French opera-company at Rheinsberg, made him his Concert-meister, and composer of operettas. He had already showed his appreciation for Haydn by introducing his symphonies whenever he could. On the prince's sudden dismissal of his band, Salomon went to Paris, where he was well received, but being so near London he determined to go on there, and on March 23, 1781, made his first appearance at Covent Garden Theatre. The pieces on this occasion were Mason's 'Elfrida,' set to music by Dr. Arne, and Collins's 'Ode on the Passions,' with solos and choruses by Dr. Arnold, both of which he led, besides playing a solo in the middle. The *Morning Herald* says of him, 'He does not play in the most graceful style, it must be confessed, but his

tone and execution are such as cannot fail to secure him a number of admirers in the musical world.' From this time he frequently appeared at concerts as soloist, quartet-player (violin and viola), and conductor. He quarrelled with the directors of the Professional Concerts, soon after their foundation, and thenceforward took an independent line. During Mara's first season in London, in 1784, he conducted and played solos at all her concerts. The *Morning Chronicle* says, in 1785, 'Salomon's solo, though perhaps not excelling in tone, was in the greatest point, in pathetic impression, excelled by none! Whose violin-playing approaches nearer the human voice? On the whole Salomon is a mannerist, but he has much originality—he is very susceptible—he is a genius.' In 1786 he gave a series of subscription concerts at the Hanover Square Rooms, and produced symphonies by Haydn and Mozart. From that time he contented himself with an annual benefit concert, but acted as leader at others, both in London, as at the Academy of Ancient Music in 1789, and elsewhere, as at the Oxford Commemoration, Winchester, and Dublin. A grand chorus composed by him in honour of the King's recovery, performed by the New Musical Fund in 1789, and repeated at his own concert, was his one successful vocal piece. He removed in 1790 to No. 18 Great Pulteney Street, in which house Haydn stayed with him in the following year. The two had long been in correspondence, Salomon endeavouring in vain to secure the great composer for a series of concerts; but as he was at Cologne on his way from Italy, where he had been to engage singers for the Italian Opera, he saw in the papers the death of Prince Esterhazy, hurried to Vienna, and carried Haydn back in triumph with him to London. Haydn's two visits to England in 1791 and 1794 were the most brilliant part of Salomon's career as an artist, and after the return of the former to Vienna the two continued the best of friends. [It was at Salomon's suggestion that Haydn undertook to write 'The Creation.' Salomon's most important composition was an opera, 'Windsor Castle,' composed for the Prince of Wales's wedding, April 8, 1795.] In 1796 Salomon resumed his concerts, at which he was assisted by Mara, the young tenor Braham, and his own promising pupil Pinto. On April 21, 1800, he produced Haydn's 'Creation' at the King's Theatre, though not for the first time in England, as he had been forestalled by John Ashley (Covent Garden, March 28). Salomon's active career closes with the foundation of the Philharmonic Society, in which he took a great interest, playing in a quintet of Boccherini's, and leading the orchestra, at the first concert in the Argyll Rooms, March 8, 1813. Up to the last he was busy planning an Academy of Music with his friend Ayrton. A fall from his

¹ The Salomons' house was 515 Bonngasse, the same in which Beethoven was born.

horse caused a long illness, from which he died Nov. 25, 1815, at his house No. 70 Newman Street. He was buried Dec. 2 in the south cloister of Westminster Abbey. He bequeathed his house to the Munchs of Bonn, his next of kin; £200 to F. Ries, for the benefit of his brother Hubert; and his Stradivarius violin (said to have belonged to Corelli, and to have his name upon it) to Sir Patrick Blake, Bart., of Bury St. Edmunds.¹

Salomon was, on the whole, a first-rate solo-player, but his special field was the quartet, in which he showed himself a solid and intelligent musician. Haydn's last quartets were composed especially to suit his style of playing.

He was a man of much cultivation, and moved in distinguished society. Bland published an engraving of him by Facius from Hardy's picture. Another portrait by Lansdale was sent by Salomon himself to the Museum at Bonn. [A pencil drawing by Dance is in the Royal College of Music.] His best epitaph is contained in a letter from Beethoven to his pupil Ries in London (Feb. 28, 1816): 'Salomon's death grieves me much, for he was a noble man, and I remember him ever since I was a child.'² C. F. P.; with additions from the *Dict. of Nat. Biog.*, etc.

SALTANDO. See SAUTILLÉ.

SALTARELLO or **SALTARELLA** (Latin *saltare*, to jump).

I. In 16th-century collections of dance tunes the melodies usually consist of two distinct divisions, the first of which is written in common time, the second in 3 time. The former was probably danced like our English country-dances (*i.e.* the dancers standing in two lines facing each other) and bore the distinguishing name of the dance, while the latter was like the modern round dance and was variously entitled *Nach Tanz*, *Proportio*, *Hoppeltanz*, or *Saltarello*, the first three being the German and the last the Italian names for the same movement. Thus in Bernhard Schmidt's *Tabulaturbuch* (Strasbourg, 1577) are found the following dances: 'Possamezzo Comun' with 'Il suo Saltarello'; 'Ein guter Hofdantz' with 'Nachdantz'; 'Alemando novello: Ein guter neuer Dantz' with 'Proportz darauf' and 'Ein guter neuer Dantz' with 'Hoppeldantz darauf.' Similarly in the Fitzwilliam Virginal Book (i. 306) there is an elaborate 'Galiarda Passamezzo' by Peter Philips (dated 1592) which consists of ten 8-bar 'divisions,' the ninth of which is entitled 'Saltarella.' The Saltarello, or Proportio, was always founded on the air of the first part of the dance, played in triple time with a strong accent on the first beat of the bar. The manner in which this was done

will be seen by examining the following example, from the second book of Caroso da Sermoneta's 'Nobiltà di Dame' (Venice, 1600). It is part of a Ballette, 'Laura Soave,' the second part of which (a Gagliarda) and the last forty bars of the Saltarello are not printed here for want of space.

II. A popular Roman dance, in 3-4 or 6-8 time, danced by one or two persons, generally a man and a woman, the latter of whom holds up her apron throughout the dance. The step is quick and hopping, and the dance gradually increases in rapidity as the dancers move round in a semicircle, incessantly changing their position, and moving their arms as violently as their legs. The music is generally in the minor, and is played on a guitar or mandoline, with tambourine accompaniment. The finale to Mendelssohn's Italian Symphony contains two Saltarello themes, in each of which the jumping or hopping step is very apparent. In contrast to these is a Tarantella, used as a third subject, a continuous flow of even triplets. W. B. S.

SALVAYRE, GERVAIS BERNARD, called GASTON, born at Toulouse, Haute-Garonne, June 24, 1847, began his musical education at the maîtrise of the cathedral, and afterwards studied at the conservatoire of the town, before he was brought by Ambroise Thomas to the Paris Conservatoire, where he studied the organ with Benoist, and composition and fugue with Thomas and Bazin. He gained the first prize for organ in 1868, and competed for the Prix de Rome every year from 1867 to 1872, gaining it at last by sheer force of perseverance. During his stay at Rome, Salvayre worked very hard, and many of his compositions date from this time, notably his opera of 'Le Bravo,' and his sacred symphony in four movements, 'Le Jugement dernier,' of which the first two movements were performed at the Concerts du Châtelet, March 19, 1876. It was given in its entirety at the same concerts on Dec. 3, 1876, under the title of 'La Résurrection,' and again, under a third title, 'La Vallée de Josaphat,' at Lamoureux's concert on April 7, 1882. The remaining works written by Salvayre for the concert room are an 'Overture Symphonique,'

¹ See the *Westminster Abbey Registers*, by J. L. Chester, D.L.C.L. Sir P. Blake's property was sold after his death, and nothing is now known by the family about the violin.

² Folt's *Regin in London*, pp. 73 to 85. *Beethoven's Sämmtliche Briefe*, No. 411.

performed on his return from Rome at the Concerts Populaires, March 22, 1874; a Stabat Mater, given under the care of the Administration des Beaux-Arts (performed in London, April 23, 1879, at one of Mme. Viard-Louis's concerts); a setting of Ps. cxiii. for soli, chorus, and orchestra; and an air and variations for strings, performed in 1877, all the last given as the fruits of his residence in Italy. On his return to Paris, he was appointed chorus master at the Opéra Populaire which it had been attempted to establish at the Théâtre du Châtelet, and he then wrote ballet music for Grisar's 'Amours du Diable,' revived at this theatre Nov. 18, 1874. Three years later he made his real début with his grand opera, 'Le Bravo' (Théâtre Lyrique, April 18, 1877), a noisy and empty composition revealing the true nature of the composer, who loves effect, but is wanting in inspiration, style, and form, and is wholly destitute of any fixed ideal. His little ballet 'Fandango' (Opéra, Nov. 26, 1877), in which he made use of some highly characteristic Spanish melodies, was a decided advance in point of instrumentation; but his grand opera, 'Richard III.,' performed at St. Petersburg, Dec. 21, 1883, was a dead failure, and in 'Egmont,' produced at the Opéra Comique, Dec. 6, 1886, his chief faults, noisiness, and an amalgamation of different styles, from that of Meyerbeer to that of Verdi, were so predominant that the work was only performed a few times. Salvayre was commissioned to set to music Dumas' drama 'La Dame de Monsoreau,' a subject little fitted for musical treatment. It was produced at the Opéra, Jan. 30, 1888, and was wholly unsuccessful. Salvayre, who has the qualities of a good musician, in spite of his repeated failures, was decorated with the Légion d'honneur in July 1880.

A. J.

SALVE REGINA, one of the most celebrated Latin antiphons. It does not belong to the classical Gregorian plain-song, but both words and music were written in the 10th century. They have been ascribed to various authors, but are with greatest probability assigned to Hermann Contractus (1013-1054), the crippled monk of St. Gall and Reichenau, composer and writer on musical theory and practice. Originally an independent antiphon, this was afterwards assigned a special place of its own and became one of the antiphons of the B.V.M. sung after Compline. The music opens thus—

and continues in pure Dorian classical style. In this respect it is unlike the companion antiphon *Alma Redemptoris mater*, also attributed to Hermann, which shows signs of modern or popular tonality from the very start.

The *Salve Regina*, text and music, became speedily popular. The words were the subject of sets of sermons by the end of the century, and soon St. Bernard and others still more widely established their popularity. In some rites the antiphon was admitted into the Office itself on one of the festivals of the Blessed Virgin; it was then naturally associated with the First Tone. In the present Roman Breviary the text has been altered, and many incorrect forms of the music prevail. Apart from the plain-song setting the words have frequently been set in the motet style by Palestrina and others. These antiphons of the B.V.M. were among the earliest texts to be set in 'prick-song,' partly because elaboration was especially connected with such services, and partly because the antiphon at the close of Compline, being extra-liturgical, gave scope for polyphonic treatment, and in fact was among the first to develop into an 'anthem' in the modern sense of the word. Their popularity has survived down to the present time, and many composers great and small have set the *Salve Regina*, the *Alma Redemptoris*, the *Regina coeli*, etc. W. H. F.

SAMARA, SPIRO, the son of a Greek father and an English mother, was born at Corfu, Nov. 29, 1861. He began his musical education at Athens under Enrico Stancampiano, a former pupil of Mercadante, and afterwards studied at the Paris Conservatoire, where his principal master was Léo Delibes. An introduction to the publisher Sonzogno led to the production of his first opera, 'Flora Mirabilis,' which was given at the Teatro Carcano, Milan, May 16, 1886. 'Flora Mirabilis,' which was written to a fantastic libretto by Ferdinando Fontana on a subject possibly suggested by the scene of the flower-maidens in the recently produced 'Parsifal,' was a kind of compromise between opera, ballet, and spectacle. The legendary atmosphere of the tale appealed strongly to the young composer's imagination, and his music, though unequal, showed remarkable promise. Unfortunately that promise has never been redeemed. 'Flora Mirabilis,' after a brief period of popularity, dropped into oblivion, and none of Samara's subsequent operas has won anything like permanent success. 'Medgé' (Rome, 1888), a revised edition of an opera written before the production of 'Flora Mirabilis,' was followed by 'Lionella' (Milan, 1891). In neither work were the hopes founded upon 'Flora Mirabilis' fulfilled. 'La Martire' (Naples, 1894) may best be regarded as a concession to the prevailing taste for squalid melodrama which was engendered by the success of Mascagni's 'Cavalleria Rusticana.' The libretto deals with the painful story of the sorrows and

suicide of a woman whose husband has deserted her for a music-hall singer. The opera won a certain measure of success owing to the clever if somewhat brutal treatment of certain realistic scenes, notably that of a *café-concert*, and still more from the remarkably powerful performance of Mme. Bellincioni in the part of the heroine, but the sheer musical value of 'La Martire' was very small. Samara's next two works, 'La Furia Domata' (Milan, 1895), an operatic version of Shakespeare's *Taming of the Shrew*, and 'Storia d' Amore' (Milan, 1903) were completely unsuccessful, but 'Mademoiselle de Belle Isle' (Genoa, 1905) was more favourably received.

R. A. S.

SAMMARTINI. See **SAN MARTINI.**

SAMSON. Oratorio by Handel, words compiled by Newburgh Hamilton from Milton's 'Samson Agonistes,' 'Hymn on the Nativity,' and 'Lines on a Solemn Musick.' The autograph of the work is in the Buckingham Palace Library, and contains the following dates:—End of first part, 'Sept. 29, 1741' (N.B. 'Messiah' was finished 14th of same month); end of second part '© (i.e. Sunday) Oct. 11, 1741'; end of chorus 'Glorious hero,' 'Fine dell' Oratorio,' S.D.G., London, G. F. Handel, 2 (i.e. Thursday) Oct. 29, 1741'; then the words 'Fine dell' Oratorio' have been struck out, and 'Come, come,' 'Let the bright,' and 'Let their celestial' added, with a note at end, 'S.D.G.—G. F. Handel, Oct. 12, 1742.' It was produced at Covent Garden, Lent 1743—the first after Handel's return from Ireland.

Handel esteemed it as much as the 'Messiah,' and after his blindness wept when he heard the air 'Total eclipse.' It was revived by the Sacred Harmonic Society, Nov. 14, 1838, and has often been performed since. The score was published by Wright; by Arnold in his edition; by the Handel Society (edited by Rimbault, 1852); and by Breitkopf & Härtel (Chrysander, 1861). G.

SAMSON ET DALILA. Opera in three acts, text by Ferdinand Lemaire, music by Camille Saint-Saëns; produced at Weimar under Liszt, Dec. 2, 1877, and in France at Rouen, 1890. Performed at Covent Garden in concert form, Sept. 25, 1893.

SAN CARLO, the largest and most beautiful theatre of Naples, has almost the same proportions as La Scala of Milan, with which it contends for the theatrical primacy in Italy. It was built in 1737 by the architect Carassale, on plans by Medrano, a General of the R.E., and was completed in nine months. Some alterations and improvements were made in it by Fuga and Niccolini towards the end of the 18th century. It was completely burnt down in 1816, and rebuilt even more elegantly and quickly than before, in six months, by the said Antonio Niccolini. In 1844 the San Carlo underwent a thorough restoration and considerable improvement.

The best days of the San Carlo were those in which it was under the management of the great impresario Domenico Barbaja from 1810 to 1839. During that period the greatest singers appeared on its stage, amongst whom we need only name Colbran, Sontag, Grisi, Tamburini, Rubini, and Lablache.

L. R.

SANCTUS. I. The angelic hymn based on Isaiah vi. 3 and St. Matt. xxi. 9, sung in all Liturgies at the beginning of the *Anaphora* or central section of the service. In the Latin rite it is introduced by the Preface (see vol. iii. p. 809), sung by the celebrant, while the hymn itself is sung by the clergy and congregation, or by the choir, according to later usage (see vol. ii. p. 235). The original setting was in the simplest style of recitative like that of the Preface. Later plain-song settings were more elaborate; see an example given in vol. iii. p. 766.

Various specimens survive of the setting of the Sanctus in prick-song. The first stage here, as elsewhere, was the setting of an *Organum* or free voice part against the plain-song, as in the following instance from the latter part of the Sanctus:—

The original may be seen in facsimile in *Early English Harmony* (Plain-song Soc.), pl. xl. It belongs to the 14th century. This was but a step on the way to developed polyphony. Another Sanctus in three parts written by John Benet in the first half of the 15th century is given at pp. 51, 52 of the same volume, and this may be cited as marking an intermediate stage on the way to the great masters of the 16th century.

W. H. F.

II. These great masters have almost always treated it in Real Fugue, of a peculiarly reverent character, not unlike that of the 'Kyrie,' but developed at greater length, with frequent repetitions of the text, and three distinct subjects,

adapted to the words, 'Sanctus,' 'Dominus Deus Sabaoth,' and 'Pleni sunt coeli et terra.' Sometimes—as in Palestrina's Masses, 'Veni, sponsa Christi,' and 'Dum complerentur'—the 'Pleni sunt coeli' forms a separate movement, assigned to three or four solo voices; sometimes the nature of the subject indicates an accelerated tempo, without an actual solution of continuity, as in the same composer's 'Aeterna Christi munera.' The 'Osanna,' with which the whole concludes, is either treated as a supplementary movement, quite distinct from the 'Sanctus' itself; or, less frequently, aids in the development of the fugue, by the addition of a fourth subject, without disturbing the homogeneity of the whole. In the former case, the same 'Osanna' usually serves both for the 'Sanctus' and the 'Benedictus,'¹ as in the 'Missa Papae Marcelli,' and Vittoria's 'Simile est regnum coelorum'; in the latter, the treatment is usually of a very subdued character, as in Palestrina's 'Tu es Petrus,' 'Assumpta est Maria,' 'Aeterna Christi munera,' and 'Missa brevis.' These instances are particularly fine ones; and, indeed, it may be doubted whether even Palestrina's genius ever rose to greater sublimity of conception than in this part of the 'Missa brevis,' which, when interpreted by a large body of voices, singing in the most delicate attainable *pianissimo*, presents us with the highest ideal of the song of the Heavenly Host that has yet been reached.

The treatment of the 'Sanctus,' by modern composers, exhibits an infinite variety of styles; yet the movement is, nearly always, the most solemn one in the Mass. In Bach's great work in B minor, an indescribably massive effect is produced by the passages of sustained chords, beginning at the seventeenth and thirty-fifth bars. [As the Lutheran service, enjoined the singing of the 'Sanctus' on certain occasions apart from the rest of the mass, Bach left four compositions besides the glorious chorus already mentioned. They are contained in the B.-G. edition, vol. xi. (i.). The keys are C, D, D minor, and G, the second work being of peculiarly impressive beauty.] Very different is the idea developed in the corresponding division of Beethoven's Mass in D. The awestruck character of the opening 'Adagio. Mit Andacht,' however closely it may border upon the dramatic, can scarcely impress the hearer with any other feeling than that of the most profound reverence; while the 'Allegro pesante' of the 'Pleni sunt coeli' is conceived in strict accordance with the literal meaning of the words, though nothing could possibly be more unsuited to their position in the service. This deplorable incongruity is, however, more or less observable in all masses

with instrumental accompaniment. The same objection may be urged, with equal propriety, against the combined 'Sanctus' and 'Benedictus,' in Cherubini's Requiem in C minor; a comparatively unpretending movement, the persistent *fortissimo* of which can scarcely fail to distract the mind far more seriously than even the sensuous beauty of a movement like that in Rossini's 'Messe Solennelle.'

To particularise the varied readings of the 'Sanctus,' to be found in the masses of even the greatest composers of modern times, would be impossible. The examples to which we have called attention will serve as types of many others; and will, moreover, be valuable, as illustrations of the one practical point of divergence which, more than any other, distinguishes the reading prevalent in the 16th century from that most common in the 19th—the devotional *piano* from the pompous *forte*. So long as drums and trumpets are permitted to take part in the accompaniments of the 'Sanctus,' so long will it fail to attain that æsthetic consistency which alone can ensure its ultimate perfection as a work of art.²

III. In Anglican 'Services' the Sanctus is usually a very unpretending movement, written, for the most part, in simple harmony, without any attempt at fugal treatment, or even imitation; though, in the works of such masters as Tallis, Byrd, Farrant, Gibbons, and their contemporaries, it is always noted for a quiet dignity well worthy of the solemnity of the text. [In former days when there was only ante-communion service, the Sanctus was often sung at the conclusion of morning prayer as a sort of Introit leading to the 'second service' at the altar.]

W. S. R.

SANDERSON, JAMES, born in 1769 at Workington, Durham, had from early childhood a passion for music, and, without the assistance of masters, so qualified himself that in 1783 he was engaged as violinist at the Sunderland Theatre. In 1784 he went to Shields as a teacher of the violin and pianoforte, and met with much success. In 1787 he was engaged as leader at the Newcastle-upon-Tyne Theatre, and in 1788 at Astley's Amphitheatre. In 1789 he made his first attempt at dramatic composition by writing instrumental interludes to illustrate the several parts of Collins's 'Ode on the Passions,' which the eminent tragedian, George Frederick Cooke, was to recite on his benefit night at Chester. His next work was 'Harlequin in Ireland' at Astley's in 1792. In 1793 he was engaged at the Royal Circus, afterwards the Surrey Theatre, as composer and music director, a post which he retained for many years. His principal productions during that period were 'Blackbeard,' 1798; 'Cora,'

¹ In order to explain the intimate connection between these movements, it is necessary to remind the reader that the first 'Osanna' is immediately followed by the Consecration of the Host, which takes place in silence. This completed, the 'Benedictus,' and second 'Osanna,' are sung, in continuation of the same train of ideas, and not with the intention of introducing a new subject of contemplation.

² [It may interest the reader to notice how closely the writer's views on the inappropriateness of certain music to the service of the church foreshadow the famous *motu proprio* of the present Pope, issued in 1903.]

1799; 'Sir Francis Drake,' 1800 (in which was the song, 'Bound' prentice to a waterman,' which became so great a favourite with stage representatives of British sailors that it was constantly introduced into pieces in which a seaman formed one of the characters for fully half a century), and 'Hallowe'en.' His 'Angling Duet,' originally composed for 'The Magic Pipe,' a pantomime produced at the Adelphi, also enjoyed a long popularity. He composed many pieces for the violin. He died in or about 1841. W. H. H.

In these pantomimes and operas he was associated with J. C. Cross, who wrote most of the words, and contrived the scenic effects. The song 'Gin a body meet a body' is claimed by Chappell as originally appearing in one of these productions, 'Harlequin Mariner,' 1795-96, but the air is found in print in Scottish collections long before this, and there is sufficient evidence to show that Cross and Sanderson had merely adapted the song to London requirements. F. K.

SANDONI. See CUZZONI.

SANDYS, WILLIAM, F.S.A., born 1792, educated at Westminster School, and afterwards called to the bar, is entitled to mention here as editor of 'Christmas Carols, Ancient and Modern, including the most popular in the West of England, with the tunes to which they are sung. Also specimens of French Provincial Carols,' 1833; author of *Christmastide, its History, Festivities, and Carols*, with twelve carol tunes, 1852; and joint author with Simon Andrew Forster of *The History of the Violin and other Instruments played on with the Bow. . . . Also an Account of the Principal Makers, English and Foreign*, 1864. He died Feb. 18, 1874. W. H. H.

SANG SCHOOLS. See SONG SCHOOLS.

SAN MARTINI, or SAMMARTINI. Two brothers born at Milan, both musicians, whose works were in great vogue in England during the first half of the 18th century.

GIUSEPPE or GIOSEFFE SAN MARTINI, born about 1693, came to England, according to Burney, in 1723, and according to Hawkins in 1729. This latter date is most probably correct, as Quantz heard him in Milan in 1726. He was well received by Buononcini, Dr. Greene, and others, and was by the influence of the first-named appointed as hautboy player at the Opera. His performance on the instrument surpassed all that had been before heard, and raised it to a great importance. It was thought that much of the fine quality he obtained was by a secret method of manipulating the reed before its insertion. San Martini, having left the Opera, was patronised by Frederick Prince of Wales and his wife, holding in their household the position of musical director of the Chamber Concerts. Hawkins states that he died about 1740, but this date is probably a few years too early. Martini composed many sets of sonatas for flutes and for violins.

To distinguish him from his brother he is frequently named in contemporary references 'St. Martini of London,' his brother being 'of Milan.' His first publication was a set of sonatas for two flutes, issued in 1738. The sale of these being slow he destroyed the plates and the unsold copies, though they were afterwards reissued by Johnson of Cheapside. In the same year six concerti grossi were published. His next work, dedicated to the Princess of Wales, was twelve sonatas for the violin (Walsh, circa 1740). Others issued by Simpson are:— 'Six Concertos for violins, etc., in 7 parts,' eight overtures, six more concerti grossi, harpsichord concertos, 'Six Solos for a German flute,' and 'Six Sonatas for two German flutes or violins.' Scattered pieces by him are often found in collections of airs ('Martini's Minuet' being long a favourite), but it is difficult to distinguish them from work by his brother or from that of many other musicians who bore the same surname. (See the *Quellen-Lexikon*.)

GIOVANNI BATTISTA SAN MARTINI of Milan, his younger brother, remained in Italy, and became a prolific composer both for instruments and voices. About 1746 J. Simpson of London published of his works 'Six Sonatas for two violins and a bass,' and Burney says that between 1740 and 1770, in which latter year he saw him in Milan, he produced for the violin 'an incredible number of spirited and agreeable compositions,' and in 1770 'he was *maestro di capella* to more than half the churches in the city, for which he furnished masses upon all the great festivals.' [Many motets, etc., and a great number of concertos, symphonies, overtures, trios, sonatas, etc., are mentioned in the *Quellen-Lexikon*.] F. K.

SANTA CHIARA. Opera in three acts; words by Mme. Birch Pfeiffer, music by H. R. H. Ernest, Duke of Saxe-Coburg-Gotha. Produced at Coburg, Oct. 15, 1854; at the Opéra, Paris (French translation by Oppelt), Sept. 27, 1855, and, in Italian, at Covent Garden, June 30, 1877. G.

SANTINI, FORTUNATO, the Abbé, a learned musician, born in Rome, Jan. 5, 1778, early lost his parents, and was brought up in an orphanage, but showed such talent for music that he was put to study with Jannaconi, and received into the Collegio Salviati. During his stay there (until 1798) he occupied himself in copying and scoring the church-music of the great masters, and after his ordination in 1801 devoted his whole life to music, copying, collating, and compiling with unwearied industry. As an ecclesiastic he had the *entrée* to many libraries and collections generally inaccessible, and set himself to the task of scoring all important works then existing only in parts. In 1820 he issued a catalogue (46 pp., 1000 Nos.) of his music, the MS. of which, containing more than the printed one, is in the

collection of the writer.¹ A MS. copy of a *Catalogo della musica antica, sacra, e madrigalesca, che si trova in Roma via dell' anima no. 50 presso Fortunato Santini*, is in the Fétis collection at Brussels, No. 5166. His learning, and practical knowledge of church-music, made his assistance invaluable to all engaged in musical research. He did much to make German music known in Italy, translating Rammler's 'Tod Jeau' into Italian, and helping the introduction of Graun's music. Mendelssohn writes (*Letters*, Rome, Nov. 2, 1830): 'The Abbé has long been on the look-out for me, hoping I should bring the score of Bach's "Passion." And again (Nov. 8): 'Santini is a delightful acquaintance; his library of old Italian music is most complete, and he gives or lends me anything and everything.' Then he tells how Santini is trying to get Bach's compositions performed at Naples, and goes on (Nov. 16): 'Old Santini continues to be courteous personified; if some evening in company I praise anything, or say I do not know such and such a piece, the very next morning he comes knocking gently at my door with the identical piece folded up in his blue handkerchief. Then I go to him in the evenings, and we are really fond of each other.' Santini composed pieces in five, six, and eight real parts. [A Requiem *a 8* is at Bologna, where are numerous other church compositions. See the *Quellen-Lexikon*.] The Singakademie of Berlin elected him an honorary member. On the death of his sister he sold his valuable collection, stipulating, however, for the use of it for life. He died in 1862. His library is in the episcopal palace at Münster in Westphalia. A pamphlet, *L'Abbé Santini et sa collection musicale à Rome* (Florence, 1854), giving a useful résumé of its contents, was published by the Russian Vladimir Stassov. F. G.

SANTLEY, SIR CHARLES, son of William Santley, a teacher of music, was born at Liverpool, Feb. 28, 1834. He was a chorister in early life, and, after various appearances as an amateur, he went to Italy to have his beautiful baritone voice trained. Here, at Milan, he was under Gaetano Nava from Oct. 1855. He made a début before very long, as the Doctor in 'La Traviata,' at Pavia, and after singing some other small parts, returned to England in Oct. 1857, and pursued his studies under Manuel Garcia. His first appearance before an English audience was at St. Martin's Hall on Nov. 16, 1857, when he sang the part of Adam in 'The Creation'; he next sang three times at the Crystal Palace, and again in 'The Creation' (taking the parts of Raphael and Adam), at the Sacred Harmonic Society, Jan. 8, 1858. In March of the same year he undertook, at the same society's concert, the part of Elijah, with which he was afterwards so closely iden-

tified. In the following autumn he sang at the first Leeds Festival, taking the bass part of Rossini's 'Stabat Mater,' and other works. His first appearance on the English stage was at Covent Garden, with the Pyne and Harrison Company, as Hoel in 'Dinorah,' in Sept. 1859; he sang with the same company in 'Trovatore,' 'Lurline,' and other operas. He took part in a concert performance of 'Iphigénie en Tauride,' under Hallé, about this time. In the winter of 1860-61 he sang in English opera at Her Majesty's Theatre, in 'Robin Hood,' 'La Reine Topaze,' 'Fra Diavolo,' etc. In 1861 he sang for the first time at the Birmingham Festival, and in the winter again at Covent Garden, in 'The Lily of Killarney,' and other things. He first appeared in the Italian opera in England at Covent Garden in 1862 in 'Il Trovatore,' and later in the same season he joined the company of Her Majesty's Theatre under Mapleson, appearing as the Count in 'Figaro,' and Nevers in 'Lea Huguenots.' In 1863 he sang the part of Valentine on the production of 'Faust' in England with such success that Gounod wrote the song 'Even bravest heart' ('Dio possente') especially for him, and for the English performance of the work in 1864. He sang at Barcelona in the winter of 1864-65, adding Rigoletto to the number of his characters. At Manchester in Sept. 1865 he sang the part of Don Giovanni for the first time, and later on appeared in London as Caspar in 'Der Freischütz.' In 1870, after singing the part of the Dutchman for the first time in England (as 'L'Olandese dannato'), he gave up Italian opera, and sang at the Gaiety Theatre under Hollingshead, as Zampa, Peter the Shipwright, and Fra Diavolo. In 1871 he made a very successful tour in America in opera and concert. In 1876 he joined the Carl Rosa Company at the Lyceum Theatre, repeating his memorable performance of the Flying Dutchman in English. After his first festival performance at Birmingham in 1861, he was, of course, in request at all the autumnal festivals, singing, for the first time at the Three Choir Meetings, at Worcester in 1863. He had previously sung at the Handel Festival in 1862, and until 1906 he appeared regularly at these triennial meetings. From about this time his position in oratorio and concert work was ever more and more important. On April 9, 1859, he had married Gertrude Kemble, daughter of John Mitchell Kemble, the eminent Anglo-Saxon scholar, and grand-daughter of Charles Kemble. She appeared as a soprano singer at St. Martin's Hall in the 'Messiah,' but retired from public life on her marriage. Their daughter, EDITH, had a short but brilliant career as a concert-singer (soprano), before her marriage in 1884 with the Hon. R. H. Lytton.

Though the versatility of his genius allows him to express any emotion to the full, yet

¹ His address is there given Roma, Via Vittoria, No. 49, while in the Fétis collection it is Via dell' anima, No. 50.

Santley's singing is identified with certain characteristics in the minds of those who know it best. The quality of the voice was less remarkable for richness or sonority than for its eloquence of expression, and had a *timbre* which in love-music more easily represented fiery passion than soft languor. This fire was never more perfectly in its place than in 'Elijah,' where it was prominent from the opening recitative until the end. His distinct enunciation, and power of varying the tone-colour, were among his technical merits; but, beyond and above these, was the informing spirit of energy finely held in control. This made his singing of songs as dramatic as if they were scenes on the stage, although he never fell into the error of making lyrics sound operatic. His performance of the 'Erl King' (which he always sang in English) can never be forgotten in this respect, and in a kindred mood Hatton's 'To Anthea' became exclusively his own. His interpretation of Handel's 'O ruddier than the cherry' was masterly in delineation and humour. Among the oratorios in which he made the greatest impression, apart from 'Elijah,' must be mentioned 'The Redemption' (Birmingham, 1882), and 'The Spectre's Bride' (Birmingham, 1885). He has found time in the intervals of a wonderfully successful and busy career to compose several works for the service of the Roman Church (which he joined about 1880), such as a mass in A flat, an Ave Maria, and other things. A berceuse for orchestra was performed at Sydney in 1890, when Santley was on a tour in Australia. In 1887 he was created a Knight Commander of St. Gregory the Great by Pope Leo XIII. In 1892 he published an amusing and valuable volume of reminiscences, *Student and Singer*. On May 1, 1907, the 'jubilee' of his artistic career was celebrated at a concert at the Albert Hall, when he appeared with many eminent artists. A money presentation, referred to on that occasion, was made some time afterwards. He was knighted later in the year. M.

SAPPHO. 1. Saffo. Opera in three acts; text by Cammarano, music by Giov. Pacini. Produced at Naples, Nov. 27, 1840; in London at Drury Lane, in an English version by Serle, April 1, 1843 (Clara Novello as Sappho).

2. Sapho. Opera in three acts; words by Emile Augier, music by Charles Gounod. Produced at the Opéra, April 16, 1851. It was reduced to two acts, and reproduced July 26, 1858. In Italian, as 'Saffo,' at Covent Garden, August 9, 1851. The opera was afterwards remodelled by its composer, extended to four acts, and produced at the Grand Opéra, April 2, 1884, with moderate success.

3. Sapho. Opera in five acts; text by Henri Cain and Arthur Bernède, music by Jules Massenet. Produced at the Opéra-Comique, Paris, Nov. 27, 1897. G.

SARABAND, a stately dance, once very popular in Spain, France, and England. Its origin and derivation have given rise to many surmises. Fuertes (*Historia de la Musica Española*, Madrid, 1859) says that the dance was invented in the middle of the 16th century by a dancer called Zarabanda, who, according to other authorities, was a native of either Seville or Guayaquil, and after whom it was named. Others connect it with the Spanish Sarao (an entertainment of dancing), and Sir William Ouseley (*Oriental Collections*, 1728, vol. ii. p. 197, misquoted by Mendel, under 'Saraband'), in a note to a Turkish air called 'Ser-i-Khāneh,' or 'the top of the house,' has the following:—'Some tunes are divided into three parts and are marked *Khāne-i sāni* "the second part," and *Khāne-i sālis* "the third part"; near the conclusion of several we also find the Persian words *ser-band*, from which, without doubt, our *sara-band* has been derived.'¹

Whatever its origin may have been, it is found in Europe at the beginning of the 16th century, performed in such a manner as to render its oriental source highly probable. This may be gathered from the following extract from Chapter xii., 'Del baile y cantar llamado Zarabanda,' of the *Tratado contra los Juegos Publicos* (*Treatise against Public Amusements*) of Mariana (1536-1623): 'Entre las otras invenciones ha salido estos años un baile y cantar tan laevo en las palabras, tan feo en las meneos, que basta para pegar fuego aun á las personas muy honestas' ('amongst other inventions there has appeared during late years a dance and song, so lascivious in its words, so ugly in its movements, that it is enough to inflame even very modest people'). This reputation was not confined to Spain, for Marini in his poem *L'Adone* (1623) says:

Chiama questo suo gioco empio e profano
Saravanda, e Ciaccona, il nuovo Ispano.²

Padre Mariana, who believed in its Spanish origin, says that its invention was one of the disgraces of the nation, and other authors attribute its invention directly to the devil. The dance was attacked by Cervantes and Guevara, and defended by Lope de Vega, but it seems to have been so bad that at the end of the reign of Philip II. it was for a time suppressed. It was soon, however, revived in a purer form, and was introduced at the French court in 1588, where later on Richelieu, wearing green velvet knee-breeches, with bells on his feet, and castanets in his hands, danced it in a ballet before Anne of Austria.

In England the Saraband was soon transformed into an ordinary country-dance. The first edition of Playford's *Dancing Master* (1651) has two examples, one to be danced 'longwayes for as many as will' i.e. as 'Sir Roger de

¹ In a MS. collection of dances in the Music School at Oxford is a Saraband by Coleman, entitled 'Seribras.'

² 'New Spain' is Castile.

Coverley' is now danced), and the other, 'Adson's Saraband,' to be danced 'longways for six.' It was at about this time that the Saraband, together with other dances, found its way into the Suite, of which it formed the slow movement, placed before the concluding Gigue. In this form it is remarkable for its strongly accentuated and majestic rhythm, generally as follows:—

It is written either in the major or the minor key, in 3-2 or 3-4 time, although Walther (*Lexikon*, 1732) says that it may be also written in 2-4 time. It usually consists of two 8- or 12-bar divisions, begins on the down-beat, and ends on the second or third beat. Bach, in the 'Clavierübung,' Pt. I. (B.-G. iii. 76) has a Saraband beginning on the up-beat, and Handel (Suite XI.) has one with variations. Those by Corelli do not conform to the established rules, but are little more than Sicilianas played slowly.

The following Saraband for the guitar is printed in Fuenes' *Historia de la Musica Española*.

Handel's noble air 'Lascia ch'io pianga,' in 'Rinaldo,' is taken with no material alteration from a Saraband in his earlier opera of 'Almira,' in which the majestic rhythm mentioned reigns in all its dignity. See Chrysander's *Händel*, i. 121.

W. B. S.

SARASATE. PABLO MARTIN MELITON DE SARASATE Y NAVASCUES, born at Pampeluna, March 10, 1844, came to France as a child, and entered the Paris Conservatoire, Jan. 1, 1856. The following year he became the favourite pupil of Alard, and gained the first prizes for solfège and violin. He then entered Reber's harmony class, and secured a *premier accessit* in 1859, but shortly after relinquished the study of composition for the more tempting career of a concert player. His beautiful tone, retentive

memory, immense execution, and certainty of finger, added to the singularity of his manners and appearance, ensured his success in Paris, the French provinces, and the Peninsula. The Spaniards naturally honoured an artist whom they looked upon as their own countryman, but Sarasate aspired to make his name known wherever music was appreciated, as well as in the two countries especially his own by birth and adoption. No violinist has travelled more than he; besides making his way through Europe, from the remotest corner of Portugal to Norway, and from London to Moscow, he has visited America, North and South. In all his wanderings he has contrived to carry on his cultivation, and develop his great natural gifts. To London his first visit was in 1861, when he played at St. James's Hall on May 22; he came again in 1874, when he played at the Philharmonic Concert, May 18, and at the Musical Union, June 9, etc. He returned in 1877 (Crystal Palace, Oct. 13), and 1878 (Philharmonic, March 28), and has been a frequent visitor since. In 1885 and 1886 he gave sets of orchestral concerts conducted by Cusins, and at the Birmingham Festival of 1885 played a concerto written for him by Mackenzie.

Sarasate's distinguishing characteristics are not so much fire, force, and passion, though of these he has an ample store, as purity of style, charm, brightness of tone, flexibility, and extraordinary facility. He *sings* on his instrument with taste and expression, and without that exaggeration or affectation of sentiment which disfigures the playing of many violinists. His repertoire is varied, comprising the concertos of German masters—Beethoven, Mendelssohn, and Bruch,—Raff's various works for violin, and the works of the modern French and Belgian schools. Among the former his favourites are the concertos of Saint-Saëns and Lalo, and the *Symphonie Espagnole* of the last-named composer. [He has avoided the music of Paganini and his followers, partly for want of taste for it, and partly because of the long stretches required, his hand being very small. Although Bach, on the whole, is unsuited to his style for obvious reasons, he gives certain movements with great charm, notably the prelude and gavotte from the E major solo sonata. But he will always be remembered for his rendering of the solos he has written for himself, and plays so exquisitely, giving the spirit of Spanish dance translated into terms of the violin virtuoso. He possesses two fine Stradivari violins, one of which, dated 1724, was presented to him when a boy by Queen Isabella of Spain. This instrument was one of those brought from the chapelle royale at Naples by Charles III. (for whom Boccherini composed his quintets), and upon it he has mainly played throughout his career. A successful copy of it was made by Vuillaume, and is sometimes used by him at rehearsals. Later

PABLO MARTIN MELITON DE SARASATE Y NAVASCUES SARASATE

in life he acquired from the Boissier collection, and occasionally plays on, an exceptionally beautiful instrument, bearing date 1713.] Sarasate has composed for his instrument romances, fantasias, and especially transcriptions of Spanish airs and dances, all calculated to display his skill as a virtuoso. His 'Zigeunerweisen,' 'Jota Aragonesa,' and the four books of Spanish dances are among the most popular violin solos in existence. [He pays an annual visit to his native town of Pampeluna, where fêtes are held in his honour.] G. C.; additions, in square brackets, by W. W. C.

SARRUSOPHONE. A brass instrument of conical bore, played with a double reed, designed in 1863 by M. Sarrus, a bandmaster in the French army. The scheme of the inventor comprised a whole family of instruments ranging in pitch from soprano to contra-bass, and his expectation was that they might well take the place of oboes and bassoons in military bands. As regards the contra-bass models, Sarrus was to some extent anticipated by Stehle of Vienna in 1835, who brought out a contra-bassoon in brass, of simple fingering, and whose model has been further developed by Cervený of Königratz, and Mahillon of Brussels; but to Sarrus belongs the credit of designing a whole family of double-reed instruments as possible substitutes for the oboe and bassoon groups. The objection that has been raised to them is that they fail to produce the delicate and distinctive qualities of the wooden double-reed instruments.

The complete family of sarrusophones comprises the sopranino in *e*^b, soprano in *b*^b, alto in *e*^b, tenor in *B*^b, baritone in *E*^b, bass in *B*^b, contra-bass in *E*^b, and the contra-bassoon in *C*, or *B*^b. All these have a compass from one tone below the pitch note, to a fifth above its double octave, *b*^b to *f*^{'''}, agreeing in this respect with the oboe, and the general scheme of fingering is much like that of the oboe. The tube of all but the small instruments is bent back upon itself, so as to reduce the length to a convenient compass.

The actual use of the sarrusophone in the orchestra has been very limited, but M. Saint-Saëns appears to have thought highly of the contra-bass instrument as an alternative to the double-bassoon, and used it on several occasions. Jules Massenet introduced it in his 'Esclarmonde' with great effect, and other composers have followed his example. It is possible that the bass and contra-bass members of the family may be kept alive, as they have distinctive qualities, but the treble and alto instruments can be regarded only as interesting experiments. D. J. B.

SARTI, GIUSEPPE, born at Faenza, Dec. 1, 1729, a date differing from that given by most of his biographers, but furnished by Sarti's own grandson to the writer, who has taken great

pains to verify it. The son of a jeweller who played the violin in the cathedral, he early learned music, and had lessons in composition—from Vallotti according to his own family, from Padre Martini according to his biographers. Whether at Padua or at Bologna (the respective homes of the two masters), he completed his studies at an early age, for we learn from the chapter archives, still preserved in the library of Faenza, that he was organist of the cathedral from 1748 to April 1750, and director of the theatre from 1752. In 1751 he composed his first opera, 'Pompeo in Armenia,' which was enthusiastically received by his fellow-townsmen, and followed by several more serious works, and 'Il Rè pastore' (Venice, 1753), which had an immense success. So quickly did his fame spread that when he was only twenty-four the King of Denmark (Frederick V.) invited him to Copenhagen as Capellmeister to the Prince Royal, and director of the Italian opera; and, on the closing of the latter in two years, made him Court-capellmeister. In the summer of 1765 the king determined to reopen the opera, and Sarti went back to Italy after an absence of twelve years to engage singers; but his plans were upset by the deaths first of the king in 1766, and then of his own mother in 1767, so that it was not till 1768 that he returned to Copenhagen. These three years of trouble were not unfruitful, as he composed five operas, of which two, 'I Contrattempi' (1767) and 'Didone abbandonata,' were given in Venice, where he seems chiefly to have resided.

Overskou's carefully compiled *History of the Danish Stage*¹ informs us that Sarti directed the Danish court-theatre from 1770 to May 20, 1775, when he was summarily dismissed. A favourite with Christian VII., and the protégé of Struensee and Queen Caroline Matilda, he was too artless and straightforward to curry favour with the queen dowager and the ambitious Ove Guldberg; so after the catastrophe of 1772 he found his position gradually becoming worse and worse, and when the oligarchical party had secured the upper hand, imprisoning the queen, and reducing the king to a mere cipher, he had, with other court favourites, to endure much ill treatment, and was finally banished. During this second stay at Copenhagen he married Camilla Pasi, by whom he had two daughters.

Returning to Italy in the summer of 1775, he went first to Venice, became at once director of the Ospedaletto Conservatorio, and administered it with great success for four years. In 1779 the post of maestro di cappella of the cathedral of Milan fell vacant through the death of Fioroni, and Sarti was pronounced successful at a competition held before the

¹ Thomas Overskou, *Den danske Skueplads i dens Historie*, 8vo. Copenhagen, 1854, etc.

Conservatorio of Naples. This victory over Paisiello and other eminent musicians greatly increased his reputation, and procured him many distinguished pupils, Cherubini among the number, who indeed was not only his pupil, but for some years his assistant.¹ In 1784 he received an invitation from Russia too advantageous to be refused, but the nine years spent in Milan were the most brilliant of his whole career, and the most prolific, including as they did his most successful operas, 'Le Gelosie villane'² and 'Farnace' (Venice, 1776); 'Achille in Sciro' (Florence, Oct. 1779); 'Ginlio Sabino' (Venice, 1781), and 'Fra i due Litiganti' (Milan, 1782). To complete the list, at least ten more operas and several cantatas on a large scale should be added, works for the cathedral choir, including several masses, a *Miserere a 4*, and some important motets.

On his way to St. Petersburg, Sarti made some stay at Vienna, where Joseph II. received him graciously, and granted him the proceeds of a performance of 'I due litiganti,' which had long maintained its place at the Burgtheater, and had helped to fill its coffers, as the monarch politely told the composer. He there made the acquaintance of Mozart, then in the very prime of life, who speaks of him as an 'honest, good man,' and who not only played to him a good deal, but adopted an air from his 'Due Litiganti' as the theme of a set of Variations (Köchel, 460), and as a subject in the second finale of 'Don Juan.' His pleasure in Mozart's playing did not, however, place him on Mozart's level; and when the famous six quartets were published, Sarti was one of the loudest to complain of their 'barbarisms.' His examination remains mostly in MS., but some extracts are given in the *A.M.Z.* for 1832 (p. 373), including nineteen serious errors in thirty-six bars, and showing how difficult it is even for a very clever composer to apprehend the ideas of one greater than himself.

Catherine II. received him with even greater marks of favour than Joseph, which he repaid by composing several important works for her own choir, and by bringing the Italian opera into a state of efficiency it had never attained before. Among his sacred compositions of this period may be mentioned an oratorio for two choirs, full orchestra, and band of Russian horns; a *Te Deum* for the taking of Otchakow by Potemkin; and a Requiem in honour of Louis XVI. It was in the *Te Deum* that Sarti employed fireworks and the discharge of cannon to heighten the martial effect of the music. Among his operas produced at St. Petersburg were 'Armida' (1786), which had an immense success, and was sung to perfection by the celebrated Todi; and 'Oleg,' the libretto of

which was by the Empress herself. In this opera Sarti endeavoured to imitate the music of the ancient Greeks, and made use of some of their modes. A skilled mathematician and physicist, he was fond of explaining to the Empress his theories of acoustics, which he illustrated by many ingenious experiments. He invented a machine for counting the vibrations of sounds, and fixed 436 vibrations³ for the A, as the normal pitch for his orchestra. For this invention he was elected an honorary member of the Academy of Science in St. Petersburg. Many other honours were conferred upon him, including those of councillor of the University, chief maître de chapelle to the court, and nobility of the first class. Todi's intrigues caused him temporary inconvenience, but he consoled himself for a short period of disgrace by going to a village in the Ukraine, given him by Prince Potemkin, and founding there a school of singing which turned out some remarkable singers. In 1793 the Empress restored him completely to favour, and placed him at the head of a Conservatoire planned after the model of those in Italy. After her death and that of her son Paul I., Sarti determined to revisit his native land, and in the spring of 1802 left Russia, where he had lived for eighteen years without a break. At Berlin he formed an intimacy with the Court-cappellmeister, Noël Mussini (born at Bergamo, 1765; died at Florence, 1837), who fell in love with his daughter Giuliana, and became his son-in-law.⁴ Immediately after the marriage the kind and gentle Sarti fell seriously ill of gout, and died July 28, 1802, aged seventy-three. He was buried in the Catholic church of St. Edwige, where his ashes still remain.

From some unexplained cause very few of Sarti's compositions have been engraved. His *Te Deum* was printed with Russian words at St. Petersburg, and Breitkopf & Härtel have published two of his sacred pieces, one in eight, the other in six real parts. A French translation of the 'Nozze di Dorina' (identical with 'Fra i due Litiganti'), apparently the only opera of his that has been engraved, appeared in Paris; but Ricordi of Milan has copies of 'Armida e Rinaldo'; 'I finti Eredi'; 'Le Gelosie villane'; 'Nitteti,' and 'Vologeso.' These scores, as well as those of 'Adriano in Sciro,' 'Alessandro,' 'Gli Amanti consolati,' 'Castore e Polluce,' 'I Contratempo,' 'Didone abbandonata,' 'Erifile,' 'Fra i due Litiganti,' 'Ginlio Sabino,' 'Idalide,' 'Ifigenia,' 'Il Medonte,' 'Il Militare bizzarro,' 'Mitridate,' and 'Scipione,' and also of nearly all his sacred works, are in the library of the Paris Conservatoire, from which circumstance the writer is

³ The 'diapason normale' fixes 435 vibrations for the same note.

¹ See Cherubini's preface to the Catalogue of his works.
² Mozart, in 1791, wrote a final chorus for this, of which, however, nothing has survived but the five bars in his autograph catalogue. (See Köchel, 616.)

⁴ The articles on Sarti and Mussini in Fétis are full of errors and omissions. We have corrected the most glaring mistakes from family papers kindly furnished by the distinguished painter L. Mussini, director of the Museo at Siena, and grandson of the composer.

able to pronounce upon his style. The part-writing is eminently vocal, and the most difficult combinations are mastered with ease, but the scientific element is never unduly forced into notice, owing to Sarti's gift of fresh and spontaneous melody. Most of his operas contain numbers well constructed with a view to stage effect, and full of expression and charm; indeed so much of his music might still be heard with pleasure that it seems strange that no great artist has attempted to revive it.

His masses alone retain their hold on public favour, and one was performed on Easter Day 1880 in Milan Cathedral, which still has all the MSS.

Sarti left six sonatas for Clavier solo (London, 1762). An Allegro from these is included in Pauer's 'Alte Meister.' Cherubini quotes a 'Cum Sancto' a 8 of his in his *Counterpoint*; and Fétis a Kyrie from the same mass in his treatise. Breitkopf has published a Fugue for eight voices, a Hymn and a Miserere, and the overture to 'Ciro riconosciuto.' A Rondo for mezzo soprano will be found in Gevaert's 'Gloires d'Italie,' and a Cavatina, from 'Giulio Sabino' in the 'Gemma d'Antichità.'

The Mussini family possess a fine oil-painting of the composer, taken in 1786 by Tonci, an Italian painter settled in St. Petersburg. *Le Chevalier Sarti*, a novel by P. Scudo, appeared first in the *Revue des Deux Mondes*, and has since been published separately (Paris, Hachette, 1857).

G. C.

SARTORIS, MRS. See KEMBLE, ADELAIDE.

SATANELLA, OR THE POWER OF LOVE.

A 'New Original Romantic Opera,' in four acts; words by Harris and Falconer, music by Balfe. Produced at the National English Opera, Covent Garden (Pyne and Harrison), Dec. 20, 1858. The story is a version of 'Le Diable boiteux.'

G.

SATURDAY POPULAR CONCERTS. See POPULAR CONCERTS.

SATZ. The German term for MOVEMENT, which see.

SAUER, EMIL, born at Hamburg, Oct. 8, 1862, was a pupil of Nicolas Rubinstein at the Moscow Conservatorium in 1876-81, and subsequently studied under Liszt and Deppe. From 1882 he made frequent and successful concert-tours as a virtuoso-pianist. He first appeared in England at eight recitals of his own, in November 1894, and rapidly attained great success in this country. In 1901 he was appointed head of one department of the pianoforte branch of the Vienna Conservatorium, which he gave up in April 1907, going to live at Dresden. His technique is wonderfully neat and accurate, and his playing, though occasionally rather wanting in breadth, is always agreeable. He has written a 'suite moderne' and many slighter pieces for the pianoforte, as well as a Concerto in E minor. He has also pub-

lished a volume of reminiscences, *Meine Welt* (1901).

M.

SAUL. 1. An oratorio; words attributed both to Jennens and Morell, music by Handel. The composition was begun July 23, 1738. The second act was completed August 28, and the whole on Sept. 27, of the same year. First performance at the King's Theatre, Tuesday, Jan. 16, 1739; at Dublin, May 25, 1742. Revived by the Sacred Harmonic Society, March 20, 1840. The autograph is in the library at Buckingham Palace. The overture ('Sinfonia') is Handel's longest; it is in four movements, and the organ is largely employed in it as a solo instrument. The 'Dead March in Saul' has been perhaps more widely played, and is more universally known, than any other piece of music.

2. 'King Saul.' An oratorio; composed by Sir C. Hubert H. Parry, produced at the Birmingham Festival of 1894.

G.

SAURET, ÉMILE, violinist, born at Dun-le-Roi, Cher, France, May 22, 1852, soon attracted the notice of De Bériot, and became his pupil, the last he ever had. He began to travel at an early age, playing in the chief towns of France and Italy, in Vienna and in London, where he played at the International Exhibition of 1862 and also at the Alhambra. More important was his appearance at Alfred Mellon's Concerts, Covent Garden, August 27, 1866. He played often at the French court in the last days of the Second Empire. In 1872 he made his first visit with Strakosch to the United States, and his second in 1874, remaining there till Jan. 1876. In New York he made the acquaintance of von Bülow and Rubinstein, and on his return to Leipzig was welcomed by the latter, then engaged in the rehearsals of his 'Paradise Lost.' Sauret made his début in the Gewandhaus in May 1876 in Mendelssohn's Concerto, and was most warmly received. He took lessons in composition from Jadassohn. He, however, returned immediately to America, and it was not till he came back again in 1877, and went through Germany and Austria in two long and most successful tournées, that his reputation was established in his native country. In England he reappeared in 1880, and played at the Crystal Palace, April 24, and Philharmonic (Bruch's Concerto, No. 1) on the 28th.

Liszt showed him much kindness, and they often played together. In 1872 he married Mme. Teresa Carreño, the marriage being dissolved a few years later. In 1879 he married Miss Emma Hotter of Düsseldorf [and being appointed professor of the violin at Kullak's Academy in Berlin, he settled in that city, remaining there nearly ten years. He relinquished this post, however, in 1890, when the Royal Academy of Music, London, invited him to fill the vacancy caused by the death of

the principal violin professor, Prosper Sainton. In 1903 Sauret again gave up this second professorship for a similar position at the Chicago Musical College, where he remained until July 1906. At present he is residing in Geneva, giving private lessons to a small *coterie* of pupils, many of whom have followed him from America. As a virtuoso Mons. Sauret has obtained a greater degree of popularity in America than hers. His playing is distinguished by the grace and elegance of the French school, to which is added a conscientious handling of the classics. He is also a thorough musician, and has written a large amount of music, including an excellent method for the violin.]

His published works embrace a Concerto in G minor; a Ballade, a Légende; and a Serenade in G—all for solo violin and orchestra; Caprice de Concert in D; Scherzo fantastique; Valse-caprices; Barcarolle-mazurka, and many other drawing-room pieces, as well as transcriptions from Mendelssohn, Rubinstein, Wagner, etc. G.

[He has also written a Concerto in E major for violin and orchestra, a *Gradus ad Parnassum du Violiniste* (Leipzig, 1894), and a number of Études, small pieces and transcriptions for the violin, with and without orchestra.—Lahee, *Famous Violinists*; Mason Clarke, *Dictionary of Fiddlers*; Baker *Dict. of Music*; *Musical Times*, 1900, p. 9. E. H. A.]

SAUTILLÉ, or SALTANDO. A technical term in violin and violoncello music whereby the executant understands that a certain skipping motion of the bow is to be employed. To the school of classical composers from Corelli to Spohr, *sautillé* was either unknown, or by them ignored; but with the advent of Paganini this brilliant embellishment came into vogue, and at the present time it is one of the most effective and frequently used *coups d'archet*. Like all the different species of bowing, the manner of playing *sautillé* varies with the tempo of the composition, and the amount of tone required. In slow movements it assumes the form of gentle even taps given with an up-and-down movement in the middle of the bow. To accomplish this accurately, perfect unity of action between the fingers of the left hand and the bow is necessary. The hair of the bow should be slightly turned towards the face, the bow itself being held lightly but firmly; the forearm must move slightly with each upward and downward stroke of the bow; the thumb must be almost straight; the wrist loose, but controlled. Although in a slow movement the bow requires to be raised and lowered by the player, in an allegro or presto movement the bow rebounds of its own accord with such rapidity that the executant has only to keep the forearm quiet; to have a perfectly loose wrist, and to control the action of the bow by a slight pressure of the first finger upon the stick when required. Excellent studies and examples of this bowing

are to be found in such compositions as Paganini's 'Moto Perpetuo,' Sarasate's 'Ziguenerweisen,' Bohm's two 'Moto Perpetuo,' Arensky's 'Caprice,' Ries's 'Moto Perpetuo,' and in Ernst's, Vieuxtemps's, De Bériot's, Leonard's, Wieniawski's, Nachez's, and Hubay's compositions. The use of the *sautillé* in concerted music, particularly in the quartets of Haydn, Mozart, Beethoven, as well as in the sonatas of the two last-named composers, is universally understood, and enhances the beauties of the old masters with happy effect (see BOWING). O. R.

SAUZAY, CHARLES EUGÈNE, an eminent French violinist, was born at Paris, July 14, 1809. In 1823 he entered the Conservatoire, and in his second year became the pupil of Baillot and of Reicha. He obtained the second violin prize in 1825, the first do., and the second for fugue, in 1827. A few years later he joined Baillot's quartet, first as second violin and then as tenor, *vice* Urhan, married Mlle. Baillot, and continued one of her father's party till its dissolution in 1840. He soon rose rapidly both in society and as a professor. In 1840 he was made first violin to Louis Philippe, and afterwards leader of the second violins to the Emperor Napoleon III. In 1860 he succeeded Girard as professor at the Conservatoire. His own quartet party started after the termination of Baillot's, embracing his wife and Boely as pianists, Norblin and Franchomme; gave its concerts, sometimes with and sometimes without orchestra, in the Salle Pleyel. Sauzay is mentioned by Hiller as one of Mendelssohn's acquaintances during his stay in Paris in 1830. He was greatly sought after both as a player and a teacher. His publications are not important, and consist of incidental music to 'Georges Dandin' and 'Le Sicilien,' cleverly written in the style of Lully to suit the date of the pieces; fantasias and romances; a PF. trio; a string trio; songs; *Haydn, Mozart, Beethoven; Étude sur le quatuor* (Paris, 1861), a disappointing work from the pen of a musician of so much eminence and experience; *L'école de l'accompagnement* (Paris, 1869), a sequel to the foregoing. He also composed a series of 'Études harmoniques' for the violin. [He died in Paris, Jan. 24, 1901.] G.

SAVAGE, WILLIAM, born about 1720, was a pupil of Pepusch, and became a gentleman of the Chapel Royal in 1744. He was almoner, vicar-choral, and master of the choristers at St. Paul's Cathedral in 1748, and was the master of Battishill and Stevens. He wrote some chants and church music of little importance, and died in London, July 27, 1789. (*Brit. Mus. Biog.*)

SAVART, FÉLIX. [A French doctor of medicine who abandoned his profession and devoted himself to investigating the theory of the vibration of surfaces and strings. He was the son of Gérard Savart, a mathematical instrument maker of repute, director of the

ateliers of the École d'Artillerie, and the author of several useful innovations, including an ingenious contrivance for dividing circles. He was born at Mézières, June 30, 1791. Originally established at Metz, he left Paris in 1819, where he was made Conservateur de Physique at the Collège de France, and in 1827 was elected a member of the Académie des Sciences.] Following in the steps of Chladni, whose labours had particularly attracted his attention, he made many investigations in acoustics, which are recorded in the several publications bearing his name. He appears particularly to have thrown light on the nature of that complicated relation between a vibrating body which is the source of sound, and other bodies brought into connection with it, by virtue of which the original sound is magnified in intensity and modified in quality; well-known examples of such an arrangement being furnished by the *sound-boards* of the violin tribe and the pianoforte.

[In his *Mémoire sur la construction des Instruments à cordes et à archet*, published in Paris in 1819, he explains the series of experiments which led him to construct his 'Trapezoid Violin,' familiarly known in England as Savart's 'Box Fiddle.' The exhaustive tests therein described are the most renowned and convincing that have ever been undertaken. Clearly and distinctly he proved that wood arched in the form ordinarily employed for stringed instruments of the violin tribe does not vibrate in every part of its length and breadth equally; that there are points where the vibrations decrease, and points—*i.e.* the bouts, corner-blocks and sound-holes—where the vibrations cease; finally, that a flat piece of wood vibrates more readily and evenly than an arched one. Taking these facts for his basis, he constructed a violin in the form of a box, narrower at the upper than at the lower end. The two tables were flat, planed on the inner side and slightly raised on the outer so as to support the increased pressure of the strings caused by the bridge, which was necessarily higher than usual, so as to allow the bow a free passage across the strings, which would otherwise be hindered by the straight sides of the instrument. In contrast with the customary curved sound-holes of the ordinary violin, Savart cut his straight; and their position in the belly, and distance apart, he determined by a series of practical experiments which are minutely described in his book. He tried two bass-bars, one placed down the centre joint of the violin, the other crescent-shaped, only touching the belly at a point just below the bridge. Curiously enough both these forms produced apparently identical effects. The sides of the instrument were $\frac{1}{4}$ in. in thickness, and no side linings were employed. The sound-post was placed behind the bridge, but a little more to the right than is customary. To prevent the excessive pull of the

strings on the tender part of the belly (inseparable from a tail-piece attached in the ordinary way), Savart carried his strings over a hardwood or ivory nut at the end of the violin and attached them to the tail-pin, which was set slightly below the centre. A jury of the Académie des Sciences, composed of MM. Biot, Charles, Haüy, and De Prony, together with four members of the Académie des Arts, MM. Berton, Catel, Le Sueur, and Cherubini, were appointed to consider the merits of this violin. The eminent violinist M. Lefebvre played alternately on a fine Cremona and M. Savart's violin before this jury, and eventually the latter was pronounced to be equal, if not superior, to the Italian masterpiece.]

Savart's name is also connected with an ingenious little device for measuring, in a manner easily appreciable by a lecture-audience, the number of vibrations corresponding to a given musical note. A wheel, caused to rotate quickly by ordinary mechanical contrivances, is furnished on its circumference with teeth or ratchets, against which a tongue of pasteboard or some other elastic substance is brought into contact. The passage of each tooth gives a vibration to the tongue, and if the wheel revolve fast enough, the repetition of these vibrations will produce a musical sound. Hence, as the number of rotations of the wheel in a given time can be easily counted, the number of vibrations corresponding to the note produced can be experimentally ascertained with tolerable precision. This mode of determining vibration numbers has been since superseded by the more elegant instrument, the SYREN, and by other modes known to modern acoustic physicists, but from the simplicity of its demonstrations it is still often used. Savart also investigated with some attention and success the acoustical laws bearing on wind instruments and on the production of the voice.

[He also wrote *Mémoire sur la Voix Humaine*, published in 1825, and also *Sur la Voix des Oiseaux*, 1826. His complete works were published in the *Annales de Chimie et de Musique*, beginning with the year 1819. He died March 16, 1841.—(P. Davidson, *The Violin*; Heron-Allen, *Violin-making*; J. SAVILLE, JEREMY, a composer of the middle of the 17th century, some of whose songs are

included in 'Select Muscalle Ayres and Dialogues,' 1653, is now only known by 'Here's a health unto his Majesty,' and his four-part song, 'The Waits,' printed in Playford's 'Musical Companion,' which, by long-standing custom, is the last piece sung at the meetings of the Madrigal Society and similar bodies. W. H. H.

SAVONAROLA. Grand opera in a prologue and three acts; words by Gilbert à Beckett, music by C. Villiers Stanford. Produced at the Stadt-Theater, Hamburg (words translated by Ernst Frank), April 18, 1884, and at Covent Garden (German Opera, under Richter), July 9 of the same year. M.

SAVOY. [See OLD HUNDREDETH, THE.]

SAVOY CHAPEL ROYAL, THE, has a constitution differing widely from the chapel of St. James. While that is maintained out of the Civil List, the Savoy Chapel derives its sustenance from the sovereign's privy purse, and thus in one respect has even greater claim to the appellation of Royal. The salient points in the history of the Savoy may be given in few words, which may tend to remove much prevailing misconception on the subject. In 1246 Henry III. made a grant of land on the banks of the Thames to his wife's uncle, Count Peter of Savoy, and a palatial residence was erected on the site. After Peter's death the estate came into the possession of Queen Eleanor, who bestowed it upon her son Edmund of Lancaster, and it remained in the possession of the Lancastrian branch of the royal family until 1381, when, owing to the unpopularity of John of Gaunt, the palace was wrecked by the insurgents under Wat Tyler. Under the provisions of the will of Henry VII., a hospital was founded there, but though richly endowed, it did not flourish, and the fondest abuses prevailed until 1702, when the institution was dissolved. The Chapel had been used from 1564 until 1717 by the parishioners of St. Mary's, but in 1773 George III. issued a patent constituting it a Chapel Royal, and its title is therefore beyond dispute. From time to time the reigning sovereigns contributed towards its maintenance, but the place attracted little general notice until 1864, when it was partially destroyed by fire. Restored from designs by Sir Sidney Smirke, at a cost to Queen Victoria of about £7000, the Chapel was reopened for Divine Service on Dec. 3, 1865. The appointment is in the gift of the Duchy of Lancaster. H. F. F.

In the middle of the 18th century the Chapel acquired a dubious celebrity for 'easy marriages.' The inducements are set forth in the following advertisement which appeared in the *Public Advertiser* for June 2, 1754:—'By authority, marriages performed with the utmost privacy, decency, and regularity, at the Ancient Royal Chapel of St. John the Baptist in the Savoy, where regular and authentic registers have been

kept from the time of the Reformation (being two hundred years and upwards) to this day. The expense not more than one guinea, the five shilling stamp included. There are five private ways by land to this chapel, and two by water.' A quaint old custom connected with the Chapel survives in the Court Leet of the Manor Liberty of the Savoy. The Court is held annually at Easter in the vestry hall of St. Clement Danes, to which 'sixteen good men and true' are summoned to appear and 'do their Suit and Service to His Majesty the King,' under penalty of £2. The Court consists of the High Steward, High Bailiff, four burgesses, four assistant burgesses and their beadle. The duty of this company is to report to the Court that the old boundary marks have not been removed and are in good order. In consequence of various improvements some of these boundary marks are now in unexpected places; one is in a sewer on the Embankment, and others are on the stage of the Lyceum Theatre, at the rear of Child's Bank in Fleet Street, and beneath a stone on the lawn in the Temple. There is evidence to show that the Court has been held since the accession of Henry IV. There is no special endowment fund for the choir, but boys who have the good fortune to be elected receive a free education at the school in connection with the Chapel, of which Mr. H. Kingston is the present master. The services are choral, but almost entirely sung in unison. The chants and tunes are collected from various sources, and comprise a remarkable collection of old and new melodies. A peculiarity of the building is its sensitiveness to the note F, reverberations being felt, even in the vestry, when the low F is sounded on the pedal organ. In consequence of this the responses are sung in F. The two-manual organ, built by Messrs. Willis, has recently been completed.

The names of the chaplains of the Savoy from 1773 are—William Willmot; Samuel Ayscough, 1778; James Hodgsons, 1795; Dr. John Banks Jenkinson, 1805, afterwards Bishop of St. David's; Andrew Brandram, 1825; John Foster, 1838, afterwards Rector of Stambourne; Henry White, 1859, Chaplain-in-Ordinary to H.M. Queen Victoria, Chaplain to the Speaker of the House of Commons; George Herbert Curteis, 1890, Canon Residentiary of Lichfield; Paul William Wyatt, 1894, Assistant Chaplain of the Savoy 1885-94, Chaplain of the Order of St. John of Jerusalem in England. Further information will be found in *The Story of the Savoy*, by the Rev. William John Loftie, B.A., F.S.A., and in *The History of the Savoy Chapel*, by John E. Locking. F. G. W.

SAX, CHARLES JOSEPH, a Belgian musical-instrument maker of the first rank, born at Dinant in Belgium, Feb. 1, 1791; died in Paris, April 26, 1865. He was first a cabinet-maker, then a mechanic in a spinning-machine factory,

and then set up in Brussels as a maker of wind-instruments. He had served no apprenticeship to the trade, and his only qualification was that he could play the serpent; he was therefore obliged to investigate for himself the laws concerning the bore of instruments; but as he had great manual dexterity, and a turn for invention, he was soon able to produce serpents and flutes of fair quality. He quickly attracted notice by his clarinets and bassoons, which gained him a medal at the Industrial Exhibition of 1820, and the title of musical-instrument maker to the court of the Netherlands, which also encouraged him by advancing him capital. In 1822 he began to make all kinds of wind-instruments, brass and wood, and in 1824 invented an 'omnitonic horn,' which he continued to perfect till 1846. This instrument can be adjusted to any key by means of a piston sliding backwards or forwards on a graduated scale of about half an inch long, which sets the body of the instrument in communication with tubes of different lengths corresponding to all the major keys. On a separate elbow is a movable register which the player fixes opposite the number of the key he wishes to use, and the tube of that key being at once brought into position, the instrument is played exactly like an ordinary horn. Sax also invented brass instruments producing every note in the scale, without crooks, pistons, or cylinders. He took out patents for a keyed harp, and a piano and a guitar on a new system, but his efforts were mainly directed to perfecting the clarinet, especially the bass clarinet, and discovering new methods of boring brass and wood wind instruments with a view to make them more exactly in tune. His exertions were crowned with success, and he obtained gratifying distinctions at the Brussels Industrial Exhibition of 1835.

Charles Sax was the father of eleven children, of whom two sons were distinguished in the same line. The eldest of these,

ANTOINE JOSEPH, known as ADOLPHE SAX, born at Dinant, Nov. 6, 1814, was brought up in his father's workshop, and as a child was remarkable for manual skill, and love of music. He entered the Brussels Conservatoire and studied the flute and clarinet,—the latter with Bender, who considered him one of his best pupils. Like his father his efforts were directed mainly to the improvement of that instrument, especially the bass clarinet, and he even designed a double-bass clarinet in B \flat . In the course of his endeavours to improve the tune of his favourite instrument he invented an entire family of brass instruments with a new quality of tone, which he called Saxophones (see below). The hope of making both fame and money led him to Paris; he arrived in 1842, and established himself in the Rue St. Georges, in small premises which he was afterwards forced to

enlarge. He had no capital beyond his brains and fingers, which he used both as a manufacturer and an artist; but he had the active support of Berlioz, Halévy, and G. Kastner, and this soon procured him money, tools, and workmen. He exhibited in the French Exhibition of 1844, and obtained a silver medal for his brass and wood wind instruments, a great stimulus to a man who looked down upon all his rivals, and aimed not only at eclipsing them, but at securing the monopoly of furnishing musical instruments to the French army. In 1845 he took out a patent for the Saxhorn, a new kind of bugle, and for a family of cylinder instruments called Saxotrombas, intermediate between the Saxhorn and the cylinder trumpet. On June 22, 1846, he registered the Saxophone, which has remained his most important discovery. A man of such inventive power naturally excited much jealousy and ill-feeling among those whose business suffered from his discoveries, but his tact and wisdom made numerous and powerful friends, among others Général de Rumigny, Aide-de-camp to Louis Philippe, and a host of newspaper writers who were perpetually trumpeting his praises. He lost no opportunity of vaunting the superiority of his instruments over those in use in the French military bands, at a special competition held between the two; and the superiority, whether deserved or not, soon resulted in a monopoly, the first effect of which was to banish from the military bands all horns, oboes, and bassoons.

The Paris Industrial Exhibition of 1849, at which Sax obtained a gold medal, brought his three families of instruments still more into notice; and he received the Council Medal at the Great Exhibition of 1851. In spite of these merited honours, he became bankrupt in 1852. He soon, however, made an arrangement with his creditors, and on recommencing business entered for the Paris Exhibition of 1855, and gained another gold medal. When the pitch was reformed in 1859 every orchestra and military band in France had to procure new wind-instruments—an enormous advantage, by which any one else in Sax's place would have made a fortune; but with all his ability and shrewdness he was not a man of business, and his affairs became more and more hopelessly involved. There was full scope for his inventive faculties under the Second Empire, and he introduced various improvements into the different piston instruments, only one of which need be specified, viz. the substitution of a single ascending piston for the group of descending ones. This principle he adapted to both conical and cylindrical instruments. He also invented instruments with seven bells and six separate pistons; instruments with rotatory bells for altering the direction of the sound, and a host of smaller improvements and experiments, all

detailed in Fétis's *Rapports de l'Exposition and Biographie Universelle*.

At the London International Exhibition of 1862, Sax exhibited cornets, saxhorns, and saxotrombas, with 3 pistons, and with 2, 3, 4, and 5 keys; and at Paris in 1867 he took the Grand Prix for specimens of all the instruments invented or improved by him. He afterwards lost his powerful patrons and declined in prosperity year after year. He was obliged to give up his vast establishment in the Rue St. Georges and to sell (Dec. 1877) his collection of musical instruments. The printed catalogue contains 467 items, and though not absolutely correct is interesting, especially for the view it gives of the numerous infringements of his patents. The typical instruments of the collection were bought by the Museum of the Paris Conservatoire, the Musée Instrumental of Brussels, and the late M. César Snoeck of Renaix, a wealthy Belgian collector. Sax died in Paris, Feb. 4, 1894.

Among the numerous works written to advertise the merits of Adolphe Sax's instruments we need only mention two—Comettant's *Histoire d'un inventeur au XIXme Siècle* (Paris, 1860, 552 pp. 8vo, with a fair likeness of Sax); and Pontécoulant's *Organographie* (Paris, 1861, 2 vols. 8vo).

ALPHONSE SAX, jun., worked with his brother for some years, and seems to have devoted his attention especially to ascending pistons. He set up for himself in the Rue d'Abbeville (No. 5 bis), but did not succeed. He published a pamphlet, *Gymnastique des poumons; la Musique instrumentale au point de vue de l'hygiène et la création des orchestres féminins* (Paris, 1865), which is merely a disguised puff. G. C.

SAXHORN (*Saxtuba, Saxotromba*). The name given to a family of brass instruments with valves, invented by Adolphe Sax.

'No one can be ignorant,' say the editors of the Method for Saxhorn and Saxo-tromba, 'of the deplorable state in which brass instruments were when M. Sax's method made its appearance. No coherence, no unity between the individual members of the group; in one case keys, in another valves; a small compass, an imperfect scale, lack of accurate intonation throughout, bad quality of tone, variations of fingering requiring fresh study in passing from one instrument to another. The keyed bugle, built on false proportions, offered no prospect of improvement; the mechanism of the valves themselves, by their abrupt angles, deteriorated the quality of tone; and the absence of intermediate instruments caused gaps in the general scale, and at times false combinations.'

Sax's first advice to players exhibits the power of his new instruments—that namely of playing in every key without using 'crooks,' as in the French-horn and Trumpet. [See HORN.] He also attacked the problem of true

intonation in valve instruments, by means of what he terms a compensator. Besides these improvements he planned all the tubes and mechanism on a far sounder acoustical basis than had been attempted in the fortuitous and disconnected contrivances of former periods. The valve or piston was indeed known, but was open to the objection stated above, and was at best but a clumsy machine. He unquestionably simplified it by causing fewer turns and corners to interfere with the free course of the vibrating column of air. It is to be noted, however, that all the instruments of the Sax family, like the ordinary cornet-à-pistons, utilise the harmonic octave below that in which the trumpet and French horn speak, and thus obtain power and facility somewhat at the expense of quality.

[Sax did not aim at designing or improving instruments of the trumpet and horn qualities only, but rather at adapting improved valves systematically to brass instruments of the bugle type ranging in pitch from soprano to contrabass, the lower pitched members of the family being substitutes for the imperfect serpents, ophicleides, and other bass horns then in use. The power and facility of tone production of the instruments known as Saxhorns, whether made by Sax, or by other makers who have followed up his ideas, should therefore be compared with that obtainable on these keyed instruments, rather than with the quality of French horns and trumpets. The cornet is an instrument standing by itself, as a hybrid between the trumpet and the flügel horn, and its analogy with Saxhorns, as now understood, cannot be pushed beyond the fact that the free use of the second octave in the harmonic series is common to it and to them.]

The valve system of the Saxhorn is arranged in such manner that the depression of the second valve flattens the pitch a semitone, the depression of the first valve flattens it a tone, and the third valve a tone and a half. Whatever the normal pitch of the instrument, the second note of the harmonic series is written as middle *c* when the treble clef is used, but when the bass clef is employed the notes are written as sounded. The harmonic scale obtained from the unaltered length of the instrument is supplemented when three valves are used singly and in combination, by six other similar scales, and by this means a complete chromatic scale can be produced.

It will be observed, on comparing the notes on the first and last groups of the scheme, that there is a gap between the open pedal C (No. 1) and the G \flat above it, produced by the combined use of the 1st, 2nd, and 3rd valves, but this is of no practical consequence on the alto, tenor, and baritone instruments, as the quality of the extreme low notes is poor. With the basses (sophoniums and tubas), however, the case is

SCHEME OF FINGERING FOR THE SAXHORN

OPEN NOTES.	VALVE NOTES.		
	2nd valve.	1st valve.	3rd valve, or 1st and 2nd.
VALVE NOTES—continued.			
2nd and 3rd valves.	1st and 3rd valves.	1st, 2nd, and 3rd valves.	

different, as the notes of the pedal octave are required, and to obtain them, a fourth valve, altering the pitch two and half tones, is usually employed. (For explanation of certain inac-

The B \flat Baritone Saxhorn or Althorn.

curacies due to the use of valves in combination see VALVE.)

The range of compass of the Saxhorn family is fully five octaves, the upper limit being approximately that of the soprano voice, and the lower descending an octave lower than the bass voice. Sir Edward Elgar in his 'Cockaigne' Overture has a descending passage for the tuba going to D \flat . Although the basses can take three octaves without difficulty, the average easy compass of the other instruments is about two octaves or a little less.

The saxhorns chiefly used are the following:—

- E \flat Soprano Flügel Horn.
- B \flat Alto Flügel Horn.
- E \flat Tenor or Althorn.
- B \flat Baritone or Althorn.
- B \flat Bass or Euphonium.
- E \flat Bass Tuba or Bombardon.
- B \flat Contrabass.

but the instruments are sometimes pitched in F instead of E \flat and in C instead of B \flat when required for use in the orchestra. As stated above, the second note in the harmonic series is written as middle C when the treble clef is used, the actual pitch of the note for each of the instruments named being as here shown:—

As sounded.

As written.	E \flat Soprano.	B \flat Alto.	E \flat Tenor.	{ E \flat Baritone. E \flat Euphonium.	E \flat Bombardon.	E \flat Contrabass.
-------------	--------------------	-----------------	------------------	---	----------------------	-----------------------

In every case, however, the note written as middle C is known as the 'low C' of the instrument, the octave below is the 'pedal C,' and the octave above, or No. 4 in the harmonic series, is known as 'middle C.' 'Top C' or No. 8 in the harmonic series is rarely passed.]

There can be no doubt that the inventor of the Saxhorn added greatly to the compass, richness, and flexibility of the military brass and reed bands. But it is a question whether the tone of these powerful auxiliaries blends so well with the stringed instruments as that of the trumpet, French horn, and trombone—and hence their comparative neglect.

[It is to open-air music that we must look to understand the change that has been brought about by the introduction of the saxhorns. Granting that with the exception of the bass

tubas, nothing distinctive has been added to the orchestra by them, it yet remains that popular music has been revolutionised, for military bands have been reorganised, and the brass bands which are so largely instrumental in introducing good music to the masses, have become possible.] W. H. S.; with additions in square brackets, by D. J. B.

SAXOPHONE. [An instrument invented by Adolphe Sax about 1840, introduced officially into the French army bands, July 31,

1845, and registered by Sax, June 22, 1846.] It consists essentially of a conical brass tube furnished with about twenty lateral orifices covered by keys, and with six studs or finger-plates for the first three fingers of either hand, and is played by means of a mouthpiece and single reed of the clarinet kind. [In addition to lateral holes giving the scale, two small holes opened by keys, and known as 'pipes' or 'speakers,' are also provided, and are used for the production of the octaves. The saxophones generally in use are the soprano in *b*, the alto in *e*, the tenor in *B*, the baritone in *E*, and the bass in *B*. A sopranino in *e* is sometimes made, and *c* and *f* are occasionally used for the pitch notes instead of *b* and *e* respectively.] Those most used are the alto and tenor varieties. In French military bands, however, five or more are in use; having to a great degree superseded the more difficult but more flexible clarinet, and having quite replaced the bassoon.

[The compass of the saxophone as generally recognised is from *b* to *f*, but all the members of the family are frequently made with an extension of the bell for *b*, which note is obtained by the closing of an extra open-standing key. The two highest keys, giving *e* and *f*, are, however, seldom fitted to any but the alto and tenor instruments. The key-system for the right hand is similar to that of the Boehm flute, but for the left hand approaches more nearly to that of the ordinary oboe. The fundamental sounds from *b* or *b* to *c* are obtained by the successive opening of the lateral holes, and by means of the two octave or 'pipe' keys the compass is carried up from *d* to *c*. The four highest notes, *a*, *e*, *e*, and *f*, are produced by four keys on the upper part of the instrument, used exclusively for these notes. Since its introduction, many improved or alternative fingerings have been designed for and adopted on the saxophone, but a description of these would unduly extend this article.]

The saxophone, though inferior in compass, quality, and power of articulation to the clarinet, and basset-horn, and especially to the bassoon, has great value in military combinations. It reproduces on a magnified scale something of the violoncello quality, and gives great sustaining power to the full chorus of brass instruments, by introducing a mass of harmonic overtones wanting in Sax's other contrivance. [The tone of the soprano saxophone is somewhat strident, but the general quality of all combines the 'vocal' and the 'string' characteristics, and undoubtedly bridges over the gap between the older established 'reed' instruments and the 'brass.'

In the orchestra the saxophone has not as yet been much employed. It was first introduced, in 1844, by M. Kastner in 'Le dernier Roi de Juda,' and subsequently by Meyerbeer, Ambroise Thomas, and others. Among recent examples of its use may be mentioned Cowen's 'Thorgim,' Strauss's 'Domestic Symphony,' and a quartet for saxophones in 'Les Hommages,' by Mr. Joseph Holbrooke.] W. H. S.; additions by D. J. B.

The Eb Alto Saxophone.

SCALA, LA. The proprietors of the Ducal Theatre of Milan, which was burnt in 1776, obtained, by a decree of

July 15, 1776, from the Empress Maria Theresa of Austria, leave to build a new opera-house on the site of the church of S. Maria della Scala. The celebrated architect, Piermarini of Foligno, made the designs, and it was inaugurated August 3, 1778. The building was not only the grandest theatre then existing in Europe, but the most artistically beautiful and complete. Levati and Reina painted the ceiling, the boxes, and the great hall, or *ridotto*; and the curtain, representing Parnassus, was the work of Riccardi. The cost of the whole amounted to one million lire (£40,000), an enormous sum for that time. Until 1857 the principal entrance of La Scala was from a by-street, but since that date it opens on to a large and beautiful piazza.

The interior of the house is in the horseshoe form, with five tiers of boxes and a gallery above them, all in white, relieved by gilded

ornaments. The lowest three tiers have each thirty-six boxes, and a royal box above the entrance to the stalls. The fourth and fifth tiers have each thirty-nine boxes, and there are four on each side of the proscenium, making a total of 194 boxes, besides the large royal box and the gallery, each box having a private room at its back for the convenience of its occupants.

The length of the whole building is 330 ft., and its width 122 ft. The height from the floor to the ceiling is 65 ft. The stage, with the proscenium, is 145 ft. long and 54 wide between the columns of the proscenium, but is 98 ft. wide farther behind. The ridotto, a large hall for promenading between the acts, is 82 ft. long and 30 ft. wide. The total capacity of the house is 3600. This immense institution permanently employs 922 persons on its staff, distributed in the following way:—Artist-singers, 20; orchestra, 100; band, 28; choristers, 110; 'comparsa', 120; ballet, 140; dressmakers and tailors, 150; doctors, 6; servants, 36, etc.

The gentlemen who provided the funds for the building of La Scala enjoy the use of its boxes at a nominal rental whenever the theatre is open, each box having its owner. In all other respects the theatre has been the property of the town of Milan since 1872. The municipality grants to its lessee an annual sum of £9800, and the owners of the boxes pay £2920; and thus La Scala enjoys an endowment of £12,720 a year. The theatre is controlled by a Commission elected by the Common Council of Milan and the owners of its boxes.

Annexed to the theatre is a celebrated dancing school, with sixty pupils, where the most famous ballet-dancers have been trained, and a singing school for about fifty choristers. Two charitable institutions—I *Filarmonici*, founded by Marchesi in 1783, and the *Teatrale*, by Modrone in 1829—are also dependent for their income upon the greatest theatre of Italy.

The latest restoration of the theatre took place in 1878. Its archives have been most carefully preserved. Further information may be obtained from the *Teatro alla Scala 1778-1862*, by Luigi Romani (Milan, 1862); the *Reali Teatri di Milano*, by Cambiasi (Ricordi, Milan, 1881); and *La Scala de Milan*, by Henri de Curzon (*Le Guide Musical*, 1906, pp. 538-40). L. R.

SCALCHI, SOFIA, was born Nov. 29, 1850, at Turin; received instruction in singing from Augusta Boccabadati, and made her début at Mantua in 1866 as Ulrica in 'Un Ballo in Maschera.' She afterwards sang at Verona, Bologna, Faenza, Nice, etc., and in England for the first time Sept. 16, 1868, at the Promenade Concerts, Agricultural Hall, with very great success. At the Royal Italian Opera, Covent Garden, she first appeared Nov. 5, of the same year, as Azucena, and after that as Pier-

rotto ('Linda'), Urbano, Un Caprajo ('Dinorah'), etc. She sang there every year till 1890 inclusive. Her voice was of fine quality in compass, two octaves and a half from low F to B in alt, enabling her to take both the mezzo-soprano and contralto parts in a great number of operas. In Sept. 1875 she married Signor Lolli, a gentleman of Ferrara. Among her répertoire may be named Leonora ('Favorita'), which she played July 19, 1871, at Mario's farewell appearance; Estelle in Campana's 'Esmeralda,' June 14, 1870; Leonora in Cimarosa's 'Le Astuzie femminili,' July 15, 1871; Meala in Massé's 'Paul et Virginie,' June 1, 1878; Mrs. Page, July 14, 1877, and Fidès, June 24, 1878, on the respective revivals of Nicolai's 'Lustige Weiber,' and of 'Le Prophète'; also Arsace, Amneris, Maffeo Orsini, Siebel, etc. One of her most successful impersonations was Wania in Glinka's 'Vie pour le Czar.' She has had frequent engagements in Italy, St. Petersburg, Moscow, Vienna, North and South America, etc. A. C.

SCALE (from the Latin *Scala*, a staircase or ladder; Fr. *Gamme*; Ger. *Tonleiter*, i.e. sound-ladder; Ital. *Scala*), a term denoting the series of sounds used in musical compositions.

The number of musical sounds pronounceable, all differing in pitch, is theoretically infinite, and is practically very large; so that in a single octave a sensitive ear may distinguish 50 to 100 different notes. But if we were to take a number of these at random, or if we were to slide by a continuous transition from one sound to another considerably distant from it, we should not make what we call music. In order to do this we must use only a certain small number of sounds, forming a determinate series, and differing from each other by well-defined steps or degrees. Such a series or succession of sounds is called a *scale*, from its analogy with the steps of a ladder.

It is unnecessary here to enter into the æsthetical reason for this;¹ it must suffice to state that all nations, at all times, who have made music, have agreed in adopting such a selection, although they have not always selected the same series of sounds. As a first step towards the selection all musical peoples appear to have appreciated the intimate natural relation between sounds which lie at that distance apart called an *octave*; and hence replicates of notes in octaves are found to form parts of all musical scales. The differences lie in the intermediate steps, or the various ways in which the main interval of the octave has been substituted.

For modern European music, in ascending from any note to its octave above, we employ, normally, a series of seven steps of unequal height, called the *diatonic* scale, with the power of interposing, accidentally, certain intermediate

¹ More complete information on the subject generally may be found in Helmholtz's *Tonempfindungen*, or in *The Philosophy of Music*, by W. Foote (London, 1879).

chromatic steps in addition. The diatonic scale is of Greek origin, having been introduced about the middle of the 6th century B.C. The main divisions of the octave were at the intervals called the fifth and the fourth, and the subdivisions were formed by means of two smaller divisions called a *tone* and a *hemitone* respectively. The tone was equal to the distance between the fourth and the fifth, and the hemitone was equal to a fourth *minus* two tones. The octave was made up of five tones and two hemitones, and the entire Greek diatonic scale of two octaves, as settled by Pythagoras, may be accurately represented in modern notation as follows:—

The Greek Diatonic Scale.

Thus the essence of the diatonic scale was that it consisted of *tones*, in groups of two and three alternately, each group being separated by a *hemitone* from the adjoining one; and, combining consecutive intervals, any two tones with a hemitone would form a *fourth*, any three tones with a hemitone would form a *fifth*, and any complete cycle of five tones with two hemitones, would form a perfect *octave*.

Now it is obvious that in this series of notes, proved to be in use above two thousand years ago, we have essentially our diatonic scale; the series corresponding in fact with the natural or white keys of our modern organ or pianoforte. And as this series formed the basis of the melodies of the Greeks, so it forms the basis of the tunes of the present day.

Although, however, the general aspect of the diatonic series of musical sounds remains unaltered, it has been considerably affected in its mode of application by two modern elements—namely, *Tonality* and *Harmony*.

First, a glance at the Greek scale will show that there are seven different diatonic ways in which an octave may be divided; thus, from A to the A above will exhibit one way, from B to B another, from C to C a third, and so on—keeping to the white keys alone in each case; and all these various ‘forms of the octave’ as they were called, were understood and used in the Greek music, and formed different ‘modes.’ In modern times we adopt only two—one corresponding with C to C, which we call the *Major* mode, the other corresponding with A to A, which we call the *Minor* mode. And in each case we attach great importance to the notes forming the extremities of the octave series, either of which we call the *Tonic* or *Keynote*. We have, therefore, in modern music, the two following ‘forms of the octave’ in

common use. And we may substitute for the Greek word ‘hemitone’ the modern term ‘semitone,’ which means the same thing.

Intervals of the Diatonic Scale for the Major Mode.

Intervals of the Diatonic Scale for the Minor Mode.

Although these differ materially from each other, it will be seen that the original Greek diatonic form of the series is in each perfectly preserved. It must be explained that the minor scale is given, under particular circumstances, certain accidental variations [see below], but these are of a chromatic nature; the normal minor diatonic form is as here shown. The choice of particular forms of the octave, and the more prominent character given to their limiting notes, constitute the important feature of modern music called *Tonality*.

Secondly, a certain influence has been exercised on the diatonic scale by modern Harmony. When it became the practice to sound several notes of the scale simultaneously, it was found that some of the intervals of the Greek series did not adapt themselves well to the combination. This was particularly the case with the interval of the major third, C to E: according to the Greek system this consisted of two tones, but the perfect harmonious relation required it to be a little flatter. The correction was effected in a very simple manner by making a slight variation in the value of one of the tones, which necessitated also a slight alteration in the value of the semitone. Other small errors have been corrected in a similar way, so as to make the whole conform to the principle, *that every note of the scale must have, as far as possible, concordant harmonious relations to other notes; and in determining these, the relations to the tonic or keynote are the more important.*

The diatonic series, as thus corrected, is as follows:—

Major Diatonic Scale as corrected for Modern Harmony.

The several intervals, reckoned upwards from the lower keynote, are—

- C to D, Major tone,
- „ E, Major third,
- „ F, Perfect Fourth,

C to G, Perfect Fifth,
 „ A, Major sixth,
 „ B, Major seventh,
 „ C, Octave.

It has been stated, however, that for modern European music we have the power of adding, to the seven sounds of the diatonic scale, certain other intermediate *chromatic* notes. Thus between C and D we may add two notes called C \sharp and D \flat . Between G and A we may add G \sharp and A \flat , and so on. In order to determine what the exact pitch of these notes should be, it is necessary to consider that they may be used for two quite distinct purposes, *i.e.* either to embellish melody without change of key, or to introduce new diatonic scales by modulation. In the former case the pitch of the chromatic notes is indeterminate, and depends on the taste of the performer; but for the second use it is obvious that the new note must be given its correct harmonic position according to the scale it belongs to: in fact it loses its chromatic character, and becomes strictly diatonic. For example, if an F \sharp be introduced, determining the new diatonic scale of G, it must be a true major third above D, in the same way that in the scale of C, B is a major third above G. In this manner any other chromatic notes may be located, always adhering to the same general principle that they must bear concordant harmonic relations to other notes in the diatonic scale of which they form part.

Proceeding in this way we should obtain a number of chromatic notes forming a considerable addition to the diatonic scale. For example, in order to provide for eleven keys, all in common use, we should get ten chromatic notes in addition to the seven diatonic ones, making seventeen in all, within the compass of a single octave. This multiplication of notes would produce such a troublesome complication in practical music, that in order to get rid of it there has been adopted an ingenious process of *compromising*, which simplifies enormously the construction of the scale, particularly in its chromatic parts. In the first place it is found that the distance between the diatonic notes E and F, and between B and C is *nearly* half that between C and D, or G and A; and secondly, it is known that the adjacent chromatic notes C \sharp and D \flat , G \sharp and A \flat , etc., are not very different from each other. Putting all these things together, it follows that if the octave be divided into *twelve equal parts*, a set of notes will be produced not much differing in pitch from the true ones, and with the property of being *applicable to all keys alike*. Hence has arisen the modern chromatic scale, according to what is called *equal temperament*, and as represented on the key-board of the ordinary pianoforte. According to this, the musical scale consists of twelve *semi-*

tones, each equal to a twelfth part of an octave; two of these are taken for the *tone* of the diatonic scale, being a very little less in value than the original major tone of the Greek divisions.

This duodecimal division of the octave was known to the Greeks, but its modern revival, which dates about the 16th century, has been one of the happiest and most ingenious simplifications ever known in the history of music, and has had the effect of advancing the art to an incalculable extent. Its defect is that certain harmonic combinations produced by its notes are slightly imperfect, and lose the satisfactory effect produced by harmonies perfectly in tune. The nature and extent of this defect, and the means adopted to remedy it, will be more properly explained under the article *TEMPERAMENT*, which see.

Minor Scale.—It is a peculiarity of the minor scale adopted in modern music, that its form is frequently varied by accidental chromatic alterations, to satisfy what are assumed to be the requirements of the ear; and as these alterations most commonly take place in ascending passages, it is usual, in elementary works, to give different forms of the minor scale, for ascending and descending.

For example, the normal form of the scale of A minor is

and in descending, as here shown, the progressions seem natural and proper.

But if the motion take place in the reverse direction, thus:—

No. 1.

it is said that the succession of the upper notes in approaching the key note A, do not give the idea which ought to correspond to our modern tonality. It is argued that the penultimate note, or seventh, being the *leading* or *sensible* note of the key, ought to be only a semitone distant from it, as is customary in all well-defined keys; and that, in fact, unless this is done, the tonality is not properly determined. This reason has led to the accidental sharpening of the seventh in ascending, thus:—

No. 2.

But here there is another thing objected to; namely, the wide interval of three semitones (an augmented second) between the sixth and the seventh, F \sharp and G \sharp , which it is said is abrupt and unnatural, and this has led to the sharpening of the sixth also, thus—

No. 3.

to make the progression more smooth and regular. This is the succession of notes usually given as the *ascending minor scale*, which with the descending scale without accidentals is usually called the *melodic form* of the minor scale.

The first alteration—namely, the sharpening of the leading note—is no doubt required if the perfect modern tonality is to be preserved, for no doubt an ascending passage, thus—

would give rather the impression of the key of C or of F than that of A.

But the necessity for sharpening the *sixth* is by no means so obvious; it may no doubt be smoother, but the interval of the augmented second is one so familiar in modern music, as to form no imperative reason for the change. Hence the form marked No. 2 is very commonly used, both for ascending and descending. It is called the *harmonic form* of the minor scale.

W. P.

SCANDELLO, SCANDELLIUS, or SCANDELLI, ANTONIO, was born at Brescia in 1517. In 1553 he was already resident in Dresden and a member of the Hofcapelle, but he often returned to visit his native place; in 1567, on account of the plague, he and his family left Dresden and spent four months there. In 1555 six Italians are mentioned as being members of the Dresden Hofcapelle: 'weische Instrumentisten in der Musica,' among them Antonius Scandellus, his brother Angelus Scandellus, and Benedict Tola, the painter, whose daughter Agnes became Scandello's second wife in June 1568 (*Monatshefte*, 1877, p. 255). The Italians, receiving higher pay than the Germans, were even then arousing feelings of jealousy, which later, as their numbers increased, and German music was pushed more and more into the background, resulted in open quarrels and opposition. Their influence was to prove powerful enough to oust a German capellmeister from his post, although as is pathetically stated of Mathias Weckmann, the organist in question, he had learnt Italian 'mit Fleiss,' and was at first on a friendly footing with the foreign musicians (Fürstenau, *Zur Geschichte*, i. 26). In 1555 Scandello, with 250 fl. 16 grs. 9 pf. a year, was receiving a larger salary than the capellmeister, Matthias Le Maistre, who had only 204 fl. 7 grs. 9 pf. It is also curious to note that the Italian players were paid on a higher scale than singers from the Netherlands, the highest salary to the latter only amounting to 120 fl. (Fürstenau, *Archiv für die sächs. Ge-*

schichte, iv. 1866). It is true that the player was expected to show facility on a large variety of instruments; Scandello himself was a noted zinke or cornetto player, besides being already a composer of some repute.

In 1566 Scandello became assistant capellmeister to the ageing Le Maistre, and on his retirement was appointed capellmeister, Feb. 12, 1568, when his salary altogether amounted to 400 fl. a year, a large sum for those days. A letter addressed to the capellmeister on Jan. 13, 1579, gives leave to his brother Angelo to go to Venice for three months, to collect some debts. He retained his post until his death in Dresden on Jan. 18, 1580, at the age of sixty-three. One of his sons, August, was also a member of the Dresden Hofcapelle.

Three motets for six voices, dated 1551, in a manuscript in the Dresden Library, are probably Scandello's earliest compositions. Next comes the mass for six voices, in commemoration of the death of the Elector Moritz of Saxony, July 9, 1553, at the battle of Sievershausen. In the 'Inventarium' of the capelle music drawn up by the Dresden capellmeister, Johann Walther, Oct. 16, 1554, for the use of his successor, Matthias Le Maistre, this mass is mentioned as being in six little printed part-books: 'VI kleine gedruckte Partes in pergament, darinnen das Epitaphium Electoris Mauricii Antonii Scandelli' (W. Schäfer, *Sachsen-Chronik*, 1853, p. 320). At the present time only a manuscript copy of it is known, made in Torgau, in 1562, by one Moritz Bauerbach of Pirna, tenorist in the Dresden capelle; very possibly it was owing to the suggestion of Johann Walther, then living in retirement at Torgau, that Bauerbach wrote it. The manuscript was formerly in the Pirna Stadt-Bibliothek, but is now in the Dresden Royal Library. A large part of the mass was scored by Otto Kade and published in Ambros's *Geschichte der Musik*, 1889, vol. v.

Especial mention must be made of the Passion-music and the story of the Resurrection, which were in all probability composed before 1561 (see O. Kade, *Die ältere Passionskomposition*, 1893, p. 191, a reprint of the Passion-music, pp. 306-44). Scandello some years later refers to them in a document dated July 15, 1573, they were therefore in existence some fifty years before Heinrich Schütz's great works were published, his 'Auferstehung' in 1623, and his 'Passionen nach Johannis' not until 1664. A manuscript copy of Scandello's work, dated 1593, formerly at Grimma, now in the Dresden Royal Library, is entitled, 'Passio et Resurrectio Domini nostri Jesu Christi ab Antonio Scandello compositae,' the scribe was Johann Gengenbach of Colditz. It only gives the tenor part of the choruses; the music is otherwise complete. The manuscript of the tenor part-book now in the same library, but formerly

at Löbau, contains the 'Johannispassion' and the 'Auferstehungsgeschichte,' without mention of the composer's name. Another Löbau manuscript contains a complete copy of the 'Auferstehung'; this part of the composition was the first to appear in print. It was published by Samuel Besler at Breslau, 1612, with the title, 'Gaudii paschalis Jesu Christi rediivi in Gloriosissimae Resurrectionis ejus laetam celebrationem. Relatio historia à quatuor Evangelistis consignata, etc., durch Samuelem Beslerum, etc.'

Besler alludes in the preface to the composer, Antonius Scandellus, 'der berühmte musicus.' It was again published in an adapted form by O. S. Harnisch in 1621. In the same year Besler published the Passion-music; 'Ant. Scandelli . . . Passio, Das Leyden unsers Herrn Jesu Christi nach dem H. Evangelisten Johanne. Durch S. B. mit der Chorstimme vermehrt,' Breslau, 1621. It is from this edition that the chorus parts, missing in the manuscripts, have been filled in. The Passion opens with the words in four-part writing, 'Das Leyden unsers Herrn Jesu Christi wie das der heilige Evangelist Johannes beschreibet.' Throughout, each individual character is represented by a duo, trio, or quartet, with the exception of the Evangelist, who is given the traditional recitative. The words of Christ are invariably set as a solo quartet, those of Peter as a trio, and so on. The concluding chorus and the short, quick outcries of the people are all in five-part writing; possibly the opening chorus should be the same. There is no accompaniment. Schütz also followed this method of dividing the voices, with the addition of a four-part string accompaniment to the recitative, but here all similarity between the two works ceases, for whereas Schütz's music shows an emotional impulse which eventually affected profoundly the devotional rendering of church music, Scandello's retains the clear, fresh simplicity of the olden time with an added wealth of sound which marks a great distinction between it and Joh. Walther's Passion-music; it should be studied as a link in the chain of historical development of the Passion-music. An interesting comparison of the Schütz and Scandello works will be found in *Monatshefte für Musikgeschichte*, 1882, p. 37, where also the identity of the anonymous 'Auferstehung' published by Vopelius in the *Neu Leipziger Gesangbuch*, 1682, pp. 311-65 (reprinted by Riegel and Schöberlein, *Kirchliche Chorgesänge*, 1868, ii. pp. 619-47) with that of Scandello's is pointed out. Scandello was the first composer to set the story of the Resurrection to music, and he followed very closely the lines laid down in his Passion-music.

As to his other compositions, it may be noted that although his Italian madrigals, published 1566 and 1577, are purely vocal works with no accompaniment, the German Lieder, both sacred and secular, published 1568, 1570, and

1575, may be sung to an instrumental accompaniment. Examples are given in Ambros's *Geschichte der Musik*, v., 'Bonzorno, madonna,' for four voices; 'Der Wein der schmeckt mir,' for six voices; and 'Nu komm der Heiden Heiland' for five voices.

List of published works:—

Missae sex vocum super Epitaphium Mauricii Ducis et Electoris Saxoniae ab Antonio Scandello. Italo, composita, 1553. Walther (1732) states that it was published at Nuremberg, by Georg Fabricius, in 1588.

El primo libro de le canzoni napoletane a IIII voci, composti per Messer Antonio Scandello musico del illus. et eccel. sig. Duca Augusto Elettor di Sassonia. Novamente datti in luce. Noribergae excudantur Viricus Neuberus et Th. Gerlatzen, 1566, obl. 4to. Four part-books. The dedication to the Elector August is dated from Augsburg. Contains twenty-four canzoni. Later editions were issued at Nuremberg in 1572 and 1583.

Melodia Epithalamii in honorem . . . Martini Henrici et filiae Barbarae viri Joh. Schüldbergii . . . sex vocum. Witbergae, 1568. Epithalamium in honorem . . . Nicolai Leopoldi, symphoniarum puerorum illustrissimi ac serenissimi principis Georgii Frederici, marchionis Brandenburgensis . . . praepceptoris, et pudicissimae virginis ac sponsae Kunigundae . . . composita per Ant. Scandellum, Mattheum Le Malstre, etc. Noribergae apud Th. Gerlatzenum, 1568. Text: Beati omnes qui timent; in two movements, for six voices.

Neue Teutsche Liedlein mit vier und fünf Stimmen, welche ganz lieblich zu singen, und auff allerley Instrumenten zugebrauchen. Durch Antonium Scandellum, Churfürstlicher G. zu Sachsen Capellmeister verfertigt. Gedruckt in Nürnberg, durch Dietrich Gerlatz, inn Joham von Bergs seligen Druckerey, 1568, obl. 4to. Four part-books, containing twelve sacred songs. Includes the well-known chorale 'Lobet den Herrn,' which took a permanent place in church-song, and was reprinted in Joachim Magdeburg's *Christliche Kirchen-Gesänge*, Erfurt, 1571; the Dresden *Gesangbuch*, 1593; J. C. Kühnau's *Vierstimmige alte u. neue Chorgesänge*, 1790, II. p. 140; Lützel's *Kirchliche Chorgesänge*, 1841, No. 11; and with the song 'Allein zu dir' for six voices, in Wintarius's *Evangelische Chorgesänge*, 1843, Nos. 38 and 39.

Neue und lustige weltliche Deutsche Liedlein mit vier, fünf, und sechs Stimmen, auf allerley Instrumenten zugebrauchen, und lieblich zu singen. Durch Ant. Scandellum, etc. von ihm selbst corrigirt, und in Druck vorfertiget. Gedruckt zu Dresden durch Matthes Stöckel und Gmel Bergen, 1570, obl. 4to. Five part-books, containing twenty songs. A later edition of 1578 had the title-page as above with the exception of the tenor part-book, dated a year later, as follows: *Schöne, weltliche und geistliche, neue, deutsche Liedlein mit vier, fünf und sechs Stimmen*, 1579.

Epithalamium in honorem . . . Christophori Waltheri, illustris Electoris Saxoniae organistae insignis, prudentis, viri Joannis Waltheri, consulis Dresdensis, ac factoris musicae singularis . . . filii, et honestissimae foeminae Catharinae Tolae, sponsae ipsius, Benedicti Tolae, musici et pictoris . . . relictae Tolae. Compositum sex vocibus ab illus. Electoris Saxoniae . . . musici chori magistro, Antonio Scandello, 1574, 4to. Six part-books.

Neue schöne ausserlesene Geistliche Deutsche Lieder, mit fünf und sechs Stimmen, ganz lieblich zu singen, und auff allerley Instrumenten zugebrauchen, sampt einem Dialog mit acht Stimmen. Durch Ant. Scandellum, etc. componirt, such von ihm selbst corrigirt, und in Druck vorfertiget. Dresden, Gmel Bergen, 1575, obl. 4to. Contains twenty-three compositions, 'meist über ältere Kirchenmelodien.'

Missae sex, quarum priores tres quinque, posteriores vero sex vocum sunt, compositum super haec cantionum. 1. super: avec qu'on voit; 2. sur son giovenetto; 3. Ad aequales; 4. Maria Magdalena; 5. Au premier jour; 6. O pusi sparsi. Authour Ant. Scandello Electoris Saxoniae musices praefecto. Monachi, 1576.

Il secondo libro de le canzoni napoletane, a quatro et a cinque voci. Composte per Ant. Scandello, maestro de la capella del illus. et eccel. sig. Electore di Sassonia, etc. Novamente date in luce. Stampate in Monacho per Adam Beig, 1577, obl. 4to. Five part-books, containing twenty-four canzoni.

COMPOSITIONS IN OTHER PUBLICATIONS

Thesaurus musicae. Noribergae, 1564.

'Impem Ave Maria sit felix,' 'Miserere,' 'Noe, noe, exultemus,' all for eight voices, in the first volume; 'Alleluia non sere Maria' for seven voices, in the second.

Beati omnes, Psalmus 128 Davidis. . . Per Cl. Stephani Buchaviensem. Noribergae, 1568. Includes Scandello's setting of the psalm for six voices (see his Epithalamium, 1568). A manuscript copy is in the Vienna Hofbibliothek, No. 15,351.

Das erste Buch . . . schöner Lautenstück . . . mit vier und fünf Stimmen. Getruckt durch Bernhard Juhn, hürger zu Straßburg, 1572. Includes 'Ich weis mir ein fest gebautes haus' for five voices, in two tablatures.

Ein neu kunstlich Tabulaturbuch . . . durch Elam Nicolaum Annorbach, hürger und Organist in Leipzig zu Sanct Thomas, Leipzig, 1575. 'Ich weis mir,' 'Den Liebsten Buhlen,' 'Gros lieb hat,' 'Kein lieb ich leid,' 'Von deinetwegen,' all for five voices, in lute tablatures.

Selecite Cantiones octo et septem vocum, etc. Argentorati, 1578. 'Noe, noe exultemus,' for eight voices.

Schöne ausserlesene . . . Teutsche Lieder XX. Durch J. Pöhlerum Schvundorffensem. München, 1585.

Mancher der spricht, for four voices.

Corollarium Cantionum sacrum . . . F. Lindneri, Noribergae, 1590. No. 22. Antonius Scandellus, 'Christus vero languens' in two movements, for five voices. On a manuscript copy in the Zwicken Library is written, 'Ultima cantio Antonii Scandelli qui 18 Januarii die vesperi hora 7, anno 80, aetatis suae 63 obijt' (Kade, *Le Metre*, p. 3). M86. are also in the Basle, Dresden, and Legnitz libraries.

Musikalischer Zeitvertreiber, das ist Allerley seitzame lecherliche Vapores und Hnuores, etc., Nürnberg, 1609. Contains songs for 4, 5, 6, 7 and 8 voices, two compositions are by Scandello.

Triumph di Dorothea . . . das ist geistliches musikalisches Triumph Cränzelein . . . durch M. Rinkhardtum. Leipzig, 1619. Contains 'Ich weis mir' for five voices.

Engelman's Quodlibetum novum latinum quinque vocum. Leipzig, 1620. Compositions by Scandello in Part I.

Canionale sacrum, das ist, Geistliche Lieder mit 3, 4, 5 oder mehr Stimmen unterschiedlicher Artorum. Gotha, 1646-48, 3 volumes. One composition by Scandello, also in the edition of 1651-55-57.

Joh. G. Ebeling's edition of P. Gerhards geistliche Andachten, 1667. With Scandello's melody to 'Lobet den Herrn.'

A. Neithardt, Sammlung religiöser Gesänge, VII. No. 11. 'Lasset die Kindlein' for five voices.

Franz Conner, Geistliche u. weltliche Lieder. 1870. Nos. 11, 12. 'Ich ruh zu dir' and 'Gelobet seist du,' both for five voices; other motets in Musica Sacra, vols. 15, 19, and 20.

Franz Willner, Chorbücher der Münchener Musikschule, 1693, Nos. 68, 69. 'Auf dich trau ich' and 'Mit Lesh hin ich,' both for four voices.

MSB. In Augsburg Library, No. 21, Lib. I. Sacrarum missarum sex vocum variorum auctorum haud vulgarium, 1595. Missa super, Maria Magdalena (Schlehterer's *Catalogue*). Basel Universitäts-Bibliothek. No. 33, Magnificat VIII. toni, in tablatura, date about 1585. (Bichter's *Catalogue*, Berlin. Königl. Bibliothek, many sacred songs in score (Eitner).

Breslau Stadtbibliothek. No. 2 (date 1573) in score, and No. 5 in separate part-books, 'Alleluia noli fere' for seven voices. No. 6 (date 1567) and No. 11 (date 1583) 'Noe, noe exultemus' for eight voices. Both in Tablatura. No. 11 and No. 14 (date about 1600). 'Eia Kindlein so lieblich' for six voices, and 'Gelobet seist du' for five voices, both from 'Nave sch. auss. geistl.' 1575.

No. 19, five part-books, nine Italian madrigals from Scandello's second book, 1577. No. 94, six folio part-books, late 16th century. Missa super: 'Ansequer voue; lo na! son giovenete; Ad aequaliter; all for five voices, and Missa super: Maria Magdalena; Au premier jour; O passi sparsi, all for six voices. The six masses published at Munich to 1875, see above. A MS. copy of the mass 'O passi sparsi' is also in the Vienna Hofbibliothek, date about 1580.

(Bohn's *Catalogue*.)

Brieg Gymnasial-Bibliothek. No. 36, six part-books, date 1592.

'Lobet den Herrn' for four voices (see 1568 publication). In Nos. 40, 51, 52, imperfect sets of part-books, 'Ach eidi Wein' for five voices; 'Schöns lied'; 'Eio canto,' and 'Be per seint' (from Lib. I. of Canzoni, 1572), all for five voices. (Kade's *Catalogue*.)

Dresden Royal Library. No. 1270. Three motets for six voices: 'Christus dicit ad Thomam' dated 1551, 'Hodie Christus natus est,' 1551, and 'Illuminare Jerusalem.' (Kade's *Catalogue*.)

Munich Royal Library. No. 34 (Mus. MS. 509) date 1602, Missa super: O passi sparsi, and Missa super: Au premier jour, both for six voices. No. 2-7 (Mus. MS. 1501) 'Ich weis mir' for five voices, and 'Ach Göt weis soll ich's' for four voices. No. 132 (Mus. MS. 1536) date 1583, an incomplete set of part-books; two magnificats, and two motets for eight voices; one motet for seven, and one for six voices. (Maler's *Catalogue*.)

Orlanna Library MS. motets written between 1593 and 1595, some for four and five voices by Scandello.

Liegnitz Ritterakademie Bibl. MS. 19, many motets by Scandello.

Pirma Stadtkirche 16th-century MS. 'Auf dich trau ich' for four voices (from 1568 work). Another MS. with 'Dies sanctifatus' for six voices.

Zwickau Ratsechbibliothek. No. 39, date about 1600, in tablatura. 'Mit Lesh hin ich' for four voices (from 'Nave und lustige Liedlein,' 1575). No. 678, date before 1580, five folio part-books 'Nun kommt der Heiden Helland' for five voices. No. 679, incomplete set of part-books, Missa super: O passi sparsi, for six voices.

No. 680, incomplete set of part-books 'Magnus Dominus' in two movements (which was included in Walther's *Inventarium* in 1554), and 'Allein zu dir,' both for six voices. (Vollhardt's *Catalogue*.)

C. S.

SCARIA, EMIL, born Sept. 18, 1840, at Graz, Styria, studied at the Conservatorium, Vienna, under Gentiluomo, made his début at Pesth as St. Bris in the 'Huguenots,' and afterwards sang at Brunn and Frankfurt. In 1862 he came to London for the purpose of further study under Garcia, and sang at the Crystal Palace, on April 5, and at a concert given later by Franz Abt, who procured him an engagement at Dessau. He next played at Leipzig (1863-65) and from 1865 to 1872 at Dresden. Among his best parts were Hercules ('Alceste'), Sarastro, Leporello, Caspar, Rocco, Landgrave ('Tannhäuser'), Pogner ('Meistersinger') Burgomaster ('Czaar und Zimmermann'), Dulcamara, Geronimo ('Il Matrimonio segreto'), and Falstaff (Nicolai), in which last a critic remarks that he made one of his greatest successes . . . when he was at Dresden, and made it in great measure by his really excellent acting of the character. From 1872 to 1886 he

was engaged at Vienna, where he established his reputation as a versatile singer and actor in both baritone and bass parts, but best in the latter, as his 'carefully deadened high notes form so great a contrast to the vigorous notes of his lower and middle register' (Hanslick). On leave of absence he sang in the principal German cities, in Italian opera in Russia, etc. He sang the part of Escamillo to the Carmen of Bertha Ehnn, Oct. 23, 1875, when Bizet's opera was first given outside France. Among his later parts were Hans Sachs ('Meistersinger') Wotan ('Nibelungen')—for which character he was originally selected by Wagner for Bayreuth, and which he sang at Her Majesty's Theatre in 1882, Micheli ('Wasserträger'), Marcel, Bertram, and (1879) Seneschal ('Jean de Paris'). Finest of all was his Gurnemanz in 'Parsifal,' which he created at Bayreuth in 1882; he sang it at the concert-performance of the work in the Albert Hall, London, in 1884. He became insane in 1886, and died on July 22 of that year at Blasewitz near Dresden. A. Neumann's *Erinnerungen an Richard Wagner*, 1907, gives many amusing stories of him. A. C.

SCARLATTI, ALESSANDRO, was born in Sicily in 1659 or possibly in 1658, as may be deduced from the statement of his age engraved on his tombstone. It has generally been assumed that his birthplace was Trapani, on the strength of an alleged autograph score of his opera 'Pompeo,' which both Fétis and Florimo professed to have seen while in the possession of Gaspare Selvaggi of Naples. Selvaggi's library was bought by the Marquis of Northampton, and presented by him in 1843 to the British Museum; but no score of 'Pompeo' is to be found there now, nor is it included in the MS. catalogue of the collection drawn up for the donor at the time. The only known score of 'Pompeo' is in the Royal Library at Brussels, and formerly belonged to Fétis; but it is not autograph, and does not bear the inscription mentioned. This inscription, by the way, is given by Fétis as 'Musica del Signor Alessandro Scarlatti da Trapani,' and by Florimo as 'Pompeo del Cav. Alessandro Scarlatti di Trapani.' Florimo's version can hardly be accepted as genuine, since 'Pompeo' appeared in 1683, while the composer did not receive the title of Cavaliere until many years later. In the records of the Arcadian Academy at Rome, Scarlatti is described as a native of Palermo, but in view of other known errors to be found in these records the evidence of this entry cannot be regarded as infallible. The official record of his birth or baptism has hitherto eluded the most careful research. The fact, however, that he was born in Sicily is proved conclusively by statements in the printed libretti of his early operas, and in MS. chronicles which record their performance, and speak of the composer as a Sicilian. Of his parentage nothing is known, and it seems not improb-

ALESSANDRO SCARLATTI

able that he came of a Tuscan stock, the name Scarlatti being Tuscan and not Sicilian. He must in any case have left the island at an early age; he is traditionally supposed to have been a pupil of Carissimi in Rome, although that master died when Scarlatti was fifteen years old. His early compositions show the influence of Legrenzi, and more especially of Stradella, whose best work has recently been shown to have been done in Rome; and his early chamber-cantatas, of which some are probably earlier in date than even his first operas, are generally to be found in MS. alongside of similar music by composers who worked in Rome and northern Italy.

His first known opera was 'L'Errore Innocente ovvero Gli Equivoci nel Sembante,' produced Feb. 8, 1679, in Rome at the Collegio Clementino. This work won him the interest of Christina Queen of Sweden, who even asserted her protection of him in defiance of the Papal representatives, Scarlatti being in bad odour at the Vatican on account of the misconduct of his sister with an ecclesiastic. In the libretto of his second opera, 'L'Honestà negli Amori' (1680), he is described as Maestro di Cappella to Queen Christina. Both these operas are on a small scale; 'Pompeo' (Rome, 1683) was probably his first attempt at *opera seria* in the grand manner. In February 1684 'Pompeo' was given at Naples, where 'Gli Equivoci' had also been heard, and on the 17th of the same month he was appointed Maestro di Cappella to the Viceroy, his brother Francesco receiving a post as violinist in the same chapel royal. The two brothers owed their appointments to the influence of their sister, Anna Maria, an opera-singer, who was the mistress of a court official; and the affair seems to have caused some indignation at Naples, not so much on grounds of morality as from motives of chauvinism. That Scarlatti was regarded as a stranger in Naples seems a sufficient proof that he did not receive his musical education there, as Neapolitan historians of music have tried to maintain. About this time Scarlatti married one Antonia Anzalone, by whom he had three and possibly more children, of whom the eldest, born Oct. 26, 1685, was Giuseppe Domenico, later famous as a composer for the harpsichord. From this time to 1702 he remained at Naples, occupied principally in the composition of operas for production at the royal palace or at the royal theatre of San Bartolomeo. He was also much in demand as a composer of music for aristocratic entertainments, and soon fell into a popular and hasty style of work. His chamber music, however, shows that even at this time his artistic ideals were much higher, and by 1702 Naples had become so irksome to him, both for musical and financial reasons, that he determined to try his fortunes elsewhere. His salary was in arrear, and the political disturbances consequent on the war of the Spanish Succession rendered his

position still more insecure. On June 14 he went with Domenico to Florence, where they enjoyed the patronage of Ferdinand III., son of the Grand Duke of Tuscany, a prince who was enthusiastically devoted to music. For his private theatre at Pratolino Scarlatti composed several operas, and the Archivio Mediceo at Florence contains a very interesting correspondence between the prince and the musician on the subject of these works. Ferdinand, however, was not disposed to offer him any permanent post, and Scarlatti being resolved not to return to Naples accepted the humble position of assistant Maestro di Cappella at the church of S. Maria Maggiore in Rome. This was obtained for him by Cardinal Pietro Ottoboni, who had taken an interest in him for some twelve years or more, and who also made him his private Maestro di Cappella. Nevertheless, Scarlatti seems to have been no happier in Rome than in Naples, judging from the contempt for both places which he expresses in his letters to Ferdinand. He had been forced to write down to the level of a Spanish viceroy's taste for the opera-house at Naples; at Rome the Popes had done their best to suppress opera altogether on grounds of public morality. This must, no doubt, have been a severe blow to Scarlatti, whose real genius sought expression in dramatic music, although it found vent in chamber-music when its natural outlet was obstructed.

On April 26, 1706, Scarlatti was admitted a member of the Arcadian Academy, under the name of *Terpandro Politeio*, Corelli and Pasquini being elected at the same time. Crescimbeni (*Arcadia*, Lib. vii. Prosa v.) gives a charming account of their musical performances at these pastoral assemblies. To this period of Scarlatti's activity belong many of his beautiful chamber-cantatas, and a certain amount of church music. In May 1707, Antonio Foggia died, and Scarlatti succeeded him as principal Maestro at the church of S. Maria Maggiore. He continued to compose operas for Ferdinand de' Medici while living in Rome, but although his voluminous correspondence about these works has been preserved, the scores of them have unfortunately disappeared. In spite of all his efforts to write pleasing music, he seems to have been too severe for the prince's taste, and in 1707 he was dropped in favour of Pertini.

In this year he produced two operas, 'Mitridate Eupatore' and 'Il Trionfo della Libertà' at Venice (Teatro S. Giovanni Crisostomo), going there in person to direct them. These works are on a larger scale than any of his previous operas, and the first is one of the best that he ever wrote; the second has come down to us in so fragmentary a condition that it is hardly possible to form a fair judgment upon it. In all probability Scarlatti remained at Venice to the end of the Carnival, and thence made his way to Urbino, travelling, there is reason to believe,

by way of Ferrara. The reigning pope (Clement XI.) was a native of Urbino, and the Albani family, to which he belonged, were nobles of great importance in that country. The resident representative of the family, Cardinal Orazio Albani, was interested in music, and although no trace of Alessandro Scarlatti is now to be found there, the Albani library possesses several libretti of Domenico's operas, as well as a few musical treasures of an earlier date. Scarlatti remained at Urbino until September, but probably returned to Rome for Christmas, since he wrote a mass with orchestral accompaniment for this festival.

Although Scarlatti had left Naples in June 1702, his post at the royal chapel was not filled up until October 1704, when a certain Gaetano Veneziano was appointed. In December 1707 he was succeeded by Francesco Mancini; but towards the end of 1708 Cardinal Grimani, the Austrian Viceroy, made an attempt to persuade Scarlatti to return. It seems that Scarlatti, as might have been expected, declined to accept the post of deputy first organist, which was offered him, having been at the head of the chapel for nearly twenty years, and did not return until he had been restored to the office of Maestro di Cappella, with an increased stipend. Mancini was compensated with the title of Vice-maestro, and the right of succeeding eventually to the post held by Scarlatti. It is doubtful, however, whether he re-established himself definitely at Naples until 1713. Although described in the libretti of 'L' Amor Volubile e Tiranno' (1709) and 'La Principessa Fedele' (1710) as *Maestro della Real Cappella*, he does not appear to have written anything more for Naples during the next three years, and on May 27, 1713, the new Viceroy, Count Daun, made a special confirmation of the appointment given him by Cardinal Grimani. This action secured him for Naples for the next few years.

During this second period of work in Naples Scarlatti was at the height of his fame. He produced operas on a magnificent scale at the court theatre; 'Tigrane' (1715) and its contemporaries, though less interesting than his later operas, are brilliant and effective—the leisurely work of a man mellowed by success, not the hurried output of one struggling to retain the favour of his patrons at any sacrifice of artistic ideals. To this period also belong some oratorios, notably 'San Filippo Neri' (1713), and several serenatas for state occasions. The honour of knighthood, which is first vouched for by the appearance of his name with the title Cavaliere in the libretto of 'Carlo Rè d' Alemagna' (1716), was probably conferred upon him in recognition of the serenata and opera which he composed to celebrate the birth of the Archduke Leopold. It has been suggested that he received the order of the Golden Spur from the Pope, at the request of Cardinal

Ottoboni; but if this were the case it is only natural to suppose that it would have been conferred upon him while in the Cardinal's service, or even under the pontificate of the Cardinal's uncle, Alexander VIII. It may, however, be pointed out that in this year, 1716, he composed a mass (known as 'Missa Clementina II.') for Clement XI. In 1718 he made his one attempt at pure comic opera, 'Il Trionfo dell' Onore,' performed at the Teatro dei Fiorentini.

The interest of the Neapolitans in Scarlatti's music seems to have waned about this time. After 'Cambise' (1719) no more of his operas were heard there, and it is probable that he established himself in Rome, since his stipend as Maestro di Cappella at Naples was not paid to him any more, although he retained the title. At Rome he had a number of admirers sufficient to undertake the production of a series of operas which exhibit the composer in a still more advanced phase of artistic development. The first of these was 'Telemaco' (1718), which was followed by 'Marco Attilio Regolo' (1719), 'Tito Sempronio Gracco' and 'Turno Aricino' (1720), apparently not so much revivals as entire recompositions of two earlier operas, and finally his 114th and last opera, 'Griselda' (1721). Since the autograph score of this last informs us that it was composed for Prince Ruspoli, we may suppose that that nobleman (who had interested himself in Scarlatti's work when he was living in Rome before) was the principal organiser of the performances, which took place at the 'Sala degli illustrissimi Signori Capranica.' In 1721 Clement XI. was succeeded by Innocent XIII., and in November of that year Scarlatti was commissioned by the Portuguese Ambassador to compose a pastorate for the Pope's formal entrance into the Vatican. This appears to have been his last work for Rome, where he had distinguished himself in sacred music as well as in opera, producing a fine mass with orchestra and other works for St. Cecilia's day at the request of Cardinal Acquaviva, who had a special interest in the church of St. Cecilia in Trastevere. In 1722 he seems to have visited Loreto, where he is supposed to have composed a setting of the Psalm 'Memento Domine David' and an 'Ave Maria.' The following year probably saw him back at Naples. He set to work on a serenata for the marriage of the Prince of Stigliano, but appears to have left it unfinished, as the first part only has come down to us. There is every reason to suppose that he was now living in complete retirement, forgotten by his own generation, and regarded as a crabbed and eccentric harmonist by even so learned a musician as the German theorist Heinichen. In 1724 J. A. Hasse, having quarrelled with Porpora, came to Scarlatti as a pupil; the old man was attracted by the boy's amiable disposition, and during the few remaining months

of Scarlatti's life the two musiciana regarded each other with the affection of father and son. Quantz visited Naples in 1725, and stayed with Hasse, whom he begged to introduce him to Scarlatti; Scarlatti, however, merely replied to Hasse's request, 'My son, you know that I cannot endure players of wind instruments, for they all blow out of tune.' Hasse succeeded eventually in inducing him to receive Quantz, who heard him play the harpsichord 'in a learned manner'; Scarlatti even accompanied him in a solo and composed a couple of flute-pieces for him. He died on Oct. 24 of the same year, and was buried in the church of Montesanto. His epitaph is said to have been written by Cardinal Ottoboni, and runs as follows:—

Scarlatti is one of the most important figures, not only in the history of opera, but in the entire history of music. He is the most important of that group of composers who succeeded the first pioneers of the monodic style, based upon the modern tonal system, and who moulded and developed a musical idiom which served as the language of musical expression down to the days of Beethoven. In his early work he is naturally under the influence of older composers—Carissimi, Luigi Rossi, Stradella, and Legrenzi; indeed, the vague tradition of his having studied in Parma might associate him with the last-named composer as a pupil. His first operas and his early cantatas and church music have, moreover, a certain harshness and crudity which reveals the beginner; Stradella's operas and Rossi's cantatas, though old-fashioned in their phraseology, are much more mature and finished in their execution. It is interesting to compare Scarlatti with Purcell, who was his exact contemporary; Purcell was also under Italian influence, and we find in the young Scarlatti many points of resemblance to him, notably in the treatment of harmony,—both composers showing a tendency to think polyphonically, though melodiously, and being either indifferent to, or more probably taking a positive pleasure in, the painful dissonances resulting from their unbending logic. But with his appointment as Maestro di Cappella at Naples, Scarlatti modified his style. Here he

was forced to work with the utmost rapidity, and to work for popular success. The fine detail of his earlier work is swept aside; the curious forms, derived in part from the ground-bass, in which he had once delighted, are abandoned; and he poured forth a long series of operas in which the grace and vigour of his best moments eventually degenerated into insipidity and vulgarity. Three important features characterise this somewhat unfortunate period of his career. The *da capo* aria in ternary form (ABA), though of course not an invention of Scarlatti, is now definitely established as the only type of operatic aria, to the entire exclusion of all other forms. The form of overture known as the 'Italian' overture was introduced in 1696 for the revival of an earlier opera, 'Dal Male il Bene,' and, though subject to much development, remains constant in its main outlines to the end of the Metastasio period of Italian opera; and lastly, the opera 'Olimpia Vendicata' (1686) presents us with the earliest-known example of accompanied recitative. From about 1686 to 1696 Scarlatti's operas have a facile grace that is often far removed from triviality; the operas 'La Statura' (1690), 'La Rosaura' (1690), and 'Pirro e Demetrio' (1694), which was performed in London in an English adaptation in 1708, were deservedly popular in their day, and contain music which has even survived down to our own. About 1697 a change comes over Scarlatti's style, due in all probability to the influence of Giovanni Bononcini, whose 'Trionfo di Camilla' was performed at Naples in that year. Bononcini had a certain genius for airs of a spirited martial type—'L'esperto nocchiero' from 'Astarto' is a good specimen—and no doubt they pleased the court, since they were easy to understand, and even a viceroy could beat time to them. Scarlatti, either on his own initiative, or more probably in obedience to orders from above, set to work on the same lines, and from 1697 to 1702 turned out a number of inferior operas, full of airs that are either sugary and cloying, or pompous and stilted. Their only redeeming features, as a rule, are the comic scenes, which are trivial but certainly humorous. Of this phase 'Eraclea' (1700), and 'Laodicea e Berenice' (1701) are the best examples.

There can be little doubt that Scarlatti's most serious work was being put into the operas which he composed for Ferdinand de' Medici. His letters give a detailed account of the composition of 'Turno Aricino' (1704), 'Lucio Manlio' (1705), and 'Il Gran Tamerlano' (1706). He speaks with enthusiasm of Stampiglia's libretto to the second of these, and appears to have considered the opera the best that he had hitherto composed, although each act was written in a fortnight. The scores of these operas, however, have entirely disappeared, and not even scattered fragments of them can be traced. To

what great height he was capable of rising at this stage may be seen in the opera 'Mitridate Eupatore,' composed for Venice in 1707. Although the interest is not equally sustained all through, the work is a very remarkable example of the classical manner at its grandest. The libretto is also remarkable, as depending entirely upon its political interest. There are no love-scenes at all; but the devotion of the heroine for her lost brother is expressed with a passionate sincerity that far transcends anything that Scarlatti had written before. J. S. Bach at his best has hardly surpassed the dignified recitative 'O Mitridate mio,' followed by the magnificent aria 'Cara tomba' in Act IV.

With his return to Naples in 1709 Scarlatti entered upon yet another stage of development. The deep poetic intention of 'Mitridate' is indeed seldom apparent; but the experience of former years had given the composer command of every resource, and the honour in which he was held at the Austrian court enabled him to write in a style more worthy of himself. We may regret the loss of that tender charm so characteristic of his early work, but we must admit the wonderful vigour and brilliance of such operas as 'La Principessa Fedele' (1710), 'Il Ciro' (Rome, 1712), 'Scipione nelle Spagne' (Naples, 1714), and above all 'Tigrane' (1715). In these operas we may notice not only the more extended development of the ternary arias, but also an advance towards a more modern treatment of the orchestra. Scarlatti's early operas are generally scored for a band of strings, supported, of course, by the harpsichord and other harmonic instruments, such as the lute, playing from the *basso continuo*, which in this case we can hardly call the *figured bass*, since Italian accompanists were so fluent in improvisation that the composer could generally spare himself the trouble of indicating the harmony in the conventional shorthand. To this band are added occasionally trumpets, flutes, oboes, and bassoons, not as regular constituents of the orchestra, but treated more as *obbligato* instruments, with a view to special colour effects. The burden of the accompaniment rested on the harpsichord. Violin-playing was at the close of the 17th century still so primitive that the strings of an opera band could seldom be trusted with the delicate task of supporting a singer. In most cases they enter only to play the final noisy *ritornello* at the close of an air; sometimes they are given a share in the accompaniment, but treated as a group antiphonal to the harpsichord. Scarlatti, however, was evidently interested in the development of violin-playing, and as time went on he allotted to the strings a more important share of the work, stimulated, no doubt, by the influence of Corelli, who was thought by his contemporaries to be distinguished more as a conductor than as a composer. As early as 'Mitridate Eupatore'

(1707) we may observe the tendency to reverse the principle of the earlier work; it is the strings (generally without double-basses) that accompany the voice, and the harpsichord that is reserved to add power and brilliance to the *ritornelli*. Moreover, Scarlatti's whole outlook becomes gradually less and less aggressively contrapuntal, the harsh dissonances of his boyhood are soon smoothed away, and the general scheme of his musical thought tends more to melody supported by harmony, although he showed to the end of his life that he regarded free counterpoint as the most intellectual style of expression. This point of view naturally influences his instrumentation, and causes his later scores to have much more affinity to the modern style of treating the orchestra.

A fifth and final period is exemplified in the series of operas written for Rome that began with 'Telemaco' and ended with 'Grielda.' Twenty years earlier Scarlatti had bitterly lamented the impossibility of producing operas in the city that had witnessed his first triumphs. But the passion for opera, which had attacked Rome, no less than other Italian cities, during the baroque period, was too serious to be stifled by the protests of clerical prudery, and Rome now showed him that here at last was an audience which could appreciate the full maturity of the genius which she had been the first to encourage. In these latest operas we see not only the furthest development of technical resource, but also the ripened fruits of emotional experience. Here at last is the whole Scarlatti, here at last he was able to place upon the stage something of that passionate tenderness and serious musical reasoning that he had for so many years brought to utterance only in the intimacy of his chamber-cantatas, and exhibit the whole in all the glory of variegated orchestration, lighted up by the blaze of vocal *coloratura*.

Scarlatti has been remembered in modern times chiefly on account of his operas; but we cannot understand his complete development without a study of his chamber-music. The chamber-cantata was to the age of Rossi and Scarlatti what the pianoforte-sonata or violin-sonata was to the age of Beethoven and Brahms—the most intimate and the most intellectual form of music that could be produced. The degraded age of vocal virtuosity had not yet arrived; the singers were not merely the most agile performers upon the most perfect of instruments, but the most intellectual exponents of the art of music. Scarlatti, the greatest and almost the last of the great writers of chamber-cantatas, practised in this form, as Beethoven did in the pianoforte-sonata, from his earliest years to that of his death. Over five hundred of his cantatas have come down to us, representing every period of his life, and we may often see that for any given period, as

with Beethoven's pianoforte-sonatas, they represent the highest intellectual achievement of the moment. It is unfair to judge them by the standard of Schumann's 'Lieder'; they are not lyrical outbursts, sacrificing formality to the personal emotion of the poet, much less scenes taken out of operas, as has been suggested, but carefully designed studies in composition, often depending for their main interest on the working out of some interesting problem of modulation or of thematic development. Thus in 1712 he sent Gasparini two settings of the cantata 'Andate o miei sospiri' which had been set by Gasparini and sent to him by the composer. The first of these two settings is a beautiful specimen of Scarlatti's work at this period; the second was designed with a view to puzzling his correspondent with the most difficult modulations, both in the recitatives and in the airs. The work is difficult even to the modern reader, but only on account of the terseness of its thought. 'Awkward' and 'experimental' are epithets that could hardly ever be applied to Scarlatti, and his music often fails to interest the modern romantic reader because of the absolute mastery with which he solves his problems.

His instrumental chamber music is of less value. It was apparently traditional to treat this branch of art in a more archaic style; the four 'Sonate a quattro' (string quartets), and even the twelve Symphonies for small orchestra (1715), are more primitive in their methods than the Sonatas of Corelli. He composed a certain amount of music for the harpsichord and organ, but it is for the most part straggling and ineffective, interesting only as showing a certain influence on the early work of his son. His best work for the harpsichord is a set of variations on the theme of Corelli's 'Follia,' recently edited by Aless. Longo, and published by Messrs. Ricordi.

As a church composer Scarlatti is not at his best. The story of his having set the mass two hundred times may be dismissed as a fable. Considering the vast quantity of other music of his that has survived, it can hardly be believed that as many as 190 masses should have been lost. Quantz is the only authority for this statement, and as he never mentions a single composition of Scarlatti's by name, his information deserves little credit. Of the ten surviving masses, the majority are in the strict style kept up to the end of the 18th century and called 'alla Palestrina,' though breaking gradually away from the manner of its illustrious model. Scarlatti treats discords with more freedom, and occasionally shows a more modern feeling for fugue; but his strict masses are on the whole uninteresting. Two masses with orchestra are important in the history of modern church music. The first (1707) is somewhat crude and ineffective, but the second (1720) is a worthy ancestor of the

great masses of Bach and Beethoven. The miscellaneous church music calls for little comment. Roger of Amsterdam printed a collection of 'Concerti Sacri' (about 1710), characterised by a Jesuitical brilliance which is meretricious, but certainly attractive; three motets for double choir 'Tu es Petrus,' 'O magnum mysterium,' and 'Volo, Pater' (about 1707), are broad and dignified; the little 'Laetatus sum' for four voices (printed by Proske) is a model of counterpoint in Leo's manner. The oratorios and secular serenatas are of very varying value, and show the same sort of tendencies as the operas. (See ORATORIO.)

Mention must also be made of Scarlatti as a teacher. The *Regole per principianti*, a MS. treatise on accompaniment, is of interest, as showing that its author was always liberal in his views on the theory of his art. He allows various harmonies (e.g. the use of a second inversion of a dominant seventh) which his contemporaries did not, admitting that not everybody would agree with him, but defending himself on the principle that such progressions sound well. To what extent he taught at Naples is not clear. The tendency of modern research is to indicate that the younger generation of composers at Naples were trained for the most part by Nicola Fago and Gaetano Greco; Hasse seems to have been almost the only one who came into intimate relations with him. His frequent absence from Naples must have been a serious interruption to teaching work, and in his latter years he was evidently quite forgotten by the Neapolitan public.

Nevertheless, Alessandro Scarlatti must certainly be regarded as the founder of the Neapolitan school of the 18th century. He was, of course, not the first teacher nor the first opera-composer that appeared in Naples; but Provenzale, a man far inferior to his Venetian and Roman contemporaries, was much too insignificant to be the leader of a new movement. The real celebrity of Naples as an operatic centre dated from Scarlatti's appointment in 1683, and the long series of his operas performed there from 1683 to 1702, and from 1709 to 1719, during which periods he almost monopolised the stage of S. Bartolomeo, caused his artistic influence to be paramount there. But the unfortunate, though natural, consequence was that the younger generation of composers imitated him not at his ripest but at his most successful phase, so that, in spite of the earnest effort of Leo, the later Italian opera proceeded rapidly to that state of decadence against which Gluck finally led the reaction. For this reason Scarlatti has too often been represented as the first composer who took the downward step towards empty formalism and the prostitution of opera to the vanity of singers. This is gross injustice. We may regret that adverse circumstances compelled him to produce much that

was unworthy of his best ideals; but the mass of chamber-cantatas and the later operas show him to have been a thoroughly intellectual musician, a complete master of form in its minutest details, who made as severe demands upon the brains of his interpreters as upon their technical powers.

Scarlatti indeed is the founder of that musical language which has served the classical composers for the expression of their thoughts down to the close of the Viennese period. Thematic development, balance of melodic phrase, chromatic harmony—all the devices which the 17th century had tentatively introduced, are by him woven into a smooth and supple texture, which reached its perfection in one who, although he never knew his true master, was yet his best pupil—Mozart. [For complete list of works, see the writer's *Alessandro Scarlatti*, 1905, and the *Quellen-Lexikon*.] E. J. D.

SCARLATTI, GIUSEPPE DOMENICO, son of Alessandro, born in Naples, Oct. 26, 1685, first learned from his father, and later from Gasparini. [He has been called a pupil of Bernardo Pasquini, but that seems most improbable, seeing that Pasquini was of the school of Palestrina, and wrote entirely in the contrapuntal style, whereas Domenico Scarlatti's chief interest is that he was the first composer who studied the peculiar characteristics of the free style of the harpsichord. Mr. Shedlock's suggestion that he was taught, or at least largely influenced, by Gaetano Greco is far more likely.] His bold style was by no means appreciated in Italy, for Burney remarks (*State of Music in France and Italy*) that the harpsichord was so little played that it had not affected the organ, which was still played in the grand old traditional style. The first work on which Domenico is known to have been engaged was that of remodelling for Naples, in 1704, Polaroli's opera 'Irene' (Venice, 1695). At Naples 'his talent found scope indeed,' wrote Alessandro to Ferdinand de' Medici on May 30, 1705, 'but it was not the sort of talent for that place. I send him away from Rome also, since Rome has no roof to shelter music, that lives here in beggary. This son of mine is an eagle whose wings are grown; he ought not to stay idle in the nest, and I ought not to hinder his flight. Since the virtuoso Nicolino, of Naples, is passing through Rome on his way to Venice, I have thought fit to send Domenico with him; and under the sole escort of his own artistic ability (which has made great progress since he was able to be with me and enjoy the honour of obeying Your Royal Highness's commands in person, three years ago), he sets forth to meet whatever opportunities may present themselves for making himself known—opportunities for which it is hopeless to wait in Rome nowadays.' Domenico duly presented himself to the Prince with this letter, which is now in the Medici

archives at Florence, and presumably continued his journey with Nicolino, at any rate as far as Venice. In 1708 he was in Venice [studying with Gasparini, and making the acquaintance of Handel and Thomas Roseingrave.] Domenico seems to have accompanied Handel to Rome, for Cardinal Ottoboni held a kind of competition between the two, at which the victory was undecided on the harpsichord, but when it came to the organ, Scarlatti was the first to acknowledge his rival's superiority, declaring that he had no idea such playing as Handel's existed. The two became fast friends from that day; they remained together till Handel left Italy, and met again in London in 1720. In 1709 he entered the service of Marie Casimire, Queen of Poland, and composed for her private theatre in Rome several operas: a *dramma pastorale* 'Sylvia' (libretto in the Paris Bibliothèque Nationale), which was followed by 'Orlando' (1711), 'Fatide in Sciro' (1712), 'Ifigenia in Aulide' and 'in Tauride' (1713), 'Amor d'un ombra,' and 'Narciso' (1714), and 'Amleto' (1715, Teatro Capranica), interesting as the first musical setting of that subject. Even in extreme old age Handel spoke with pleasure of D. Scarlatti, and Mainwaring (*Memoirs*, p. 61) relates that when Scarlatti was in Spain, if his own playing was admired, he would turn the conversation on Handel's, crossing himself at the same time as a sign of his extreme reverence. In January 1715 he succeeded Baj as maestro di capella of St. Peter's in Rome, where he composed Masses, Salve Reginas, etc. In 1719 he went to London, where his 'Narciso' was performed (May 30, 1720), and in 1721 to Lisbon, where he became a court favourite. The longing for home and kindred, however, drove him back to Naples, where Hasse heard him play the harpsichord in 1725.

In 1729 he was invited to the Spanish court, and appointed music-master to the Princess of the Asturias, whom he had formerly taught in Lisbon. According to the *Gazetta musicale* of Naples (Sept. 15, 1838) he returned to Naples in 1754, and died there in 1757. Being an inveterate gambler he left his family in great destitution, but Farinelli came to their assistance. (Sacchi's *Vita di Don Carlo Broschi*.)

As we have said, Scarlatti was in some sense the founder of modern execution, and his influence may be traced in Mendelssohn, Liszt, and many other masters of the modern school. He made great use of the crossing of the hands, and produced entirely new effects by this means. His pieces, unlike the suites of Handel and his predecessors, were all short. Santini possessed 349 of them. Of these Scarlatti himself only published one book of thirty pieces, entitled 'Esercizii per gravicembalo,' etc., printed according to Burney in Venice, but at any rate before August 1746, when the Prince of the

Asturias, whose name is on the title-page, ascended the throne. In the Fétis collection is a Paris edition, 'Pièces pour le clavecin,' two vols., published by Mme. Boivin (who died Sept. 1733) and Le Clerc.¹ '42 Suites² of Lessons' were printed by John Johnson (at the Harp and Crown, Cheapside), London, under the supervision of Scarlatti's friend Roseingrave (between 1730 and 1737, when Roseingrave went out of his mind). In 1752 John Worgan obtained the sole licence to print certain new works by Domenico Scarlatti, and published them (at J. Johnson's, facing Bow Church, Cheapside). These were twelve sonatas, most of them new to England. Czerny's edition (Haslinger, Vienna, 1839), containing 200 pieces, was re-edited (Paris, Sauer, Girod) and revised by Mme. Farrenc from Roseingrave's edition, and MSS. then in possession of Rimbauld. There are also 130 pieces in Farrenc's 'Trésor des Pianistes' (1864); sixty Sonatas are published by Breitkopf; and eighteen pieces, grouped as Suites by von Bülow, by Peters. [Tausig arranged several of the sonatas to suit the requirements of modern pianists, but the greatest boon to lovers of Domenico Scarlatti is the publication of a complete edition of his sonatas by Ricordi & Co. under the editorship of Signor Alessandro Longo. Six volumes, containing 300 pieces in all, appeared in 1906, and are to be continued by a further series. The above article has been corrected by reference to a review of this edition written by Mr. E. J. Dent, and published in the *Monthly Musical Record*, Sept. 1906.] Besides these famous works and the operas, among which last are to be included contributions to various pasticcios, Domenico Scarlatti wrote a *Stabat Mater* for ten voices and organ, and a 'Salve Regina' for a single voice, stated to be his last composition. F. G.

~~SCARLATTI~~, FRANCESCO, a brother of Alessandro. A mass and Dixit Dominus by him, *a 16*, are in the Bodleian Library, Oxford, dated 1702 and 1703 respectively. He was for twenty-six years maestro di cappella at Palermo (1689-1715), and in 1719 came to London with his nephew Domenico, giving a concert of his own compositions, Sept. 1, 1720. A *Miserere a 5* is in the Court Library at Vienna, and some opera airs and cantatas in the Fitzwilliam Museum, Cambridge, and elsewhere. (See the *Quellen-Lexikon*.) M.

SCARLATTI, GIUSEPPE, son of Domenico, was born at Naples, according to Paloschi in 1712, according to Florimo in 1718. At one time he seems to have been maestro at Pavia, and in the text-book of 'I portentosi effetti,' revived at Berlin, in 1763, he is styled maestro di cappella in Naples. He settled in Vienna in 1757, before which date he had produced the

following operas:—'Merope,' Rome 1740 (repeated at Naples 1755); 'Dario,' Turin, 1741; 'Pompeo in Armenio,' Rome, 1747; 'Adriano in Siria,' Naples, 1752; 'Ezio,' Naples, 1754; 'I portentosi effetti della natura,' Venice, 1754; 'Antigone,' Milan, 1756; 'Chi tutto abbraccia nulla stringe,' Venice, 1756. In Vienna he brought out at the court theatre: 'Il mercato di malmantile' and 'L'isola disabitata,' 1757; 'La serva scaltra,' 1759; 'Issipile' and 'La Clemenza di Tito,' 1760; 'Artaserse,' 1763; 'Li extravaganti,' 1765; 'La moglie padrona,' 1768. He died at Vienna, August 17, 1777. C. F. P.; with additions from the *Quellen-Lexikon*.

SCARLATTI, PIETRO, was probably a nephew of Domenico and was, according to Florimo, maestro di cappella in Naples. In 1728 his opera 'Clitarcò' was given at the theatre of San Bartolomeo (a MS. of the work is at Monto Cassino, in which there are intermezzi by Hasse.) M.

SCENA (Gr. Σκηνή; Lat. *Scena*; Ital. *Scena*, *Teatro*, *Palco*; Ger. *Bühne*, *Auftritt*; Fr. *Scène*, *Théâtre*; Eng. *Scene*, *Stage*). A term, which, in its oldest and fullest significance, applies equally to the stage, to the scenery it represents, and to the dramatic action which takes place upon it. Hence, the long array of synonyms placed at the beginning of this article.

I. Classical authors most frequently use the word in its first sense, as applying to that part of a Greek or Roman Theatre which most nearly answers to what we should now call the stage; and the classical tendencies of the Renaissance movement led to its similar use in the 16th century.

II. In its second sense, the word is commonly applied, in England, to those divisions of a drama which are marked by an actual change of scenery; a method of arrangement which is even extended to English translations of foreign works.

III. In the Italian, German, and French theatres, the word is more frequently used, in its third sense, to designate those subordinate divisions of an act³ which are marked by the entrance or exit of one or more members of the *Dramatis Personae*; a new scene being always added to the list when a new character appears upon or quits the stage, though it be only a messenger, with half-a-dozen words to say or sing.

IV. In a more limited sense, the term *Scena* is applied by operatic composers to an accompanied recitative, either interspersed with passages of rhythmic melody, or followed by a regular Aria. In the former case, the word is generally used alone—and always in its Italian form: in the latter the composition is sometimes called 'Scena ed Aria.' Less frequently, the

¹ No. 10 in vol. II. is an organ fugue by Alessandro Scarlatti.

² Which are not 'Suites,' but single movements.

³ Ital. *Atto*; Fr. *Acte*; Ger. *Aufzug*—in allusion to the raising of the curtain.

place of pure recitative is supplied by the introduction of short strains of melody, with strongly-marked variations of tempo. But, in all cases, it is *de rigueur* that the character of the composition should be essentially and unmistakably dramatic throughout. The *Scena*, thus defined, is as old as the opera itself; for the name might very well be given to the scene from 'Euridice,' already alluded to; or to the 'Lamento' in Monteverde's 'Ariana.' A very fine example, much in advance of its age, will be found in 'Ah rendimi quel core,' from Francesco Rossi's 'Mitrane,' 1689. Mozart's peculiar aptitude for this kind of composition is well exemplified in his wonderful scena for two voices, 'Die Weislehre dieser Knaben,' in 'Die Zauberflöte'; in innumerable delightful instances in his other operas; and in a large collection of detached pieces, such as 'Ch'io mi scordi,' 'Bella mia fiamma,' 'Ahi, lo prevedi,' 'Misera, dove son?' and others, too numerous to mention, most of them written for the stage, though some are clearly intended for the concert-room, notwithstanding their powerful dramatic expression. To this latter class of Scenas must be referred Beethoven's magnificent 'Ah, perfido!' which ranks, with the Scenas for Leonore and Florestan, in 'Fidelio,' among his most passionate compositions for voice and orchestra. The *Scena* was unquestionably Weber's strongest point—witness his three magnificent examples, 'Durch die Wälder,' 'Wie nahte mir die Schlummer,' and 'Ocean, du Ungeheuer,' and his six 'Concert Arien.' The grand *Scena*, in B \flat , for Kneegunde in 'Faust,' is one of Spohr's most notable masterpieces; and the same composer's impassioned instrumental 'Scena Cantante' for violin and orchestra stands quite alone, as an inspiration of the highest order. He also wrote a very fine *Scena* for the concert-room—'Tu m'abbandoni' (op. 71); and Mendelssohn has left us a priceless treasure of this class in his 'Infelice,' which embodies an amount of scenic power no less remarkable than that thrown into the numerous similar movements in his oratorios. The secret of success, in all these cases, lies in the intensity of dramatic expression embodied in the work.

W. S. R.

SCENARIO. An Italian term, meaning a sketch of the scenes and main points of an opera libretto, drawn up and settled preliminary to filling in the detail.

G.

SCHABLONE. The German term for a stencil or pattern, and thence in musical criticism often applied to music written with too much adherence to mechanical form or manner, whether the composer's own or some one else's—made on a cut-and-dried pattern. The term *capellmeister-musik* is used by the German critics for a similar thing. With a slightly different metaphor we should say, 'cast in the same mould.'

G.

SCHACK (properly CZIAK), **BENEDICT**, the first Tamino, and one of the party¹ who stood round Mozart's bed the night before his death, and at his request sang the completed portions of the 'Requiem' as far as the first bars of the 'Lacrimosa,' when he broke into violent weeping at the thought that he should never finish it. Schack, who was born at Mirowitz, in Bohemia, in 1758, was a man of general cultivation, a thorough musician, and a good flute-player. He composed several operas for Schikaneder's theatre. Mozart was on intimate terms with him, and would often come and fetch him for a walk, and, while waiting for Schack to dress, would sit down at his desk and touch up his scores. Schack's voice was a fine tenor, flexible and sonorous, and his execution thoroughly artistic, but he was a poor actor.² In 1787 he was taking second parts only; in 1792 he sang Tamino, Count Almaviva, and Don Ottavio (Don Gonsalvo in the German translation), after which we hear no more of him as a singer. [In 1780 he was Capellmeister to a nobleman, and in 1805 retired on a pension. A mass by him was finished by Mozart. (See the *Harmonicon*, vol. ix. p. 293.)] His operas or Singspiele came between 1789 and 1793; some were written with Gerl.³

C. F. P.

SCHALE (German). A cymbal, used of the halves of a pair, which together are called Becken. 'Beide Schalen' is a direction found after one of the cymbals has been directed to be struck with a drum-stick.

SCHALMEI. See SHAWM.

SCHARWENKA, **LUDWIG PHILIPP**, born Feb. 16, 1847, at Samter, near Posen, in East Prussia, where his father was an architect. His taste for music showed itself early, but he was unable to cultivate it seriously till the removal of his family to Berlin in 1865, when he entered Knllak's 'New Academy,' studying under Wüerst and Heinrich Dorn, having previously completed his studies at the Gymnasium in Posen, where his parents settled in 1859. On completing his course at the Academy he remained on the staff as a teacher of theory till 1881, when he became teacher of composition at his brother's newly opened Conservatorium, the direction of which he undertook with Hugo Goldschmidt on his brother's emigration to America in 1891. In 1880 he married the well-known violinist Marianne Stresow, who is at present a violin teacher in the Klindworth-Scharwenka Conservatorium. Besides having made a good name for himself with a long list of interesting compositions, Professor Scharwenka is an accomplished caricaturist.

The compositions of Philipp Scharwenka in-

¹ The others were Mozart's brother-in-law, Hofer, the violinist, and Franz Xaver Gerl, a bass-singer, and the first Sarastro. Mozart himself sang the alto.

² Jahn's *Mozart*, ii. p. 510.

³ Gerl sang 'Gemin' in 1797 at the same theatre in the *Freihaus*, where was produced in 1797 his comic opera in three acts, 'Die Maskerade,' by 'a former member of this theatre.'

clude a vast number of piano pieces—Ländler, waltzes, minuets, mazurkas, etc.—of which 'Album Polonais' (op. 33) is best known, many songs, three concert pieces for violin and PF. (op. 17), studies for violin, studies for violoncello, three sonatas for pianoforte (op. 61); two choral works with soli and orchestra, 'Herbstfeier' (op. 44) and 'Sakuntala'; a choral work with pianoforte accompaniment *ad lib.*, 'Dörpertanzweise'; a PF. trio in C# minor (op. 100); and some orchestral works, two symphonies, a Serenade (op. 19), a Fantasiestück 'Liebesnacht,' a Festival Overture (op. 43), an 'Arcadian Suite' (op. 76), and a Symphonic Poem, 'Frühlingswogen' (op. 87).

H. V. H.

His brother, FRANZ XAVER, was also born at Samter, Jan. 6, 1850; and like his brother was at Kullak's Academy in Berlin, where he was well known, while still a pupil, for his PF. playing and composition, which he studied under Kullak and Wüerst respectively. He made his first appearance in public in Berlin at the Singakademie in 1869, and remained for some time at Kullak's as a teacher, until compelled to leave it for his military duties in 1873. After this he began to travel, and was soon renowned as a fine and brilliant player, and a 'young composer of remarkable endowments.' In 1877 he produced his first Concerto for the PF. (in B# minor, op. 32), playing it to the meeting of German musicians at Hanover in May; it was played in England for the first time by Mr. Edward Dannreuther at the Crystal Palace, Oct. 27, 1877. In 1878, Feb. 14, Scharwenka himself played it at the Gewandhaus, Leipzig. In 1879 he made his first appearance in England, playing the same work at the Crystal Palace, March 1, and played at the Musical Union, April 29. In 1880 he returned and played his B# minor Concerto at the Philharmonic, Feb. 19, and the Beethoven E# Concerto on June 9. In 1881 he made a third visit, and played his second Concerto (in C minor, op. 56) which he had produced at the Gesellschaftsconcert at Vienna, Feb. 24; but his stay was shortened by his recall to Germany for his military duties, though he found time to appear several times, and deepened the favourable impression he had previously made. In 1899 he made another visit to England and played his Third Concerto (C# minor, op. 80).

On Oct. 1, 1881, Scharwenka opened his own Conservatorium in Berlin (staff including his brother Philipp's wife, *née* Marianne Stresow, Albert Becker, Philipp Rüfer, J. Kotek, O. Lessmann, W. Langhans, M. Röder, W. Jähns, A. Hennes, and Philipp Scharwenka), which became amalgamated with that of Klindworth in 1893, is now known as the Klindworth-Scharwenka Conservatorium (and School for Opera and Drama), and run under the artistic direction of the brothers Scharwenka and Capellmeister Robitschek and the administra-

tion of the latter, of which Xaver Scharwenka is the principal.

On Dec. 18 and 19, 1906, the twenty-fifth anniversary of the foundation of the Conservatorium was celebrated.

In 1891, answering a call to found and direct a branch of his Conservatorium in New York, Xaver Scharwenka, his wife and family, with all their belongings, emigrated to the States, where they remained seven years; he, however, crossing to Europe and back no less than seven times during that period. In the New World he made numerous tours, and to his astonishment discovered that in the West he had already earned a reputation as a pianist through a former pupil of his brother's who had adopted his name and given concerts for two years without his identity being discovered. At present the Scharwenka family live in Berlin, where the Professor is busy morning, noon, and night as composer and teacher.

As a pianist Xaver Scharwenka is renowned above all his other qualifications for the beautiful quality of his tone, which is rich, round, soft, yet great, and singing, for which it would be difficult to name another living pianist as his equal. His power is enormous, yet he never bangs, and has no mannerisms, his arms and body at the piano appearing to be almost entirely without movement. If he is a specialist as interpreter of one composer rather than another it is of Chopin, whose nationality he partly shares, but of the other great masters his readings are always grand and musicianly, while to hear him play a waltz of Strauss is as dance-inspiring as the magic bells of Papageno. His compositions, which possess energy, harmonic interest, strong rhythm, many beautiful melodies, and much Polish national character, include a symphony in C minor (op. 60); three PF. concertos in B# minor, C minor, and C# minor (opp. 32, 56, and 80); two PF. trios in F# minor and A minor (opp. 1 and 42); two v'cello sonatas in D minor and E minor (opp. 2 and 46); a PF. quartet in F (op. 37); two PF. sonatas in C# minor and E# (opp. 6 and 36); very many piano pieces, mostly Polish dances, but also a scherzo in G, a ballade (op. 8), a concert minuet in B (op. 18), a theme and variations, studies and some songs, besides some books of technical exercises of great value to the modern pianist. A grand opera, without opus number, in four acts, to a libretto by Dr. Ernst Koppel, 'Mataswintha' (from the novel of Felix Dahn, *Ein Kampf um Rom*), was produced at Weimar, Oct. 4, 1896, and at the Metropolitan Opera-House, New York, April 1, 1897. In New York Scharwenka himself conducted; at Weimar, Stavenhagen.

Xaver Scharwenka is Royal Professor, Imperial and Royal 'Kammervirtuos,' Ordinary Member and Senator of the Royal Prussian Academy of Arts, President of the 'Mnsik

pädagogische' Association, Doctor of Music (America), and bears the title of Ritter hoher Orden. H. V. H.

SCHAUSPIELDIRECTOR, DER, 'Comédie mit Musik in 1 Act' (The Manager, a Comedy with Music in one Act); containing an overture and four numbers; words by Stephanie, jun., music by Mozart. Produced at a Court festival at Schönbrunn, Feb. 7, 1786. Over the terzet (No. 3) is the date, Jan. 18, 1786. It was adapted to a French libretto under the name of 'L' Impresario,' and produced in Paris in 1856. [See vol. ii. p. 462.] A careful version of the entire piece from the German original, by W. Grist, was brought out at the Crystal Palace, London, on Sept. 14, 1877, as 'The Manager,' and repeated several times there and elsewhere.

An interesting little work, full of details on this opera and Mozart in general, is *Mozart's Schauspieldirector* by Dr. R. Hirsch (Leipzig, 1859). G.

SCHEBEK, EDMUND, a distinguished and influential Austrian amateur, Doctor of Law, Imperial councillor, and secretary to the Chamber of Commerce at Prague, was born Oct. 22, 1819, at Petersdorf in Moravia. He began his musical career as head of a Society at Olmütz, and continued it at Prague, where in conjunction with Weiss, the superior of the Capuchins, and Krejci, he revived much of the best old Italian church music. He devoted his attention specially to the construction of the violin, in relation to which he published very interesting treatises—*On the Orchestral Instruments in the Paris Exhibition of 1855*¹; *On the Cremonese instruments, apropos of the Vienna Exhibition of 1873*, and *The Italian Violin manufacture and its German origin*.² He also published a valuable little pamphlet on Froberger (1874). Dr. Schebek possessed a fine collection of ancient stringed instruments, Beethoven autographs, etc. G.

SCHEBEST, AGNES, born at Vienna, Feb. 15, 1813, became attached at a very early age to the Court Theatre at Dresden, first in the chorus, and then as singer of small solo parts. Here she had the inestimable advantage of frequently hearing and seeing the great Schroeder-Devrient. In 1833 she left Dresden for Pesth, and from 1836 to 1841 starred throughout Germany with very great applause. Her voice was a fine mezzo-soprano, her style and method were good, her best parts heroic, with much energy and passion. In 1841 she married the great theologian Dr. David Strauss (himself a keen amateur, and author of an interesting paper on the Ninth Symphony), and died Dec. 22, 1869, at Stuttgart. She left an account of her career—*Aus dem Leben einer Künstlerin* (1857), and *Rede und Gebärde* (1862). G.

¹ *Die Orchester-Instrumente auf der Pariser Weltausstellung im Jahre 1855* (Vienna, Staatsdruckerei, 1855).

² *Der Geigenbau in Italien und sein deutscher Ursprung* (Vienna, 1872 and 1874).

SCHECHNER-WAAGEN, NANETTE, dramatic singer, born at Munich in 1806. She was employed in the chorus-scenes of the opera, and, on the occasion of Madame Grassini's visit, was chosen to second her in some selections from Cimarosa's 'Gli Orazii e Curiazii.' Schechner's beautiful voice made a great impression, and won for her a patroness in the Queen of Bavaria. After some study in singing and in Italian, she appeared in Italian opera in Munich, until 1827, after which she devoted herself to German opera. In 1826 she was in Vienna, if a curious story, related by Schindler, of a scene in the theatre there, apropos of an air written for her by Schubert, may be believed. [See SCHUBERT.] It is related by Fétis that, when she first appeared in Berlin in Weigl's 'Schweizerfamilie,' the first act was played to an almost empty house; but such enthusiasm did her Emmeline arouse in the few listeners, that the report of it spread to the neighbouring cafés during the entracte, a large audience was drawn to the theatre for the rest of the performance, and the singer's success was complete. Her Donna Anna, Euryanthe, Fidelio, Reiza, Vestalin and Iphigenie in Tauris excited great admiration in Berlin and Munich. In 1832 she married Waagen, a lithographer and painter. Her voice was powerful, even massive in its tones, and her acting earnest and natural. She took a place in the first rank of German singers, but her brilliant career lasted no longer than ten years. A severe illness injured her voice; she retired from the stage in 1835, and died April 30, 1860.

Mendelssohn heard her at Munich in 1830, and while he found her voice much gone off and her intonation false, says that her expression was still so touching as to make him weep.³ L. M. M.

SCHEIBE, JOHANN ADOLPH, born at Leipzig in May 1708, the son of an organ-builder, was educated for the law at the Nicolaischule, and at the University, where Gottsched was at the time professor. In 1735 he set out to try his fortunes as a musician, visiting Prague, Gotha, Sondershausen, and settling in 1736 at Hamburg as a teacher. He composed incidental music to various plays, and wrote a grand opera which only reached the stage of being twice rehearsed. In 1737 he began the publication by which he is famous in the history of German opera. *Der Critische Musikus*, as it was called, came out as a weekly periodical, and carried further the war against Italian operatic conventions which Gottsched had declared in his *Vernünftigen Tadeln*. In 1740 he was appointed Capellmeister to the Margrave of Brandenburg-Culmbach, and also visited Copenhagen, where he settled two years later, and in 1742 became director of the court opera, retaining this post till 1749, when he

³ Letter, June 6, 1836.

was succeeded by the Italian Sarti. He next devoted himself to literature and composition, becoming for a time head of a music-school at Sonderburg in Holstein. In 1745 he published a second edition of the *Critische Musikus*, (see below), and in 1754 wrote an *Abhandlung vom Ursprung und Alter der Musik*. He contributed a treatise on Recitative, in the composition of which he was a proficient, to the *Bibliothek der schönen Wissenschaften und freien Künste* (vols. xi. and xii.), 1764-65. In 1773 appeared the first of four projected volumes on composition, *Ueber die musikalische Composition*, but no more was finished, as the author died at Copenhagen, April 22, 1776. Apart from his championship of German opera, he obtained an unenviable notoriety by an attack on Sebastian Bach, published in the sixth number of his periodical, under date May 14, 1737. He had competed for the post of organist to the Nikolaikirche in 1729; and Bach, one of the judges, had not approved his playing; furthermore, it seems probable that Bach, in his cantata 'Der Streit zwischen Phöbus und Pan,' had intended the character of Midas as a reference to Scheibe. It is only fair to say that Scheibe recanted his errors in the second edition of the *Critischer Musikus*, issued in 1745. Scheibe wrote an opera, 'Thusnelda,' which was published (with an introductory article on vocal music) at Copenhagen in 1749; two oratorios, 'Die Auferstehung' and 'Der wundervolle Tod des Welterlösers'; masses, secular cantatas, church compositions to the number of 200; 150 flute concertos; 70 quartets or symphonies, trios, sonatas, existed, for the most part in MS. (*Quellen-Lexikon*; Riemann's *Lexikon*; *Sammelbände der Int. Mus. Ges.* ii. 654 ff.; Spitta, *J. S. Bach* (Engl. transl.) ii. 645-47, iii. 252-55.) M.

SCHEIBLER, JOHANN HEINRICH, born at Montjoie, near Aix-la-Chapelle, Nov. 11, 1777, died Nov. 20, 1838, silk manufacturer, after many travels settled down at Crefeld, where he was first-assistent-Bürgermeister. In 1812-1813, after some interesting experiments with Jew's-harps, he turned his attention to the imperfections of existing means of tuning. He first tried a monochord, but finding that he could not always get the same note from the same division of his monochord, he endeavoured to help himself by beats, and discovered that each beat corresponded to a difference of two simple vibrations or one double vibration in a second. His plan was to fix the monochord by finding the stopped length which would give a note beating four times in a second with his own fork. Then, after endless trials and calculations, he found similar places for all the divisions of the scale, and finally from the monochord made forks for each note of the perfectly equally tempered scale. By repeated comparisons with his forks he found that it was

impossible to make a mathematically accurate monochord, or to protect it from the effects of temperature. He then hit upon the plan of inserting forks between the forks of his scale, from the lowest A of the violin to the open A, and counting the beats between them. It was this counting that was the trouble, but by highly ingenious mechanical contrivances he was enabled to complete the count of his fifty-two forks within from .0067 to .00083 beats or double vibrations in a second, and hence to tune a set of twelve forks so as to form a perfectly equal scale for any given pitch of A. The particulars of his forks and the mode of counting them are contained in his little pamphlet *Der physikalische und musikalische Tonmesser*, (Essen, Bädeker, 1834, p. 80, with lithographic plates),¹ from which the preceding history has been gathered. During his lifetime he issued four smaller tracts, showing how to tune organs by beats, which were collected after his death as *H. Scheibler's Schriften*, etc. (Crefeld, Schmöller, 1838). This is quite out of print, but copies of the former book are still to be bought. [These pamphlets form part of the interesting bequest left to the late A. J. Hipkins, by Dr. A. J. Ellis, and will, it is hoped, complete Mr. Hipkins's gift to the Royal Institution in memory of his friend Dr. Ellis.] His wonderful tonometer of fifty-two forks has completely disappeared. But another one, of fifty-six instead of fifty-two forks, which belonged to Scheibler, still exists, and was inherited by his daughter and grandson, who lent it to Herr Amels, formerly of Crefeld, who again lent it to the late Dr. Alexander J. Ellis, who counted it, and having checked his results by means of M'Leod's and Mayer's machines for measuring pitch, gave the value of each fork in the *Journal of the Society of Arts* for March 5, 1880, p. 300, correct to less than one-tenth of a double vibration. The two extreme forks of this fifty-six fork tonometer agree in pitch precisely with those of the fifty-two fork tonometer, but no other forks are alike, nor could the forks of the fifty-two fork tonometer have been easily converted into those of the other one. In 1834, at a congress of physicists at Stuttgart, Scheibler proposed with approval the pitch A 440 at 69° F. (= A 440.2 at 59° F.) for general purposes, and this has been consequently called the Stuttgart pitch.²

A. J. H.

SCHEIDEMANN. The name of a family of organists in Hamburg in the 16th and 17th centuries. Gerber, in his *Lexikon*, mentions Heinrich Scheidemann, born about 1600, died 1654, but appears to confuse him with an older

¹ The physical and musical Tonometer, which proves visibly by means of the pendulum, the absolute numbers of vibrations of musical tones, the principal kinds of combinational tones, and the most rigid exactness of equally tempered and mathematical just chords.

² He selected it as the mean of the variation of pitch in pianos as then tuned at Vienna, and not from the fact that it enables the scale of C major, in just intonation, to be expressed in whole numbers, as has been sometimes stated.

and more important member of the family, David Scheidemann, probably an uncle of Heinrich. The date of David Scheidemann's birth is not ascertained, but in 1855 he was organist of St. Michael's Church, Hamburg. He is chiefly noteworthy as associated with three other Hamburg organists of repute, Jacob and Hieronymus Praetorius, and Joachim Decker, in the compilation of what we should now call a Choralbuch, though this name was not in general use then,¹ a book of the usual hymn-tunes or chorales of the Lutheran Church, simply harmonised in four parts for congregational singing. This book appeared in 1604. Its original title is 'Melodeyen-Gesangbuch, darein Dr. Luthers und ander Christen gebräuchlichste Gesänge, ihren gewöhnlichen Melodien nach . . . in vier stimmen übergesetzt.' The example first set by Lucas Osiander in 1586, of uniformly giving the melody to the soprano part, and not to the tenor, as the older practice was, is here followed, and in the preface attention is called to the greater convenience of this for congregational singing. Of the eighty-eight tunes in the book, David Scheidemann harmonised thirteen or fourteen; among them there appears for the first time harmonised 'Wie schön leuchtet der Morgenstern.' Gerber, confusing David with Heinrich, attributes both the melody and the setting of this Chorale to Heinrich. But Winterfeld shows (*Ev. Kirch.* i. p. 90) that the melody belongs to neither, but seems to be taken from an old secular song, beginning with similar words ('Wie schön leuchten die Aengelein'); to the metre of which Philip Nicolai in 1599 wrote the words of his hymn, 'Wie schön leuchtet der Morgenstern.' It should be mentioned, however, that Wackernagel (*Das Deutsche Kirchentied*, Bd. I. pp. 618-19), after giving the words of the secular song in full, adduces reasons for believing that in this case the secular song is a later parody of Nicolai's hymn, not *vice versa*. Winterfeld praises Scheidemann's settings of the chorales for their fresh animated character, and for the happy way in which the rhythmical peculiarities of the old melodies are brought out. Chorales were not then sung as now, all in slow uniform rhythm, but many of the older melodies had curious changes of rhythm, as from common to triple time, in successive lines. See the

specimens of Scheidemann in Winterfeld, Part I. Nos. 70, 71.

HEINRICH SCHEIDEMANN, mentioned above, was the son of Hans Scheidemann, organist of St. Catherine's Church, Hamburg. In 1616 he and Jacob Praetorius, the younger, were sent at the public expense to Amsterdam, to be initiated into a higher style of organ-playing, under the tuition of the then most famous organ-player of Europe, Peter Sweelinck. In 1625 Heinrich succeeded his father as organist of St. Catherine's. Mattheson says of Scheidemann that his organ-playing and compositions were like himself, popular and agreeable, easy and cheerful, with no pretence or desire for mere show. Some of his organ pieces have been discovered in MS. tablature at Lüneburg, for an estimate of which see Seiffert's *Geschichte der Klaviermusik*, vol. i. pp. 117-19. Heinrich Scheidemann was again associated with Jacob Praetorius in contributing melodies to Rist's 'Himmliche Lieder,' which were published in 1641-42. Praetorius composed ten to the 4th part of Rist's Book, Scheidemann ten to the 5th part, entitled 'Höllenlieder.' One of Scheidemann's melodies in this collection, 'Frisch auf und lasst uns singen,' continued for a while in church use, as it appears again in Vopelius's 'Leipziger Gesangbuch' of 1682. Among Scheidemann's pupils were Werner Fabricius, Matthias Weckmann, and Joh. Adam Reinken, the last of whom became his successor as organist of St. Catherine's, Hamburg, in 1654. Max Seiffert, in the *Sammelbände* of the *Int. Mus. Ges.* ii. p. 117, gives the date of Scheidemann's death as 1663, but Eitner, in the *Quellen-Lexikon*, gives reasons for adhering to the previously accepted date, 1654, as there is no doubt that Reinken succeeded him in that year.

J. R. M.

SCHEIDEMANTEL, CARL, born Jan. 21, 1859, at Weimar, was taught singing by Bodo Borchers, and on Sept. 15, 1878, made his début there as Wolfram. He remained there until 1886, having in the meantime received further instruction from Stockhausen at Frankfurt. In 1884, on leave from Weimar, he sang in German at Covent Garden, June 4, as Kothner, as the Minister ('Fidelio'), Herald ('Lohengrin'), Kurwenal, Wolfram, and, July 9, Rucello, on the production of Stanford's 'Savonarola.' He made a very favourable impression, both on account of his fine baritone voice and his excellent singing and acting. In 1886 he sang at Bayreuth as Klingsor, Amfortas, a remarkable performance, and Kurwenal; after which he made his débuts at Dresden as the Dutchman, and the Templar and Hans Helling of Marchner, as a permanent member of the company there, as successor to Degele, the result of a successful 'gastspiel' the previous year. Here he has remained ever since (1907), and has gained great popularity in a

¹ It is worth while noting that the word Choral (in English usually spelt Chorale), as now restricted to the melodies of German metrical hymns, really originated in a misunderstanding of what Walther meant when he spoke of Luther as having called the 'deutscher Choralgesang' into life. What both Luther and Walther meant by 'Choralgesang' was the old Cantus Choralis or Plain-song of the Latin Church, which Luther himself wished to retain; and his merit consisted in the adaptation of the chief parts of the Latin Choral to German words, his work in this respect corresponding to Marbeck's 'Book of Common Prayer Notes' with us in England. All the older Lutheran Church-musicians, such as Lucas Lossius and Michael Praetorius, used the words Choral and Choralgesänge in this sense of the old Plain-song melodies to the graduales, sequences, and antiphons, whether sung to Latin or adapted to German words. It was only when German metrical hymns gradually superseded in common use the other choral parts of the service, that the name Choral in course of time became restricted to the melodies of these hymns. See Winterfeld, *Ev. Kirch.* i. pp. 151, 152.

large number of parts. On Dec. 12, 1896, he sang with great success as the hero in Bungert's 'Odysseus' Heimkehr,' on Jan. 29, 1898, in 'Kirke,' and on March 21, 1901, in 'Nausikaa' (the second and third parts respectively of the Homeric tetralogy), on May 21, 1901, in Paderewski's 'Manru,' on the production of that opera. On leave of absence, in 1888, he sang as Hans Sachs at Bayreuth; in 1893, at the Gotha Opera Festival, as Rodolph in the revival of Boieldieu's 'Petit Chaperon Rouge.' On May 27, 1899, he sang again at Covent Garden, as Hans Sachs, a performance remarkable both on account of his fine acting and for the refinement of his singing and declamation. In addition he has sung in the principal cities of Germany and Austria, both in opera and concerts. In 1906 he took the part of Scherazmin in a successful revival of 'Oberon' at Dresden. A. C.

SCHEIDT, SAMUEL, one of the celebrated three S's (the other two being Heinrich Schütz and Hermann Schein, his contemporaries), the best German organist of his time, was born at Halle in 1587. His father, Conrad Scheidt, was master or overseer of salt-works at Halle. The family must have been musical, as some works are still preserved of Gottfried, Samuel's brother, which A. G. Ritter (*Geschichte der Orgelmusik*) says show considerable musical ability. Samuel owed his training as an organist to the then famous 'Organisten-macher' Peter Sweelinck of Amsterdam. About 1605 he betook himself to Amsterdam, and became a pupil of Sweelinck. In 1608 or 1609 he became organist in the Moritzkirche in Halle, and in 1620 at least, if not earlier, he had received the appointment of organist and capellmeister to Christian Wilhelm, Markgraf of Brandenburg, and then Protestant Administrator of the Archbishopric of Magdeburg. In this capacity Scheidt officiated not at Magdeburg, but in the Hofkirche at Halle. The troubles of the Thirty Years' War and the misfortunes of his patron, the siege and sack of Magdeburg in 1631, and the abdication of Christian Wilhelm in 1638, seem to have made no difference to Scheidt's official position at Halle, though his income and means of living must have suffered; the service in the Hofkirche ceased after 1625, and the Moritzkirche was destroyed by fire in 1637. We have no record as to his personal relations with Christian's successors in the administration of the Magdeburg archbishopric, but Chrysander in the *Jahrbücher für musikalische Wissenschaft*, i. p. 158, prints a letter from Scheidt to Duke Augustus of Brunswick in 1642, which seems to imply that he was then looking for some patronage or assistance from that art-loving prince. Scheidt never left Halle, however, and his circumstances may have improved, as in his will he bequeathed some money for the

sake of the organ in the St. Moritzkirche at Halle. He died at the age of sixty-seven on March 24, 1654.

Scheidt's first published work appeared at Hamburg in 1620 ('Cantiones Sacrae octo vocum'), and consists of thirty-nine vocal compositions, fifteen of which are settings of Lutheran chorales. In 1621-22 appeared the first part of his sacred concertos, in 2-12 vocal parts with instrumental accompaniment. This was followed by successive books of similar pieces, published in 1631, 1634, 1635, and 1640. His fame, however, rests not on his vocal compositions, but on his works for the organ. His next work, also published at Hamburg in 1624, is considered epoch-making in the history of organ music. It consists of three parts, but the whole work bears the general title 'Tabulatura Nova'; the same title, indeed, as many earlier works of the same kind in Germany (e.g. Ammerbach, 1571; B. Schmid, 1577; Paix, 1583; Woltz, 1617), from all of which, however, it differs widely both in aim and style, and indeed marks the beginning of a new and better treatment of the organ both with regard to playing and to composition. From 1570 to about 1620, organ playing in Germany almost entirely consisted in what was known as the art of 'coloriren,' the art of 'colouring' melodies sacred or secular by the inserting of meaningless passages, all framed on one and the same pattern, between each note or chord of the melody. These earlier Tablature-books were all compiled simply to teach this purely mechanical art of 'colouring' melodies for the organ. The music was written in the so-called German Tablature, i.e. with letters instead of notes.¹ (For a full account of these German 'Coloristen' of the 16th and 17th centuries, see A. G. Ritter's *Geschichte der Orgelmusik*, pp. 111-39.) Scheidt's 'Tabulatura Nova' put an end to this miserable style of playing and composing for the organ, as well as to the old German Tablature. The music in his book is noted in score of four staves, with five lines to the stave, so far differing from the notation both of Frescobaldi and Sweelinck, the former using two staves of six and eight lines respectively, the latter two staves both of six lines. To give an idea of the contents of Scheidt's work, we transcribe in full the separate titles of the three parts:—

I. Tabulatura Nova, continens variationes aliquot Psalmorum, Fantasiarum, Cantilenarum, Passamezo et Canones aliquot, in gratiam Organistarum adornata a Samuele Scheidt Hallense, Reverendiss. Illustrissimique Principis ac Domini, Christiani Guilielmi Archiepiscopi Magdeburgensis, Primatis Germaniae Organista et Capellae Magistrum. Hamburgi . . . MDCXXIV.

II. Pars Secunda . . . continens Fugarum, Psalmorum, Cantionum et Echus Tocatae variationes varias et omnimodas. Pro quorumvis Organistarum captu et modulo. . .

¹ For an example of German Organ Tablature, see Schlecht, *Geschichte der Kirchenmusik*, p. 377 ff.

² 'Geschnacklose Barbaren' (tasteless barbarians), as Ambros calls them.

III. Tertia et ultima pars, continens Kyrie Dominicale, Credo in unum Deum, Psalmum de Coena Domini sub Communione, Hymnos praecipuorum Festorum totius anni, Magnificat 1-9 toni, modum ludendi pleno Organo et Benedicamus . . . In gratiam Organistarum, praecipue eorum qui musice pure et absque celerissimis coloraturis Organo ludere gaudent . . .

The last words mark an important difference between the third part and the two preceding. In the first two parts the composer appears to wish to show how he could beat the 'Colourists' on their own ground, his figures and passages, however, not being like theirs, absolutely meaningless and void of invention, but new and varied, and having an organic connection with the whole composition to which they belong. He shows himself still as virtuoso, desirous to extend the technique of organ-playing, while at the same time displaying his contrapuntal mastery. So far as technique is concerned, there is to be noticed in Scheidt the extended use of the pedal, so different from Frescobaldi's occasional use of it for single notes merely, also the imitation of orchestral effects, such as what he himself terms 'imitatio violistica,' the imitation of the effects of the different ways of bowing on the violin, and the imitation of an organ tremulant itself by the rapid interchange of the fingers of the two hands on one and the same key ('Bicinium imitatione tremula organi duobus digitis in una tantum clave manu tum dextra, tum sinistra'). The first two parts contain a mixture of sacred and secular pieces, the secular pieces, however, being marked off as for domestic rather than for church use by the absence of a pedal part. The sacred pieces consist of ten fantasias or sets of variations on chorale melodies, with a few fugues or fantasias on another motive, among which is a 'fantasia fuga quadruplici,' on a madrigal of Palestrina's, which Ritter describes as a masterpiece of contrapuntal art, four subjects from the madrigal being treated first singly and then together, and with contrary motion and other devices. The secular pieces consist chiefly of variations on secular melodies, among which appears one entitled an English song 'de fortuna' (i.e. the famous 'Fortune, my foe'). The third part of the 'Tabulatura Nova' stands, however, on a higher level than the first two. The composer expressly renounces the virtuoso; he writes, as the title-page says, for those who delight to play the organ purely musically, and without mere ornamental and passage work. In this third part he gives very full directions with regard to registering both for manuals and pedal. It is intended entirely for church use, and both by the choice of pieces, and the manner in which they are arranged, it gives us an insight into the way in which the organ was very frequently employed in the church services of those days. It was not then generally used to accompany or sustain the voices of the choir or congregation, but rather to alternate with them. Thus,

for instance, between each verse of the 'Magnificat' sung by the choir without accompaniment, the organ would come in independently with some variation or changing harmonies on the plain-song melody. A further use of the organ was even to take the place of the choir in making the responses to the ecclesiastical intonations of the officiating clergy when there was no proper choir to do this. Frescobaldi's works (especially 'Fiori Musicali,' 1635) furnish instances of this use of the organ in the Roman Church. Thus when the priest had intoned the Kyrie of the Mass, in the absence of a proper choir, the organist would answer, as Ambros expresses it, when speaking of Frescobaldi's works of the kind, 'with a kind of artistically-ennobling and enriching echo' ('mit einer Art von künstlerisch-veredelnden und bereichernden Echo'), that is to say, the organist, taking up the plain-song theme, would not just harmonise it note by note, but treat it in the form of a short polyphonic composition for the organ. (See the quotations from Frescobaldi in Ambros's *Geschichte der Musik*, iv. pp. 444-50.) The third part of Scheidt's 'Tabulatura' shows that this usage was not confined to the Roman Church, but was also retained for a considerable time in the Lutheran. It opens with twelve short movements based on the plain-song of the different sections of the Kyrie and Gloria of the Mass, and the remark, or rubric, as we might call it, 'Gloria canit Pastor,' shows that they were expressly intended as responses made by the organ to the intonation of officiating clergy. The 'Magnificat' follows, in all the church tones, one verse sung by the ecclesiastic and every alternate verse arranged to be played by the organ in lieu of a choir. This way of treating the 'Magnificat' prevailed in Lutheran Churches, even up to Pachelbel's time (1706), though the plain-song was more and more put into the background, and the practice became simply an excuse for interludes on any motive. After the Magnificat came a series of hymns common to both Roman and Lutheran churches, with their plain-song melodies treated in a similar fashion. The book further contains Luther's version of the Creed ('Wir glauben All' an einen Gott') with its Doric melody, John Huss's Communion Hymn, arranged to be played instead of being sung during Communion. The two last pieces in the book are 6-part movements for the full organ, meant to be played at the end of Vespers. Interwoven with the last is the liturgical melody of the Benedicamus. In all these compositions Scheidt has faithfully adhered to the original plain-song melodies when they appear as Cantus Firmus, but in the further working out has not been content simply to harmonise them according to the laws of the Church modes, but has so far altered them in accordance with the new ideas of harmony then beginning to make way. But

there is still wanting in him a consistent system of modulation. The chromatic semitones are still employed by him rather in a haphazard sort of way.

Twenty-six years later, viz. in 1650, Scheidt published another work for the organ, his second and last, which shows a different conception as to the use of the organ in the services of the Church, and probably marks a change which was then going on gradually in the practice of the Lutheran Church. The congregational singing of metrical hymns was gradually superseding the older liturgical music, and the organ had more and more to surrender its independence to accommodate itself to the simple accompaniment in 4-part harmony of the melodies of these hymns, which now began to assume exclusively the name of Choral-musik. This, which was at first a loss, became in time a gain, as it deepened the sense of the value of harmony for its own sake; and besides, out of this originated the new art-form of the Choral-Vorspiel of later days. Scheidt's last organ work was intended to meet the new requirements. Its title sufficiently explains its object: 'Tabulatur-buch 100 geistlicher Lieder u. Psalmen D. Martini Lutheri und anderer gottseliger Männer für die Herren Organisten mit der Christlichen Kirchen u. Gemeine auf der Orgel, desgleichen auch zu Hause zu spielen u. zu singen, auf alle Fest- u. Sonntage durchs ganze Jahr mit 4 Stimmen componirt . . . Gedruckt zu Görlitz . . . im 1650 Jahr.' This work is dedicated to the Magistrates and Town Council of Görlitz, and the composer seems to imply that it had been undertaken at their special desire. In this, as in his previous work, there is noticeable, as Ritter points out, the same undecided struggle in the composer's mind between attachment to the old and inclination to the new. Thus, while he strictly adheres to the original rhythms of the old melodies, he harmonises according to the rules of modern musical accent, and thus the rhythm of the melody is not in agreement with the rhythm implied by the harmony. See for illustration his setting of 'Ein feste Burg' in Ritter, *Geschichte der Orgel-Musik*, p. 19, the first two bars of which may here be given:—

One chorale appears in this book for the first time, viz. 'O Jesulein süß, O Jesulein mild,' which has been adapted in later chorale books to the words 'O heiliger Geist, O heiliger Gott.' As harmonised by Scheidt it is given in Winterfeld *Ev. K. G.* ii. No. 218, and Schöberlein, *Schatz des Chorgesangs*, ii. No. 457.

If it is his organ works that now entitle Scheidt to honourable remembrance, and give him a distinct position of his own amongst composers, it was not his organ works, but his vocal compositions, that procured him the esteem of his contemporaries, and caused him to be ranked as one of the celebrated three S's. Of his vocal works, besides the 'Sacrae Cantiones' of 1620, mentioned above, there are mentioned 'Liebliche Kraft-Blümlein concertweise mit 2 Stimmen sampt dem General-Baase,' Halle, 1625. Another work should also be recorded, consisting of 'Paduana, Galliarda,' etc. for four and five voices, 1621, the second part of which was called 'Ludrum musicorum prima et secunda pars,' and published in 1622.

It is natural to draw comparisons, as Ritter does in his history above quoted, between Scheidt and Frescobaldi, whose lives covered nearly the same period of time, and who may both be regarded as the true founders of modern organ music, or rather, the Italian of clavier music generally, the German of specifically organ music. Of the two, Frescobaldi is the greater genius, showing greater force of imagination in the invention of new forms and this solution of difficult problems; Scheidt is more laborious and painstaking, showing greater study of the capabilities of his instrument, as, for instance, in the use of the pedal, and in registering generally, with neither of which did Frescobaldi concern himself. As Ritter points out, while Scheidt has thus greater command of all the resources of expression, Frescobaldi has more of real poetic expression in his music itself. For more detailed comparison of the two masters it will be sufficient to refer to Ritter's work. [See Max Seiffert's preface to the first vol. of the *Denkmäler deutscher Tonkunst*, containing Scheidt's 'Tabulatura Nova'; the *Vierteljahrsschrift für Musikwiss.* vii. p. 188 ff.; and the *Sammelbände* of the *Int. Mus. Ges.* i. p. 401, where a detailed study of Samuel and Gottfried Scheidt is to be found, the work of Arno Werner. Also titles of works in the *Quellen-Lexikon*.] J. R. M.

SCHEIN, JOHANN HERMAN, was born Jan. 20, 1586, at Grunhain in Saxony, where his father was the Lutheran pastor. Having lost his father at an early age, he was taken to Dresden and became a chorister in the Court Chapel there in 1599. His further education was received at the Gymnasium of Schulpforta in 1603 and the University of Leipzig (1607). Of his musical training further than what he received in the Court Chapel at Dresden we have no details. In 1615 he was invited to be capellmeister at Weimar, but held this post for only two years. On the death of Seth Calvisius in November 1615 he obtained the appointment of Cantor to the Thomasschule in Leipzig, which post he held till his death Nov. 19, 1630.

Schein is chiefly known to later times by his 'Cantional,' first published in 1627. Its original title is 'Cantional oder Gesangbuch Augspurgischer Confession, in welchem des Herrn D. Martini Lutheri vnd anderer frommen Christen, auch des Autoris eigne Lieder vnd Psalmen. . . . So in Chur- vnd Fürstenthümern Sachsen, insonderheit aber in beiden Kirchen und Gemeinen allhier zu Leipzig gebräuchlich, verfertigt und mit 4, 5, 6 Stimmen componirt.' A second (enlarged) edition appeared in 1645 after Schein's death. As the title shows, it consists of Choral-melodies, both old and new, harmonised for ordinary church use, mostly note against note. Schein himself appears in this book in three capacities, viz. as poet, melodist, and harmonist. Of the 200 and odd Choral-melodies in the book about 80 are Schein's own, a few of which have still held their ground in modern chorale books, though some appear to be attributed to him by mistake. Schein's book differs from Crüger's similar book of later date (1648) in retaining the old irregular rhythm of Choral-melodies, while Crüger has transformed their rhythms according to more modern ideas. But if Schein still retains the old rhythm in the melodies, in his harmonies he has almost entirely lost, as Winterfeld points out, the feeling for the peculiarities of the old church modes in which those melodies are written, though otherwise his harmonies are serious and dignified. With Michael Praetorius and Heinrich Schütz, and probably through their influence, Schein was one of the pioneers in Germany of the new movement in music proceeding from Italy at the beginning of the 17th century. Naturally his other works show this more plainly than the 'Cantional,' as many of them are avowedly written in imitation of Italian models. These other works are as follows:—

1. *Venus-Kränzelein mit allerley lieblichen und schönen Blumen gezieret und gewunden, oder Neue Weltliche Lieder mit 5 Stimmen, neben etlichen Intraden, Gagliarden, und Canzonen*. . . . Leipzig, 1609. This work consists of sixteen secular strophic songs a 5 and one a 3, in the simplest Italian saxonetta style, homophonic throughout, besides eight instrumental pieces a 5 and 6.
2. *Cymbalum Sionium sive Cantiones Sacrae 5, 8, 8, 10 et 12 vocum*. Leipzig, 1615. This work contains thirty sacred motets, some to Latin texts, some to German, besides an instrumental canzone a 5 as *Corollarium*.
3. *Banchetto Musicale, neuer amthütiger Padouaner, Gagliarden, Couranten und Allemanden 3 auf allerley Instrumenten, bevorans auf Violon nicht ohne sonderbare grata: lieblich und lustig zu gehörschen*. . . . Leipzig, 1617. This work was dedicated to Duke Johann Ernst of Weimar, and contains twenty instrumental suites consisting of Paduanas, Gagliardas, Courantes a 5 and Allemande and Tripla a 4, with two separate pieces at the end.
4. *Opella Nova, erster Theil Geistlicher Concerten mit 3, 4 und 5 Stimmen zusamt dem General-Bass auf jetzt gebräuchliche Italienische Invention componirt*. Leipzig, 1618. This work contains thirty sacred compositions on German texts in the new Italian style, with instrumental basso continuo, which, however, seems to be purely *ad libitum*.
5. *Musica Boscareccia, Waldliederlein auf Italien-Villanellesche Invention*. Belden für sich allein mit lebendiger Stim, oder in ein Clavierembel, Spinnet, Tiorba, Lauten, etc. This work appeared in three parts published in 1621, 1626, 1628 respectively, and contains altogether fifty secular compositions a 3 on poems by Schein himself written in the artificial pastoral style of the time. These pieces are more polyphonic in their character than those of the 'Venus-Kränzelein,' and, as the title indicates, they may be sung by voices alone or with the substitution of instruments for one or other of the vocal parts or instrumental accompaniment generally. A new edition of the work appeared in 1644, with the substitution of sacred texts for the original secular.
6. *Fontana d'Israel, Israel Brünlein auserlesener Kraft-sprichlein altes und neuen Testaments von 5 und 6 Stimmen sambt dem*

General Bass auf eine sonderbare enmtige Italian-Madrigalische Manier sowohl für sich allein mit lebendiger Stim und Instrumenten als auch in die Orgel Clavierembel bequemlich zugebrauchen. Leipzig, 1623. This work consists of twenty-six sacred pieces a 5 and 8, on German texts, composed in the later freer Madrigal style of Monteverde and others, allowing greater boldness of harmonic progression.

7. *Dilecti pastorali, Hirten Lust von 5 Stim. zusamt dem General-Bass auf Madrigal Manier*. Leipzig, 1624. 15 Nos.

8. *Studenten-Schmaus a 5*. Leipzig, 1626. 5 Nos.

9. *Opella Nova, Ander Theil Geistlicher Concerten*. Leipzig, 1626. Contains thirty-two sacred pieces, twenty-seven with German texts, five with Latin.

Besides these works, and the Cantional of 1627, the *Quellen-Lexikon* enumerates a large number of occasional compositions for weddings and funerals, many of which, however, Schein himself incorporated into the publications above specified.

In 1895 Herr Arthur Prüfer published a monograph on Schein's Life and Works, by way of preparation for a complete edition of his works, two volumes of which have since appeared, containing the 'Venus-Kränzelein,' 'Banchetto Musicale,' and 'Musica Boscareccia.' J. R. M.

SCHELBLE, JOHANN NEPOMUK, a thoroughly excellent and representative German musician, born May 16, 1789, at Hüfingen, in the Black Forest, where his father was superintendent of the House of Correction. His strict musical education was begun in a Monastery of Marchtal 1800-3; and continued at Donaueschingen, under Weisse. He then spent some time, first with Vogler at Darmstadt, and then with Krebs, a distinguished singer at Stuttgart, and there, in 1812, he filled the post of elementary teacher in the Royal Musical Institution, a very famous and complete school of those times.¹ In 1813 he went to Vienna, lived in intimate acquaintance with Beethoven, Moscheles, Weigl, Spohr, etc., composed an opera and many smaller works, and went on the stage, where, however, his singing, though remarkable, was neutralised by his want of power to act. From Austria in 1816 he went to Frankfort, which became his home.

Here the beauty of his voice, the excellence of his method, and the justness of his expression, were at once recognised. He became the favourite teacher, and in 1817 was made director of the Musical Academy. This, however, proved too desultory for his views, and on July 24, 1818, he formed a Society of his own, which developed into the famous 'Cæcilian Society' of Frankfort, and at the head of which he remained till his death. The first work chosen by the infant institution was the 'Zauberflöte'; then Mozart's Requiem; then one of his Masses; and then works by Handel, Cherubini, Bach, etc. In 1821 the Society assumed the name of the 'Cæcilienverein'; the répertoire was increased by works of Palestrina, Scarlatti, and other Italian masters, and at length, on March 10, 1828, Mozart's 'Davidde penitente' and the Credo of Bach's Mass in B minor were given; then, May 2, 1829 (stimulated by the example of Mendelssohn in Berlin), the Matthew Pas-

¹ See the *A.M.Z.* 1812, p. 334.

sion; and after that we hear of 'Samson' and other oratorios of Handel, Bach's motets, and choruses of Mendelssohn, whose genius Schelble was one of the first to recognise, and whose 'St. Paul' was suggested to him by the Caecilian Association, doubtless on the motion of its conductor. Whether the Society ever attempted Beethoven's mass does not appear, but Schelble was one of the two private individuals who answered Beethoven's invitation to subscribe for its publication. [See vol. i. p. 255, note 6; vol. iii. p. 131a.]

His health gradually declined, and at length, in the winter of 1835, it was found necessary to make some new arrangement for the direction of the Society. Mendelssohn was asked (*Letters*, Feb. 18, 1836), and undertook it for six weeks during the summer of 1836. Mendelssohn's fondness and esteem for the man whose place he was thus temporarily filling is evident in every sentence referring to him in his letters of this date. Schelble died August 7, 1837. His great qualities as a practical musician, a conductor, and a man, are well summed up by Hiller¹ in his book on Mendelssohn, to which we refer the reader. His compositions have not survived him. His biography was published shortly after his death—*J. N. Schelble*, von Weissmann (Frankfort, 1838). G.

SCHELLER, JAKOB, born at Schettal, Rakonitz, Bohemia, May 16, 1759, a very clever violinist. He was thrown on his own resources from a very early age, and we hear of him at Prague, Vienna, and Mannheim, where he remained for two years playing in the court band, and learning composition from Vogler. After more wandering he made a stay of three years in Paris, studying the school of Viotti. He then, in 1785, took a position as *Concertmeister*, or leading violin, in the Duke of Würtemberg's band at Stuttgart, which he retained until the establishment was broken up by the arrival of the French in 1792. This forced him to resume his wandering life, and that again drove him to intemperance, till after seven or eight years more he ended miserably, being even obliged to borrow a fiddle at each town he came to.² He was more celebrated for his tricks and *tours de force* than for his legitimate playing. Spohr (*Selbstbiog.* i. 280) speaks of his flageolet-tones, of variations on one string, of pizzicato with the nails of the left hand, of imitations of a bassoon, an old woman, etc.; and Fétis mentions a trick in which by loosening the bow he played on all four strings at once. By these, and probably also by really fine playing, he excited so much enthusiasm, that it used to be said of him 'one God; one Scheller.' G.

SCEMELLI, GEORG CHRISTIAN, born at Herzberg about 1678, was a pupil of the Thomas-schule at Leipzig from 1695, and was cantor of

the castle at Zeitz. In 1736 he published a 'Musicalisches Gesang-Buch, Darinnen 954 geistreiche, sowohl alte als neue Lieder und Arien, mit wohlgesetzten Melodien, in Discant und Bass, befindlich sind . . . ' In the preface the compiler states that the tunes in his book were partly newly composed, partly improved, by J. S. Bach. Various authorities on the life of Bach have spent much labour in investigating which were the tunes newly composed by him, and which were merely revised and corrected by him. While Spitta attributes twenty-nine out of the sixty-nine tunes to Bach, Herr F. Willner, the editor of the volume of the Bach-Gesellschaft (xxxix.) in which the hymns appear, considers that only twenty-four are Bach's; while Eitner, in the *Quellen-Lexikon*, assigns only twenty-two to the master. His name, curiously enough, is appended to only one of the sacred songs of which the collection mainly consists (the beautiful 'Vergiss mein nicht,' above which is written, 'di J. S. Bach, D. M. Lips.' See S. Spitta, *J. S. Bach*, Eng. trans. i. 367-70; iii. 109-114.) M.

SCHENK, JOHANN, (I) was a viol-da-gamba player in the service of the Elector Palatine at Düsseldorf in the latter part of the 17th century. He was afterwards at Amsterdam, where he published numerous works for his instrument, and other compositions. The following are known to have existed, but only a few of them are still extant, according to the *Quellen-Lexikon*:—

- Op.
1. *Airs from an opera, 'Ceres en Bacchus.'*
2. *Konstoeffeningen (sonatas or suites).*
3. *Il giardino armonico, sonate da camera a 4 (two vlns., gamba, and continuo).*
4. *Koninklyke Harpstederen, 150 airs for one or two voices, with a prelude and postlude.*
5. *Scherzi musicali, for viol da gamba and bass.*
6. *Eighteen sonatas for violin and bass.*
7. *La nina del Reno, twelve sonatas or suites.*
8. *L'écho du Danube, sonatas.*
9. *Les Fantaisies bizarres de la goutte, twelve sonatas for viol da gamba.*

(*Quellen-Lexikon*; Riemann's *Lexikon*.) M.

SCHENK, JOHANN, (II) is mainly interesting from his connection with Beethoven; he was born of poor parents, Nov. 30, 1753,³ at Wiener Neustadt in Lower Austria, and at an early age was admitted into the Archbishop's choir at Vienna. [In 1774 he was a pupil of Wagenseil.] In 1778 he produced his first mass, which he followed by other sacred pieces, and by many Singspiele and Operas [beginning with 'Die Weinlese,' 1785, and 'Die Weihnacht auf dem Lande,' 1786, and ending with 'Der Fassbinder,' 1802], which gained him a considerable name, and rank with those of Dittersdorf and Wenzel Müller. In addition he wrote symphonies, concertos, quartets, lieder, etc. The autographs of many of these are in the Gesellschaft der Musikfreunde at Vienna, with that of a theoretical work, *Grundsätze des Generalbasses*. [In 1794 he was appointed music-

¹ Mendelssohn, translated by Miss M. E. von Oelen, p. 8.

³ So in Riemann's *Lexikon*; Eitner (*Quellen-Lexikon*) gives the date as 1761.

director to Prince Carl von Auereberg; in 1795 his 'Achmet und Almanzine' was brought out at Vienna, and finally 'Der Dorfbarbier' was produced at the Kärnthnertheater, Nov. 7, 1796, a work that was always popular, and kept its position in the repertory for many years. Between this, his masterpiece, and the 'Fasshinder,' already mentioned, came 'Der Bettelstudent' (1796) and 'Die Jagd' (1797).] The anecdote of his kissing Mozart's hand during the overture on the first night of the 'Zauberflöte' has been already related. [See MOZART, vol. iii. p. 300a, note 1.] His first meeting with Beethoven is told in Bauernfeld's biographical sketch of Schenk in the *Wiener Zeitschrift für Kunst* for 1837 (Nos. 5, 6, and 7). Gelinek mentioned to Schenk that he had found a young man whose playing excelled anything ever heard before, excepting Mozart's, and who had been studying counterpoint for six months with Haydn, but to so little purpose that it would be a great kindness if Schenk would give him some help. A meeting was arranged at Gelinek's house, when Beethoven improvised for over half an hour in so remarkable and unusual a manner that forty years afterwards Schenk could not speak of it without emotion. Schenk next went to see the young artist. Himself a model of neatness, he was rather taken aback by the disorderliness of the room, but Beethoven's reception was cordial and animated. On the desk lay some short exercises in counterpoint, in which on the first glance Schenk detected a few errors. Beethoven's troubles soon came out. He had come to Vienna aware of his own ability, but anxious to learn; had at once put himself in the hands of the first master to be got, and yet was making no progress. Schenk at once agreed to help him, and took him through Fux's 'Gradus ad Parnassum,' with which indeed Haydn was familiar enough. As it was essential that Haydn should not be entirely thrown over, Beethoven copied exercises partly corrected by Schenk,¹ and Haydn was then able to congratulate himself on the progress of his hot-headed pupil. The affair was of course kept strictly secret, but Beethoven having fallen out with Gelinek the latter gossiped, and Schenk was deeply annoyed. Beethoven, however, when on the point of following Haydn to Eisenstadt, wrote very gratefully to Schenk,² and the two remained on pleasant terms. It is interesting to know that besides Mozart and Beethoven, Schenk was acquainted with Schubert. Bauernfeld introduced them, and so congenial were they that after an hour's talk they parted like old friends.

Very unassuming in his ways, Schenk was

¹ This surely says a great deal for Beethoven's patience, and for his desire not to offend Haydn.

² 'I wish I were not starting to-day for Eisenstadt. I should like to have had more talk with you. In the meantime you may count upon my gratitude for the kindness you have shown me. I should do all in my power to return it. I hope to see you and enjoy your society again soon. Farewell, and do not forget your BEETHOVEN.'

respected as a thorough though somewhat pedantic teacher of the piano and composition. His portrait, in the Museum of the Gesellschaft der Musikfreunde in Vienna, shows a pleasing countenance. [Two cantatas, 'Die Huldigung,' and 'Die Mai,' his last complete compositions, date from 1819] and at an advanced age he set about remodelling his 'Jagd,' for which he got Bauernfeld to write him a new libretto. He had finished the first act when he died, Dec. 29, 1836. C. F. P.

SCHERZANDO, SCHERZOSO, playful, lively; a direction of frequent occurrence, indicating a passage of a light and cheerful character. It is occasionally used, in combination with some other direction, to indicate the style of a whole movement, as *Allegro scherzando*, *Allegretto scherzando* (Beethoven, Symphony No. 8), etc., but its more usual and characteristic application is to a phrase which is to be played in a lively manner, in contrast to the rest of the movement or to some other phrase. In such passages, as a rule, the time is intended to be taken more freely than usual, while any marks of phrasing which occur should be strictly adhered to. In fact the phrasing of a *scherzando* passage is of paramount importance, for by it alone can the proper character be given.—The word is found, where one would little expect it, in the old editions of Beethoven's Mass in D, near the beginning of the 'Et vitam venturi'; but on reference to Breitkopf & Härtel's complete edition it turns out to have been read in error for *sforzando*! M.

SCHERZO. An Italian word signifying 'jest' or 'joke.' Its application in music is extensive, and—as is the case with many other musical titles—often incorrect. Most of the movements, from the time of Mendelssohn onwards, would be better designated as 'Caprices' or 'Capriccios.' Obviously the word signifies that the piece to which it applies is not merely of a light and gay character, but is of the nature of a joke, in that it possesses that rare quality in music, humour. But, exclusive of Haydn and Beethoven, what musician shows humour, real unaffected drollery, in his music?

The term seems to have been first employed (Scherzando) merely as a direction for performance, but there are early instances of its use as a distinctive title. The light Italian canzonets popular in Germany in the 17th century were called *Scherzi musicali*. Late in the 17th century Johann Schenk published some 'Scherzi musicali per la viola di gamba.' Later, when each movement of an instrumental composition had to receive a distinctive character, the directions *Allegretto scherzando* and *Presto scherzando* became common, several examples occurring in the Sonatas of Ph. Em. Bach. But even in the 'Partitas' of his great father, we find a Scherzo preceded by a Burlesca and a Fantaisie, though some modern ears can discover little of

humour or fancy in either of these. Many of the Giges are far more frolicsome than these.

Coming to the period of the Symphony it may be as well to remind the reader of a fact which will be more enlarged upon under that heading, namely, that the presences of the Minuet or Scherzo in works of the symphonic class, is a matter of natural selection, or survival of the fittest. In the old Suites the Minuet, being of rather shorter rhythm than the other dances, was seized upon, perhaps unconsciously, by the great masters who tied themselves down to the old form, and was exaggerated out of all recognition for the sake of contrast. The actual Minuet, as danced from the 16th century up to the present day (if any one still learns it), is in the time of that famous specimen in Mozart's 'Don Juan,' or say M.M. ♩ = 80. Yet even in the Suites of Bach one finds quick and slow Minuets, neither having any regard to the requirements of the dance. [The slow tempo was obligatory only where dancing was concerned; quicker Minuets were recognised in quite early days.] When we come to Haydn the term Minuet ceases to have any meaning; the stateliness and character of the dance are quite gone, and what we should call a Waltz appears. But with the true instinct of an artist, Haydn felt that in a work containing such heavy subtleties (for even Haydn was deemed heavy and subtle once) as the ordinary first movement and slow movement, a piece of far lighter character was imperatively demanded. So lighter and quicker and more sportive grew the Minuets, till Beethoven crowned the incongruous fashion with the 'Minuet' of this First Symphony. It should be mentioned, however, that Mozart never departed nearly so far from the true Minuet as Haydn, whose gaiety of musical thought drove him into really inventing the Scherzo, though he did not use the name. The Minuets of many of the String Quartets of Haydn exhibit indeed those quaint and fanciful devices of unexpected reiteration, surprises of rhythm, and abrupt terminations, which are the leading characteristics of the Scherzo, and are completely opposed to the spirit of the true Minuet. One which begins and ends each part with these bars

is a strong instance in point.

Beethoven quickly gave the Scherzo the permanent position in the Symphony which it now occupies. He also settled its form and character. It is a good answer to those who consider the classical forms worn out and irksome to the flow of inspiration to point out that in the Scherzo, where full rein is given to the individual

caprice of the musician, there is as much attention given to construction as anywhere. In fact, either the bold and masculine First-movement form, or its sister, the weaker and more feminine Rondo form, *must* be the backbone of every piece of music with any pretensions to the name. But, lest the light and airy character of the Scherzo should be spoilt by the obtrusion of the machinery, the greater composers have sought to obscure the form artistically by several devices, the most frequent and obvious being the humorous persistent dwelling on some one phrase—generally the leading feature of the first subject—and introducing it in and out of season, mixed up with any or all of the other subjects. Witness the Scherzo of Beethoven's Ninth Symphony, where the opening phrase for the drums is used as an accompaniment to the second subject—indeed as a persistent 'motto' throughout. Apart from this there is not the slightest departure from rigid First-movement form in this great movement.

The Trio, which is a relic of the Minuet and takes the position of third subject or middle section in a Rondo, survives because of the naturally felt want of a contrast to the rapid rhythm of the Scherzo. Many modern composers affect to dispense with it, but there is usually a central section answering to it, even though it be not divided off from the rest by a double bar. Mendelssohn has been the most successful in writing Scherzos without Trios. The main idea was to have a movement in extremely short and marked rhythm, for which purpose triple time is of course the best. In the Pianoforte Sonatas the Scherzo to that in E♭ (op. 31, No. 3) is the only instance where Beethoven has employed 2-4. The Trios to the Scherzos of the Pastoral and Choral Symphonies are 2-4 and C for special reasons of effect and contrast. It may be worth noticing that Beethoven invariably writes 3-4 even where 6-8 or 3-8 could equally well have been employed. This is no doubt in order that the written notes should appeal to the eye as much as the sounded notes to the ear. In fact three crotchets, with their separate stems, impress far more vividly on the mind of the player the composer's idea of tripping lightness and quick rhythm than three quavers with united tails. Having once ousted the Minuet, Beethoven seldom re-introduced it, the instances in which he has done so being all very striking, and showing that a particularly fine idea drove him to use a worn-out means of expression. In several cases (P.F. Sonatas in E♭, op. 7; in F, op. 10, etc.) where there is no element of humour, he has abstained from the idle mockery of calling the movement a Minuet, because it is not a Scherzo, as others have done; yet, on the other hand, the third movements of both the First Fourth, and Eighth Symphonies are

called Minuets while having little or nothing in common with even the Symphony Minuets of Haydn and Mozart. Amongst Beethoven's endless devices for novelty should be noticed the famous treatment of the Scherzo in the C minor Symphony; its conversion into a weird and mysterious terror, and its sudden reappearance, all alive and well again, in the midst of the tremendous jubilation of the Finale. Symphony No. 8, too, presents some singular features. The second movement is positively a cross between a slow movement and a Scherzo, partaking equally of the sentimental and the humorous. But the Finale is nothing else than a rollicking Scherzo, teeming with eccentricities and practical jokes from beginning to end, the opening jest (and *secret* of the movement) being the sudden unexpected entry of the basses with a tremendous C sharp, afterwards turned into D flat, and the final one, the repetition of the chord of F at great length as if for a conclusion, and then, when the hearer naturally thinks that the end is reached, a start off in another direction with a new coda and wind-up.

As a specimen of true Scherzo—that is, a movement in strict form and with quaint and whimsical humorous devices springing up unexpectedly, but naturally, throughout,—the Scherzo of the Ninth Symphony must ever stand without a rival. The tiny phrase which is the nucleus of the whole is eccentrically introduced, and prepares us at the outset for all manner of starts and surprises. The idea of using the drums for this phrase seems to have tickled Beethoven's fancy, as he repeats it again and again.

Humour is more unexpected in Schubert than in Beethoven, and perhaps because of its unexpectedness we appreciate it the more. The Scherzo of the C major Symphony is full of happy thoughts and surprises, as fine as any of Beethoven's, and yet distinct from them. The varied changes of rhythm in two, three, and four bars, the piquant use of the wood wind, and above all the sudden and lovely gleam of sunshine

combine to place this movement among the things imperishable. The Scherzos of the Octet, the Quintet in C, and above all, the PF. Duet in C, which Joachim has restored to its rightful dignity of Symphony, are all worthy of honour. The last named, with its imitations by inversion of the leading phrase, and its grotesque bass

is truly comical.

It is much to be regretted that the more modern composers have lost sight of the true bearing of the Scherzo so completely. Mendelssohn indeed has given it an elfish fairy character, but though this is admirable in the 'Midsummer Night's Dream,' it is perhaps a little out of place elsewhere. Lightness and airy grace his Scherzos possess to admiration, in common with his Capriccios, which they closely resemble; but the musical humour which vents itself in unexpected rhythms and impudent upstartings of themes in strange places, neither he nor any later composer seems to have had an idea of. Mendelssohn has not used the title 'Scherzo' to either of his five symphonies, though the 'Vivace non troppo' of the *Scotch*, the 'Allegretto' of the *Lobgesang*, and the 'Allegro Vivace' of the *Reformation* are usually called 'Scherzos.' It is sufficient to name the String Octet, the two PF. Trios and the two Quintets for Strings, as a few of his works which contain the most striking specimens in this line. As before mentioned, his Capriccios for Piano are pieces of the same order, and No. 4 of the 'Sieben Charakter-stücke' (op. 7) may be classed with them.

With Schumann we find ourselves again in a new field. Humour, his music seldom, if ever, presents, and he is really often far less gay in his Scherzos than elsewhere. He introduced the innovation of two Trios in his B \flat and C Symphonies, PF. Quintet, and other works, but although this practice allows more scope to the fancy of the composer in setting forth strongly contrasted movements in related rhythm, it is to be deprecated as tending to give undue length and consequent heaviness to what should be the lightest and most epigrammatic of music. Beethoven has repeated the Trios of his Fourth and Seventh Symphonies, but that is quite another thing. Still, though Schumann's Scherzos are wanting in lightness, their originality is more than compensation. The Scherzos of his orchestral works suffer also from heavy and sometimes unskilful instrumentation, but in idea and treatment are full of charm. Several of his Kreisleriana and other small PF. pieces are to all intents and purposes Scherzos.

Though the modern composers have not produced many remarkable Scherzos, it is not for want of trying. Rubinstein has a very pretty idea in 6-4 time in his Pianoforte Octet, and a very odd one in his A major Trio. The 'Ocean' Symphony has two Scherzos, in excellent contrast, the first being in 2-4 time, and slightly Schumannish, and the second in 3-4 time, with quite a Beethoven flavour. The first of these is not, however, entitled Scherzo by the composer

any more than is the second movement of his 'Dramatic' Symphony.

Unlike Schubert and Beethoven, Brahms seldom wrote a really bright Scherzo, but he published one for PF. solo (op. 4) which is very odd and striking. [It was the work which undoubtedly persuaded Liszt to include Brahms among the partisans of the 'advanced school,' a mistake which had many curious consequences. The PF. sonata (op. 5) has a Scherzo of wonderful vigour.] The Second Symphony has a movement which is a combination of Minuet and Scherzo, and certainly one of his most charming ideas. On somewhat the same principle is the Scherzo of the second String Sextet (op. 36) which begins in 2-4 as a kind of Gavotte, while the Trio is 3-4 Presto, thus reversing the ordinary practice of making the Trio broader and slower than the rest of the piece.

Quite on a pedestal of their own stand the four Scherzos for piano by Chopin. They are indeed no joke in any sense; the first has been entitled 'Le Banquet infernal,' and all four are characterised by a wild power and grandeur to which their composer seldom attained.

Among other productions may be noticed the Scherzo for orchestra by Goldmark, the so-called Intermezzo of Goetz's Symphony, the Scherzos in Dvořák's Sextet, and other chamber works. We have omitted mention of the strangely instrumented 'Queen Mab' Scherzo of Berlioz—more of a joke in orchestration than anything.

The position of the Scherzo in the Symphony—whether second or third of the four movements—is clearly a matter of individual taste, the sole object being contrast. Beethoven, in the large majority of cases, places it third, as affording relief from his mighty slow movements, whereas most modern composers incline to place it as a contrast between the first and elow movements. The matter is purely arbitrary. F. G.

SCHETKY, JOHANN GEORG CHRISTOFF, a composer, and an excellent performer on the violoncello. He was born at Hesse-Darmstadt in 1740, and was the son of Louis Schetky, secretary and musician to the Landgrave there. J. G. C. Schetky was intended for the law, but developed musical abilities and became locally famous. He travelled to Italy and France, and obtained recognition and patronage at various courts. He returned to Hesse-Darmstadt, but after the death of the Landgrave set out for London. Robert Bremner, the music-publisher, having been commissioned by the gentlemen directors of St. Cecilia's Hall, Edinburgh, to engage a first violoncellist for the concerts held there, met Schetky at Lille, and brought him to Edinburgh, where he arrived in Feb. 1772, and there spent the remainder of a long life. He played at the Edinburgh concerts, and became associated with the musical life there. He was a friend of Robert Burns, and

at the latter's request set to music his song, 'Clarinda, mistress of my soul,' printed with the music in the second volume of Johnson's *Scots Museum*, 1788. In 1774 Schetky married the daughter of Joseph Reinagle, senior, the Austrian musician, who was then settled in Edinburgh. He had several children by this marriage, one of whom, John Christian Schetky, was marine painter to George IV. and to Queen Victoria. Schetky, the musician, died in Edinburgh on Nov. 29, 1824, aged eighty-four, and was buried in the Canongate burial-ground. His published works consist of concertos, duets, trios, etc., for strings, and some harpsichord sonatas. They were principally, if not all, published by Robert Bremner. A MS. oratorio, 'Die verschmachende Verspottung des zum Tode verurtheilten Heylandes,' is at Darmstadt. For some details of his life see *Life of John C. Schetky, late Marine Painter*, by his daughter, and *St. Cecilia's Hall*, by David Fraser Harris, Edinburgh, 1899. F. K.

SCHICHT, JOHANN GOTTFRIED, born at Reichenau, Zittau, Sept. 29, 1753, owed his education to an uncle; went to Leipzig University in 1776, intending to study law, but gradually adopted music, and was soon chosen by Adam Hiller as solo clavier player at his concerts. On Hiller's retirement he succeeded him in 1785, and at length in 1810 rose to the head of his profession as Cantor of the Thomas-schule. He died Feb. 16, 1823, leaving many large works (three oratorios, much church and chamber music), as well as a translation of the PF. Schools of Pleyel and Clementi, and of Pellegri-Celoni's Singing Method, etc., but only one which will live, his edition of J. S. Bach's motets (Breitkopf & Härtel, 1802-3). G.

SCHICKHARD, or SCHICKARD, JOHANN CHRISTIAN, a composer resident at Hamburg about 1730. His works were chiefly published at Amsterdam, but were republished by the elder John Walsh in England. They comprise instrumental pieces, including: solos for a flute and bass, op. 17; concertos for flutes, op. 19; solos for German flute, hautboy, or violin, op. 20; sonatas for two violins and a bass, op. 5; sonatas for two German flutes and a bass, op. 10; and some others. These were all published by Walsh, and reissued by Randall. F. K.

SCHICKSALSIED ('Song of Destiny'), a short cantata or ode for chorus and orchestra, words by Friedrich Hölderlin, music by Brahms, op. 54. It was first performed from manuscript by the Carlsruhe Philharmonic Society, under the composer's direction, Oct. 18, 1871. It was published by Simrock in the following December, and was performed early in 1872 at Leipzig, Bremen, Breslau, Frankfurt, and Vienna. First performed in England by the Cambridge University Musical Society, March 8, 1877. M.

SCHIEDMAYER. There are now two firms

of this name in Stuttgart, both enjoying wide reputation as pianoforte-makers, viz. 'Schiedmayer & Sons,' and 'Schiedmayer Pianoforte-fabrik; vormals, J. & P. Schiedmayer.' The heads of these firms are the grandsons and great-grandsons of Johann David Schiedmayer, who towards the close of the 18th century was a musical instrument maker at Erlangen, and afterwards at Nuremberg, where he died in 1806. His son Johann Lorenz (born 1786) went after this for two years to Vienna as a workman, and in 1809 established a business at Stuttgart in partnership with C. F. Diendoné (who died in 1825). Before that time pianoforte-making was virtually unknown in Stuttgart, those who required satisfactory instruments obtaining them from Vienna. Lorenz Schiedmayer's intelligence and aptness for business gained a position for his firm, and it soon became one of the first in Germany. In 1845 Lorenz united his two eldest sons, Adolf and Hermann, to himself, and 'Schiedmayer & Sons' soon became as well known in foreign countries as in Württemberg. Lorenz died in 1860 and his son Hermann in 1861. The sons of the brothers Adolf (1820-1890) and Hermann, bearing the same Christian names, have been for many years the directors of this firm, which has made both concert and ordinary instruments, and has competed with success in London and Paris and other exhibitions. The two younger sons, Julius (1822-78) and Paul (died June 18, 1890) at first devoted themselves to harmonium-making, then of recent introduction, a practical knowledge of which had been gained by Paul in Paris. They started together in 1854, but after the death of the father, in 1860, turned to pianoforte-making in competition with the elder firm, and the younger firm is now known as 'Schiedmayer, Pianoforte-fabrik.'

Special mention must be made of Julius Schiedmayer's prominence as an expert in the Juries of the great Exhibitions of London, 1862; Paris, 1867; Vienna, 1873; and Philadelphia, 1876.

A. J. H.

SCHIEVER, ERNST, violinist, was born at Hanover on March 23, 1844. Studied under Joachim, 1860-64. In 1868 joined the Müller Quartet, with which he travelled as leader until its dissolution in 1869, and became in the same year a teacher at the Hochschule and a member of the Joachim Quartet. Remained in Berlin two years, organising with Hermann Franke (second violin), Leonhard Wolff (viola), and Robert Hausmann (violinello) another quartet party, which was engaged subsequently by Count Hochberg, and became known as the 'Gräflieh Hochberg Quartet' of Schloss Rohnstock near Striegau in Silesia. Came to England in 1878, making Liverpool his headquarters, and undertaking the leadership of the Richter orchestra, with which he has been connected for nearly thirty years. His sympathy with

chamber music remains constant, the 'Schiever Quartet,' in which he is associated with A. Roas (second violin), Carl Courvoisier (viola), and Walter Hatton (violinello), being an institution favourably known in the north of England.

W. W. C.

SCHIKANEDER, EMMANUEL, theatrical manager, playwright, actor, and singer, born 1751 at Ratisbon, began life as a poor wandering musician, joined some strolling players at Augsburg in 1773, married the adopted daughter of the manager, and at length undertook the direction himself. In 1780 his wanderings brought him to Salzburg, where he fell in with the Mozarts, and at once began to make a profit out of Wolfgang's talents. In 1784 we find him in Vienna, giving with Kumpf a series of excellent performances of German opera, comedy, etc., at the Kärnthnertheater. He appeared on the boards both here and at the Burgtheater, where, however, he did not succeed. He next took the management of the theatre at Ratisbon, but was recalled to Vienna by his wife, who had undertaken the little theatre lately built in the grounds of Prince Starhemberg's house in the suburb of Wieden, for which Schikaneder received a *privilegium* or licence.¹ He had no scruples as to the means to be adopted to make a hit, but in spite of large receipts was continually in difficulty. On one such occasion (March 1791) he had recourse to Mozart, whom he implored to set to music a libretto adapted by himself from a piece by Giesecke, a member of his company. Mozart, always good-natured, especially to a brother-mason, consented, and from that moment till its completion Schikaneder stuck closely to him, and did all he could to keep him amused over his work. The history of the 'Zauberflöte' is well known; Schikaneder made various suggestions in the composition, took the part of Papageno, and found himself saved from ruin by the success of the opera; but he showed little gratitude to Mozart, and after his death, instead of helping the widow of the man by whom he had benefited so materially, contented himself with loud and vain lamentations. In 1800 he entered into partnership with a merchant named Zitterbarth, who at a short distance from the small theatre just mentioned, built the present 'Theater an der Wien,' opened June 13, 1801. Zitterbarth then bought the *privilegium* from Schikaneder, who managed it for him till 1806. His next project was to build, with the assistance of some wealthy friends, a new theatre in the Josephstadt suburb, but this he did not carry out. On his way to Pesth, whither he had been invited to undertake a theatre, he went mad, was brought back to Vienna, and died in great misery Sept. 21, 1812.

Schikaneder wrote the libretto for many

¹ It was popularly called Schikaneder's theatre.

popular operas, Singspiele, and fairy-pieces, the list of which, with year of performance, is here published for the first time:—

'Anton der dumme Gärtner' (Schack and Gerl), 1789; 'Die helden Antons' (with 4 sequels, 'Jakob und Nannerl,' and 'Der Stein der Weisen,' or 'Die Zaubertinsel' (Schack and others), 1790; 'Die Zauberröte' (Hensel), 1791; 'Der wohlthätige Derwisch,' or 'Die Schellenkappe' (Schack, Gerl, and others), 1792; 'Die Eisenkönigin,' 'Die Waldmänner,' and 'Der Zaubergefell' (Lückl), 1793; 'Der Spiegel von Arkadien' (Süssmayr), and 'Die Hirten am Rhein,' 1794; 'Der Scherenscheitler' (Henneberg), 'Der Königssohn aus Ithaka' (A. F. Hoffmeister), and 'Der Hölleberg' (Wölfl), 1795; 'Der Tyroler Bauer' (Haibel), and a second part 'Oesterreich's treue Brüder,' 1796; 'Das medizinische Consilium' (Haibel), 'Die Löwenbrunnen' (Seyfried), and 'Babylons Pyramiden' (Act I. Oulius, Act II. Peter Winter), 1797; 'Das Labyrinth,' or 'Kampf mit den Elementen' (second part of 'Zauberröte,' Winter), 1798; 'Die Oestindier vom Spitzberg' (Seyfried, Süssmayr, etc.), 'Conrad Langenbarth,' or 'Der Burggeist' (Henneberg, Minna and Peru, or 'Königsfisch' (Act I. Henneberg, Act II. Seyfried), and 'Der Wundermann am Wasserfall' (Seyfried), 1799; 'Annus Schiffchen' (Seyfried), 1800. At the Theater an der Wien—opening night—'Alexander' (Teyber), 'Thespis Traum,' and 'Protesus und Archibius Schöne' (Süssmayr), 1801; 'Teaching' Teaching' (Haibel), 1802; 'Die Entlarvten,' a continuation of the 'Waldmänner' (Anton Fischer), and 'Pfändung und Personalarrest' (Teyber), 1803; 'Der Stein der Weisen' (Schack and others), 1804; 'Swetards Zaubertal' (Fischer), 1805; 'Die Eisenkönigin' (Henneberg) and 'Die Kurpfote am Wasserfall' (Anton Diabelli), Schinkeneder's last piece, given for his benefit, 1806.

C. F. P.

SCHILLING, DR. GUSTAV, author of a book much esteemed in Germany, though little known in England—*Encyclopädie der gesammten musikalischen Wissenschaften oder Universal Lexikon der Tonkunst* (7 vols. 8vo, Stuttgart, 1835-40). He was born Nov. 3, 1803, at Schwiegershausen, Hanover, where his father was clergyman. He was brought up at Göttingen and Halle, and in 1830 settled in Stuttgart as director of Stöpel's Music School. In 1857 he went to America, and died at Nebraska in March 1881. He published several other works bearing on music, but none of the importance of that already mentioned. G.

SCHILLINGS, MAX, was born at Düren in Rheinland, on April 19, 1868. He studied under K. Joseph Brambach and O. F. von Königsloew, at Bonn. From the former he derived the traditions of both Hummel and Beethoven, as shown through the medium of the teaching of Hiller, whose pupil Brambach was; while from the latter he inherited, musically, the methods of David the violinist, and Moritz Hauptmann the distinguished theorist. On leaving Bonn, Schillings continued his studies at Munich, where, after three years spent in perfecting himself in all branches of his art, he decided to settle. He was appointed chorus-master at Bayreuth in 1902, having acted as one of the assistant stage conductors there in 1892. His compositions, fairly numerous, show a high order of talent; but the composer is decidedly dominated by the influence of Wagner. Among his published works may be mentioned two Symphonic Fantasias, 'Meergruss' and 'Seemorgen'; 'Zwiegespräch' for small orchestra, solo violin, and solo violoncello; 'Abenddämmerung' for baritone, violin, and piano; 'Improvisation' for violin and piano; the orchestral accompaniments to Wildenbruch's 'Hexenlied'; music to 'Oedipus Rex'; and several books of songs. The operas 'Ingwelds,' three acts, produced at Carlsruhe in 1894,

'Der Pfeifertag,' first performed at Schwerin in 1901, and 'Moloch' (Dresden, 1906) are at present in MS. D. H.

SCHIMON, ADOLF, son of an Austrian artist, well known for his portraits of Beethoven, Weber, Spohr, etc., was born on Feb. 29, 1820, at Vienna. At sixteen he went to Paris and entered the Conservatoire as a pupil of Berton and Halévy. In 1844 he brought out an opera called 'Stradella,' at the Pergola in Florence. In 1850 he was in London, and took a provincial tour with Balfe, Reeves, and Clara Novello. From 1854 to 1859 he was attached to the Italian opera in Paris, and in 1858 produced a comic opera 'List um List,' which was successful in North Germany. In 1872 we find him again at Florence, where he married Anna Regan. (See below). From 1874 to 1877 he was teacher of singing in the Conservatorium at Leipzig, and from thence was called to Munich, where he was professor of singing in the Royal Music School. His original compositions embrace quartets, trios, and solos for the PF., and songs in various languages, and he edited many vocal pieces by Scarlatti, Porpora, Paradies, and other old Italian masters. He died at Leipzig, June 21, 1887. His wife, ANNA REGAN-SCHIMON, was born at Aich, near Carlsbad, Sept. 18, 1841, and was brought up in the house of Dr. Anger in Carlsbad, till 1859, when she was placed as a pupil with Mme. Schubert (née Maschinka-Schneider) in Dresden. In the following year she accompanied Mme. Sabatier-UNCHEK, the great contralto, to Florence, where she remained under the care of that eminent artist till Feb. 1864. During this time she made her first attempts on the stage at Siena, her success in which encouraged her in further study. From 1864 to 1867 she was engaged at the Court theatre at Hapover. Then as Kammersängerin to the Grand Duchess Helena in St. Petersburg, where she sang at three of the seven concerts given by Berlioz. In 1869 she visited London in company with her old friend and teacher, Mme. Sabatier, sang twice at the Philharmonic, and three times at the Crystal Palace, and at Hallé's Recitals, etc. From this time till 1875 she was frequently in England, widely known and much liked for her exquisite delivery of Schubert's and other songs. In 1870 and 1871 she visited Vienna with great success, and in 1872 married Dr. Schimon. She took two brilliant tournées with Mombelli, Sivori, Trebelli, etc., in the winters of 1872 and 1873, and from that time till her death only appeared occasionally at the Gewandhaus Concerts at Leipzig. [After her husband's death she accepted a post in the Royal Music School at Munich, where she died April 18, 1902.] G.

SCHINDELMEISSER, LOUIS, was born at Königsberg, Dec. 8, 1811, and educated at the Gymnasium at Berlin. Music he learned from

a French musician named Hostié, and from Gährich. He first adopted the clarinet, but afterwards took a wider range. From 1832 to 1837 he filled capellmeisters' posts at Salzburg, Innsbruck, Graz, then at Berlin (Königstadt theatre), and at Pesth, where he remained for nine years. He at length came to an anchor as Court-capellmeister at Darmstadt, where he died March 30, 1864. His works embrace six operas—'Mathilde,' 'Ten happy days,' 'Peter von Szapary' (Pesth, 1839), 'Malvina' (Pesth, 1851), 'The Avenger,' 'Melusine' (1861); an oratorio, 'S. Boniface'; an overture to 'Uriel Acosta,' and incidental music to various plays; concerto for clarinet and orchestra; and a concertante for four clarinets and orchestra; songs, P.E. pieces, etc. G.

SCHINDLER, ANTON, the devoted friend and biographer of Beethoven, was born in 1796 at Medl, Neustadt, Moravia, where his father was cantor and schoolmaster. He began the study of music and the violin early in life. While quite young he entered the Vienna University to study law, and assiduously kept up his music by practice in an amateur orchestra. His introduction to Beethoven took place accidentally in 1814, when he was asked to take a note from Schuppanzigh to the great composer. Later in the year he played in Beethoven's two concerts of Nov. 29 and Dec. 2. He and the master met often, and the intimacy increased until, early in 1819, on the recommendation of Dr. Bach, he became a kind of secretary to Beethoven and at length, in 1822, took up his residence in the master's house. He then became conductor at the Josephstadt Theatre, where he studied several of Beethoven's great works under his own direction. Beethoven, however, at last began to tire of his young friend, and after much unpleasantness, in 1824, after the failure of the concert of May 23, the breach came. Beethoven behaved with great violence and injustice, and Schindler was driven from him till Dec. 1826, when he arrived in Vienna from Gneixendorf, to die. Schindler at once resumed his position, attended him with devotion till his death, wrote several letters¹ to Moscheles on the details of the event, and in company with Breuning took charge of Beethoven's papers. Breuning died, and then the whole came into Schindler's hands.

In 1831 he wrote some interesting articles on Beethoven and Schubert in Bäuerle's *Theaterzeitung*. In December he left Vienna, and became capellmeister to the cathedral at Münster, a post which he exchanged four years later for that of music-director at Aix-la-Chapelle. After some years he relinquished this, became first a private teacher and then went entirely into private life. He lived in various towns of Germany, and at length in Bockenheim, near Frankfort, where he died Jan. 16, 1864.

¹ Printed in Moscheles's *Life*, I. 145-79.

His book on Beethoven is entitled *Biographie von Ludwig van Beethoven. Mit dem Porträt Beethoven's und zwei Facsimilen* (Münster, 1840, 1 vol. 8vo).² This was followed by *Beethoven in Paris . . . ein Nachtrag zur Biographie Beethoven's*, etc. (Münster, 1842; 1 thin vol. 8vo), and that by a second edition of the *Biographie* with additions (Münster, 1845, 1 vol. 8vo). The third and last edition appeared in 1860. Being so long about Beethoven he accumulated many autographs and other papers and articles of interest, and these he disposed of to the library at Berlin for an annuity. His sister was a singer, who in the year 1830 was engaged at the Königstadt Theatre, Berlin.

Schindler has been the object of much obloquy and mistrust, but it is satisfactory to know, on the authority of A. W. Thayer, that this is unfounded, and that his honesty and intelligence are both to be trusted. G.

SCHIRA, FRANCESCO, was born at Malta, Sept. 19, 1815, received his early education at Milan, and was placed, at the age of nine (1824), in the Conservatorio, where he learned counterpoint under Basily, principal of that institution. At seventeen, having completed his studies, Francisco was commissioned to write an opera for the Scala, which was produced Nov. 17, 1832. That 'Elena e Malvina' won favourable recognition may be inferred from the fact that a Lisbon *impresario*, being at Milan with the object of forming a company for the Santo Carlos, contracted an engagement with Schira for the forthcoming season as 'Maestro Direttore, Compositore e Conduttore della Musica.' He remained eight years at Lisbon, where he was also appointed Professor of Harmony and Counterpoint at the Conservatorio, composing 'I Cavalieri di Valenza' and 'Il Fanatico per la Musica,' for the Santo Carlos, besides ballets, cantatas, etc.

In January 1842 Schira quitted Lisbon for Paris, with the idea of obtaining some book in the French language which he might set to music. In Paris he made the acquaintance of Mr. Maddox, then in quest of artists for the Princess's Theatre. This led to an offer from the London manager, and Schira was appointed director of music and orchestral chief at that establishment. On Monday, Dec. 26, 1842, the Princess's opened as a lyric theatre, and Schira's appearance at the conductor's desk was his first introduction to the English public. The opera chosen was an English version of 'La Sonnambula,' the leading characters sustained by Mme. Eugénie Garcia, Mme. Feron, Messrs. Templeton, Walton, and Weiss; Mr. Loder (father of Edward Loder) being principal violin. Among notable incidents during Schira's term of conductorship may be specified the production of two operas by Balfe, originally com-

² This is the book which was translated or adapted by Moscheles (London, Colburn, 1841), strange to say with no mention of Schindler on the title-page.

posed for the Paris Opéra-Comique—'Le Puits d'Amour,' called 'Geraldine' (Nov. 1843), and 'Les Quatre Fils d'Aymon,' called 'The Castle of Aymon' (Nov. 1844). At the end of 1844 Schira accepted an engagement from Alfred Bunn, then lessee of Drury Lane, to fill the place left vacant by Benedict, who resigned immediately after Balfé's 'Daughter of St. Mark' was brought out. At Drury Lane he remained until the spring of 1847, when Bunn seceded from the management, the committee having entertained the proposal of Jullien to become future lessee; and here several adaptations of foreign operas, besides a good number of works by English composers, were produced. From the latter it will suffice to name Wallace's 'Maritana' and 'Matilda of Hungary,' Macfarren's 'Don Quixote,' Benedict's 'Crusaders,' Lavenu's 'Loretta' (composed for Mme. Anna Bishop), Balfé's 'Enchantress,' etc.; among the former, Flotow's 'Stradella' and 'Martha.' In Sept. 1848 Bunn took Covent Garden Theatre, and Schira was again appointed conductor. The season only lasted two months, but comprised the first theatrical engagement after his brilliant success, the year before, at Drury Lane, of Sims Reeves, for whom an adaptation of Auber's 'Haydée' was produced, the great English tenor assuming the part of Loredano; another English adaptation of Rossini's 'Donna del Lago'; and an entirely new opera, called 'Quentin Durward,' the composition of Henri Laurent. The success of the enterprise was not in proportion to the expectations of the manager; 'Quentin Durward' was by no means a hit, and though Bunn had lowered his prices the house was prematurely closed. Thus an opera, entitled 'Kenilworth,' from Schira's own pen, which had already been put into rehearsal, with Sims Reeves in the part of Leicester, was lost to the public, and no more English opera was heard at Covent Garden until Miss Pyne and Mr. Harrison migrated from the Lyceum, to carry on their undertaking in a more spacious arena.

Although he had severed his connection with the Princess's as musical director, in which position his worthy successor was Edward Loder, Schira wrote two original works for the theatre in Oxford Street—'Mina,' produced in 1845, and 'Theresa, or the Orphan of Geneva,' in 1850, both, the latter especially, received with marked favour. Schira was once more engaged as conductor at Drury Lane, and the theatre opened on Jan. 23, 1852, with an English version of 'Robert le Diable,' succeeded by 'Fra Diavolo,' with Sims Reeves in the title-part. The principal incident that marked the season was the production of 'The Sicilian Bride,' by Balfé, in no respect one of his most successful efforts. From this time Schira devoted himself specially to giving instructions in the vocal art. He nevertheless did not

neglect composition, as testified in a number of charming songs, duets, trios, etc., some of which have attained wide popularity. He also was busily employed in the composition of a grand opera called 'Niccolò de' Lapi,' performed with marked applause at Her Majesty's Theatre in May 1863. For the Carnival at Naples, two years later, he wrote another grand opera, entitled 'Selvaggia,' which was given with brilliant success, and represented at Milan, Barcelona, and elsewhere. The reception accorded to 'Selvaggia' led to his being asked to write another opera, 'Lia,' for Venice. This, also brought out during the Carnival, was hardly so much to the taste of the Venetians as its precursor. Nevertheless, there are amateurs who regard 'Lia' as Schira's best work.

The managers of the Birmingham Festival commissioned Schira to write a cantata for the meeting of 1873, and he wrote a piece entitled 'The Lord of Burleigh,' the libretto, by Desmond Lumley Ryan, being founded upon Tennyson's well-known poem, though not a line was appropriated, save the motto which heads the title-page of the printed edition. An operetta entitled 'The Ear-ring' was performed at the St. George's Hall Theatre. His music, while revealing the hand of one who has thoroughly mastered the principles of his art, was free from all pretence, relying upon its unaffected simplicity and grace for its impression. As an instructor in singing Schira always maintained a high position, many a public vocalist of note having profited by his counsels. In his own country and elsewhere abroad, he held the insignia of several orders of merit, the most prized of which was that of 'Commendatore della Corona d'Italia'—prized the more because conferred by King Humbert, *motu proprio*. Schira died in London, Oct. 16, 1883. J. W. D.

SCHIRMER, G., is the corporate name under which is carried on the music-publishing and trading business established in New York by Gustav Schirmer, and which has attained to a place among the largest and most important of its kind in the world. Gustav Schirmer, born in Saxony in 1829, went to New York in 1837, and entered the music-shop of Scharfenberg and Luis. In 1854 he became the manager of Breusing's music business, which had been founded in 1848 by Kerk sieg and Breusing. In 1861, with B. Beer, he took over this business, which was then carried on under the name of Beer & Schirmer, when Schirmer obtained complete control. Under his management it steadily increased in standing and influence. Gustav Schirmer died in 1893 in Eisenach, while journeying in Germany in the hope of restoring his health. In the same year the business was incorporated by his heirs, and its management undertaken by his two sons Rudolph E. and Gustave Schirmer (the latter died July 15, 1907), who extended it still further in importance,

especially the department of publication. The firm has a large engraving and printing plant of its own, being one of the few maintained by American publishing-houses. The catalogue of G. Schirmer numbered about 18,000 active titles in 1906. Among the most important of its publications are the Library of Musical Classics, comprising about 850 numbers and a series of modern operas in vocal score with analytical and historical prefaces written by the foremost musical writers of the United States. G. Schirmer has published the works of many American composers, including DUDLEY BUCK, GEORGE W. CHADWICK, Arthur Whiting, Henry Holden Huss, HORATIO W. PARKER, ETHELBERT NEVIN, and especially CHARLES MARTIN LOEFFLER. The literary publications of the house include theoretical works by Dr. Percy Goetschius, Dr. Theodore Baker, and others. It established and maintained for many years the principal circulating music library in the United States; but this was transferred in 1906 to the Institute of Musical Art. R. A.

SCHLAGINSTRUMENTEN. Instruments of percussion, such as drums, cymbals, tambourine, etc.

SCHLEIFER. See SLIDE.

SCHLEPPEN. To drag. A frequent direction in modern scores is 'Nicht schleppend'—Don't drag!

SCHLESINGER. A well-known musical-publishing house in Berlin. It was founded in 1795 by ADOLF MARTIN SCHLESINGER, a man of original character and great ability. Among the principal works issued by him was the edition of Bach's 'Matthew Passion,' one of the fruits of Mendelssohn's revival of it,¹ and an astonishingly bold undertaking for those days—which Schlesinger brought out, according to his favourite expression, 'for the honour of the house.' It was announced in Sept. 1829, and published soon afterwards both in Full and PF. score. He also founded the *Berliner Allg. mus. Zeitung*, which under the editorship of A. B. Marx had for seven years (1824-30) much influence for good in Germany. [See vol. iii. p. 685a.] He died in 1839.

His second son, HEINRICH (born 1807), carried on the business till his death, Dec. 14, 1879. He founded the *Echo* in 1851, a periodical which remained in his hands till 1864, when it was sold to R. Lienau.

The eldest son, MORITZ ADOLF, left Berlin, and in 1819 entered the bookselling house of Bossange père at Paris. In 1823 he endeavoured to found a similar business for himself. Police difficulties prevented him from carrying out his intention, and he founded, in 1834, a music business instead, which for many years has had the lead among French publishers, and is now nearly as famous as Paris itself. He brought his German tastes with him, and an unusual

degree of enterprise. His first serious effort was an edition of Mozart's operas in PF. score, for which Horace Vernet designed the title-page. This was followed by editions of the complete works of Beethoven, Weber, Hummel, etc., and a 'Collection de chefs d'œuvre' in twenty-four vols. He published also the full scores of Meyerbeer's 'Robert,' and 'Les Huguenots'; Halévy's 'L'Éclair,' 'La Juive,' 'Les Mousquetaires,' 'La Reine de Chypre,' 'Guido et Ginevra,' 'Charles VI'; Donizetti's 'La Favorite'; Berlioz's 'Symphonie fantastique,' and overture to the 'Carnaval Romain'; the arrangements of Wagner; the chamber-music of Onslow, Reissiger, and a host of other pieces of all descriptions, for which the reader must be referred to the catalogue of the firm. Amongst the educational works the 'Méthode des Méthodes' is conspicuous. On Jan. 5, 1834, he issued the first number of the *Gazette Musicale*, which in a few months was united to the *Revue Musicale* and ran a useful and successful course till its expiry in 1880. [See ante, p. 79.] In 1846 M. Schlesinger sold the business to MM. Brandus and Dufour, and retired to Baden-Baden, where he died in Feb. 1871. G.

SCHLICK, ARNOLT, the elder, was born in Bohemia about 1460. Like Paumann of Nuremberg he was blind, a fine organist, and a lute-player. He was a member of the Hofkapelle at Heidelberg before 1511, holding the post of organist to the Connt Palatine. In the fourth book of the *Micrologus*, 1517, dedicated to Schlick, 'musico consummatissimo, ac Palatini Principis organiste probatissimo,' Ornithoparcus thus apostrophises him: 'From your sentence no man will enter appeal; because there is no man either learned, or subtler in this art, than your selfe, who besides the practise, hast wisdom, eloquence, gentleness, quickness of wit, and in all kinds of musicke a divine industry, and further the knowledge of many other sciences. Thou wantest the bodily lamp, but in thy mind shineth that golden light; . . . wherefore not only by thy princes, who are to thee most gracious, but even of all men (like Orpheus and Amphion) art thou loved' (Dowland's translation, 1609). Schlick himself states in the preface to his 'Tabulaturen' that he made tours through Germany and Holland, winning much renown as an organist, and that he was in Worms in 1495, at the time that the Reichstag was held there. Two of Schlick's works are still in existence, the first on organs and organists, the second, a volume of organ and lute pieces in tablature. The former was called: 'Spiegel der Orgelmacher vnd Organisten, allen Stifften vnd Kirchen so Orgel halten oder machen lassen hochnützlich, durch den hochberümpften vnd kunstreichen meyster Arnolt Schlicken Pfalzgrauischen Organisten artlich verfasst,' etc. (1511), small 4to, 30 pages ('Mirror of organ-builders and

¹ March 11, 1829. See Marx's *Erinnerungen*, ii. pp. 50, 87.

organists, very useful to all foundations and churches which possess or order organs, excellently composed by the celebrated and gifted master, A. S. organist to the Palatinate'). The only copy known lacks the page at the end which would have given the name of the publisher, but there is little doubt that it was printed by Peter Schöffner, at Mainz. Eitner reprinted the whole work in the *Monatshefte für Musikgeschichte*, 1869, giving a facsimile of the engraved title-page. It deals with the materials to be used for the construction of an organ, its erection, the tuning of the pipes, and other technical and theoretical matters, to which is added a description of the organs then in existence, and some allusions to the music of the period. Mr. A. E. Ellis, in his paper on the history of musical pitch, read before the Society of Arts, March 3, 1880, referred to this book as being of great use in showing the relation between very high and very low church-pitch, and the method of tuning before the invention of the mean-tone temperament. He notes also the curious fact that Schlick recommended both the very sharp and the very flat pitch, and for the same reason, consideration of the convenience of both singer and organist using the old ecclesiastical tones, that is, consideration of the compass of the voice and of ease in fingering. This appears to account for the high and low pitches in the earlier period of church-pitch.

Schlick's work is mentioned in Virdung's *Musica getutsetzt*, 1511 (see Eitner's reprint, page E. IV. v.) 'Dann ich neulich ein tractetlin han gelesen, das ist der spiegel aller organisten vnn orgelmacher intituliert oder genannt, darin find ich in dem andern capitel, das er spricht der organist well dann per fictam musicam spielen, weste der selb von den dreyen geschlechthen zu sagen er wurd sye, nit fictam musicam nennen, dann das er maynt fictam musicam syn, das ist cromaticum genus . . . man soll ihn aber verzeihen dann er hat es übersehen, its augen schuld, oder der spiegel ist dunckel worden,' etc. These remarks on his use of the term 'musica ficta' did not at all please Schlick, and in return he made a long attack on Virdung in his preface to the 'Tabulaturen,' published the year after; there are only two copies known of this important work, one in the Leipzig Stadtbibliothek, the other, without title-page, is in the Berlin Königl. Bibliothek. The full title is:—

Tabulaturen etlicher lobgesang vnd lidelein vff die orgeln vn lauten, ein theil mit zweien stimmen zu zwicken vn die drit dartzu singen, etlich on gesangk mit dreien, von Arnolt Schlickens Palzgraniachen Churfrürstlichen Organisten tabulirt, vn in den truck in d'vrsprunglichen stadt der truckerei zu Meintz wie hie nach volgt verordnet. (On last page) Getruckt zu Mentz durch Peter Schöffner. Vff Sant Mattheis Abent. Anno 1512, small obl. 4to, 88 pages unnumbered.

It contains fourteen organ pieces, twelve songs with lute accompaniment, and three pieces for lute. Eitner reprinted (*Monatshefte*, 1869) all the organ and two lute compositions. They are preceded by a letter from Schlick's son

Arnolt, asking his father to make him a collection of organ and lute music; it is dated St. Catherine's Day, 1511, and an answer from his father promising to do so, although he has become blind, is dated St. Andrew's Day, 1511. Some satirical verses about Virdung follow. Schlick's method of arranging songs, some with one-voice part and two lutes accompanying, others for three lutes only, is noted by Ambros (*Geschichte der Musik*, iii. 440) as being rather remarkable at that early date. Two examples were transcribed and published by Wilhelm Tappert (*Sang u. Klang aus alter Zeit*, Berlin, 1906). Schlick's volume is also the earliest appearance in print of organ pieces in the German tablature, for Ammerbach's 'Tabulaturbuch' was not published until 1571, and Bernh. Jobin's work in 1572. The organ pieces are all taken from sacred vocal compositions, but are arranged with intelligence and artistic feeling, and with a musicianly touch that shows a genuine sense of instrumental composition; the next step in advance was to be taken later on by Buus, Willaert, and others, in their 'Ricercari' for the organ (Wasielewski, *Geschichte der Instrumentalmusik im XVI. Jahrhundert*, 1878). No. 10 from 'Tabulaturen,' an organ arrangement in three-part writing of 'Maria zart,' was published in A. G. Ritter's *Zur Geschichte des Orgelspiels*, 1884, ii. 96. In the Heilbronn Gymnasialbibliothek is a MS. part-book with the Bass only of a three-part song 'Mi, mi,' by Arnolt Schlick. A manuscript, *Mus. Theoret.* 40, 57, written between 1533 and 1540, in the Berlin Königl. Bibliothek, contains a treatise *De musica poetica*, which has been ascribed to Arnolt Schlick the younger, because of the initials A. S. attached to it. It is described by H. Belleremann (*Der Contrapunct*, 1862, p. 28) who gives a facsimile of one of the musical examples in it, a four-part setting by Heinrich Isaac; it is interesting because of the different parts being distinguished by different colours, the soprano and bass being written in red, the alto in green, and the tenor in black ink. c. s.

SCHLICK, RUDOLF, a doctor of medicine who lived in Meissen, published the following work: 'Rodholffi Schlickii R Exercitatio, qua musices origo prima, cultus antiquissimus, dignitas maxima, et emolumenta, quae tam animo quam corpori humano confert summa, breviter ac dilucidè exponuntur. Spirae, typis Bernardi Albini, 1588, 8vo, pp. 48.' A copy is in the Bodleian Library, with 'Robertus Burton, 1600,' on the fly-leaf, probably the author of the *Anatomy of Melancholy*. c. s.

SCHLOESSER, LOUIS, born at Darmstadt in 1800, learnt music there from Rinck, and in Vienna from Seyfried, Salieri, and Mayseder. In due time he entered the Conservatoire at Paris, and attended the violin class of Kreutzer and the composition class of Lesueur. He then went to Darmstadt and became first leader

and then conductor of the Court band. His works comprise five operas, among them 'Das Leben ein Traum' (1839), and 'Die Brant des Herzogs' (1847), a melodrama, music to 'Faust,' a mass, a ballet, and a quantity of instrumental music of all descriptions. He died at Darmstadt, Nov. 17, 1886. His son, CARL WILHELM ADOLPH, was born at Darmstadt, Feb. 1, 1830. He was educated by his father, and in 1847 established himself at Frankfort. In 1854 he went to England, where he has been ever since settled in London as an esteemed teacher. He was a professor at the Royal Academy of Music until his retirement in 1903. He has published both in England and Germany a great number of PF. works, both solos and duets; including a suite dedicated to Cipriani Potter, and a set of twenty-four studies; many songs and vocal pieces, and has many larger works in MS. His 'Schumann Evenings' in 1868 were well known, and did much to advance the knowledge of Schumann in England. G.

SCHMELTZL, or SCHMELTZEL, WOLFGANG, a native of Kemnat in the Upper Palatinate, was at first a Protestant cantor at Amberg, where he married, but eventually forsook his wife and children, and became a Roman priest. About 1540 he was a school-master in Vienna, and in 1544 issued the book by which he is known, a collection of 'Quodlibets' for four and five voices, as well as folk-songs of the time. The title is 'Guter seltzamer vnd kunstreicher deutscher Gesang, sonderlich etliche künstliche Quodlibet, Schlacht (bei Pavia), vnd dergleichen mit 4 oder 5 stimmen. . . .' It was printed at Nuremberg in four part-books. Copies are at Berlin, in the British Museum, and elsewhere. (See the *Quellen-Lexikon*, Eitner's *Deutsches Lied*, vol. i. and *Monatshefte f. Musikgesch.* iii. 201. A long account of the book is given in the *Sammelbände der Int. Mus. Ges.* vi. 80, by Elsa Bienenfeld.) M.

SCHMID, ANTON, Custos of the Hofbibliothek in Vienna, born at Pihl, near Leipa in Bohemia, Jan. 30, 1787, entered the Imperial Library at Vienna in 1818, became Scriptor in 1819, Custos in 1844, and died at Salzburg, July 3, 1857. His department as a writer was the history and literature of music and hymns. He contributed to the following works:—Dr. Ferdinand Wolf's *Ueber die Lais, Sequenzen, und Leiche* (Heidelberg, 1841); Becker's *Darstellung der musikalischen Literatur* (supplement, Leipzig, 1839); A. Schmidt's *Allg. Wiener musik. Zeitung* (from 1842 to 1848); Dehn's *Cäcilia* (from 1841 to 1848; Mayence, Schott); and the *Oesterreich Blätter für Lit. und Kunst* (1844, 1845). His independent works are *Ottaviano dei Petrucci of Fossombrone, the inventor of movable metal types for printing music, and his successors* (Vienna, Rohrmann, 1845); *Joseph Haydn und Nicolo Zingarelli*, proving that Haydn was the author

of the Austrian national hymn (Vienna, Rohrmann, 1847); *Christoph Willibald Ritter von Gluck* (Leipzig, Fleischer, 1854); also a work on chess, *Tschaturanga-vidjâ* (Vienna, Gerold, 1847).

To Schmid in the first instance is due the orderly and systematic arrangement of the musical archives of the Hofbibliothek. In recognition of his unwearied industry and research he was made a member of many learned societies in different parts of Europe. C. F. P.

SCHMIDT, BERNHARD. See SMITH, BERNARD ('FATHER SMITH').

SCHMIDT, JOHANN CHRISTOPH. See SMITH, JOHN CHRISTOPHER.

SCHMITT, a German musical family founded by a Cantor at Obernburg in Bavaria. His son ALOYS was born at Erlenbach on the Main, August 26, 1788, and taught to play by his father; he then learned composition from André of Offenbach, and in 1816 established himself in Frankfort as a PF. teacher. After a few successful years there—during which, among others, he had taught Ferdinand Hiller—and much travelling, he migrated to Berlin, then to Hanover, where he held the post of Court Organist (1825-29), and lastly back to Frankfort, where he died July 25, 1866. His reputation as a teacher was great, though he had a passion for journeys, and his pupils complained of his frequent absences. He composed more than 100 works, of all descriptions, including masses, four operas, two oratorios, and string quartets, besides some useful PF. studies.

His brother JAKOB, born at Obernburg, Nov. 2, 1803, was a pupil of Aloys. He settled in Hamburg, where he brought out an opera ('Alfred der Grosse') and a prodigious amount of music, including many sonatas for the piano, solo and with violin, variations, three books of studies, etc., in all more than 300 works; and died June 1853.

The son of Aloys, GEORG ALOYS, was born Feb. 2, 1827, during his father's residence at Hanover. Music came naturally to him, but it was not till after some time that he decided to follow it. He was then at Heidelberg university, and put himself under Vollweiler to serious study of counterpoint. His first attempt was an operetta called 'Trilby,' which was performed at Frankfort in 1850, with great success. He then passed some years in various towns of Germany, and at length, in 1856, was called by Flotow to Schwerin as Court-cappellmeister; [he retired on a pension in 1892, and in the following year became head of the Mozartverein in Dresden]. In 1860 he visited London, and played with éclat before Queen Victoria. He wrote operas, music to plays, and orchestral and other works. [He edited and completed Mozart's great mass in C minor (1901); he died at Dresden, Oct. 15, 1902.] EMMA BRANDES,

now Mme. Engelmann, the eminent pianist, was his pupil.

G.

SCHNEIDER, GEORG ABRAHAM, born April 9, 1770, at Darmstadt, became a proficient on the horn, studied theory with Portmann, whose daughter he afterwards married. He was successively oboist in a Hessian regiment, horn-player in the court bands of Darmstadt, Schwerin, Rheinsberg, and Berlin. In 1812 or 1814 he undertook the duties of theatrical conductor at Reval, but went back to Berlin in 1816, and in 1820 was made capellmeister of the court opera, and director of military bands. He had a rare knowledge of musical instruments of all kinds, and wrote a large number of operettas, masses, cantatas, an oratorio, 'Die Pilgrime auf Golgotha,' symphonies, concertos, and chamber music of all kinds. (*Quellen-Lexikon*; Riemann's *Lexikon*.)

M.

SCHNEIDER, JOHANN CHRISTIAN FRIEDRICH, composer, teacher, and conductor, born Jan. 3, 1786, at Alt-Waltersdorf, near Zittau, composed a symphony at the age of ten. In 1798 entered the Gymnasium of Zittau, and studied music with Schönfelder and Unger. In 1804 he published three PF. sonatas, and having entered the University of Leipzig in 1805 carried on his musical studies to such purpose that in 1807 he became organist of St. Paul's, in 1810 director of the Seconda opera, in 1812 organist of the Thomaskirche, and in 1817 director at the Stadt Theater. There he remained till 1821, when he became capellmeister to the Duke of Dessau, whose music he much improved, and founded in the town a Singakademie, a school-master's choral society, and a Liedertafel. In 1829 he founded a musical Institute, which succeeded well, and educated several excellent musicians, Robert Franz among the number. Schneider was also an industrious composer, his works comprising oratorios—'Die Höllenfahrt des Messias' (1810), 'Das Weltgericht' (1819), 'Totenfeier' (1821), 'Die Sündfluth' (1823), 'Verlorne Paradies' (1824), 'Jesu Geburt' (1825), 'Christus das Kind,' 'Pharao,' and 'Gideon' (1829), 'Absalom' (1830), 'Das befreite Jerusalem' (1835), 'Salomonis Tempelbau' (1836), 'Bonifazius' (1837), 'Christus der Erlöser' (1838), 'Gethsemane und Golgotha' (1838); 14 masses; 7 Glorias and Te Deums; 25 cantatas; 5 hymns; 13 psalms, 7 operas; 23 symphonies; 60 sonatas; 6 concertos; 400 Lieder for men's voices, and 200 ditto for a single voice—all now forgotten except the men's part-songs. Schneider directed the musical festivals of Magdeburg (1825), Nuremberg (1828), Strassburg (1830), Halle (1830 and 1835), Halberstadt (1830), Dessau (1834), Wittenberg (1835), Coethen (1838 and 1846), Coblenz and Hamburg (1840), Meissen (1841), Zerbst (1844), and Lübeck (1847). He also published didactic works—*Elementarbuch der Harmonie und Tonsetzkunst* (1820), translated into English (London,

1828); *Vorschule der Musik* (1827); and *Handbuch des Organisten* (1829-30). The oratorio of the 'Sündfluth' was translated into English as 'The Deluge' by Professor E. Taylor, published in London, and performed at the Norwich Festival of 1833.

Schneider was a doctor of music, and a member of the Berlin and several other Academies. He died Nov. 23, 1853. Some traits of his curious jealous temper will be found in Schubring's *Reminiscences of Mendelssohn*, in *Daheim* for 1866, No. 26. He was vexed with Mendelssohn for his revival of Bach's *Passion*—but the feeling passed away; and in the *Signale* for 1866, Nos. 46, 47, 48, there are eight letters (1829-1845 (translated in the *Musical World*, Dec. 29, 1866, and Jan. 5, 1867) from Mendelssohn to him showing that they were on very good terms. When Mendelssohn's body passed through Dessau, on its way to Berlin, Schneider met it at the station, with his choir, and a lament was sung, which he had purposely composed, and which will be found in the *A.M.Z.* for 1847, No. 48.

F. G.

SCHNEIDER, JOHANN GOTTLÖB, the celebrated Dresden organist, brother of the preceding, was born at Alt-Gersdorf, Oct. 28, 1789. He is said to have begun to learn organ, pianoforte, and violin, when only five. At twenty-two he was organist of the Leipzig University church, and by 1820 was recognised as one of the first organists living. To his fine playing at a Magdeburg Festival in 1825 he owed his Dresden appointment of Court organist, which he held till his death, April 13, 1864. From the organ-loft of the Hofkirche he made his influence felt; how widely, may be gathered from the mere names of his pupils, amongst whom were Mendelssohn, Schumann, Liszt, Merkel, Töpfer, Van Eycken. The last four were amongst the thirty old pupils who composed and presented to him that graceful offering, the 'Jubiläum für die Orgel,' in 1861, the fiftieth year of his artistic career. Schumann's studies with him permanently influenced the composer, and directly inspired or helped to inspire the *Pedal Pianoforte Studies*, and *Fugues on the name of Bach*; and Mendelssohn confessed a like obligation and admiration. Schneider's reading of Bach—derived straight from him by direct descent in only three removes—was the best weapon in his equipment as a teacher. He always ended a lesson by playing one of the great fugues, or, especially, 'organ chorales.' Sir Herbert Oakeley (Schneider's last pupil) used to talk much of his playing of these compositions. He liked playing some of 'the 48' on his deep-toned Silbermann organ. Mendelssohn records in one of his letters his surprise at hearing him play the D major. He himself used to tell with pride how he 'tried' upon Mendelssohn and another Professor of Music the B flat minor of

the second book. The Professor stood by his side unmoved, but the composer of 'Elijah' disappeared into a remote gallery, to hide his emotion.

Schneider's few published works include an 'answer of thanks' to the 'Jubel Album,' a masterly Fantasia and Fugue in D minor (op. 3), etc.

E. M. O.

SCHNELLER. The German name for the short trill or inverted mordent—

SCHNETZLER, JOHANN. See **SNETZLER, JOHN.**

SCHNORR VON CARLSFELD, LUDWIG, born July 2, 1836, at Munich, the son of the painter Julius Schnorr von Carlsfeld, first received instruction in music from Julius Otto at Dresden, where, in 1846, his father became director of the Kunst Akademie. In 1854 he was for a short time at the Leipzig Conservatorium, and later in the year studied for the stage under Eduard Devrient at Carlsruhe, where he became engaged. He made his début in the modest part of Napthali in Méhul's 'Joseph,' and later made a great success as Robert (Meyerbeer). About this period he married the singer, Malwina Garrigues (born Dec. 7, 1825). On leave of absence, he sang in opera at Wiesbaden and Frankfort, and at festivals at Mainz and Düsseldorf. From 1860 to 1865 he was engaged at Dresden, where he increased his popularity. In 1862 Wagner heard him when singing at Carlsruhe as Lohengrin, and was so struck with his performance that he determined to confide to him the part of Tristan whenever the opera was produced. Schnorr had been warmly recommended to the composer earlier, both by Tichatschek the singer, and Devrient, but for a time Wagner was not prepossessed in Schnorr's favour, on account of his unromantic figure, in spite of his talent and his enthusiasm for Wagner and his music. (*Vide* 'Meine Erinnerungen an L. S. v. C.,' *Neue Zeitschrift für Musik*, Nos. 24 and 25, 1868.) On June 10, 1865, Schnorr and his wife created the parts of Tristan and Isolde, when the opera was produced at Munich, at the express instance of the composer. Their leave of absence being limited, they returned to Dresden, July 15, and the tenor died six days after, of a chill and rheumatism, caught at the first performance of the opera. He was a clever, all-round musician, an excellent pianist and extempore player, a composer, and arranger of songs of Bach, Gluck, and the old Italian school. He was also a painter and a writer of poetry. In 1867 his widow published a volume of poems by herself and her husband. After his death she was engaged at Hamburg, and finally at Carlsruhe, where, on her retirement, she became

a teacher of singing. She died at the Vincennes Hospital there on Feb. 8, 1904. A. C.

SCHOBERTLECHNER, FRANZ, born at Vienna, July 21, 1797. Hummel composed for him his second pianoforte Concerto, in C, which he performed in public with success when only ten years old. The precocious child was taken under the patronage of Prince Esterhazy, and sent to Vienna, to study under Förster. From 1814 he travelled in Austria and Italy. While at Florence he composed a requiem, and a *buffa* opera, 'I Virtuosi teatrali.' In the next year, having been appointed chapel-master to the Duchess of Lucca, he wrote 'Gli Arabi nelle Gallie,' and subsequently, at Vienna, in 1820, 'Der junge Onkel.' In 1823 he went to Russia. He seems to have written to Beethoven, before starting, for letters of introduction, which the composer refused.¹ At St. Petersburg he recommended himself to dall' Occa, a professor of singing, whose daughter he married in 1824. After travelling in Germany and Italy, the pair returned to St. Petersburg in 1827, where Mme. Schobertlechner was engaged for three years at the Italian Opera at a salary of 20,000 roubles. Her husband composed for her an opera, 'Il Barone di Dolzheim,' which had some success. In 1831 Schobertlechner retired to a country house near Florence. His last opera was 'Rossane,' produced at Milan, Feb. 9, 1839. He died at Berlin on Jan. 7, 1843.

His published works are chiefly for the pianoforte; a list of them is to be found in Fétis's *Biog. d. Mus.* His wife,

Madame SOPHIE SCHOBERTLECHNER, daughter of Signor dall' Occa, was born at St. Petersburg in 1807. Up to 1827 she appeared only in concerts, but was then engaged at the Italian Opera of St. Petersburg, as we have also already mentioned. She had a very beautiful voice, and for twelve or thirteen years sang with unvarying success in almost all the principal towns of Germany and Italy. In 1840 she left the stage, retired to her husband's property in Tuscany, and died at Florence in 1863. F. A. M.

SCHOBERT, or **CHOBERT** in Mozart's orthography,² a player on the harpsichord, whose sonatas were the delight of our great-grandmothers. His Christian name does not appear, and little is known of his biography. He is said to have been born in 1720, and brought up at Strassburg. He was at one time organist at Versailles, but was dismissed for negligence. He settled in Paris in 1760, in which year his first works were published there, where he was in the service of the Prince de Conti. On the occasion of his death, August 1767, Grimm, no mean judge of music, inserts in his *Correspondence* a very high eulogium on his merits as a player. He praises him for 'his great ability, his

¹ See Note to Beethoven's *Letters*, translated by Lady Wallace, vol. II. p. 115.

² See *Letter*, Oct. 17, 1777.

brilliant and enchanting execution, and an unequalled facility and clearness. He had not the genius of our Eckard, who is undoubtedly the first master in Paris; but Schobert was more universally liked than Eckard, because he was always agreeable, and because it is not every one who can feel the power of genius.' This is the description of a pleasant brilliant player who never soared above the heads of his audience. He left seventeen sonatas for PF. and violin; eleven for PF., violin, and violoncello; three quartets for PF., two violins, and violoncello; six 'sinfonies' for PF., violin, and two horns; six PF. concertos, and four books of sonatas for PF. solo.¹ These seem to have been originally published in Paris, but editions of many of them appeared in London between 1770 and 1780. The particulars of his death are given by Grimm. It was occasioned by eating some fungi which he gathered near Paris, and which killed his wife, his children, a friend, the servant, and himself.² Schobert and Eckard are alike forgotten by modern musicians. A Minuetto and Allegro molto in E \flat have been reprinted in Pauer's 'Alte Meister' (the former has been 'freely arranged' in L. Godowsky's 'Renaissance'), other movements in the 'Maitres du Clavecin,' and a Sonata, so-called, in the Musical Library. These pieces are tuneful and graceful, but very slight in construction, the harmonies consisting chiefly of alternations of tonic and dominant, seldom in more than three parts, often only in two. Burney (*Hist.* iv. 591, 597) remarks that his music is essentially harpsichord music, and that he was one of the few composers who were not influenced by Emanuel Bach. G.

SCHËLCHER, VICTOR, French writer and politician, son of a manufacturer of china, was born in Paris, July 21, 1804, educated at the Collège Louis le Grand, and well known as an ultra-republican. On the accession of the Emperor Napoleon III. he was expelled both from France and Belgium, but took refuge in London, where he brought out his *Histoire des crimes du 2 Décembre* (1853), and an English pamphlet entitled *Dangers to England of the Alliance with the men of the Coup d'État* (1854).

Schelcher remained in England till August 1870, returning to Paris immediately before the Revolution of Sept. 4. As staff-colonel of the Garde Nationale he commanded the Legion of Artillery throughout the siege of Paris. After Jan. 31, 1871, he was elected to the Assemblée Nationale by the Department of the Seine, Martinique, and Cayenne, and sat for Martinique till elected a life-senator (Dec. 16, 1875).

His claim to a place in this work, however, is as a distinguished amateur. His devotion to art of all kinds was proved by his articles in *L'Artiste* (1832), and *La Revue de Paris* (1833),

and he made during his travels a most interesting collection of foreign musical instruments. His long stay in England had a still more remarkable result in his enthusiasm for Handel. Up to 1850 only the 'Messiah' and a few other works of Handel had been given in Paris, but very spasmodically; M. Schelcher resolved to do something to remove this reproach from France. He accordingly made a collection of Handel's works, and of books and pamphlets bearing on his life and music, a list of which he gives in the beginning of his book. To the autographs in Buckingham Palace and the Fitzwilliam Museum at Cambridge, and to the copies by Smith formerly in possession of Mr. H. B. Lennard, he obtained access, and thus provided, published *The Life of Handel*, by Victor Schelcher, London, Trübner, 8vo, 1857. The author was materially assisted by Mr. Rophino Lacy,³ whose labours are amply acknowledged in the preface (p. xxii). The work was written by M. Schelcher in French, and translated by James Lowe. It contains much information beyond what is indicated in the title, especially with regard to Italian opera and music in general in England during the 18th century. The French MS., *Handel et son temps*, was handed over to *La France Musicale*, which (August 19, 1860) published the first four chapters, and the beginning of the fifth (Nov. 2, 1862), but there broke off, doubtless for political reasons. The MS. was supposed to have been destroyed, till May 25, 1881, when it was offered for sale by M. Charavay, and at once bought for the library of the Conservatoire, thus completing M. Schelcher's magnificent gift (Nov. 1872) of all the works, in print or MS., used by him in preparing the book, and his collection of foreign instruments. He later added a quantity of music and rare books bearing on the history of Italian opera in London, and on singing and pianoforte-playing, in the United Kingdom. The *Fonds Schelcher*, as it is called, contains in all 500 volumes uniformly bound with the initials of the donor, and has already been of immense service to French artists and musicologists, whose knowledge of the madrigal writers and pianists of the English school, and indeed of Handel himself, is as a rule but imperfect. [Schelcher died at the house of a friend at Horville (Seine-et-Oise), Dec. 24, 1893.] G. C.

M. Schelcher's work is very inadequate to its purpose. The author was no musician, and was therefore compelled to depend on the labours and judgment of another. His verdicts are deformed by violent and often ludicrous partisanship; and his style, which is extremely French, has had but small assistance from his translator.⁴ No man can write a serious book on a

³ M. Schelcher's statement as to Mr. Lacy's assistance should materially modify our inferences from his account of his own part in the examination of Handel's MSS., p. xxi.

⁴ Who did not do his work well. Instead of modifying the

² Grimm (new ed.), vii. 422.

great subject without its being of some value, and Schœlcher's dates and lists are alone enough to make the student grateful to him; it is a great pity that M. Schœlcher's original French work is not published.

G.
SCHÖNBERGER, BENNO, born at Vienna, Sept. 12, 1863, was a pupil of Anton Door for piano, Bruckner for counterpoint, and Volkmann for composition, at the Vienna Conservatorium, until 1874, when he played at recitals, and with the Hellmesberger Quartet. He went for a time to study with Liszt, and in 1878 undertook an extended tour in Russia, Germany, Austria, and Belgium. From 1880 to 1885 he taught in Vienna, and after a journey to Sweden in 1886 settled in London, making his first appearance at a recital of his own, in January 1887. Since then he has held an honourable place among the pianists who appear regularly in London, and his interpretations of the classics are always sound and interesting, while his tone and technique are of remarkable excellence. He went to America on tour in 1894. Of late years he has appeared but rarely, owing to ill-health; but he is a diligent and successful teacher of his instrument. He has published numerous piano pieces and songs. (Baker's Dictionary, etc.)

M.
SCHÖNE MINKA. The name by which a certain very popular Ruthenian or Little Russian song is generally known. (The music and original words are given by Prach, *Sobranie russkikh narodnykh pyesen*, end of vol. i., and the literal German version in Fink, *Musikalischer Hausschatz*, No. 157.)

Ye-khav Ko-zak za Du-na-i, Ska-zal div-chi-

Ein Ko-sak ritt in den Krieg, Sagt dem Mäd-chen

na pro-ahchai; Vui ko-ni-ki vo-ro-nen-ki

Le-be-wohl; Nun, ihr mei-ne He-ben Rap-pen,

Na el-lu-gu-lai. Po-stoi, po-stoi,

Lau-fet was ihr könnt. Wart doch, wart doch,

ko-za-che, Tvo-ya div-chi-na pla-che,

mein Ko-sak, Sieh dein Mäd-chen weint um dich,

Vak tni me-ne po-ki-da-esh, Tii-ko po-dn mai.

Wenn du mich nun auch verlässt, Den-ke doch an mich.

It is marked by perfect regularity of rhythm and absence of certain eccentricities noted in the article, SONG, as common in the Cossack and Little Russian songs; and the words are a dialogue in rhymed verse. It is an interesting instance of a Volkslied of one country becoming natural over-exuberance of the author he has rather exaggerated it, and has allowed a number of sentences to pass which no literary man of any pretension should have written.

domesticated in the same capacity in another, and also of the extraordinary transformation which the song may undergo in the process. A very loose imitation of the words of this song, beginning 'Schöne Minka ich muss scheiden,' was published by the German poet Ch. A. Tiedge in 1808, and this, with the melody much altered, is now to be found in most collections of German Volkslieder without notice of the Slavonic source. J. N. Hummel has made this air (rather in its original than in the German form) the subject of 'Adagio, Variazionen und Rondo über ein russisches Thema,' for PF., violin, and violoncello, op. 78, and Weber wrote a set of brilliant variations for pianoforte on the same theme. R. M.

SCHOLA CANTORUM, THE, an important institution founded in 1896 in Paris by CHARLES BORDÈS, the famous director of the 'Chanteurs de Saint-Gervais,' ALEXANDRE GUILMANT, and VINCENT D'INDY. Its first object was the execution of plain-song after the Gregorian tradition, and the revival of music of the period of Palestrina. The beginnings were very modest, only twenty-one pupils attending the first course; but in 1900 its growth had been so rapid that it was found necessary to transfer it from the original premises in the Rue Stanislas, to the large building it now occupies in the Rue Saint Jacques, formerly the Hôtel des Bénédictins Anglais, where the remains of the exiled James II. of England were deposited.

It is now a superior high-class music-school, with more than 300 pupils of both sexes, who receive a thorough musical education, founded (whatever may be the ultimate direction of their studies) upon a knowledge of plain-song, liturgical melodies, and of the religious music of the polyphonic period. The course of training is wisely divided into two sections, one concerned solely with technique and the other with style and the application of technique to art. At the monthly concerts, directed and prepared by M. Vincent d'Indy, the head of the institution, the pupils have opportunities for becoming intimately acquainted with the music of the centuries preceding the 19th. Complete performances are given of works rarely to be heard elsewhere in Paris; Bach has been represented by more than 20 of the church cantatas, the Christmas Oratorio, all his concertos, the Passion according to St. John, and the B minor Mass; Gluck, by 'Alceste,' 'Armide,' 'Iphigénie en Aulide'; Monteverdi by 'Orfeo,' and 'L'Incoronazione di Poppea.' Numberless works by such old French masters as Clérambault, Charpentier, Dumont, Leclair, Lalande, etc., have been revived, as well as Rameau's 'Dardanus,' 'Hippolyte et Aricie,' 'Zoroastre,' 'Castor et Pollux.' There are a certain number of bursaries or scholarships connected with the institution, and by an ingenious system the fees due from the pupils are in many cases balanced by the fees they earn in taking part in the concerts. There is a 'section

de propagande' confided to M. Bordes, who has founded affiliated societies at Avignon, Lyons, Marseilles, Bordeaux, Poitiers, Nancy, etc. The 'bureau d'édition' connected with the school has done very useful work in bringing out an 'Anthologie des Maîtres primitifs,' 'Les Archives des Maîtres de l'Orgue,' 'Les Concerts Spirituels,' a collection of modern vocal and organ music, and 'Le Chant Populaire.' An 'Édition mutuelle' of the compositions of the younger men is intended to assure to the composers the profit on the sale and performance of their works. The school also publishes a monthly organ *Les Tablettes de la Schola*, which chronicles the various doings of the institution. G. F.

SCHOLZ, BERNHARD E., born March 30, 1835, at Mainz, studied the piano with Ernst Pauer (at that time Director of the Liedertafel in that city) and theory with S. W. Dehn, became teacher of theory in the Royal School of Music at Munich in 1856, was Capellmeister at the Hanover Court Theatre from 1859 till 1865, when he went to live in Berlin, until he was summoned to Breslau in 1871 as Director of the Orchesterverein. On April 1, 1883, he became Raff's successor as Director of Dr. Hoch's Conservatorium at Frankfurt. There he met with much opposition, and in spite of endless intrigue succeeded in ensuring a prosperous future for the Conservatorium. Since 1884 he has also directed the Gesangverein founded in Mainz by Fried. Wilhelm Rühl.

Many compositions have been written by Bernhard Scholz, including songs, string quartets (opp. 46 and 48), and a quintet (op. 47), a piano concerto, a symphony in B♭ (op. 60) entitled 'Malinconia,' some pieces for orchestra, solos, and chorus, 'Das Siegesfest,' 'Das Lied von der Glocke,' overtures to Goethe's 'Iphigenie' and 'Im Freien,' a requiem, and the operas 'Carlo Rosa' (Munich, 1858); 'Zietensche Husaren' (Breslau, 1869); 'Morgiane' (Munich, 1870); 'Genoveva' (Nuremberg, 1875); 'Der Trompeter von Säckingen' (Wiesbaden, 1877); 'Die vornehmen Wirte' (Leipzig, 1883); 'Ingo' (Frankfort-a.-M., 1898); and 'Anno 1757' (Berlin, 1903). H. V. H.

SCHOP, or SCHOPP, JOHANN, a skilful player on the lute, violin, and trombone, who entered the court band at Wolfenbüttel in 1615, was a violinist at the Danish court in 1618-19 (according to one account he went to Denmark in 1615, so that his stay at Wolfenbüttel must have been very short), and in 1621 became director of the Ratsmusik at Hamburg, being appointed later on organist to the town and to the church of St. James. He died about 1664 or 1665. Although he was chiefly renowned as an instrumentalist (Mattheson speaks of him as incomparable in his way), he is at present known mainly as a composer of chorale-tunes, in virtue of his contributions to Rist's hymn-book, published in

1641 as 'Himmliche Lieder.' No copy seems to exist of his 'Neue Paduanen, Galliarden, Allemanden,' published in six parts at Hamburg in 1633-40; his 'Geistliche Concerten' appeared in 1643, and many occasional compositions, such as congratulatory odes on weddings, are extant. Besides Rist's book, already alluded to, the following contain tunes by Schop: Rist's 'Frommer und gottseliger Christen alltägliche Hausmusik' (1654), Philip von Zesen's 'Jugend- und Liebes-Flammen,' 1651, and 1653, and from these books the melodies were copied into later collections. (*Quellen-Lexikon*, etc.) M.

SCHOTT, ANTON, born June 25, 1846, at Castle Staufenack in the Swabian Alps, was educated at the military academy at Ludwigsburg, Württemberg, and served as an artillery officer through the war of 1866. Some time after, his voice attracted the attention of Pischek, and of Frau SCHEBEST, from the latter of whom he had much instruction preparatory to his appearance on the stage. On May 8, 1870, Herr Schott made his début at Frankfort, as Max in 'Der Freischütz,' with such success that he determined to abandon the army in favour of music, though prevented for a time by the outbreak of the war of 1870, through which he served and obtained his captaincy. At the end of 1871 he was engaged at Munich, and subsequently at Berlin, Schwerin, and Hanover. At the last place he created the part of Benvenuto Cellini on the revival of Berlioz's opera there under Bülow. He sang in England, June 16, 1879, at piano recitals given by Dr. von Bülow at St. James's Hall, and at a New Philharmonic concert, in all which he was well received. He appeared Jan. 10, 1880, at Her Majesty's Theatre (Carl Rosa), as Rienzi, and afterwards as Lohengrin, with only moderate success, owing to his faulty intonation. He had a fine presence and a good voice. He received further instruction from Blume, and created the part of Azim in Stanford's 'Veiled Prophet' on Feb. 8, 1881, at Hanover. In 1882 he sang with Neumann in Wagner's company in Italy, and in 1884 in Leopold Damrosch's company in America. He afterwards devoted himself exclusively to concert-singing. In his day he was considered one of the best 'heroic tenors' in Germany. A. C.

SCHOTT (B. SCHOTT'S SÖHNE), the well-known firm of music-publishers at Mainz. This business, the largest of the kind except Breitkopf & Härtel's, was founded in 1773 by BERNHARD SCHOTT, and carried on after his death in 1817 by his sons ANDREAS (born 1781, died 1840), and JOHANN JOSEPH (born 1782, died 1855), who in the early part of the 19th century set up a house of their own at Antwerp (afterwards removed to Brussels) which gave them an advantage both in suppressing pirated editions, and in dealing with the French and Italian composers then in vogue. In 1838 they founded a branch in London, superintended by a third

brother, ADAM (who afterwards was a band-master in Canada and India, dying in the latter country), and conducted with great success since 1849 by J. B. Wolf (born 1815, died 1881), and, since his death, by Mr. Carl Volkert. Another branch in Paris soon followed. PETER, a younger brother of FRANZ PHILIPP, and grandson of Bernhard, lived in Brussels and managed the business of the branches there and in Paris, forwarding at the same time the circulation of the Mainz publications. He died Sept. 20, 1894, in Paris. Besides these four independent houses the firm has dépôts in Leipzig, Rotterdam, and New York. FRANZ PHILIPP (born 1811), grandson of Bernhard, took part in the business from 1825, and managed it after the death of his father Andreas, first in partnership with his uncle Johann Joseph, and after his death by himself. Since his death in Milan in 1874 the business has been carried on with the old traditions by PETER SCHOTT (a son of the Brussels Peter), FRANZ VON LANDWEHR (a nephew of the family), and DR. L. STRECKER. The Schotts have been music-publishers to the Court since 1824.

At a time when the book and music trade was regulated by no fixed laws, the correct and elegant editions of Mainz found a ready entrance into foreign countries, and the firm was thus stimulated to keep ahead of rivals by making constant improvements in music-printing and engraving. They were the first to use lithography for this purpose, an important turning-point in the printing of music. Their copyright publications now amount to over 23,000, including Beethoven's latest quartets, Ninth Symphony, and Mass in D, nearly all the operas of Donizetti, Rossini, Adam, and Auber, most of Rink's organ-music, 'der Choral-freund,' in nine volumes; 'École pratique de la modulation,' op. 99; 'Gesangstudien' (vocalises, méthode de chant, etc.) by Bordèse, Bordogni, Concone, Fétis, Gavaudé, Garcia, Lablache, Abbé Mainzer, Rossini, Rubini, Vaccaj, etc. To come to later times, Wagner's 'Meistersinger,' 'Ring des Nibelungen,' and 'Parsifal.' The establishment has been enlarged by the addition of a printing-office (where have been printed, among others, Gottfried Weber's theoretical works, the periodical *Cécilia*, 1824-48, etc.), and in 1829 of a piano factory, which, however, was given up in 1860 on account of the extension of the main business.

The Schotts, besides innumerable services to art and artists, have done good work in a smaller circle by fostering music in Mainz itself. Franz and his wife Betty (*née* von Braunrasch, born 1820, died 1875) left a considerable sum for the maintenance of a permanent orchestra and conductor of eminence, in order that Mainz might hold its own in music with the richer cities of the Rhine provinces. C. F. P.

SCHOTTISCHE ('The Scotch dance'), a

round dance very similar to the polka. It must not be confounded with the Écossaise, which was a country dance of Scotch origin introduced into France towards the end of the 18th century. The Schottische was first danced in England in 1848, when it was also known as the German Polka. It does not seem to have been danced in Paris, as Cellarius (*La Danse des Salons*, Paris, 1847) does not include it amongst the dances he describes. The music is almost the same as that of the polka, but should be played rather slower. The following is the tune to which it was originally danced in England.

W. B. S.

SCHRADIECK, HENRY, violinist, was born at Hamburg, on April 29, 1846. He received his first lesson from his father on his fourth birthday, and already made public appearances in his sixth year. In 1854 Teresa Milanollo heard, and took considerable interest in him, putting him into the hands of Léonard at the Conservatoire in Brussels, where he stayed for four years, and gained the first prize. Afterwards he studied under David at Leipzig (1859-61), obtaining his first important engagement in 1863 as soloist in the so-called 'Private Concerts,' conducted by Reinthaler at Bremen. The following year he was appointed professor of the violin at the Moscow Conservatorium, but in 1868 returned to Hamburg to take the post vacated by Auer as Concertmeister of the Philharmonic Society. After six years he moved (in 1874) to Leipzig, becoming Concertmeister at the Gewandhaus concerts, professor at the Conservatorium, and leader of the theatre orchestra. His pupils became very numerous, and at length he found himself overburdened with so many duties, and accepted an appointment as conductor and teacher of the violin at the College of Music at Cincinnati. Here he worked until 1889, and then returned to his native town, taking his old position as Concertmeister of the Philharmonic Society, besides teaching at the Hamburg Conservatorium. Subsequently he went to New York as principal violin professor at the National Conservatoire, moving in 1899 to Philadelphia, where he teaches at the S. Broad Street Conservatoire.

As a writer of Studies for the violin he stands very high. Amongst them are twenty-five

Grosse Studien for violin alone, three volumes of Technical Studies, Scale Studies, Guide to the Study of Chords, Finger Exercises, and 'The First Position.' He has also interested himself in questions connected with the making of violins.

w. w. c.

SCHRIDER, SCHREIDER, or SCHRÖDER, CHRISTOPHER, was one of Father Smith's workmen, and previous to 1708 had become his son-in-law. After Smith's death he succeeded to his business, and in 1710 was organ-builder to the Royal Chapels. His organs do not appear to be very numerous, that of Westminster being his *chef-d'œuvre*. It was built for the coronation of George II. in 1727, and was presented to the Abbey by the King (Chrysander's *Händel*, ii. 174, note). He put up another organ in Henry the Seventh's Chapel for the funeral of Queen Caroline, Dec. 17, 1737, when Handel's noble anthem, 'The ways of Zion,' was first sung to its accompaniment (*Ibid.* p. 437, note; Stanley's *Westminster Abbey*, p. 166). An amusing epitaph is quoted in Scott's *Gleanings from Westminster Abbey*, 2nd ed. p. 279.

V. DE P.

SCHRÖDER-DEVRIENT, WILHELMINE, a highly-gifted dramatic singer, was born at Hamburg, Dec. 6, 1804.¹ Her father, Friedrich Schröder—who died in 1818—had been an excellent baritone singer, a favourite in many operas, especially in Mozart's 'Don Juan,' which he was the first to act in German. Her mother was Antoinette Sophie Bürger, a celebrated actress, sometimes called 'the German Siddons.'

Wilhelmine was the eldest of four children. She enjoyed great advantages of training; dancing lessons, and public appearances in ballets in early childhood, helped her to mastery of attitude and elasticity of movement; afterwards, when her parents' wanderings led them to Vienna, she took such parts as Ophelia, and Aricia (Schiller's 'Phädra'), at the Hofburg-theater, receiving careful instruction in gesture and delivery from her mother, who afterwards superintended her study of operatic parts.

Thus there was no trace of the débutante, when, in 1821, Wilhelmine made a brilliant first appearance at the Vienna opera-house as Pamina in 'Die Zauberflöte.' The freshness of her well-developed soprano, her purity of intonation and certainty of attack, astonished the public. Other early triumphs were Emmeline (Weigl's 'Schweizerfamilie'), Marie (Grétry's 'Barbe bleu'²), where she showed herself worthy of all praise 'as well in singing as in acting, especially in parts demanding passionate expression.' As Agathe ('Der Freischütz') her glorious voice and charming appearance won great approval, not only from the public 'who already loved her,' but from

Weber, who presided over the performance at Vienna, March 7, 1822. But her great achievement was the creation of the part of Leonore, on the revival of 'Fidelio' at Vienna later in the year. Hitherto connoisseurs had failed to discover the merits of Beethoven's opera. Mlle. Schröder's impersonation of the heroine, besides laying the foundation of her own fame, redeemed the music from the imputation of coldness, won for the work the praise so long withheld, and achieved its ultimate popularity by repeated performances in Germany, London, and Paris. The story of her first appearance in the part has often been quoted from Glümer's *Erinnerungen an Wilhelmine Schröder Devrient*. Beethoven was present at the performance. 'He sat behind the conductor, and had wrapped himself so closely in the folds of his cloak that only his eyes could be seen flashing from it.' Schröder's natural anxiety only heightened the effect of her acting. A breathless stillness filled the house until Leonore fell into the arms of her husband, when a storm of applause broke out which seemed unceasing. To Beethoven also had his Leonore been revealed in the glowing life of Schröder's representation. He smilingly patted her cheek, thanked her, and promised to write an opera for her. Would that he had!

In 1823 she went to Dresden to fulfil a contract to sing at the Court Theatre for two years, at a salary of 2000 thalers. (At a later period she received 4000 thalers at the same house, for her connection with Dresden never entirely ceased as long as she was on the stage.) She married Karl Devrient, an excellent actor whom she met in Berlin during an engagement there that year. Four children were born, but the marriage was not a happy one, and was dissolved in 1828. During the next eight years she delighted her audiences by her appearance in the great classical characters which ever remained her most successful parts. In Weber's operas, as *Preciosa*, *Euryanthe*, and *Reiza*, she is said to have thrown a new light over both story and music, gradually heightening the interest of the work until a torrent of inspiration carried all before it. In Spontini's 'Vestale' she was the very personification of the spirit of the antique. Yet no less did she succeed, in Paër's comic opera, 'Sargino,' in singing with so much finish, and acting with so much humour, that it became a matter of dispute whether tragedy or comedy was her forte.

In 1830 she passed through Weimar and sang to Goethe on her way to Paris to join Röckel's German company. With an exalted sense of the importance of her mission, she wrote: 'I had to think not only of my own reputation, but to establish German music. My failure would have been injurious to the music of Beethoven, Mozart, and Weber.'

¹ According to her own account, as quoted in Glümer's *Erinnerungen*, and not in October 1805, as stated by Fétis.

² 'Raoul Barbe bleu' (1789), Germanised into 'Raoul der Blaubart.'

This date was an epoch in the history of music in Paris. Bonquets—then an extraordinary manifestation of approval—were showered upon the triumphant singer. In her subsequent visits to Paris, 1831 and 1832, she sang in Italian opera.

In 1832 Schröder-Devrient was heard at the King's Theatre in London, engaging with Mr. Monck Mason to sing ten times monthly during May, June, and July, for £800 and a benefit. Chelard was conductor. 'Fidelio,' 'Don Juan,' and Chelard's 'Macbeth' were repeatedly given, but Chorley (*Musical Recollections*) says, 'Fidelio was the solitary success of a disastrous enterprise. . . . The sensation is not to be forgotten. The Italians (not very strong that year) were beaten out of the field by the Germans. The intense musical vigour of Beethoven's opera was felt to be a startling variety, wrought out as it was in its principal part, by a vocalist of a class entirely new to England. This was Madame Schröder-Devrient. Within the conditions of her own school she was a remarkable artist. . . . She was a pale woman; her face, a thoroughly German one though plain, was pleasing, from the intensity of expression which her large features and deep tender eyes conveyed. She had profuse fair hair, the value of which she thoroughly understood, delighting, in moments of great emotion, to fling it loose with the wild vehemence of a Mænad. Her figure was superb though full, and she rejoiced in its display. Her voice was a strong soprano, not comparable in quality to some other German voices of its class. . . . but with an inherent expressiveness of tone which made it more attractive on the stage than many a more faultless organ. . . . Her tones were delivered without any care, save to give them due force. Her execution was bad and heavy. There was an air of strain and spasm throughout her performance.'

The 'Queen of Tears' (so she was styled) was heard next season in 'Der Freischütz,' 'Die Zauberflöte,' 'Euryanthe,' and 'Otello.' The engagement was to sing for Mr. Bunn at Covent Garden twenty-four times at £40 a night, and once for the benefit of the speculators. However all London was under the spell of Taglioni and of Fanny Elslér. Malibran in the English opera; Pasta, Cinti-Damoreau, Rubini, and Tamburini, in the Italian opera, sang to empty houses. Again in 1837, after Malibran's death, Mr. Bunn engaged Schröder-Devrient at a double salary. 'Fidelio,' 'Le Sonnambula,' and 'Norma' were performed in English. She broke down in health before the season was over. After a rest, too short to be beneficial, she resumed her work, and was carried home insensible from the theatre. She was able, however, to give a farewell performance of 'Fidelio,' with the last act of the 'Montecchi e Capuletti,' and then discovered that Bunn had declared himself bankrupt and

could pay her nothing. In his book, *The Stage both before and behind the Curtain*, Bunn complains of the singer's attempts at extortion; says that she demanded the fourth part of the proceeds of each night, but on this sum proving to fall short of the fixed salary, asked for £100.

From 1837 a gradual decline in power was observed in Mme. Schröder-Devrient, though she continued to delight her audiences all over Germany in the parts she had identified herself with. Of Wagner's operas she only appeared in 'Rienzi' as Adriano Colonna, in 'Der fliegende Holländer' as Senta, and in 'Tannhäuser' as Venus. Gluck's masterpieces were among her latest studies. Her last appearance in Dresden was in his 'Iphigenie in Aulis,' in 1847; her last appearance on any stage took place at Riga, where she played Romeo. Her concert-singing was greatly admired, and one of the liveliest passages in Mendelssohn's letters¹ describes the *furor* caused by her impromptu execution of 'Adelaide' in her ordinary travelling dress at the Gewandhaus Concert of Feb. 11, 1841.

She had made a second marriage with Herr von Döring, a worthless person, who immediately seized upon his wife's earnings and pension, and left her almost destitute, to recover what she could in a long lawsuit. The marriage was dissolved at her wish. In 1850 she again married Herr von Bock, a man of culture, who took her to his property in Livonia. Passing through Dresden she was arrested on account of the sympathy she had shown with the revolution of 1848. An examination in Berlin resulted in her being forbidden to return to Saxony; in the meantime she was exiled from Russia. Her husband's exertions and sacrifices secured a reversal of this sentence. In 1856 she visited some German towns, singing Lieder in public concerts. Her interpretations of Beethoven's 'Adelaide' and of Schubert's and Schumann's songs were immensely admired, though by some thought too dramatic. When at Leipzig her strength succumbed to a painful illness. She was devotedly nursed by a sister and a friend at Coburg, and died Jan. 21, 1860.

Even in her best days her voice was of no extraordinary compass, but, to the last, the tones of the middle notes were of exceptionally fine quality. Mazatti's teaching, with further instruction from Radichi and from Miksch (the Dresden Chorus-master), had not been sufficient training for the young girl, who had besides been disinclined to the drudgery of scale-singing. The neglect of system and of careful vocal exercise resulted in faulty execution and too early loss of the high notes. This might have been less observable had she kept to such simple rôles as Pamina and Agathe. But there seemed a discrepancy between the delicate

¹ Letter, Feb. 14, 1841.

WILHELMINE SCHRÖDER-DEVRIENT

organisation of her voice and the passionate energy of her temperament. By force of will she accomplished more than was warranted by her natural powers. 'A portion of her life was exhausted in every song.' As a musical instrument the voice was not under her command; as a vehicle of expression it was completely so. It was the dramatic genius of this artist which won for her an European reputation. She infused a terrible earnestness into the more pathetic impersonations, while an almost unerring instinct of artistic fitness, combined with a conscientious study of the parts, secured a perfection of performance which reached every detail of by-play. It could be said of her that she never ceased learning, for she toiled at her art to the end. She once wrote as follows: 'Art is an eternal race, and the artist is destroyed for art as soon as he entertains the delusion that he is at the goal. It were certainly comfortable to lay down the task with the costume, and let it rest until its turn comes round again in the répertoire. I have never been able to do this. How often, when the public have shouted approval and showered bouquets on me, have I retired in confusion, asking myself: "Wilhelmine, what have you been about again?"—then there would be no peace for me, but brooding the livelong days and nights, until I had hit upon something better.'

Her good faith and earnestness led her to condemn a fellow-actress for disrespect to her art when she carelessly threw down behind the scenes a handkerchief which had served on the stage as a Signal of Love. Schröder-Devrient's art generally inspired others with her own spirit. On one occasion it moved a Bluebeard to forget the ordinary artifice used in dragging his Marie off the stage, and to take her literally by the hair. 'Almost unconscious with pain and covered with blood, the artist endured this torture rather than spoil the effect of the tableau.' It was easier for her to forgive an injury arising thus from excess of feeling, than to tolerate the inadequate support of a first tenor, 'half sponge, half wood'; or to allow the sleepy acting of a prima donna to go unpunished: as when, in Romeo, she was guilty of tickling the feet of a too unemotional Giulietta, during the caresses of the last scene of Bellini's opera. (See also Moscheles' *Life*, i. 270.) An audience of 'Jedern Seelen' was her abhorrence, and the ignorance of fashionable London in the forties tried her sorely (*Ib.* p. 263).

In his *Modern German Music* (i. 341) Chorley enters upon an analysis of some of Madame Schröder-Devrient's parts. He and Berlioz (the latter in letters to the *Journal des Débats*, 1843) concur in condemning the mannerisms which grew upon her as time went on. Rellstab has devoted an article to her (*Ges. Schriften*, ix.). A. von Wolzogen's *With. Schröder-*

Devrient (Leipzig, 1863) is the best life, and gives a circumstantial, impartial, and interesting account; while Wagner's *Ueber Schauspieler und Sänger* eulogises her depth of feeling and power of interpretation.

L. M. M.

SCHROETER, CHRISTOPH GOTTLIEB, born at Hohenstein, Saxony, August 10, 1699, long enjoyed in Germany the honour of having invented the pianoforte. His claims, first published by himself in Mizler's *Musikalische Bibliothek* (Leipzig, 1738) and repeated in Marburg's *Kritische Briefe* (Berlin, 1764) have been examined and set aside in favour of Cristofori. [See *PIANOFORTE*, vol. iii. pp. 718, 719.] We learn from Schroeter's autobiography that at seven years of age he was placed as a chorister at Dresden, under Capellmeister Schmidt, and that Graun was his companion. The clavichord early became his greatest pleasure. When he lost his voice he entered the Kreuzschule to study thorough-bass, that is, accompaniment as then practised, and learned to quill and tune harpsichords, which led him to the monochord and systems of temperament. On the wish of his mother that he should study theology, he went to Leipzig for that purpose in 1717, but after her death resumed music, returned to Dresden, and was accepted by Lotti to copy for him, and write his middle parts. It was at this time that he endeavoured to combine the characteristics of the harpsichord and clavichord, by inventing two hammer actions, the models of which he deposited at the Saxon Court in 1721; but immediately afterwards he left Dresden, taking service with a Baron whom he does not name, to travel in Germany, Holland, and England. In 1724 he went to the University of Jena and began writing upon musical subjects; in 1726 he took the organist's place at Minden, removing in 1732 to Nordhausen, where he remained until his death in 1782. [He published a treatise, *Deutliche Anweisung zum General-Bass*, in 1772 at Halberstadt, and his *Letzte Beschäftigung mit musikalischen Dingen* appeared posthumously in 1782. A list of his polemical pamphlets is given in the *Quellen-Lexikon* and elsewhere.] A. J. H.

SCHRÖTER, CORONA ELISABETH WILHELMINE, a celebrated singer of the Weimar court in its most brilliant days, was the daughter of a musician, Johann Friedrich Schröter. According to her latest biographer, Keil (*Vor hundert Jahren*, Leipzig, 1875), Corona was born Jan. 14, 1751, at Guben, whence the family shortly afterwards migrated to Warsaw, and finally to Leipzig. Corona's voice was trained by her father, and she sang when she was but fourteen at a Leipzig Grosses Concert (1765). From the following year until 1771 she was engaged at these concerts, Schmechling (La Mara) being retained as principal vocalist. Goethe had become acquainted with Schröter in 1766; ten years later he conveyed to her the offer of the

post of Kammersängerin to the Dowager Duchess of Weimar. Here she made her first appearance Nov. 23, 1776, and soon became the idol of the place. Associated with Goethe himself in the production of his dramas, she created amongst others the part of Iphigenia, completely realising the poet's ideal (see *Auf Mieding's Tod*). Her co-operation in 'Die Fischerin' included the composition of all the music. It was on July 22, 1782, that she was heard as Dortchen; and that 'Der Erlkönig,' with which the play opens, was sung for the first time. [In 1782-84 she sang at the Gewandhaus in Leipzig.] After 1786 Schröter sang little in public, but devoted herself to composition, painting, and a few dramatic pupils. Schiller heard her read Goethe's 'Iphigenie' in 1787, and Charlotte von Schiller, a year or two later, found much to praise in the musical settings of 'Der Taucher' and 'Würde der Frauen,' and their expressive rendering by the famous artist. In the meantime Schröter's health had broken down, and her death, when aged fifty-one, at Ilmenau, August 23, 1802, was not unexpected.

Her songs were published in two books. They are melodious and simple settings of poems by Herder, Matthison, Klopstock, etc. Book 1. (25 Lieder, Weimar, 1786) contains Goethe's 'Der neue Amadis' and 'Der Erlkönig.' The second collection of songs was published at Weimar, 1794.

Corona's brothers, Johann Samuel (see below) and Johann Heinrich Schröter (violinist) visited England; the latter published some duos for two violins and for violin and violoncello, in 1782. Besides the life by Keil, Düntzer's *Charlotte von Stein und Corona Schröter* may be consulted for details of her social and artistic successes. In 1778 Schröter handed to Goethe her MS. autobiography, which has never been made public, perhaps has not yet been discovered among his papers, although Goethe noted the receipt of it in his diary.

L. M. M.

SCHRÖTER, JOHANN SAMUEL, an esteemed pianoforte-player and composer for that instrument, was born about 1750 of German parents at Warsaw, where his father, Johann Friedrich, was oboist in the royal orchestra. About 1763 he accompanied his father and sister to Leipzig, and sang there in the Gewandhaus Concerts. On the breaking of his voice he devoted himself entirely to the piano, and travelled with his father, brother, and sister, performing as they went, through Holland to London. There they made their début in the concerts of Bach and Abel at the Thatched House, St. James's Street, May 2, 1772, Schröter playing a concerto on the 'Forte Piano,' which J. Christian Bach had first performed in 1767, the brother Johann Heinrich on the violin, and the sister, Corona, singing. [In 1773 we find evidence of his performance on the harpsichord, as Broadwood's

books show that a harpsichord was sent to Haberdashers' Hall on March 4, for J. S. Schröter (A. J. H.).] After J. C. Bach's death in 1782, he succeeded him as music-master to the Queen. 'Six Sonatas for the harpsichord or piano forte' are announced by W. Napier in the *Public Advertiser* in 1776 as his op. 1. This was followed in 1778 by op. 3, 'Six Concertos with an accompaniment for two violins and a bass'; and this again by three concertos with string accompaniments, op. 4; three, op. 5 (Berlin); op. 6 (Paris); op. 2, six trios (Amsterdam); op. 9, two ditto (Do.). [Many other compositions—quintets, trios, sonatas with and without accompaniment—are enumerated in the *Quellen-Lexikon*.] The *A B C Dario* (p. 144) says of him, 'He has composed the harpsichord parts of some concertos; the accompaniments are by Bach; they are neither new nor very striking. He plays in an elegant and masterly style; his cadences are well imagined, and if his *penchant* was not rather to play rapidly than *al core*, he would excel on the pianoforte.' Burney, on the other hand (in Rees), says, 'He became one of the neatest and most expressive players of his time, and his style of composition, highly polished, resembles that of Abel more than any other. It was graceful and in good taste, but so chaste as sometimes to seem deficient in fire and invention.' He did not remain long before the public in consequence of his marriage with one of his pupils, a young lady of birth and fortune, after which he played only at the concerts of the Prince of Wales and a few others of the nobility. He died on Sunday, Nov. 2, 1788, in his own house at Pimlico, having lost his voice some years before by a severe cold. His marriage was a clandestine one, and brought him into collision with his wife's family, the result of which was his surrendering all his rights for an annuity of £500. She is the lady who took lessons from Haydn during his residence in London, and fell violently in love with him. Haydn spoke of her many years after as a very attractive woman, and still handsome, though over sixty; 'had I been free,' said the patriarch, 'I should certainly have married her'—she was then a widow. He dedicated to her three clavier trios (B. & H., Nos. 1, 2, 6). [See vol. ii. p. 358.]

C. F. P.

SCHROETER, LEONARD, born at Torgau towards the middle of the 16th century, became Cantor of the Cathedral of Magdeburg about 1564, in succession to Gallus Dressler, also a composer of some importance. [His successor was appointed in 1600, so this may be assumed as the year of his death.] Schroeter's chief work is 'Hymni Sacri,' Erfurt, 1587, and consists of 4- and 5-part settings of those Latin Church Hymns which had also been received into the worship of the Lutheran Church.

Winterfeld says of these hymns that they belong to the best musical works of the time; the harmony is rich, clear, and dignified, and shows an unmistakable advance on the path of the older masters. They are in the same style as the Hymns of Palestrina and Vittoria, only the choral melody is mostly given to the upper voice. Some of these hymns, as well as some of the German psalms of Gallus Dressler, Schroeter's predecessor, are re-published in Schöberlein and Riegel's *Schatz des liturgischen Chorgesangs*, Göttingen, 1868-72. [Earlier publications of hymn-tunes by Schroeter were published in 1562, 1576, 1584, etc. See the *Quellen-Lexikon* for list.] Four Weihnachts-Liedlein of Schroeter's are received into the repertoire of the Berlin Dom-Chor, and are published in Schlesinger's 'Musica Sacra,' No. 11. A German Te Deum for double choir by Schroeter, originally published in 1576, has been printed by Otto Kade in the *Notenbeilagen* to Ambros's *Gesch. der Musik*, No. 28. J. R. M.

SCHUBART, CHRISTIAN FRIEDRICH DANIEL, born at Obersontheim in Snabia, in 1739,¹ and brought up, not as a musician, at Nördlingen, Nuremberg, and Erlangen. In 1768 we find him as organist at Ludwigsburg. His life seems to have been a very wild and irregular one, but he must have been a man of great talent and energy to justify the eulogies on him so frequent in the early volumes of the *Allg. musikalische Zeitung*, of Leipzig (see vol. ii. pp. 78, 98, etc.), and the constant references of Otto Jahn in his *Life of Mozart*. He lived in Mannheim, Munich, Augsburg, and Ulm; founded a *Deutsche Chronik* in 1744; was more than once in confinement for his misdeeds, and at length was imprisoned from 1777 to 1787 at Hohenasperg. [On his release he was appointed director of the court theatre; his paper changed its title to *Vaterlands-Chronik*, and appeared from 1787 until the year of his death.] He died Oct. 10, 1791. An autobiography, written in prison, appeared in 1791-93. His compositions are few and unimportant. [They include a set of 'Musicalische Rhapsodien,' a 'Salve Regina,' variations, and other clavier pieces.] A work of his on musical æsthetics, *Ideen zu einer Aesthetik der Tonkunst*, was published after his death by his son Ludwig (Vienna, 1806). From the notices of it in the *A.M.Z.* (viii. 801, xiii. 53, etc.) and Jahn's citations, it appears to be partly a dissertation on the styles, abilities, and characteristics of great musicians and artists. It also contains some fanciful descriptions of the various keys, which Schumann notices (*Ges. Schriften*, i. 180) only to condemn. But Schubart will always be known as the author of the words of one of F. Schubert's most favourite songs—'Die Forelle' (op. 32). The words of 'An den Tod' and 'Grablied auf einen Soldaten' are also his. His

son further published two vols. of his *Vermischte Schriften* (Zürich, 1812). G.

SCHUBERT, FERDINAND, one of the elder brothers of FRANZ SCHUBERT, second son of his father (see p. 280), born at Vienna, Oct. 19, 1794. After passing the two-years' course at the Normal School of St. Anna in 1807-8, he became his father's assistant at the school in the Lichtenthal. In Nov. 1810 he was installed as assistant (Gehilfe), and in 1816 teacher, at the Imperial Orphan House (Waisenhaus) in Vienna, where he continued till March 1820, devoting himself specially to the Bell-Lancastrian method. He was then appointed principal teacher and choirmaster to the school at Altlerchenfeld, Vienna, till 1824, when he was nominated to be head teacher of the Normal School of St. Anna, which he held from Jan. 22, 1824, till his appointment as director of the same establishment on March 15, 1854. This position he retained till his death on Feb. 28, 1859. His merits were recognised by the bestowal of the Gold Cross of Merit (Verdienstkreuze), with the Crown. During this long period of useful and efficient service he was twice married, and had in all seventeen children, of whom Ferdinand, Rudolf, and Hermann were living in Vienna in 1882. His daughter Elise married Linus Geisler, and their daughter, Caroline Geisler-Schubert, had a successful career in Vienna as a player and teacher. She is now living in England. Between 1819 and 1853 Ferdinand published twelve school-books on various branches of learning, which came into general use. Music he learnt from his father and from Holzer, and left more than forty works, of which the following were published:—Regina Cœli, a 4 and orch. (op. 1); German Requiem, a 4 with organ (op. 2); 4 Waisenlieder (op. 3); Cadenzas for P.F. in all keys (op. 4); Requiem a 4 and orch. (op. 9); Mass in F, a 4 and orch. (op. 10); Salve Regina in F, a 4 and orch. (op. 11); Salve Regina a 4 and wind (op. 12); original March and Trio. The MS. works contain various other pieces of church music. Of the two Requiems the first is mentioned in his brother's letter of August 24, 1818 (see p. 291); the second was performed a few days before Franz's death, and was possibly the last music he heard. The library of the Musikverein at Vienna contains the autograph of Franz Schubert's Mass in G, with oboes (or clarinets) and bassoons, added by Ferdinand, July 23, 1847.

Ferdinand's love for his brother and care of his memory have been often referred to in the following article (pp. 317, 319, 320). An interesting evidence of their attachment is afforded by a letter² of his to Franz, dated Vienna, July 3, 1824, and containing the following passage in regard to a clock at the Ungarische Krone in Vienna, which played his brother's music:—

¹ The day is given in the *Quellen-Lexikon* as March 26, and in Riemann's *Lexikon* as April 13.

² I owe this letter to Miss Geisler-Schubert.

'This clock delighted me not a little, when one day at dinner for the first time I heard it play some of your waltzes. I felt so strange at the moment that I really did not know where I was; it was not only that it pleased me, it went regularly through my heart and soul with a fearful pang and longing, which at last turned into settled melancholy.' This may be fanciful, but it is the language of passionate affection, which evidently animated Ferdinand's whole intercourse with his great brother. Franz's reply (July 16-18, 1824) is quite in the same strain. (The above article is indebted to Wurzbach's *Biographisches Lexicon*.)

SCHUBERT,¹ FRANZ PETER, the one great composer native to Vienna, was born Jan. 31, 1797, in the district called Lichtenthal, at the house which is now numbered 54 of the Nussdorfer Strasse,² on the right, going out from Vienna. There is now a grey marble tablet over the door, with the words 'Franz Schuberts Geburtshaus' in the centre; on the left side a lyre crowned with a star, and on the right a chaplet of leaves containing the words, '31 Jänner 1797.' He came of a country stock, originally belonging to Znkmantel in Austrian Silesia. His father, Franz, the son of a peasant at Neudorf in Moravia, was born about 1764, studied in Vienna, and in 1784 became assistant to his brother, who kept a school in the Leopoldstadt. His ability and integrity raised him in 1786 to be parish schoolmaster in the parish of the 'Twelve holy helpers' in the Lichtenthal, a post which he kept till 1817 or 1818, when he was appointed to the parish school in the adjoining district of the Rossau, and there he remained till his death, July 9, 1830. He married early, while still helping his brother, probably in 1783, Elisabeth Vitz, or Fitz, a Silesian, who was in service in Vienna, and was, like Beethoven's mother, a cook. Their first child, Ignaz, was born in 1784. Then came a long gap, possibly filled by children who died in infancy—of whom they lost nine in all; then, Oct. 19, 1794, another boy, Ferdinand; then in 1796, Karl, then Franz, and lastly, a daughter, Theresia, Sept. 17, 1801, who died August 7, 1878. The hard-worked mother of these fourteen children lived till 1812. Soon after her death her husband was married again, to Anna Klayenböck, a

Viennese, and had a second family of five children, of whom three grew up, viz. Josefa (+ 1861), Andreas, an accountant in one of the public offices, and Anton, a Benedictine priest, 'Father Hermann'³—the last two living in 1881.

Ignaz and Ferdinand followed their father's calling, and inherited with it the integrity, frugality, and modesty, which had gained him such respect. Of the former we do not hear much; the one letter by him that is preserved (Oct. 12, 1818), shows him very free-thinking, very tired of schoolmastering, very much attached to his home and his brother.⁴ He remained at the Rossau school till his death in 1844. Ferdinand, on the other hand, rose to be director of the chief normal school of St. Anna in Vienna, and played a considerable part in the life of his celebrated brother, by whom he was fondly loved, to whom he was deeply attached, and whose eyes it was given to him to close in death.

Little Franz was no doubt well grounded by his father, and to that early training probably owed the methodical habit which stuck to him more or less closely through life, of dating his pieces, a practice which makes the investigation of them doubly interesting.⁵ As schoolmasters the father and his two eldest sons were all more or less musical. Ignaz and Ferdinand had learned the violin with other rudiments from the father, and Franz was also taught it by him in his turn, and the 'clavier' (i.e. probably the pianoforte—for Beethoven's op. 31 was published before Schubert had passed his sixth year) by Ignaz, who was twelve years his senior. But his high vocation quickly revealed itself; he soon outstripped these simple teachers, and was put under Michael Holzer, the choirmaster of the parish, for both violin and piano, as well as for singing, the organ, and thorough-bass. On this good man, who long outlived him, he made a deep impression. 'When I wished to teach him anything fresh,' he would say, 'he always knew it already. I have often listened to him in astonishment.'⁶ Holzer would give him subjects to extemporise upon, and then his joy would know no bounds, and he would cry 'The lad has got harmony at his fingers' ends.'⁷ Such astonishment was natural enough, but it would have been far better if he had taught him counterpoint. Ignaz too—and an elder brother is not always a lenient judge of his

¹ The following abbreviations are used in the notes to this article:—

K.H. = Kreuzele von Hellborn's biography. The first reference to the German edition; the second, in brackets, to Coleridge's translation.

Ferd. = Ferdinand Schubert, in his biographical sketch in Schumann's *Neue Zeitschrift für Musik*, x. p. 129, etc.

A.M.Z. = Allgemeine Musikalische Zeitung.

N.Z.M. = Neue Zeitschrift für Musik.

W.Z.K. = Wiener Zeitschrift für Kunst, etc.

² The Nussdorfer Strasse runs north and south. At the time of Schubert's birth it was called 'Auf dem Himmelportgrund,' and the house was No. 72. The 'Himmelportgasse' (the street of the gate of heaven) was a short street running out of it westwards towards the fortifications—the same which is now the 'Rinnlegasse.' The present Schubertgasse did not then exist beyond the opening into the main street. I find all this on a large map of the date in the British Museum.

³ Author of a sermon on the 1400th anniversary of the birth of St. Benedict (Vienna, 1880), in which he is styled 'Capitularpriester der Stifter Schöten, Curst und Prediger an der Stiftespfarre; Bestzer des gold. Verdienstkreuzes m. d. Krone.'

⁴ K.H. p. 146 (i. 149).

⁵ His usual practice was to write the title of the piece, the date, and his name, 'Fz Schubert Opia' (manu propria), at the head of the first page on beginning to compose. In his earlier years he added the full date of completion at the end, even when it was the same day. See Nos. 1, 2, and 5 of the '6 Lieder' (Müller), all three belonging to 1813, as given in Nottebohm's *Catalogue*, p. 243. Sometimes he has dated each movement, as in the String Quartet in B \flat (op. 168), described under 1814. With 1815, however, this minute dating in great measure ceases, and as a rule we find the year or at most the month stated.

⁶ N.Z.M.

⁷ K.H. p. 5 (i. 5).

junior—bears similar testimony. ‘I was much astonished,’ says he, ‘when after a few months he told me that he had no more need of any help from me, but would go on by himself; and indeed I soon had to acknowledge that he had far surpassed me, beyond hope of competition.’

Before he became eleven he was first soprano in the Lichtenthal choir, noted for the beauty of his voice and the appropriateness of his expression. He played the violin solos when they occurred in the service, and at home composed little songs, and pieces for strings or for PF. For a child so gifted, of people in the position of the Schuberts, the next step was naturally the Imperial *Convict*, or school¹ for educating the choristers for the Court-chapel; and to the *Convict* accordingly Franz was sent in Oct. 1808, when eleven years and eight months old. He went up with a batch of other boys, who, while waiting, made themselves merry over his grey suit, calling him a miller, and otherwise cracking jokes. But the laugh soon ceased when the ‘miller’ came under the examiners; the Court-capellmeisters Salieri and Eybler, and Korner the singing-master. He sang the trial-pieces in such a style that he was at once received, and henceforth the grey frock was exchanged for the gold-laced uniform of the imperial choristers. The music in the *Convict* had been a good deal dropt in consequence of the war, but after the signing of the treaty of peace, Oct. 14, 1809, it regained its old footing, and then Franz soon took his right place in the music-school. There was an orchestra formed from the boys, which practised daily symphonies and overtures of Haydn, Mozart, Krommer, Kozeluch, Méhul, Cherubini, etc., and occasionally Beethoven. Here his home practice put him on a level with older boys than himself. The leader of the band, behind whom he sat, several years his senior, turned round the first day to see who it was that was playing so cleverly, and found it to be ‘a small boy in spectacles named Franz Schubert.’² The big fellow’s name was Spann, and he soon became intimate with his little neighbour. Franz was extremely sensitive, and one day admitted to his friend, very confused and blushing deeply, that he had already composed much; that indeed he could not help it, and should do it every day if he could afford to get music-paper. Spaun saw the state of matters, and took care that music-paper should be forthcoming; for which and other kindnesses his name will be long remembered. Franz in time became first violin, and when Ruzicka, the regular conductor, was absent, he took his place. The orchestral music must have been a great delight to him, but we only hear that he preferred Kozeluch to Krommer, and that

his particular favourites were some adagios of Haydn’s, Mozart’s G minor Symphony, in which he said ‘You could hear the angels singing,’ and the overtures to ‘Figaro’ and the ‘Zauberflöte.’ It is also evident from his earliest symphonies that the overture to ‘Prometheus’ had made its mark on his mind. On Sundays and holidays he went home, and then the great delight of the family was to play quartets, his own or those of other writers, in which the father took the violoncello, Ferdinand and Ignaz the first and second violins, and Franz the viola, as Mozart did before him, and Mendelssohn after him. The father would now and then make a mistake; on the first occasion Franz took no notice, but if it recurred he would say with a smile, in a timid way, ‘Herr Vater, something must be wrong there.’

The instruction in the *Convict* was by no means only musical. There was a Cnratör, a Director (Rev. Innocenz Lang), a Sub-director, an Inspector, a staff of preachers and catechists; and there were teachers of mathematics, history, and geography, poetry, writing, drawing, French, and Italian.³ In fact it was a school, apart from its music department. Franz of course took his part in all this instruction, and for the first year is said to have acquitted himself with credit, but his reputation in the school fell off as it increased in the musical department. The extraordinary thirst for composition, which is so remarkable throughout his life, began to assert itself at this time, and appears to have been limited only by his power of obtaining paper; and it not unnaturally interfered with his general lessons. His first pianoforte piece of any dimensions, and apparently his earliest existing composition, was a four-hand fantasia, containing more than a dozen movements, all of different characters, and occupying thirty-two pages of very small writing. It is dated April 8–May 1, 1810, and was followed by two smaller ones.⁴ His brother remarks that not one of the three ends in the key in which it began. The next is a long vocal piece for voice and PF., called ‘Hagars Klage’—Hagar’s lament over her dying son—dated March 30, 1811, also containing twelve movements, with curious unconnected changes of key; and another, of even grimmer character, attributed to the same year, is called ‘Leichenfantasie,’ or Corpse-fantasia, to the words of Schiller’s gruesome juvenile poem of the same name. This has seventeen movements, and is quite as erratic in its changes of key and disregard of the compass of the voices as the preceding.⁵ The reminiscences of Haydn’s ‘Creation,’ Mozart’s opera airs, and Beethoven’s Andantes, are frequent in both. A fourth is ‘Der Vatermörder’—the Parricide—

¹ In the Piaristengasse in the Josephstadt. See a very full and interesting account of this school in Hanselick’s excellent book, *Geschichte des Conventuereins in Wien* (Vienna, 1869), p. 141.

² From a sketch by von Köchel, entitled *Nachruf an Joseph von Spaun*, Vienna (privately printed), 1866. I owe the sight of this to my excellent friend Mr. Fohl.

³ See the list of names in K. H. p. 13 (1. 13).

⁴ *Ferd.* p. 133. Reissmann (p. 7) gives the inscriptions—‘Den 8. April angefangen. Den 1. May vollbracht, 1810.’

⁵ The autographs of both are in possession of Herr Nicholas Dumba of Vienna.

for voice and PF., '26 Dec. 1811,' a pleasant Christmas piece! a decided advance on the two previous songs in individuality of style, and connection. 1811 also saw the composition of a quintet-overture, a string quartet, a second fantasia for four hands, and many songs.¹ For 1812 the list is more instrumental. It contains an overture for orchestra in D; a quartet overture in B \flat ; string quartets in C, B \flat , and D²; a sonata for PF., violin, and violoncello; variations in E \flat , and an andante, both for PF.; a *Salve Regina* and a *Kyrie*. In 1813 an octet³ for wind; three string quartets in C, B \flat , E \flat , and D; minuets and trios for orchestra and for PF.; a third fantasia for the PF., four hands; several songs, *terzets*, and canons; a cantata in two movements, for three male voices and guitar, for his father's birthday, Sept. 27—both words and music his own; and his first symphony in D,⁴ intended to celebrate the birthday of Dr. Lang, and finished on Oct. 28. With this very important work his time at the *Convict* ended. He might have remained longer; for it is said that the Emperor, who took an interest in the lads of his chapel, had specially watched the progress of this gifted boy with the lovely voice and fine expression, and that a special decision had been registered in his favour on Oct. 21, assuring him a foundation scholarship in the school, provided that during the vacation he should study sufficiently to pass an examination.⁵ To this condition, however, he refused to submit; and at some time between Oct. 26 and Nov. 6 he left the *Convict* and returned home.⁶ His mother died in 1812, but we hear nothing of the event, unless the octet just named refers to it. The father married again in about a year, and the new wife, as we shall see, did her duty to her stepson Franz fully, and apparently with affection.

Franz was now just completing his seventeenth year, and what has been rightly called the first period of his life. The *Convict* has much to answer for in regard to Schubert. It was entrusted with the most poetical genius of modern times, and it appears to have allowed him to take his own course in the matter of composition almost unrestrained. Had but a portion of the pains been spent on the musical education of Schubert that was lavished on that of Mozart or of Mendelssohn, we can hardly doubt that even his transcendent ability would

have been enhanced by it, that he would have gained that control over the prodigious spontaneity of his genius which is his only want, and have risen to the very highest level in all departments of composition, as he did in song-writing. But though Eybler and Salieri were the conductors of the choir in chapel, it does not appear that they had any duties in the school, and Ruzicka, the thorough-bass master, like Holzer, was so prostrated by Schubert's facility as to content himself with exclaiming that his pupil already knew all he could teach him, and must have 'learned direct from heaven.' If all masters adopted this attitude towards their pupils, what would have become of some of the greatest geniuses? The discomforts of the school appear to have been great even for that day of roughness. One of the pupils speaks of the cold of the practice-room as 'dreadful' (*schauerlich*); and Schubert's own earliest letter, dated Nov. 24, 1812, to his brother Ferdinand, shows that these young growing lads were allowed to go without food for 8½ hours, between 'a poor dinner and a wretched supper.' There was not even sufficient music paper provided for the scholars, and Schubert was, as we have seen, dependent on the bounty of the richer pupils.

On the other hand, the motets and masses in the service, the rehearsals in the school, such teaching as there was, and the daily practisings, must have been both stimulating and improving, and with all its roughness a good deal of knowledge could not but have been obtainable. One advantage Schubert reaped from the *Convict*—the friends which he made there, many of them for life, Spaun, Senn, Holzappel, Stadler, and others, all afterwards more or less eminent, who attached themselves to him as every one did who came into contact with him; a band of young adorers, eager to play, or sing, or copy anything that he composed; the earnest of the devoted friends who surrounded him in later years, and helped to force his music on an ignorant and preoccupied public. Nor did the enthusiasm cease with his departure; for some years afterwards the orchestral pieces which he had written while at the school were still played by the boys from his own MS. copies. Outside the school he had sometimes opportunities of going to the opera. The first opera which he is said to have heard was Weigl's '*Waisenhaus*,' played Dec. 12, 1810; but this was eclipsed by the '*Schweizerfamilie*' of the same composer, July 8, 1811; that again by Spontini's '*Vestalin*,' with Milder, Oct. 1, 1812; and all of them by Gluck's '*Iphigenie auf Tauris*,' which he probably heard first April 5, 1815, with Milder and Vogl in the two principal parts, and which made a deep and ineffaceable impression upon him, and drove him to the study of Gluck's scores.⁷ During the same years there

¹ *Ferd.* p. 138.

² Kreisla expressly states this (p. 550) and gives the date—'Nov. 19, 1812.'

³ This octet, dated Sept. 18, is said to be mentioned by Ferdinand Schubert as 'Frans Schubert's Leichenbegängnis' (funeral ceremony). It is supposed by Kreisla (p. 51) to have been composed for the funeral of his mother; but it is difficult to believe that the words which he wrote for his father's birthday ode, eight days later, would have had no reference to the mother's death—which they certainly have not—if it had occurred at that date.

⁴ *Adagio and Allegro vivace* (D); *Andante* (C); *Minuet and Trio* (D); *Finale, Allegro vivace* (D). The work was played from MS. at the Crystal Palace, Feb. 5, 1881. The autograph is in possession of Herr Dunin, Vienna.

⁵ It is stated on Spaun's authority that Schubert was led to this decision by the advice of the poet Theodor Körner. But Körner, in whose correspondence there is no mention of Schubert, left Vienna at the beginning of this year and died at Gadebusch in August.

⁶ *K. Z.* p. 33 (l. 33).

⁷ From Baernfeld, in *W. Z. K.*

were also many concerts, including those at which Beethoven produced his 5th, 6th, and 7th, Symphonies, the Choral Fantasia, portions of the Mass in C, the Overture to 'Coriolan,' and others of his greatest compositions. Schubert probably heard all these works, but it is very doubtful whether he heard them with the same predilection as the operas just mentioned. We might infer with certainty from the three earliest of his symphonies, that Beethoven's style had as yet taken but little hold on him, notwithstanding the personal fascination which he seems to have felt for the great master from first to last. But, indeed, we have his own express declaration to that effect. Coming home after a performance of an oratorio of Salieri's, June 16, 1816, he speaks of the music in terms which can only refer to Beethoven, as 'of simple natural expression, free from all that *bizarrie* which prevails in most of the composers of our time, and for which we have almost solely to thank one of our greatest German artists; that *bizarrie* which unites the tragic and the comic, the agreeable and the repulsive, the heroic and the petty, the Holiest and a harlequin; infuriates those who hear it instead of dissolving them in love, and makes them laugh instead of raising them heavenwards.' Mozart was at the time his ideal composer; this, too, is plain from the symphonies, but here also he leaves us in no doubt. Three days earlier we find in the same diary,¹ apropos of one of the quintets of that great master:—'Gently, as if out of the distance, did the magic tones of Mozart's music strike my ears. With what inconceivable alternate force and tenderness did Schlesinger's masterly playing impress it deep, deep, into my heart! Such lovely impressions remain on the soul, there to work for good, past all power of time or circumstances. In the darkness of this life they reveal a clear, bright, beautiful prospect, inspiring confidence and hope. O Mozart, immortal Mozart! what countless consolatory images of a bright better world hast thou stamped on our souls.' There is no doubt to which of these two great masters he was most attached at the time he wrote this. [At the same time it is fair to add that even now his allegiance was divided. In the instrumental compositions of this period, though the style is modelled on Mozart, the subjects are occasionally reminiscent of Beethoven's ideas; and there is a significant story that when a friend praised some of his settings of Klopstock, and hailed him already as one of the great masters of composition, he answered diffidently, 'Perhaps, I sometimes have dreams of that sort, but who can do anything after Beethoven?']

We have seen what a scourge the conscription proved in the case of Ries (see *ante*, p. 97), and the uneasiness of Mendelssohn's family till the risk of it was over in his case (vol. iii. p. 121a).

¹ Quoted by K.H. pp. 108, 101 (l. 108, 103).

To avoid a similar danger² Schubert elected to enter his father's school, and after the necessary study for a few months at the Normal School of St. Anna, did so, and actually remained there for three years as teacher of the lowest class. The duties were odious, but he discharged them with strict regularity, and not with greater severity than might reasonably be expected from the irritable temperament of a musician condemned to such drudgery. The picture of Pegasus thus in vile harness, and the absence of any remark on the anomaly, throws a curious light on the beginnings of a great composer. Out of school hours, however, he had his relaxations. There was a family in the Lichtenthal named Grob—a mother, son, and daughter—whose relations to him were somewhat like those of the Breunings to Beethoven (vol. i. p. 218b). The house was higher in the scale than his father's, and he was quite at home there. Therese, the daughter, had a fine high soprano voice, and Heinrich Grob played both PF. and violoncello; the mother was a woman of taste, and a great deal of music was made. It is not impossible that Therese inspired him with a softer feeling.³ The choir of the Lichtenthal church, where his old friend Holzer was still choirmaster, was his resort on Sundays and feast days, and for it he wrote his first mass, in F—begun May 17, finished July 22, 1814—a fitting pendant to the symphony of the previous October. He was not yet eighteen, and the mass is pronounced by a trustworthy critic⁴ to be the most remarkable first mass ever produced, excepting Beethoven's in C, and as striking an instance of the precocity of genius as Mendelssohn's Overture to the 'Midsummer Night's Dream.' It seems to have been first performed on Oct. 16, the first Sunday after St. Theresa's day, 1814—Mayseder, then twenty-five and an acknowledged virtuoso, leading the first violins; and was repeated at the Augustine Church ten days after. This second performance was quite an event. Franz conducted, Holzer led the choir, Ferdinand took the organ, Therese Grob sang, the enthusiasm of the family and friends was great, and the proud father presented his happy son with a five-octave piano.⁵ Salieri was present and loud in his praises, and claimed Schubert as his pupil. He had indeed begun to take some interest in the lad before⁶ he left the *Convict*, and continued it by daily lessons 'for a long time.'⁷ That interest was probably much the same that he had shown to Beethoven fifteen years before, making him write to Metastasio's words, and correcting the prosody of his music. But there must have been some curious attraction about the old man, to attach two such original geniuses as Beethoven

² He was three times summoned to enlist. See *Ferd.* p. 133.

⁷ Bauernfeld, in *W.Z.K.* June 9, 1829.

and Schubert to him, and make them willing to style themselves 'scholars of Salieri.'¹ His permanent influence on Schubert may be measured by the fact that he warned him against Goethe and Schiller, a warning which Schubert attended to so far as to compose sixty-seven songs of the one poet, and fifty-four of the other!

Franz's next effort was an opera—a light and absurd supernatural 'opéra-comique' in three acts, 'Des Teufels Lustschloss,' words by Kotschue. He probably began it while at the *Convict*, the first act having been completed Jan. 11, 1814; the second, March 16; and the third, May 15. Two days afterwards he began the mass. That over, he had leisure to look again at the earlier work. The experience gained in writing the mass probably revealed many an imperfection in the opera. He at once rewrote it, and finished the revision of it on Oct. 22. The work was never performed. With all these and other labours he found time to visit the *Convict*² in the evenings, take part in the practices, and try over his new compositions. Besides the pieces already mentioned, the productions of 1814 embrace a *Salve Regina* for tenor and orchestra. Also two string quartets in D and C minor respectively, and a third in B \flat , published as op. 168, and remarkable for the circumstances of its composition. It was begun as a string trio, and ten lines were written in that form. It was then begun again and finished as a quartet. The movements are more fully dated than usual.³ Also five minuets and six *Deutsche* (or waltzes) for strings and horns; and seventeen songs, among them 'Gretchen am Spinnrade' (Oct. 19), and Schiller's 'Der Taucher,' a composition of enormous length, begun Sept. 1813, and finished in the following August. On Dec. 10 he began his second symphony, in B \flat .⁴ The autograph shows that the short Introduction and Allegro vivace were finished by the twenty-sixth of the same month, but its completion falls in 1815. Before the year closed he made the acquaintance of Mayrhofer, a man of eccentric, almost hypochondriac character, and a poet of grand and gloomy cast, who became his firm friend, and fifty-four of whose poems⁵ (besides the operas of 'Adrast' and 'Die beiden Freunde von Salamanka'), fortunately for Mayrhofer's immortality, he set to music—some of them

among his very finest songs. The acquaintance began by Schubert's setting Mayrhofer's 'Am See.' He composed it on Dec. 7, and a few days afterwards visited the poet at his lodgings in the Wipplinger Strasse 420 (since destroyed), a small dark room rendered illustrious by being the residence of Theodor Körner, and afterwards of Schubert, who lived there in 1819 and 1820. The visit was the beginning of a friendship which ended only with Schubert's death.

1815 is literally crowded with compositions. Two orchestral symphonies of full dimensions, Nos. 2 and 3 (that in B \flat ended March 24, that in D,⁶ May 24–July 19); a string quartet in G minor (March 25–April 1); PF. sonatas in C, F, E (Feb. 11) and E (Feb. 18); an adagio in G (April 8), twelve *Wiener Deutsche*, eight *Écossaises* (Oct. 3), and ten variations for PF. solo; two masses, in G \flat (March 2–7) and B \flat (Nov. 11–); a new 'Dona'⁷ for the mass in F; a *Stabat Mater* in G minor (April 4); a *Salve Regina* (July 5); five large dramatic pieces—'Der vierjährige Posten,' one-act operetta (ended May 16); 'Fernando,' one-act Singspiel (July 3–9); 'Claudine von Villa-bella,' three-act Singspiel (Act 1, July 26–August 5), originally composed complete, but Acts 2 and 3 were used by an officious maid-servant for lighting fires; 'Die beiden Freunde von Salamanka,' a two-act Singspiel by Mayrhofer (Nov. 18–Dec. 31); 'Der Spiegelritter,' three-act opera, of which eight numbers are with the Gesellschaft des Musikfreunde at Vienna; perhaps also a Singspiel called 'Die Minnesänger,' and 'Adrast,' an opera by Mayrhofer, of which but seven numbers exist.⁸ In addition to all these there are no less than 146 songs. In August alone there are over thirty, and in October over twenty, of which eight are dated the 15th and seven the 19th! And of these 146 songs some are of such enormous length as would seem to have prevented their publication. 'Minona' (MS. Feb. 8), the first one of the series, contains sixteen, and 'Adelwold and Emma' (MS., June 5) no less than fifty-five closely written sides. Of those published, 'Die Bürgschaft' ('Aug. 1815') fills twenty-two pages of Litolf's edition, 'Elysium' thirteen, and 'Loda's Gespenst' fifteen of the same. It was the length of such compositions as these—'pas une histoire, mais des histoires'—that caused Beethoven's exclaima-

¹ For Beethoven see vol. i. p. 2226. Schubert so styles himself on the title-pages of his 'Fernando' and 'Claudine von Villa-bella.'

² *K.H.* p. 18 (l. 19).

³ The Allegro has at beginning, '5 Sept. 1814,' at end, 'den 6 Sept. in 44 Stunden angefertigt,' apparently implying that it was dashed off before and after twelve o'clock at night. Andante, at beginning, 'den 8 Sept. 1814,' at end, 'den 10 Sept. 1814.' Minuet, at end, '11 Sept. 1814.' Finale, at end 'den 13 Sept. 1814.' Autograph with Spina.

⁴ At beginning, '10 Dec. 1814'; at end of Allegro, '26 Dec. 1814'; at beginning of Finale, '25 Feb. 1815,' and at end, '24 Merch 1815.' The movements are Largo and Allegro vivace (B \flat); Andante (E \flat); Minuet and Trio (C minor); Finale, Presto vivace (B \flat). Played from MS. at the Crystal Palace, Oct. 20, 1877. Autograph with Herr Dumba.

⁵ Forty-eight published, and six in MS.

⁶ It is in the usual number of movements: Adagio maestoso and Allegro con brio (D); Allegretto (G); Minuet and Trio (D); Finale, Presto vivace (D). Dates:—Allegro, at beginning, '24 May 1815'; end, 'July 12, 1815.' Allegretto, at beginning, 'July 15, 1815.' End of Finale, 'July 18, 1815.' Autograph with Herr Dumba.

⁷ Published by M. Berka, of Prague, in 1846, as the composition of R. Führer. (See vol. ii. p. 1135). The fraud was not exposed till 1847, when it was announced by Ferd. Schubert in the *Allg. Wiener Musikzeitung* of Dec. 14. Ferdinand mentions this mass in his list under 1815. A copy, evidently copied closely from the autograph, but with the addition of oboe (or clarinet) and bassoon by Ferd. Schubert (July 25, 1847), is in the Library of the Gesellschaft der Musikfreunde.

⁸ Mentioned by Ferdinand, p. 139c.

⁹ Autographs of Fernando, Teufels Lustschloss, and Adrast, are with Herr Dumba.

tion on his deathbed : 'Such long poems, many of them containing ten others,' by which he meant as long as ten. [See p. 309b.] And this mass of music was produced in the mere intervals of his school drudgery ! Well might his brother say that the rapidity of his writing was marvellous.

Amidst all this work and, one might be tempted to believe, all this hurry, it is astonishing to find that some of the songs of these boyish years are amongst the most permanent of his productions. 'Gretchen am Spinnrade,' a song full of the passion and experience of a lifetime, was written (as we have said) in Oct. 1814, when he was seventeen. The 'Erl King' itself in its original form (with a few slight differences)¹ belongs to the winter of 1815, and the immortal songs of the 'Haidenröslein,' 'Rastlose Liebe,' 'Schäfers Klagelied,' the grand Ossian songs, and others of his better-known works, fall within this year. The Mass in G, too, though composed for a very limited orchestra, and not without tokens of hurry, is a masterpiece. The dramatic works contain many beautiful movements, and are full of striking things, but the librettos are so bad, that in their present condition they can never be put on the stage. The symphonies, though not original, are not without original points ; and are so sustained throughout, so full of fresh melody and interesting harmony, and so extraordinarily scored considering their date, that in these respects a man of double Schubert's age might be proud to claim them.

The habit of writing to whatever words came in his way was one of Schubert's characteristics, especially in the earlier part of his career. With his incessant desire to sing ; with an abundant fountain of melody and harmony always welling up in him and endeavouring to escape, no wonder that he grasped at any words and tried any forms that came in his way and seemed to afford a channel for his thoughts. If good, well ; if bad, well too. The reason why he wrote eight operas in one year was no doubt in great measure because he happened to meet with eight librettos ; had it been four or twelve instead of eight the result would have been the same. The variety in the productions even of this early year is truly extraordinary. A glance at the list is sufficient to show that he tried nearly every form of composition, whilst the songs which he set range from gems like Goethe's 'Meeresstille' and 'Freudvoll und leidvoll,' to the noisy ballads of Bertrand ; from Mayrhofer's stern classicality and the gloomy romance of Ossian, to the mild sentiment of Klopstock. No doubt, as Schumann says, he could have set a placard to music.² The

spectacle of so insatiable a desire to produce has never before been seen ; of a genius thrown naked into the world and compelled to explore for himself all paths and channels in order to discover by exhaustion which was the best—and then to die.

During this year he taught diligently and punctually in his father's school, and attended Salieri's lessons. His relations to the Lichtenthal remained as before. The Mass in G, like that in F, was written for the parish church, and according to the testimony of one³ of his old friends was especially intended for those of his companions who had been pupils of Holzer's with him. A pleasant relic of his home life exists in a piece of music written for his father's birthday, Sept. 27, 1815, for four voices and orchestra—'Erhabner, verehrter Freund der Jugend.'⁴ He kept up his intercourse also with the *Convict*, and when he had written anything special it was one of the first places to which he would take it. There possibly his Symphonies were tried, though it is doubtful if a juvenile orchestra would contain clarinets, bassoons, trumpets, and horns, all which are present in the scores of the first four Symphonies. There, thanks to the memorandum of another old 'Convictor,' we can assist at the first hearing of the 'Erl King.' Spann happened to call one afternoon, in this very winter, at the elder Schubert's house in the Himmelfortgrund, and found Franz in his room, in a state of inspiration over Goethe's ballad, which he had just seen for the first time. A few times' reading had been sufficient to evoke the music, which in the rage of inspiration he was whelming down⁵ on to the paper at the moment of Spaun's arrival ; indeed it was already perfect except the mere filling in of the accompaniment. This was quickly done ; and it was finished in the form in which we can now see it in the Berlin Library.⁶ In the evening Schubert brought it to the *Convict*, and there first he and then Holzappel sang it through. It was not altogether well received. No wonder ; the form was too new, the dramatic spirit too strong, even for that circle of young Schubert-admirers. At the words 'Mein Vater, mein Vater, jetzt fasst er mich an !' where Gb, F#, and Eb all come together, there was some dissent, and Ruzicka, as teacher of harmony, had to explain to his pupils, as best he might, a combination which now seems perfectly natural and appropriate.

1816 was passed much as 1815 had been, in

³ Herr Doppler. I cannot refrain from mentioning this gentleman, who in 1867 was shopman at Spina's (formerly Diabelli's). I shall never forget the droll shock I received when on asking him if he knew Schubert, he replied, 'Know him ? I was at his christening !' Kreissle's *Life* is indebted to him for many a trait which would otherwise have been lost.

⁴ Now in the Imperial Library, Berlin. No doubt there was one every year, though that of 1814 has been lost.

⁵ *Hinwuscheln* is Kreissle's word, doubtless from Spaun's lips.

¹ The Berlin Library possesses an autograph of the earlier form. All the versions are in the complete edition.

² 'Qu'on me donne la Gazette de Hollande,' says Rameau. But Schubert could have thrown poetry into an advertisement ! 'Olive me the words,' said Mozart, 'and I'll put the poetry to them.'

⁶ If indeed this be the actually first original. The omission of bar 8, and its subsequent insertion, however, as well as the clean regular look of the whole, seem to point to its being a transcript. [The various versions of this song, and the stages of its growth, can be seen in the complete edition of Breitkopf & Härtel.]

a marvellous round of incessant work. The drudgery of the school, however, had become so insupportable that Schubert seized the opportunity of the opening of a government school of music, at Laibach, near Trieste, to apply for the post of director, with a salary of 500 Vienna florins—£21 a year. The testimonials which he sent in in April from Salieri, and from Joseph Spendou, Chief Superintendent of Schools, were so cold in tone as to imply that however much they valued Schubert, they believed his qualifications not to be those of the head of a large establishment.¹ At any rate he failed, and the post was given, on the recommendation of Salieri, to a certain Jacob Schauff. Schubert found compensation, however, in the friendship of Franz von Schober, a young man of good birth and some small means, who had met with his songs at the house of the Spauns at Linz, and had ever since longed to make his personal acquaintance. Coming to Vienna to enter the University, apparently soon after the Laibach rebuff, he called on Schubert, found him in his father's house, overwhelmed with his school duties, and with apparently no time for music. There, however, were the piles of manuscript—operas, masses, symphonies, songs, heaped up around the young schoolmaster-composer, and Schober saw at once that some step must be taken to put an end to this cruel anomaly, and give Schubert time to devote himself wholly to the Art of which he was so full. Schober proposed that his new friend should live with him; Franz's father—possibly not oversatisfied with his son's performances as a teacher of the alphabet to infants²—consented to the plan, and the two young men (Schober was some four months Franz's junior) went off to keep house together at Schober's lodgings in the Landkronsgasse. A trace of this change is found on two MS. songs in the Musik Verein at Vienna, 'Leiden der Trennung' and 'Lebenslied,' inscribed 'In Herr v. Schober's lodging,' and dated Nov. 1816. Schubert began to give a few lessons, but soon threw them up,³ and the household must have been maintained at Schober's expense, since there was obviously as yet no sale for Schubert's compositions. He had good friends, as Beethoven had had at the same age, though not so high in rank—Hofrath von Kiesewetter, Matthäus von Collin, Graf Moritz Dietrichstein, Hofrath Hammer von Purgstall, Pyrker, afterwards Patriarch of Venice and Archbishop of Erlau, Fran Caroline Pichler—all ready and anxious to help him had they had the opportunity. But Schubert never gave them the opportunity. He was a true Viennese, born in the lowest ranks, without either the art or the taste for 'imposing' on the aristocracy (Beethoven's⁴ favourite phrase) that Beethoven had; loving the society of his

own class, shrinking from praise or notice of any kind, and with an absolute detestation of teaching or any other stated duties.

But to know him was to love and value him. Three little events, which slightly diversify the course of this year, are of moment as showing the position which Schubert took amongst his acquaintances. The first was the 50th anniversary of Salieri's arrival in Vienna, which he had entered as a boy on June 16, 1766. [See SALIERI, p. 212.] On Sunday, June 16, 1816, the old Italian was invested with the Imperial gold medal and chain of honour, in the presence of the whole body of Court-musicians; and in the evening a concert took place at his own house, in which, surrounded by his pupils, Weigl, Assmayer, Anna Fröhlich, Schubert, and many others,⁵ both male and female, he snuffed up the incense of his worshippers, and listened to compositions in his honour by his scholars past and present. Among these were pieces sent by Hummel and Moscheles, and a short cantata, both words and music by Schubert.⁶

Eight days afterwards, on July 24, there was another festivity in honour of the birthday of a certain Herr Heinrich Watteroth,⁷ a distinguished official person, for which Schubert had been employed to write a cantata on the subject of Prometheus, words by Philipp Dräxler, another official person. The cantata has disappeared; but from a description of it by Leopold Sonnleithner, communicated to 'Zellner's Blätter für Theater,' etc. (No. 19), and reprinted⁸ separately, it seems to have been written for two solo voices, soprano (Gia), and bass (Prometheus), chorus, and orchestra, and to have contained a duet in recitative, two choruses for mixed and one for male voices (the disciples of Prometheus). This last is described as having been in the form of a slow march, with original and interesting treatment. The performance took place in the garden of Watteroth's house in the Erdberg suburb of Vienna. As all the persons concerned in the festivity were people of some consideration, and as the music was very well received, it may have been an important introduction for the young composer. A congratulatory poem by von Schlechta, addressed to Schubert, appeared a day or two later in the *Theaterzeitung*. Schubert had already, in the previous year, set a song of Schlechta's—'Auf einem Kirchhof'—and he promptly acknowledged the compliment by adopting one of more moment from Schlechta's

⁵ There was a List among Salieri's pupils at this time, but hardly the future Abbé, who was then but five years old. Franz List and Schubert met once—in the curious collection of variations on Diabelli's waltz, to which fifty Austrian composers contributed. Beethoven's contribution being the thirty-three variations, op. 120, List's variations in No. 24, and Schubert's No. 38. List was throughout an indefatigable champion for Schubert.

⁶ The autograph of this little curiosity was sold in Paris, by auction, May 14, 1881. The words are given by Kreissle, p. 82 (l. 33), but are not worth quoting. They do not possess the individuality of thought which makes Schubert's later verses so interesting, in spite of the crudity of their expression.

⁷ His birthday was July 12, but the performance was put off on account of the weather.

⁸ I am indebted for this reprint to my ever-kind friend Mr. C. F. Pohl, of the Gesellschaft der Musikfreunde, Vienna.

¹ K.H. p. 107 (l. 109).

³ Bauernfeld, W.Z.K.

² There is ground for this supposition.

⁴ *Impontren*. Thayer, ii. 313.

'Diego Manzanara,' 'Wo irrst du durch einsame Schatten?' his setting of which is dated July 30, 1816.¹ Schubert evidently was fond of his cantata. It was performed at Innsbruck by Gänsbacher, and at Vienna by Sonnleithner in 1819. Schubert wished to give it at the Augarten in 1820, and had sent it somewhere for performance at the time of his death. He was paid 100 florins, Vienna currency (or £4) for it, and he notes in his journal that it was the first time he had composed for money.

The third event was the composition of a cantata on a larger scale than either of the others. It was addressed to Dr. Joseph Spindler, in his character of Founder and Principal of the Schoolmasters' Widows' Fund, and contained eight numbers, with solos for two sopranos and bass, a quartet and choruses, all with orchestral accompaniment. Whether it was performed or not is uncertain,² but it was published in 1830 in PF. score by Diabelli, as op. 128. The other compositions of the year 1816 are as numerous as usual. There is a fine trio for S.S.A. and PF. to the words of Klopstock's 'grosses Halleluja' (Lf. 41, No. 2); a *Salve Regina* in F, to German words, for four voices and organ³ (Feb. 21, 1816) [another, to Latin words, for unaccompanied chorus (Feb. 1816), and a *Stabat Mater* in F minor (Feb. 28, 1816) to Klopstock's translation of the Latin hymn.] The last of these is written for soprano, tenor, and bass solo, and chorus, and for an orchestra of the usual strings, two flutes, two oboes, two bassoons, one contra-bassoon, two horns, three trombones, two trumpets and drums. These, however, are not uniformly employed; the trumpets and drums only appear for a few chords in Nos. 9 and 12; No. 5, an eight-part chorus, is accompanied by the wind alone, and No. 6, a tenor air, by the strings, with oboe solo. This work was performed in 1841 by the Musik-Verein of Vienna, and in 1863 at the Altlerchenfelder church, but was not published until the appearance of Breitkopf & Härtel's edition. [Among other works of this year are a setting of the Angels' Chorus from *Faust*, 'Christ ist erstanden' (June 1816), a fragment of a Requiem in E♭⁴ (July 1816), which ends with the second bar of the second Kyrie, a *Tantum ergo* in C (Ang.), a Magnificat in C (Sept.), and a duet, 'Anguste jam coelestium' (Oct.), strongly tinged by Mozart.⁵

Of operas we find only one in 1816, probably because only one libretto came in his way. It is called 'Die Bürgschaft,' and is in three acts. The author of the words is not known; and the quotations in Kreissle show that they are in great part absolute rubbish. Schubert continued his

task to the third act, fifteen numbers, and there stopped. The autograph, in Herr Dumba's possession, is dated May 1816.

The Symphonies of 1816 are two—the fourth, in C minor, entitled 'Tragic Symphony,' and dated April 1816;⁶ and the fifth, in B♭, for small orchestra, dated Sept. 1816–Oct. 3, 1816.⁷ The first of these is a great advance on its predecessors; the Andante is individual and very beautiful, and the Finale wonderfully spirited. The other, though full of Mozart, is as gay and untrammelled as all Schubert's orchestral music of that day. It is sometimes entitled 'Without Trumpets or Drums,' and is said to have been composed for the orchestra at the Gundelhof, which grew out of the Schubert Sunday afternoon quartets.⁸ Both were often played at the Crystal Palace, under Manns's direction, and were among the favourite works in the *répertoire* of that establishment. A string quartet in F; a string trio in B♭, apparently very good; a rondo in A for violin solo and quartet (June 1816); a violin concerto in C; three sonatas for PF. and violin (op. 137); a PF. sonata in F, two movements of another in E; various marches for PF.; twelve Deutsche (waltzes); six Écossaises, with the inscriptions 'Composed while a prisoner in my room at Erdberg' and 'Thank God'—probably the relic of some practical joke—are still existing.

Very little of the above, however interesting, can be said to be of real, first-rate, permanent value. But when we approach the songs of 1816 the case is altered. There are not quite so many with this date as there were with that of 1815, but there are over a hundred in all, and among them are some of his finest settings of Goethe, the three songs of the Harper, in 'Wilhelm Meister' (op. 12, Sept. 6), Mignon's 'Sehnsucht' song (op. 62, No. 4); 'Der Fischer'; 'Der König in Thule' (op. 5, No. 5), 'Jägers Abendlied,' and 'Schäfers Klage' (op. 3), 'Wanderer's Nachtlied' (op. 4), 'Schwager Kronos' (op. 19). Of Schiller there are the beautiful 'Ritter Toggenburg,' 'Thekla's song' (op. 58), etc., and to name only one other, the far-famed 'Wanderer,' by Schmidt of Lubeck.

These magnificent pieces are well known to every lover of Schubert, but they are not more valued than such exquisitely simple and touching little effusions as 'An eine Quelle' of Clandius (op. 109, No. 3), 'Der Abend' of Kosegarten (op. 118, No. 2), or 'Der Leidende' of Hölty (Lief. 50, No. 2), all equally bearing his stamp.

The lists of the songs of these two years throw a curious light on Schubert's musical activity and mode of proceeding. Dr. Johnson was said when he got hold of a book to 'tear the heart out of it,' and with Schubert it was very much

¹ He returned to this poet in 1820, 1825, 1826, 1828.

² Kreissle, i. 88, says that it was.

³ Nottebohm's *Catalogue*, p. 226.

⁴ First printed by Schumann as Appendix to his newspaper, the *N.Z.M.*, for June 18, 1839.

⁵ In Brahms's possession. The date is quoted from the *Catalogue* of the accurate Nottebohm. I am bound to say that I saw no date, and Brahms judged it to be later than 1816.

⁶ April 1816.—Adagio molto and Allegretto vivace in C minor; Andante in A♭; Menuet and Trio in B♭; Finale in C.—The autograph has vanished.

⁷ Sept. 1816.—Fine den 3. Oct. 1818. Allegro, B♭; Andante con moto, E♭; Menuet and Trio, G minor and G major; Finale, Allegretto vivace, B♭. Autograph with Peters & Co.

⁸ Händel, *Concertwesen*, p. 142.

the same. To read a poem, and at once to fasten upon it and transcribe it in music seems to have been his natural course; and having done one he went at once to the next. A volume of Hölty, or Claudius, or Kosegarten came into his hands; he tore from it in a moment what struck him, and was not content with one song, but must have three, four, or five. Thus, in the summer of 1815, he evidently meets with Kosegarten's poems, and, in July, sets twenty of them. In March 1816 he sets five songs by Salis; in May, six by Hölty; in Nov. four by Claudius, three by Mayrhofer, and so on. To read these lists gives one a kind of visible image of the almost fierce eagerness with which he attacked his poetry, and of the inspiration with which the music rushed from his heart and through his pen—'everything that he touched,' says Schumann, 'turning into music.' Thus, at a later date, calling accidentally on Randhartinger, and his friend being summoned from the room, Schubert, to amuse himself in the interval, took up a little volume which lay on the table. It interested him; and as his friend did not return he carried it off with him. Anxious for his book, Randhartinger called next morning at Schubert's lodgings, and found that he had already set several pieces in it to music. The volume was Wilhelm Müller's poems; the songs were part of the 'Schöne Müllerin.' A year or two after this, in July 1826—it is his old friend Doppler who tells the story—returning from a Sunday stroll with some friends through the village of Währing, he saw a friend sitting at a table in the beer-garden of one of the taverns. The friend, when they joined him, had a volume of Shakespeare on the table. Schubert seized it, and began to read; but before he had turned over many pages pointed to 'Hark, hark, the lark,' and exclaimed, 'Such a lovely melody has come into my head, if I had but some music paper.' Some one drew a few staves on the back of a bill of fare, and there, amid the hubbub of the beer-garden, that beautiful song, so perfectly fitting the words, so skilful and so happy in its accompaniment, came into perfect existence. Two others from the same poet not improbably followed in the evening.¹

It seems that the Quartet afternoons at the house of Schubert the elder had gradually extended themselves into performances of Haydn's Symphonies, arranged as quartets and played with doubled parts, players of ability and name joined, and a few hearers were admitted. After a time, the modest room became inconveniently crowded, and then the little society migrated to the house of a tradesman named Frischling (Dorotheengasse 1105), wind instruments were added, and the smaller works of Pleyel, Haydn, and Mozart were attacked. In the winter of 1815 another move became

necessary, to the house of Otto Hatwig, one of the violins of the Burgtheater, at the Schottenthor, and in the spring of 1818, to his new residence in the Gundelhof, and later still at Pettenkofer's house in the Bauernmarkt. The band now contained some good professional players, and could venture even on Beethoven's first two symphonies, and the overtures of Cherubini, Spontini, Boieldieu, Weigl, etc. Schubert belonged to it all through, playing the viola, and it was probably with the view to their performance by the society that he wrote the two symphonies of 1816 (Nos. 4 and 5), two overtures in the winter of 1817, and his sixth Symphony in the spring of 1818.

Schober and Mayrhofer were Schubert's first friends outside the immediate circle of his youthful associates. He was now to acquire a third, destined to be of more active service than either of the others. This was Vogl. He was twenty years Franz's senior, and at the time of their meeting was a famous singer at the Vienna Opera, admired more for his intellectual gifts than for the technical perfection of his singing, and really great in such parts as Orestes in 'Iphigenie,' Almaviva in 'Figaro,' Creon in 'Medea,' and Telasco in the 'Vestalin.' About the year 1816—the date is not precisely given—Vogl was induced by Schober to come to their lodgings, and see the young fellow of whom Schober was always raving, but who had no access to any of the circles which Vogl adorned and beautified by his presence. The room as usual was strewn with music. Schubert was confused and awkward; Vogl, the great actor and man of the world, gay, and at his ease. The first song he took up—probably the first music of Schubert's he had ever seen—was Schubert's 'Augenlied.' He hummed it through, and thought it melodious, but slight—which it is. 'Ganymed' and the 'Schäfers Klage' made a deeper impression; others followed and he left with the somewhat patronising but true remark, 'There is stuff in you; but you squander your fine thoughts instead of making the most of them.' But the impression remained, he talked of Schubert with astonishment, soon returned, and the acquaintance grew and ripened till they became almost inseparable, and until in their performances of Schubert's songs, 'the two seemed,' in Schubert's own words, 'for the moment to be one.' In those days songs were rarely if ever sung in concert-rooms; but Vogl had the *entrée* to all the great musical houses of Vienna, and before long his performances of the 'Erl King,' the 'Wanderer,' 'Ganymed,' 'Der Kampf,' etc., with the composer's accompaniment, were well known. What Vogl's opinion of him ultimately became, may be learnt from a passage in his diary:—'Nothing shows so plainly the want of a good school of singing as Schubert's songs. Otherwise, what an enormous and universal effect must have been produced

¹ The drinking-song from 'Antony and Cleopatra' (marked 'Währing, July 26'), and the lovely 'Sylvia' ('July 1826'). The anecdote is in *Kreisler*.

throughout the world, wherever the German language is understood, by these truly divine inspirations, these utterances of a musical *clairvoyance*! How many would have comprehended, probably for the first time, the meaning of such expressions as “speech and poetry in music,” “words in harmony,” “ideas clothed in music,” etc., and would have learnt that the finest poems of our greatest poets may be enhanced and even transcended when translated into musical language? Numberless examples may be named, but I will only mention “The Erl King,” “Gretchen,” “Schwager Kronos,” the Mignon and Harper’s songs, Schiller’s “Sehnsucht,” “Der Pilgrim,” and “Die Bürgschaft.”

This extract shows how justly Vogl estimated Schubert, and how, at that early date, his discernment enabled him to pass a judgment which even now it would be difficult to excel. The word *clairvoyance*, too, shows that he thoroughly entered into Schubert’s great characteristic. In hearing Schubert’s compositions it is often as if one were brought more immediately and closely into contact with music itself than is the case in the works of others; as if in his pieces the stream from the great heavenly reservoir were dashing over us, or flowing through us, more directly, with less admixture of any medium or channel, than it does in those of any other writer—even of Beethoven himself. And this immediate communication with the origin of music really seems to have happened to him. No sketches, no delay, no anxious period of preparation, no revision, appear to have been necessary. He had but to read the poem, to surrender himself to the torrent, and to put down what was given him to say, as it rushed through his mind. This was the true ‘inspiration of dictation,’ as much so as in the utterance of any Hebrew prophet or seer. We have seen one instance in the case of the ‘Erl King.’ The poem of the Wanderer attracted him in the same way, and the song was completed in one evening. In a third case, that of Goethe’s ‘Rastlose Liebe,’ the paroxysm of inspiration was so fierce that Schubert never forgot it, but reticent as he often was, talked of it years afterwards.¹ It would seem that the results did not always fix themselves in the composer’s memory as permanently as if they had been the effect of longer and more painful elaboration. Vogl tells an anecdote about this which is very much to the point.² On one occasion he received from Schubert some new songs, but being otherwise occupied could not try them over at the moment. When he was able to do so he was particularly pleased with one of them, but as it was too high for his voice, he had it copied in a lower key. About a fortnight afterwards they were again making music together, and Vogl placed the transposed song before Schubert on the desk of the piano. Schubert tried it through, liked it,

¹ Baernfeld, *W.Z.R.*

² In *Kreisler*, p. 119 (l. 123).

and said, in his Vienna dialect, ‘I say! the song’s not so bad; *whose is it?*’ so completely, in a fortnight, had it vanished from his mind! Sir Walter Scott attributed a song of his own to Byron; but this was in 1828, after his mind had begun to fail.³

1817 was comparatively an idle year. Its great musical event was the arrival of Rossini’s music in Vienna. ‘L’ Inganno felice’ was produced at the Hoftheater, Nov. 26, 1816, and ‘Tancredi,’ Dec. 17; ‘L’ Italiana in Algeri,’ Feb. 1, 1817; and ‘Ciro in Babilonia,’ June 18; and the enthusiasm of the Viennese—like that of all to whom these fresh and animated strains were brought—knew no bounds. Schubert admired Rossini’s melody and spirit, but rather made fun of his orchestral music, and a story is told—not impossibly apocryphal⁴—of his having written an overture in imitation of Rossini, before supper, after returning from ‘Tancredi.’ At any rate he has left two ‘Overtures in the Italian style’ in D and C, dated Sept.⁵ and Nov. 1817 respectively, which were much played at the time. Schubert made four-hand P.F. arrangements of both, and that in C has been since published in score and parts as op. 170, and has been played at the Crystal Palace (Dec. 1, 1866, etc.) and elsewhere. Its caricature of Rossini’s salient points, including of course the inevitable *crescendo*, is obvious enough; but nothing could transform Schubert into an Italian, and the overture has individual and characteristic beauties which are immediately recognisable. The influence of Rossini was no mere passing fancy, but may be traced in the Sixth Symphony, mentioned below, and in music of his later life—in the two Marches (op. 121), the Finale to the Quartet in G (op. 161), and elsewhere.

A third Overture in D belongs to 1817, and, though still in MS., has also been played at the Crystal Palace (Feb. 6, 1869, etc.). It is in two movements Adagio, and All.^o giusto, and the former is almost a draft of the analogous movement in the overture known as ‘Rosamunde’ (op. 26), though really the ‘Zauberharfe.’ There the resemblance ceases. What led Schubert to the pianoforte this year in so marked a manner is not known, but his devotion to it is obvious, for no fewer than six sonatas belong to this period, viz. three with opus numbers—op. 122, in E \flat ; op. 147,⁶ in B (August); op. 164, in A minor,⁷ and three others, in F, A \flat , and E minor (June).

Schubert’s Sixth Symphony, in C,⁸ completed in February 1818, appears to have been begun in the preceding October. It is the first one

³ Lockhart’s *Life of Scott*, vii. 129.

⁴ *K.H.* 129 (l. 133).

⁵ Kreisler says May. September is Nottebohm’s date; but there is another Overture in D, and it seems doubtful which of the two is dated May, and which September.

⁶ Autograph in possession of Bräuna.

⁷ Published, by Spina as ‘7th Sonata.’

⁸ Adagio and Allegro in C; Andante in F; Scherzo in C, and Trio in E major; Finale in C.

which he has marked as 'Grand'—'Grosse Sinfonie'—though hardly with reason, as both in form and orchestra it is the same as the early ones. It is an advance on the others, and the Scherzo shows the first decided signs of Beethoven's influence. Passages may also be traced to Rossini and the Italian opera.

The catalogue of the instrumental compositions of this year closes with a string Trio¹ and a Polonaise for the violin. In the number of the vocal compositions of 1817 there is an equal falling off. Rossini's popularity for the time shut the door against all other composers, and even Schubert's appetite for bad librettos was compelled to wait. Not only, however, are there no operas this year, there is no church music, and but forty-seven songs. In quality, however, there is no deterioration in the songs. The astonishing 'Gruppe aus dem Tartarus,' and the 'Pilgrim' of Schiller; the 'Ganymed' of Goethe; the 'Fahrt zum Hades,' 'Memnon,' and 'Erläsees' of Mayrhofer; and 'An die Musik' of Schober, are equal to any that come before them. Among the MS. songs is one showing the straits to which Schubert was sometimes put, either by the want of materials or by the sudden call of his inspiration. It is the beginning of a setting of Schiller's 'Entzückung an Laura,' and is written on the front page of the second violin part of a dust-fugue by Fux, the words, 'Fuga. Duetto. Violino: Secundo. Del: Sing: 2 Fux,' appearing in the copyist's formal handwriting through Schubert's hasty notes. It is superscribed 'Entzückung an Laura Abschied August 1817. Schubert Mpia'—interesting as showing that in 'Abschied' he has added his own comment to Schiller's words; that he dated his pieces at the moment of beginning them; and that he sometimes signed his name without the 'Franz.'

His circle of intimate friends was increased about this date by Anselm and Joseph Hüttenbrenner and Joseph Gahy. Anselm, four years his senior, was a pupil of Salieri's, and there they had met in 1815. With the younger brother, Joseph, he became acquainted in the summer of 1817.³ Both were men of independent means, and Anselm was a musician by profession. Gahy was in the government employment, an excellent pianoforte-player, of whom Schubert was for long very fond. The younger Hüttenbrenner was bewitched by Schubert, much as Krumpholz and Schindler were by Beethoven; and was ever ready to fetch and carry for his idol, and to praise whatever he did, till the idol would turn on his worshipper, and be so cruel

as to get the nickname of 'The Tyrant' from the rest of the set.

How Schubert existed since he threw up his place at the school and left his father's house is a point on which we are in entire ignorance. His wants were few, but how even those few were supplied is a mystery.⁴ We have seen that he lived rent-free with Schober for a few months in 1816, but the return of Schober's brother put an end to the arrangement,⁵ and from that date he must have been indebted to Spaun, or some friend better off than himself, for lodgings, for existence, and for his visits to the theatre, for there is no trace of his earning anything by teaching in 1817, and the few pounds paid him for the Watteroth cantata is the only sum which he seems to have earned up to this date.

In the summer of 1818, however, on the recommendation of Unger, the father of Mme. Unger-Sabatier, the great singer, Schubert accepted an engagement as teacher of music in the family of Count Johann Esterhazy, to pass the summer at his country seat at Zselézs, in Hungary, on the Waag, some distance east of Vienna, and the winter in town. He was to be a member of the establishment and to receive two gulden for every lesson. The family consisted of the Count and Countess, two daughters, Marie, thirteen, and Caroline, eleven, and a boy of five. All were musical. The Count sang bass, the Countess and Caroline contralto, Marie had a fine soprano, and both daughters played the piano. Baron von Schönstein, their intimate friend, slightly older than Schubert, a singer of the highest qualities, with a noble baritone voice, made up the party, which certainly promised all the elements of enjoyment. It was a pang to Schubert to part from the circle of his companions, to whom he was devoted, but it is not difficult to imagine how pleasant he must have found the comfort and generous living of the Esterhazy house, while at the same time there would be opportunities of retirement, and abundant means of diversion in a beautiful country, a new people, and the Hungarian and gipsy melodies.

When they left town does not appear.⁶ Schubert's Mass in C,⁶ his fourth, written like the others, for Holzer, is dated 'July 1818'; but there is nothing to show whether it was finished in Vienna or in the country. A set of MS. Solfeggi for the Countess Marie, also dated July, is perhaps evidence that by that time they were settled at Zselézs. Two letters to Schober are printed by Bauernfeld,⁷ and

¹ K.F. 109 (1. 112).

² There is an interesting autograph copy of the 'Forelle' song dated at A. Hüttenbrenner's Lodgings in Vienna midnight, Feb. 23, 1818, and besprinkled with ink instead of sand. It has been published in photography. But the 'Forelle' really dates from 1817. (Nottebohm, in the *Them. Catalogue*.)

³ Published in 1828 as op. 48. Schubert wrote a new and most beautiful Benedictus to it in 1828, only a few months before his death.

⁷ In *Die Presse*, Vienna, April 17, 1869. Reprinted in the *Signale*, Nov. 15, 1869.

¹ In Eb, in one movement.

² For 'Sign.' A facsimile is given by Reissmann.

³ So *Kreisler*, l. 128. But does not the dedication of the song, 'Die Erwartung,' composed Feb. 27, 1816,—'to his friend, J. H.—show that the acquaintance was of much earlier date? True, it was not published till the April after Schubert's death; and the song may have been prepared by him for publication shortly before, and the dedication added then.

are dated August 3, and Sept. 18, 1818. The first is addressed to his home circle, his 'dearest fondest friends . . . Spaun, Schober, Mayrhofer, and Senn . . . you who are everything to me.' There are messages also to Vogl, and to Schober's mother and sister, and to 'all possible acquaintances,' and an urgent entreaty to write soon—'every syllable of yours is dear to me.' He is thoroughly well and happy, and 'composing like a god. . . Mayrhofer's *Einsamkeit* is ready, and I believe it to be the best thing I have yet done, for I was *without anxiety*' (*ohne Sorge*—the italics are his own). '*Einsamkeit*' is a long ballad, filling nineteen close pages of print, with a dozen changes of tempo and as many of signature; perhaps not quite coming up to his own estimate of it, though both words and music are often very striking. The length of this and other ballads will probably always hinder their wealth of melody, dramatic effects, and other striking beauties, from being known by the world at large.

The other letter, seven weeks later, throws more light on his position at Zselézs 'as composer, manager, audience, everything, in one.' 'No one here cares for true Art, unless it be now and then the Countess; so I am left alone with my beloved, and have to hide her in my room, or my piano, or my own breast. If this often makes me sad, on the other hand it often elevates me all the more. Several songs have lately come into existence, and I hope very successful ones.' He is evidently more at home in the servants' hall than the drawing-room. 'The cook is a pleasant fellow; the ladies'-maid is thirty; the housemaid very pretty, and often pays me a visit; the nurse is somewhat ancient; the butler is my rival; the two grooms get on better with the horses than with us. The Count is a little rough; the Countess proud, but not without heart; the young ladies good children. I need not tell you, who know me so well, that with my natural frankness I am good friends with everybody.' The letter ends with an affectionate message to his parents.

The only songs which can be fixed to this autumn, and which are therefore doubtless those just referred to, besides the great '*Einsamkeit*,' are the '*Blumenbrief*,' '*Blondel und Maria*,' '*Das Marienbild*' and '*Litaney*,' '*Das Abendroth*'—for a contralto, evidently composed for the Countess; '*Vom Mitleiden Mariä*,' and three Sonnets from Petrarch. The Hungarian national songs left their mark in the '36 original dances,' or 'First Waltzes' (op. 9), some of which were written down in the course of the next year. The '*Divertissement à la hongroise*,' and the Quartet in A minor (op. 29), in which the Hungarian influence is so strong, belong—the first apparently, the second certainly—to a much later period.

A third letter of this date, hitherto unprinted, with which the writer has been honoured by the

grand-daughter¹ of Ferdinand Schubert, to whom it was addressed, is not without interest, and is here printed entire. The Requiem referred to was by Ferdinand, and had evidently been sent to his brother for revision. The letter throws a pleasant light on the strong link existing between Franz and his old home, and suggests that assistance more solid than 'linen' may often have reached him from his fond step-mother in his poverty in Vienna. In considering the pecuniary result of the engagement, it must be remembered that the florin was at that time only worth a franc, instead of two shillings. The month's pay therefore, instead of being £20, was really only about £8. Still, for Schubert that was a fortune.

24 Aug. 1818.

DEAR BROTHER FERDINAND,

It is half-past 11 at night, and your Requiem is ready. It has made me sorrowful, as you may believe, for I sang it with all my heart. What is wanting you can fill in, and put the words under the music and the signs above. And if you want much rehearsal you must do it yourself, without asking me in Zselézs. Things are not going well with you; I wish you could change with me, so that for once you might be happy. You should find all your heavy burdens gone, dear brother; I heartily wish it could be so.—My foot is asleep, and I am mad with it. If the fool could only write it wouldn't go to sleep!

Good morning, my boy, I have been asleep with my foot, and now go on with my letter at 8 o'clock on the 25th. I have one request to make in answer to yours. Give my love to my dear parents, brothers, sisters, friends, and acquaintances, especially not forgetting Carl. Didn't he mention me in his letter! As for my friends in the town, bully them, or get some one to bully them well, till they write to me. Tell my mother that my linen is well looked after, and that I am well off, thanks to her motherly care. If I could have some more linen I should very much like her to send me a second batch of pocket-handkerchiefs, cravats, and stockings. Also I am much in want of two pair of kerseymer trousers. Hart can get the measure wherever he likes. I would send the money very soon. For July, with the journey-money, I got 200 florins.

It is beginning already to be cold, and yet we shall not start for Vienna before the middle of October. Next month I hope to have a few weeks at Freystadt, which belongs to Count Erdödy, the uncle of my count. The country there is said to be extraordinarily beautiful. Also I hope to get to Pesth while we are at the vintage at Boscsméd, which is not far off. It would be delightful if I should happen to meet Herr Administrator Taisele there. I am delighted at the thought of the vintage, for I have heard so much that is pleasant about it. The harvest also is beautiful here. They don't stow the corn into barns as they do in Austria, but make immense heaps out in the fields, which they call *Tristen*. They are often 80 to 100 yards long, and 30 to 40 high, and are laid together so cleverly that the rain all runs off without doing any harm. Oats and so on they bury in the ground.

Though I am so well and happy, and every one so good to me, yet I shall be immensely glad when the moment arrives for going to Vienna. Beloved Vienna, all that is dear and valuable to me is there, and nothing but the actual sight of it will stop my longing! Again entreating you to attend to all my requests, I remain, with much love to all, your true and sincere,

FRANZ M^{ya}.

A thousand greetings to your good wife and dear Resi, and a very hearty one to aunt Schubert and her daughter.

The inscription 'Zselézs, Nov. 1818' on the song '*Das Abendroth*' shows that the return to Vienna was not till nearly the end of the year.

¹ Fräulein Caroline Geisler, daughter of Linus Geisler and Ferdinand's second daughter, Elise.

He found the theatre more than ever in possession of Rossini. To the former operas, 'Elisabetta' was added in the autumn, and 'Otello' early in Jan. 1819. But one of the good traits in Schubert's character was his freedom from jealousy, and his determination to enjoy what was good, from whatever quarter it came, or however much it was against his own interest. A letter of his to Hüttenbrenner, written just after the production of 'Otello,' puts this in very good light. "'Otello" is far better and more characteristic than "Tancredi." Extraordinary genius it is impossible to deny him. His orchestration is often most original, and so is his melody; and except the usual Italian gallopades, and a few reminiscences of "Tancredi," there is nothing to object to.' But he was not content to be excluded from the theatre by every one, and the letter goes on to abuse the 'canaille of Weigle and Treitschkes,' and 'other rubbish, enough to make your hair stand on end,' all which were keeping his operettas off the boards. Still, it is very good-natured abuse, and so little is he really disheartened, that he ends by begging Hüttenbrenner for a libretto; nay, he had actually just completed a little piece called 'Die Zwillingenbrüder' ('The Twins'), translated by Hofmann from the French—a Singspiel in one act, containing an overture and ten numbers. He finished it on Jan. 19, 1819, and it came to performance before many months were over.

Of his daily life at this time we know nothing. We must suppose that he had regular duties with his pupils at the Esterhazys' town house, but there is nothing to say so. We gather that he joined Mayrhofer in his lodgings, 420 in the Wipplingerstrasse, early in the year.¹ It was not a prepossessing apartment. 'The lane was gloomy; both room and furniture were the worse for wear; the ceiling drooped; the light was shut out by a big building opposite—a worn-out piano, and a shabby bookcase.' The only relief is the name of the landlady—Sanssouci, a Frenchwoman. No wonder that Mayrhofer's poems—he was ten years Schubert's senior—were of a gloomy cast.

The two friends were on the most intimate terms, and addressed each other by nicknames. What Mayrhofer's appellation may have been we do not know, but Schubert, now and later, was called 'the Tyrant,' for his treatment of Hüttenbrenner; also 'Bertl,' 'Schwammerl,' and, best of all, 'Kanevas'—because when a stranger came into their circle his first question always was, 'Kann er was?' ('Can he do anything?') Their humour took all sorts of shapes, and odd stories are told of their sham fights, their howls, their rough jokes and repartees.² Mayrhofer was a Government employé

and went to his office early, leaving his fellow-lodger behind. Schubert began work directly he awoke, and even slept in his spectacles to save trouble; he got at once to his writing, sometimes in bed, but usually at his desk. It was so still, when Hiller called on him eight years later.³ 'Do you write much?' said the boy, looking at the manuscript on the standing desk—they evidently knew little in North Germany of Schubert's fertility. 'I compose every morning,' was the reply; 'and when one piece is done, I begin another.' And yet this was the *musicien le plus poète que jamais*—it might have been the answer of a mere Czerny! Add to this a trait, communicated to the writer by Schubert's friend, Franz Lachner, of Munich, that when he had completed a piece, and heard it sung or played, he locked it up in a drawer, and often never thought about it again.

This close work went on till dinner-time—two o'clock—after which, as a rule, he was free for the day, and spent the remainder either in a country walk with friends, or in visits—as to Sofie Müller, and Mme. Lacsny Buchwieser, whom we shall encounter farther on; or at Schober's rooms, or some coffee-house—in his later days it was Bogner's Café in the Singerstrasse, where the droll cry of a waiter was a never-ending pleasure to him. But no hour or place was proof against the sudden attack of inspiration when anything happened to excite it. An instance occurs at this very time, Nov. 1819, in an overture for four hands in F (op. 34), which he has inscribed as 'written in Joseph Hüttenbrenner's room at the City Hospital in the inside of three hours; and dinner missed in consequence.'⁴ If the weather was fine he would stay in the country till late, regardless of any engagement that he might have made in town.

The only compositions that can be fixed to the spring of 1819 are five songs dated February, and one dated March; a very fine quintet for equal voices, to the 'Sehnsucht' song in 'Wilhelm Meister'—a song which he had already set for a single voice in 1816, and was to set twice more in the course of his life (thus rivalling Beethoven, who also set the same words four times); an equally fine quartet for men's voices, 'Ruhe, schönstes Glück der Erde,' dated April; four sacred songs by Novalis, dated May; and a striking overture in E minor, in Ser. II. of the complete edition.

The earnings of the previous summer allowed him to make an expedition this year on his own account. Mayrhofer remained in Vienna, and Vogl and Schubert appear to have gone together to Upper Austria. Steyr was the first point in the journey, a town beautifully situated on the Enns, not far south of Linz. They reached it early in July; it was Vogl's native place, and he had the pleasure of introducing

¹ In a letter to Mayrhofer from Linz, dated August 19, 1819, he says, 'Let the bearer have my bed while he stays with you.' *K.H.* p. 159 (l. 160). The bed must have been his before he left town.

² *K.H.* p. 51 (l. 51).

³ In Hiller's *Künstlerleben*, p. 49.

⁴ *K.H.* p. 160 (l. 162).

his friend to the chief amateurs of the town, Paumgartner, Koller, Dornfeld, Schellmann—substantial citizens of the town, with wives and daughters, 'Pepi Koller,' 'Frizi Dornfeld,' 'the eight Schellmann girls,' etc., who all welcomed the musician with real Austrian hospitality, heard his songs with enthusiasm, and themselves helped to make music with him. His friend Albert Stadler was there also with his sister Kathi. How thoroughly Schubert enjoyed himself in this congenial *bourgeois* society, and in such lovely country—he mentions its beauties each time he writes—we have ample proof in two letters.¹ Among other drolleries the 'Erl King' was sung with the parts distributed amongst Vogl, Schubert, and Pepi Koller. Perhaps, too, Schubert gave them his favourite version of it on a comb. Vogl's birthday (August 10) was celebrated by a cantata in C, containing a terzet, two soprano and two tenor solos, and a finale in canon, pointed by allusions to his various operatic triumphs, words by Stadler, and music by Schubert.² After this the two friends strolled on to Linz, the home of the Spauns, and of Kenner and Ottenwald, whose verses Franz had set in his earlier days; and thence perhaps to Salzburg, returning to Steyr about the end of the month. Nor did the joviality of these good Austrians interfere with composition. Besides the impromptu cantata just mentioned, the well-known PF. quintet (op. 114), in which the air of 'Die Forelle' is used as the theme of the Andantino, was written at Steyr, possibly as a commission from the good Paumgartner, and was performed by the Paumgartner party. Schubert achieved in it the same feat which is somewhere ascribed to Mozart, of writing out the separate parts without first making a score, and no doubt played the pianoforte part by heart. The date of their departure, Sept. 14, is marked by an entry in the album of Miss Stadler, when Schubert delivered himself of the following highly correct sentiment:—'Enjoy the present so wisely, that the past may be pleasant to recollect, and the future not alarming to contemplate.' This may pair off with a sentence written by Mozart, in English, in the Album of an English Freemason, which has not yet been printed:—'Patience and tranquillity of mind contribute more to cure our distempers as the whole art of medicine. Wien, den 30te März 1787.'³

A few days more saw them again settled in Vienna. Each of the two letters preserved from the journey contains an obvious allusion to some love affair; but nothing is known of it. He could hardly have adopted a more effectual diversion from such sorrows than the composition of a mass, on an extended scale; that namely in A♭—his fifth—which he began this

month under the serious title of 'Missa Solemnis'; but he seems to have dawdled over it more than over any other of his works; as it was not finished till Sept. 1822, and contains many marks of indecision.

The most pregnant musical event of this year is the fact that on Feb. 28, 1819, a song of Schubert's was sung in public—the 'Schäfers Klagelied,' sung by Jäger at Jäll's concert, at 5 P.M. at the 'Römische Kaiser,' Vienna. It was Schubert's first appearance before the public as a song-writer [one of the 'Italian' overtures had been given on March 1, 1818, at one of Jäll's concerts], and is noticed by the Leipzig *A.M.Z.* in these terms:—'Goethe's Schäfers Klagelied set to music by Herr Franz Schubert—the touching and feeling composition of this talented young man was sung by Herr Jäger in a similar spirit.' Such is the first utterance of the press on one who has since evoked so much enthusiasm! In the course of this year Schubert appears to have forwarded the three songs, 'Schwager Kronos,' 'Ueber Thal' (Mignon), and 'Ganymed,'—afterwards published as op. 19,—to Goethe; but no notice was taken by the poet of one who was to give some of his songs a wider popularity than they could otherwise have enjoyed, a popularity independent of country or language; nor does Schubert's name once occur in all the six vols. of Goethe's correspondence with Zelter.⁴

1820 was again a year of great activity. Owing to Vogl's influence, Schubert was gradually attracting the attention of the managers. The 'Zwillingsbrüder' had been written for the Kärnthnertheater (see p. 292a), and it was not long before the *régisseur* of the rival opera-house, the Theatre an-der-Wien, suggested to him a libretto called the 'Zauberharfe,' or 'Magic harp,' a melodrama in three acts, by the same Hofmann who had translated the former piece. To receive such a proposal and to act upon it was a matter of course with Schubert, and the 'Zauberharfe' is said to have been completed in a fortnight.⁵ But before this, early in the year, he had met with the works of A. H. Niemeyer, Professor of Theology at Halle, and had adopted the poem of 'Lazarus, or the Feast of the Resurrection,' for an Easter Cantata. Easter fell that year on April 2, and his work is dated 'February,' so that he was in ample time. The poem—or drama, for there are seven distinct characters—is in three parts. 1. The sickness and death. 2. The burial and elegy. 3. The resurrection. Of these the first and a large portion of the second were completed by Schubert, apparently without the knowledge of any of his friends. Ferdinand mentions the first part in his list,⁶ but the existence of the second was unknown, till, through the instru-

⁴ Search should be made in the *Goethe Archiv* at Weimar for the autograph of these songs, and the letter which doubtless accompanied them.

² Published to other words, 'Herrlich prangt,' as op. 168.

³ I owe this to my good friend Mr. Fohl, of Vienna.

mentality of Mr. Thayer, it was unearthed in 1861. These have been published,¹ but no trace of the third act has yet been found, and the work was not performed till long after the composer's death—viz. in 1863.

On June 14 the 'Zwillingsbrüder' or 'Zwillinge' was produced at the Kärnthnertheater. It is a comic operetta ('Posse'), with spoken dialogue, in one act, containing an overture and ten numbers, and turns on the plot that has done duty many times before, the confusion between two twin-brothers, who were both acted by Vogl. The overture was encored on the first night, and Vogl's two songs were much applauded, but the piece was virtually a *fiasco*, and was withdrawn after six representations. Schubert took so little interest in its production that, like Mendelssohn at the 'Wedding of Camacho,' he did not even stay in the house, and Vogl had to appear instead of him in front of the curtain. The libretto, though overburdened with characters, is sadly deficient in proportion, and contains very little action. Schubert's music, on the other hand, is light, fresh, and melodious, pointed, unusually compact, and interesting throughout. In the concerted numbers there is evidence of great dramatic power. To condemn it, as the critics of the day do, as wanting in melody, and constantly striving after originality, is to contradict Schubert's most marked characteristics, and is contrary to the facts. There is possibly more justice in the complaint that the accompaniments were too loud, though that is certainly not the fault in his masses, his only other published works with orchestral accompaniments anterior to this date. The work has been published in vocal score by Peters (1872).

On August 19 the 'Zauberharfe' was produced at the Theatre an-der-Wien. It consists chiefly of chorus and melodrama, with only a few solo passages. There is a fine overture (in C), original, characteristic, and full of beauty, which was published before 1828 as op. 26, under the name of 'Rosamunde,' to which it seems to have no claim.² The piece was occasionally brought forward till the winter, and was then dropped. These three vocal works appear so far to have whetted Schubert's appetite that in the autumn he attacked the more important libretto of 'Sakontala,' a regular opera in three acts, by P. H. Neumann, founded on the Indian drama of that name. He sketched two acts, and there it remains; the MS. is in Herr Dumba's possession. Another important and very beautiful piece is the 23rd Psalm,³ set for two sopranos and two altos with PF. accompaniment, at the instigation of the

sisters Fröhlich, and dated at the beginning '23 Dec. 1820'—perhaps with a view to some private concerts given, now or later, at the old hall of the Musikverein. Another is the 'Gesang der Geister über den Wassern' of Goethe (op. 167). This fine and mystical poem had a strong attraction for Schubert. He set it for four equal voices in 1817; then he reset it for four tenors and four basses with two violas, two violoncellos, and bass, in Dec. 1820; and lastly revised this in Feb. 1821. It was first produced on March 7, 1821, and found no favour, to Schubert's disgust. It was again performed on March 30, before a more receptive audience, with a far better result. It was revived at Vienna in 1858 by Herbeck, and in England was performed with success on March 22, 1881, under the direction of Mr. Prout. It is enormously difficult, and, though perfectly in character with the poem, will probably never be attractive to a mixed audience. Another work of 1820 were some antiphons (op. 113) for Palm Sunday (March 26), composed for Ferdinand, who had been recently appointed Choirmaster at the Altlerchenfelder Church, and found the duties rather too much for him. They are written with black chalk, on coarse grey wrapping paper; and the tradition is that they and two motets were written in great haste, just in time for the service. On Easter Sunday Franz attended and conducted the mass for his brother.

The Fantasia in C for PF. solo (op. 15), containing Variations on Schubert's own 'Wanderer,' is probably a work of this year. It was written for von Liebenberg, a PF. player, to whom Schubert dedicated it. This fine piece was brought into vogue by Liszt's arrangement of it for PF. and orchestra as a concerto; but it is doubtful if it is improved by the process. Schubert never could play it; he always stuck fast in the last movement; and on one occasion jumped up and cried 'Let the devil himself play it!' Another piece is an Allegro for strings in C minor, dated Dec. 1820, the first movement of a quartet, of which there exist besides forty-one bars of the Andante, in A♭. The Allegro is of first-rate quality, and Schubert in every bar. It was published in 1868 by Senff. The MS. was in Johannes Brahms's fine collection of autographs.

The songs of 1820, seventeen in all, though not so numerous as those of previous years, are very fine. They contain 'Der Jüngling auf dem Hügel' (op. 3, No. 1), 'Der Schiffer,' 'Liebeslauschen,' three grand songs to Mayrhofer's words, 'Orest auf Tauris,' 'Der entsühnte Orest,' and 'Freiwilliges Versinken,' and four Italian Canti, written for Fr. von Romer, who afterwards married Schubert's friend Spaun, and since published with one which was probably written under Salieri's eye as early as 1813. The most remarkable of all is 'Im Walde' or

¹ In 1868, by Spina.

² The overture played to the 'Rosamunde' music is in D minor, and was afterwards published as 'Alfonso & Estrella.' There is, perhaps, another in existence. See the letter to von Mosel quoted farther on.

³ To Moses Mendelssohn's translation.

'Waldesnacht,' a very long song of extraordinary beauty, variety, force, and imagination.

With February 1821 Schubert entered his twenty-fifth year, and it was a good omen to receive such a birthday present as the three testimonials of this date which Kreissle has¹ preserved. The first is from von Mosel, then Court Secretary; the second from Weigl, Director of the Court Opera, Salieri, and von Eichthal; the third from Moritz Count Dietrichstein, whom Beethoven addresses as 'Hofmusikgraf,' and who appears to have been a sort of Jupiter-Apollo with general sway over all Court music. These influential personages warmly recognise his eminent ability, industry, knowledge, feeling, and taste, and profess the best intentions towards him. The three documents were enclosed by the Count in a letter to Vogl, full of good wishes for the future of his friend. Still more gratifying was the prospect, which now at last opened, of the publication of his songs. It was the first good epoch in Schubert's hitherto struggling life. He had now been writing for more than seven years, with an industry and disregard of consequences which are really fearful to contemplate; and yet, as far as fame or profit were concerned, might almost as well have remained absolutely idle. Here at length was a break in the cloud. It was not less welcome because it was mainly due to his faithful friends, the Sonnleithners, who had made his acquaintance through the accident of Leopold Sonnleithner's being at school with him, and ever since cherished it in the most faithful and practical way, Ignaz, the father, having, since 1815, had large periodical music-meetings of artists and amateurs in his house at the Gundelhof, which were nothing less than Schubert propaganda. Here, before large audiences of thoroughly musical people, Schubert's pieces were repeatedly performed, and at length, on Dec. 1, 1820, the 'Erl King' was sung by Gymnich, a well-known amateur, with a spirit which fired every one of the audience with the desire to possess the song, and appears to have suggested to Leopold and Gymnich the possibility of finding a publisher for the inspirations which had for so long been their delight and astonishment. They applied to Diabelli and Haslinger, the leading houses of Vienna, but without success; the main objections being the insignificance of the composer, and the difficulty of his PF. accompaniments. On this they resolved to take the matter into their own hands; and, probably not without misgivings, had the 'Erl King' engraved. The fact was announced at the next Concert at the Gundelhof, and a hundred copies were at once subscribed for in the room—sufficient to defray the cost of the engraving and printing, and of engraving a second song as well. Meantime the 'Erl King' had been sung in public (for

the concerts at the Gundelhof were, strictly speaking, private, limited to the friends of the host) by Gymnich, at an evening concert of the Musikverein, in one of the public rooms of the city, on Jan. 25, 1821, Schubert himself appearing on the platform, and playing the accompaniment. Everything was done by the young enthusiasts to foster the Schubert *furor*, even to the publication of a set of 'Erl King waltzes' by A. Hüttenbrenner, which at any rate must have made the name familiar, though they provoked Schubert, and drew from Kanne some satirical hexameters and pentameters which may be read in Kreissle.² On Feb. 8 the programme of the Musikverein Concert included three songs of his, the 'Sehnsucht' by Schiller, 'Gretchen am Spinnrade,' and 'Der Jüngling auf dem Hügel'; and on March 8 the 'Gruppe aus dem Tartarus.' On March 7 the 'Erl King' was again sung, this time by Vogl himself, at an unmistakable public concert, at the Kärnthnertheater, a concert supported by all the most distinguished ladies of the Court, who received the song with loud applause. Think what the first appearance of these godlike pieces must have been! It was the rising of the Sun! He is now an everyday sight to us; but how was it the first time that he burst in all his brightness on the eyes of mortals? In the midst of all this enthusiasm the 'Erl King' was published on the 1st of April 1821, by Cappi and Diabelli, on commission. It was dedicated to Count Moritz Dietrichstein, whose kindness well deserved that recognition. On April 30, 'Gretchen am Spinnrade' appeared as op. 2. The succeeding publications—each made to depend on the success of the last—were as follows:—

- May 29. Op. 3. Schäfers Klagelied; Meeres-Stille; Heidenröslein; Jägers Abendlied.
- Do. Op. 4. Der Wanderer; Morgenlied; Wanderers Nachtlied.
- July 9. Op. 5. Rastlose Liebe; Nähe des Geliebten; Der Fischer; Erster Verlust; Der König in Thule.
- Aug. 23. Op. 6. Memnon; Antigone und Oedip; Am Grabe Anselmos.
- Nov. 27. Op. 7. Die abgeblühte Linde; Der Flug der Zeit; Der Tod und das Mädchen.

Here the publication by commission stopped, the Diabellis being evidently convinced that the risk might be profitably assumed; and accordingly op. 8 appears on May 9, 1822, as 'the property of the publishers.' The dedications of the first seven numbers no doubt furnish the names of Schubert's most influential supporters: 1. Graf von Dietrichstein; 2. Reichsgraf Moritz von Fries; 3. Ignaz von Mosel; 4. Johann Ladislaus Pyrker, Patriarch of Venice; 5. Salieri; 6. Michael Vogl; 7. Graf Ludwig Széchényi. It must be admitted that the above are very good lists, and that if Schubert had waited long for the publication of his works, the issue

¹ K.H. p. 201 (t. 303).

Haselick, *Concertwesen*, p. 284; and K.H. p. 60 (i. 60).

of twenty songs in eight months, under the patronage of seven such eminent personages, was a substantial compensation. We do not hear, however, that much money came into his hands from the publication. The favourable impression made by the publication may be gathered from the long, intelligent, and sympathetic criticism, 'Blick auf Schuberts Lieder,' by F. von Hentl, which appeared in the *Wiener Zeitschrift für Kunst*, etc.—a periodical belonging to Diabelli's rivals, Steiner & Co.—for March 23, 1822.

Schubert was now a good deal about the theatre, and when it was determined to produce a German version of Hérold's 'Clochette,' as 'Das Zauberglöckchen,' at the Court-opera, he was not unnaturally called upon to insert a couple of pieces to suit the Vienna audience. It was what Mozart often did for the Italian operas of his day—what indeed we know Shakespeare to have done in more than one case. The opera was produced on June 20. The interpolated pieces were a long air for tenor,¹ in three movements—Maestoso, Andante, and Allegro—full of passion and imagination, and a comic duet between the princes B flat and C natural (Bedur and Cedur). They were more applauded than anything else in the work, but Schubert's name was not divulged; the opera as a whole did not please, and was soon withdrawn.

The little Variation which he contributed, as No. 38, to Diabelli's collection of fifty Variations—the same for which Beethoven wrote his thirty-three (op. 120)—should not be overlooked. Though not published till 1823, the autograph, now in the Hofbibliothek at Vienna, is dated 'March 1821.' The variation is fresh and pretty, in the minor of the theme, but is more noticeable from its situation than from its own qualities. A few dances for PF. solo are dated '8th March' and 'July' in this year, and a collection of thirty-six, containing those alluded to and others of 1816 and 1819, was published by Cappi and Diabelli on Nov. 29, as op. 18. Some of these are inscribed on the autograph 'Atzenbrucker Deutsche, July 1821,' indicating a visit to Atzenbruck, the seat of an uncle of Schober's, near Absetten, between Vienna and St. Pölten, where a three days' annual festivity was held, to which artists of all kinds were invited, and where Schubert's presence and music were regarded as indispensable.

Whether after this he and Schober returned to Vienna we know not, no letters remain; but the next event of which any record remains is the composition of a symphony, his seventh, in E, which is marked, without note of place, as begun in August. He did not complete the writing of it, and indeed it is probable that it did not occupy him more than a few hours; but the autograph, which is in the writer's posses-

sion,² is a very curious manuscript, probably quite unique, even among Schubert's feats of composition. It occupies 167 pages of 42 sheets (10 quires of 4, and 1 of 2), and is in the usual movements—Adagio in E minor, and Allegro in E major; Andante in A; Scherzo in C, and Trio in A;³ and Allegro giusto in E major. The Introduction and a portion of the Allegro are fully scored and marked; but at the 110th bar—the end of a page—Schubert appears to have grown impatient of this regular proceeding, and from that point to the end of the work has made merely memoranda. But these memoranda are, in their way, perfectly complete and orderly to the end of the Finale. Every bar is drawn in; the *tempi* and names of the instruments are fully written at the beginning of each movement; the *nuances* are all marked; the very double bars and flourishes are gravely added at the end of the sections, and 'Fine' at the conclusion of the whole; and Schubert evidently regarded the work as no less complete on the paper than it was in his mind. And complete it virtually is; for each subject is given at full length, with a bit of bass or accompaniment-figure, or *fugato* passage. There is not a bar from beginning to end that does not contain the part of one or more instruments; at all crucial places the scoring is much fuller; and it would no doubt be possible to complete it as Schubert himself intended. [It is said that the sketch was submitted to Mendelssohn, who refused to complete it. In later days, at the suggestion of Sir George Grove, Mr. J. F. Barnett undertook the task, and the symphony, scored by him from Schubert's indications, was produced at the Crystal Palace on May 5, 1883. See Barnett's *Musical Reminiscences and Impressions*, pp. 312-22.]

We next find the two friends at the castle of Ochenburg, a few miles south of St. Pölten, the seat of the Bishop, who was a relative of Schober's; and there and in St. Pölten itself they passed a thoroughly happy and healthy holiday of some weeks in September and October. The Bishop and Baron Mink, a local magnate, were congenial hosts, and the visit of the two clever young men was the signal for various festivities, in which all the aristocracy of the country-side—'a princess, two countesses, and three baronesses,' in Schober's enumeration—took part, and in which the music and drollery of Schubert and his friend delighted every one. The great result of the visit, however, was the composition of an opera to Schober's words, on a romantic subject of battles, love, conspiracy, hunting, peasant life, and everything else, so natural in opera librettos,

² I received it in 1868 from the late Paul Mendelssohn, Felix's brother, into whose hands it came after his brother's death. Felix Mendelssohn had it from Ferdinand Schubert direct.

³ The change in this symphony from the Scherzo in C to the Trio in A, by an E in octaves in the oboes lasting four bars, is an anticipation of the similar change in the same place in the great C major Symphony of 1828, and a curious instance of the singular way in which many of Schubert's earlier symphonies lead up to his crowning effort.

¹ Introduced into 'Alfonso und Estrella' in 1821 by Job. Fuchs.

so impossible in real life. It was called 'Alfonso und Estrella,' and two acts were completed before their return to town. The first act is dated at the end of the autograph Sept. 20, and the second Oct. 20. A week later they were back again in Vienna.

The songs composed in 1821 are very important, and comprise some of his very finest, and in the most various styles. It is sufficient to name among the published ones 'Grenzen der Menschheit' (February); 'Geheimes' (March); Suleika's two songs (opp. 14, 31); 'Sei mir gegrüßt' (op. 20, No. 1); and 'Die Nachtigall,' for four men's voices (op. 11, No. 2)—all of the very highest excellence, of astonishing variety, and enough of themselves to make the fame of any ordinary composer. A fine setting of 'Mahomet's song,' by Goethe, for bass (possibly for Lablache), was begun in March.

The third act of 'Alfonso und Estrella' was finished in Feb. 27, 1822. The fact that a thoroughly worldly, mercenary, money-making manager like Barbaja, who was at the same time a firm believer in Rossini, had become lessee of the two principal theatres of Vienna, augured badly for Schubert's chance of success in that direction. But indeed the new piece seems to have been calculated to baffle any manager, not only in Vienna, but everywhere else. It caused, as we shall see, a violent dispute, eighteen months later, between Schubert and Weber, which but for Schubert's good temper would have led to a permanent quarrel. Anna Milder, to whom Schubert sent a copy of the work in 1825, tells him, in a letter full of kindness and enthusiasm, that the libretto will not suit the taste of the Berliners, 'who are accustomed to the grand tragic opera, or the French opera-comique.' Nor was the libretto the only drawback. Schubert, like Beethoven in 'Fidelio,' was in advance of the modest execution of those days. At Graz, the abode of the Hüttenbrenners, where there was a *foyer* of Schubert-enthusiasts, the opera got as far as rehearsal, and would probably have reached the stage, if the accompaniments had not proved impossible for the band.¹ No performance took place until twenty-six years after poor Schubert's death, namely at Weimar, on June 24, 1854, under the direction of Liszt, who, with all his devotion to the master, had to reduce it much for performance. It was very carefully studied, and yet the success, even in that classical town, and with all Liszt's enthusiasm and influence, seems to have been practically *nil*. At last, however, its time came. Twenty-five years later, in 1879, it was again taken in hand by Capellmeister Johann Fuchs of the Court opera, Vienna, who entirely rewrote the libretto, and greatly curtailed the work; and in this form it was brought to performance at Carlsruhe in March 1881, with great success.

¹ A.H. p. 249 (i. 252).

But to return to Schubert and 1822. Early in the year he made the acquaintance² of Weber, who spent a few weeks of February and March in Vienna to arrange for the production of his 'Euryanthe.' No particulars of their intercourse on this occasion survive. With Beethoven Schubert had as yet hardly exchanged words. And this is hardly to be wondered at, because, though Vienna was not a large city, yet the paths of the two men were quite separate. Apart from the great difference in their ages, and from Beethoven's peculiar position in the town, his habits were fixed, his deafness was a great obstacle to intercourse, and, for the last five or six years, what with the lawsuits into which his nephew dragged him, and the severe labour entailed by the composition of the Mass in D, and of the Sonatas opp. 106, 109, 110, and 111—works which by no means flowed from him with the ease that masses and sonatas did from Schubert—he was very inaccessible. Any stranger arriving from abroad, with a letter of introduction, was seen and treated civilly. But Schubert was a born Viennese, and at the time of which we speak, Beethoven was as much a part of Vienna as St. Stephen's tower, and to visit him required some special reason, and more than special resolution.

A remark of Rochlitz's³ in the July of this year shows that Schubert was in the habit of going to the same restaurant with Beethoven, and worshipping at a distance; but the first direct evidence of their coming into contact occurs at this date. On April 19, 1822, he published a set of Variations on a French air as op. 10, and dedicated them to Beethoven as 'his admirer and worshipper' (*sein Verehrer und Bewunderer*). The Variations were written in the winter of 1820-21, and Schubert presented them in person to the great master. There are two versions of the interview,⁴ Schindler's and J. Hüttenbrenner's. Schindler was constantly about Beethoven. He was devoted to Schubert, and is very unlikely to have given a depreciating account of him. There is therefore no reason for doubting his statement, especially as his own interest or vanity were not concerned. It is the first time we meet Schubert face to face. He was accompanied by Diabelli, who was just beginning to find out his commercial value, and would naturally be anxious for his success. Beethoven was at home, and we know the somewhat overwhelming courtesy with which he welcomed a stranger. Schubert was more bashful and retiring than ever; and when the great man handed him the sheaf of paper and the carpenter's pencil provided for the replies

² For their meeting we have the authority of Weber's son in his biography, ii. 429. But his statement that Schubert was alienated from Weber by Weber's criticism on 'Rosamunde' is more than doubtful, because 'Rosamunde' was probably not composed till some nineteen months later, and because it was not Schubert's habit to take offence at criticism.

³ *Ein Freund der Tonkunst*, iv. 352. See the lifelike and touching picture by Braun von Braun given in Nohl's *Beethoven*, iii. 682.

⁴ Schindler's *Beethoven*, ii. 176.

of his visitors, could not collect himself sufficiently to write a word. Then the Variations were produced, with their enthusiastic dedication, which probably added to Beethoven's good humour. He opened them and looked through them, and seeing something that startled him, naturally pointed it out. At this Schubert's last remnant of self-control seems to have deserted him, and he rushed from the room. When he got into the street, and was out of the magic of Beethoven's personality, his presence of mind returned, and all that he might have said flashed upon him, but it was too late. The story is perfectly natural, and we ought to thank Beethoven's Boswell for it. Which of us would not have done the same? Beethoven kept the Variations and liked them; and it must have been some consolation to the bashful Franz to hear that he often played them with his nephew. Hüttenbrenner's¹ story is that Schubert called, but found Beethoven out; which may have been an invention of Diabelli's to shield his young client.

This autumn Schubert again took up the Mass in A \flat , which was begun in 1819; finished it, and inscribed it '*im 7^b 822 beendet*.'² Not that that was the final redaction; for, contrary to his usual practice—in fact it is almost a solitary instance—he took it up again before his death, and made material improvements³ both in the position of the voice-parts and in the instrumentation, as may be seen from the autograph score now in the Library of the Gesellschaft der Musikfreunde.

This year seems to have been passed entirely in Vienna, at least there are no traces of any journey; and the imprisonment in the broiling city, away from the nature he so dearly loved, was not likely to improve his spirits. What events or circumstances are alluded to in the interesting piece called '*My Dream*,'⁴ dated 'July 1822,' it is hard to guess. It may not improbably have been occasioned by some dispute on religious subjects of the nature of those hinted at in his brother Ignaz's letter of Oct. 12, 1818.⁵ At any rate it is deeply pathetic and poetical.

During this summer Joseph Hüttenbrenner was active in the cause of his friend. He made no less than four endeavours to bring out the '*Teufels Lustschloss*,'—at the Josefstadt

¹ *K.H.* p. 261 (i. 264).

² ^{7^b} stands for September.

³ This was kindly pointed out to the writer by Johannes Brahms, who had an early copy of the score, made by Ferdinand Schubert from the autograph in its original condition. In this shape Brahms rehearsed the mass, but found many portions unsatisfactory, and was interested to discover subsequently from the autograph that Schubert had altered the very passages alluded to, and made them practicable.—He made three attempts at the '*Cum Sancto*' before succeeding, each time in fugue, and always with a different subject. Of the first there are four bars; of the second 192; the third is that printed in Schreiber's edition. This edition is unfortunately very incorrect. Not only does it swarm with misprints, but whole passages, and those most important ones (as in the Horns and Trombones of the Dona), are clean omitted. The nuances also are shamefully treated.

⁴ First printed by R. Schumann in the *Neue Zeitschrift für Musik* for Feb. 5, 1839. See also *K.H.* p. 333 (ii. 16).

⁵ *K.H.* p. 146 (i. 148).

and Court theatres of Vienna, at Munich, and at Prague. At Prague alone was there a gleam of hope. Hollbein, the manager there, requests to have the score and parts sent to him, at the same time regretting that during a month which he had passed in Vienna, Schubert had not once come near him. Hüttenbrenner also urged Schubert on Peters, the publisher, of Leipzig, who in a tedious egotistical letter, dated Nov. 14, 1822, gives the usual sound reasons of a cautious publisher against taking up with an unknown composer—for in North Germany Schubert was still all but unknown. One is sorry to hear of a little rebuff which he sustained at this time from the Gesellschaft der Musikfreunde of Vienna, to whom he applied to be admitted as a practising member (on the viola), but who refused him on the ground of his being a professional, and therefore outside their rules.⁶ A somewhat similar repulse was experienced by Haydn from the Tonkünstler Societät. [See vol. ii. p. 354.] On the other hand, the musical societies both of Linz and Graz elected him an honorary member. To the latter of these distinctions we owe the two beautiful movements of the symphony No. 8, in B minor, which was begun at Vienna on Oct. 30, 1822, and intended as a return for the compliment. The Allegro and Andante alone are finished, but these are of singular beauty and the greatest originality. In them, for the first time in orchestral composition, Schubert exhibits a style absolutely his own, untinged by any predecessor, and full of that strangely direct appeal to the hearer of which we have already spoken. It is certain that he never heard the music played, and that the new and delicate effects and orchestral combinations with which it is crowded, were the result of his imagination alone. The first movement is sadly full of agitation and distress. It lay hidden at Graz for many years, until obtained from Anselm Hüttenbrenner by Herbeck, who first produced it in Vienna at one of the Gesellschaft concerts in 1865.⁷ It was published by Spina early in 1867; was played at the Crystal Palace, April 6, 1867, and elsewhere in England, and always with increasing success. In fact no one can hear it without being captivated by it.

The Songs composed in 1822—fourteen printed and two in MS.—comprise '*Epistel von Collin*' (Jan.); '*Heliopolis*' (April); '*Todesmusik*,' with a magnificent opening (op. 108, No. 2; Sept.); '*Schatzgräbers Begehr*' (op. 23, No. 4; Nov.) with its stately bass; '*Willkommen und Abschied*' (op. 56, No. 1; Dec.); '*Die Rose*' (op. 73) and '*Der Musensohn*' (op. 92). The concerted pieces, '*Constitutionslied*' (op. 157; Jan.); '*Geist der Liebe*' (op. 11, No. 3), '*Gott in der Natur*' (op. 133), and '*Des Tages Weihe*' (op. 146), all belong to this year.

Publication went on in 1822, though not so

⁶ *K.H.* p. 280 (i. 283).

⁷ See Hanellik, *Concertaal*, p. 350.

briskly as before. The Variations dedicated to Beethoven (op. 10) were first to appear, on April 19. They were followed by op. 8 (four songs) on May 9, and op. 11 (three part-songs) on June 12. Then came a long gap till Dec. 13, on which day opp. 12, 13, and 14, all songs, appeared at once. We have not space to name them. But with such accumulated treasures to draw upon, it is unnecessary to say that they are all of the first class. The pecuniary result of the publications of 1821 had been good; 2000 gulden were realised, and of the 'Erl King' alone more than 800 copies had been sold; and if Schubert had been provident enough to keep his works in his own possession he would soon have been out of the reach of want. This, however, he did not do. Pressed by the want of money, in an incautious moment he sold the first twelve of his works¹ to Diabelli for 800 silver gulden (£80), and entered into some injudicious arrangement with the same firm for future publications. His old and kind friend Count Dietrichstein about this time offered him a post as organist to the Court Chapel,² but he refused it, and he was probably right, though in so doing he greatly distressed his methodical old father. His habits, like Beethoven's, made it absurd for him to undertake any duties requiring strict attendance.

The Vienna Theatre being closed to 'Alfonso and Estrella,' Schubert turned his thoughts in the direction of Dresden, where his admirer Anna Milder was living, and where Weber was Director of the Opera; and we find him in a letter of Feb. 28, 1823 (published in 1881 for the first time)³ asking his old patron Herr von Mosel for a letter of recommendation to Weber. He is confined to the house by illness, and apologises for not being able to call. There are no traces of reply to this application, but it probably led to nothing, for, as we shall see, the score of the opera was still in his hands in October. He was evidently now set upon opera. In the letter just mentioned he implores von Mosel to entrust him with a libretto 'suitable for his littleness'; and though he seems never to have obtained this, he went on with the best he could get, and 1823 saw the birth of no less than three dramatic pieces. The first was a one-act play with dialogue, adapted from the French by Castelli, and called 'Die Verschworenen,' or 'The Conspirators.' The play was published in the *Dramatic Garland*—an annual collection of dramas—for 1823. Schubert must have seen it soon after publication, and by April had finished the composition of it. The autograph, in the British Museum, has at

the end the words 'April 1823. F. Schubert, Ende der Oper.' It contains an overture and eleven numbers, and appears from Bauernfeld's testimony to have been composed with a view to representation at the Court theatre. The libretto is a very poor one, with but few dramatic points, and confines the composer mainly to the Chorus. The licensers changed its title to the less suspicious one of 'Der häusliche Krieg' or 'The Domestic Struggle,' and it was duly sent in to the management, but it returned in twelve months without examination. It did not come to performance at all during Schubert's lifetime, nor till 1861. In that year it was given, under Herbeck's direction, by the Musikverein, Vienna, on March 1 and 22; and on the stage at Frankfort on August 29; since then at the Court theatre, Vienna, at Munich, Salzburg, and other German towns; in Paris, Feb. 3, 1868, as 'La Croisade des Dames,' and at the Crystal Palace, Sydenham, March 2, 1872, as 'The Conspirators.' In less than two months after throwing off this lively Singspiel, Schubert had embarked in something far more serious, a regular three-act opera of the 'heroic-romantic' pattern—also with spoken dialogue—the scene laid in Spain, with Moors, knights, a king, a king's daughter, and all the usual furniture of these dreary compilations. The libretto of 'Fierrabras,' by Josef Kupelwieser—enough of itself to justify all Wagner's charges⁴ against the opera books of the old school—was commissioned by Barbaja for the Court theatre. The book was passed by the Censure on July 21; but Schubert had by that time advanced far in his labours, and had in fact completed more than half of the piece. He began it, as his own date tells us, on May 25. Act 1, filling 304 pages of large oblong paper,⁵ was completely scored by the 31st of the month; Act 2, in five days more, by June 5; and the whole three acts, fully 1000 pages, and containing an overture and twenty-three numbers, were entirely out of hand by Oct. 2. And all for nothing! Schubert was not even kept long in suspense, for early in the following year he learnt that the work had been dismissed. The ground for its rejection was the badness of the libretto; but knowing Barbaja's character, and seeing that Kupelwieser was secretary to a rival house (the Josefstadt), it is difficult not to suspect that the commission had been given by the wily Italian, merely to facilitate the progress of some piece of business between the two establishments.

It is, as Liszt has remarked, extraordinary that Schubert, who was brought up from his youth on the finest poetry, should have unhesitatingly accepted the absurd and impracticable librettos which he did, and which have kept in oblivion so much of his splendid music. His devotion to his friends, and his irrepressible

¹ So say the books; but the works published on commission were opp. 1-7, containing twenty songs.

² [The evidence for this transaction is very obscure, and the story may have become confused with a proposed application in 1825. See below, p. 356a.]

³ In the *Neue Freie Presse* of Vienna, Nov. 19, 1881. The letter, though formal in style, is curiously free in some of its expressions. It mentions the overture to the 1st Act of 'Alfonso und Estrella.' What can this be? The overture known under that name (op. 69) is dated 'Dec. 1823,' and is said to have been written for 'Rosamunde.'

⁴ Hanselick, *Concertaal*, p. 150.

⁵ The autograph was shown to Sullivan and the writer by that energetic Schubert apostle, Herr Johann Herbeck, in 1868.

desire to utter what was in him, no doubt help to explain the anomaly, but an anomaly it will always remain. It is absolutely distressing to think of such extraordinary ability, and such still more extraordinary powers of work, being so cruelly thrown away, and of the sickening disappointment which these repeated failures must have entailed on so simple and sensitive a heart as his. Fortunately for us the strains in which he vents his griefs are as beautiful and endearing as those in which he celebrates his joys.

His work this summer was not, however, to be all disappointment. If the theatre turned a deaf ear to his strains there were always his beloved songs to confide in, and they never deceived him. Of the Song in Schubert's hands we may say what Wordsworth so well says of the Sonnet:—

With this key
Shakespeare unlocked his heart; the melody
Of this small lute gave ease to Petrarch's wound.

and when a damp
Fell round the path of Milton, in his hand
The thing became a trumpet, whence he blew
Soul-animating strains, alas too few!

—with the notable difference that it was given to Schubert to gather up and express, in his one person and his one art, all the various moods and passions which Wordsworth has divided amongst so many mighty poets.

And now, in the midst of the overwhelming tumult and absorption which inevitably accompany the production of so large a work of imagination as a three-act opera, brought into being at so extraordinarily rapid a pace, he was to stop, and to indite a set of songs, which though not of greater worth than many others of his, are yet so intelligible, so expressive, address themselves to such universal feelings, and form so attractive a whole, that they have certainly become more popular, and are more widely and permanently beloved, than any similar production by any other composer. We have already described the incident through which Schubert made acquaintance with the Müllerlieder¹ of Wilhelm Müller, twenty of which he selected for the beautiful series so widely known as the 'Schöne Müllerin.' We have seen the enduring impatience with which he attacked a book when it took his fancy, and the eagerness with which he began upon this particular one. We know that the Müllerlieder were all composed this year; that some of them were written in hospital; that No. 15 is dated 'October'; that a considerable interval elapsed between the second and third Act of 'Fierrabras'—probably the best part of July and August. Putting these facts together it seems to follow that the call on Rand-

hartinger (see *ante*, p. 24) and the composition of the first numbers of the 'Schöne Müllerin' took place in May, before he became immersed in 'Fierrabras.' Then came the first two Acts of that opera; then his illness, and his sojourn in the hospital, and more songs; then the third Act of the opera; and lastly the completion of the Lieder.

Be this as it may, there was no lack of occupation for Schubert after he had put 'Fierrabras' out of hand. Weber arrived in Vienna late in September 1823, and on Oct. 3 began the rehearsals of 'Euryanthe'; and for a month the musical world of Austria was in a ferment. After the first performance, on Oct. 25, Weber and Schubert came somewhat into collision. Schubert, with characteristic frankness, asserted that the new work wanted the geniality and grace of 'Der Freischütz,' that its merit lay mainly in its harmony,² and that he was prepared to prove that the score did not contain a single original melody. Weber had been much tried by the rehearsals, by the growing conviction that his work was too long, and by the imperfect success of the performance; and with a combination of ignorance and insolence which does him no credit replied, 'Let the fool learn something himself before he criticises me.' Schubert's answer to this was to go off to Weber with the score of 'Alfonso und Estrella.' When they had looked through this, Weber returned to Schubert's criticisms on 'Euryanthe,' and finding that the honest Franz stuck to his point, was absurd enough to lose his temper, and say, in the obvious belief that the score before him was Schubert's first attempt, 'I tell you the first puppies and the first operas are always drowned.' Franz, it is unnecessary to say, bore no malice, even for so galling a speech, and it is due to Weber to state that he took some pains later to have the work adopted at the Dresden theatre.³

Schubert did not yet know the fate which awaited 'Fierrabras'; all was at present *couleur de rose*; and the fascination of the theatre, the desire innate in all musicians, even one so self-contained as Schubert, to address a large public, sharpened not improbably by the chance recently enjoyed by the stranger, was too strong to be resisted, and he again, for the third time in ten months, turned towards the stage. This time the temptation came in the shape of 'Rosamunde, Princess of Cyprus,' a play of ultraromantic character, by Madame von Chezy, authoress of 'Euryanthe,' a librettist whose lot seems to have been to drag down the musicians connected with her. The book of 'Rosamunde' must have been at least as inefficient as that with which Weber had been struggling, to cause the failure of such magnificent and interesting music as Schubert made for it. The drama has disappeared, but Kreissle gives the plot,⁴ and

¹ The Müllerlieder, twenty-three in number, with Prologue and Epilogue in addition, are contained in the 1st vol. of the *Geistliche aus den hinterlassenen Papieren eines reisenden Waldhornisten* (Poems found among the papers of a travelling French-horn-player), which were first published at Dessau, 1821. Schubert has omitted the Prologue and Epilogue, and three poems—"Das Mühlenleben" after 'Der Neugierige'; 'Erster Schmerz, letzter Scherz,' after 'Biersecht und Stolz'; and 'Blümlein Vergissmeinn' after 'Die bese Farbe'.

² See Mendelssohn's opinion in *The Mendelssohn Family*, i. 237.

³ *K.H.* p. 248 (i. 249) note.

⁴ *Ibid.* p. 285 (i. 282), etc.

it is both tedious and improbable. It had moreover the disadvantage of competition with a sensational spectacular piece, written expressly to suit the taste of the suburban house, the Theatre an-der-Wien, at which 'Rosamunde' was produced, and which, since the time when Schikaneder induced Mozart to join him in the 'Magic Flute,'¹ had a reputation for such extravaganzas. Schubert completed the music in five days.² It consists of an Overture in D,³ since published as 'Alfonso und Estrella,' op. 69; three Entr'actes; two numbers of ballet music; a little piece for clarinets, horns, and bassoons, called a 'Shepherds' Melody,' of bewitching beauty; a Romance for soprano solo, and three choruses. The Romance (op. 26), the Shepherds' chorus, the Entr'acte in B \flat , and the Air de Ballet in G, are not only very beautiful but very attractive; and the Entr'acte in B minor, of a grand, gloomy, and highly imaginative cast, is one of the finest pieces of music existing. The play was brought out on Dec. 20, 1823; the overture, though the entire orchestral part of the music had only one rehearsal of two hours, was twice redemanded, other numbers were loudly applauded, and Schubert himself was called for at the close; but it only survived one more representation, and then the parts were tied up and forgotten till the year 1867, when they were discovered by two English travellers in Vienna.⁴

Besides the Müllerlieder several independent songs of remarkable beauty belong to 1823. Conspicuous among these are 'Viola' (Schneeglöcklein; op. 123), a long composition full of the most romantic tenderness and delicacy, with all the finish of Meissonnier's pictures, and all his breadth and dignity. Also the 'Zwerg' (op. 22, No. 1), by Matthias von Collin, in which Schubert has immortalised the one brother, as Beethoven, in his overture to 'Coriolan,' did the other. This long, dramatic, and most pathetic ballad, which but few can hear unmoved, was written absolutely *à l'improviste*, without note or sketch, at the top of his speed, talking all the while to Randhartinger, who was waiting to take him out for a walk.⁵ Equal, if not superior, to these in merit, though of smaller dimensions, are 'Dass sie hier gewesen' (op. 59, No. 2); 'Du bist die Ruh' (do. No. 3); the Barcarolle, 'Auf dem Wasser zu singen' (op. 72), to which no nearer date than '1823' can be given. Below these again, though still fine songs, are 'Der zürnende Barde' (Feb.); 'Drang in die Ferne' (op. 71; March 25); 'Pilgerweise' (April); 'Vergissmeinnicht' (May). The fine Sonata in A minor for PF. solo, published as op. 143, is

dated Feb. 1823, and the sketch of a scena for tenor solo and chorus of men's voices with orchestra, dated May 1823. The latter was completed by Herbeck, and published in 1868 by Spina as 'Rüdiger's Heimkehr.'

Ten works (opp. 15-24) were published in 1823. The earliest was a collection of dances, viz., twelve Waltzes, nine Écossaises, and seventeen Ländler, op. 18, published Feb. 5; the PF. Fantasia, op. 15, followed on Feb. 24. The rest are songs, either solo—op. 20, April 10; op. 22, May 27; op. 23, August 4; op. 24, Oct. 7; op. 16, Oct. 9; op. 19, twenty-one (no dates)—or part-songs, op. 17, Oct. 9. With op. 20, the names of Sauer & Leidesdorf first occur as publishers.

The year 1824 began almost exclusively with instrumental compositions. An Introduction and Variations for PF. and flute (op. 160), on the 'Trockne Blumen' of the 'Schöne Müllerin,' are dated 'January,' and were followed by the famous Octet (op. 166), for clarinet, horn, bassoon, two violins, viola, violoncello, and contrabass, which is marked as begun in February, and finished on March 1. It was written—not, let us hope, without adequate remuneration, though that was probably the last thing of which its author thought—for Count F. von Troyer, chief officer of the household to the Archduke Rudolph, Beethoven's patron. In this beautiful composition Schubert indulges his love of extension. It contains, like Beethoven's Septet, eight movements; but, unlike the Septet, it occupies more than an hour in performance. But though long, no one can call it tedious.⁶ The Count played the clarinet, and must have been delighted with the expressive melody allotted to him in the Andante. The work was performed immediately after its composition, with Schuppanzigh, Weiss, and Linke, three of the famous Rasoumowsky quartet, amongst the players. His association with the members of this celebrated party may well have led Schubert to write string quartets; at any rate he himself tells us that he had written two before the 31st March,⁷ and these are doubtless those in E \flat and E (op. 125), since the only other quartet bearing the date of 1824—that in A minor—has so strong a Hungarian flavour as to point to his visit to Zseleß later in the year. How powerfully his thoughts were running at present on orchestral music is evident from the fact that he mentions both octet and quartets as studies for 'the Grand Symphony,'⁸ which was then his goal, though he did not reach it till eighteen months later.

A bitter disappointment, however, was awaiting him in the rejection of 'Fierrabras,' which,

¹ Produced at the Theatre an-der-Wien, Sept. 30, 1791.

² So says Wilhelm von Chery, the son of the librettist, who was on terms with Schubert. See his *Journal, Erinnerungen*, etc., 1863.

³ The autograph is dated 'Dec. 1823.'

⁴ It is hardly necessary to remind the reader that the two travellers were Sir George Grove and Sir Arthur Sullivan.]

⁸ 'In this manner I shall prepare the way to the Grand Symphony (zur grossen Sinfonie).' *Ibid.*

as already mentioned, was returned by Barbaja, ostensibly on account of the badness of its libretto. Two full-sized operas—this and ‘Alfonso und Estrella’—to be laid on the shelf without even a rehearsal! Whatever the cause, the blow must have been equally severe to our simple, genuine, composer, who had no doubt been expecting, not without reason, day by day for the last four months, to hear of the acceptance of his work. His picture of himself under this temporary eclipse of hope is mournful in the extreme, though natural enough to the easily depressed temperament of a man of genius. After speaking of himself as ‘the most unfortunate, most miserable being on earth,’ he goes on to say, ‘think of a man whose health can never be restored, and who from sheer despair makes matters worse instead of better. Think, I say, of a man whose brightest hopes have come to nothing, to whom love and friendship are but torture, and whose enthusiasm for the beautiful is fast vanishing; and ask yourself if such a man is not truly unhappy.’

My peace is gone, my heart is sore,
Gone for ever and evermore.

This is my daily cry; for every night I go to sleep hoping never again to wake, and every morning only brings back the torment of the day before. Thus joylessly and friendlessly would pass my days, if Schwind did not often look in, and give me a glimpse of the old happy times. . . . Your brother's opera—this is a letter to Kupelwieser the painter, and the allusion is to ‘Fierrabras’—‘turns out to be impracticable, and my music is therefore wasted. Castelli's “Verschworenen” has been set in Berlin by a composer there, and produced with success. Thus I have composed two operas for nothing.’ This sad mood, real enough at the moment, was only natural after such repulses. It was assisted, as Schubert's depression always was, by the absence of many of his friends, and also, as he himself confesses, by his acquaintance with Leidesdorf the publisher (in Beethoven's banter ‘Dorf des Leides,’ a very ‘village of sorrow’), whom he describes as a thoroughly good, trustworthy fellow, ‘but so very melancholy that I begin to fear I may have learnt too much from him in that direction.’ It must surely have been after an evening with this worthy that he made the touching entries in his journal which have been preserved; e.g. ‘Grief sharpens the understanding and strengthens the soul: Joy on the other hand seldom troubles itself about the one, and makes the other effeminate or frivolous.’ ‘My musical works are the product of my genius and my misery, and what the public most relish is that which has given me the greatest distress.’ Fortunately, in men of the genuine composer-temperament, the various moods of mind follow one another rapidly. As soon as they begin to compose the demon flies and heaven opens.

That gloomy document called ‘Beethoven's Will,’ to which even Schubert's most wretched letters must yield the palm, was written at the very time that he was pouring out the gay and healthy strains of his Second Symphony. Schubert left town with the Esterházy's in a few weeks after these distressing utterances, and for a time forgot his troubles in the distractions of country life in Hungary. At Zselézs he remained for six months, but his life there is almost entirely a blank to us. We can only estimate it by the compositions which are attributable to the period, and by the scanty information conveyed by his letters, which, though fuller of complaint than those of 1818, are even less communicative of facts and occurrences. To this visit is to be ascribed that noble composition known as the ‘Grand Duo’ (op. 140), though designated by himself as ‘Sonata for the PF. for four hands. Zselézs, June 1824’; a piece which, though recalling in one movement Beethoven's Second, and in another his Seventh Symphony, is yet full of the individuality of its author; a symphonic work in every sense of the word, which, through Joachim's instrumentation, has now become an orchestral symphony, and a very fine one. To Zselézs also are due the Sonata in B \flat (op. 30, May or June), the Variations in A \flat (op. 35, ‘middle of 1824’), two Waltzes (in op. 33, ‘1824, July’), and four Ländler (‘July, 1824,’ Nott. p. 215)—all for PF. four hands; other Waltzes and Ländler in the same collections for two hands; and the ‘Gebet’ of Lamotte Fouqué (op. 139a), signed ‘Sept. 1824, at Zselézs in Hungary’—all evidently arising from the necessity of providing music for the Count's family circle. The young Countesses were now nineteen and seventeen, and doubtless good performers, as is implied in the duet-form of the pianoforte works. We are probably right in also attributing the lovely String Quartet in A minor (op. 29), and the four-hand ‘Divertissement à la hongroise’ (op. 54), to this visit, at any rate to its immediate influence. Both are steeped in the Hungarian spirit, and the Divertissement contains a succession of real national tunes, one of which he heard from the lips of a maidservant as he passed the kitchen with Baron Schönstein in returning from a walk. For the Baron was at Zselézs on this as on the last occasion, and frequent and exquisite must have been the performances of the many fine songs which Schubert had written in the interval since his former visit.

The circumstances attending the composition of the vocal quartet (‘Gebet,’ op. 139) just mentioned are told by Kreisler, probably on the authority of Schönstein, and they give a good instance of Schubert's extraordinary facility. At breakfast one morning, in Sept. 1824, the Countess produced Lamotte Fouqué's poem, and proposed to Schubert to set it for the family

party. He withdrew after breakfast, taking the book with him, and in the evening, less than ten hours afterwards, it was tried through from the score at the piano. The next evening it was sung again, this time from separate parts, which Schubert had written out during the day. The piece is composed for quartet, with solos for Mme. Esterhazy, Marie, Schonstein, and the Count, and contains 209 bars. A MS. letter of Ferdinand's,¹ dated July 3, full of that strong half-reverential affection which was Ferdinand's habitual attitude towards his gifted brother, and of curious details, mentions having sent him Bach's fugues (never-cloying food of great composers), and an opera-book, 'Der kurze Mantel.' Strange fascination of the stage, which thus, in despite of so many failures, could keep him still enthralled!

The country air of the Hungarian mountains, and no doubt the sound and healthy living and early hours of the château, restored Schubert's health completely, and in a letter of Sept. 21 to Schober he says that for five months he had been well. But he felt his isolation and the want of congenial Vienna society keenly; speaks with regret of having been 'enticed' into a second visit to Hungary, and complains of not having a single person near to whom he could say a sensible word. How different from the exuberant happiness of the visits to Steyr and St. Pölten, when every one he met was a demonstrative admirer, and every evening brought a fresh triumph!

Now, if ever, was the date of his tender feeling for his pupil Caroline Esterhazy, which his biographers have probably much exaggerated. She was seventeen at the time, and Bauernfeld represents her as the object of an ideal devotion, which soothed, comforted, and inspirited Schubert to the end of his life. Ideal it can only have been, considering the etiquette of the time, and the wide distance between the stations of the two; and the only occasion on which Schubert is ever alleged to have approached anything like a revelation of his feelings, is that told by Kreissle—on what authority he does not say, and it is hard to conceive—when on her jokingly reproaching him for not having dedicated anything to her, he replied, 'Why should I? everything I ever did is dedicated to you.' True, the fine Fantasia in F minor, published in the March following his death as op. 103, is dedicated to her 'by Franz Schubert,' a step which the publishers would hardly have ventured upon unless the MS.—probably handed to them before his death—had been so inscribed by himself. But it is difficult to reconcile the complaints of isolation and neglect already quoted from his letter to Schober with the existence of a passion which must have been fed every time he met his pupil or sat down to the

piano with her. We must be content to leave each reader to decide the question for himself.

Vocal composition he laid aside almost entirely in 1824. The only songs which we can ascertain to belong to it are four—the fine though gloomy ones called 'Auflösung,' and 'Abendstern,' both by Mayrhofer; another evening song 'Im Abendroth' by Lappe, all three in March; and the bass song, 'Lied eines Kriegers,' with which he closed the last day of the year.² Of part-songs there are two, both for men's voices; one a 'Salve regina,' written in April, before leaving town; and the other, the 'Gondelfahrer,' or Gondolier, a very fine and picturesque composition, of which Lablache is said to have been so fond that he encored it on first hearing, and himself sang in the encore (Spaun).—A Sonata for PF. and Arpeggione, in A minor, dated Nov. 1824, was probably one of his first compositions after returning to town.³

The publications of 1824 embrace opp. 25 to 28 inclusive, all issued by Saner & Leidesdorf. Op. 25 is the 'Schöne Müllerin,' 20 songs in five numbers, published March 25; op. 26 is the vocal music in 'Rosamunde,'⁴ the romance and three choruses; op. 27, three fine 'heroic marches,' for PF. four hands; op. 28, 'Der Gondelfahrer,' for four men's voices and PF., August 12.

1825 was a happy year to our hero—happy and productive. He was back again in his dear Vienna, and exchanged the isolation of Zselézs for the old familiar life, with his congenial friends Vogl, Schwind, Jenger, Mayrhofer, etc. (Schober was in Prussia, and Kupelwieser still at Rome), in whose applause and sympathy and genial conviviality he rapidly forgot the disappointments and depression that had troubled him in the autumn. Sofie Müller, one of the great actresses of that day, evidently a very accomplished, cultivated woman, was then in Vienna, and during February and March her house was the resort of Schubert, Jenger, and Vogl, who sang or listened to her singing of his best and newest Lieder,—she herself sang the 'Junge Nonne' at sight on March 3—and lived a pleasant and thoroughly artistic life.⁵ Others, which she mentions as new, and which indeed had their birth at this time are 'Der Einsame,' and 'Ihr Grab.' The 'new songs from the Pirate,' which she heard on March 1, may have been some from the 'Lady of the Lake,' or 'Norna's song,' or even 'Anna Lyle,' usually placed two years later. Schubert published some important works early in this year—the Overture in F for four hands (op. 34); also the Sonata in B \flat (op. 30), and the Variations in A \flat (op. 35), both for four hands; and the

² The autograph, so dated, belongs to Mr. C. J. Hargitt, London.

³ Gotthard, 1871. Autograph in Musikverein.

⁴ Besides the vocal music, the overture was published about 1828,

and the Entr'actes and Ballet music in 1866.

⁵ See her interesting Journal, in her *Leben und nachgelassene Papiere* herausg. von Johann Grafen Majláth (Vienna, 1832).

¹ For which I again gladly acknowledge the kindness of Frl. Caroline Geisler-Schubert, Schubert's grandniece.

String Quartet in A minor (op. 29)—fruits of his sojourn in Hungary. The last of these, the only quartet he was destined to publish during his life, is dedicated 'to his friend I. Schuppanzigh,' a pleasant memorial of the acquaintance cemented by the performance of the octet, a twelvemonth before. And as on such publications some amount of money passes from the publisher to the composer, this fact of itself would contribute to enliven and inspirit him. In addition to these instrumental works some noble songs were issued in the early part of 1825—'Die zürnende Diana,' and the 'Nachtstück,' of Mayrhofer; 'Der Pilgrim' and 'Der Alpenjäger,' of Schiller; and Zuleika's second song. The two beautiful solo sonatas in A minor and in C—the latter of which he never succeeded in completely writing out, but the fragment of which is of first-rate quality—also date from this time.

As if to revenge himself for his sufferings at the Esterhazys, he planned an extensive tour for this summer, in his favourite district, and in the company of his favourite friend. Vogl, on March 31, started for his home at Steyr. Schubert¹ soon followed him, and the next five months, to the end of October, were passed in a delightful mixture of music, friends, fine scenery, lovely weather, and absolute ease and comfort, in Upper Austria and the Salzkammergut, partly amongst the good people who had welcomed him so warmly in 1819, partly among new friends and new enthusiasm. Taking Steyr as their *point d'appui* they made excursions to Linz, Steyrreck, Gmunden, Salzburg, and even as far as Gastein, etc., heartily enjoying the glorious scenery by day, received everywhere on arrival with open arms, and making the best possible impression with their joint performances. The songs from 'The Lady of the Lake' were either composed before starting or on the road. At any rate they formed the chief programme during the excursion. If the whole seven were sung or not is uncertain;² but Schubert particularly mentions the 'Ave Maria,' apropos of which he makes an interesting revelation. 'My new songs,' says he, 'from Walter Scott's "Lady of the Lake," have been very successful. People were greatly astonished at the devotion which I have thrown into the Hymn to the Blessed Virgin, and it seems to have seized and impressed everybody. I think that the reason of this is that I never force myself into devotion, or compose hymns or prayers unless I am really overpowered by the feeling; that alone is real, true devotion.' It is during this journey, at Salzburg, that he makes the remark, already noticed, as to the performance of Vogl and himself. At Salzburg too, it was the 'Ave Maria' that so riveted his hearers. 'We produced our seven pieces

before a select circle, and all were much impressed, especially by the Ave Maria, which I mentioned in my former letter. The way in which Vogl sings and I accompany, so that for the moment we seem to be one, is something quite new and unexpected to these good people.' Schubert sometimes performed alone. He had brought some variations and marches for four hands with him, and finding a good player at the convents of Florian and Kremsmünster, had made a great effect with them. But he was especially successful with the lovely variations from the solo Sonata in A minor (op. 42); and here again he lets us into his secret. 'There I played alone, and not without success, for I was assured that the keys under my hands sang like voices, which if true makes me very glad, because I cannot abide that accursed thumping, which even eminent players adopt, but which delights neither my ears nor my judgment.' He found his compositions well known throughout Upper Austria. The gentry fought for the honour of receiving him, and to this day old people are found to talk with equal enthusiasm of his lovely music, and of the unaffected gaiety and simplicity of his ways and manners.

The main feature of the tour was the excursion to Gastein in the mountains of East Tyrol. To Schubert this was new ground, and the delight in the scenery which animates his description is obvious. They reached it about August 18, and appear to have remained three or four weeks, returning to Gmunden about Sept. 10. At Gastein, among other good people, he found his old ally Ladislaus Pyrker, Patriarch of Venice, and composed two songs to his poetry, 'Heimweh' and 'Allmacht' (op. 79). But the great work of this date was the 'Grand Symphony' which had been before him for so long. We found him eighteen months ago writing quartets and the octet as preparation for it, and an allusion in a letter³ of Schwind's shows that at the beginning of August he spoke of the thing as virtually done. That it was actually put on to paper at Gastein at this date we know from the testimony of Bauernfeld,⁴ who also informs us that it was a special favourite with its composer. Seven songs in all are dated in this autumn, amongst them two fine scenes from a play by W. von Schütz called 'Lacrimas' (op. 124), not so well known as they deserve.

The letters of this tour, though not all preserved, are unusually numerous for one who so much disliked writing. One long one to his father and mother; another, much longer, to Ferdinand; a third to Spaun, and a fourth to Bauernfeld, are printed by Kreissle, and contain passages of real interest, showing how keenly he observed and how thoroughly he enjoyed nature, and displaying throughout a vein of

¹ For the dates of the early part of the tour, see K. II. 21.

² Schubert speaks of them as 'unsere sieben Söhen' (letter to Ferdinand, Kreissle, p. 363); but Nos. 3 and 4 are for chorus.

³ K. II. p. 336 (ll. 43). 'To your Symphony we are looking forward eagerly,' implying that Schubert had mentioned it in a former letter.

⁴ W.Z.K., June 9-13, 1829.

good sense and even practical sagacity,¹ and a facility of expression, which are rare in him.

At length the summer and the money came to an end, Vogl went off to Italy for his gout, and Schubert, meeting Gahy at Linz, returned with him and the MS. Symphony to Vienna in an *Einspänner*, to find Schober and Kupelwieser both once more settled there. The first thing to be done was to replenish his purse, and this he soon did by the sale of the seven songs from 'The Lady of the Lake,' which he disposed of on Oct. 29 to Artaria, for 200 silver gulden—just £20! Twenty pounds, however, were a mine of wealth to Schubert; and even after repaying the money which had been advanced by his father, and by Bauernfeld for the rent of the lodgings during his absence, he would still have a few pounds in hand.

During Schubert's absence in the country his old friend Salieri died, and was succeeded by Eybler. The Court organist also fell ill, and Schwind wrote urging him to look after the post; but Schubert made no sign, and evidently did nothing in the matter, though the organist died on Nov. 19. He obviously knew much better than his friends that he was absolutely unfit for any post requiring punctuality or restraint. In the course of this year he was made 'Ersatzmann,' or substitute—whatever that may mean—by the Musikverein, or Gesellschaft der Musikfreunde. Of what happened from this time till the close of 1825 we have no certain information. He set two songs by Schulze in December; and it is probable that the Piano Sonata in D (op. 53), and the noble funeral march for the Emperor of Russia (op. 55), whose death was known in Vienna on Dec. 14, both belong to that month. What gave him his interest in the death of Alexander is not known, but the march is an extraordinarily fine specimen. A piece for the Piano in F, serving as accompaniment to a recitation from a poem by Pratohevera, a series of graceful modulations in arpeggio form, also dates from this year.²

The compositions of 1825 may be here summed up:—Sonata for PF. solo in A minor (op. 42); ditto in D (op. 53); ditto in A (op. 120); unfinished ditto in C ('Reliquie,' Nott. p. 211); a funeral march, four hands, for the Emperor Alexander of Russia (op. 55). Songs—'Des Sängers Habe,' by Schlechta, and 'Im Walde,' by E. Schulze; seven from 'The Lady of the Lake' (op. 52); another from Scott's 'Pirate';³ 'Auf der Bruck,' by Schulze; 'Fülle der Liebe,' by Schlegel; 'Allmacht' and 'Heimweh,' by Pyrker; two scenes from 'Lacrimas,' by W. von Schütz; and 'Abendlied für die Entfernte,' by A. W. Schlegel; 'Die junge

Nonne,' 'Todtengräbers Heimweh,' and 'Der blinde Knabe,' all by Craigher; 'Der Einsame,' by Lappe; and, in December, 'An mein Herz' and 'Der liebliche Stern,' both by Ernst Schulze. It is also more than probable that the string quartet in D minor was at least begun before the end of the year.

The publications of 1825 are:—In January, opp. 32, 30, 34; Feb. 11, opp. 36 and 37; May 9, op. 38; July 25, op. 43; August 12, op. 31; and, without note of date, opp. 29 and 33. Op. 29 is the lovely A minor Quartet; and it is worthy of note that it is published as the first of 'Trois quatuors.' This was never carried out. The two others were written, as we have already seen (p. 301*b*), but they remained unpublished till after the death of their author.

1826 was hardly eventful in any sense of the word, though by no means unimportant in Schubert's history. It seems to have been passed entirely in Vienna. He contemplated a trip to Linz with Spaun and Schwind, but it did not come off. The weather of this spring was extraordinarily bad, and during April and May he composed nothing.⁴ The music attributable to 1826 is, however, of first-rate quality. The String Quartet in D minor, by common consent placed at the head of Schubert's music of this class, was first played on Jan. 29, and was therefore doubtless only just completed.⁵ That in G (op. 161), Schubert himself has dated as being written in ten days (June 20 to June 30), a work teeming with fresh vigour after the inaction of the preceding two months as full of melody, spirit, romance, variety, and individuality, as anything he ever penned, and only prevented from taking the same high position as the preceding, by its great length—due to the diffuseness which Schubert would no doubt have remedied had he given himself time to do so. One little point may be mentioned *en passant* in both these noble works—the evidence they afford of his lingering fondness for the past. In the D minor Quartet he goes back for the subject and feeling of the *Andante* to a song of his own of 1816, and the Finale of the G major is curiously tinged with reminiscences of the Rossini-fever of 1819.

The 'Rondeau brillant' in B minor for PF. and violin (op. 70), now such a favourite in the concert-room, also belongs to this year, though it cannot be precisely dated; and so does a piece of still higher quality, which is pronounced by Schumann to be its author's 'most perfect work both in form and conception,' the Sonata in G major for PF. solo, op. 78, usually called the 'Fantasia,' owing to a freak of the publisher's. The autograph is inscribed, in the hand of its

¹ See his shrewd reasons for not at once accepting Bauernfeld's proposition that he, Schwind and Schubert, should all live together. *K.H.* p. 370 (li. 57). Also the whole letter to Spaun.

² Printed by Reissmann in his book.

³ So says Sofie Müller (under date of March 1); but perhaps it was her mistake for Norman's song in 'The Lady of the Lake.'

⁴ See his letter to Bauernfeld and Mayrhofer, in *Die Presse*, April 21, 1869.

⁵ *K.H.* p. 391 (li. 77). The finale was voted too long, to which Schubert, after a few minutes' consideration, agreed, and 'at once cut out a good part.' (Hauer's information.) The autograph has disappeared.

author, 'IV. Sonate für Pianoforte allein. Oct. 1826, Franz Schubert'; above which, in the writing of Tobias Haslinger, stands the title 'Fantasie, Andante, Menuetto und Allegretto.'¹ We may well say with Beethoven, 'O Tobias!'

By the side of these undying productions the 'Marche héroïque,' written to celebrate the accession of Nicholas I. of Russia, and the Andantino and Rondo on French *motifs*—both for PF. four hands, are not of great significance.

An attack of song-writing seems to have come upon him in March, which date we find attached to six songs; or, if the rest of those to Seidl's words forming opp. 105 and '80, and marked merely '1826,' were written at the same time (as, from Schubert's habit of eviscerating his books, they not improbably were)—twelve. Three Shakespeare songs are due to this July—'Hark! bark! the lark,'² from 'Cymbeline'; 'Who is Sylvia?' from the 'Two Gentlemen of Verona'; and the Drinking-song in 'Antony and Cleopatra'—the first two perhaps as popular as any single songs of Schubert's. The circumstances of the composition, or rather creation, of the first of these has already been mentioned (p. 288a). The fact of three songs from the same volume belonging to one month (not improbably to one day, if we only knew) is quite *à la Schubert*.—A beautiful and most characteristic piece of this year is the 'Nachtelle' or 'Lovely night'), written to words of Seidl's—not improbably for the Musikverein, through Anna Fröhlich—for tenor solo, with accompaniment of four men's voices and pianoforte, which would be a treasure to singing societies, for its truly romantic loveliness, but for the inordinate height to which the voices are taken, and the great difficulty of executing it with sufficient delicacy. A song called 'Echo' (op. 130), probably written in 1826, was intended to be the first of six 'humorous songs' for Weigl's firm.³

We hear nothing of the new symphony during the early part of this year. No doubt it was often played from the MS. score at the meetings of the Schubert set, but they say no more about it than they do of the Octet, or Quartets, or Sonatas, which were all equally in existence; and for aught we know it might have been 'locked in a drawer,' which was often Schubert's custom after completing a work—'locked in a drawer and never thought about again.'⁴ It was, however, destined to a different fate. On Sept. 9, 1826, at one of the first meetings of the Board of the Musikverein after the summer recess, Hofrath Kieselwetter reports that Schubert desires to dedicate a symphony to the Society; upon which the sum of 100 silver

florins (£10) is voted to him, not in payment for the work, but as a token of sympathy, and as an encouragement. The letter conveying the money is dated the 12th, and on or even before its receipt Schubert brought the manuscript and deposited it with the Society. His letter accompanying it may here be quoted:—

'To the Committee of the Austrian Musical Society.—Convinced of the noble desire of the Society to give its best support to every effort in the cause of art, I venture, as a native artist, to dedicate this my Symphony to the Society, and most respectfully to recommend myself to its protection. With the highest esteem. Your obedient,

FRANZ SCHUBERT.

In accordance with this, the MS. probably bears his formal dedication to the Verein, and we may expect to find that though so long talked of, it bears marks of having been written down as rapidly as most of his other productions.⁶ At present, however, all trace of it is gone; not even its key is known. There is no entry of it in the catalogue of the Society's Library, and except for the minute and letter given above, and the positive statements of Bauernfeld quoted below,⁶ it might as well be non-existent. That it is an entirely distinct work from that in C, written two and a half years later, can hardly admit of a doubt.

Of the publications of 1826, the most remarkable are the seven songs from 'The Lady of the Lake,' for which Artaria had paid him 200 florins in the preceding October, and which appeared on the 5th of this April, in two parts, as op. 52. They were succeeded immediately, on April 8, by the PF. Sonata in D (op. 53), and the 'Divertissement à la hongroise' (op. 54), both issued by the same firm. For these two splendid works Schubert received from the penurious Artaria only 300 Vienna florins, equal to £12. Songs issued fast from the press at

⁵ The documents on which these statements are based are given by Herr G. F. Pohl in his *History of the Gesellschaft der Musikfreunde*—or Musikverein—Vienna, 1871, p. 18; and by Ferdinand Schubert in the *Neue Zeitschrift für Musik*, for April 30, 1889, p. 140.

⁶ Bauernfeld, in an article *Ueber Franz Schubert* in the *Wiener Zeitschrift für Kunst, Literatur, Theater, und Mode*, for 9, 11, 13 June, 1829 (Nos. 69, 70, 71), says as follows:—'To the larger works of his later years also belongs a Symphony written in 1825 at Gastein, for which its author had an especial predilection. . . . At a great concert given by the Musik Verein shortly after his death a Symphony in C was performed, which was composed as early as 1817 [1818], and which he considered as one of his less successful works. . . . Perhaps the Society intends at some future time to make us acquainted with one of the later symphonies, possibly the Gastein one already mentioned.' [N.B. The two movements of the B minor Symphony (1822) were not at this time known, as that by 'later symphonies' Bauernfeld must surely intend the two of 1825 and 1826.] At the end of the article he gives a 'chronological list of Schubert's principal works not yet generally known.' Amongst these are '1825, Grand Symphony.' . . . '1828, Last Symphony'—'Grand' (*grosse*) being the word used by Schubert himself in his letter to Kupelwieser referred to above (p. 301a). It is plain, therefore, that at this time, seven months after Schubert's death, the Gastein Symphony of 1825, and that in C major of 1828, were known as distinct works. The present writer has collected the evidence for the existence of the Symphony in a letter to the London *Athenaeum* of Nov. 19, 1881.

[This note is taken from Sir George Grove wrote it. But the existence of the Gastein Symphony rests at present on very imperfect evidence. There is no mention of it in Ferdinand Schubert's catalogue, or in Kreisler von Hellborn's biography, or in the testimony of any one who claims to have seen the score. The symphony accepted by the Gesellschaft der Musikfreunde and performed by them in the year of Schubert's death is the C major, written in 1818 and incorrectly dated, in a Gesellschaft programme, 1825. No copy of the work in question has revealed itself to the most careful research. It is probable that the so-called Gastein Symphony is Schubert's 'No. 8,' possibly roughed during the holiday of 1825, and offered to the Gesellschaft in the following year.]

¹ See an interesting letter from Ernst Peraho, the owner of the MS., with an extract from the Andante, in the *Monthly Musical Record* for April 1888.

² Entitled 'Berouade,' but more accurately an 'Aubade.'

³ See Notabach's *Catalogue* under op. 130.

⁴ Tachner's expression to my friend Mr. C. A. Barry in 1881.

this date; for on the 6th of April we find op. 56 (three songs) announced by Pennauer, and opp. 57 and 58 (each three songs) by Weigl; on June 10, op. 60 ('Greisengesang' and 'Dithyrambe') by Cappi and Czerny; in Sept. op. 59 (four songs, including 'Dass sie hier gewesen,' 'Du bist die Ruh,' and 'Lachen und Weinen') by Leidesdorf; and op. 64 (three part-songs for men's voices) by Pennauer; and on Nov. 24, op. 65 (three songs) by Cappi and Czerny. Some of these were composed as early as 1814, 1815, 1816; others again in 1820, 1822, and 1823. The Mass in C (op. 48), and three early pieces of church music, 'Tantum ergo' (op. 45), 'Totus in corde' (op. 46), and 'Salve Regina' (op. 47), were all issued in this year by Diabelli. Of dances and marches for piano there are eight numbers:—a Galop and eight Écossaises (op. 49); thirty-four Valses sentimentales (op. 50); 'Hommage aux belles Viennoises' (sixteen Ländler and two Écossaises, op. 67); three Marches (four hands, op. 51)—all published by Diabelli; the two Russian Marches (opp. 55, 56), by Pennauer; six Polonaises (op. 61), Cappi and Czerny; and a Divertissement, or 'Marche brillante et raisonnée,' on French motifs (op. 63), Weigl. In all, twenty-two publications, divided among six publishers, and containing 106 works.

We have been thus particular to name the numbers and publishers of these works, because they show conclusively how much Schubert's music was coming into demand. Pennauer and Leidesdorf were his personal friends, and may possibly have printed his pieces from chivalrous motives; but no one can suspect hard and experienced men of business like Diabelli and Artaria of publishing the music of any one at their own risk unless they believed that there was a demand for it. The list is a remarkable one, and will compare for extent and variety with that of most years of Beethoven's life. And even at the incredibly low prices¹ which his publishers gave for the exclusive copyright of his works, there is enough in the above to produce an income sufficient for Schubert's wants. But the fact is that he was mixed up with a set of young fellows who regarded him as a Cræsus,² and who virtually lived upon his carelessness and good-nature, under the guise of keeping house in common. Bauernfeld, in an article in the *Vienna Presse* of April 17, 1869, has given us the account with some *naïveté*. A league or partnership was made between himself, Schwind the painter, and Schubert. They had nominally

their own lodgings, but often slept all together in the room of one. The affection between them was extraordinary. Schubert used to call Schwind 'seine Geliebte'—his *innamorata*! A kind of common property was established in clothes and money; hats, coats, boots, and cravats were worn in common, and the one who was in cash paid the score of the others. As Schwind and Bauernfeld were considerably younger than Schubert, that duty naturally fell on him. When he had sold a piece of music he seemed to this happy trio to 'swim in money,' which was then spent 'right and left' in the most reckless manner, till it was all gone, and the period of reverse came. Under these circumstances life was a series of fluctuations, in which the party were never rich, and often very poor. On one occasion Bauernfeld and Schubert met in a coffee-house near the Kärnthnerthor theatre, and each detected the other in ordering a *mélange* (*café au lait*) and biscuits, because neither had the money to pay for dinner. And this in Schubert's twenty-ninth year, when he had already written immortal works quite sufficient to make a good livelihood! Outside the circle of this trio were a number of other young people, artists and literary men, Schober, Jenger, Kupelwieser, etc., attracted by Schubert's genius, good-nature, and love of fun, and all more or less profiting by the generosity of one who never knew what it was to deny a friend. The evenings of this jolly company were usually passed in the Gasthaus, and then they would wander about, till daybreak drove them to their several quarters, or to the room of one of the party. It would be absurd to judge Vienna manners from an English point of view. The Gasthaus took the place of a modern club, and the drink consumed probably did not much exceed that which some distinguished Vienna artists now imbibe night after night, and does not imply the excess that it would infallibly lead to in a Northern climate; but it must be obvious that few constitutions could stand such racket, and that the exertion of thus trying his strength by night and his brain by day, must have been more than any frame could stand. In fact his health did not stand the wear and tear. We have seen that in February 1823, he could not leave the house; that in the summer of the same year he was confined to the hospital; that in March 1824, he speaks of his health as irrecoverably gone; and the dedication of the six four-hand Marches, op. 40, to his friend Bernhardt, doctor of medicine, 'as a token of gratitude,' is strong evidence that in 1826, the year of their publication, he had had another severe attack.

It was probably a sense of the precarious nature of such a life that led some of his friends in the autumn of 1826 to urge Schubert to stand for the post of Vice-capellmeister in the Imperial Court, vacant by the promotion of Eybler to that

¹ It is said by Schindler that the prices agreed on with him were ten Vienna gulden per Heft of songs, and twelve per pianoforte piece. (The Vienna gulden was then worth just one franc. 'Heft' meant then a single song, not a 'Part' of two or three. This is conclusively proved by Ferdinand Schubert's letter of 1824.) These prices were not adhered to. Thus for the seven 'Lady of the Lake' songs he had 500 paper gulden = £20, or nearly £3 per song. Even that is low enough. On the other hand F. Lachner told Mr. Barry that in the last year of Schubert's life, he took half-a-dozen of the 'Winterreise' songs to Haslinger at Schubert's request, and brought back one gulden a piece (= 10d.) for them!

² The expression is Bauernfeld's.

of principal capellmeister; but the application, like every other of the same kind made by him, was a failure, and the place was given to Joseph Weigl by the Imperial decree of Jan. 27, 1827.

Another opportunity of acquiring a fixed income was opened to him during the same autumn, by the removal of Karl August Krebs from the conductorship of the Court theatre to Hamburg. Vogl interested Duport, the administrator of the theatre, in his friend, and the appointment was made to depend on Schubert's success in composing some scenes for the stage. Madame Schechner, for whom the principal part was intended, a young débutante who was making her first appearance in Vienna, objected at the pianoforte rehearsals to some passages in her air, but could not induce the composer to alter them. The same thing happened at the first orchestral rehearsal, when it also became evident that the accompaniments were too noisy for the voice. Still Schubert was immovable. At the full-band rehearsal Schechner fairly broke down, and refused to sing any more. Duport then stepped forward, and formally requested Schubert to alter the music before the next meeting. This he refused to do; but taking the same course as Beethoven had done on a similar occasion, said loudly, 'I will alter nothing,' took up his score and left the house. After this the question of the conductorship was at an end. Schubert's behaviour in this matter has been strongly censured, but we do not see much in it. Such questions will always depend on the temperament of the composer. Had it been either Mozart or Mendelssohn we cannot doubt that all would have gone smoothly; the prima donna would not only not have been ruffled, but would have felt herself complimented, and the music would have been so altered as to meet every one's wish, and yet sound as well as before. On the other hand, had it been Beethoven or Schumann we may be equally sure that not a note would have been changed, and that everything would have ended in confusion. With all Schubert's good-nature, when his music was concerned he was of the same mind as Beethoven and Schumann. There are other instances of the same stubbornness, which will be noticed later.

Some set-off to these disappointments was afforded by the ready way in which his *Gastein* Symphony was received by the Musikverein, and the sympathetic resolution and prompt donation which accompanied its acceptance, although no attempt to perform or even rehearse it can now be traced. The beautiful 'Nacht-helle,' already referred to, which he composed in September, was rehearsed during the early winter months, and performed by the Society on Jan. 25, 1827.

Some little gratification also he not improbably derived from the letters which during this year he began to receive from publishers in the north. Probst of Leipzig—one of Beethoven's publishers,

predecessor of the present firm of Senff—was the first to write. His letter is dated August 26, and is followed by one from Breitkopf & Härtel of Sept. 7. True, neither are very encouraging. Probst speaks of his music as too often 'peculiar and odd,' and 'not intelligible or satisfactory to the public'; and begs him to write so as to be easily understood; while Breitkopf stipulates that the only remuneration at first shall be some copies of the works. Still, even with this poor present result, the fact was obvious that he had begun to attract attention outside of Austria.

As to Schubert's life in the early part of 1827 we have little to guide us beyond the scanty inferences to be drawn from the dated compositions. The first of these of any moment are eight Variations (the eighth very much extended) on a theme in Herold's opera 'Marie,' for PF. four hands (op. 82). 'Marie' was produced on the Vienna boards Jan. 18, 1827; and Schubert's Variations are dated 'February,' and are dedicated to one of his friends in Upper Austria, Prof. Cajetan Neuhaus of Linz. The next and still more important work is the first half of the 'Winterreise,' twelve songs ('Gute Nacht' to 'Einsamkeit'), marked as begun in Feb. 1827. Franz Lachner remembers that 'half a dozen' of them were written in one morning, and that Haslinger gave a gulden (that is a franc) apiece for them. The poems which form the basis of this work are by Wilhelm Müller, the poet of the 'Schöne Müllerin,' which the Winterreise closely approaches in popularity, and which it would probably equal if the maiden of the Winter-walk were as definite a creation as the miller's daughter is. They are twenty-four in all, and appear under their now immortal name in the second volume of the work of which vol. i. contained the 'Schöne Müllerin,' and which has the quaint title already quoted (p. 300a).¹ The second volume was published at Dessau in 1824, and did not at once attract Schubert's notice. When it did, he made short work of it. Another important composition of this month (dated Feb. 28) is the *Schlachtlied* (battle-song) of Klopstock, set for two choirs of male voices, sometimes answering, sometimes in eight real parts, of immense force and vigour, and marked by that dogged adherence to rhythm so characteristic of Schubert.

He can scarcely have finished with this before the news that Beethoven was in danger spread through Vienna. The great musician got back to his rooms in the Schwarzschanerhaus from his fatal expedition to Gneixendorf in the first week of December, became very ill, and during January was tapped for the dropsy three times. Then Malfatti was called in, and there was a slight improvement. During this he was allowed to read, and it was then that Schindler, a zealous

¹ The order of the songs is much changed in the music.

Schubert-propagandist, took the opportunity to put some of Schubert's songs into his hands.¹ He made a selection of about sixty, in print and MS., including 'Iphigenie,' 'Grenzen der Menschheit,' 'Allmacht,' 'Die junge Nonne,'² 'Viola,' the 'Müllerlieder,' etc. Beethoven up to this time probably did not know half-a-dozen of Schubert's compositions, and his astonishment was extreme, especially when he heard that there existed at least 500 of the same kind. 'How can he find time,' said he, 'to set such long poems, many of them containing ten others?' i.e. as long as ten separate ones; and said over and over again, 'If I had had this poem I would have set it myself'; 'Truly Schubert has the divine fire in him.' He pored over them for days, and asked to see Schubert's operas and P.F. pieces, but the illness returned and it was too late. But from this time till his death he spoke often of Schubert, regretting that he had not sooner known his worth, and prophesying that he would make much stir in the world.³ Schubert was sure to hear of these gratifying utterances, and they would naturally increase his desire to come into close contact with the master whom he had long worshipped at a distance. It is possible that this emboldened him to visit the dying man. He seems to have gone twice; first with Anselm Hüttenbrenner and Schindler. Schindler told Beethoven that they were there, and asked whom he would see first. 'Schubert may come in first' was the answer. At this visit perhaps, if ever, it was that he said, in his affectionate way, 'You, Anselm, have my mind (*Geist*), but Franz has my soul (*Seele*).'⁴ The second time he went with Josef Hüttenbrenner and Teltcher the painter. They stood round the bed. Beethoven was aware of their presence, and fixing his eyes on them, made some signs with his hand. No one, however, could explain what was meant, and no words passed on either side. Schubert left the room overcome with emotion. In about three weeks came the end, and then the funeral. Schubert was one of the torch-bearers. Franz Lachner and Randhartinger walked with him to and from the Cemetery. The way back lay by the Himmelpfortgrund, and close by the humble house in which he had drawn his first breath. They walked on into the town, and stopped at the 'Mehlgrube,' a tavern in the Kärnthnerthorstrasse, now the Hotel Munsch. There they called for wine, and Schubert drank off two glasses, one to the memory of Beethoven, the other to the first of the three friends who should follow him. It was destined to be himself.

¹ Schindler, *Beethoven*, ii. 136.

² Schindler's list of the songs perused by Beethoven differs in his two accounts. Compare his *Beethoven*, ii. 136, with *K.H.* p. 264 (i. 266).

³ Schindler, in *Bücherle's Theaterzeitung* (Vienna), May 3, 1831.

⁴ See von Leitner, *Anselm Hüttenbrenner*, Graz, 1868, p. 5. The story has an apocryphal air, but Hüttenbrenner was so thoroughly trustworthy, that it is difficult to reject it. At any rate, Beethoven is not likely to have thus expressed himself before he had made acquaintance with Schubert's music.

Lablache was also one of the torch-bearers at the funeral. This and the part which he took in the Requiem for Beethoven [vol. i. p. 260 b] may have induced Schubert to write for him the 'three Italian Songs for a Bass voice,' which form op. 83, and are dedicated to the great Italian basso.

Hummel and Hiller were in Vienna during March 1827, and Hiller describes meeting Schubert and Vogl at Madame Lacsny-Buchwieser's, and his astonishment at their joint performance. 'Schubert,' says Hiller,⁵ 'had little technique, and Vogl but little voice; but they had both so much life and feeling, and went so thoroughly into the thing, that it would be impossible to render these wonderful compositions more clearly and more splendidly. Voice and piano became as nothing; the music seemed to want no material help, but the melodies appealed to the ear as a vision does to the eye.' Not only did the boy think it the deepest musical impression he had ever received, but the tears coursed down the cheeks even of the veteran Hummel. Either then or a few evenings afterwards, Hummel showed his appreciation by extemporising on Schubert's 'Blinde Knabe,' which Vogl had just sung—to Franz's delight.

In April Schubert wrote the beautiful 'Nachtgesang im Walde' (op. 139b) for four men's voices and four horns; and a 'Spring Song,' also for men's voices. In July we have the very fine and characteristic serenade 'Zögernd leise' (op. 135) for alto solo and female voices, a worthy pendant to the 'Nachthelle,' and written almost *à l'improviste*.⁶ A fête was to be held for the birthday of a young lady of Döbling. Grillparzer had written some verses for the occasion, and Schubert, who was constantly in and out of the Fröhlich's house, was asked by Anna to set them for her sister Josephine and her pupils. He took the lines, went aside into the window, pushed up his spectacles on to his brow, and then, with the paper close to his face, read them carefully twice through. It was enough: 'I have it,' said he, 'it's done, and will go famously.' A day or two afterwards he brought the score, but he had employed a male chorus instead of a female one, and had to take it away and transpose it. It was sung in the garden by moonlight, to the delight of every one, the villagers thronging round the gate. He alone was absent.

1827 witnessed another attempt at an opera—the 'Graf von Gleichen,' written by Bauernfeld, apparently in concurrence⁷ with Mayrhofer. Schubert had the libretto in August 1826, submitted it to the management of the Royal Opera-house, and arranged with Grillparzer, in case the Censure should cause its rejection, to

⁵ *Künstlerleben* (1880), p. 49.

⁶ *K.H.* p. 474 (ii. 160).

⁷ See Schubert's letter [May 1826] with Bauernfeld's statements, in the *Presse* of April 21, 1869, and *Signale*, Nov. 1868.

have it accepted by the Königstadt Theatre. Owing possibly to the delay of the Censure it was nearly a year before he could begin the composition. The MS. sketch, now in Herr Dumba's collection, is dated at the beginning '17 Juni 1827.' The opera is sketched throughout, and he played portions of it to Bauernfeld. Forty years later the sketch came into the hands of Herbeck, and he began to score it after Schubert's indications—of which there are plenty—but was prevented by death.

A correspondence had been going on for long between the Schubert circle at Vienna and the Pachler family in Graz, the capital of Styria, as to an expedition thither by Schubert, and at length it was arranged for the autumn of this year. Carl Pachler was one of those cultivated men of business who are such an honour to Germany; an advocate, and at the head of his profession, yet not ashamed to be an enthusiastic lover of music and musicians, and proud to have them at his house and to admit them to his intimate friendship. Amongst his circle was Anselm Hüttenbrenner, the brother of Schubert's friend Josef, himself an earnest admirer of Franz, whose last visit to Vienna had been to close the eyes of his old friend Beethoven. The house was open to painters, singers, actors, and poets, 'the scene of constant hospitalities, the headquarters of every remarkable person visiting Graz.' Such was the family whose one desire was to receive Schubert and Jenger. The journey, now accomplished in 5½ hours, was an affair of two days and a night, even in the fast coach. They left on Sunday morning, Sept. 2, and reached Graz on Monday night. The next three weeks were spent in the way which Schubert most enjoyed, excursions and picnics by day through a beautiful country, and at night incessant music; good eating and drinking, clever men and pretty women, no fuss, a little romping, a good piano, a sympathetic audience, and no notice taken of him—such were the elements of his enjoyment. The music was made mostly by themselves, Schubert singing, accompanying, and playing duets with Jenger, and extemporising endless dance tunes. He does not appear to have composed anything of great moment during the visit. A galop and twelve waltzes, published under the titles of the 'Grätzer Walzer' (op. 91) and the 'Grätzer Galoppe';¹ three songs (op. 106, 1, 2, 3—the last a particularly fine one) to words by local poets—and the 'Old Scottish Ballad' by Herder (op. 165, No. 5), were probably all that he penned during this festive fortnight; unless perhaps some of those exquisite little pieces published in 1828 and 1838 as 'Impromptus' and 'Momens musicaux' are the result of this time. Two songs, written a couple of years before, 'Im

Walde,' and 'Auf der Bruck,' of the purest Schubert, proved, and justly proved, such favourites that he had them lithographed and published in the place.² The visit is further perpetuated by the titles of the dances just mentioned, and by the dedication to Mme. Pachler of op. 106, a collection of four songs, the three already named, and the lovely 'Sylvia.' Schubert seems to have had this set of songs lithographed without name of place or publisher, shortly after his return, on purpose for his hostess.³

The journey home was a triumphal progress, and by the 27th they were back in Vienna. Schubert then wrote the second part of the 'Winterreise' (Nos. 13-24), completing that immortal work. The shadows lie much darker on the second than on the first part, and the 'Wegweiser,' 'Das Wirthshaus,' 'Die Krähe,' 'Die Nebensonnen,' and 'Der Leiermann,' are unsurpassed for melancholy among all the songs. Even in the extraordinary and picturesque energy of 'Die Post' there is a deep vein of sadness. Schubert here only followed faithfully, as he always does, the character of the words.

On Oct. 12 he wrote a little four-hand march as a souvenir for Faust Pachler, the son of his host, a trifle interesting only from the circumstances of its composition. In the same month he composed his first PF. trio, in Bb (op. 99), and in November the second, in Eb (op. 100). They were both written for Bocklet, Schuppanzigh, and Lincke, and were first heard in public, the one early in January, the other on March 26, 1828. The year was closed with an Italian cantata, dated Dec. 26, 'alla bella Irene,' in honour of Frä. Kiesewetter (afterwards Mme. Prokesch v. Osten), the daughter of his friend the Hofrath, sponsor to the Gastein Symphony (p. 306a). It is probably more interesting for its accompaniment for two pianos than for anything else.

The communications with Probst of Leipzig went on. There is a letter from him dated Jan. 15, and he himself paid a visit to Vienna later in the season, and made Schubert's⁴ personal acquaintance, but the negotiations were not destined to bear fruit till next year. But a proof that Schubert was making his mark in North Germany is afforded by a letter from Rochlitz, the critic—editor of the Leipzig *Allgemeine Musikalische Zeitung*, and a great personage in the musical world of Saxony—dated Nov. 7, 1827, proposing that Schubert should compose a poem by him, called 'Der erste Ton,' or 'The first Sound,' a poem which Weber had already set without success, and which Beethoven had refused. Rochlitz's letter was probably inspired by the receipt of three of his songs set by

¹ They stood originally in Eb minor and Ab, but on republication by Diabelli after his death, as op. 98, the keys were changed to G minor and G major.

² Compare Jenger's letter in K.H. (II. 103), note, with Nottebohm's notice under op. 106.

³ K.H. p. 421 (II. 107).

¹ Published by Haslinger, as No. 10 of the 'Favorite Galoppe,' 1828.

Schubert as op. 81, and published on May 27. The proposition, however, came to nothing.

Coincident with these communications from abroad came a gratifying proof of the improvement in his position at home, in his election as a member of the representative body of the Musical Society of Vienna. The date of election is not mentioned: but Schubert's reply, as given by Herr Pohl,¹ is dated Vienna, June 12, 1827, and runs as follows:—

The Managing Committee of the Society of Friends of Music of the Austrian Empire having thought me worthy of election as a Member of the Representative Body of that excellent Society, I beg herewith to state that I feel myself greatly honoured by their choice, and that I undertake the duties of the position with much satisfaction.

FRANZ SCHUBERT, Compositeur.

We have mentioned the more important compositions of 1827. There remain to be named two songs by Schober (op. 96, No. 2); and one by Reil (op. 115, No. 1); a comic trio, 'Die Hochzeitsbraten' (op. 104), also by Schober; and an Allegretto in C minor for PF. solo, written for his friend Walcher, 'in remembrance of April 26, 1827,' and not published till 1870.

The publications of 1827 are as follows:—the Overture to 'Alfonso und Estrella' (op. 69); Rondeau brillant, for PF., and violin (op. 70); songs—'Der Wachtelschlag' (op. 68, March 2), 'Drang in die Ferne' (op. 71, Feb.), 'Auf dem Wasser zu singen' (op. 72, Feb.), 'Die Rose' (op. 73, May 10)—all four songs previously published in the Vienna *Zeitschrift für Kunst*; four Polonaises, for PF. four hands (op. 75); Overture to 'Fierabras,' for PF. four hands, arranged by Czerny (op. 76); twelve 'Valse Nobles,' for PF. solo (op. 77, Jan.); Fantasia, etc. for PF. in G (op. 78); two songs, 'Das Heimweh,' 'Die Allmacht' (op. 79, 'May 16'); three songs (op. 80, May 25); three ditto (op. 81, May 28); Variations on theme of Hérold's (op. 82, Dec.); three Italian songs (op. 83, Sept. 12); four songs (op. 88, Dec. 12).

We have now arrived at Schubert's last year, 1828. It would be wrong to suppose that he had any presentiment of his end; though, if a passion for work, an eager use of the 'day,' were any sign that the 'night' was coming 'in which no man could work,' we might almost be justified in doing so. We hear of his suffering from blood to the head, but it was not yet enough to frighten any one. He returned to the extraordinary exertions, or rather to the superabundant productions of his earlier years, as the following full list of the compositions of 1828, in order, as far as the dates permit, will show.

- Jan. Songs, 'Die Sterne' (op. 96, No. 1); 'Der Winterabend.'
 March. Symphony in C, No. 8.
 Oratorio, Miriam's Siegesgesang.
 Song, 'Auf dem Strom,' Voice and Horn (op. 119).
 May. Lebensstürme, PF. duet (op. 144).
 Hymn to the Holy Ghost (op. 145), for two Chords and Wind.
 2 Clavierstücke.
 Song, 'Widersehn.'

¹ Die Gesellschaft der Musikfreunde, etc., p. 16.

- June. Mass in E♭ (begun).
 Fugue in E minor, PF. duet, op. 152 ('Baden, Juny, 1828').
 Grand Rondeau, PF. duet (op. 107).
 July. Psalm 92, in Hebrew, for Baritone and Chorus.
 August. Songs, 'Schwanengesang,' Nos. 1-13.
 Sept. PF. Sonata in C minor.
 Ditto in A.
 Ditto in B♭ ('Sept. 26').
 Between August and October. Tantum ergo in E flat, and Offertorium in B flat, for tenor solo, chorus, and orchestra.
 Published 1890 by Peters.
 October. Songs, 'Schwanengesang,' No. 14.
 New Benedictus to Mass in C.
 'Der Hirt auf den Felsen,' Voice and Clarinet (op. 120).
 '1828' only. String Quintet in C (op. 163).

This truly extraordinary list includes his greatest known symphony, his greatest and longest mass, his first oratorio, his finest piece of chamber music, three noble PF. sonatas, and some astonishingly fine songs. The autograph of the symphony, 218 pages in oblong quarto, is now one of the treasures of the Library of the Musikverein at Vienna. It has no title or dedication, nothing beyond the customary heading to the first page of the score 'Symfonie März 1828, Frz. Schubert Mpia,' marking the date at which it was begun. If it may be taken as a specimen, he took more pains this year than he did formerly. In the first three movements of this great work there are more afterthoughts than usual. The subject of the Introduction and the first subject of the Allegro have both been altered. In several passages an extra bar has been stuck in—between the Scherzo and the Trio, two bars; in the development of the Scherzo itself sixteen bars of an exquisite episode—first sketched in the Octet—have been substituted. The Finale alone remains virtually untouched.² But such alterations, always rare in Schubert, are essentially different from the painful writing, and erasing, and rewriting, which we are familiar with in the case of Beethoven's finest and most spontaneous music. This, though the first draft, is no rough copy; there are no traces of sketches or preparation; the music has evidently gone straight on to the paper without any intervention, and the alterations are merely a few improvements *en passant*.³ It is impossible to look at the writing of the autograph, after Schubert has warmed to his work, especially that of the Finale, and not see that it was put down as an absolute *impromptu*, written as fast as the pen could travel on the paper.

It seems that Schubert's friends used to lecture him a good deal on the diffuseness and want of consideration which they discovered in his works, and were continually forcing Beethoven's laborious processes of composition down his throat. This often made him angry, and when repeated, evening after evening, he would say, 'So you're going to set upon me again to-day! Go it, I beg you!' But, for all his annoyance, the remonstrances appear to have had some effect; and after Beethoven's death he asked

² See details by the present writer in Appendix to the *Life of Schubert*, translated by A. D. Coleridge, Esq., vol. II, p. 320.

³ The original MS. orchestral parts show at any rate that the alterations in the score were made before they were copied from it. C. V. Stanford kindly examined them for me with that view.

Schindler to show him the MS. of 'Fidelio.'¹ He took it to the piano, and pored over it a long time, making out the passages as they had been, and comparing them with what they were; but it would not do; and at last he broke out, and exclaimed that for such drudgery he could see no reason under any circumstances; that he thought the music at first just as good as at last; and that for his part he had really no time for such corrections. Whether the amendments to the Great Symphony were a remorseful attempt on Schubert's part to imitate Beethoven and satisfy the demands of his friends we cannot tell; but if so they are very unlike the pattern.

The autograph of the E♭ Mass, in the Bibliothek at Berlin, does not show at all the same amount of corrections as that in A♭ (see p. 298a), nor do the fugal movements appear to have given any special trouble. True, the 'Cum Sancto' was recommended after the erasure of seven bars,² but apparently merely for the sake of changing the tempo from C to C♯, and the larger part of the movement was evidently written with great rapidity. In the 'Et vitam' there are barely a dozen corrections, and the 'Osanna' has every mark of extreme haste. Some of the erasures in this work are made with the penknife—surely an almost unique thing with Schubert! The four-hand PF. fugue in E minor (op. 152, dated 'Baden, June 1828') is not improbably a trial of counterpoint with reference to this Mass.

The Songs of 1828 are splendid. It does not appear that the fourteen which were published after his death with the publisher's title of 'Schwanengesang'—'the Swan's song'—were intended by him to form a series of the same kind as the 'Schöne Müllerin' and 'Winterreise'; but no lover of Schubert can dissociate them, and in the 'Liebesbotschaft,' 'Aufenthalt,' 'Ständchen,' etc., we have some of the most beautiful, and in the 'Atlas,' 'Am Meer,' 'Doppelgänger,' etc., some of the most impressive, of his many songs. The words of some are by Rellstab, and the origin of these is thus told by Schindler.³ Schubert had been much touched by Schindler's efforts to make Beethoven acquainted with his music, and after the great master's death the two gradually became intimate. Schindler had possession of many of Beethoven's papers, and Schubert used to visit him in familiar style, to look over them. Those which specially attracted him were the poems and dramas sent in at various times for consideration; amongst others a bundle of some twenty anonymous lyrics which Beethoven had intended to set, and which therefore attracted Schubert's particular

notice.⁴ He took them away with him, and in two days brought back the 'Liebesbotschaft,' 'Kriegers Ahnung,' and 'Aufenthalt,' set to music. This account, which is perfectly natural and consistent, and which Mr. Thayer allows me to say he sees no reason to question, has been exaggerated⁵ into a desire expressed by Beethoven himself that Schubert should set these particular songs; but for this there is no warrant. Ten more quickly followed the three just mentioned; and these thirteen—seven to Rellstab's and six to Heine's words (from the 'Buch der Lieder')⁶, were, on Nottebohm's authority, written in August. The last is by Seidl; it is dated 'Oct. 1828,' and is probably Schubert's last song.

But it is time to return to the chronicle of his life during its last ten months. Of his doings in January we know little more than can be gathered from the following letter to Anselm Hüttenbrenner, the original of which is in the British Museum (Add. MS. 29,804, f. 24).

VIENNA, Jan. 18, 1828.

MY DEAR OLD HÜTTENBRENNER—You will wonder at my writing now? So do I. But if I write it is because I am to get something by it. Now just listen; a drawing-master's place near you at Graz is vacant, and competition is invited. My brother Karl, whom you probably know, wishes to get the place. He is very clever, both as a landscape-painter and a draughtsman. If you could do anything for him in the matter I should be eternally obliged to you. You are a great man in Graz, and probably know some one in authority, or some one else who has a vote. My brother is married, and has a family, and would therefore be very glad to obtain a permanent appointment. I hope that things are all right with you, as well as with your dear family, and your brothers. A Trio of mine, for Piano-forte, Violin, and Violoncello, has been lately performed by Schuppanzigh, and was much liked. It was splendidly executed by Boklet, Schuppanzigh, and Link. Have you done nothing new? Apropos, why doesn't Greiner,⁷ or whatever his name is, publish the two songs? What's the reason? Sapperment!

I repeat my request; recollect, what you do for my brother, you do for me. Hoping for a favorable answer, I remain your true friend, till death,

FRANZ SCHUBERT Mpia.
of Vienna.

The expression 'till death,' which appears here for the first time in his letters, and the words 'of Vienna,' added to his name, are both singular.

On the 24th, at an evening concert at the Musikverein, the serenade for contralto solo and female chorus just mentioned was performed, and is spoken of by the correspondent of the Leipzig *A.M.Z.* as 'one of the most charming works of this favourite writer.' In February we find three letters from North Germany, one from Probst of Leipzig, and two from Schott. They show how deep an impression Schubert was making outside Austria. Both firms express

¹ They proved afterwards to be by Rellstab.

² See Rellstab's *Aus m. Leben*, ii. 245.

³ Baron Schönstein relates—*A.H.* p. 447 (ii. 135)—that he found Heine's 'Buch der Lieder' on Schubert's table some years before this date, and that Schubert lent them to him with the remark 'that he should not wait them again.' But such reminiscences are often wrong in point of date: the fact remains ineffaceable in the mind, the date easily gets altered. In fact Heine's 'Buch der Lieder' was first published in 1827. The six songs which Schubert took from it are all from the section entitled 'Die Heimkehr.'

⁴ A publisher in Graz. His name was Kienrich, and the two songs, 'Im Walde' and 'Auf der Bruck' (op. 93), appeared in May.

¹ Schindler, *Erinnerungen*, in *Niederheinische Musikzeitung*, 1857, pp. 73-78, 81-85.

² The omission of the words 'Jesu Christe' at the end of the 'Quoniam,' and other omissions, show that he had not conquered the carelessness so frequent in his early Masses as to the treatment of the words.

³ Schindler, *Erinnerungen*, etc., as before.

warm appreciation of his music, both leave the terms to be named by him, and Schott orders a list of nine important pieces.

On March 26 Schubert gave what we wonder

he never gave before, an evening concert on his own account in the Hall of the Musikverein. The following is the programme exactly reprinted from the original:—

Einladung

zu dem Privat-Concerte, welches Franz Schubert am
26. März, Abends 7 Uhr im Locale des oesterreichischen Musikvereins
unter den Tuchlauben No. 558 zu geben die Ehre haben wird.

Vorkommende Stücke.

1. Erster Satz eines neuen Streich Quartetts vorgetragen von den Herren Böhm, Holz, Weiss, und Linke.
 2. a. Der Krentzzug, von Leitner
b. Die Sterne, von demselben
c. Fischerweise, von Bar. Schlechta
d. Fragment aus dem Aeschylus
 } Gesänge mit Begleitung des
 } Piano Forte, vorgetragen von
 } Herrn Vogl, k. k. pensionirten
 } Hofopernsänger.
 3. Ständchen von Grillparzer, Sopran-Solo und Chor, vorgetragen von Fräulein Josephine Fröhlich und den Schülerinnen des Conservatoriums.
 4. Neues Trio für des Piano Forte, Violin und Violoncelle, vorgetragen von den Herren Carl Maria von Böklet, Böhm und Linke.
 5. Auf dem Strome von Relstab. Gesang mit Begleitung des Horns und Piano Forte, vorgetragen von den Herren Tietze, und Lewy dem Jüngeren.
 6. Die Allmacht, von Ladislaus Pyrker, Gesang mit Begleitung des Piano Forte, vorgetragen von Herren Vogl.
 7. Schlachtgesang von Klopstock, Doppelchor für Männerstimmen.
- Sämmtliche Musikstücke sind von der Composition des Concertgebers.
Eintrittskarten zu fl. 3. W. W. sind in den Kunsthandlungen der Herren Haslinger, Diabelli und Leidesdorf zu haben.

This programme attracted 'more people than the hall had ever before been known to hold,' and the applause was very great. The net result to Schubert was 800 gulden, Vienna currency, equal to about £32. This put him in funds for the moment, and the money flowed freely. Thus, when, three days later, Paganini gave his first concert in Vienna, Schubert was there, undeterred, in his wealth, by a charge of five gulden. Nay, he went a second time, not that he cared to go again, but that he wished to treat Bauernfeld, who had not five farthings, while with him 'money was as plenty as blackberries.'¹

This month he wrote, or began to write, his last and greatest Symphony, in C. He is said to have offered it to the society for performance, and in so doing to have expressed himself to the effect that henceforth he wished to have nothing more to do with songs, as he was now planted firmly in Opera and Symphony. This rests on the authority of Kreissle;² the silence of Herr Pohl in his history of the society shows that its minute-books contain no express mention of the reception of the work, as they do that of the symphony in October 1826. There is no doubt, however, that it was adopted by the society, and is entered in the Catalogue, under the year 1828, as xiii. 8024.³ But this prodigious work was far beyond the then powers of the chief musical institution of Vienna. The parts were copied and some rehearsals held; but both length and difficulty were against it, and it was

soon withdrawn, on Schubert's own advice, in favour of his earlier Symphony, No. 6, also in C. Neither the one nor the other was performed till after his death.

March also saw the birth of the interesting Oratorio 'Miriam's Song of Victory,' to Grillparzer's words.⁴ It is written, as so many of Schubert's choral pieces are, for a simple piano-forte accompaniment; but this was merely to suit the means at his disposal, and is an instance of his practical sagacity. It is unfortunate, however, since the oratorio has become a favourite, that we have no other orchestral accompaniment than that afterwards adapted by Lachner, which is greatly wanting in character, and in the picturesque elements so native to Schubert.⁵ A song to Relstab's words, 'Auf dem Strom' (op. 119), for soprano, with obligato horn and PF. accompaniment, written for Lewy, a Dresden horn-player, belongs to this month, and was indeed first heard at Schubert's own concert, on the 26th, and afterwards repeated at a concert of Lewy's, on April 20, Schubert himself playing the accompaniment each time.

To April no compositions can be ascribed unless it be the Quintet in C for strings (op. 163), which bears only the date '1828.' This is now universally accepted not only as Schubert's finest piece of chamber music, but as one of the very finest of its class. The two violoncellos in

¹ See Bauernfeld's Letter in the *Press*, April 17, 1869. *Häcker-Hing*, 'chaff,' is Schubert's word.

² *K.H.* p. 445 (ii. 132).

³ See Herr Pohl's letter to the *Times*, of Oct. 17, 1881.

⁴ Kreissle, p. 609 (ii. 285), says that it was produced in the Schubert Concert, March 1828. But this is contradicted by the Programme which is printed above. It was first performed Jan. 30, 1829, at a concert for erecting Schubert's headstone.

⁵ It has been performed (with Lachner's orchestration) at the Crystal Palace several times, at the Leeds Festival 1880, and elsewhere in England.

themselves give it distinction; it has all the poetry and romance of the G major Quartet, without the extravagant length which will always stand in the way of that noble production; while the Adagio is so solemn and yet so beautiful in its tone, so entrancing in its melodies, and so incessant in its interest, and the Trio of the Soherzo, both from itself and its place in the movement, is so eminently dramatic, that it is difficult to speak of either too highly.

In May we have a grand battle-piece, the 'Hymn to the Holy Ghost,' for eight male voices, written for the Concert Spirituel of Vienna, at first with PF., in October scored by the composer for a wind band, and in 1847 published as op. 154. Also a 'Characteristic Allegro' for the PF. four hands, virtually the first movement of a Sonata—issued some years later with the title 'Lebensstürme' (op. 144); an Allegro vivace and Allegretto, in E♭ minor and major, for PF. solo, published in 1868 as first and second of '3 Clavierstücke'; and a song 'Widerschein.'

In June, probably at the request of the publisher, he wrote a four-hand Rondo for PF. in A, since issued as 'Grand Rondeau, op. 107'; and began his sixth Mass, that in E♭. In this month he paid a visit to Baden—Beethoven's Baden; since a fugue for four hands in E minor is marked as written there in 'June 1828.' In the midst of all this work a letter¹ from Mosewius of Breslau, a prominent Prussian musician, full of sympathy and admiration, must have been doubly gratifying as coming from North Germany.

In July he wrote the 92nd Psalm in Hebrew for the synagogue at Vienna, of which Sulzer was precentor. In August, notwithstanding his declaration on completing his last Symphony, we find him (under circumstances already described) composing seven songs of Rellstab's, and six of Heine's, afterwards issued as 'Schwanengesang.'

He opened September with a trifle in the shape of a short chorus,² with accompaniment of wind band, for the consecration of a bell in the church of the Alservorstadt. A few days after, the memory of Hummel's visit in the spring of 1827 seems to have come upon him like a lion, and he wrote off three fine PF. solo sonatas, with the view of dedicating them to that master. These pieces, though very unequal and in parts extraordinarily diffuse, are yet highly characteristic of Schubert. They contain some of his finest and most original music, and also his most affecting (*e.g.* Andantino, Scherzo and Trio of the A minor Sonata); and if full of disappointment and wrath, and the gathering gloom of these last few weeks of his life, they are also saturated with that nameless personal charm that is at once so strong

and so indescribable. The third of the three, that in B♭, dated Sept. 26, has perhaps more of grace and finish than the other two. The sonatas were not published till a year after Hummel's death, and were then dedicated by Diabelli-Spina to Robert Schumann, who acknowledges the dedication by a genial though hardly adequate article in his *Ges. Schriften*, ii. 239. The second part of the 'Winterreise' was put into Haslinger's hands for engraving before the end of this month.³

In October, prompted by some occasion which has eluded record, he wrote a new 'Benedictus' to his early Mass in C, a chorus of great beauty and originality in A minor, of which a competent critic⁴ has said that 'its only fault consists in its immeasurable superiority to the rest of the Mass.' To the same period may be assigned a fine offertorium, 'Intende voci orationis meae,' and an extremely beautiful 'Tantum ergo' in E♭, for chorus and orchestra. For some other occasion, which has also vanished, he wrote accompaniments for thirteen wind instruments to his grand 'Hymn to the Holy Ghost'; a long scena or song for soprano—probably his old admirer, Anna Milder—with pianoforte and obbligato clarinet (op. 129); and a song called 'Die Taubenpost' ('The carrier pigeon') to Seidl's words. The succession of these pieces is not known. It is always assumed that the Taubenpost, which now closes the Schwanengesang, was the last. Whichever of them was the last, was the last piece he ever wrote.

The negotiations with Probst and Schott, and also with Brüggemann of Halberstadt, a publisher anxious for some easy PF. pieces for a series called 'Mühling's Museum,' by no means fulfilled the promise of their commencement. The magnificent style in which the Schotts desired Schubert to name his own terms⁵ contrasts badly with their ultimate refusal (Oct. 30) to pay more than 30 florins (or about 25s.) for the PF. Quintet (op. 114) instead of the modest sixty demanded by him. In fact the sole result was an arrangement with Probst to publish the long and splendid E♭ Trio, which he did, according to Nottebohm,⁶ in September, and for which the composer received the incredibly small sum of 21 Vienna florins, or just 17s. 6d.! Schubert's answer to Probst's inquiry as to the 'Dedication' is so characteristic as to deserve reprinting:—

VIENNA, Aug. 1.

Euer Wohlgeboren, the opus of the Trio is 100. I entreat you to make the edition correct; I am extremely anxious about it. The work will be dedicated to no one but those who like it. That is the most profitable dedication. With all esteem,

FRANZ SCHUBERT.

¹ Schubert's letter to Jenger, Sept. 25. *K.H.* p. 437 (ii. 124).

² Mr. E. Froust in the *Monthly Musical Record* for 1871, p. 66.

³ *K.H.* p. 424 (ii. 109).

⁴ *K.H.* p. 428 (ii. 114).

⁵ *K.H.* p. 443 (ii. 131). This piece, 'Glaube, Hoffnung, und Liebe,' is not to be confounded with one of similar title for a solo voice, published, Oct. 6, 1828, as op. 97.

⁶ Probst announces two long lists of new music in the *A.M.Z.* for Oct., but makes no mention of the Trio. It is reviewed most favourably in the *A.M.Z.* for Dec. 10, 1828. Alas! he was then beyond the reach of praise or blame.

The home publications of 1828 are not so important as those of former years. The first part of the 'Winterreise' (op. 89) was issued in January by Haslinger; March 14, three songs by Sir W. Scott (opp. 85, 86) by Diabelli; at Easter (April 6) six songs (opp. 92 and 108), and one set of 'Momens musicales,' by Leidesdorf; in May, two songs (op. 93) by Kienreich¹ of Graz; in June or July ('Sommer'), four songs (op. 96) by Diabelli; Aug. 13, four Refrain-Lieder (op. 95), Weigl. Also the following, to which no month can be fixed:—'*Andantino varié* and *Rondeau brillant*' (op. 84), PF. four hands, on French *motifs*, forming a continuation of op. 63, Weigl; three songs (op. 87), Pennauer; four *impromptus* (op. 90), and twelve *Grätzer Waltzer* (op. 91) for PF. solo, Diabelli; *Grätzer Galoppe*, do. Haslinger; four songs (op. 106) lithographed without publisher's name.

There is nothing in the events already catalogued to have prevented Schubert's taking an excursion this summer. In either Styria or Upper Austria he would have been welcomed with open arms, and the journey might have given him a stock of health sufficient to carry him on for years. And he appears to have entertained the idea of both.² But the real obstacle, as he constantly repeats, was his poverty.³ 'It's all over with Graz for the present,' he says, with a touch of his old fun, 'for money and weather are both against me.' Herr Franz Lachner, at that time his constant companion, told the writer that he had taken half-a-dozen of the 'Winterreise' songs to Haslinger and brought back half-a-dozen gulden—each gulden being then worth a franc. Let the lover of Schubert pause a moment, and think of the 'Post' or the 'Wirthshaus' being sold for temperance! of that unrivalled imagination and genius producing those deathless strains and being thus rewarded! When this was the case, when even a great work like the *E♭* Trio, after months and months of negotiation and heavy postage, realises the truly microscopic amount of '20 florins 60 kreutzers' (as with true Prussian businesslike minuteness Herr Probst specifies it), of 17s. 6d. as our modern currency has it—not even Schubert's fluency and rapidity could do more than keep body and soul together. It must have been hard not to apply the words of Müller's 'Leyermann' to his own case—

Barfuss auf dem Eise
Wankt er hin und her,
Und sein kleiner Teller
Bleibt ihm immer leer.

In fact so empty was his little tray that he could not even afford the diligence-fare to Pesth, where Lachner's 'Bürgschaft' was to be brought out, and where, as Schindler reminds him, he would be safe to have a lucrative concert of his

own music, as profitable as that of March 26. Escape from Vienna by *that* road was impossible for him this year.

Schubert had for some time past been living with Schober at the 'Blaue Igel' (or Blue Hedgehog), still a well-known tavern and resort of musicians in the Tuchlauben; but at the end of August he left, and took up his quarters with Ferdinand in a new house in the Neue Wieden suburb, then known as No. 694 Firmian, or Lumpert,⁴ or Neugebauten, Gasse, now (1881) No. 6 Kettenbrücken Gasse; a long house with three rows of nine windows in front; a brown sloping tiled roof; an entry in the middle to a quadrangle behind; a quiet, clean, inoffensive place. Here, on the second floor, to the right hand, lived Schubert for the last five weeks of his life, and his death is commemorated by a stone tablet over the entry, placed there by the Männergesang Verein in Nov. 1869, and containing these words:—'*In diesem Hause starb am 19 November 1828 der Tondichter Franz Schubert*'—(In this house died on Nov. 19, 1828, the composer Franz Schubert). Ferdinand had removed there, and Franz went there too. He made the move with the concurrence of his doctor, von Rinna, in the hope that as it was nearer the country—it was just over the river in the direction of the Belvedere—Schubert would be able to reach fresh air and exercise more easily than he could from the heart of the city. The old attacks of giddiness and blood to the head had of late been frequent, and soon after taking up his new quarters he became seriously unwell. However, this was so far relieved that at the beginning of October he made a short walking tour with Ferdinand and two other friends to Ueber-Waltersdorf, and thence to Haydn's old residence and grave at Eisenstadt, some 25 miles from Vienna. It took them three days, and during that time he was very careful as to eating and drinking, regained his old cheerfulness, and was often very gay. Still he was far from well, and after his return the bad symptoms revived, to the great alarm of his friends. At length, on the evening of Oct. 31, while at supper at the Rothen Kreuz in the Himmelfortgrund, an eating-house much frequented by himself and his friends, he took some fish on his plate, but at the first mouthful threw down the knife and fork, and exclaimed that it tasted like poison. From that moment hardly anything but medicine passed his lips; but he still walked a good deal. About this time Lachner returned from Pesth in all the glory of the success of his opera; and though only in Vienna for a few days, he called on his friend, and they had two hours' conversation. Schubert was full of plans for the future, especially for the completion of 'Graf von Gleichen,' which, as already mentioned, he had sketched in the summer of 1827.

¹ Whom Schubert parodies as 'Grainer' i.e. grumbler. Jenger's and Traueger's letters, *K.H.* pp. 416, 427, 431, etc.

⁴ *K.H.* p. 453 note.

He discussed it also with Bauernfeld during the next few days, and spoke of the brilliant style in which he intended to score it. About this time Carl Holz, Beethoven's old friend, at Schubert's urgent request, took him to hear the great master's C \sharp minor Quartet, still a novelty in Vienna. It agitated him extremely. 'He got (says Holz) into such a state of excitement and enthusiasm that we were all afraid for him.'¹ On Nov. 3, the morrow of All Souls' day, he walked early in the morning to Hernals—then a village, now a thickly built suburb outside the Gürtelstrasse—to hear his brother's Latin Requiem in the church there. He thought it simple, and at the same time effective, and on the whole was much pleased with it. After the service he walked for three hours, and on reaching home complained of great weariness.

Shortly before this time the scores of Handel's oratorios had come into his hands—not impossible some of the set of Arnold's edition given to him even before his death, and sold in his sale for 102 florins; and the study of them had brought home to him his deficiencies in the department of counterpoint. 'I see now,' said he² to the Fröhlichs, 'how much I have still to learn; but I am going to work hard with Sechter, and make up for lost time'—Sechter being the recognised authority of the day on counterpoint. So much was he bent on this, that on the day after his walk to Hernals, i.e. on Nov. 4, notwithstanding his weakness, he went into Vienna and, with another musician named Lanz, called on Sechter, to consult him on the matter, and they actually decided on Marpurg as the textbook, and on the number and dates of the lessons.³ But he never began the course. During the next few days he grew weaker and weaker; and when the doctor was called in, it was too late. About the 11th he wrote a note⁴ to Schober—doubtless his last letter.

DEAR SCHOBEL,

I am ill. I have eaten and drunk nothing for eleven days, and am so tired and shaky that I can only get from the bed to the chair, and back. Rinna is attending me. If I taste anything, I bring it up again directly.

In this distressing condition, be so kind as to help me to some reading. Of Cooper's I have read the Last of the Mohicans, the Spy, the Pilot, and the Pioneers. If you have anything else of his, I entreat you to leave it with Frau von Bogner at the Coffee house. My brother, who is conscientiousness itself, will bring it to me in the most conscientious way. Or anything else. Your friend,
SCHUBERT.

What answer Schober made to this appeal is not known. He is said to have had a daily report of Schubert's condition from the doctor, but there is no mention of his having called. Spaun, Randhartinger,⁵ Bauernfeld, and Josef Hütten-

brenner, are all said to have visited him; but in those days there was great dread of infection, his new residence was out of the way, and dangerous illness was such a novelty with Schubert that his friends may be excused for not thinking the case so grave as it was. After a few days Rinna himself fell ill, and his place was filled by a staff-surgeon named Behring.

On the 14th Schubert took to his bed.⁶ He was able to sit up a little for a few days longer, and thus to correct the proofs of the second part of the 'Winterreise,' probably the last occupation of those inspired and busy fingers. He appeared to have had no pain, only increasing weakness, want of sleep, and great depression. Poor fellow! no wonder he was depressed! everything was against him, his weakness, his poverty, the dreary house, the long lonely hours, the cheerless future—all concentrated and embodied in the hopeless images of Müller's poems, and the sad gloomy strains in which he has clothed them for ever and ever—the 'Letzte Hoffnung,' the 'Krähe,' the 'Wegweiser,' the 'Wirthshaus,' the 'Nebensonnen,' the 'Leiermann'—all breathing of solitude, broken hopes, illusions, strange omens, poverty, death, the grave! As he went through the pages, they must have seemed like pictures of his own life; and such passages as the following, from the 'Wegweiser' (or Signpost), can hardly have failed to strike the dying man as aimed at himself:—

Einen Weiser seh' ich stehen,
Unverrückt vor meinem Blick,
Eine Strasse muss ich gehen,
Die noch keiner ging zurück.

Alas! he was indeed going the road which no one e'er retraces! On Sunday the 16th the doctors had a consultation; they predicted a nervous fever, but had still hopes of their patient. On the afternoon of Monday, Bauernfeld saw him for the last time. He was in very bad spirits, and complained of great weakness, and of heat in his head, but his mind was still clear, and there was no sign of wandering; he spoke of his earnest wish for a good opera-book. Later in the day, however, when the doctor arrived, he was quite delirious, and typhus had unmistakably broken out. The next day, Tuesday, he was very restless throughout, trying continually to get out of bed, and constantly fancying himself in a strange room. That evening he called Ferdinand on to the bed, made him put his ear close to his mouth, and whispered mysteriously, 'What are they doing with me?' 'Dear Franz,' was the reply, 'they are doing all they can to get you well again, and the doctor assures us you will soon be right, only you must do your best to stay in bed.' He returned to the idea in his wandering—'I implore you to put me in my own room, and not to leave me in this corner under the earth; don't I

statements of Bauernfeld (*Presse*, April 21, 1869) and of Kreissle's informant, p. 492 (ii. 149).

⁶ Ferdinand, in the *N.Z.M.* p. 143.

¹ Quoted by Nohl, *Beethoven*, iii. 964. Holz says it was the last music that poor Schubert heard. Ferdinand claims the same for his Requiem. At any rate both were very near the end.

² Kreissle's *Sketch*, p. 192.

³ *K.Z.* p. 451 (ii. 138), expressly on Sechter's authority.

⁴ Given by Bauernfeld, in *Die Presse*, April 21, 1869.

⁵ Fräulein Geisler-Schubert informs me that Ferdinand's wife (still living, 1892) maintains that Randhartinger was the only one who visited him during his illness; but it is difficult to resist the

deserve a place above ground?' 'Dear Franz,' said the agonised brother, 'be calm; trust your brother Ferdinand, whom you have always trusted, and who loves you so dearly. You are in the room which you always had, and lying on your own bed.' 'No,' said the dying man, 'that's not true; Beethoven is not here.' So strongly had the great composer taken possession of him! An hour or two later the doctor came, and spoke to him in the same style. Schubert looked him full in the face and made no answer: but turning round clutched at the wall with his poor tired hands, and said in a slow earnest voice, 'Here, here, is my end.' At three in the afternoon of Wednesday the 19th Nov. 1828 he breathed his last, and his simple earnest soul took its flight from the world. He was thirty-one years, nine months, and nineteen days old. There never has been one like him, and there never will be another.

His death, and the letters of the elder Franz and of Ferdinand, bring out the family relations in a very pleasant light. The poor pious bereaved father, still at his drudgery as 'school teacher in the Rossau,' 'afflicted, yet strengthened by faith in God and the Blessed Sacraments,' writing to announce the loss of his 'beloved son, Franz Schubert, musician and composer'; the good innocent Ferdinand, evidently recognised as Franz's peculiar property, clinging to his brother as the one great man he had ever known; thinking only of him, and of fulfilling his last wish to lie near Beethoven,—these form a pair of interesting figures. Neither Ignaz nor Carl appear at all in connection with the event, the father and Ferdinand alone are visible.

The funeral took place on Friday Nov. 21. It was bad weather, but a number of friends and sympathisers assembled. He lay in his coffin, dressed, as the custom then was, like a hermit, with a crown of laurel round his brows. The face was calm, and looked more like sleep than death. By desire of the family Schober was chief mourner. The coffin left the house at half-past two, and was borne by a group of young men, students and others, in red cloaks and flowers, to the little church of S. Joseph in Margarethen, where the funeral service was said, and a motet by Gänsbacher, and a hymn of Schober's, 'Der Friede sey mit dir, du engelreine Seele'—written that morning in substitution for his own earlier words, to the music of Schubert's 'Pax vobiscum'—were sung over the coffin. It was then taken to the Ortsfriedhof in the village of Währing, and committed to the ground, three places higher up than the grave of Beethoven.¹ In ordinary course he would have been buried in the cemetery at Matzleinsdorf, but the appeal which he made almost with his dying breath was naturally a law to the tender heart of Ferdinand, and through his piety and self-

denial his dear brother rested if not next, yet near to the great musician, whom he so deeply revered and admired. Late in the afternoon Wilhelm von Chezy, son of the authoress of 'Euryanthe' and 'Rosamunde,' who though not in Schubert's intimate circle was yet one of his acquaintances, by some accident remembered that he had not seen him for many months, and he walked down to Bogner's coffee-house, where the composer was usually to be found between five and seven, smoking his pipe and joking with his friends, and where the Cooper's novels mentioned in his note to Schober were not improbably still waiting for him. He found the little room almost empty, and the familiar round table deserted. On entering he was accosted by the waiter—'Your honour is soon back from the funeral!' 'Whose funeral?' said Chezy in astonishment. 'Franz Schubert's,' replied the waiter, 'he died two days ago, and is buried this afternoon.'²

He left no will. The official inventory³ of his possessions at the time of his death, in which he is described as 'Tonkünstler und Compositeur'—musician and composer—is as follows:—'3 dress coats, 3 walking coats, 10 pairs of trousers, 9 waistcoats—together worth 37 florins; 1 hat, 5 pairs of shoes and 2 of boots—valued at 2 florins; 4 shirts, 9 cravats and pocket handkerchiefs, 13 pairs of socks, 1 towel, 1 sheet, 2 bedcases—8 florins; 1 mattress, 1 bolster, 1 quilt—6 florins; a quantity of old music valued at 10 florins—63 florins (say £2: 10s.) in all. Beyond the above there were no effects.' Is it possible then, that in the 'old music, valued at 8s. 6d.,' are included the whole of his unpublished manuscripts? Where else could they be but in the house he was inhabiting?

The expenses of the illness and funeral amounted in all to 269 silver florins, 19 kr. (say £27). Of this the preliminary service cost 84 fl. 35 kr.; the burial 44 fl. 45 kr.; and the ground 70 fl.; leaving the rest for the doctor's fees and incidental disbursements. Illness and death were truly expensive luxuries in those days.

On Nov. 27, the Kirchenmusikverein performed Mozart's Requiem in his honour; and on Dec. 23 a requiem by Anselm Hiittenbrenner was given in the Augustine church. On Dec. 14, his early Symphony in C, No. 6, was played at the Gesellschaftsconcert, and again on March 12, 1829. At Linz on Christmas Day there was a funeral ceremony with speeches and music. Articles in his honour appeared in the *Wiener Zeitschrift* of Dec. 25 (by von Zedlitz), in the *Theaterzeitung* of Vienna of the 20th and 27th (by Blahetka); in the Vienna *Zeitschrift für Kunst* of June 9, 11, 13, 1829 (by Bauernfeld); in the Vienna *Archiv für Geschichte* by Mayrhofer; and memorial poems were published by

² Wilhelm von Chezy, *Erinnerungen aus meinen Leben* (1863), pp. 182, 183.

³ Given at length by Kreissle (p. 497)—but entirely omitted in the translation—and materially misquoted by Gumprecht (p. 15).

¹ Next to Beethoven came 'Freiherr von Wssehd'; then 'Job. Graf Odomei and Gräfin O'Donnell,' and then Schubert.

Seidl, Schober, and others. On Jan. 30, 1829, a concert was given by the arrangement of Anna Fröhlich in the hall of the Musikverein; the programme included 'Miriam,' and consisted entirely of Schubert's music, excepting a set of flute variations by Gabrielsky, and the first Finals in 'Don Juan'; and the crowd was so great that the performance had to be repeated shortly afterwards. The proceeds of these concerts and the subscriptions of a few friends sufficed to erect the monument which now stands at the back of the grave. It was carried out by Anna Fröhlich, Grillparzer, and Jenger. The bust was by Franz Dialer, and the cost of the whole was 360 silver florins, 46 kr. The inscription¹ is from the pen of Grillparzer:—

DIE TONKUNST BEGRUB HIER EINEN REICHEN BESITZ
ABER NOCH VIEL SCHOENERE HOFFNUNGEN.
FRANZ SCHUBERT LIEGT HIER.
GEBOREN AM XXXI. JÄNNER MDCCXCVII.
GESTORBEN AM XIX. NOV. MDCCCXXVIII.
XXXI JAHRE ALT.

MUSIC HAS HERE ENTOMBED A RICH TREASURE,
BUT MUCH FAIRER HOPES.
FRANZ SCHUBERT LIES HERE.
BORN JAN. 31, 1797;
DIED NOV. 19, 1828,
31 YEARS OLD.

The allusion to fairer hopes has been much criticised, but surely without reason. When we remember in how many departments of music Schubert's latest productions were his best, we are undoubtedly warranted in believing that he would have gone on progressing for many years, had it been the will of God to spare him.

In 1863, owing to the state of dilapidation at which the graves of both Beethoven and Schubert had arrived, the repair of the tombs, and the exhumation and reburial of both, were undertaken by the Gesellschaft der Musikfreunde. The operation was begun on the 12th of October and completed on the 13th. The opportunity was embraced of taking a cast and a photograph of Schubert's skull, and of measuring the principal bones of both skeletons. The lengths in Schubert's case were to those in Beethoven's as 27 to 29,² which implies that as Beethoven was 5 ft. 5 in. high, he was only 5 ft. and $\frac{1}{2}$ an inch. Schubert was reburied in the central cemetery of Vienna on Sept. 23, 1868.

Various memorials have been set up to him in Vienna. The tablets on the houses in which he was born and died have been noticed. They were both carried out by the Männergesang Verein, and completed, the former Oct. 7, 1858, the latter in Nov. 1869. The same Society erected by subscription a monument to him in the Stadt-Park, a sitting figure in Carrara

marble by Carl Kuntmann, with the inscription 'Franz Schubert, seinem Andenken der Wiener Männergesangverein, 1872.' It cost 42,000 florins, and was unveiled May 15, 1872.

Outside of Austria his death created at first but little sensation. Robert Schumann, then eighteen, is said to have been deeply affected, and to have burst into tears when the news reached him at Leipzig; Mendelssohn too, though unlike Schubert in temperament, circumstances, and education, doubtless fully estimated his loss; and Rellstab, Anna Milder, and others in Berlin who knew him, must have mourned him deeply; but the world at large did not yet know enough of his works to understand either what it possessed or what it had lost in that modest reserved young musician of thirty-one. But Death always brings a man, especially a young man, into notoriety, and increases public curiosity about his works: and so it was now; the stream of publication at once began and is even yet flowing, neither the supply of works nor the eagerness to obtain them having ceased. The world has not yet recovered from its astonishment as, one after another, the stores accumulated in those dusky heaps of music paper (valued at 8s. 6d.) were made public, each so astonishingly fresh, copious, and different from the last. As songs, masses, part-songs, operas, chamber-music of all sorts and all dimensions—pianoforte-sonatas, impromptus and fantasias, duets, trios, quartets, quintet, octet, issued from the press or were heard in manuscript; as each season brought its new symphony, overture, entr'acte, or ballet-music, people began to be staggered by the amount. 'A deep shade of suspicion,' said *The Musical World* of Jan. 24, 1839, p. 150, 'is beginning to be cast over the authenticity of posthumous compositions. All Paris has been in a state of amazement at the posthumous diligence of the song-writer, F. Schubert, who, while one would think that his ashes repose in peace in Vienna, is still making eternal new songs.' We know better now, but it must be confessed that the doubt was not so unnatural then.

Of the MS. music—an incredible quantity, of which no one then knew the amount or the particulars, partly because there was so much of it, partly because Schubert concealed, or rather forgot, a great deal of his work—a certain number of songs and pianoforte pieces were probably in the hands of publishers at the time of his death, but the great bulk was in the possession of Ferdinand, as his heir. A set of four songs (op. 105) was issued on the day of his funeral. Other songs—opp. 101, 104, 106, 110-112, 116-118; and two PF. Duets, the Fantasia in F minor (op. 103) and the 'Grand Rondeau' (op. 107)—followed up to April 1829. But the first important publication was the

¹ We have given the inscription exactly as it stands on the monument. Kreisel's version (p. 469), followed by Gumprecht and others, is incorrect in almost every line.

² See *Actenmässige Darstellung der Ausgrabung und Wiederbestattung der irdischen Reste von Beethoven und Schubert*, Vienna, Gerold, 1868.

well-known 'Schwanengesang,' so entitled by Haslinger—a collection of fourteen songs, seven by Rellstab, six by Heine, and one by Seidl— unquestionably Schubert's last. They were issued in May 1829, and, to judge by the lists of arrangements and editions given by Nottebohm, have been as much appreciated as the 'Schöne Müllerin' or the 'Winterreise.' A stream of songs followed—for which we must refer the student to Nottebohm's catalogue. The early part of 1830¹ saw the execution of a bargain between Diabelli and Ferdinand, by which that Firm was guaranteed the property of the following works; opp. 1-32, 35, 39-59, 62, 63, 64, 66-69, 71-77, 84-88, 92-99, 101-104, 106, 108, 109, 113, 115, 116, 119, 121-124, 127, 128, 130, 132-140, 142-153; also 154 songs; 14 vocal quartets; the canons of 1813; a cantata in C for three voices; the Hymn to the Holy Ghost; Klopstock's Stabat Mater in F minor, and Grosse Halleluja; Magnificat in C; the String Quintet in C; four string quartets in C, B \flat , G, B \flat ; a string trio in B \flat ; two sonatas in A and A minor, variations in F, an Adagio in D \flat , and Allegretto in C \sharp —all for PF. solo; Sonata for PF. and Arpeggione; Sonata in A, and Fantasie in C—both for PF. and violin; Rondo in A for violin and quartet; Adagio and Rondo in F, for PF. and quartet; a Concert-piece in D for violin and orchestra; Overture in D for orchestra; Overture to third Act of the 'Zauberharfe'; 'Lazarus'; a Tantum ergo in E \flat for four voices and orchestra; an Offertorium in B \flat for tenor solo, chorus and orchestra.

Another large portion of Ferdinand's possessions came, sooner or later, into the hands of Dr. Eduard Schneider, son of Franz's sister Theresia. They comprised the autographs of Symphonies 1, 2, 3, and 6, and copies of 4 and 5; Autographs of operas:—The 'Teufels Lustschloss,' 'Fernando,' 'Der Vierjährige Posten,' 'Die Freunde von Salamanka,' 'Die Bürgschaft,' 'Fierrabras,' and 'Sakontala'; the Mass in F; and the original orchestral parts of the whole of the music to 'Rosamunde.' The greater part of these are now (1882) safe in the possession of Herr Nicholas Dumba of Vienna.

On July 10, 1830, Diabelli began the issue of what was entitled 'Franz Schuberts nachgelassene musikalische Dichtungen'; and continued it at intervals till 1850, by which time 50 Parts (*Lieferungen*), containing 137 songs, had appeared. In 1830 he also issued the two astonishing 4-hand marches (op. 121); and a set of 20 waltzes (op. 127); whilst other houses published the PF. Sonatas in A and E \flat (opp. 120, 122); the two string quartets of the year 1824 (op. 125); the D minor Quartet, etc. For the

progress of the publication after this date we must again refer the reader to Nottebohm's invaluable *Thematic Catalogue* (Vienna, Schreiber, 1874), which contains every detail, and may be implicitly relied on; merely mentioning the principal works, and the year of publication:— 'Miriam,' Mass in B \flat , three last Sonatas and the Grand Duo, 1838; Symphony in C, 1840; Phantasia in C, PF. and violin, 1850; Quartet in G, 1852; Quintet in C, and Octet, 1854; 'Gesang der Geister,' 1858; 'Verschworenen,' 1862; Mass in E \flat , 1865; 'Lazarus,' 1866; Symphony in B minor, 1867; Mass in A \flat , 1875.

Before the complete critical edition of Schubert's works issued by Breitkopf & Härtel was finished, there were many publications of songs, pianoforte pieces, etc., for which the reader is referred to Nottebohm's *Thematic Catalogue*. Of the Songs two collections may be signalised as founded on the order of opus numbers:—that of Senff of Leipzig, edited by Julius Reitz, 361 songs in 20 vols. and that of Litolf of Brunswick—songs in 10 vols. But neither of these, though styled 'complete' are so. For instance, each omits opp. 83, 110, 129, 165, 172, 173; the six songs published by Müller, the forty by Gotthard; and Litolf also omits opp. 21, 60.

Schumann's visit to Vienna in the late autumn of 1838 formed an epoch in the history of the Schubert music. He saw the immense heap of MSS. which remained in Ferdinand's hands even after the mass bought by Diabelli had been taken away, and amongst them several symphonies. Such sympathy and enthusiasm as his must have been a rare delight to the poor desponding brother. His eagle eye soon discovered the worth of these treasures. He picked out several works to be recommended to publishers, but meantime one beyond all the rest riveted his attention—the great symphony of March 1828 (was it the autograph, not yet deposited in the safe keeping of the *Gesellschaft der Musikfreunde*, or a copy?) and he arranged with Ferdinand to send a transcript of it to Leipzig to Mendelssohn for the Gewandhaus Concerts, where it was produced March 21, 1839,² and repeated no less than three times during the following season. His chamber-music was becoming gradually known in the North, and as early as 1833 is occasionally met with in the Berlin and Leipzig programmes. David, who led the taste in chamber music at the latter place, was devoted to Schubert. He gradually introduced his works, until there were few seasons in which the Quartets in A minor, D minor (the score of which he edited for Senff), and G, the String Quintet in C (a special favourite), the Octet, both Trios, the PF. Quintet, and the Rondeau brilliant, were not performed amid great applause, at his concerts. Schumann had long

¹ The list which follows is taken from *Kreissle*, p. 566 (H. 245), who apparently had the original document before him. The only date given by Kreissle is 1830, but it must have been early in that year, since op. 121, which forms part of the bargain, was issued in February. Some of the numbers in the list had already been issued as the property of the publishers.

² March 22 in the *Allg. Mus. Zeitung*, March 21 in Schumann's paper. The Symphony was repeated Dec. 12, 1839, March 12, and April 3, 1840. Mendelssohn made a few cuts in the work for performance.

been a zealous Schubert propagandist. From an early date his *Zeitschrift* contains articles of more or less length, always inspired by an ardent admiration; Schubert's letters and poems and his brother's excellent short sketch of his life, printed in vol. x. (April 23 to May 3, 1839)—obvious fruits of Schumann's Vienna visit—are indispensable materials for Schubert's biography; when the Symphony was performed he dedicated to it one of his longest and most genial effusions,¹ and each fresh piece was greeted with a hearty welcome as it fell from the press. One of Schumann's special favourites was the E \flat Trio; he liked it even better than that in B \flat , and has left a memorandum of his fondness in the opening of the Adagio of his Symphony in C, which is identical, in key and intervals, with that of Schubert's Andante. The enthusiasm of these prominent musicians, the repeated performances of the Symphony, and its publication by Breitkopfs (in Jan. 1850), naturally gave Schubert a strong hold on Leipzig, at that time the most active musical centre of Europe; and after the foundation of the Conservatorium in 1843 many English and American students must have carried back the love of his romantic and tuneful music to their own countries.

Several performances of large works had taken place in Vienna since Schubert's death, chiefly through the exertions of Ferdinand, and of a certain Leitemayer, one of Franz's early friends; such as the E \flat Mass at the parish church of Maria Trost on Nov. 15, 1829; 'Miriam,' with Lachner's orchestration, at a Gesellschaft Concert in 1830; two new overtures in 1833; an overture in E, the Chorus of Spirits from 'Rosamunde,' the Grosses Halleluja, etc., early in 1835, and four large concerted pieces from 'Fierrabras' later in the year; an overture in D; the finale of the last Symphony; a march and chorus, and an air and chorus, from 'Fierrabras,' in April 1836; another new overture, and several new compositions from the 'Remains,' in the winter of 1837-38. As far as can be judged by the silence of the Vienna newspapers, these passed almost unnoticed. Even the competition with North Germany failed to produce the effect which might have been expected. It did indeed excite the Viennese to one effort. On the 15th of the December following the production of the Symphony at Leipzig its performance was attempted at Vienna, but though the whole work was announced,² such had been the difficulties at rehearsal that the first two movements alone were given, and they were only carried off by the interpolation of an air from 'Lucia' between them.

But symphonies and symphonic works can hardly be expected to float rapidly; songs are more buoyant, and Schubert's songs soon began to make their way outside, as they had long since done in his native place. Wherever they once penetrated their success was certain. In Paris, where spirit, melody, and romance are the certain criterions of success, and where nothing dull or obscure is tolerated, they were introduced by Nourrit, and were so much liked as actually to find a transient place in the programmes of the Concerts of the Conservatoire, the stronghold of musical Toryism.³ The first French collection was published in 1834, by Richault, with translation by Bélanger. It contained six songs—'Die Post,' 'Ständchen,' 'Am Meer,' 'Das Fischer-mädchen,' 'Der Tod und das Mädchen,' and 'Schlummerlied.' The 'Erl King' and others followed. A larger collection, with translation by Emil Deschamps, was issued by Brandus in 1838 or 1839. It is entitled 'Collection des Lieder de Franz Schubert,' and contains sixteen—'La jeune religieuse,' 'Marguerite,' 'Le roi des aulnes,' 'La rose,' 'La sérénade,' 'La poste,' 'Ave Maria,' 'La cloche des agonisants,' 'La jeune fille et la morte,' 'Rosemonde,' 'Les plaintes de la jeune fille,' 'Adieu,' 'Les astres,' 'La jeune mère,' 'La Berceuse,' 'Eloge des larmes.'⁴ Except that one—'Adieu'⁵—is spurious, the selection does great credit to Parisian taste. This led the way to the 'Quarante mélodies de Schubert' of Richault, Launer, etc., a thin 8vo volume, to which many an English amateur is indebted for his first acquaintance with these treasures of life. By 1845 Richault had published as many as 150 with French words.

Some of the chamber music also soon obtained a certain popularity in Paris, through the playing of Tilmant, Urhan, and Alkan, and later of Alard and Franchomme. The Trio in B \flat , issued by Richault in 1838, was the first instrumental work of Schubert's published in France. There is a 'Collection complète' of the solo PF. works published by Richault in 8vo, containing the Fantaisie (op. 15), ten sonatas, the two Russian marches, Impromptus, Moments musicaux, five single pieces, and nine sets of dances. Liszt and Heller kept the flame alive by their transcriptions of the songs and waltzes. But beyond this the French hardly know more of Schubert now than they did then; none of his large works have become popular with them. Habeneck attempted to rehearse the Symphony in C (No. 10) in 1842, but the band refused to go beyond the first movement, and Schubert's name up to this date (1881) appears in the

¹ *Ges. Schriften*, iii. 195. Schumann's expressions leave no doubt that the Symphony in C was in Ferdinand's possession at the time of his visit. This and many others of his articles on Schubert have been translated into English by Miss M. E. von Glehn, and Mrs. Ritter.

² The MS. parts in the possession of the Musikverein show the most cruel cuts, possibly with a view to this performance. In the Finale, one of the most essential and effective sections of the movement is clean expunged.

³ 'La jeune religieuse' and 'Le roi des aulnes' were sung by Nourrit, at the Concerts of Jan. 18, and April 26, 1835, respectively—the latter with orchestral accompaniment. On March 20, 1836, Marguerite was sung by Mlle. Falcon, and there the list stops.

⁴ This list is copied from the Paris correspondence of the *A.M.Z.*, 1839, p. 394.

⁵ This song is made up of phrases from Schubert's songs and will probably always be attributed to him. It stands even in Faurer's edition. But it is by A. H. von Weyrauch, who published it himself in 1824. See Nottebohm's *Catalogue*, p. 264.

programmes of the Concerts of the Conservatoire attached to three songs only. M. Padeloup introduced the Symphony in C and the fragments of that in B minor, but they took no hold on the Parisian amateurs.

Liszt's devotion to Schubert was great and unceasing. We have already mentioned his production of 'Alfonso und Estrella' at Weimar in 1854, but it is right to give a list of his transcriptions, which have done a very great deal to introduce Schubert into many quarters where his compositions would otherwise have been a sealed book. His first transcription—'Die Rose,' op. 73—was made in 1834, and appeared in Paris the same year.¹ It was followed in 1838 by the 'Ständchen,' 'Post,' and 'Lob der Tränen,' and in 1839 by the 'Erl King' and by twelve Lieder. These again by six Lieder; four Geistliche Lieder; six of the Müllerlieder; the 'Schwanengesang,' and the 'Winterreise.' Liszt also transcribed the Divertissement à la hongroise, three Marches and nine 'Valse-caprices,' or 'Soirées de Vienne,' after Schubert's op. 67. All the above are for PF. solo. He also scored the accompaniment to the 'Junge Nonne,' 'Gretchen am Spinnrade,' 'So lasst mich scheinen,' and the 'Erl King,' for small orchestra; has adapted the Allmacht for tenor solo, male chorus, and orchestra, and has converted the Fantasie in C (op. 15) into a Concerto for PF. and orchestra. Some will think these changes indefensible, but there is no doubt that they are done in a masterly manner, and that many of them have become very popular.—Heller's arrangements are confined to six favourite songs.

England made an appearance in the field with the 'Moment musical' in F minor in 1831, followed in 1832 by the 'Erl King' and the 'Wanderer.' In 1836 Mr. Ayrtton printed 'The Letter of Flowers' and 'The Secret,' in the Musical Library, to Oxford's translation. Mr. Wessel (Ashdown & Parry) had begun his 'Series of German Songs' earlier than this, and by 1840, out of a total of 197, the list included 38 of Schubert's, remarkably well chosen, and including several of the finest though less known ones, e.g. 'Ganymed,' 'An den Tod,' 'Sei mir gegrüßt,' 'Die Rose,' etc. etc. Ewer's 'Gems of German Song,' containing many of Schubert's, were begun in Sept. 1837. Schubert's music took a long time before it obtained any public footing in this country. The first time it appears in the Philharmonic programmes—then so ready to welcome novelties—is on May 20, 1839, when Ivanoff sang the Serenade in the 'Schwanengesang' to Italian words, 'Quando avvolta.' Staundigl gave the 'Wanderer,' May 8, 1843. On June 10, 1844, the Overture to 'Fierabras' was played under Mendelssohn's direction, and on June 17 the 'Junge Nonne' was sung to French words by M. de Reval,

Mendelssohn playing the magnificent accompaniment. We blush to say, however, that neither piece met with approval. *The Musical World* (1844, p. 197) says that 'the overture is literally beneath criticism: perhaps a more overrated man never existed than this same Schubert.' Its dictum on the song is even more unfortunate. It tells us that 'it is a very good exemplification of much ado about nothing—as unmeaningly mysterious as could be desired by the most devoted lover of bombast.' Mendelssohn conducted the last five Philharmonic concerts of that season (1844); and amongst other orchestral music new to England had brought with him Schubert's Symphony in C, and his own overture to 'Ruy Blas.' At the rehearsal on June 10, however, the behaviour of the band towards the symphony—excited, it is said, by the continual triplets in the Finale—was so insulting that he refused either to go on with it or to allow his own overture to be tried.² But the misbehaviour of our leading orchestra did not produce the effect which it had done in Paris; others were found to take up the treasures thus rudely rejected, and Schubert has had an ample revenge. The centres for his music in England have been—for the orchestral and choral works, the Crystal Palace, Sydenham, and Hallé's Concerts, Manchester; and for the chamber music, the Popular Concerts and Hallé's Recitals. At the Crystal Palace the Symphony in C (No. 10) was in the repertoire of the Saturday Concerts from April 5, 1856; the two movements of the B minor Symphony were first played April 6, 1867, and have been constantly repeated. The six other MS. Symphonies were obtained from Dr. Schneider in 1867 and since, and have been played at various dates, a performance of the whole eight in chronological order forming a feature in the series of 1880-81. The 'Rosamunde' music was first played Nov. 10, 1866, and the 'air de ballet' in G, March 16, 1867. Joachim's orchestration of the Grand Duo (op. 140) was given March 4, 1876. The overtures to 'Alfonso und Estrella,' 'Fierabras,' 'Freunde von Salamanka,' 'Teufels Lustschloss,' and that 'in the Italian style' have been frequently heard. 'Miriam's Song' was first given Nov. 14, 1868 (and three times since); the 'Conspirators,' March 2, 1872; the 23rd Psalm, Feb. 21, 1874; the Eb Mass, March 29, 1879. At the Popular Concerts a beginning was made May 16, 1859, with the A minor Quartet, the D major Sonata, and the Rondeau brillant. Afterwards the D major and G major Quartets, many sonatas and other

¹ These particulars are taken partly from Miss Ramann's *Life of Liszt*, and partly from Liszt's *Thematic Catalogue*. The third No. of the 'Apparitions' is founded on a Waltz melody of Schubert's.

² Even fifteen years later, when played at the Musical Society of London, the same periodical that we have already quoted says of it:—'The ideas throughout it are all of a minute character, and the instrumentation is of a piece with the ideas. There is no breadth, there is no grandeur, there is no dignity in either; clearness, and contrast, and beautiful finish are always apparent, but the orchestra, though loud, is never massive and sonorous, and the music, though always correct, is never serious or imposing.' (*Musical World*, April 2, 1859). Is it possible for criticism to be more hopelessly wrong?

PF. pieces were added, and the Octet, the Quintet in C, and the two Trios were repeated season by season, and enthusiastically received. The Quartet in B \flat , the trio in the same key, the Sonata for PF. and Arpeggione, etc. were brought to a hearing. A large number of songs were made familiar to the subscribers to these concerts through the fine interpretation of Stockhausen, Mme. Joachim, Miss Sophie Löwe, Mr. Santley, Mr. Henschel, and other singers. At Hallé's admirable recitals at St. James's Hall, from their commencement in 1861 all the published Sonatas were repeatedly played; not only the popular ones, but of those less known none have been given less than twice; the Fantasia in C, op. 15, three times; the PF. Quintet, the Fantasia for PF. and Violin, the Impromptus and Moments musicaux, the '5 pieces,' the '3 pieces,' the Adagio and Rondo, the Valses nobles, and other numbers of this fascinating music have been heard again and again.

The other principal publications in England are the vocal scores of the six Masses, the PF. accompaniment arranged from the full score by Ebenezer Prout, published by Augener & Co.—the 1st, 2nd, 3rd, 4th in 1871, the 6th (E \flat) in 1872, and the 5th (A \flat) in 1875.¹ The Masses have been also published by Novellos, both with Latin and English words ('Communion Service'); and the same firm has published 'Miriam,' in two forms, and the 'Rosamunde' music, both vocal score and orchestral parts. Messrs. Augener have also published editions of the PF. works, and of a large number of songs, by Pauer.

Schubert was not sufficiently important during his lifetime to attract the attention of painters, and although he had more than one artist in his circle, there are but three portraits of him known. 1. A poor stiff head by Leopold Kupelwieser, full face, taken July 10, 1821, photographed by Mietke and Wawra of Vienna, and wretchedly engraved as the frontispiece to Kreissle's biography. 2. A very characteristic half-length, three-quarter-face, in water-colours, by W. A. Rieder, taken in 1825, and now in possession of Dr. Granitsch of Vienna.² A replica by the artist, dated 1840, is now in the Musikverein. It has been engraved by Passini, and we here give the head, from a photograph expressly taken from the original. 3. The bust on the tomb, which gives a very prosaic version of his features.

His exterior by no means answered to his genius. His general appearance was insignificant. As we have already said, he was probably not more than 5 feet and 1 inch high, his figure was stout and clumsy, with a round

back and shoulders (perhaps due to incessant writing), fleshy arms, and thick short fingers. His complexion was pasty, nay even tallowy; his cheeks were full, his eyebrows bushy, and his nose insignificant. But there were two things that to a great extent redeemed these insignificant traits—his hair, which was black, and remarkably thick and vigorous,³ as if rooted in the brain within; and his eyes, which were truly 'the windows of his soul,' and even through the spectacles he constantly wore were so bright as at once to attract attention.⁴ If Rieder's portrait may be trusted—and it is said to be very faithful, though perhaps a little too *fine*—

they had a peculiarly steadfast penetrating look, which irresistibly reminds one of the firm rhythm of his music. His glasses are inseparable from his face. One of our earliest glimpses of him is 'a little boy in spectacles' at the *Convict*; he habitually slept in them; and within eighteen months of his death we see him standing in the window at Döbling, his glasses pushed up over his forehead, and Grillparzer's verses held close to his searching eyes. He had the broad strong jaw of all great men, and a marked assertive prominence of the lips. He had a beautiful set of teeth (Benedict). When at rest the expression of his face was uninteresting, but it brightened up at the mention of music, especially that of Beethoven. His voice was something between a soft tenor and a baritone. He sang 'like a composer,' without the least affectation or attempt.⁵

His general disposition was in accordance with his countenance. His sensibility, though his music shows it was extreme, was not roused

¹ Reviewed by Mr. E. Prout in *Concordia* for 1875, pp. 8, 29, 109, etc.

² He bought it in Feb. 1881 for 1205 florins, or about £120. It is about 8 inches high, by 8 wide. It was taken, or begun, while Schubert took refuge in the artist's house from a storm (Fohl).

³ All three portraits agree in this. An eminent surgeon of our own day is accustomed to say, 'Never trust a man with a great head of black hair, he is sure to be an enthusiast.'

⁴ W. v. Chyzy, *Erinnerungen*—'with eyes so brilliant as at the first glance to betray the fire within.'

⁵ Baumannfeld.

by the small things of life. He had little of that jealous susceptibility which too often distinguishes musicians, more irritable even than the 'irritable race of poets.' His attitude towards Rossini and Weber proves this. When a post which he much coveted was given to another,¹ he expressed his satisfaction at its being bestowed on so competent a man. Transparent truthfulness, good-humour, a cheerful contented evenness, fondness for a joke, and a desire to remain in the background—such were his prominent characteristics in ordinary life. But we have seen how this apparently impassive man could be moved by a poem which appealed to him, or by such music as Beethoven's C \sharp minor Quartet.² This unflinching good-nature, this sweet loveliness, doubtless enhanced by his reserve, was what attached Schubert to his friends. They admired him; but they loved him still more. Ferdinand perfectly adored him, and even the derisive Ignaz melts when he takes leave.³ Hardly a letter from Schwind, Schober, or Bauernfeld, that does not amply testify to this. Their only complaint is that he will not return their passion, that 'the affection of years is not enough to overcome his distrust and fear of seeing himself appreciated and beloved.'⁴ Even strangers who met him in this *entourage* were as much captivated as his friends. J. A. Berg of Stockholm, who was in Vienna in 1827, as a young man of twenty-four, and met him at the Bogners', speaks of him⁵ with the clinging affection which such personal charm inspires.

He was never really at his ease except among his chosen associates. When with them he was genial and compliant. At the dances of his friends he would extemporise the most lovely waltzes for hours together, or accompany song after song. He was even boisterous—playing the 'Erl King' on a comb, fencing, howling, and making many practical jokes. But in good society he was shy and silent, his face grave; a word of praise distressed him, he would repel the admiration when it came, and escape into the next room, or out of the house, at the first possible moment. In consequence he was overlooked, and of his important friends few knew, or showed that they knew, what a treasure they had within their reach. A great player like Booklet, after performing the B \flat Trio, could kneel to kiss the composer's hand in rapture, and with broken voice stammer forth his homage, but there is no trace of such tribute from the upper classes. What a contrast to Beethoven's position among his aristocratic friends—their devotion and patience, his contemptuous behaviour, the amount of pressing necessary to make him play, his scorn of emotion, and love of applause after he had finished! [See vol. i. p. 236.] The same contrast is visible in the

dedications of the music of the two—Beethoven's chiefly to crowned heads and nobility, Schubert's in large proportion to his friends. It is also evident in the music itself, as we shall endeavour presently to bring out.

He played, as he sang, 'like a composer,' that is, with less of *technique* than of knowledge and expression. Of the virtuoso he had absolutely nothing. He improvised in the intervals of throwing on his clothes, or at other times when the music within was too strong to be resisted, but as an exhibition or performance never, and there is no record of his playing any music but his own. He occasionally accompanied his songs at concerts (always keeping very strict time), but we never hear of his having extemporised or played a piece in public in Vienna. Notwithstanding the shortness of his fingers, which sometimes got tired,⁶ he could play most of his own pieces, and with such force and beauty as to compel a musician⁷ who was listening to one of his latest Sonatas to exclaim, 'I admire your playing more than your music,' an exclamation susceptible of two interpretations, of which Schubert is said to have taken the unfavourable one. But accompaniment was his *forte*, and of this we have already spoken [see pp. 304*b*, 309*b*, etc.]. Duet-playing was a favourite recreation with him. Schober, Gahy, and others, were his companions in this, and Gahy has left on record his admiration of the clean rapid playing, the bold conception and perfect grasp of expression, and the clever droll remarks that would drop from him during the piece.

His life as a rule was regular, even monotonous. He composed or studied habitually for six or seven hours every morning. This was one of the methodical habits which he had learned from his good old father; others were the old-fashioned punctilious style of addressing strangers which struck Hiller⁸ with such consternation, and the dating of his music. He was ready to write directly he tumbled out of bed, and remained steadily at work till two. 'When I have done one piece I begin the next' was his explanation to a visitor in 1827; and one of these mornings produced six of the songs in the 'Winterreise'! At two he dined—when there was money enough for dinner—either at the Gasthaus, where in those days it cost a 'Zwanziger' (8*½*d.), or with a friend or patron; and the afternoon was spent in making music, as at Mme. Lacsny Buchwieser's [p. 309*b*], or in walking in the environs of Vienna. If the weather was fine the walk was often prolonged till late, regardless of engagements in town; but if this was not the case, he was at the coffee-house by five, smoking his pipe and ready to joke with any of his set; then came an hour's music, as at Sofie Müller's [p. 303*b*];

⁶ Bauernfeld. ⁷ Hornalka. *K.Z.* p. 128 (l. 132).

⁸ *Künstlerleben*, p. 49. 'Schubert I find mentioned in my journal as a quiet man—possibly not always so, though it was only amongst his intimates that he broke out. When I visited him in his modest lodging he received me kindly, but so respectfully, as quite to frighten me.'

⁵ In a letter to the writer.

then the theatre, and supper at the Gasthaus again, and the coffee-house, sometimes till far into the morning. In those days no Viennese, certainly no young bachelor, dined at home; so that the repeated visits to the Gasthaus need not shock the sensibilities of any English lover of Schubert. [See p. 307*b*.] Nor list any one he led away with this notion that he was a sot, as some seem prone to believe. How could a sot—how could any one who even lived freely, and woke with a heavy head or a disordered stomach—have worked as he worked, and have composed nearly 1000 such works as his in eighteen years, or have performed the feats of rapidity that Schubert did in the way of opera, symphony, quartet, song, which we have enumerated? No sot could write six of the 'Winterreise' songs—perfect, enduring works of art—in one morning, and that no singular feat! Your Morlands and Poes are obliged to wait their time, and produce a few works as their brain and their digestion will allow them, instead of being always ready for their greatest efforts, as Mozart and Schubert were. Schubert—like Mozart—loved society and its accompaniments; he would have been no Viennese if he had not; and he may have been occasionally led away; but such escapades were rare. He does not appear to have cared for the other sex, or to have been attractive to them as Beethoven was, notwithstanding his ugliness. This simplicity curiously characterises his whole life; no feats of memory are recorded of him as they so often are of other great musicians; the records of his life contain nothing to quote. His letters, some forty in all, are evidently forced from him. 'Heavens and Earth,' says he, 'it's frightful having to describe one's travels; I cannot write any more.' 'Dearest friend'—on another occasion—'you will be astonished at my writing: I am so myself.'¹ Strange contrast to the many interesting epistles of Mozart and Mendelssohn, and the numberless notes of Beethoven! Beethoven was well read, a politician, thought much, and talked eagerly on many subjects. Mozart and Mendelssohn both drew; travelling was a part of their lives; they were men of the world, and Mendelssohn was master of many accomplishments. Schumann too, though a Saxon of Saxons, had travelled much, and while a most prolific composer, was a practised literary man. But Schubert has nothing of the kind to show. He not only never travelled out of Austria, but he never proposed it, and it is difficult to conceive of his doing so. To picture or work of art he very rarely refers. He expressed himself with such difficulty that it was all but impossible to argue with him.² Besides the letters just mentioned, a few pages of diary and four or five poems are all that he produced except his music. In literature his range was wide indeed,

but it all went into his music; and he was strangely uncritical. He seems to have been hardly able—at any rate he did not care—to discriminate between the magnificent songs of Goethe, Schiller, and Mayrhofer, the feeble domesticities of Kosegarten and Hölty, and the turgid couplets of the authors of his librettos. All came alike to his omnivorous appetite. But the fact is that, apart from his music, Schubert's life was little or nothing, and that is its most peculiar and most interesting fact. Music and music alone was to him all in all. It was not his *principal* mode of expression, it was his *only* one; it swallowed up every other. His afternoon walks, his evening amusements, were all so many preparations for the creations of the following morning. No doubt he enjoyed the country, but the effect of the walk is to be found in his music and his music only. He left, as we have said, no letters to speak of, no journal; there is no record of his ever having poured out his soul in confidence, as Beethoven did in the 'Will,' in the three mysterious letters to some unknown Beloved, or in his conversations with Bettina. He made no impression even on his closest friends beyond that of natural kindness, goodness, truth, and reserve. His life is all summed up in his music. No memoir of Schubert can ever be satisfactory, because no relation can be established between his life and his music; or rather, properly speaking, because there is no life to establish a relation with. The one scale of the balance is absolutely empty, the other is full to overflowing. In his music we have fluency, depth, acuteness, and variety of expression, unbounded imagination, the happiest thoughts, never-tiring energy, and a sympathetic tenderness beyond belief. And these were the result of natural gifts and of the incessant practice to which they forced him; for it seems certain that of education in music—meaning by education the severe course of training in the mechanical portions of their art to which Mozart and Mendelssohn were subjected—he had little or nothing. As we have already mentioned, the two musicians who professed to instruct him, Holzer and Ruzicka, were so astonished at his ability that they contented themselves with wondering, and allowing him to go his own way. And they are responsible for that want of counterpoint which was an embarrassment to him all his life, and drove him, during his last illness, to seek lessons. [See p. 316*a*.] What he learned, he learned mostly for himself, from playing in the *Convict* orchestra, from incessant writing, and from reading the best scores he could obtain; and, to use the expressive term of his friend Mayrhofer, remained a 'Naturalist' to the end of his life. From the operas of the Italian masters, which were recommended to him by Salieri, he advanced to those of Mozart, and of Mozart abundant

¹ *K.H.* p. 368 (II. 55); p. 417 (II. 104).

² Geyfried, in Schilling's *Lexicon*.

traces appear in his earlier instrumental works. In 1814 Beethoven was probably still taboed in the *Convict*; and beyond the 'Prometheus' music, and the first two Symphonies, a pupil there would not be likely to encounter anything of his.

To speak first of the orchestral works.

The first Symphony dates from 1814 (his 18th year), and between that and 1818 we have five more. These are all much tintured by what he was hearing and reading—Haydn, Mozart, Rossini, Beethoven (the last but slightly, for reasons just hinted at). Now and then—as in the second subjects of the first and last Allegros of Symphony 1, the first subject of the opening Allegro of Symphony 2, and the Andante of Symphony 5, the themes are virtually reproduced—no doubt unconsciously. The treatment is more his own, especially in regard to the use of the wind instruments, and to the 'working out' of the movements, where his want of education drives him to the repetition of the subject in various keys, and similar artifices, in place of contrapuntal treatment. In the slow movement and Finale of the Tragic Symphony, No. 4, we have exceedingly happy examples, in which, without absolutely breaking away from the old world, Schubert has revealed an amount of original feeling and an extraordinary beauty of treatment which already stamp him as a great orchestral composer. But whether always original or not in their subjects, no one can listen to these first six Symphonies without being impressed with their *individuality*. Single phrases may remind us of other composers, the treatment may often be traditional, but there is a fluency and continuity, a happy cheerfulness, an earnestness and want of triviality and an absence of labour, which proclaim a new composer. The writer is evidently writing because what he has to say must come out, even though he may occasionally couch it in the phrases of his predecessors. Beauty and profusion of melody reign throughout. The tone is often plaintive but never obscure, and there is always the irrepressible gaiety of youth and of Schubert's own Viennese nature, ready and willing to burst forth. His treatment of particular instruments, especially the wind, is already quite his own—a happy *conversational* way which at a later period becomes highly characteristic. At length, in the B minor Symphony (Oct. 30, 1822), we meet with something which never existed in the world before in orchestral music—a new class of thoughts and a new mode of expression which distinguish him entirely from his predecessors, characteristics which are fully maintained in the 'Rosamunde' music (Christmas, 1823), and culminate in the great C major Symphony (March 1828).

The same general remarks apply to the other instrumental compositions—the quartets and

PF. sonatas. These often show a close adherence to the style of the old school, but are always effective and individual, and occasionally, like the symphonies, varied by original and charming movements, as the Trio in the E♭ Quartet, or the Minuet and Trio in the E major one (op. 125, 1 and 2), the Sonata in A minor (1817), etc. The visit to Zselécs in 1824, with its Hungarian experiences, and the pianoforte proclivities of the Esterházy, seem to have given him a new impetus in the direction of chamber music. It was the immediate or proximate cause of the 'Grand Duo'—that splendid work in which, with Beethoven in his eye, Schubert was never more himself—and the *Divertissement à la hongroise*; as well as the beautiful and intensely personal String Quartet in A minor, which has been not wrongly said to be the most characteristic work of any composer; ultimately also of the D minor and G major Quartets, the String Quintet in C, and the last three Sonatas, in all of which the Hungarian element is strongly perceptible—all the more strongly because we hardly detect it at all in the songs and vocal works.

Here then, at 1822 in the orchestral works, and 1824 in the chamber music, we may perhaps draw the line between Schubert's mature and immature compositions. The step from the Symphony in C of 1818 to the Unfinished Symphony in B minor, or to the 'Rosamunde' Entr'acte in the same key, is quite as great as Beethoven's was from No. 2 to the *Eroica*, or Mendelssohn's from the C minor to the Italian Symphony. All trace of his predecessors is gone, and he stands alone in his own undisguised and pervading personality. All trace of his youth has gone too. Life has become serious, may cruel; and a deep earnestness and pathos animate all his utterances. Similarly in the chamber music, the Octet stands on the line, and all the works which have made their position and are acknowledged as great are on this side of it—the Grand Duo, the *Divertissement Hongroise*, the PF. Sonatas in A minor, D, and B♭, the *Fantasie-Sonata* in G; the *Impromptus* and *Moments musicaux*; the String Quartets in A minor, D minor, and G; the String Quintet in C; the *Rondo brillant*,—in short, all the works which the world thinks of when it mentions 'Schubert' (we are speaking now of instrumental music only) are on this side of 1822. On the other side of the line, in both cases, orchestra and chamber, are a vast number of works full of beauty, interest, and life; breathing youth in every bar, absolute Schubert in many movements or passages, but not completely saturated with him, not of sufficiently independent power to assert their rank with the others, or to compensate for the diffuseness and repetition which remained characteristics of their author to the last, but which in the later works are hidden or stoned for by

the astonishing force, beauty, romance, and personality inherent in the contents of the music. These early works will always be more than interesting; and no lover of Schubert but must regard them with the strong affection and fascination which his followers feel for every bar he wrote. But the judgment of the world at large will probably always remain what it now is.

He was, as Liszt so finely said, '*le musicien le plus poète que jamais*'¹—the most poetical musician that ever was; and the main characteristics of his music will always be its vivid personality, fullness, and poetry. In the case of other great composers, the mechanical skill and ingenuity, the very ease and absence of effort with which many of their effects are produced, or their pieces constructed, is a great element in the pleasure produced by their music. Not so with Schubert. In listening to him one is never betrayed into exclaiming 'How clever!' but very often 'How poetical, how beautiful, how intensely Schubert!' The impression produced by his great works is that the means are nothing and the effect everything. Not that he had no technical skill. Counterpoint he was deficient in, but the power of writing whatever he wanted he had absolutely at his fingers' end. No one had ever written more, and the notation of his ideas must have been done without an effort. In the words of Macfarren,² 'the committing his works to paper was a process that accompanied their composition like the writing of an ordinary letter that is indited at the very paper.' In fact we know, if we had not the manuscripts to prove it, that he wrote with the greatest ease and rapidity, and could keep up a conversation, not only while writing down but while inventing his best works; that he never hesitated; very rarely revised—it would often have been better if he had; and never seems to have aimed at making innovations or doing things for effect. For instance, in the number and arrangement of the movements, his symphonies and sonatas never depart from the regular Haydn pattern. They rarely show æsthetic artifices, such as quoting the theme of one movement in another movement,³ or running them into each other; changing their order, or introducing extra ones; mixing various times simultaneously—or similar mechanical means of producing unity or making novel effects, which often surprise and please us in Beethoven, Schumann, Mendelssohn, and Spohr. Nor did he ever indicate a programme, or prefix a motto to any of his works. His matter is so abundant and so full of variety and interest that he never seems to think of enhancing it by any devices. He did nothing to extend the formal limits of Symphony or Sonata, but he endowed them with

a magic, a romance, a sweet naturalness, which no one has yet approached. And as in the general structure so in the single movements. A simple canon, as in the E♭ Trio, the Andante of the B minor or the Scherzo of the C major Symphonies; an occasional round, as in the Masses and Part-songs;—such is pretty nearly all the science that he affords. His vocal fugues are notoriously weak, and the symphonies rarely show those piquant *fugatos* which are so delightful in Beethoven and Mendelssohn. On the other hand, in all that is necessary to express his thoughts and feelings, and to convey them to the hearer, he is inferior to none. Such passages as the return to the subject in the Andante of the B minor Symphony, or in the ballet air in G of 'Rosamunde'; as the famous horn passage in the Andante of the C major Symphony (No. 10)—which Schumann happily compares to a being from the other world gliding about the orchestra—or the equally beautiful violoncello solo farther on in the same movement, are unsurpassed in orchestral music for felicity and beauty, and have an emotional effect which no learning could give. There is a place in the working-out of the Rosamunde Entr'acte in B minor (change into G♯) in which the combination of modulation and scoring produces a weird and overpowering feeling quite exceptional, and the change to the major near the end of the same great work will always astonish. One of the most prominent beauties in these orchestral works is the exquisite and entirely fresh manner in which the wind instruments are combined. Even in his earliest Symphonies he begins that method of dialogue by interchange of phrases, which rises at last to the well-known and lovely passages in the Overture to 'Rosamunde' (2nd subject), the Trios of the B♭ Entr'acte, and the *Air de Ballet* in the same music, and in the Andantes of the eighth and tenth Symphonies. No one has ever combined wind instruments as these are combined. To quote Schumann once more—they talk and intertalk like human beings. It is no artful concealment of art. The artist vanishes altogether, and the loving, simple, human friend remains. It were well to be dumb in articulate speech with such a power of utterance at command! If anything were wanting to convince us of the absolute *inspiration* of such music as this it would be the fact that Schubert never can have heard either of the two Symphonies which we have just been citing.—But to return to the orchestra. The trombones were favourite instruments with Schubert in his later life. In the figural movements of his two last Masses he makes them accompany the voices in unison, with a persistence which is sometimes almost unbearable for its monotony. In portions of the C major Symphony also (No. 10) some may possibly find them too much used.⁴ But in

¹ Liszt's worst enemies will pardon him much for this sentence.

² Philharmonic programme, May 22, 1871.

³ Instances may be quoted from the Rondeau brillant, op. 70, where part of the introduction is repeated in the Rondeau, and from the pf. trio in E flat, op. 100, where the principal theme of the slow movement is repeated in the Finale.

⁴ There is a tradition that he doubted this himself, and referred the score to Lachner for his opinion.

other parts of the Masses they are beautifully employed, and in the Introduction and Allegro of the Symphony they are used with a noble effect, which not improbably suggested to Schumann the equally impressive use of them in his B \flat Symphony. The accompaniments to his subjects are always of great ingenuity and originality, and full of life and character. The triplets in the Finale to the tenth Symphony, which excited the *mal à propos* merriment of the Philharmonic orchestra (see p. 321b), are a very striking instance. Another is the incessant run of semiquavers in the second violins and violas which accompany the second theme in the Finale of the Tragic Symphony. Another, of which he is very fond, is the employment of a recurring monotonous figure in the inner parts:—

often running to great length, as in the Andantes of the Tragic and B minor Symphonies; the Moderato of the B \flat Sonata; the fine song 'Viola' (op. 123, at the return to A \flat in the middle of the song), etc. etc. In his best PF. music, the accompaniments are most happily fitted to the leading part, so as never to clash or produce discord. Rapidly as he wrote he did these things as if they were calculated. But they never obtrude themselves or become prominent. They are all merged and absorbed in the gaiety, pathos, and personal interest of the music itself, and of the man who is uttering through it his griefs and joys, his hopes and fears, in so direct and touching a manner as no composer ever did before or since, and with no thought of an audience, of fame, or success, or any other external thing. No one who listens to it can doubt that Schubert wrote for himself alone. His music is the simple utterance of the feelings with which his mind is full. If he had thought of his audience, or the effect he would produce, or the capabilities of the means he was employing, he would have taken more pains in the revision of his works. Indeed the most affectionate disciple of Schubert must admit that the want of revision is often but too apparent.

In his instrumental music he is often very diffuse. When a passage pleases him he generally repeats it at once, almost note for note. He will reiterate a passage over and over in different keys, as if he could never have done. In the songs this does not offend; and even here, if we knew what he was thinking of, as we do in the songs, we might possibly find the repetitions just. In the E \flat Trio he repeats in the Finale a characteristic accompaniment which

is very prominent in the first movement and which originally belongs perhaps to the A \flat Impromptu (op. 90, No. 4)—and a dozen other instances of the same kind might be quoted.¹ This arose in great part from his imperfect education, but in great part also from the furious pace at which he dashed down his thoughts and feelings, apparently without previous sketch, note, or preparation; and from his habit of never correcting a piece after it was once on paper. Had he done so he would doubtless have taken out many a repetition, and some trivialities which seem terribly out of place amid the usual nobility and taste of his thoughts. It was doubtless this diffuseness and apparent want of aim, as well as the jolly, untutored *naïveté* of some of his subjects (Rondo of D major Sonata, etc.), and the incalculable amount of modulation, that made Mendelssohn shrink from some of Schubert's instrumental works, and even go so far as to call the D minor quartet *schlechte Musik*—i.e. 'nasty music.' But unless to musicians whose fastidiousness is somewhat abnormal—as Mendelssohn's was—such criticisms only occur afterwards, on reflection; for during the progress of the work all is absorbed in the intense life and personality of the music. And what beauties there are to put against these redundances! Take such movements as the first Allegro of the A minor Sonata or the B \flat Sonata; the G major Fantasia-Sonata; the two Characteristic Marches; the Impromptus and Moments musicaux; the Minuet of the A minor Quartet; the Variations of the D minor Quartet; the Finale of the B \flat Trio; the first two movements, or the Trio, of the String Quintet; the two movements of the B minor Symphony, or the wonderful Entr'acte in the same key in 'Rosamunde'; the Finale of the tenth Symphony—think of the abundance of the thoughts, the sudden surprises, the wonderful transitions, the extraordinary pathos of the turns of melody and modulation, the absolute manner (to repeat once more) in which they bring you into contact with the affectionate, tender, suffering personality of the composer,—and who in the whole realm of music has ever approached them? For the magical expression of such a piece as the Andantino in A \flat (op. 94, No. 2), any redundancy may be pardoned.

In Schumann's words, 'he has strains for the most subtle thoughts and feelings, nay even for the events and conditions of life; and innumerable as are the shades of human thought and action, so various is his music.'² Another equally true saying of Schumann's is that, compared with Beethoven, Schubert is as a woman to a man. For it must be confessed that one's attitude towards him is almost always that of sympathy, attraction, and love, rarely that of embarrassment or fear. Here and there

¹ For a comparison of his Sonatas with those of other masters see SONATA.

² Ges. Schriften, i. 206.

only, as in the Rosamunde B minor Entr'acte, or the Finale of the tenth Symphony, does he compel his hearers with an irresistible power; and yet how different is this compulsion from the strong, fierce, merciless coercion, with which Beethoven forces you along, and bows and bends you to his will, in the Finale of the eighth or still more that of the seventh Symphony.

We have mentioned the gradual manner in which Schubert reached his own style in instrumental music (see p. 325). In this, except perhaps as to quantity, there is nothing singular, or radically different from the early career of other composers. Beethoven began on the lines of Mozart, and Mendelssohn on those of Weber, and gradually found their own independent style. But the thing in which Schubert stands alone is that while he was thus arriving by degrees at individuality in Sonatas, Quartets, and Symphonies, he was pouring forth songs by the dozen, many of which were of the greatest possible novelty, originality, and mastery, while all of them have that peculiar *cachet* which is immediately recognisable as his. The chronological list of his works shows that such masterpieces as the 'Gretchen am Spinnrade,' the 'Erl King,' the Ossian Songs, 'Gretchen im Dom,' 'Der Taucher,' 'Die Bürgschaft,' were written before he was nineteen, and were contemporary with his very early efforts in the orchestra and chamber music; and that by 1822—in the October of which he wrote the two movements of his eighth Symphony, which we have named as his first absolutely original instrumental music—he had produced in addition such ballads as 'Ritter Toggenburg' (1816), and 'Einsamkeit' (1818); such classical songs as 'Memnon' (1817), 'Antigone und Œdip' (1817), 'Iphigenia' (1817), 'Ganymed' (1817), 'Fahrt zum Hades' (1817), 'Prometheus' (1819), 'Gruppe aus dem Tartarus' (1817); Goethe's 'Wilhelm Meister' songs, 'An Schwager Kronos' (1816), 'Grenzen der Menschheit' (1821), Suleika's two songs (1821), 'Geheimes' (1821); as well as the 'Wanderer' (1816), 'Sei mir gegrüßet' (1821), 'Waldesnacht' (1820), 'Greisengesang' (1822), and many more of his very greatest and most immortal songs.

And this is very confirmatory of the view already taken in this article (p. 289a) of Schubert's relation to music. The reservoir of music was within him from his earliest years, and songs being so much more direct a channel than the more complicated and artificial courses and conditions of the symphony or the sonata, music came to the surface in them so much the more quickly. Had the orchestra or the piano been as direct a mode of utterance as the voice, and the forms of symphony or sonata as simple as that of the song, there seems no reason why he should not have written instrumental music as characteristic as his eighth Symphony, his

Sonata in A minor, and his Quartet in the same key, eight years earlier than he did; for the songs of that early date prove that he had then all the original power, imagination, and feeling, that he ever had. That it should have been given to a comparative boy to produce strains which seem to breathe the emotion and experience of a long life is only part of the wonder which will also surround Schubert's songs. After 1822, when his youth was gone, and health had begun to fail, and life had become a terrible reality, his thoughts turned inwards, and he wrote the two great cycles of the 'Müllerlieder' (1823) and the 'Winterreise' (1827); the Walter Scott and Shakespeare songs; the splendid single songs of 'Im Walde' and 'Auf der Bruck,' 'Todtengräbers Heimweh,' 'Der Zwerg,' 'Die junge Nonne'; the Barcarolle, 'Du bist die Ruh,' and the lovely 'Dass sie hier gewesen'; the 'Schiffers Scheidelied,' those which were collected into the so-called 'Schwanengesang,' and many more.

It is very difficult to draw a comparison between the songs of this later period and those of the earlier one, but the difference must strike every one, and it resides mainly perhaps in the subjects themselves. Subjects of romance—of ancient times and remote scenes, and strange adventures, and desperate emotion—are natural to the imagination of youth. But in maturer life the mind is calmer, and dwells more strongly on personal subjects. And this is the case with Schubert. After 1822 the classical songs and ballads are rare, and the themes which he chooses belong chiefly to modern life and individual feeling, such as the 'Müllerlieder' and the 'Winterreise,' and others in the list just given. Walter Scott's and Shakespeare's form an exception, but it is an exception which explains itself. We no longer have the exuberant dramatic force of the 'Erl King,' 'Ganymed,' the 'Gruppe aus dem Tartarus,' 'Cronnan,' or 'Kolma's Klage'; but we have instead the condensation and personal point of 'Pause,' 'Die Post,' 'Das Wirthshaus,' 'Die Nebensonnen,' the 'Doppelgänger,' and the 'Junge Nonne.' And there is more maturity in the treatment. His modulations are fewer. His accompaniments are always interesting and suggestive, but they gain in force and variety and quality of ideas in the later songs.

In considering the songs themselves somewhat more closely, their most obvious characteristics are:—Their number; their length; the variety of the words; their expression, and their other musical and poetical peculiarities.

1. Their number. The published songs, that is to say the compositions for one and two voices, excluding Offertories and songs in operas, amount to 603.

2. Their length. This varies very much. The shortest, like 'Klage um Aly Bey,' 'Der Goldschmiedsgesell,' and 'Die Spinnerin' (op.

This facsimile page from Schubert's manuscript of his 9th Symphony (the "Great") shows the orchestral parts for the Clarinet, Trombone, and Tuba. The staves are arranged vertically, with the Clarinet part at the top, followed by the Trombone part, and the Tuba part at the bottom. The notation is handwritten, showing various musical symbols, notes, and rests. The Clarinet part features a melodic line with many beamed sixteenth notes. The Trombone part has a more rhythmic, dotted pattern. The Tuba part consists of a few notes and rests. The manuscript is written on a single page, with the staves connected by a large bracket on the left side.

Fac-simile page of the manuscript of Schubert's great Sym
From the original autograph in the

the alteration in the principal subject of the first movement.
"Gesellschaft der Musikfreunde," Vienna.

118, 6), are strophic songs (that is, with the same melody and harmony unchanged verse after verse), in each of which the voice part is only eight bars long, with a bar or two of introduction or ritornel. The longest is Bertrand's 'Adelwold und Emma' (June 5, 1815), a ballad the autograph of which contains fifty-five pages. Others of almost equal length and of about the same date are:—'Minona,' 'Die Nonne,' 'Amphiarao,' etc. Another is Schiller's 'Der Taucher,' which fills thirty-six pages of close print. Schiller's 'Bürgschaft' and the Ossian-songs are all long, though not of the same extent as 'Der Taucher.' These vast ballads are extremely dramatic; they contain many changes of tempo and of signature, dialogues, recitatives, and airs. The 'Ritter Toggenburg' ends with a strophic song in five stanzas. 'Der Taucher' contains a long piano-forte passage of sixty bars, during the suspense after the diver's last descent. 'Der Liedler' contains a march. The Ballads mostly belong to the early years, 1815, 1816. The last is Mayrhofer's 'Einsamkeit,' the date of which Schubert has fixed in his letter of August 3, 1818. There are long songs of later years, such as Collin's 'Der Zwerg' of 1823; Schober's 'Viola' and 'Vergissmeinnicht' of 1823, and 'Schiffers Scheidelied' of 1827, and Leitner's 'Der Winterabend' of 1828; but these are essentially different from the ballads; they are lyrical, and evince comparatively few mechanical changes.

It stands to reason that in 603 songs collected from all the great German poets, from Klopstock to Heine, there must be an infinite variety of material, form, sentiment, and expression. And one of the most obvious characteristics in Schubert's setting of this immense collection is the close way in which he adheres to the words.¹ Setting a song was no casual operation with him, rapidly as it was often done; but he identified himself with the poem, and the poet's mood for the time was his. Indeed he complains of the influence which the gloom of the 'Winterreise' had had upon his spirits. He does not, as is the manner of some song-composers, set the poet at naught by repeating his words over and over again. This he rarely does; but he goes through his poem and confines himself to enforcing the expression as music alone can do to poetry. The music changes with the words as a landscape does when sun and cloud pass over it. And in this Schubert has anticipated Wagner, since the words to which he writes are as much the absolute basis of his songs, as Wagner's librettos are of his operas. What this has brought him to in such cases as the 'Erl King,' the 'Wanderer,' 'Schwager

Kronos,' the 'Gruppe aus dem Tartarus,' the Shakespeare songs of 'Sylvia' and 'Hark, hark, the lark!' those of Ellen and the Huntsman in 'The Lady of the Lake,' even Englishmen can judge; but what he did in the German literature generally may be gathered from the striking passage already quoted from Vogl (pp. 288-9), and from Mayrhofer's confession—doubly remarkable when coming from a man of such strong individuality—who somewhere says that he did not understand the full force even of his own poems until he had heard Schubert's setting of them.

One of his great means of expression is modulation. What magic this alone can work may be seen in the Trio of the Sonata in D. As in his PF. works, so in the songs, he sometimes carries it to an exaggerated degree. Thus in the short song 'Liedesend' of Mayrhofer (Sept. 1816), he begins in C minor, and then goes quickly through E♭ into C♯ major. The signature then changes, and we are at once in D major; then C major. Then the signature again changes to that of A♭, in which we remain for fifteen bars. From A♭ it is an easy transition to F minor, but a very sudden one from that again to A minor. Then for the breaking of the harp we are forced into D♭, and immediately, with a further change of signature, into F♯. Then for the King's song, with a fifth change of signature, into B major; and lastly, for the concluding words,

Und immer näher schreitet
Vergänglichkeit und Grab—

a sixth change, with eight bars in E minor, thus ending the song a third higher than it began.

In Schiller's 'Der Pilgrim' (1825), after two strophes (four stanzas) of a chorale-like melody in D major, we come, with the description of the difficulties of the pilgrim's road—mountains, torrents, ravines—to a change into D minor, followed by much extraneous modulation, reaching A♭ minor, and ending in F, in which key the first melody is repeated. At the words 'näher bin ich nicht zum Ziel'—we have a similar phrase and similar harmony (though in a different key) to the well-known complaint in the 'Wanderer,' 'Und immer fragt der Seufzer, Wo?' The signature then changes, and the song ends very impressively in B minor.

These two are quoted, the first as an instance rather of exaggeration, the second of the mechanical use of modulations to convey the natural difficulties depicted in the poem. But if we want examples of the extraordinary power with which Schubert wields this great engine of emotion, we would mention another song which contains one of the best instances to be found of propriety of modulation. I allude to Schubert's short poem to Death, 'An den Tod,' where the gloomy subjects and images of the poet have tempted the composer to a series of successive

¹ It is strange to find his practice in the Masses so different. There—a critic has pointed out—in every one of the six, words are either omitted or incorrectly jumbled together (Mr. Prout, in *Concordia*, 1875, p. 110a). Was this because he understood the Latin words imperfectly?

changes so grand, so sudden, and yet so easy, and so thoroughly in keeping with the subject, that it is impossible to hear them unmoved.

But modulation, though an all-pervading means of expression in Schubert's hands, is only one out of many. Scarcely inferior to the wealth of his modulation is the wealth of his melodies. The beauty of these is not more astonishing than their variety and their fitness to the words. Such tunes as those of 'Ave Maria,' or the Serenade in the 'Schwanengesang,' or 'Ungeduld,' or the 'Grünen Lautenband,' or 'Anna Lyle,' or the 'Dithyrambe,' or 'Geheimnis,' or 'Sylvia,' or the 'Lindenbaum,' or 'Du bist die Ruh,' or the 'Barcarolle,' are not more lovely and more appropriate to the text than they are entirely different from one another. One quality only, spontaneity, they have in common. With Beethoven, spontaneity was the result of labour, and the more he polished the more natural were his tunes. But Schubert read the poem, and the appropriate tune, married to immortal verse (a marriage, in his case, truly made in heaven), rushed into his mind, and to the end of his pen. It must be confessed that he did not always think of the compass of his voices. In his latest songs, as in his earliest (see p. 281), we find him taking the singer from the low B \flat to F, and even higher.

The tune, however, in a Schubert song is by no means an exclusive feature. The accompaniments are as varied and as different as the voice-parts, and as important for the general effect. They are often extremely elaborate, and the publishers' letters contain many complaints of their difficulty.¹ They are often most extraordinarily suitable to the words, as in the 'Erl King,' or the beautiful 'Dass sie hier gewesen,' the 'Gruppe aus dem Tartarus,' the 'Waldesnacht' (and many others); where it is almost impossible to imagine any atmosphere more exactly suitable to make the words grow in one's mind, than is supplied by the accompaniment. Their unerring certainty is astonishing. Often, as in 'Heliopolis,' or 'Auflösung,' he seizes at once on a characteristic impetuous figure, which is then carried on without intermission to the end. In 'Anna Lyle,' how exactly does the sweet monotony of the repeated figure fall in with the dreamy sadness of Scott's touching little lament! Another very charming example of the same thing, though in a different direction, is found in 'Der Einsame,' a fireside piece, where the frequently-recurring group of four semiquavers imparts an indescribable air of domesticity to the picture.² In the 'Winterabend'—the picture of a calm moonlit evening—the accompaniment, aided by a somewhat similar little figure, conveys inimitably the very breath of the scene. Such atmospheric

effects as these are very characteristic of Schubert.

The voice-part and the accompaniment sometimes form so perfect a whole, that it is impossible to disentangle the two; as in 'Sylvia,' where the persistent dotted quaver in the bass, and the rare but delicious ritornel of two notes in the treble of the piano-part (bars 7, 14, etc.), are essential to the grace and sweetness of the portrait, and help to place the lovely English figure before us. This is the case also in 'Anna Lyle' just mentioned, where the ritornel in the piano-part (bar 20, etc.) is inexpressibly soothing and tender in its effect, and sounds like the echo of the girl's sorrow. The beautiful Serenade in the 'Schwanengesang,' again, combines an incessant rhythmical accompaniment with ritornels (longer than those in the last case), both uniting with the lovely melody in a song of surpassing beauty. In the 'Liebesbotschaft,' the rhythm is not so strongly marked, but the ritornels are longer and more frequent, and form a charming feature in that exquisite love-poem. Schubert's passion for rhythm comes out as strongly in many of the songs as it does in his marches and scherzos. In the two just named, though persistent throughout, the rhythm is subordinated to the general effect. But in others, as 'Suleika,' 'Die Sterne,' the 'Nachtgesang im Walde,' 'Erstarrung,' or 'Frühlingssehnsucht,' it forces itself more on the attention.

Schubert's basses are always splendid, and are so used as not only to be the basis of the harmony but to add essentially to the variety and effect of the songs. Sometimes, as in 'Die Krähe,' they are in unison with the voice-part. Often they share with the voice-part itself in the melody and structure of the whole. The wealth of ideas which they display is often astonishing. Thus in 'Waldesnacht,' a very long song of 1820, to a fine imaginative poem by F. Schlegel, describing the impressions produced by a night in the forest, we have a splendid example of the *organic life* which Schubert can infuse into a song. The pace is rapid throughout; the accompaniment for the right hand is in arpeggios of semiquavers throughout, never once leaving off; the left hand, where not in semiquavers also, has a succession of noble and varied rhythmical melodies, independent of the voice, and the whole is so blended with the voice part—itself extraordinarily broad and dignified throughout; the spirit and variety, and the poetry of the whole are so remarkable, and the mystery of the situation is so perfectly conveyed, as to make the song one of the finest of that class in the whole Schubert collection. The same qualities will be found in 'Auf der Bruck' (1825).

We do not say that this is the highest class of his songs. The highest class of poetry, and of music illustrating and enforcing poetry, must always deal with human joys and sorrows, in

¹ Op. 87, containing three songs by no means difficult, was published with a notice on the title-page that care had been taken (we trust with Schubert's consent) to omit everything that was too hard.

² A similar mood is evoked in the Andante of the Grand Duo (op. 140).

their most individual form, with the soul loving or longing, in contact with another soul, or with its Maker; and the greatest of Schubert's songs will lie amongst those which are occupied with those topics, such as 'Gretchen am Spinnrade,' the 'Mignon' songs, the 'Wanderer,' the 'Müllerlieder,' and 'Winterreise,' and perhaps highest of all, owing to the strong religious element which it contains, the 'Junge Nonne.'¹ In that wonderful song, which fortunately is so well known that no attempt at describing it is necessary, the personal feelings and the surroundings are so blended—the fear, the faith, the rapture, the storm, the swaying of the house, are so given, that for the time the hearer becomes the Young Nun herself. Even the convent bell, which in other hands might be a burlesque, is an instrument of the greatest beauty.

We have spoken of the mental atmosphere which Schubert throws round his poems; but he does not neglect the representation of physical objects. He seems to confine himself to the imitation of natural noises, and not to attempt things which have no sound. The triplets in the *Lindenbaum* may be intended to convey the fluttering leaves of the lime-tree, and the accompaniment-figure in 'Die Forelle' may represent the leaps of the trout; but there are other objects about which no mistake can be made. One imitation of the bell we have just referred to. Another is in the 'Abendbilder,' where an F# sounds through sixteen bars to represent the 'evening bell'; in the 'Zünglein' the upper E is heard through the whole piece; and the bell of St. Mark's is a well-known feature in the part-song of the 'Gondelfahrer.' The post-horn forms a natural feature in 'Die Post,' and the hurdy-gurdy in 'Der Leiermann.' Of birds he gives several instances; the Nightingale in 'Ganymed' and 'Die gefangene Sänger'; the Raven in 'Abendbilder,' and perhaps in 'Frühlingstraum'; the Cuckoo in 'Einsamkeit,' the Quail in 'Der Wachtelschlag'; and the Cock in 'Frühlingstraum.'

That hesitation between major and minor which is so marked in Beethoven is characteristic also of Schubert, and may be found in nearly every piece of his. A beautiful instance may be mentioned *en passant* in the trio of the G major Fantasia Sonata (op. 78), where the two bars in E minor which precede the E major have a peculiarly charming effect. Another is supplied by the four bars in A minor, for the question which begins and ends the beautiful fragment from Schiller's 'Gods of ancient Greece.' He also has an especially happy way—surely peculiarly his own—of bringing a minor piece to a conclusion in the major. Two instances of it, which all will remember, are in the Romance from 'Rosamunde':—

¹ The poems of Craigher, *Poetische Betrachtungen in freyen Stunden*, von Nicolaus, mit einer Vorrede . . . von Friedrich von Schlegel, were printed by Gerold of Vienna in 1828.

Das laßtes Herz, es ist so schön, wenn treu die Trennung kusst.

and in the 'Moment musical,' No. 3, in F minor. This and the ritornels already spoken of strike one like personal features or traits of the composer. But apart from these idiosyncrasies, the changes from minor to major in the songs are often superb. That in the 'Schwager Kronos' (astonishing² production for a lad under twenty), where the key changes into D major, and farther on into F major, to welcome the girl on the threshold, with the sudden return to D minor for the onward journey, and the sinking sun—can be forgotten by no one who hears it, nor can that almost more beautiful change to D major in the 'Gute Nacht' on the mention of the dream. This latter, and the noble transition to F major in the 'Junge Nonne' are too familiar to need more than a passing reference, or that to G major in the 'Rückblick,' for the lark and nightingale and the girl's eyes, or to D major in the Serenade. 'Irdisches Glück' is in alternate stanzas of major and minor. In Schiller's 'Rose' (op. 73) every shade in the fate of the flower is thus indicated; and this is no solitary instance, but in almost every song some example of such faithful painting may be found. A word will often do it. With Schubert the minor mode seems to be synonymous with trouble, and the major with relief; and the mere mention of the sun, or a smile, or any other emblem of gladness, is sure to make him modulate. Some such image was floating before his mind when he made the beautiful change to A major near the beginning of the A minor Quartet (bar 23).

The foregoing remarks, which only attempt to deal with a few of the external characteristics of these astonishing songs, will be of use if they only encourage the knowledge and study of them. The chronological list of Schubert's productions [which appeared in the first edition of the Dictionary, and has now been superseded by the list in the complete edition of Breitkopf & Härtel] will throw much light on the progress of his genius, by facilitating the search where alone it can be made with profit, namely in the works themselves. All are worth knowing, though all are by no means of equal excellence.

I end my imperfect sketch of the life and works of this wonderful musician, by recalling the fact that Schubert's songs, regarded as a department of music, are absolutely and entirely his own. Songs there were before him, those of Schulz for instance, and of Zumsteeg, which he so greatly admired, and of Haydn and Mozart—touching, beautiful expressions of simple thought and feeling. But the Song, as we know it in his hands; full of dramatic fire, poetry, and pathos;

² Why is this wonderful song never sung in public in England?

set to no simple Volkslied, but to long complex poems, the best poetry of the greatest poets, and an absolute reflection of every change and breath of sentiment in that poetry; with an accompaniment of the utmost force, fitness, and variety—such songs were his and his alone. With one exception. Beethoven left but one song of importance, his 'Liederkreis' (op. 98), but that is of superlative excellence. The 'Liederkreis,' however, was not published till Dec. 1816, and even if Schubert made its acquaintance immediately, yet a reference to the Chronological List will show that by that time his style was formed, and many of his finest songs written. He may have gained the idea of a connected series of songs from Beethoven, though neither the 'Schöne Müllerin' nor the 'Winterreise' have the same intimate internal connection as the 'Liederkreis'; but the character and merits of the single songs remain his own. When he wrote 'Loda's Gespenst' and 'Kolma's Klage' in 1815, he wrote what no one had ever attempted before. There is nothing to detract from his just claim to be the creator of German Song, as we know it, and the direct progenitor of those priceless treasures in which Schumann, Mendelssohn, and Brahms have followed his example.

Of Schubert's religion it is still more difficult to say anything than it was of Beethoven's, because he is so much more reticent. A little poem of Sept. 1820, one of two preserved by Robert Schumann (*Neue Zeitschrift für Musik*, Feb. 5, 1839), is as vague a confession of faith as can well be imagined.

THE SPIRIT OF THE WORLD.

Leave them, leave them, to their dream,
I hear the Spirit say :—
It and only it can keep them
Near me on their darkling way.
Leave them racing, hurrying on
To some distant goal,
Building creeds and proofs upon
Half-seen flashes in the soul.
Not a word of it is true.
Yet what loss is theirs or mine?
In the maze of human systems
I can trace the thought divine.

The other, three years later, May 8, 1823, is somewhat more definite. It calls upon a 'mighty father' to look upon His son lying in the dust; and implores Him to pour upon him the everlasting beams of His love; and, even though He kill him, to preserve him for a purer and more vigorous existence. It expresses—very imperfectly, it is true, but still unmistakably—the same faith that has been put into undying words in the prologue to *In Memoriam*.

Franz may not have gone the length of his brother Ignaz¹ in vulgar scoffing at religious forms and persons, which no doubt were very empty in Vienna at that date; but still of formal or dogmatic religion we can find no traces, and we must content ourselves with the practical

¹ See his letter in *Kreiszeitung*, p. 147 (l. 148).

piety displayed in his love for his father and Ferdinand, and testified to by them in their touching words and acts at the time of his death (pp. 316-17); and with the certainty that, though irregular after the irregularity of his time, Schubert was neither selfish, sensual, nor immoral. What he was in his inner man we have the abundant evidence of his music to assure us. Whatever the music of other composers may do, no one ever rose from hearing a piece by Schubert without being benefited by it. Of his good-nature to those who took the bread out of his mouth we have already spoken. Of his modesty we may be allowed to say that he was one of the very few musicians who ever lived who did not behave as if he thought himself the greatest man in the world.² And these things are all intrinsic parts of his character and genius.

That he died at an earlier age³ even than Mozart or Mendelssohn, or our own Purcell, must be accounted for on the ground partly of his extraordinary exertions, but still more of the privations to which he was subjected from his very earliest years. His productions are enormous, even when measured by those of the two great German composers just named, or even of Beethoven, who lived to nearly double his years. At an age when Beethoven had produced one Symphony he had written ten, besides a mass of works great and small. 'Fairer hopes'? Had he lived, who can doubt that he would have thrown into the shade all his former achievements? But as we have endeavoured to explain, his music came so easily and rapidly that it was probably not exhausting. It was his privations, his absolute poverty, and the distress which he naturally felt at finding that no exertions could improve his circumstances, or raise him in the scale of existence, that in the end dragged him down. Nearly the first distinct glimpse we catch of him is in the winter of 1812, supplicating his brother for a roll, some apples, or a few halfpence, to keep off the hunger of the long fast in the freezing rooms of the *Convict*. Within a year of his death we catch sight of him again, putting up with coffee and biscuits because he has not 8½d. to buy his dinner with; selling his great Trio for 17s. 6d., and his songs at 10d. each, and dying the possessor of effects which were valued at little more than two pounds. Beside this the poverty of Mozart—the first of the two great musicians whom Vienna has allowed to starve—was wealth.

² This modesty comes out in a letter to Ferdinand of July 16-18, 1824, where Schubert says, 'It would be better to play some other quartets than mine' (probably referring to those in E and Eb), 'since there is nothing in them except perhaps the fact that they please you, as everything of mine pleases you. True,' he goes on, 'you do not appear to have liked them so much as the waltzes at the Ungarische Krone,' alluding to a clock at that eating-house of which Ferdinand had told him, which was set to play Franz's waltzes. The clock chose how popular Schubert was amongst his own set, and I regret having overlooked the fact in its proper place.

³ The following are among the musicians, poets, and painters who have died in the fourth decade of their lives. Shelley, 30; Sir Philip Sidney, 32; Bellini, 33; Mozart, 35; Byron, 36; Raffaele, 37; Burns, 37; Purcell, 37; Mendelssohn, 38; Weber, 39; Chopin, 40.

Such facts as these reduce the so-called friendship of his associates to its right level. With his astonishing power of production the commonest care would have ensured him a good living; and that no one of his set was found devoted enough to take this care for him, and exercise that watch over ways and means which Nature had denied to his own genius, is a discredit to them all. They prate of their devotion to their friend, when not one of them had the will or the wit to prevent him from starving; for such want as he often endured must inevitably have injured him, and we cannot doubt that his death was hastened by the absence of those comforts, not to say necessities, which should have nursed and restored the prodigal expenditure of his brain and nerves.

We are accustomed to think of Beethoven's end as solitary and his death as miserable, but what was his last illness compared to Schubert's? Officious friends, like Pasqualati, sending him wine and delicacies; worshipping musicians, like Hummel and Hiller, coming to his death-bed as if to a shrine; his faithful attendants, Schindler, Hüttenbrenner, and Breuning, waiting on his every wish; the sense of a long life of honour and renown; of great works appreciated and beloved; the homage of distant countries, expressed in the most substantial forms—what a contrast to the early death-bed, and the apparent wreck of such an end as Schubert's! Time has so altered the public sense of his merits that it is all but impossible to place oneself in the forlorn condition in which he must have resigned himself to his departure, and to realise the darkness of the valley of the shadow of death through which his simple, sincere, guileless soul passed to its last rest, and to the joyful resurrection and glorious renown which have since attended it. Then an intelligent and well-informed foreign musician could visit the Austrian capital and live in its musical circles, without so much as hearing Schubert's name.¹ Now memorials are erected to him in the most public places of Vienna, institutions are proud to bear his name, his works go through countless editions, and publishers grow rich upon the proceeds even of single songs, while faces brighten and soften, and hands are clasped, as we drink in the gay and pathetic accents of his music.

For even his privations and his obscurity have now been forgotten in the justice since done to him, and in the universal affection with which he was regarded as soon as his works reached the outside world—an affection which, as we have conclusively shown, has gone on increasing ever since his death. In the whole range of composers it may be truly said that no one is

now so dearly loved as he, no one has the happy power so completely of attracting both the admiration and the affection of his hearers. To each one he is not only a great musician, not only a great enchanter, but a dear personal friend. If in his 'second state sublime' he can know this, we may feel sure that it is a full compensation to his affectionate spirit for the many wrongs and disappointments that he endured while on earth.

The very wide field over which Schubert ranged in poetry has been more than once alluded to in the foregoing. It would be both interesting and profitable to give a list of the poems which he has set. Such a list, not without inaccuracies, will be found in Wurzbach's *Biographisches Lexicon*, vol. xxxii. p. 94. Here we can only say that it includes over 600 poems by 100 authors of whom the principal are:—

Goethe, 72; Schiller, 54; Mayrhofer, 48; W. Müller, 44; Hölty, 25; Matthiessen, 27; Kosegarten, 20; F. Schlegel, 19; Klopstock, 19; Körner, 16; Schober, 15; Seidl, 15; Salis, 14; Claudius, 13; Walter Scott, 10; Rellstab, 9; Uz, 8; Ossian, 7; Heine, 6; Shakespeare, 3; Pope, 1; Colley Cibber, 1; etc. etc.

Compared with the literature on other composers that on Schubert is not extensive.

Biographical.—The original sources are scattered in German periodicals and elsewhere.

1. The first place must be given to Ferdinand Schubert's sketch, entitled 'Aus Franz Schuberts Leben,' four short papers which appeared in Schumann's periodical, the *Neue Zeitschrift für Musik*, in Nos. 33 to 36 (April 23–May 3), 1839. These are written with great simplicity, and apparently great exactness; but might have been extended to double the length with great advantage.
2. Mayrhofer contributed a short article of recollections, *Erinnerungen*, to the *Neues Archiv für Geschichte . . . Literatur und Kunst* (Vienna), Feb. 23, 1829; and Bauernfeld a longer paper, *Ueber Franz Schubert*, to Nos. 69, 70, 71, of the *Wiener Zeitschrift für Kunst, Literatur, Theater, und Mode*, for June 9, 11, 13, 1829. These papers, written so shortly after Schubert's death by men extremely intimate with him, are very valuable.
3. Bauernfeld also made two interesting communications to the *Freie Presse* of Vienna, for April 17, and 21, 1869, containing six letters and parts of letters by Schubert, and many anecdotes. These latter articles were reprinted in the *Leipzig Signale* for Nov. 16, 22, 26, 28, 1869; translated in the *Musical World*, Jan. 8, 15, Feb. 5, 19, 1870, and in Bauernfeld's *Gesammelte Schriften*, vol. xii. (Vienna, 1873). But recollections written so long after the event must always be taken *cum grano*.
4. Schindler wrote an article in *Bauerle's Wiener Theaterzeitung*, for May 3, 1831, describing Beethoven's making acquaintance with Schubert's songs on his death-bed; and other articles in the *Niederrheinische Musikzeitung*, for 1857. He also mentions Schubert in his *Life of Beethoven*, 3rd ed., ii. 136.
5. Schumann printed four letters (incomplete), two poems, and a Dream, by Schubert, as 'Reliquien' in his *Neue Zeitschrift für Musik*, for Feb. 1 and 5, 1839.
6. One of the same letters was printed complete in the *Signale*, No. 2, for 1878.
7. The *Diary* of Sofie Müller (Vienna, 1832), the *Unvergessenes* of Frau von Chezy (Leipzig, 1853), and the *Erinnerungen* of her son W. von Chezy (Schaffhausen, 1863), all afford original facts about Schubert by those who knew him; and 8. Ferd. Hiller's *Künstlerleben* (Cologne, 1880), contains a paper—'Vienna 62 years since'—embodying a few interesting and lifelike notices of the year 1827. Of all these, use has been made in the foregoing pages.
9. The first attempt to write a life of Schubert was

¹ The allusion is to E. Holmes, the biographer of Mozart, who passed some time in Vienna in the spring of 1827, evidently with the view of finding out all that was best worth knowing in music, and yet does not mention Schubert's name. (See his *Ramble among the Musicians of Germany*.)

made by von Kreissle, who, in 1861 published a small 8vo pamphlet of 165 pages, entitled *Franz Schubert, eine biographische Skizze*; von Dr. Heinrich von Kreissle. This is a very interesting little book, and though not nearly so long as the second edition, it contains some facts which have dropped out of that. 10. The second edition, *Franz Schubert*, von Dr. Heinrich Kreissle von Hellborn (Vienna, Gerold, 1865), is a large 8vo of 619 pages, with portrait after Kupelwieser. This is a thoroughly honest, affectionate book; but it is deformed, like many German biographies, by a very diffuse style, and a mass of unnecessary matter in the shape of detailed notices of every one who came into contact with Schubert; and some of the letters appear to be garbled; but the analyses of the operas and the lists of works are valuable, and there are some interesting facts gathered from the Fröhliche, Ferdinand Schubert, Spaun, Hüttenbrenner, and others. It has been translated into English by Mr. A. D. Coleridge (two vols, 8vo, Longman, 1869), with an Appendix by the present writer, containing the themes and particulars of the MS. Symphonies and other MS. music of Schubert, as seen by Arthur Sullivan and him in Vienna in 1867. A résumé of the work is given in English by Wilherforce. *Franz Schubert*, etc. (London, 1866). 11. Both Kreissle's works have been largely utilised by H. Barbedette, in *F. Schubert, sa vie*, etc. (Paris, 1866). This contains an atrocious version of Rieder's portrait, and one new fact—a facsimile of Schöber's song 'An die Musik,' valuable because, being dated April 24, 1827 (while the song was composed in 1817), it shows that Schubert did not confine his dates to the original autographs (compare 'The Trout,' p. 326, note 4).

12. The chief value of Reissmann's book, *Franz Schubert, sein Leben u. seine Werke* (Berlin, 1873), consists in the extracts from the juvenile MS. songs, Quintet overture (pp. 12-30), the comparisons of early songs with later revisions of the same (pp. 24, 154, etc.), five pieces printed for the first time, and facsimile of a MS. page. 13. Gumprecht, La Mara, and others have included sketches of Schubert in their works.

14. The article on Schubert in Wurzbach's *Biographisches Lexicon* (Part 32, pp. 30-110; Vienna, 1876) is a good mixture of unwearied research, enthusiasm for his hero, and contempt for those who misjudge him (see for example, p. 98b). The copious lists are extremely interesting and useful. Unfortunately they cannot always be trusted, and the quotations are sometimes curiously incorrect. Thus Mr. Arthur Duke Coleridge is raised to the peerage as 'Herzog Arthur von Coleridge,' etc. etc. Still all students of Schubert should be grateful for the article.

15. The facsimile of the 'Erl King' in its first form has been mentioned in the body of the article (p. 285b). Further consideration convinces me that the original of this cannot be the first autograph, but must be a copy made afterwards by Schubert.

Two documents must be mentioned. 16. *Actenmässige Darstellung der Ausgrabung und Wiederbeisetzung der irdischen Reste von Beethoven und Schubert* (Vienna, 1868), and 17. *Vom Wiener Männergesangsverein. Festschrift zur Enthüllung des Schubert Denkmals am 15. Mai, 1872*, an account of the unveiling of the statue in the Stadt Park, containing a capital sketch of Schubert's life, lists, and many other welcome facts. Herr Dumba's speech on the occasion, and poems by Bauernfeld and Weilen were printed separately. Good photographs of the statue are published by Löwy of Vienna.

18. Since writing the foregoing I have seen the *Life and Works of Schubert*, by A. Niggl, which forms No. 15 of Breitkopf & Härtel's *Musikalische Vorträge* (1880). It appears to be an excellent and generally an accurate compilation, with a great deal of information in small compass, but wants a list of works to make it complete. Also 19, a Life by H. F. Frost in *The Great Musicians*, edited by Francis Hueffer (London, 1881), is readable and intelligent, and has a list of works year by year.

[Schubert, by Edmondstone Duncan, contains a good deal of useful information, and a catalogue of Schubert's works based on the complete edition of Messrs. Breitkopf & Härtel.]

The articles on Schubert's masses by Professor Prout, in the *Monthly Musical Record* for 1871, and the *Concordia* for 1875, are too important and interesting to be omitted. [Among other articles on Schubert, may be specially mentioned those in the *Monthly Musical Record* for Feb.

1897; those in the *Musical Times* for August 1893, Jan. and Feb. 1897, Sept. and Oct. 1901, and an interesting critical study by Antonín Dvořák and Mr. H. T. Finck in *The Century* for July 1894. *The Romantic Composers*, by Daniel Gregory Mason (1907), contains a very interesting article on Schubert.]

Thematic Catalogues.

Of these there are two:—

1. *Thematisches Verzeichniss im Druck erschienenen Compositionen von Franz Schubert* (Vienna, Diabelli) [1852], contains the works from Opus 1 to 160; Schwanengesang; Lieferungen 1 to 50; and thirty songs (included in the foregoing) of a series entitled 'Immortellen.'

2. *Thematisches Verzeichniss der im Druck erschienenen Werke von Franz Schubert*, herausgegeben von G. Nottebohm. Vienna, F. Schreiber, 1874, pages 1 to 268. This admirable work is as comprehensive and accurate as the previous publications of its author would imply its being. Under the head of printed works it comprises:—(1) works with opus numbers 1 to 173. (2) Nachgelassene Mus. Dichtungen, Lieferungen 1 to 50. (3) Works without opus numbers for orchestra, chamber music, etc. (4) Doubtful and apocryphal compositions; works still in MS.; books, portraits, etc. (5) Index, list of songs, etc.

The information under each piece is not confined to the name and date of publication, but gives in most cases the date of composition, and frequently also such facts as the first time of performance, etc. It is in fact, like all the author's publications, a model of what such a catalogue should be.

It only remains for me to return my sincere thanks to those friends who have helped me with facts and suggestions and with much labour in the execution of the preceding pages; such as Fr ulein Caroline Geisler-Schubert, Father Hermann (Anton) Schubert, and other members of the composer's family; to Herr Eugen Heilpern and the eminent photographers who act under the name of 'Ad le' in Vienna; my ever-kind friend Herr C. F. Pohl, Librarian of the Musikverein there; Dr. Kopfermann, Librarian of the k. k. Bibliothek, Berlin; Sir C. V. Stanford; Mr. C. A. Barry; Sir A. Manns; Herr A. D rfel; Mr. Paul David; Messrs. Breitkopf & H rtel; Baron Tauchnitz, jun.; Mr. L. Engel; Mr. W. B. Squire; and many more. To each and to all, I express my hearty acknowledgments.

G.; revised by W. H. H^w.

SCHUBERT, FRANZ, a violinist, born of a musical family at Dreden, July 22, 1808, was a pupil of Lafont, and rose through various grades to succeed Lipinski in 1861 as first Concertmeister (or leader) in his native city. He retired in 1873, on the fiftieth anniversary of his entrance into the orchestra. He died at Dresden, April 12, 1878. His published works include Studies, a Duo for violin and piano, and two Concertante for violin and violoncello (with Kummer). His little piece, 'L'Abeille' is often to be found on violinists' programmes. Schubert's wife, MASCHINKA, a distinguished bravura singer, was born August 25, 1815, and appeared at the German opera in London in 1832. She died at Dresden, Sept. 20, 1882. G.

SCHUBERT, LOUIS, violinist and singing-master, born Jan. 27, 1828, at Dessau, went in his eighteenth year to St. Petersburg, and then as Concertmeister to K nigsberg, where he remained till 1862. He then returned to Dresden, where he enjoyed a great reputation as a teacher of singing. He published a method of singing in the form of songs, and four of his operettas have become favourites. He died at Dresden, Sept. 17, 1884. G.

SCHUBERTH, GOTTLLOB, born at Carsdorf, August 11, 1778, received his musical education at Jena, and learnt the violin from Stamitz.

In 1804 he went to Magdeburg, resided there for some years, and was distinguished as an excellent clarinet and oboe player. In 1833 he moved to Hamburg, where he died, Feb. 18, 1846. His eldest son

JULIUS FERDINAND GEORG, born at Magdeburg, July 14, 1804, was the founder of the well-known firm of J. Schubert & Co. in Leipzig and New York. After learning the business of a music-publisher in Magdeburg, he started in 1826 on his own account at Hamburg, whence he was enabled to found branch establishments at Leipzig (1832), and New York (1850). In 1854 he gave up the Hamburg business to his brother Frederick (see below) and devoted himself entirely to Leipzig and New York. Besides his publishing business, Julius Schubert was an indefatigable student of language, literature, and music. He was publisher, editor, and proprietor of a *Musikalisches Conversations Lexicon* (which has gone through ten editions, and from which the details of the present article have been obtained), the *Kleine Hamburger Musik Zeitung* (1840-50), the *New York Musik Zeitung* (1867), and *Schubert's kleiner Musik Zeitung* (1871-72). In 1840 he founded the Nord-deutscher Musikverein and Preis Institut at Hamburg. He received many decorations from the crowned heads of Germany in recognition of his services to music. In 1874 he settled at Leipzig, where he died, June 9, 1875. His business, which in 1877 comprised over 6000 publications, was carried on with increasing success by his widow and nephew until 1891, when it was bought by F. Siegel.

LUDWIG, the second son of Gottlob, was born April 18, 1806, at Magdeburg. He studied under his father and C. M. von Weber, and when only sixteen was music-director at the Stadt Theater of his native town. He was subsequently Court Capellmeister at Oldenburg, and after living at Riga and K nigsberg (1835), became (1845) conductor of the German Opera at St. Petersburg, where he died in 1850. His compositions include some published chamber music, besides operas and symphonies which remain in MS. His younger brother,

CARL, was born at Magdeburg, Feb. 25, 1811. He learnt the piano from his father, and the violoncello from L. Hesse. In 1825 he was placed under Dotzauer at Dresden, and in 1828 made his first concert tour to Ludwigs-lust and Hamburg. In 1829 he played at Copenhagen and Gothenburg, but a series of misfortunes drove him back to Magdeburg, where he occupied the post of first violoncello in the theatre orchestra. In 1833 he again played in Hamburg with success, and during the next few years gave concerts in all the principal towns of North Germany, Belgium, and Holland, besides visiting Paris and London (1835). In the autumn of the latter year he

was appointed solo violoncellist to the Czar. He remained for twenty years at St. Petersburg, occupying the posts of musical director at the University, conductor of the Imperial Court Orchestra, and inspector of the Imperial Dramatic College. He died at Zurich, July 22, 1863. His compositions include chamber music and concertos for the violoncello, etc.

FRIEDRICH WILHELM AUGUST, fifth son of Gottlob Schubert, was born at Magdeburg, Oct. 27, 1817, and from 1853 was the head of the firm of 'Fritz Schubert' at Hamburg. W. B. S.

SCHUCH, ERNST VON, born at Graz, Nov. 23, 1847, was at first intended for the legal profession, but music was too strong (he had appeared as a violinist at the age of seven, and at nine years old played solos on the piano and violin in public), and he received instruction from Eduard Stoltz at Graz, and afterwards from Dessoff in Vienna. In 1867 he was appointed conductor of Lobs's theatre at Breslau, and after short engagements at Würzburg, Graz, and Basle he was engaged by Pollini to conduct a series of Italian operas in different parts of Germany. In March 1872 he conducted his first opera in Dresden, and in August following was appointed capellmeister there. In 1873 he was made court capellmeister, and very soon his great gifts began to make the Dresden opera famous throughout the world for the catholicity of its repertory, the broad views of its conductor, and the excellence of individual performances. Schuch has always given due regard to the art of the *bel canto*, and as an operatic conductor he has few rivals. In 1897 he was ennobled by the Emperor of Austria, and in 1899 he was given the title of privy-councillor. In 1875 he married the singer CLEMENTINE SCHUCH-PROSKA (her maiden name was accurately Procháčka), who was born at Vienna, Feb. 12, 1853, was a pupil of Mme. Mathilde Marchesi at the Vienna Conservatoire, and a member of the opera company at Dresden from 1873. Her voice is a light soprano, and she sings florid music with great skill. She appeared in London at some of the early Richter Concerts, and at the Crystal Palace; she sang the part of Aennchen in 'Der Freischütz' at the German Opera under Richter in 1884, with much success, and also appeared as Eva in 'Die Meistersinger.' She retired from the stage in 1895. (Dr. Sakolowski's monograph on Schuch; Riemann's *Lexikon*, etc.) M.

SCHÜRMANN, GEORG CASPAR, one of the early composers of German opera, was the son of a Lutheran pastor in Hanover. He early showed a decided talent for music, first as singer and afterwards as composer. From 1693 to 1697 he was engaged as falsetto singer at the Hamburg Opera, and also for Church services. In 1697 the Duke of Brunswick invited him

to Wolfenbüttel, and shortly afterwards, at the Duke's expense, he visited Italy for the further cultivation of his musical talent. From 1702 to 1707, with the Duke of Brunswick's permission, he entered the service of the Duke of Meiningen, but in the latter year he was recalled to Wolfenbüttel, where he remained till his death, some time after 1741, busily engaged in the composition and production of German operas, in which he himself took a leading part as alto singer, and also from time to time acted as capellmeister. Many of these operas were also produced at Hamburg, but none of them were ever printed during his lifetime, and most of them are only known from their librettos. Of a few only has the music survived. One of them, entitled 'Ludovicus Pius,' or 'Ludewig der fromme,' first produced in 1726, has now been reprinted, though not complete, by Dr. Hans Sommer, from a MS. in his possession, and appears as Band xvii. in Eitner's *Publication älterer Musikwerke*. As a Beilage to the *Monatshefte* of 1885, Eitner has also printed an aria from another opera of Schürmann's, entitled 'Henricus Anceps,' or 'Heinrich der Vogler,' besides a complete Church Cantata for the New Year, both of which are calculated to give a very favourable idea of Schürmann's powers as a composer. Eitner is disposed to assign him a very high place even in association with Handel and Bach, both for genuine feeling and contrapuntal skill. J. R. M.

SCHÜTT, EDUARD, born Oct. 22, 1856, at St. Petersburg, was intended for a mercantile career, but relinquished it for music, which he learned from Petersen and Stein sufficiently to pass the examination at the St. Petersburg Conservatoire, with honour, in 1876. He then entered the Conservatorium at Leipzig, passed the final examination there in 1878, and went to Vienna, where he was elected conductor of the Akademische Wagner-Verein. In January 1882 he played his Concerto (op. 7) in G minor, before the Russian Musical Society at St. Petersburg. It was performed at the Crystal Palace, Sydenham, April 15, 1882, by Mme. Frickenhau. His published works include—Serenade for strings, op. 6; Variations for 2 Pianos, op. 9; Songs opp. 18, 19, 22, 23; piano pieces, opp. 13, 15, 16, 17, 20, 21, 41, transcription of songs by Brahms, Strauss's Fledermaus waltz, etc. G.

SCHÜTZ, HEINRICH (name sometimes Latinised SAGITTARIUS), 'the father of German music,' as he has been styled, was born at Köstritz, Saxony, Oct. 8, 1585. His father and grandfather occupied a good social position at Weissenfels, whither his father removed with his family on the death of the grandfather in 1591. Admitted in 1599 as a chorister into the chapel of the Landgraf Maurice of Hesse-Cassel, Schütz had, besides a thorough musical training, the advantage of a good general

education in the arts and sciences of the time, which enabled him in 1607 to proceed to the University of Marburg, where he pursued with some distinction the study of law. The Landgraf, when on a visit to Marburg, observing in his *protégé* a special inclination and talent for music, generously offered to defray the expense of his further musical cultivation at Venice under the tuition of Giovanni Gabrieli, the most distinguished musician of the age. Schütz accordingly proceeded to Venice in 1609, and already in 1611 published the first-fruits of his studies under Gabrieli, a book of five-part madrigals dedicated to his patron. On the death of Gabrieli in 1612, Schütz returned to Cassel, and was appointed organist to the Landgraf, but either uncertain himself as to his real vocation for music or induced by his friends, he had still some thoughts of taking up again the profession of law. Perhaps the Landgraf's chapel was too narrow a sphere for him to work in; it was fortunate therefore that in 1614 he received the invitation to undertake the entire direction of the capelle of the Elector Johann Georg of Saxony at Dresden, at a salary of 400 gulden. The Landgraf was unwilling to part with him, and would at first only allow him to accept this position temporarily. Herecalled Schütz in 1616, but on the earnest petition of the Elector finally consented to his remaining permanently at Dresden. Schütz's first endeavour at Dresden was to reorganise the electoral music, and indeed, as he had been engaged to do, on the Italian model, for the purpose of introducing the new concerted style of music vocal and instrumental. He procured good Italian instruments and players, and sent qualified members of the capelle to Italy for a time, to perfect themselves in the new style of singing and playing.

His first work of importance appeared in 1619, 'Psalmen David's sammt etlichen Motetten und Concerten mit 8 und mehr Stimmen,' a work which shows the influence of the new Monodic or Declamatory style which Schütz had learned in Italy.

For his purpose Schütz uses the means of expression afforded by contrast of different choirs, or contrast of solo voices with full choir, or contrast of voices with instruments, either the simple Basso Continuo, *i.e.* for organ, lute, or theorbo, or strings with occasional trumpets, etc. His next work, in 1823, was an oratorio on the subject of the Resurrection entitled 'Historia der fröhlichen und siegreichen Auferstehung unsers einigen Erlösers und Seligmachers Jesu Christi.' The occasion for the composition of this work would seem to have been the practice, still kept up at Dresden, Leipzig, and other churches in Saxony, of singing the story of the Resurrection at Easter as that of the Passion in Holy Week. A 'Geistliches Gesangbuch' of 1612 informs us that 'Every year on Easter-day

at Vespers, before the sermon, there is sung in our Christian congregations the Resurrection, so splendidly set by Antonius Scandellus.' This Antonius Scandellus, Scandello, or Scandelli, had been one of Schütz's own predecessors at Dresden from 1568 to 1580, and had written both a Passion and a Resurrection. (See p. 238.) His 'Resurrection' must have continued in use even beyond Schütz's time, since it even appears in Vopelius's 'Leipziger Gesangbuch,' of 1682. It may be seen in Schöberlein and Riegel's 'Schatz des liturgischen Chorgesang,' ii. 619-647. (With regard to the authorship, compare O. Kade's remarks in the Vorwort to the Notenbeilagen to Ambros's *Geschichte*, xlv.) Schütz's 'Resurrection' follows the line of Scandello's, only whereas Scandello's composition is purely vocal, that of Schütz is adapted to instrumental accompaniment. Both works begin with a setting (in Scandello 5-part, in Schütz 6-part) of the words 'Die Auferstehung unsers Herrn Jesu Christi, wie uns die von den Evangelisten beschrieben wird,' and conclude with a setting (Scandello 5-part, Schütz 8-part) of the words 'Gott sei Dank, der uns den Sieg gegeben hat,' etc. In Scandello, the part of the Evangelist is altogether liturgical, but in Schütz, while it is mostly based on the liturgical melody, the more important passages have given to them a more characteristic and expressive form of declamation, which sometimes rises up to actual melody in the more modern sense of the term, and the Evangelist's part is accompanied throughout either by the organ or preferably by four Viole da Gamba, which are called upon at certain pauses in the narrative to execute appropriate runs or passages ('Zierliche und appropriirte Läufe oder Passaggi machen'). The words of other personages are set for two or more voices, according to their number, as for instance, the words of the three Maries as a trio, of the two angels as a duet, of the eleven disciples as a 6-part chorus, only that usually for single personages two parts are employed (as in Scandelli), though Schütz permits one of these parts to be taken, as he expresses it, *instrumentaliter*. This work of Schütz's is altogether remarkable, as being a highly successful endeavour to unite dramatic expressiveness with reverence for ecclesiastical tradition. The same spirit is shown in another form in his next work of importance, 'Cantiones Sacrae,' for four voices with bass accompaniment for organ. The endeavour here is to unite the older form of the Motet with the newer form of the Concerto, and the Diatonic Church Modes with the use of Chromatic harmonies. In 1627 Johann Georg I. of Saxony wished to signalise the occasion of the marriage of his daughter to the Landgraf of Hesse-Darmstadt by giving the first performance of opera in Germany. The opera had just sprung into life in connection with the new musical movement in Italy, as a supposed revival of the antique music-drama. Schütz

was commissioned to procure from Italy Peri's opera 'Dafne.' The poet Opitz was set to the task of translating the Italian text by Rinuccini into German, and as it was found that Peri's music would not quite fit the new German words, Schütz had to adapt them to new music of his own. The opera 'Dafne,' as thus set by Schütz, was performed at Torgau on the 13th of April 1627. Unfortunately the music of this first German opera has not been preserved, and no further account of it has been given. It is probable, however, that Schütz did little else on this occasion than rearrange Peri's music and add something in exactly the same style. In any case the result was not such as to induce Schütz to make any further attempts in music for the theatre, if we except another occasional piece, a Ballet, 'Orpheus und Euridice,' written in 1638, the music of which appears also to be lost. In 1625 appeared his 'Geistliche Gesänge,' and in 1628 Schütz, having lost his wife, found some comfort in his sorrow, as he tells us, by occupying himself with the task of composing melodies with simple 4-part harmony to a rhymed version of the Psalms by Dr. Cornelius Becker. This version by Becker was meant to be a Lutheran rival to an earlier Calvinistic version by Lobwasser, based on the French Psalter of Marot and Beza, and adapted to the same melodies. Later on, Johann Georg II., with a view to the introduction of the Becker Psalter in place of Lobwasser's in the schools and churches of Saxony, urged Schütz to complete his composition of melodies for the work. The task was hardly congenial to our composer, as he himself confesses in the preface to the complete work when it appeared in 1661. Two further editions, however, of this Psalter, with Schütz's melodies, appeared in 1676 and 1712. Some of these melodies passed into later Cantionals, though none have ever taken the same place in general use or esteem that similar work by less eminent composers has done.

Partly to distract himself from his great sorrow, partly to familiarise himself with the still newer development of music in Italy, with which the name of Claudio Monteverde is chiefly associated, Schütz set out on a second visit to Italy in 1629. He found musical taste in Venice greatly changed since the time of his first visit (1612), 'modern ears were being regaled with a new kind of sensation' ('recenti tiffillations'). The new style consisted in the greater prominence given to solo singing, and to intensity of expression in solo singing, the freer use of dissonances, and greater richness and variety in instrumental accompaniment. In a series of works entitled 'Symphonias Sacrae,' Schütz endeavoured to turn to account the new experiences he had gained, without, however, like his new Italian models, turning his back upon his earlier polyphonic training. He never altogether forgot to unite the solidity of the

old school with the piquancy of expression of the new. The first part of 'Symphonias Sacrae' appeared at Venice in 1629, and consists of twenty settings of Latin texts, chiefly from the Psalms and the Song of Songs. A second part of 'Symphonias Sacrae,' with the sub-title 'Deutsche Concerten,' appeared at Dresden in 1657; a third part also at Dresden in 1650. The two later parts are settings of German Bible texts. They may be described as brief dramatic cantatas for various combinations of voices and instruments, and in virtue of them Schütz may be considered joint-founder with Carissimi of the Dramatic Oratorio. Winterfeld (*Gabrieli*, vol. iii. pp. 82, etc., also *Evang. Kir. Gesang*, vol. ii. p. 315) singles out for special notice from the first part, 'Fili, fili mi, Absalom' (David's lament over Absalom), written for bass solo with accompaniment of four trombones, and from the third part, 'Saul, Saul, was verfolgst du mich?' (a cantata for the festival of the Conversion of St. Paul), and 'Mein Sohn, warum hast du uns das gethan?' (for the first Sunday after Epiphany).

In 1631 and following years Saxony became the scene of war, and one result was the complete disorganisation of the Elector's capelle, means failing for the payment of musicians, and the attention of the Elector and his court being occupied with more serious matters than music. Schütz obtained leave in 1633 to accept an invitation to Copenhagen from King Christian IV. of Denmark. The years 1635-41 were spent in wanderings to and fro between different courts with occasional returns to Dresden, Schütz being still nominally in the service of the Elector. The chief works worthy of notice published during these years are two sets of *Geistliche Concerte* for one to five voices, with Basso Continuo (1636, 1639), the second set being especially remarkable by the composer's frequent directions for the securing of proper expression in his music. (It is to be remembered that marks and terms of expression were not then in common use.) In 1641 Schütz returned to Dresden to make an effort to reorganise the music, but from want of means his efforts were not crowned with anything like success till 1645 or 1647. A work of importance was written and produced about 1645, though strangely enough it was never printed or published in Schütz's lifetime, and only appeared in print for the first time in 1873, edited by Carl Riedel of Leipzig. It is a small Passion Oratorio on the Seven Words from the Cross. This work is of importance as contributing some new elements to the development of the later Passion Music. First, the part of the Evangelist is no longer based on the liturgical intonation, as in the 'Resurrection' oratorio of 1623, but takes the form of the new 'Arioso Recitative.' For the sake of variety Schütz divides this part among different solo voices, and sets it

twice in the form of a quartet. Next, the work is opened and concluded with a chorus (5-part with basso continuo) expressive of the feelings of Christians at the contemplation of our Lord upon the Cross. After the opening, and again before the concluding chorus, there occurs a short 5-part instrumental symphony, which has been aptly described as an ideal raising and dropping of the curtain before and after the action. The instruments to be used are not specified, but strings are probably more intended than anything else. The part of our Lord differs from the other parts in having a 3-part instrumental accompaniment. This probably originated out of the custom in previous 'Passions' (as followed in Scandello's 'Resurrection,' for instance), of setting the words of our Lord in four vocal parts. Schütz here improved upon the idea, first timidly suggested by himself in his 'Resurrection,' of giving the words of a single character to a single voice, for the sake of dramatic consistency, and assigning the accompanying parts to the instruments. The way in which this accompaniment is carried out deserves to be noticed. It is neither in the old style nor in the new, but a curious combination of both; the lower part is identical with the basso continuo for sustaining the harmony throughout: the other two parts are written in the polyphonic style with the voice, consisting of imitations either preceding or following the vocal phrase. It is well known how Bach in his 'Matthew-Passion' developed this idea of a special accompaniment to the words of our Lord, surrounding Him as it were with a halo. Naturally there are no arias in the modern sense in Schütz's work, all is in the form of expressive recitative. A touching simplicity and tenderness distinguish the whole work. In 1648 appeared his 'Musicalia ad Chorum Sacrum,' a work in quite a different style from those last mentioned, and showing a reaction in Schütz's mind against the exclusive claims of the modern 'Manier.' It consists of twenty-nine pieces in German words, for five, six, and seven voices, in the old motet or strictly polyphonic style, in which the bassus generalis or continuus may be dispensed with (as the title says, 'Wobei der Bassus Generalis auf Gütachten und Begehren, nicht aber aus Nothwendigkeit zugleich auch zu befinden ist'). In the preface he expresses the opinion that no one will become a capable musician who has not first acquired skill in strict contrapuntal work without the use of the basso continuo. Personal reasons to some extent combined with artistic reasons to produce the reaction in favour of the older school of music as against the new, to which we have referred. From 1647 onwards, in spite of the many personal sacrifices he had made on behalf of the Elector's capelle, as for instance by paying or increasing out of his own salary the salaries of others of

the musicians, he appears to have suffered so many annoyances in connection with it as caused him to have almost a disgust for the further cultivation of music at Dresden, and induced him to solicit over and over again in 1651-55 dismissal from the Elector's service. The new Italian element in the chapel was very different from the old; Schütz was getting involved in continual differences and squabbles with a new Italian colleague Bontempi. Italian art was losing its earlier seriousness of purpose, turning its back upon its older traditions, and aiming simply at the amusement of princes and their courts, and thus acquiring a popularity dangerous to higher ventures of art. The Elector, however, refused to accept the resignation of his Capellmeister, and after 1655 affairs improved somewhat, so far as Schütz was personally concerned, so that he continued quietly at his post for the remaining sixteen years of his life.

In 1657 he published 'Zwölf geistliche Gesänge' a 4 for small choirs, a work which we might call a German Communion and Evening Service, consisting, as it does, mainly of settings of the chief portions of the Liturgy in order, viz. the Kyrie, Gloria, Nicene Creed, Words of Institution (usually appointed to be sung in early Lutheran liturgies), a Communion Psalm, Post-Communion Thanksgiving, then a Magnificat and Litany, etc. From 1657 to 1661 our composer would seem to have been occupied with the task enjoined on him by the new Elector, that of composing additional melodies for Becker's Psalter, already mentioned; work which apparently gave him more trouble than it was worth, and hindered him from devoting himself to other more congenial work. In the preface to this Psalter, 1661, he says that 'to confess the truth, he would rather have spent the few remaining years of his life in revising and completing other works which he had begun, requiring more skill and invention' ('mehrsinnreichen Inventionen'). It is greatly to be regretted that the next work with which Schütz occupied himself has been preserved to us in so incomplete a form. It was a setting of the story of the Birth of our Lord, and as a Christmas oratorio would have been a fitting companion-work to his earlier 'Easter' oratorio and his later 'Passions-Musik.' Only the part of the Evangelist, in recitative with bass accompaniment, has been preserved to us; but the preface to this (1664) contains a specification of ten so-called 'Concerte' for various voices and instruments which were to come in at different points of the narrative. The introduction, for instance, consisted of the title ('Die Geburt, etc.') set for four vocal and five instrumental parts; the message of the Angel was set for soprano solo with accompaniment of two violettas and one violone; the Chorus of Angels for six voices with violins and violas; the words of the Shepherds for

three alto voices with two flutes and bassoon; of the Wise Men for three tenor voices with two violins and bassoon; of the High Priests for four bass voices and two trombones; and so on with the rest of the work. The loss of these concerted movements is the more to be regretted, as they would doubtless have shown Schütz's maturer views on instrumentation and the combination of voices and instruments. The last work of Schütz preserved to us, and perhaps his most famous work, is his setting of the story of the Passions, four settings in all, after the four Evangelists, 'Historia des Leidens und Sterbens: unserer Herrn und Heylandes Jesu Christi' (1665-66). This work was never published in his own lifetime, and the only original copy extant is that of the St. John Passion, presented by the composer himself to the Duke of Wolfenbüttel, and now in the library at Wolfenbüttel. The only copy of the other settings is that made by a later hand in 1690, regarding which see below in list of Schütz's works. As we now have the work, it is for voices alone without instruments. It is, therefore, as if the composer here wished to renounce the mere external advantages of the newer concerted and dramatic style for the sake of showing how the spirit of it could be retained and applied to the purely vocal and older polyphonic style. For what specially distinguishes this Passion Music, is the series of brief choruses of surprising dramatic energy and truth of expression, yet never overstepping the bounds of devout reverence inspired by the subject. Otherwise the work is more purely liturgical than later Passions, not having arias and chorales to interrupt the narrative and give that variety of interest so needed for modern concert performance. Each Passion is opened according to old custom with a setting of the title ('the Passion, etc.') and closed with a devotional chorus in motet style, the text taken from some familiar Church hymn. The rest of the work is written in unaccompanied recitative, though parts of it may have been meant to be accompanied in the manner suggested by Schütz himself in his 'Resurrection.' In the 'St. Matthew' the recitative has more of melodic expressiveness than in the other Passions. The 'St. Mark' is peculiar in combining the greatest monotony of recitative with the richest dramatic character in the choruses. Dr. Spitta, the editor of the new complete edition of Schütz's works, is inclined, on this and other grounds, to doubt the authenticity of the 'St. Mark Passion' (see his preface, pp. xx, xxi). But the fact of its being joined with the other undoubtedly authentic Passions without anything to indicate its being by a different author, is sufficient to outweigh mere suspicions. These 'Passions,' compressed by Carl Riedel and so far adapted to the requirements of modern performance, have been

repeatedly produced with considerable success by the Riedelsche Verein of Leipzig.

In his later years Schütz's powers began to fail, especially his sense of hearing; and we are told, when he could no longer go out, he spent the most of his time in the reading of Holy Scripture and spiritual books. His last attempts at composition were settings of portions of the 119th Psalm; and no verse indeed of that psalm could have been more fittingly chosen as the motto of both his personal life and his art-work than that on which he was last engaged, but left unfinished: 'Thy statutes have been my songs in the house of my pilgrimage.' He is the true predecessor of Handel and Bach, not so much in the mere form of his work, as the spirit. If in the dramatised Biblical scenes of his 'Symphonie Sacrae,' he is more especially Handel's predecessor, in his Passion Music he is Bach's. Both Handel and Bach simply brought to perfection what lay in germ in Heinrich Schütz. His great merit consists in this, that at a time when the new dramatic style was threatening the complete overthrow of the older polyphonic style, he saw how to retain the advantages of both, and laboured to engraft the one upon the other. It was thus he prepared the way for the greater work of Handel and Bach after him. Schütz died at Dresden, Nov. 6, 1672. The rather singular coincidence of Schütz's birth-year being exactly a hundred years earlier than the birth-year of Handel and Bach, brought about, on the occasion of the keeping of the bicentenary of the two latter, in 1885, a great revival of interest in the work of their forerunner, which has had this practical result at least, the publication of a monumental edition of his works by Messrs. Breitkopf & Härtel of Leipzig.

The following is a list of Schütz's works, based on Eitner, *Monatshefte für Musikgeschichte*, xviii. pp. 47 ff., and the *Quellen-Lexikon*.

I. WORKS PUBLISHED IN LIFETIME.

1. Il primo libro de Madrigali de Henrico Sagittario Alemanno, Venice, 1611. Dedicated to Landgraf Moritz of Hesse-Cassel. Contains 18 Madrigals a 5, and 1 Dialogo a 8.
2. 3 Pièces d'occasion, entitled 'Concerte,' published separately. Dresden, 1618.
3. Die Worte Jesu Syrach; Wol dem der ein tugends. Weib, 1618.
4. Concerto in two parts. 1618.
5. Psalmen Davids sampt etlichen Moteten und Concerten mit acht und mehr Stimmen, nebst andern zweien Capellen das dero etliche auf drei und vier Chor nach Belieben gebraucht werden können, wie auch mit beigefügten Basso Continuo vor die Orgel, Lauten, Chitaron, etc. Dresden, 1619. Contains 28 Psalms.
6. Psalm cxxviii., for 8 voices with Basso Continuo, composed for his brother's wedding. Leipzig, 1619.
7. Synchorama Museion tribus Chorle adornatum, etc. A piece d'occasion for the restoration of peace in Silesia. Breslau, 1621.
8. Historia der iröblichen und sieglichen Anforderung unsern einigen Erlösers und Seligmachers Jesu Christi. In fürstlichen Capellen oder Zimmern um die Osterliche zeit zu geistlicher Recreation füglihen zu gebrauchhen. Dresden, 1623. An Oratorio on the Resurrection of Christ. The title shows that it was intended as well for Chamber performance as for Church.
9. Elegy on the Death of Fürstin Frau Sophia, Herzogin zu Sachsen. Melody with Basso Continuo. Text by Schütz himself. Freiberg, 1623.
10. Cantiones Sacrae quatuor vocum, cum Basso ad Organum. Freiberg, 1625. Contains 41 pieces a 4 with Latin words.
11. De Vitae fugacitate, Aria quinque vocum supra Bassum Continuum. Freiberg, 1625. A piece d'occasion.
12. Psalmen Davids, in Teutsche Reimen gebrachte durch D. Cornelium Beckern . . . nach gemelter Contrapunctart in 4

Stimmen gestellt . . . Freiberg, 1628. Contains 92 new melodies by Schütz himself and 11 others harmonised by him. An edition, Güstrow, 1640, was published for use in Mecklenburg-Schwerin. A later enlarged edition, with melodies for all the Psalms, appeared, Dresden, 1681.

13. *Symphonias Sacrae . . . varis vocibus ac Instrumentis accommodatae* a 3, 4, 5, 6. Opus ecclesiasticum secundum. Venice, 1629. Dedicated to the Elector of Saxony. Contains 20 settings of Latin texts.

14. 'Das ist je gewisslich wahr.' A motet for 6 voices in memory of Johann Hermann Schein, died 1631. Dedicated to Schein's widow and children. Dresden, 1631.

15. Erster Theil Kleiner geistlichen Concerten, mit 1, 2, 3, 4, und 5 Stimmen sammt beigefügten Basso Continuo. Leipzig, 1636. Contains 17 pieces to German words.

16. *Musicalische Exequien* . . . mit 6, 8, und mehr Stimmen zu gebrauchen. Dresden, 1636. Contains 3 funeral pieces.

17. Anderer Theil Kleiner geistlichen Concerten, mit 1, 2, 3, 4, und 5 Stimmen, sammt beigefügten Basso Continuo vor die Orgel. Dresden, 1638. Contains 31 pieces, texts German and Latin.

18. *Symphoniarum Sacrarum Secunda Pars* . . . Deutsche Concerte mit 3, 4, 5 nämlich einer, zwey, dreien Vocal- und zweien Instrumental-Stimmen. . . Opus Decimum. Dresden, 1647. Dedicated to Christian V. of Denmark. Contains 27 pieces. German words.

19. Dank-Lied für die hochwiesene fürstliche Oade in Weymar, 1647.

20. *Musicalia ad Chorum sacrum*. Geistliche Chor-Musik mit 5, 6, 7 Stimmen, beides Vocaliter und Instrumentaliter zu gebrauchen . . . Opus Underimum. Dresden, 1648. Dedicated to the Bürgermeister, etc., of Leipzig, out of respect for the Choir of the Thomas-Schule. Contains 29 Motets to German words.

21. *Symphoniarum Sacrarum Tertia Pars*. Deutsche Concerte mit 5, 6, 7, 8, nämlich 3, 4, 5, 6. Vocal- und zweien Instrumental-Stimmen. . . Opus Duodecimum. Dresden, 1650.

22. Canticum B. Simeonis. German text of Nunc Dimittite, 2 settings for 6 voices. (Not perfectly preserved.)

23. *Zweyt Geistliche Gesänge* a 4. Für Kleine Cantoreien. Opus Decimum Tertium. Dresden, 1657.

24. Historia der Freuden- und Gnaden-reichen Geburt Oottes und Mariæ Sohnes, Jesu Christi . . . Vocaliter und Instrumentaliter in die Musik versetzt. Dresden, 1664. A Christmas Oratorio, but only imperfectly preserved.

II. WORKS UNPUBLISHED IN LIFETIME.

1. Die Sieben Worte unsers Lieben Erlösers und Seligmachere Jesu Christi, so Er am Stamm des heiligen Kreuzes gesprochen, ganz beweglich gesetzt. . . Parts in manuscript preserved in the Library at Cassel, discovered in 1855 by O. Kade, and first published in Score and adapted for modern performance by Carl Riedel, Leipzig, 1873.

2. *Historia des Leidens und Sterbens unsers Herren Jesu Christi*. a. Nach dem Evangelisten St. Matthæus. b. Nach St. Marcus. c. Nach St. Lucas. d. Nach St. Johannes. An older form of the Johannes Passion exists in MS. 1665. Of the four Passions together there exists only a copy made by J. Z. Grundig in 1690, now in the Leipzig Stadt-Bibliothek.

3. Various single motets and concerted pieces, enumerated by Eitner, *M.F.M.G.*, xviii, pp. 62, 67-70, and in the *Quellen-Lexikon*.

III. WORKS LOST.

1. 'Dafne.' Opera, performed 1627. German text by Opitz, after the original by Rinuccini.

2. A Ballet with Dialogue and Recitative, composed for the marriage of Johann Georg, Elector of Saxony, 1633. (Another Ballet, 'Von Zusammenkunft und Wirkung der VII. Planeten,' existing in MS., is conjecturally ascribed to Schütz in Eitner's *Liet*, *M.F.M.G.* xviii, p. 68.)

All Schütz's MS. remains at Dresden were destroyed by fire, 1760. The same fate befell in 1794 what he may have left at Copenhagen.

IV. DOUBTFUL WORKS.

Ballet, 'Von Zusammenkunft und Wirkung der VII. Planeten,' found in MS. at Dresden. (See above.)

V. NEW EDITION IN SCORE.

Began on the Tercentenary of the composer's Birthday, 1838. Heinrich Schütz, *Sämmtliche Werke*, edited by Friedrich Chrysander and Philipp Spitta, and published by Messrs. Breitkopf & Härtel, Leipzig (1885-94).

Vol. 1 contains the 'Resurrection' Oratorio, the Passions-Musik after the four Evangelists, the Seven Words from the Cross, and in an Appendix the Imperfect Christmas Oratorio, and the older form of the Johannes-Passion.

Vols. 2 and 3 contain the Psalms and Motets of 1619.

Vol. 4, *Cantiones Sacrae*, 1625.

Vol. 5, *Symphonias Sacrae*, Part I. 1629.

Vol. 6, *Geistliche Concerte* of 1638 and 1639.

Vol. 7, *Symphonias Sacrae*, Part II. 1647.

Vol. 8, *Musicalia ad Chorum sacrum*, 1648.

Vol. 9, *Italian Madrigals*, 1611.

Vols. 10 and 11, *Symphonias Sacrae*, Part III. 1630.

Vol. 12, *Gesammelte Motetten, Concerte, Madrigals, and Arien*, 1. (containing Nos. 14, 15, and 22, besides other things).

Vol. 13, *Ditto*. II. Nos. 24, 8, 7, 85, 127, 15, and motets.

Vol. 14, *Ditto*. III. 14 Compositions, including No. 8.

Vols. 15, *Ditto*. IV. 12 Compositions, including No. 7.

Vol. 16, *Psalme* for Becker's hymn-book. J. R. M.

SCHULHOFF, JULIUS—dear to player and dancer for his Galop di Bravura, Impromptu Polka, and many more brilliant and clever PF. pieces—was born at Prague, August 2, 1825. He learned the piano from Kisch, and counter-

point from Tomaschek, and before he was fourteen made a successful appearance as a player. Notwithstanding his success, the boy's ambition was too great to allow him to remain in Prague, and in 1842 he went to Paris, then a hotbed of pianoforte virtuosity. Here a fortunate interview with Chopin gave him his opportunity. He played in public (Nov. 2, 1845), and published his first two works, of which op. 1, an Allegro Brillant, was dedicated to Chopin. After a lengthened residence in Paris he took a very extended tour through France, Austria (1849-50), England, Spain (1851), and even South Russia and the Crimea (1853). He lived in Dresden from 1870, and in Berlin from about 1897; he died in the latter city March 13, 1898. A sonata in F minor, and twelve études, are among his more earnest compositions. c.

SCHULTHEISS, BENEDICT, was the younger son of HIERONYMUS SCHULTHEISS (1600-69), and his second wife, whom he married in 1648. Benedict became organist at S. Egidius, Nuremberg, but he died at a comparatively early age on March 1, 1693. He published first a set of Clavier pieces: Muth und Geist ermunternder Clavier-Lust. Erster Theil, Nürnberg, 1679; Ander Theil, 1680. Later he seems to have devoted himself entirely to Church music, and composed many Chorales which are still included in the Evangelical Church-song; they will be found in the following works, all published in his lifetime:—

Heiliger Sontage-Handel und Kirch-Wandel . . . durch Sigmund von Birken. Nürnberg, 1691. Contains two melodies with figured bass by 'Ben. Schult.'.

Der geistlichen Erquick-Stunden des . . . Heint. Müllers . . . Poetischer Andacht-Klang von denen Blaugenossen verfasst, anjetzo mit 60 Liedern vernehet, und von unterschiedlichen Ton-Künstlern in Arieo gesetzt. Nürnberg, 1691. Contains thirteen melodies with figured bass by Schultheiss.

Gott-geheiliger Christen nützlich-eretzende Seelen-Lust . . . mit lieblichen Noten gesetzten neuen Arien . . . vorgesetzt von W. C. D. (W. C. Deasler). Nürnberg, 1692.

It contains twenty-five melodies with figured bass; Zahn included nine of them in his great work *Die Melodien der deutschen evangelischen Kirchenlieder*, 1893, and thinks Schultheiss composed all twenty-five, although only the first eleven are initialled B. S. c. s.

SCHULTHEISS, JOHANN PAUL, was born at Fechheim, Saxe-Coburg, on Sept. 14, 1748. He received his first lessons in music from his father, a schoolmaster there; in 1764 he entered the local college to follow a course of theology, became a member of the choir, and remained there six years, acquiring a thorough knowledge of music. From 1770 to 1773 he was at the University of Erlangen, where he completed his theological studies, while he was able to obtain organ lessons from Kehl, an excellent organist. He was then offered a post at Leghorn, as Protestant minister to the colony of Germans and Dutch settled there; he accepted and went to Italy, where he remained for the rest of his life. Checchi was organist at that time, and gave him lessons in

counterpoint and composition. Schulthesius was an excellent performer on the clavier, and in 1782 he was called upon to play some of his own compositions before the Grand Duke of Tuscany, and was very favourably received. He became one of the most erudite musicians of his time, and in 1807 was nominated secretary of the fourth class of the Accademia di scienze, lettere ed arti di Livorno. He died on April 18, 1816, at Leghorn. His treatise on the quality and character of church music: *Sulla musica da chiesa*. Memoria di Gio. Paolo Schulthesius. Livorno, presso Tommaso Masi. 1810, 4to, was also published in the first volume of the *Proceedings* of his Accademia. Letters of his to Marco Santucci are in existence; in one of them he mentions this work, and expresses his desire to hear Santucci's opinion of it. The following compositions were also published:—

Tre sonate per il Cimbalo o piano-forte con l' accompagnamento d'un violino obbligato. Composte da Gio. Paolo Schulthesius. Opera 1. Livorno, 1780, obl. folio. A copy of the second edition is in the British Museum.

Sonate a solo per il cembalo o pianoforte. Op. 2. Livorno, obl. fol.

Deux quatuors pour piano, violon, viola et violoncello. Op. 3. London, 1785.

Otto variazioni facili sopra un Andantino per il cimbalo o pianoforte, violino, viola e violoncello obbligato. Op. 4. Livorno. Four oblong folio part-books.

Allegretto avec 12 variations pour le Clavecin ou pianoforte, violon, viola et violoncello obbligato. Op. 6. Augsburg (Gombart).

Andante grazioso de Fleyel varié pour le clavecin ou pianoforte, violon et violoncello obbligato. Op. 7. Augsburg (Gombart).

Andantino original, avec huit variations pour le piano. Op. 8. Augsburg (Gombart).

Sept variations pour le forte-piano. Op. 9. Augsburg (Gombart). 1797. Dedicated to Joh. Nic. Forkel.

Huit variations sur un air russe pour piano. Op. 10. Livorno.

Douze variations sur l'air de *Malbrook* pour piano, violon, viola et violoncello. Op. 11. Florence (Nicola Fegati).

La reconciliazione di due amici, tema con variazioni. Op. 12. Augsburg (Gombart). It was dedicated to Baydn.

Otto variazioni sentimentali sopra un tema originale intitolato L' Amicizia per pianoforte, dedicate al signore Carlo Mozart, figlio maggiore del Gran Mozart. Op. 14. Leipzig. Breitkopf. C. 8.

SCHULTZ. See PRAETORIUS, vol. iii. p. 805.

SCHULZ, JOHANN ABRAHAM PETER, son of a baker, born at Lüneburg, March 30, 1747. His master was Schmugel, a local organist of ability, whose descriptions of Berlin and of Kirnberger's labours so excited him that at the age of fifteen, without money and against the wish of his family, he went thither and put himself under the protection of Kirnberger, who was very good to him, under whom he studied and to whom he became greatly attached. In 1768 he was fortunate enough to travel in France, Italy, and Germany under good auspices. In 1773 he returned to Berlin, and found his old master and Sulzer at work on their *Allgem. Theorie der Schönen Künste*, and undertook the musical portion of it from S to the end. In 1776-78 he was also Capellmeister to the French theatre at Berlin, and afterwards to the private theatre of the Crown Princess at Berlin and that of Prince Henry at Reinsberg, where he stayed for seven years from April 1, 1780. His choruses to 'Athalia,' produced while there, were translated and brought out at Copenhagen, and the result was an offer from the King of Denmark to be his Capellmeister at a salary of 2000 thalers. This he accepted and held for eight years, from

1787, with great credit and advantage to the place. His health at length obliged him to leave, and he departed, Sept. 29, 1795, for Hamburg, Lüneburg, and Berlin. He lost his wife, and at length, on June 10, 1800, died at Schwedt deeply and widely lamented. Schulz was a prolific composer; his operas are 'Clarisse' (1775), 'La fée Urgèle' (1782), 'Minona,' and 'Le Barbier de Séville' (1786), 'Aline' (1789); besides he wrote music to plays, and sacred music such as 'Christi Tod,' 'Maria und Johannes,' etc. The *Quellen-Lexikon* gives the names of many church and chamber works, as well as of his important song-collections. His literary works include a treatise on a new mode of writing music. He also edited Kirnberger's *Wahre Grundsätze zum Gebrauch der Harmonie* (1783). But his true claim to notice rests on his songs. He was the first to give the Volkslied an artistic turn. He was very careful to get good words, and as a considerable move was taking place among the poets at that date (1770-80), and Bürger, Claudius, Hölty, and others were writing, he had good opportunities, and many of his settings were published in the Göttingen *Musen-almanach* and Voss's *Almanach*. He published also 'Lieder in Volkston bey dem Klavier zu singen' (1782), containing forty-eight songs, 2nd ed. (1785) in two parts, and a third part in 1790. (See Reissmann, *Gesch. d. Deutschen Lieder*, p. 149.) G.

SCHULZE, J. F. & SONS, a firm of organ-builders, whose founder, J. F. Schulze, was born at Milbitz-bei-Paulinzella, Thuringia, in 1794, and began his manufactory there in 1825. His first organs were for Horba (with ten stops) and Milbitz (twenty-one stops). In 1825 he moved to Paulinzella, where his business largely increased. At this period his principal organs were those for Bremen cathedral and Solingen. In 1851, the firm sent an organ to the International Exhibition in Hyde Park, which obtained a prize medal and was the beginning of much work done for England. This is now in the Town Hall, Northampton. In 1854 they built the great organ in the Marienkirche at Lübeck. J. F. Schulze died in 1858, but was succeeded by his three sons, the most distinguished of whom was Heinrich Edmund, who introduced many improvements. On the rebuilding of the parish church of Doncaster, England, after the fire in 1853, the organ was rebuilt by the Schulze firm, with great success. Besides this fine instrument, their most important organs are in Bremen, Düsseldorf, Söst, and Aplerbeck. H. E. Schulze died in 1878 at the age of fifty-four, and shortly after, on the death of the surviving brother, the firm ceased to exist.

The Schulzes' organs are most celebrated for their flute-pipes, which are constructed so as to admit as much wind as possible. In order to do this the feet are opened very wide, and the pipes are in consequence cut up unusually high.

By this means, with a comparatively low pressure of wind an extraordinarily rich quantity of tone is produced. The Schulzes carried the same principles into their wooden flute pipes. Their organs are also celebrated for their string-toned stops, but the drawback in all of these is a certain slowness in their speech. Besides the organs at Doncaster and Northampton, the Schulzes have instruments in England at churches at Armley; Leeds (in conjunction with Hill); Hindley, Wigan; Tyne Dock, South Shields; Harrogate; also at Northampton Town Hall; Charter-house School, Godalming; Seaton Carew (Thos. Walker, Esq.). W. B. S.

SCHUMANN, CLARA JOSEPHINE, wife of Robert Schumann, one of the greatest pianoforte players that the world has ever heard, was the daughter of FRIEDRICH WIECK, and was born at Leipzig, Sept. 13, 1819. She began the PF. at a very early age under her father's guidance; and on Oct. 20, 1828, when she had just completed her ninth year, made her debut in public at a concert of Frä. Perthes's, where she played with Emilie Reinhold in Kalkbrenner's 4-hand variations on the March from 'Moise.' The notices in the Leipzig *Tageblatt* and *A.M.Z.* show that she was already an object of much interest in the town. At this time she was accustomed to play the concertos of Mozart and Hummel with orchestra by heart, and thus early did she lay the foundation of that sympathy with the orchestra which so distinguished her. On Nov. 8, 1830, when just over eleven, she gave her first concert at the Gewandhaus under the good old name of 'Musikalische Akademie'; and her performance is cited by the *A.M.Z.* as a proof how far application and good teaching can bring great natural gifts at so early an age. Her solo pieces were: *Rondo brillant* (op. 101), Kalkbrenner; *Variations brillantes* (op. 23), Herz; and variations of her own on an original theme; and she is praised by the critic just referred to for already possessing the brilliant style of the greatest players of the day. Her next appearance was on May 9, 1831, in pieces by Pixis and Herz—still bravura music. In the same year a set of four polonaises by her was published by Hofmeister. About this time she was taken to Weimar, Cassel, and Frankfurt, and in the spring of 1832 to Paris, where she gave a concert on April 9 at which she extemporised for the first time in public. Mendelssohn was there at the time, but was suffering from an attack of cholera, and thus the meeting of these two great artists—destined to become such great friends—was postponed. On July 9, and July 31, 1832, she gives two other 'Musikalische Akademien' in Leipzig, at which, besides Pixis and Herz, we find Chopin's variations on 'La ci darem' (op. 2), a piece which, only a few months before, Robert Schumann had welcomed with his first and one of his most

spirited reviews. At the former of these two concerts Frä. Livia Gerhardt (Mme. Frege) sang in public for the first time.

On Sept. 30, 1832, Clara Wieck seems to have made her debut at the Gewandhaus Concerts in Moscheles's G minor Concerto, and from that time forward her name is regularly found in the programmes of those famous Subscription Concerts, as well as of others held in the same hall. Hitherto, it will be observed, her music has been almost exclusively bravura; but on Nov. 9, 1835, she played with Mendelssohn and Rakemann in Bach's triple Concerto in D minor, and about the same time Moscheles mentions her performance of one of Schubert's Trios, and Beethoven's Trio in B♭. On Dec. 15 she played Beethoven's Choral Fantasia. In the winter of 1837 she made her first visit to Vienna, and remained during the winter playing with great success, and receiving the appointment of 'Kk. Kammer-virtuosin.'

Schumann had been on a very intimate footing in the Wiecks' house for some years, but it was not till the end of 1835 that his attachment to Clara was openly avowed, and it was not till Sept. 12, 1840 (the eve of her birthday), after a series of delays and difficulties which are sufficiently touched upon in the article on Robert Schumann, that they were married. For eighteen months after this event Mme. Schumann remained in Leipzig. We find her name in the Gewandhaus programmes attached to the great masterpieces, but occasionally playing more modern music, as on Dec. 6, 1841, when she twice played with Liszt in a piece of his for two pianos. In the early part of 1842 she and her husband made a tour to Hamburg, which she continued alone as far as Copenhagen. Early in 1844 they went together to St. Petersburg, and at the end of the year Schumann's health made it necessary to leave Leipzig, and remove to Dresden, where they resided till 1850. During all this time Mme. Schumann's life was bound up with her husband's, and they were separated only by the exigencies of her profession. She devoted herself not only to his society, but to the bringing out of his music, much of which—such as the PF. Concerto, the Quintet, Quartet, and Trios, etc.—owed its first reputation to her. In 1846 she met Jenny Lind for the first time at Leipzig, and in the winter of the same year they met again at Vienna, when the two great artists appeared together at a concert in December. England, though at one time in view, was reserved to a later day. At Paris she never played after the early visit already spoken of. The trials which this faithful wife must have undergone during the latter part of her husband's life, from his first attempt at self-destruction to his death, July 19, 1856, need only be alluded to here. It was but shortly before the fatal crisis that she made her first visit to

England, playing at the Philharmonic on April 14 and 28, at the Musical Union on four separate occasions, and elsewhere, her last appearance being on June 24. On June 17 she gave an afternoon 'Recital' at the Hanover Square rooms, the programme of which is worth preserving. 1. Beethoven, Variations in E♭ on Theme from the Eroica; 2. Sterndale Bennett, Two Diversions (op. 17), Suite de pièces (op. 24, No. 1); 3. Clara Schumann, Variations on theme from Schumann's 'Bunte Blätter'; 4. Brahms, Sarabande and Gavotte in the style of Bach; 5. Scarlatti, Piece in A major; 6. R. Schumann's Carnaval (omitting Eusebius, Florean, Coquette, Replique, Estrella, and Aven). She returned from London to Bonn just in time to receive her husband's last breath (July 29, 1856).

After this event she and her family resided for some years in Berlin with her mother, who had separated from Wieck and had married a musician named Bargiel; and in 1863 she settled at Baden-Baden, in the Lichtenthal, which then became her usual headquarters till 1874.

Her reception in this conservative country was hardly such as to encourage her to repeat her visit; she appeared again at the Philharmonic on June 29, 1857, and on June 27, 1859. In a few years the appreciation of Schumann's music had greatly increased on this side the Channel; and the anxiety of amateurs to hear an artist whose fame on the continent was so great, became so loudly expressed, that Mme. Schumann was induced to make another visit. She played at the Philharmonic, May 29, 1865, Musical Union, April 18, 25, and June 6, etc. etc. In 1867 she returned again, and after this her visit became an annual one up to 1882, interrupted only in 1878, 1879, 1880, when health and other circumstances did not permit her to travel. She came again in 1885, 1886, 1887, and 1888. In 1866 she again visited Austria, and gave six concerts at Vienna; and any coldness that the Viennese may have previously shown towards her husband's compositions was then amply atoned for.

In 1878 she accepted the post of principal teacher of the pianoforte in the Conservatoire founded by Dr. Hoch at Frankfurt, where she lived and worked with great success until the end of her life. She died there, May 20, 1896.

This is not the place or the time to speak of the charm of Madame Schumann's personality, of the atmosphere of noble and earnest simplicity which surrounded her in private life no less than in her public performance. Those who had the privilege of her acquaintance do not need such description, and for those who had not it is unnecessary to make the attempt. She was deeply and widely beloved, and at a time when there appeared to be a prospect of her being compelled by ill health to abandon her public appearances, the esteem and affection

of her numerous friends took the practical form of a subscription, and a considerable sum of money was raised in Germany and England for her use.

I am indebted to Mr. Franklin Taylor for the following characterisation of Mme. Schumann's style and works.

As an artist, Mme. Schumann's place was indubitably in the very first rank, indeed she may perhaps be considered to stand higher than any of her contemporaries, if not as regards the possession of natural or acquired gifts, yet in the use she made of them. Her playing was characterised by an entire absence of personal display, a keen perception of the composer's meaning, and an unfailing power of setting it forth in perfectly intelligible form. These qualities would lead one to pronounce her one of the most intellectual of players, were it not that that term has come to imply a certain coldness or want of feeling, which was never perceived in her playing. But just such a use of the intellectual powers as serves the purposes of true art, ensuring perfect accuracy in all respects, no liberties being taken with the text, even when playing from memory, and above all securing an interpretation of the composer's work which is at once intelligible to the listener—this certainly formed an essential element of her playing, and it is worth while insisting on this, since the absence of that strict accuracy and perspicuity is too often mistaken for evidence of deep emotional intention. With all this, however, Mme. Schumann's playing evinced great warmth of feeling, and a true poet's appreciation of absolute beauty, so that nothing ever sounded harsh or ugly in her hands; indeed it may fairly be said that after hearing her play a fine work (she never played what is not good), one always became aware that it contained beauties undiscovered before. This was, no doubt, partly due to the peculiarly beautiful quality of the tone she produced, which was rich and vigorous without the slightest harshness, and was obtained, even in the loudest passages, by pressure with the fingers rather than by percussion. Indeed, her playing was particularly free from violent movement of any kind; in passages, the fingers were kept close to the keys and squeezed instead of striking them, while chords were grasped from the wrist rather than struck from the elbow. She founded her *technique* upon the principle laid down by her father, F. Wieck, who was also her instructor, that 'the touch (*i.e.* the blow of the finger upon the key) should never be audible, but only the musical sound,' an axiom the truth of which there is some danger of overlooking, in the endeavour to compass the extreme difficulties of certain kinds of modern pianoforte music.

Mme. Schumann's *répertoire* was very large,

CLARA JOSEPHINE SCHUMANN

extending from Scarlatti and Bach to Mendelssohn, Chopin, and Brahms, and it would be difficult to say that she excelled in her rendering of any one composer's works rather than another's, unless it be in her interpretation of her husband's music. And even here, if she was pronounced by general opinion to be greatest in her playing of Schumann, it is probably because it was to her inimitable performances that we owe, in this country at least, the appreciation and love of his music now happily become universal, and thus the player shared in the acknowledgment she won for the composer.

Mme. Schumann's compositions, though not very numerous, evince that earnestness of purpose which distinguished her work in general. Even her earliest essays, which are short pianoforte-pieces written for the most part in dance-form, are redeemed from any approach to triviality by their interesting rhythms, and in particular by the freshness of their modulations, the latter being indeed in some cases original even to abruptness. Their general characteristic is that of delicacy rather than force, their frequent *staccato* passages and the many skipping grace-notes which are constantly met with requiring for their performance a touch of the daintiest lightness; although qualities of an opposite kind are occasionally shown, as in the 'Souvenir de Vienne,' op. 9, which is a set of variations in *bravura* style on Haydn's Austrian Hymn. Among her more serious compositions of later date are a Trio in G minor for pianoforte, violin and violoncello, op. 17, which is thoroughly musicianlike and interesting, three charming Cadenzas to Beethoven's Concertos, opp. 37 and 58, and a set of three Preludes and Fugues, op. 16, which deserve mention not only on account of their excellent construction, but as forming a most valuable study in *legato* part-playing. There is also a Piano Concerto, op. 7, dedicated to Spohr, of which the passages (though not the modulations) remind one of Hummel; but it is a short work and not well balanced, the first movement being reduced to a single solo, which ends on the dominant, and leads at once to the Andante.

In the later works, as might naturally be expected, there are many movements which bear traces of the influence of Schumann's music both in harmony and rhythm, but this influence, which first seems perceptible in the 'Soirées Musicales,' opp. 5, 6, is afterwards less noticeable in the pianoforte works than in the songs, many of which are of great beauty, and some of which (see op. 12) were incorporated into collections by Schumann. Her 'Liebst du um Schönheit' is one of the most expressive songs in existence. Schumann himself has made use of themes by Mme. Schumann in several instances, namely in his Impromptu, op. 5 (on the theme of her Variations op. 3, which

are dedicated to him), in the Andantino of his Sonata in F minor op. 14, and (as a 'motto') in the 'Davidshündertänze,' op. 6.

The following is a list of Mme. Schumann's compositions:—

Op.	Op.
1. Quatre Polonaises.	15. Four pièces fugitives.
2. Caprices en forme de Valse.	16. Three preludes and fugues.
3. Romance variée.	17. Trio, PF. and Strings, G minor.
4. Valse Romantique.	18. (?)
5, 6. Soirées Musicales, 10 Pièces caractéristiques.	19. (?)
7. Concerto for pianoforte in A minor.	20. Variations on a theme by Robert Schumann. ¹
8. Variations de Concert, in C, on the Cavatina in 'Il Pirata.'	21. Three romances.
9. Souvenir de Vienne in E♭, impromptu.	22. Three romances for PF. and violin.
10. Scherzo, D minor.	23. 8 Lieder from Rollet's 'Jugend.'
11. 3 Romances (Mecchetti).	'Liebesanber,' Lied by Geibel, Andante and Allegro, PF. solo.
12. 3 Songs in R. Schumann's op. 37 (Nos. 2, 4, 11).	Cadenzas to Beethoven's Concertos in C minor and G, and to Mozart's in G minor.
13. 8 Lieder.	
14. 2nd Scherzo, in C minor.	

[A detailed biography is in course of publication. It is by Berthold Litzmann, and two volumes have appeared (1902 and 1906).] c.

SCHUMANN, GEORG ALFRED, horn at Königstein on the Elbe, Oct. 25, 1866, was taught the violin by his father, the town musical director there, and the organ by his grandfather, with such good results that at nine years old he played in the orchestra, and at twelve did the organist's duty. At fifteen he played the piano in public, and after learning from some Dresden masters, he went to the Leipzig Conservatorium, remaining there from 1881 to 1888. In 1891-96 he was conductor of a choral society at Danzig, and from 1896 to 1899 director of the Philharmonic orchestra and choir in Bremen. In 1900 he was appointed royal Professor, and made head of the Berlin Singakademie. His compositions, though not very numerous as yet, are in all the larger forms excepting opera. His opus 3 is a choral work, 'Amor und Psyche'; a symphony in B minor won a prize, but has apparently not been published; his first published work for orchestra is a suite 'Zur Karnevalszeit,' op. 22. Op. 24 is a set of Symphonic Variations on 'Wer nur den lieben Gott lässt walten,' for organ and orchestra, and op. 30, 'Variationen und Doppelfuge über ein lustiges Thema für grosses Orchester,' shows much humour and technical skill; a serenade, op. 34, and an overture, 'Liebesfrühling,' are among the orchestral works which have reached their climax in a symphony in F minor, op. 42. Two choral works, the 'Totenklage,' op. 33, and 'Sehnsucht,' op. 40, deserve mention, and his chamber music includes variations and fugue on a theme of Beethoven for two pianos, a quintet for piano and strings in E minor, op. 18, a violoncello sonata, op. 19, two trios, in F and G, two violin sonatas in E minor and C sharp minor, and a pianoforte quartet for piano and strings in F minor, op. 29. Schumann belongs to the more conservative of the two great parties in

¹ From 'Bunte Blätter,' op. 99, No. 4; also varied by Brahms, op. 9.

modern German music, and his sound musicianship the originality of his ideas, and the skill of their treatment, mark him as a worthy member of the party which most strenuously resists the attacks of the ultra-modern writers. (Paul Hielscher, in *Monographien moderner Musiker*; Riemann's *Lexikon*.) M.

SCHUMANN, ROBERT ALEXANDER, born June 8, 1810, at Zwickau in Saxony, was the youngest son of Friedrich August Gottlob Schumann (born 1773), a bookseller, whose father was a clergyman in Saxony; the composer's mother, Johanna Christiana (born 1771), was the daughter of Herr Schnabel, Rathschirurgus (surgeon to the town council) at Zeitz. Schumann cannot have received any incitement towards music from his parents; his father, however, took a lively interest in the *belles lettres*, and was himself known as an author. He promoted his son's leanings towards art in every possible way, with which however his mother seems to have had no sympathy. In the small provincial town where Schumann spent the first eighteen years of his life there was no musician capable of helping him beyond the mere rudiments of the art. There was a talented town-musician, who for several decades was the best trumpeter in the district,¹ but, as was commonly the case, he practised his art simply as a trade. The organist of the Marienkirche, J. G. Kuntzsch, Schumann's first pianoforte teacher, after a few years declared that his pupil was able to progress alone, and that his instruction might cease. He was so impressed with the boy's talent, that when Schumann subsequently resolved to devote himself wholly to art, Kuntzsch prophesied that he would attain to fame and immortality, and that in him the world would possess one of its greatest musicians. Some twenty years later, in 1845, Schumann dedicated to him his *Studies for the Pedal-Piano*, op. 56. [See vol. ii. p. 612.]

His gift for music showed itself early. He began to compose, as he tells us himself, before he was seven. According to this he must have begun to play the piano, at latest, in his sixth year. When he was about eleven, he accompanied at a performance of Friedrich Schneider's 'Weltgericht,' conducted by Kuntzsch, standing up at the piano to do it. At home, with the aid of some young musical companions, he got up performances of vocal and instrumental music which he arranged to suit their humble powers. In more extended circles, too, he appeared as a pianoforte-player, and is said to have had a wonderful gift for extempore playing. His father took steps to procure for him the tuition of C. M. von Weber, who had shortly before (1817) been appointed Capellmeister in Dresden. Weber declared himself ready to undertake the guidance of the young genius, but the scheme fell through for reasons

unknown. From that time Schumann remained at Zwickau, where circumstances were not favourable to musical progress; he was left to his own instruction, and every inducement to further progress must have come from himself alone. Under these circumstances, a journey made when he was nine years old to Carlsbad, where he first heard a great pianoforte-player—Ignaz Moscheles—must have been an event never to be forgotten; and indeed during his whole life he retained a predilection for certain of Moscheles's works, and a reverence for his person. The influence of the pianoforte technique of Moscheles on him appears very distinctly in the variations published as op. 1.

At the age of ten he entered the fourth class at the Gymnasium (or Academy) at Zwickau, and remained there till Easter, 1828. He had then risen to the first class, and left with a certificate of qualification for the University. During this period his devotion to music seems to have been for a time rather less eager, in consequence of the interference of his school-work and of other tastes. Now, at the close of his boyhood, a strong interest in poetry, which had been previously observed in him, but which had meanwhile been merged in his taste for music, revived with increased strength; he rummaged through his father's book-shop, which favoured this tendency, in search of works on the art of poetry; poetical attempts of his own were more frequent, and at the age of fourteen Robert had already contributed some literary efforts to a work brought out by his father and called *Bildergalerie der berühmtesten Menschen aller Völker und Zeiten*. That he had a gift for poetry is evident from two Epithalamia given by Wasielewski (*Biographie*, 3rd ed., Bonn, 1880, p. 305). In 1827 he set a number of his own poems to music, and it is worthy of note that it was not by the classical works of Goethe and Schiller that Schumann was most strongly attracted. His favourite writers were Schulze, author of 'Die bezauberte Rose'; the unhappy Franz von Sonnenberg; Byron, and, above all, Jean Paul, with whose works he made acquaintance in his seventeenth year (at the same time as with the compositions of Franz Schubert). These poets represent the cycle of views, sentiments, and feelings, under whose spell Schumann's poetical taste, strictly speaking, remained throughout his life. And in no musician has the influence of his poetical tastes on his music been deeper than in him.

On March 29, 1828, Schumann matriculated at the University of Leipzig as *Studiosus Juris*. It would have been more in accordance with his inclinations to have devoted himself at once wholly to art, and his father would no doubt have consented to his so doing; but he had lost his father in 1826, and his mother would not hear of an artist's career. Her son

¹ Schumann's *Gesammelte Schriften*, II. 126 (1st ed.).

dutifully submitted, although he was decidedly averse to the study of jurisprudence. Before actually joining the university he took a short pleasure trip into South Germany, in April 1828. He had made acquaintance in Leipzig with a fellow-student named Gisbert Rosen; and a common enthusiasm for Jean Paul soon led to a devoted and sympathetic friendship. Rosen went to study at Heidelberg, and the first object of Schumann's journey was to accompany him on his way. In Munich he made the acquaintance of Heine, in whose house he spent several hours. On his return journey he stopped at Bayreuth to visit Jean Paul's widow, and received from her a portrait of her husband.

During the first few months of his university life, Schumann was in a gloomy frame of mind. A students' club to which he belonged for a time, struck him as coarse and shallow, and he could not make up his mind to begin the course of study he had selected. A large part of the first half-year had passed by and still—as he writes to his friend—he had been to no college, but 'had worked exclusively in private, that is to say, had played the piano and written a few letters and Jean Pauliads.'

In this voluntary inactivity and solitude the study of Jean Paul must certainly have had a special charm for him. That writer, unsurpassed in depicting the tender emotions, with his dazzling and even extravagant play of digressive fancy, his excess of feeling over dramatic power, his incessant alternations between tears and laughter, has always been the idol of sentimental women and ecstatic youths. 'If everybody read Jean Paul,' Schumann writes to Rosen, 'they would be better-natured, but they would be unhappier; he has often brought me to the verge of desperation, still the rainbow of peace bends serenely above all the tears, and the soul is wonderfully lifted up and tenderly glorified.' Even in his latest years Schumann would become violently angry if any one ventured to doubt or criticise Jean Paul's greatness as an imaginative writer, and the close affinity of their natures is unmistakable. Schumann himself tell us how once, as a child, at midnight, when all the household were asleep, he had in a dream and with his eyes closed, stolen down to the old piano, and played a series of chords, weeping bitterly the while. So early did he betray that tendency to overstrung emotion which found its most powerful nourishment in Jean Paul's writings.

Music, however, is a social art, and it soon brought him back again to human life. In the house of Professor Carus¹ he made several interesting acquaintances, especially that of Marschner, who was then living in Leipzig, and had brought out his 'Vampyr' there in the spring of 1828. His first meeting with Wieck,

the father of his future wife, took place in the same year; and Schumann took several pianoforte lessons from him. Several music-loving students met together there, and all kinds of chamber-music were practised. They devoted themselves with especial ardour to the works of Schubert, whose death, on Nov. 19, 1828, was deeply felt by Schumann. Impelled by Schubert's example, he wrote at this time eight Polonaises for four hands; also a Quartet for piano and strings, and a number of songs to Byron's words; all of which remain unpublished. Besides these occupations, he made a more intimate acquaintance with the clavier works of Sebastian Bach. It is almost self-evident that what chiefly fascinated Schumann in Bach's compositions was the mysterious depth of sentiment revealed in them. Were it not so, it would be impossible to conceive of Bach in connection with the chaotic Jean Paul; and yet Schumann himself says that in early life Bach and Jean Paul had exercised the most powerful influence upon him. Considering the way in which his musical education had been left to itself, the fact of his so thoroughly appreciating the wealth and fulness of life in Bach's compositions at a time when Bach was looked upon only as a great contrapuntist, is clear evidence of the greatness of his own genius, which indeed had some affinity to that of Bach. The ingenuity of outward form in Bach's works was neither strange nor unintelligible to him. For although Schumann had hitherto had no instructor in composition, it need scarcely be said that he had long ago made himself familiar with the most essential parts of the composer's art, and that constant practice in composition must have given him much knowledge and skill in this branch of his art.

At Easter, 1829, Schumann followed his friend Rosen to the university of Heidelberg. The young jurists were perhaps tempted thither by the lectures of the famous teacher, A. F. J. Thibaut; but it is evident that other things contributed to form Schumann's resolution: the situation of the town,—a perfect Paradise,—the gaiety of the people, and the nearness of Switzerland, Italy, and France. A delightful prospect promised to open to him there: 'That will be life indeed!' he writes to his friend; 'at Michaelmas we will go to Switzerland, and from thence who knows where?' On his journey to Heidelberg chance threw him into the society of Willibald Alexis. Alexis had trodden the path which Schumann was destined to follow, and had reached art by way of the law. No doubt this added to Schumann's interest in the acquaintance. It cannot be denied that even in Heidelberg Schumann carried on his legal studies in a very desultory manner, though Thibaut himself was a living proof that that branch of learning could co-exist with a true love and comprehension of music. Only a few years before (in 1825) Thibaut had published

¹ *Patellinus Carus, sed clarus inter doctos.* (Berlioz, *Voyage Musical*, Letter IV.)

his little book, *Ueber Reinheit der Tonkunst*, a work which at that time essentially contributed to alter the direction of musical taste in Germany. Just as in his volume Thibaut attacks the degenerate state of church music, Schumann, at a later date, was destined to take up arms in word and deed, against the flat insipidity of concert and chamber music. Nevertheless the two men never became really intimate; in one, no doubt, the *doctor* too greatly preponderated, and in the other the artist. Thibaut himself subsequently advised Schumann to abandon the law, and devote himself entirely to music.

Indeed, if Schumann was industrious in anything at Heidelberg it was in pianoforte-playing. After practising for seven hours in the day, he would invite a friend to come in the evening and play with him, adding that he felt in a particularly happy vein that day; and even during an excursion with friends he would take a dumb keyboard with him in the carriage. By diligent use of the instruction he had received from Wieck in Leipzig, he brought himself to high perfection as an executant; and at the same time increased his skill in improvisation. One of his musical associates at this time used afterwards to say that from the playing of no other artist, however great, had he ever experienced such ineffaceable musical impressions; the ideas seem to pour into the player's mind in an inexhaustible flow, and their profound originality and poetic charm already clearly foreshadowed the main features of his musical individuality. Schumann appeared only once in public, at a concert given by a musical society at Heidelberg, where he played Moscheles's variations on the 'Alexandermarsch' with great success. He received many requests to play again, but refused them all, probably, as a student, finding it not expedient.

It will no doubt be a matter of surprise that Schumann could have justified himself in thus spending year after year in a merely nominal study of the law, while in fact wholly given up to his favourite pursuit. A certain lack of determination, a certain shrinking from anything disagreeable, betray themselves during these years as his general characteristics, and were perhaps an integral part of his nature. At the same time his conduct is to a certain extent explicable, by the general conditions of German student-life. Out of the strict discipline of the Gymnasium the student steps at once into the unlimited freedom of the University. It was the intoxicating poetry of the student life which Schumann drank in deep draughts. Its coarseness was repellent to his refined nature, and his innate purity and nobility guarded him against moral degradation; but he lived like a rover rejoicing in this bright world as it lies open to him, worked little, spent much, got into debt, and was as happy as a fish in the water. Besides its tender and rapturous side,

his nature had a vein of native sharpness and humour. With all these peculiarities he could live his student's life to the full, though in his own apparently quiet and unassertive way. The letters in which he discusses money-matters with his guardian, Herr Rudel, a merchant of Zwicken, show how he indulged his humorous mood even in these: 'Dismal things I have to tell you, respected Herr Rudel,' he writes on June 21, 1830; 'in the first place, that I have a *repelitorium* which costs eighty gulden every half-year, and secondly, that within a week I have been under arrest by the town (don't be shocked) for not paying thirty gulden of other college dues.' And on another occasion, when the money he had asked for to make a journey home for the holidays did not arrive: 'I am the only student here, and wander alone about the streets and woods, forlorn and poor, like a beggar, and with debts into the bargain. Be kind, most respected Herr Rudel, and only this once send me some money—only money—and do not drive me to seek means of setting out which might not be pleasant to you.' The reasons he employs to prove to his guardian that he ought not to be deprived of means for a journey into Italy are most amusing: 'At any rate I shall have made the journey: and as I *must* make it once, it is all the same whether I use the money for it now or later.' His compositions, too, plainly show how deeply the poetical aspect of student life had affected him, and had left its permanent mark on him. I need only remind the reader of Kerner's 'Wanderlied' (op. 35, No. 3), dedicated to an old fellow-student at Heidelberg, and of Eichendorff's 'Frühlingsfahrt' (op. 45, No. 2). Among German songs of the highest class, there is not one in which the effervescent buoyancy of youth craving for distant fights has found such full expression, at once so thoroughly German and so purely ideal, as in this 'Wanderlied,' which indeed, with a different tune, is actually one of the most favourite of student songs. 'Frühlingsfahrt' tells of two young comrades who quit home for the first time, one of whom soon finds a regular subsistence and a comfortable home, while the other pursues glittering visions, yields to the thousand temptations of the world, and finally perishes; it is a portrait of a German student drawn from the life, and the way in which Schumann has treated it shows that he was drawing on the stores of his own experience.

Several journeys also served to infuse into Schumann's student life the delight of free and unrestrained movement. In August 1829 he went for a pleasure trip to North Italy, quite alone, for two friends who had intended to go failed him. But perhaps the contemplative and dreamy youth enjoyed the loveliness of the country and the sympathetic Italian nature only the more thoroughly for being alone. Nor were little adventures of gallantry wanting. Frag-

ments of a diary kept at this time, which are preserved (Wasielewski, p. 325), reveal to us the pleasant sociableness of the life which Schumann now delighted in. The Italian music which he then heard could indeed do little towards his improvement, except that it gave him, for the first time, the opportunity of hearing Paganini. The deep impression made by that remarkable player is shown by Schumann's visit to Frankfort (Easter, 1830) with several friends to hear him again, and by his arrangement of his 'Caprices' for the pianoforte (opp. 3 and 10). Shortly after this he seems to have heard Ernt also in Frankfort. In the summer of 1830 he made a tour to Strasburg, and on the way back to Saxony visited his friend Rosen at Detmold.

When Schumann entered upon his third year of study, he made a serious effort to devote himself to jurisprudence; he took what was called a *Repetitorium*, that is, he began going over again with considerable difficulty, and under the care and guidance of an old lawyer, what he had neglected during two years. He also endeavoured to reconcile himself to the idea of practical work in public life or the government service. His spirit soared up to the highest goal, and at times he may have flattered his fancy with dreams of having attained it; but he must have been convinced of the improbability of such dreams ever coming true; and indeed he never got rid of his antipathy to the law as a profession, even in the whole course of his *Repetitorium*. On the other hand, it must be said, that if he was ever to be a musician, it was becoming high time for it, since he was now twenty years old. Thus every consideration urged him to the point. Schumann induced his mother, who was still extremely averse to the calling of a musician, to put the decision in the hands of Friedrich Wieck. Wieck did not conceal from him that such a step ought only to be taken after the most thorough self-examination, but if he had already examined himself, then Wieck could only advise him to take the step. Upon this his mother yielded, and Robert Schumann became a musician. The delight and freedom which he inwardly felt when the die was cast, must have shown him that he had done right. At first his intention was only to make himself a great pianoforte-player, and he reckoned that in six years he would be able to compete with any pianist. But he still felt very uncertain as to his gift as a composer; the words which he wrote to his mother on July 30, 1830—'Now and then I discover that I have imagination, and perhaps a turn for creating things myself'—sound curiously wanting in confidence, when we remember how almost exclusively Schumann's artistic greatness was to find expression in his compositions.

He quitted Heidelberg late in the summer of 1830, in order to resume his studies with

Wieck in Leipzig. He was resolved, after having wasted two years and a half, to devote himself to his new calling with energetic purpose and manly vigour. And faithfully did he keep to his resolution. The plan of becoming a great pianist had, however, to be given up after a year. Actuated by the passionate desire to achieve a perfect *technique* as speedily as possible, Schumann devised a contrivance by which the greatest possible dexterity of finger was to be attained in the shortest time. By means of this ingenious appliance the third finger was drawn back and kept still, while the other fingers had to practise exercises. But the result was that the tendons of the third finger were overstrained, the finger was crippled, and for some time the whole right hand was injured. This most serious condition was alleviated by medical treatment. Schumann recovered the use of his hand, and could, when needful, even play the piano; but the third finger remained useless, so that he was for ever precluded from the career of a virtuoso. Although express evidence is wanting, we may assume with certainty that this unexpected misfortune made a deep impression upon him; he saw himself once more confronted with the question whether it was advisable for him to continue in the calling he had chosen. That he answered it in the affirmative shows that during this time his confidence in his own creative genius had wonderfully increased. He soon reconciled himself to the inevitable, learned to appreciate mechanical dexterity at its true value, and turned his undivided attention to composition. He continued henceforth in the most friendly relations with his pianoforte-master, Wieck; indeed until the autumn of 1832 he lived in the same house with him (Grimmaische Strasse, No. 36), and was almost one of the family. For his instructor in composition, however, he chose Heinrich Dorn, at that time conductor of the opera in Leipzig, subsequently Capellmeister at Riga, Cologne, and Berlin, who lived till 1892. Dorn was a clever and sterling composer; he recognised the greatness of Schumann's genius, and devoted himself with much interest to his improvement.¹ It was impossible as yet to confine Schumann to a regular course of composition: he worked very diligently, but would take up now one point of the art of composition and now another. In 1836 he writes to Dorn at Riga that he often regrets having learnt in too irregular a manner at this time; but when he adds directly afterwards that, notwithstanding this, he had learnt more from Dorn's teaching than Dorn would believe, we may take this last statement as true. Schumann was no longer a tyro in composition, but had true musical genius, and his spirit was already matured. Under such

¹ Schumann's gratitude to him is thus expressed:—"The man who first gave a hand to me as I climbed upwards, and, when I began to doubt myself, drew me aloft so that I should see less of the common herd of mankind, and more of the pure air of art."

circumstances he was justified in learning in his own way.

In the winter of 1832-33, he lived at Zwickau, and for a time also with his brothers at Schneeberg. Besides a pianoforte-concerto, which still remains a fragment, he was working at a symphony in G minor, of which the first movement was publicly performed in the course of the winter both at Schneeberg and Zwickau. If we may trust the evidence of the *Musikalisches Wochenblatt*, Leipzig, 1875, p. 180, the whole symphony was performed at Zwickau in 1835, under Schumann's own direction, and the last movement was almost a failure.

At all events the symphony was finished, and Schumann expected it to be a great success; in this he must have been disappointed, for it has never been published. The first performance of the first movement at Zwickau took place at a concert given there on Nov. 18, 1832, by Wieck's daughter Clara, who was then thirteen years of age. Even then the performances of this gifted girl, who was so soon to take her place as the greatest female pianist of Germany, were astonishing, and by them, as Schumann puts it, 'Zwickau was fired with enthusiasm for the first time in its life.' It is easily conceivable that Schumann himself was enthusiastically delighted with Clara, adorned as she was with the twofold charm of childlike sweetness and artistic genius. 'Think of perfection,' he writes to a friend about her on April 5, 1833, 'and I will agree to it.' And many expressions in his letters seem even to betray a deeper feeling, of which he himself did not become fully aware until several years later.

Schumann's circumstances allowed him to revisit Leipzig in March 1833, and even to live there for a time without any definite occupation. He was not exactly well off, but he had enough to enable him to live as a single man of moderate means. The poverty from which so many of the greatest musicians have suffered, never formed part of Schumann's experience. He occupied himself with studies in composition chiefly in the contrapuntal style, in which he had taken the liveliest interest since making the acquaintances of Bach's works; besides this his imagination, asserting itself more and more strongly, impelled him to the creation of free compositions. From this year date the impromptus for piano on a romance by Clara Wieck, which Schumann dedicated to her father, and published in August 1833, as op. 5. In June he wrote the first and third movements of the G minor Sonata (op. 22), and at the same time began the F# minor Sonata (op. 11) and completed the Toccata (op. 7), which had been begun in 1829. He also arranged a second set of Paganini's violin caprices for the piano (op. 10), having made a first attempt of the same kind (op. 3) in the previous year. Meanwhile he lived a quiet and almost

monotonous life. Of family acquaintances he had few, nor did he seek them. He found a faithful friend in Frau Henriette Voigt, who was as excellent a pianist as she was noble and sympathetic in soul. She was a pupil of Ludwig Berger, of Berlin, and died young in the year 1839. Schumann was wont as a rule to spend his evenings with a small number of intimate friends in a restaurant. These gatherings generally took place at the 'Kaffeebaum' (Kleine Fleischergasse, No. 3). He himself, however, generally remained silent by preference, even in this confidential circle of friends. Readily as he could express himself with his pen, he had but little power of speech. Even in affairs of no importance, which could have been transacted most readily and simply by word of mouth, he usually preferred to write. It was, moreover, a kind of enjoyment to him to muse in dreamy silence. Henriette Voigt told W. Taubert that one lovely summer evening, after making music with Schumann, they both felt inclined to go on the water. They sat side by side in the boat for an hour in silence. At parting Schumann pressed her hand and said, 'To-day we have perfectly understood one another.'

It was at these evening gatherings at the restaurant in the winter of 1833-34 that the plan of starting a new musical paper was matured. It was the protest of youth, feeling itself impelled to new things in art, against the existing state of music. Although Weber, Beethoven, and Schubert had only been dead a few years, though Spohr and Marschner were still in their prime, and Mendelssohn was beginning to be celebrated, the general characteristic of the music of about the year 1830 was either superficiality or else vulgar mediocrity. 'On the stage Rossini still reigned supreme, and on the pianoforte scarcely anything was heard but Herz and Hüntten.' Under these conditions the war might have been more suitably carried on by means of important works of art than by a periodical about music. Musical criticism, however, was itself in a bad way at this time. The periodical called *Cæcilia*, published by Schott, which had been in existence since 1824, was unfitted for the general reader, both by its contents and by the fact of its publication in parts. The *Berliner allgemeine musikalische Zeitung*, conducted by Marx, had come to an end in 1830. The only periodical of influence and importance in 1833 was the *Allgemeine musikalische Zeitung*, published by Breitkopf & Härtel of Leipzig, and at that time edited by G. W. Fink. But the narrow view taken of criticism in that periodical, its inane boldness of judgment—Schumann used to call it 'Honigpinselerei' or 'Honey-daubing'—its lenity towards the reigning insipidity and superficiality, could not but provoke contradiction from young people of high aims. And the idea of first bringing the lever to bear on the

domain of critical authorship, in order to try their strength, must have been all the more attractive to these hot-headed youths, since most of them had had the advantage of a sound scholarly education and knew how to handle their pens. On the other hand, they felt that they were not yet strong enough to guide the public taste into new paths by their own musical productions; and of all the set Schumann was the most sensible of this fact.

Such were the grounds on which, on April 3, 1834, the first number of the *Neue Zeitschrift für Musik* saw the light. Schumann himself called it the organ of youth and movement. As its motto he even chose this passage from the prologue to Shakespeare's *Henry VIII.* :—

Only they
Who come to hear a merry bawdy play,
A noise of targets, or to see a fellow
In a long motley coat guarded with yellow,
Will be deceived—

a passage which sufficiently expresses his intention of contending against an empty flattering style of criticism, and upholding the dignity of art. 'The day of reciprocal compliments,' says the preliminary notice, 'is gradually dying out, and we must confess that we shall do nothing towards reviving it. The critic who dares not attack what is bad, is but a half-hearted supporter of what is good.' The doings of 'the three arch-foes of art—those who have no talent, those who have vulgar talent, and those who, having real talent, write too much,' are not to be left in peace; 'their latest phase, the result of a mere cultivation of executive *technique*,' it is to be opposed as inartistic. 'The older time,' on the other hand, 'and the works it produced, are to be recalled with insistence, since it is only at these pure sources that new beauties in art can be found.' Moreover, the *Zeitschrift* is to assist in bringing in a new 'poetic' period by its benevolent encouragement of the higher efforts of young artists, and to accelerate its advent. The editing was in the hands of Robert Schumann, Friedrich Wieck, Ludwig Schunke, and Julius Knorr.

Of all these Schunke alone was exclusively a musician. That gifted pianist, who belonged to a widely dispersed family of esteemed musicians, came to Leipzig in 1833, and became a great friend of Schumann's, but died at the end of the following year at the early age of twenty-four. The three other editors were by education half musicians and half *litterateurs*, even Julius Knorr (born 1807) having studied philology in Leipzig. Schumann co-operated largely in Schunke's contributions (signed with the figure 3), for handling the pen was not easy to him. Hartmann of Leipzig was at first the publisher and proprietor of the *Zeitschrift*, but at the beginning of 1835 it passed into the hands of J. A. Barth of Leipzig, Schumann becoming at the same time proprietor and sole editor. He continued the undertaking under

these conditions till the end of June 1844; so that his management of the paper extended over a period of above ten years. On Jan. 1, 1845, Franz Brendel became the editor, and after the summer of 1844 Schumann never again wrote for it, with the exception of a short article¹ on Johannes Brahms to be mentioned hereafter.

Schumann's own articles are sometimes signed with a number—either 2 or some combination with 2, such as 12, 22, etc. He also concealed his identity under a variety of names—Florestan, Eusebius, Raro, Jeanquirit. In his articles we meet with frequent mention of the *Davidsbündler*, a league or society of artists or friends of art who had views in common. This was purely imaginary, a half-humorous, half-poetical fiction of Schumann's, existing only in the brain of its founder, who thought it well fitted to give weight to the expression of various views of art, which were occasionally put forth as its utterances. The characters which most usually appear are Florestan and Eusebius, two personages in whom Schumann endeavoured to embody the dual sides of his nature. The vehement, stormy, rough element is represented by Florestan; the gentler and more poetic by Eusebius. These two figures are obviously imitated from Vult and Walt in Jean Paul's *Fliegeljahre*; indeed Schumann's literary work throughout is strongly coloured with the manner of Jean Paul, and frequent reference is made to his writings. Now and then, as moderator between these antagonistic characters, who of course take opposite views in criticism, 'Master Raro' comes in. In him Schumann has conceived a character such as at one time he had himself dreamed of becoming. The explanation of the name 'Davidsbündler' is given at the beginning of a 'Shrove Tuesday discourse' by Florestan in the year 1835. 'The hosts of David are youths and men destined to slay all the Philistines, musical or other.' In the college-slang of Germany the 'Philistine' is the non-student who is satisfied to live on in the ordinary routine of every-day life, or—which comes to the same thing in the student's mind—the man of narrow, sober, prosaic views, as contrasted with the high-flown poetry and enthusiasm of the social life of a German university. Thus, in the name of Idealism, the 'Davidsbündler' wage war against boorish mediocrity, and when Schumann regarded it as the function of his paper to aid in bringing in a new 'poetical phase' in music he meant just this. Though Schumann was himself the sole reality in the 'Davidsbündlerschaft,' he indulged his fancy by introducing personages of his acquaintance whose agreement with his views he was sure of. He quietly included all the principal co-operators in the *Zeitschrift*, and even artists such as Berlioz, whom he did not know, but in whom he felt an interest, and was thus justified in writing to A. von Zuccalmaglio in

¹ *Neue Bahnen*, Oct. 28, 1853.

1836: 'By the Davidsbund is figured an intellectual brotherhood which ramifies widely, and I hope may bear golden fruit.' He brings in the brethren, who are not actually himself, from time to time in the critical discussions: and the way in which he contrives to make this motley troop of romantic forms live and move before the eyes of the reader is really quite magical. He could say with justice: 'We are now living a romance the like of which has perhaps never been written in any book.' We meet with a Jonathan, who may perhaps stand for Schunke (on another occasion, however, Schumann designates himself by this name); a Fritz Friedrich probably meant for Lyser¹ the painter, a lover of music; Serpentin is Carl Banck, a clever composer of songs, who at the outset was one of his most zealous and meritorious fellow-workers; Gottschalk Wedel is Anton von Zuccalmaglio, then living in Warsaw, who had made a name by his collection of German and foreign Volkslieder; Chiara is of course Clara Wieck, and Zilia (apparently shortened from Cecilia) is probably the same. Felix Mendelssohn appears under the name of Felix Meritis, and the name Walt occurs once (in 1836, *Aus den Büchern der Davidsbündler*, ii. Tanzliteratur). It cannot be asserted that any particular person was meant, still his direct reference to Jean Paul's *Fliegjahre* is interesting. There is also a certain Julius among the 'Davidsbündler,' probably Julius Knorr. The name occurs in Schumann's first essay on music, 'Ein opus ii.' This is not included in the *Neue Zeitschrift*, but appears in No. 49 of the *Allgemeine Musikalische Zeitung* for 1831 (then edited by Fink). The editor has prefixed a note to the effect that 'it is by a young man, a pupil of the latest school, who has given his name,' and contrasts it with the anonymous work of a reviewer of the old school discussing the same piece of music. The contrast is indeed striking, and the imaginative flights of enthusiastic young genius look strange enough among the old-world surroundings of the rest of the paper.

Schumann placed this critique—which deals with Chopin's variations on 'La ci darem'—at the beginning of his collected writings, which he published towards the close of his life (*Gesammelte Schriften*, 4 vols. Georg Wigand, Leipzig, 1854). It is a good example of the tone which he adopted in the *Neue Zeitschrift*. His fellow-workers fell more or less into the same key, not from servility, but because they were all young men, and because the reaction against the Philistine style of criticism was just then in the air. This may be plainly detected, for instance, in a critique written by Wieck for the periodical called *Cecilia*, on Chopin's airs with variations. It is easy to

understand that the total novelty of the style of writing of the *Neue Zeitschrift* should have attracted attention to music; the paper soon obtained a comparatively large circulation; and as, besides the charm of novelty and style, it offered a variety of instructive and entertaining matter, and discussed important subjects earnestly and cleverly, the interest of the public was kept up, and indeed constantly increased, from year to year. The influence exerted by Schumann on musical art in Germany through the medium of this paper, cannot but be regarded as very important.

It has been sometimes said that Schumann's literary labours must have done him mischief, by taking up time and energy which might have been better employed in composition. But this view seems to me untenable. Up to the period at which we have now arrived, Schumann, on his own statement, had merely dreamed away his life at the piano. His tendency to self-concentration, his shyness, and his independent circumstances, placed him in danger of never achieving that perfect development of his powers which is possible only by vigorous exercise. Now the editing of a journal is an effectual remedy for dreaming; and when, at the beginning of 1835, he became sole editor, however much he may have felt the inexorable necessity of satisfying his readers week after week, and of keeping his aim constantly in view, it was no doubt a most beneficial exercise for his will and energies. He was conscious of this, or he certainly would not have clung to the paper with such affection and persistency; and it is a matter of fact that the period of his happiest and most vigorous creativeness coincides pretty nearly with that during which he was engaged on the *Zeitschrift*. Hence, to suppose that his literary work was any drawback to his artistic career is an error, though it is true that as he gradually discovered the inexhaustible fertility of his creative genius, he sometimes complained that the details of an editor's work were a burthen to him. Besides, the paper was the medium by which Schumann was first brought into contact and intercourse with the most illustrious artists of his time; and living as he did apart from all the practically musical circles of Leipzig, it was almost the only link between himself and the contemporary world.

Nor must we overlook the fact that certain peculiar gifts of Schumann's found expression in his writings on musical subjects, gifts which would otherwise scarcely have found room for display. His poetic talent was probably neither rich enough nor strong enough for the production of large independent poems; but, on the other hand, it was far too considerable to be condemned to perpetual silence. In his essays and critiques, which must be regarded rather as poetic flights and sympathetic inter-

¹ Author of the sketch of Beethoven engraved at p. 225 of vol. I. of this Dictionary.

pretations than as examples of incisive analysis, his poetical gift found a natural outlet, and literature is by so much the richer for them. Nay, it is a not unreasonable speculation whether, if his imaginative powers had not found this vent they might not have formed a disturbing and marring element in his musical creations. Even as it is, poetical imagery plays an important part in Schumann's music, though without seriously overstepping the permissible limits. This, too, we may safely say, that in spite of his silent and self-contained nature, there was in Schumann a vein of the genuine *agitator*, in the best and noblest sense of the word; he was possessed by the conviction that the development of German art, then in progress, had not yet come to its final term, and that a new phase of its existence was at hand. Throughout his writings we find this view beautifully and poetically expressed, as for instance, 'Consciously or unconsciously a new and as yet undeveloped school is being founded on the basis of the Beethoven-Schubert romanticism, a school which we may venture to expect will mark a special epoch in the history of art. Its destiny seems to be to usher in a period which will nevertheless have many links to connect it with the past century.' Or again: 'A rosy light is dawning in the sky; whence it cometh I know not; but in any case, O youth, make for the light.'

To rouse fresh interest and make use of that already existing for the advancement of this new movement was one of his deepest instincts, and this he largely accomplished by means of his paper. From his pen we have articles on almost all the most illustrious composers of his generation—Mendelssohn, Taubert, Chopin, Hiller, Heller, Henselt, Sterndale Bennett, Gade, Kirchner, and Franz, as well as Johannes Brahms, undoubtedly the most remarkable composer of the generation after Schumann. On some he first threw the light of intelligent and enthusiastic literary sympathy; others he was actually the first to introduce to the musical world; and even Berlioz, a Frenchman, he eulogised boldly and successfully, recognising in him a champion of the new idea. By degrees he would naturally discern that he had thus prepared the soil for the reception of his own works. He felt himself in close affinity with all these artists, and was more and more confirmed in his conviction that he too had something to say to the world that he had not heard before. In the *Zeitschrift* he must have been aware that he controlled a power which would serve to open a shorter route for his own musical productions. 'If the publishers were not afraid of the editor, the world would hear nothing of me—perhaps to the world's advantage. And yet the black heads of the printed notes are very pleasant to behold.' 'To give up the paper would involve the loss of all the reserve
